H.R. 3467, Arms Control and Disarmament Act authorization;

H.R. 3239, Federal Communications Commission authorization.

We do not anticipate that there will be votes taken on Monday. Any votes that are ordered on the suspensions on Monday will be taken on Tuesday.

On Tuesday, the House will meet at noon and will complete any votes that are in order from Monday, and also complete action on the military construction bill, in the event that we cannot complete it today.

We will also take up H.R. 3462, Justice Department authorizations, subject to a rule being granted.

On Wednesday the House will meet at 10 a.m. and will consider H.R. 3238, Public Broadcasting Act amendments, subject to a rule being granted.

It is anticipated that perhaps two or more authorization acts from the Armed Services Committee will be taken up at the end of next week, subject to rules being granted.

Mr. MICHEL. Do I gather from the statement of the gentleman that it is presumed that if the military construction bill would not be completed today, that it would have to be completed next Tuesday, or is there still a prospect of our completing that? The program calls for our going to 5:30 today, but I know there has been some discussion that on a controversial amendment or two, such as the MX missile controversy or that Colorado site, we would be going over.

Mr. FOLEY. I think if we can conclude the military construction bill we would, but I would ask the gentleman from Georgia to comment on that.

Mr. BRINKLEY. It would have been the preference to carry the bill over entirely, but the leadership prefers that we proceed with it as scheduled.

Therefore, the subcommittee is prepared to finish the bill today.

Mr. MICHEL. Does the gentleman feel that getting started at this hour, there will be good prospects of our completing the measure?

Mr. BRINKLEY. Yes.

Mr. MICHEL. I thank the gentleman. I wonder if I might inquire of the distinguished majority whip if he has any intelligence on the Legal Services authorization that was before the Rules Committee, I believe, or whether or not a rule would be granted to make that in order for next week at any time?

Mr. FOLEY. The Rules Committee has before it the Legal Services authorization, as the gentleman knows, but it is the intention of the leadership that the Armed Services authorization bills which are mentioned will be considered on Wednesday and Thursday, and will have priority over the Legal Services authorization.

Mr. LOTT. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield.

Mr. LOTT. If I could inquire of the distinguished majority whip, I was not clear at all on the Thursday and Friday schedule. I believe the gentleman said that it is anticipated that we might take up two authorization bills from the House Armed Services Committee subject to rules being granted. That would be on Thursday?

Mr. FOLEY. That would be on Thursday or Wednesday and Thursday of next week. There might actually be more than two—two or more.

Mr. LOTT. Does the gentleman have any idea of what the schedule might be on Friday?

Mr. FOLEY. I cannot give any assurance to the gentleman at this time, but I think there is probably less than 50-50 likelihood of a session next Friday. But, I would like to have an opportunity to confirm that at a later time. I think at this time the probability is that we will not meet on Friday next, and we do not intend, of course, to meet tomorrow, assuming we have completed the business today as scheduled.

Mr. LOTT. I thank the minority leader for yielding to me.

Mr. MYERS. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Indiana.

Mr. MYERS. Mr. Speaker, in the colloquy a moment ago and the response of the gentleman from Georgia, chairman of the Subcommittee on Military Installations and Facilities, are we going to finish this bill today regardless of what time that might be, or is it still the intention to rise at 5:30 if the bill is not completed?

Mr. BRINKLEY. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield.

Mr. BRINKLEY. It is the judgment of the gentleman from Georgia that we will finish the bill today by 5:30. I understand that was the time that was generally agreed upon.

Mr. MYERS. If the gentleman will yield further, in the event we are not near completion at that time, then would we rise at that time and carry over to next week?

Mr. FOLEY. Mr. Speaker, if the gentleman will yield further, I think the gentleman will probably be assured that we will not stay very late tonight. If we are close to finishing at 5:30, I am sure the gentleman from Georgia would like to proceed and finish. If it looks like we are taking a great deal of additional time, the gentleman from Georgia will go over until Tuesday.

Mr. MICHEL. I might interject one other point; that is, having sent the supplemental bill over to the other body with an amendment in disagreement, which is one of a bit of volatility on that amendment, that might suggest that under those conditions we would still have to make certain that we are around here to be absolutely sure that that supplemental was finalized, because as the gentleman well knows, the 5th of June was the date on which all authorizations for spending ceased.

Mr. FOLEY. If the gentleman will yield further, we have an obligation to conclude the supplemental appropriation bill which carries a continuing resolution with it. If the bill does not come back in sufficient time to dispose of today, we will come in tomorrow and, if there is permission to do so, probably recess and wait the arrival of the action by the other body.

Mr. MICHEL. I thank the gentleman.

Mr. MYERS. That is 5½ hours. The other body is slow at times, but surely the other body can complete that little amendment in a 5½-hour period.

NATIONAL ITALIAN-AMERICAN HERITAGE WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from the further consideration of the resolution (H. Res. 145) expressing the sense of the House of Representatives that the week commencing on June 7, 1981, should be designated as "National Italian-American Heritage Week," and ask for its immediate consideration.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. RINALDO. Mr. Speaker, I reserve the right to object, but I shall not object. I am only doing this for the purpose of asking the gentleman from New York for an explanation of the resolution.

Mr. GARCIA. Mr. Speaker, will the gentleman yield?

Mr. RINALDO. I yield to the gentleman from New York.

Mr. GARCIA. Mr. Speaker, if I may, I would like to read the resolution. It says:

Whereas the House of Representatives fully recognizes that it is essential for the people of the United States of America to understand and respect the rich heritage of all American ethnic groups if we are to maintain and foster national unity;

Whereas the many great contributions of Italian-Americans to our country must be recognized and the deep Western roots of Italian-American culture, history, and traditions must be appreciated; and

Whereas Italian-Americans, like Columbus, the famous Italian geographer-navigator-explorer, have had to rise by using individual initiative, imagination, and resourcefulness—traits that have distinguished the American character and made us a Nation of individuals who time after time have pressed forward to victory in situations that seemed to promise certain defeat: Now, therefore, be it

Resolved, That it is the sense of the House of Representatives that the week commencing on June 7, 1981, should be designated as "National Italian-American Heritage Week" and that the people of the United States should observe such week with appropriate ceremonies and activities.

What it essentially says, if my colleague from New Jersey would continue to yield, is that I believe, as many Members of the House do, and as the gentleman from New Jersey does, as the introducer of this resolution, that the contributions of Italian-Americans within the United States have been significant. I believe that this resolution is a resolution that is well deserved.

Mr. RINALDO. Mr. Speaker, further reserving the right to object, every Member of this House, from Maine to Florida, from New Jersey to Hawaii, represents Italian-American citizens.

There are some 25 million U.S. citizens who trace their ancestry to Italian soil.

Before many of our original 13 colonies were settled Italian-Americans made their homes at Jamestown, Va., where Venetian silk artisans and glassmakers opened shops. By 1657, hundreds of Italian Americans arrived to settle in New Amsterdam, Del., and Long Island. In more than 300 years, they came to America as immigrants to carve roads and farms through the woods, to build America's factories, railroads, houses, and cities. They have enriched America with their labor and talents. In return they received our Nation's greatest gift: freedom. The Italian immigrants who came to this country did not come here believing that America was required to give them a living and take care of them. They didn't want that. They did not want to be given a better life; what they asked for was a chance to earn for themselves a better life. They did not come for handouts. They did not come here to take it easy.

They came to work, to learn, to build, and to contribute to this great country of ours.

With this freedom and the opportunities America offered, they struggled and prospered. Science, education, the arts, government, business, labor—all benefited from their efforts.

On June 6 and 7, one of the largest and most colorful celebrations of the Italian-American heritage will be held at the Garden State Arts Center in Holmdel, N.J.

The Festa Italiana will bring together some of the most distinguished artists and leaders in the Italian-American community. Similar festivals will be celebrated in many other parts of the Nation during the month of June.

In honor of the occasion and the generations of Italian Americans who have contributed to our national life and traditions, I have introduced House Resolution 145 expressing the sense of the House of Representatives that the week commencing on June 7, 1981, should be designated as "National Italian-American Heritage Week." I urge my colleagues to join me in supporting this resolution.

● Mr. COURTER. Mr. Speaker, I rise in support of House Resolution 145 designating the week of June 7, 1981, as "National Italian-American Heritage Week."

The Italian American community which has contributed so much to our way of life is a community united to the common goals of serving our Nation and its traditions.

Since 1820 over 5 million Italians have immigrated to our country and have assimilated into our society and our Nation's history.

I urge my colleagues to support this resolution.●

● Mr. DERWINSKI. Mr. Speaker, I rise in support of House Resolution 145 which expresses the sense of the House of Representatives who designated the week of June 7, 1981 "National Italian-American Heritage Week."

Our country's history books are filled with names of outstanding Italian Americans who worked and fought to make our Nation one of the greatest in the world.

Over 5 million Italian immigrants have assimilated into our society and have become productive members of our Nation.

I feel therefore it is only fitting that this body designated June 7, 1981, to honoring the many contributions of the Italian-American community to our culture, history, and traditions which all Americans now share.●

● Ms. FERRARO. Mr. Speaker, I rise in strong support of House Resolution 145 which would designate the week of June 7, 1981, as "National Italian-American Heritage Week."

The contributions made by Americans of Italian heritage to this Nation are enormous. In every field, the arts, the judiciary, the legislature, and the business community, names ending in a vowel are prominately listed. As a first generation Italian-American, I am particularly pleased that the important role my people have played in the American society is being recognized by this resolution and I urge all of my colleagues to support its adoption.●

Mr. RINALDO. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the resolution, as follows:

H. RES. 145

Whereas the House of Representatives fully recognizes that it is essential for the people of the United States of America to understand and respect the rich heritage of all American ethnic groups if we are to maintain and foster national unity;

Whereas the many great contributions of Italian-Americans to our country must be recognized and the deep Western roots of Italian-American culture, history, and traditions must be appreciated; and

Whereas Italian-Americans, like Columbus, the famous Italian geographer-navigator-explorer, have had to rise by using individual initiative, imagination, and resourcefulness—traits that have distinguished the American character and made us a Nation of individuals who time after time have pressed forward to victory in situations that seemed to promise certain defeat: Now, therefore, be it

Resolved, That it is the sense of the House of Representatives that the week commencing on June 7, 1981, should be designated as "National Italian-American Heritage Week" and that the people of the United States should observe such week with appropriate ceremonies and activities.

The resolution was agreed to.

A motion to reconsider was laid on the table.

● Mr. ZABLOCKI. Mr. Speaker, it is a pleasure to cosponsor House Resolution 145 which expressed the sense of the House of Representatives that the week commencing June 7, 1981, be designated as "National Italian-American Heritage Week."

The contributions of Italian Americans to this country are great. Since the discovery of the United States, Italian Americans have worked toward its development and growth. Italians worked side by side with their brothers and sisters of other ethnic groups in building our roads and farms, in expanding our industries, and laying the groundwork for the economic development of our thriving society.

Because of their steady and unyielding efforts, Americans of Italian descent can see around them the fruits of their efforts. We enjoy today a free and open society. Since the time William Paca joined other famous statesmen in signing the Declaration of Independence, Italian Americans have fought consistently and selflessly in all of America's wars to keep this country free. In addition, throughout history we can see the influence of our Italian Americans in many facets of society, in culture—that is, art and music—as well as in business, government, education, science, and sports.

Mr. Speaker, it would be hard for us to look around this country and not recognize the impact Italian Americans have had. They epitomize the very work ethic that made this country strong and its virtues lasting. The constant hard work and involvement in all sectors by Italian Americans of the society is obvious.

Mr. Speaker, I am proud to be a Member of this House which quite correctly recognized the contributions of various ethnic groups as we are today paying tribute to Italian Americans, as we passed House Resolution 145 unanimously. I am confident that Italian Americans will continue to carry forth the tradition begun by Christopher Columbus through their strong determination and courageous leadership.●

GENERAL LEAVE

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and to include extraneous matter on the resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

SEVERE STORMS ADVISORY COMMITTEE ACT OF 1981 INTRODUCED

(Mr. WINN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WINN. Mr. Speaker, yesterday, I introduced the Severe Storms Advisory Committee Act of 1981. Due to the fact that as of yesterday afternoon late, a severe storm hit the Denver, Colo., area and somewhere between 9 and 12 tornadoes hit that area, knocking down a shopping center, damaging a school and many homes, overturning cars, with thousands of dollars worth of damage, I am sure that my colleagues would like to be cosponsors of the bill that I introduced yesterday.

I would like to inform them that I will send a "Dear Colleague" letter out asking for cosponsorship this afternoon.

□ 1200

MILITARY CONSTRUCTION AUTHORIZATION ACT, 1982

Mr. BRINKLEY. Mr. Speaker, I move that the House resolve itself into

the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3455) to authorize certain construction at military installations for fiscal year 1982, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Georgia (Mr. BRINKLEY).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill. H.R. 3455, with Mr. PICKLE in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Georgia (Mr. BRINKLEY) will be recognized for 1 hour, and the gentleman from Virginia (Mr. TRIBLE) will be recognized for 1 hour.

The Chair recognizes the gentleman from Georgia (Mr. BRINKLEY).

Mr. BRINKLEY. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, today the Committee on Armed Services presents H.R. 3455, the military construction authorization bill for fiscal year 1982.

The purpose of the bill is to provide new military construction authority in support of the military departments and defense agencies at home and abroad.

At this point, Mr. Chairman, I want to thank the ranking member of the Subcommittee on Military Installations and Facilities, Mr. TRIBLE, and all the members of the subcommittee, for their fine contributions during the hearings and markup sessions on the bill. Mr. TRIBLE is a young man with a bright future. As the hearing record will reveal, his inquiries showed a grasp of the issues and an understanding of the needs involved.

We believe that H.R. 3455 is a good bill. It is a balanced measure that is fiscally responsible and meets the most pressing requirements. It is a bill that reflects the efforts and judgment of the Armed Services Committee.

The Department of Defense originally requested new authority in the amount of $6.66 billion for fiscal year 1982. Subsequently, DOD submitted a budget amendment that resulted in a revised request of $7 billion for the military construction and family housing programs.

On May 12, the Committee on Armed Services approved H.R. 3455, a clean bill totaling $6.98 billion. This amount is $50.3 million below the requested figure.

This followed extensive hearings in nine separate sessions and close review of each requested project, where the subcommittee was able to determine those proposals which in its view could be deferred without impairing the operational effectiveness of the armed services.

Our subcommittee did not cut projects just for the sake of cutting, but deleted projects that it felt could be deferred without impairing our national security. In certain instances, we added projects when it was determined either by testimony or supporting documentation that the priority was great enough to warrant inclusion in the bill. As such, the construction proposals for the Active Forces cover approximately 773 projects at approximately 399 major military installations within the United States and overseas. Included are the 80 committee-initiated projects that are designed to improve workplaces, enhance housing conditions, and provide for additional quality-of-life facilities for the Active Forces and Reserve and Guard components.

Major items included in the bill are: $424.6 million for Rapid Deployment Force construction; $1 billion for European construction, including $425 million for the NATO infrastructure program; $356.5 million for MX basing; $29 million for acquisition of 244,000 acres of training land for Fort Carson, Colo.; and $179.7 million for construction of 2,343 new units of military family housing, including 200 units of manufactured housing at Fort Irwin, Calif., in support of the U.S. Army National Training Center.

For the individual services, the committee increased the Army request by $28.9 million, increased the Navy request by $42.1 million, and reduced the Air Force request by $177.1 million. The committee also increased the Reserve and Guard request by $88.7 million.

FORT CARSON LAND ACQUISITION

One of the most thoroughly considered items in the fiscal year 1982 military construction program has been the Fort Carson training land acquisiton project. The Committee's standard for evaluating the project has been that the burden of need has been with the Army to justify the requirement in the national interest. Only after thorough and careful examination of the facts has the subcommittee determined that the Army has demonstrated a valid—even pressing—requirement for the land. The training site is located 150 miles south of Fort Carson and will be served by an existing rail line. It was selected by the Army after an evaluation of 22 sites.

Three separate hearings were held on this issue. Testimony was received from the Department of the Army, including that of a tank battalion commander and a tank company commander. The subcommittee had the benefit of testimony from two distinguished Members of Congress from Colorado, Mr. KOGOVSEK, in opposition, and Mr. KRAMER, in support, both of whom were extremely helpful in building a complete record. The views of the Environmental Protection Agency were also invited and received. Also, we had a full day of hearings with the people most affected by the acquisition, the landowners, their neighbors, State and local government officials, and area chambers of commerce.

Fort Carson is the home of the 4th Infantry Mechanized Division, the largest mechanized division stationed in the continental United States. It would be one of the first units to respond to an outbreak of hostilities in Europe. At present, it has only 22,000 contiguous acres of training land available at Fort Carson. As such, training can only be conducted in small units; battalion team-sized training is not possible.

Why is this significant? In the words of the battalion tank commander who appeared before the subcommittee:

> The battle task force, the battalion level is the level at which the battle is fought so the commander's control of the entire battalion or battlion task force is my responsibility.

He was then asked if that is the reason for the importance of battalion training. His response was:

> Yes, sir. The battle is fought at battalion level and not fought at company level or platoon level. While companies may be engaged, you know, independently or semi-independently because of the width and depth of the battlefield they would expect to be on, my job as battalion commander is to be able to control that and support it logistically with artillery and TAC helicopters and actually to control that battle there might be three or four fights going on with three or four company elements spread out over a width of anywhere, if we are on a defense, optimally ten kilometers wide, but more like in Europe up to 15 or 20 kilometers wide. I can train my companies in limited terrain scenarios at Fort Carson and we do just that.
>
> We also have a very wide priority mission, I think you should know, the division does, in Europe, which we take very seriously. So the Captain's comment about we would go through an emergency deployment regular exercise before deploying in the Pinon Canyon area is valid and it would be about a 48-hour exercise and we can practice those skills.
>
> We would road march with our vehicles and railroad our track vehicles, tanks and personnel carriers to that site as well.

When asked what constraints the battalion commander faces today at Fort Carson, the response was:

> I am unable to put the battalion team together or certainly a battalion task force together at Fort Carson in a realistic manner.

The battalion commander further stated:

> The battle is fought at battalion level and not fought at company level or platoon level.

At Fort Carson I train the pieces of my battalion, the parts, and then I put them together hopefully if I deploy them on a major exercise.

As far as actual battalion-sized training is concerned, this commander said:

I can't do it at Fort Carson. I have not had an opportunity where I can in a realistic scenario put the battalion or battalion task force together in training we have had.

At the company commander level, the subcommittee was told:

Because of the density of troops at Fort Carson, of the units on Fort Carson, the training or area availability is just not there.

The company commander stated further:

Because of the problem we have at Fort Carson, because of the fact my men go down and learn Fort Carson in maybe three field exercises, it gets to the point to where they no longer use maps, no longer use coordinates, but go to the tin shack, take a right at Red Mountain and go down where we broke down the last time.

That is funny, but unfortunate, because my junior leaders, my Sergeants who will make the money for me in combat, who will save my men's lives, are not trained well enough. And as a result of that I think they will suffer.

These statements simply mean that the tank crews cannot train for war in properly configured field units for their primary battle plan. Obviously, this lack of training affects their state of readiness.

According to Maj. Gen. Guy S. Meloy, director of training, Office of the Deputy Chief of Staff for Operations and Plans, Department of the Army, in response to a question about the impact on readiness if the land acquisition is not approved:

Since 1978, the 4th Mechanized Division has been reporting [a training and readiness status] of marginally combat ready. I see no hope at all without the acquisition that that readiness level will ever improve.

General Meloy further underscored the importance of this land acquisition project:

As far as the priority of this, this is the highest land acquisition priority in the United States Army today.

Nonetheless, the subcommittee was also sensitive to the very real concerns expressed about the environmental impact of training being conducted on the 244,000-acre site known as Pinon Canyon.

To put the site in better perspective for my colleagues, I have brought with me the chart next to the podium. As you will note, the training site is divided into five separate parcels of land—A, B, C, D, and E.

Under the Army's training schedule, only three of the five training areas will be used at one time. For example, parcels A, B, and C may be used and parcels D and E will lie fallow. None of the areas will be used during the growing season. Consequently, three training areas will be used only 5 months of the year. Furthermore, each training area, under the Army's rotational schedule, will be used only 3 years out of any 5-year period.

For example, areas A, B, and C, as I mentioned, may be used in the first year. Then in the second year areas A, B, and D, may be used. In the third year, A, B, and E may be used. In the fourth and fifth years, A and B would be rested and C, D, and E would be used. Obviously, various combinations could be used.

The important point in all of this is that under this management plan each training site would be used only 15 months out of each 5-year period.

The committee expects the Department of the Army to adhere to this type of mitigation effort in order to reduce the environmental impacts as much as possible. We have been assured that there will be no live firing in the Pinon Canyon site. Furthermore, a buffer zone has been established so that training will not be conducted near the canyon walls.

Testimony from Mr. Robert Williams, Regional Administrator of the Environmental Protection Agency for region 8, underscored the environmental controls that the Army must comply with. In the case of air pollution, for example:

The Army is [already] required to get a permit from the state and that permit will be negotiated so that the Army will have to provide mitigating measures so that violation will not occur. If, in fact, it does occur, in practice, then the Army will be subject to an enforcement action from the State of Colorado.

With regard to water quality issues, the EPA witness stated:

The Army has committed to a fairly aggressive installation of sedimentation retention structures that will minimize the erosion and the contribution of sediment and salinity materials.

He further stated:

I think the Army has put forth a fairly aggressive program in that area.

The regional administrator concluded his prepared statement by stating:

Given the two expansion options in Colorado, we believe the Army's choice of the Pinon Canyon site is the best choice from an environmental standpoint. The Army, in preparation of its final EIS, considered most of EPA's concerns, and makes strong commitments for maximum mitigation of possible adverse air and water quality impacts, the establishment of base line and operational environmental monitoring programs, the establishment of a land use and environmental monitoring advisory committee as well as the general commitment of ensuring compliance with local, state and Federal environmental standards and regulations.

Judging by the Army's excellent environmental record at the existing Fort Carson facility, there is every reason to believe they will aggressively pursue environmental protection procedures at the Pinon Canyon site.

While some environmental degradation will occur at the Pinon Canyon site, we do not believe it presents any threat to public health or will result in violations of environmental standards.

Mr. Chairman, on the basis of the hearing record, as I have cited, the committee approved the Army request for $29 million for acquisition of the 244,000 acres of training land.

MX CONSTRUCTION

Another issue of particular concern to the committee is the MX basing program. DOD requested $366 million to start construction of a horizontal multiple protective structure (MPS) basing mode. As presented to the committee, the MPS plan would house 200 missiles in 4,600 horizontal shelters clustered on mostly federally owned lands in Utah and Nevada.

The request included $332.6 million for operational support facilities, $9.5 million for land acquisition, $11 million to acquire an administrative building at Norton Air Force Base for an MX headquarters facility, and $12.9 million to build two protective shelters at Vandenberg Air Force Base for test firing the missile.

A breakdown of the $332.6 million for operational support facilities is as follows:

	Millions
Site development:	
Roads	$89.5
Railroads	53.6
Utilities	38.1
Total	181.2
Contractor mobilization:	
Support facilities	59.3
Construction camps	18.1
Total	77.4
Operational base test site:	
Test support building	14.5
Roads and utilities	9.0
Total	23.5
Purchase of Long-Lead Items:	
Electrical Items	4.4
Boiler	37.2
Two Bridge Cranes	8.9
Total	50.5

In reviewing the Air Force proposal, the committee felt that the request for land acquisition could be deferred this year without jeopardizing the MX deployment schedule.

Because of the ongoing review by the administration of alternative MX basing modes, the committee wrote into the bill section 305 which states that no funds authorized for MX basing in this bill may be obligated for an MX basing mode other than MPS unless:

First, the President determines, and certifies to the Congress, that it is in the national interest of the United States to develop a basing mode for the MX missile system other than a multiple protective structure basing mode; and

Second, the Congress, before the end of the 60-day period beginning on the date of the receipt of such certification, adopts a concurrent resolution stating in substance that it approves

the development of the alternative basing mode selected by the President.

BASIS FOR COMMITTEE ACTION

In taking this action, the committee acknowledges that a final decision has not been made by the new administration on the basing mode for the MX. At the same time, it is noted that the administration has not withdrawn the MX-related military construction program, which is based upon the MPS plan. Also, section 305 is consistent with the action the committee has taken on the fiscal year 1982 defense procurement authorization bill.

The Congress has been on record for some time in support of the MPS basing mode, and specifically in support of an initial operating capability (IOC) for the system being achieved no later than December 31, 1986. The committee, therefore, believes that in the absence of a final decision by the administration on basing the MX it should provide both the Congress and the administration with as much flexibility as possible. It is the committee's judgment also that there should be no delay in achieving the 1986 initial operating capability. At the same time, the committee believes that Congress should have an opportunity to express its views on any proposed change to the MX basing mode.

OTHER BILL HIGHLIGHTS

Briefly highlighting other aspects of the bill, the committee is recommending $282.1 million for the defense agencies in title IV. Included in this amount is $72.5 million for second phase of the construction of a Defense Intelligence Analysis Center at Bolling Air Force Base and $55.1 million for the National Security Agency operations building at Fort Meade, Md.

Title V includes $425 million for the NATO infrastructure program. The committee recommends the requested amount.

Title VI, military family housing, contained a total request of $2.37 billion. the committee is recommending $2.38 billion. Of this amount, $2.1 billion is for operation and maintenance, $109.8 million is included for improvements to existing housing, and $9.1 million for planning and design.

The operation and maintenance account is itemized as follows:

	Millions
Operating expenses	$991.5
Maintenance	835.8
Leasing	122.3
Debt Payment	150.1

In title VII, administrative provisions, the committee extended the cost variation authorities and increased the per-square-foot cost of barracks and unaccompanied officer quarters to $53 and $57, respectively. The present cost limitations are $52 and $56, respectively.

In title VIII, Guard and Reserve facilities, the committee approved $291.7 million. The increased authority will permit the Guard and Reserve Forces to undertake 63 additional projects that contribute to their readiness.

In title IX, general provisions, the committee approved the following major items:

Revised criteria for evaluating the cost effectiveness of solar energy proj ects. At present, different criteria apply to project design and project construction. The committee action resolves this ambiguity so that the criteria are identical for both design and construction evaluation;

Use of planning funds for construction management of projects funded by foreign governments for U.S. Forces. This provision will simplify current accounting procedures and eliminate the use of operation and maintenance funds for planning purposes;

Provision of construction authority in the event of a declaration of war or national emergency. This action reflects DOD experience with recent major mobilization exercises where it was determined that inadequate authority exists to restructure construction priorities during wartime or in a state of national emergency; and

With the cooperation of the Committee on Government Operations, authorization of the General Services Administration to sell excess portions of the Naval Training Center, Bainbridge, Md., to the State of Maryland for the purpose of fulfilling a contractual obligation that the Department of the Navy has with the community of Port Deposit, Md.

Mr. Chairman, this concludes my statement on H.R. 3455. I commend the bill to our colleagues and ask for your consideration and support.

□ 1215

Ms. FIEDLER. Mr. Chairman, will the gentleman yield?

Mr. BRINKLEY. Yes, I will be glad to yield to the gentlewoman.

Ms. FIEDLER. I did not hear the entire presentation, but I was caught up and interested in what the gentleman was describing regarding the Pinon Canyon parcel, and I was wondering whether or not there had been the possibility of any tradeoffs of some existing bases that might not be usable to offset part of the costs.

Mr. BRINKLEY. First, could I address the fact that there was consideration by the committee as to swaps between the Department of Defense and the Department of the Interior. We did not find much profit there.

As to the other land alternatives that were considered, there were several, but none of them were in Federal hands in toto. There is some land in Pinon Canyon, as the gentlewoman probably knows, that is within the Federal domain right now.

Was that the item to which the gentlewoman's reference was made?

Ms. FIEDLER. I thank the gentleman very much.

Mr. KOGOVSEK. Mr. Chairman, would the gentleman yield on that point?

Mr. BRINKLEY. Yes, of course.

Mr. KOGOVSEK. First of all, I would like to indicate to the gentleman from Georgia that the hearing that we received on the Pinon Canyon situation was thorough. It was fair, and I think the people that came back from Colorado, I say to the gentleman, as proponents and opponents of this acquisition, felt a lot better about the Federal Government and the congressional process after they left. I think that is entirely due to the gentleman's actions as far as conducting the hearings regarding this very, very important situation.

I would say to the gentlewoman from California that the question that she brought up is something that I and a lot of other people keep thinking about as far as the fact that we read in the U.S. News & World Report a couple weeks ago that the Department of the Army would like to close something like 173—would like to close or either seriously cut back 173 bases in the United States. They are unable to do so, according to the article, mainly because of congressional pressure to keep these bases open.

Now, whether it is a quid pro quo or not, I do not know, but we find ourselves in a very untenable situation as people in the West who are in a situation where Colorado Springs has grown around Fort Carson. They have to expand. I have never argued with that, as the chairman knows; and yet we find ourselves in this particular situation, that the Army kind of wants it both ways. In a lot of instances we have Army land in Colorado that the Army is not willing to give up, and yet at the same time it wants another 244,000 acres.

At this point, I will cease my remarks, Mr. Chairman.

Mr. BRINKLEY. I thank the gentleman very much for his comments. I appreciate that very much.

Before yielding to the gentleman from Virginia (Mr. TRIBLE) for his statement, I say again that the gentleman from Colorado (Mr. KOGOVSEK) did participate with our committee in building a record and made many valuable contributions. It is a difficult situation. You have the 4th Mechanized Battalion, of course, at Fort Carson. They are not at Fort Benning. They are not at Fort Bliss; so the issue is one of what to do to provide them with the training that they will need in case we have a national emergency?

Of course, the option at Fort Bliss was considered. Fort Irwin has been mentioned. But of course, we cannot close down Fort Carson very readily and take everything over to another

base and gear up again; so it is a question of judgment. I am certain we will have a lot of other comments by both gentlemen from Colorado.

Mr. Chairman, I reserve the balance of my time.

Mr. TRIBLE. Mr. Chairman, I yield myself such time as I may require.

Mr. Chairman, the fiscal year 1982 military construction authorization bill (H.R. 3455) being considered today is extremely important to our national security.

The passage of this bill will authorize construction to field a variety of new weapons systems to modernize our Armed Forces, provide important staging facilities in the Persian Gulf-Indian Ocean region so the Rapid Deployment Force can defend our interests there, improve U.S. readiness in Europe and the Pacific area, and upgrade some of the poor living and working conditions of our military personnel at home and abroad.

As you can see, Mr. Chairman, this is not just a simple "brick and mortar" bill. With it, the Army will be able to build 47 projects totaling $132 million so it can base the Patriot and Roland air defense missile systems in Europe, place the multiple-launch rocket system with our troops in Germany and the United States, and introduce the Combat Electronic Warfare Intelligence (CEWI) system in Germany. This new generation of weapons is the result of extensive research and development begun during the early 1970's to insure that the Army will be a modern fighting force in the 1980's.

For the Navy there are projects totaling $24.5 million to continue the development of a west coast Trident submarine base at Bangor, Wash., and $69.6 million for the start of a new east coast Trident base at Kings Bay, Ga.

With the authority in this bill, the Air Force will be able to develop two ground-launched cruise missile (GLCM) bases in Europe as part of NATO's upgrading of tactical nuclear forces. There is $69.1 million in the bill for this purpose. Also, there is $102.3 million for facilities to house and maintain the air-launched cruise missiles (ALCM) being placed at four U.S. B-52 bomber bases, and $19 million for the bed down in Europe of the new TR-1 all-weather reconnaissance aircraft which will provide battlefield surveillance to theater and tactical commanders in NATO.

Perhaps the most controversial weapon system supported in this bill is the MX missile. The administration requested $366 million to start construction of a horizontal multiple protective structure (MPS) basing mode even though it is evaluating alternative methods for basing the system. This creates an awkward situation in which the Congress is being asked to authorize a basing mode that the administration may want to change after completing its review and the President makes a final selection in July.

As presented to the committee, the MPS plan would house 200 missiles in 4,600 horizontal shelters clustered on mostly federally owned lands in Utah and Nevada. The committee approved $356.6 million for the MPS basing mode, deferring for 1 year $9.5 million requested for land acquisition purposes. Because of the present uncertainty over how the MX system will be finally based, the committee felt it should allow the President the flexibility to change the basing mode and at the same time insure that any alternative approach selected by him must be approved by the Congress. In this way, the proper checks and balances between the executive and legislative branches on this issue are preserved by section 305 in the bill. That section states that no funds authorized for MX basing in this bill may be obligated for an MX basing mode other than MPS unless:

First, the President determines, and certifies to the Congress, that it is in the national interest of the United States to develop a basing mode for the MX missile system other than a multiple protective structure basing mode; and

Second, the Congress before the end of the 60-day period beginning on the date of the receipt of such certification, adopts a concurrent resolution stating in substance that it approves the development of the alternative basing mode selected by the President.

It should be made clear to all that this in no way is an attempt to force the MPS system on the new administration. It merely means that if the President does select this basing system the funds are available for him to proceed and no time is lost. On the other hand, if an alternative is chosen and the Congress approves of it, these same funds can be used for the new basing mode—and again important time is saved. We should remember that Congress has directed that the MX missile system must be operational by the end of 1986 when our present ICBM arsenal will be most vulnerable to the Soviet Union's new generation of long-range ballistic missiles.

Regarding another important matter, I want to state that this bill authorizes $424.6 million to build staging facilities at access bases in the Mideast and Southwest Asia for the Rapid Deployment Force. The committee did defer $49.5 million in projects at Lajes Fields in the Azores and $26 million for airfield development at Ras Banas, Egypt. These actions were taken because negotiations have not been concluded with Portugal on the Azores program and a decision has not been made on the final Air Force mission requirements in Egypt.

The deferral of these two projects should not be interpreted as a lack of support for the RDF. When all the related details for these projects are finalized, I am confident they will be approved by the committee.

This bill also carries slightly more than a billion dollars in new construction to improve the readiness of U.S. and Allied Forces in Europe. This is one of the largest amounts ever requested for construction in Europe in recent years and demonstrates our commitment to NATO. It also says the United States is willing to take the first bite on financing a long-range plan to restation certain U.S. Army units within West Germany so they will be more effectively deployed against the Warsaw Pact threat. For this purpose, the Army requested $18 million to initiate the restationing plan and our committee approved it. But we also feel strongly that the West German Government should be a full partner in this redeployment effort and, thus, help bear the cost, which could run into hundreds of millions of dollars over the next decade. Government-to-government discussions on this question are in progress and hopefully a bilateral agreement can be reached before next year's budget submission.

This restationing plan also will greatly improve the working and living conditions of the American soldier in Germany. Gen. Frederick J. Kroesen, commander in chief of the 200,000 troops in the U.S. Army in Europe, has told many of us that these conditions must improve if the morale of his troops are to remain high.

It is easy to agree with General Kroesen, once you see some of the U.S. bases in West Germany. Let me quote from an eyewitness account from a Chicago Tribune reporter who recently toured some of the American bases in West Germany:

> In Hanau, stores are housed in peeling whitewashed huts that used to be German cavalry stables.
>
> In the small Bavarian town of Kattebach, one company has 6 showers for 57 men and 2 women. Three are in a latrine with mildew all over the walls and ceiling. It's been that way for a year, when the shocked soldiers arrived from the clean comfort of Ft. Lewis, Washington. It will be at least this summer before improvements are made.
>
> In the Bavarian base town of Schwabach, and at scores of the 700 U.S. bases in Europe, the motor pool is a sea of mud for most of the year. That just makes it more difficult and more unpleasant to maintain the armored vehicles, trucks, and tanks—often 20 years old—supposed to take soldiers to war.
>
> If you're single and live in the barracks, you may be crammed in with five, even seven, others. Home for many GI's is a 6-by-6-foot section of a room in a barracks built for Adolf Hitler's Nazis or even Kaiser Wilhelm's troops and barely renovated since.

This bill provides funds to help correct some of these quality of life prob-

lems facing our service personnel, a matter that should be of great concern to all of us.

While the military construction program this year is one of the largest in recent years, I believe it more genuinely reflects the needs of the Department of Defense than has been the case in recent years. Due to a series of contributing factors, the Department of Defense physical plant is in an accelerating state of decline, often impairing our defense capability. Much of it is of World War II vintage which means that many facilities still in use are obsolete and have far exceeded their planned economic life. This condition, coupled with inconsistent funding support during the past several years, has produced a large facilities backlog in both construction and maintenance. As a result, it has precluded optimum training, created lower morale, and has severely inhibited reenlistment efforts.

This situation must be turned around. I believe this bill will help do that. Therefore, I urge my colleagues to vote in favor of this legislation which meets the military services' needs and at the same time is fiscally responsible in that the total amount authorized is well within the administration's budget request.

□ 1230

Mr. Chairman, I yield back the balance of my time.

Mr. BRINKLEY. Mr. Chairman, I yield 5 minutes to the gentleman from Colorado (Mr. KOGOVSEK).

Mr. KOGOVSEK. Mr. Chairman, as stated earlier, first of all I want to thank the chairman of the subcommittee for the very able job he has done in giving us a hearing on an issue that is very important to the people of my district. That basically is the expansion of Fort Carson into 244,000 acres of private, marginal, grazing land in southeastern Colorado.

As I said earlier, the people who came back to testify for and against this proposal left with a good feeling about the thorough hearing that the gentleman from Georgia (Mr. BRINKLEY) and the ranking minority member (Mr. TRIBLE) gave them. I, too, want to thank both the gentlemen right now for the fair hearing.

I can indicate I was not happy with the results of the committee vote, but I want everyone to know that it was a fair hearing and a thorough hearing.

Let me say at this time that it is quite obvious to those of us who have served here for the past couple of years, and those who have served here for many, many more years, that nobody really wants the Army in their backyard, at least that seems to be the situation concerning the past two or three previous expansion attempts.

Three years ago Fort Hood, Tex., for some reason—and I understand that there were problems with a much smaller expansion, but once again it was a situation where the people of a certain area that were involved in the expansion decided that they did not want the Army in their backyard.

The people in Nevada do not want the MX missile located in their State, and yet there is not going to be a whole lot they are going to say about that, I do not think.

The people in Utah do not want nuclear wastes deposited in their State, but yet the Federal Government owns 64 percent of that State and probably, if we at any time start burying nuclear wastes anyplace, it might be in the State of Utah.

So the people in the Third Congressional District who live and who will be impacted by the expansion of Fort Carson are not all that excited about the proposed and possible and probable environmental degradation that is going to take place because of that expansion.

For those not acquainted with that 244,000 acres we are looking at, I think we have to realize that it is a very dry, arid part of the country. It is similar to land found in New Mexico, Arizona, and in western Kansas. It is dry. We do not get as much rain as we get even in the area of Colorado Springs where Fort Carson is now located. Consequently, if we get into a situation where we have 500 or more tanks and personnel carriers running over that area, there is no chance for the kind of protection that the Army most sincerely wants to provide.

The fact, as the gentleman from Georgia (Mr. BRINKLEY) pointed out, is the Army would rotate on a 2- or 3-year basis their training areas, hoping that the ground will come back, will revegetate. I think this is not possible.

We have had testimony from the Colorado Soil Conservation District, we have had testimony from the Department of Agriculture, we have had testimony from the Department of the Interior over the past couple of years that it is almost impossible, and certainly very expensive, to try to revegetate that area.

I think any increased dust particles in that area will impact adversely on a lot of small towns that happen to be in the area, whether it is Knob Hill, Rocky Ford, Pueblo, Trinidad, because EPA standards are now too stringent in the West and any increased dust particles in that area would render those areas nonattainment areas as far as EPA is concerned.

My own hometown of Pueblo happens to be one of the areas of nonattainment right now and we are constantly concerned about more dust particles in the air.

It seems to me that we can offer alternatives to buying up 244,000 acreas of private grazing land, alternatives that can be workable. We have established the National Training Center in California, in a desert areas called Fort Irwin. It seems to me that $30 million of taxpayers' money that we are being asked to spend at this time can be better spent possibly on travel, sending the troops back and forth to Fort Irwin.

I think it is also important because it was a very critical point the gentleman from Georgia (Mr. BRINKLEY) brought up about military preparedness. The troops at Fort Carson, according to his testimony, are not militarily prepared right now to do the job we would want them to do in case of war. But I think that if that is such a critical issue, then we have to ask ourselves the question why is it that the Army says they will not get on the Pinion Canyon site until the year 1986.

1986 happens to be about 5 years from now and it seems to me that the alternatives that we are ready to put forth will allow us to train a mechanized division a lot more quickly than 1986.

Mr. TRIBLE. Mr. Chairman, I would yield 2 minutes to the distinguished gentleman from Colorado (Mr. KRAMER).

Mr. KRAMER. Mr. Chairman, I am pleased to rise in support of H.R. 3455, the Military Construction Authorization Act for fiscal year 1982. This legislation is the result of weeks of hearings on 773 construction projects at 399 military installations around the world.

□ 1245

As a new member of the Committee on Armed Services, I have been totally impressed with the thoroughness with which this committee has carried out its responsibilities. Each project has been reviewed to assure that it not only is essential to meet a valid and urgent military need, but it also represents the most cost-effective, feasible method for achieving this objective.

Careful attention has been given to the development of a balanced level of facility support for important new programs and initiatives such as the MX, Trident, Indian Ocean-Persian Gulf access, and the deployment of new weapons systems, while continuing to meet the essential needs of NATO and to maintain readiness in Europe, Japan, and other overseas areas.

Mr. Chairman, the House, and indeed the country, owes a debt of gratitude both to the distinguished chairman of the Subcommittee on Military Installations and Facilities, my colleague, the gentleman from Georgia (Mr. BRINKLEY) and to the ranking minority member, my colleague, the gentleman from Virginia, (Mr. TRIBLE). Both the chairman, Mr. BRINKLEY, and Mr. TRIBLE have shown considerable diligence, patience, fair-

ness, and objectivity through all the long hours of hearings on this bill. Under Mr. BRINKLEY's and Mr. TRIBLE's leadership, the committee has reported a bill that reflects a carefully structured mix of new requirements with special emphasis on projects relating to readiness and a measured advance toward our goal of modernizing or replacing many of the older structures in our inventory.

This is a good bill, Mr. Chairman, and I strongly urge my colleagues to support passage of H.R. 3455.

Mr. Chairman, I would like to examine in more depth one of the issues of readiness that is going to be an item of controversy before the committee today. That is the proposed Fort Carson acquisition. We as committee members had a very good opportunity to examine in depth the proposal to acquire an additional acreage for the training requirements of the 4th Infantry Division. Considering the size of the parcel that the Army proposes to acquire, frankly, I think the extent of the controversy has been less than might be expected and has been somewhat overplayed. We have had a chance to hear from individuals and groups from the area who stand to be affected by the acquisition.

Certainly there is interest in the area, but it is not all unfavorable interest.

As a matter of fact, of the affected landowners—of which there are 42—36 support the acquisition. Thirty-six of forty-two landowners support the acquisition, and only one landowner who actually resides on the property is in opposition to the expansion.

I have a list of bipartisan support of those that endorse the expansion, realizing that it is only in the national interest but in the economic interest of those areas that are impacted by the expansion. Incidentally, I am not in one of those areas that is impacted beneficially by the expansion. It really has no impact for the Colorado Springs area which I represent. It is simply a question of doing that which is necessary to prepare these troops for potential combat in Europe or in the Persian Gulf area, or in some other troubled spot, since they are presently simply not capable of doing the mission to the utmost of their potential capability. It is simply a question of trying to save the lives of those Americans who might be sent into combat.

Those who endorse the expansion that live in the area to be affected, as I indicated, are indeed numerous. They include the State of Colorado; our own Democratic Governor, Governor Lamm, has endorsed the expansion; the City Council of Trinidad has endorsed the expansion. Trinidad is the community that is closest to the expansion area. The Trinidad-Las Animas County Chamber of Commerce has endorsed the expansion. The Pueblo Chamber of Commerce has endorsed the expansion. The United Brotherhood of Carpenters and Joiners, the Trinidad Chapter, has endorsed the expansion. The Trinidad-Las Animas County Contractors Association has endorsed the expansion. The American Federation of Government Employees has also endorsed the expansion. Both of our Senators from Colorado, the Senator from Mr. BRINKLEY's side of the aisle, Senator HART, and the Senator from my side of the aisle, Senator ARMSTRONG, have both endorsed the expansion. So basically you have a wide group of not only local governmental officials but State governmental officials and local associations that have joined in asking that this expansion go forward in the national interest, in addition to 36 of the 42 impacted landowners.

Let us explore for a minute those concerns which I think are reasonably raised about what impact this expansion might have on the environment, because I think those are questions that need to be asked. As the gentleman from Georgia (Mr. BRINKLEY), our subcommittee chairman, has aptly pointed out, the reason that the expansion is so large is to do the maximum to provide for the integrity of the environment. No parcel in this expansion would be utilized for more than 15 months in a 5-year period. No utilization of the land would take place during growing seasons or rainy seasons.

The Environmental Protection Agency, which is obviously an agency charged with the responsibility of protecting our environment in our country testified in front of our subcommittee on April 8, 1981, as follows. I might add that the gentleman who testified was an appointment from the last administration, not from the present administration. Roger Williams testified as follows:

> Judging by the Army's excellent environmental record at the existing Fort Carson facility, there is every reason to believe they will aggressively pursue environmental protection procedures at the Pinon Canyon site. While some environmental degradation will occur at the Pinon Canyon site, we do not believe it presents any threat to public health or results in violations of environmental standards.

The EPA has indicated that the particular problems of Pueblo will not—will not—be adversely impacted by the use of the Pinon Canyon parcel. Air quality monitoring will be a continuing process by the Army. Salinity would not be a problem. The acreage involved here is less than 1 percent—less than 1 percent—of the Colorado acreage contributing to the Arkansas River runoff.

The Army will place the most soil-sensitive areas off-limits. They will monitor water discharges, salt levels, and stream flows. Because of the alkaline nature of the soils, any runoff will have salt included, and in the course of due protection, the Army will be building retaining ponds to catch sediment and salts.

In times of low stream flow, the Army is prepared to augment the streamflow.

So I think you can see that there has been a wide range of environmental considerations in trying to do something that will do justice not only to the local area but to the impact on the entire river basin as well.

Let me discuss for a moment whether or not there are any possibilities other than this particular site that could be utilized by the Army. Over a period of 2 years the Army prepared a thorough environmental impact statement. In that impact statement and during the process that it was studied and written, 22 sites were considered, including the Pinon Canyon site.

The CHAIRMAN. The time of the gentleman from Colorado (Mr. KRAMER) has expired.

Mr. TRIBLE. Mr. Chairman, I yield 5 additional minutes to the gentleman from Colorado.

Mr. KRAMER. I thank the gentleman.

Twenty-two sites were explored by the Army, and they reduced those to two sites, including Pinon Canyon, and then went on to choose the Pinon Canyon site on the basis of many factors, one of which, of course, was environmental impact.

Our committee under the able leadership of Mr. BRINKLEY and Mr. TRIBLE considered two additional sites: Fort Bliss, Tex., and the Apishapa site. Neither of them was satisfactory by any reasonable standard. Fort Bliss required an outpouring of travel costs that in a few years would exceed the acquisition costs. There were serious environmental problems at Fort Bliss. So the Army recommended against Fort Bliss as a result of these factors.

Another site was considered in Colorado, but it was too flat, and it did not contain enough acreage. It had absolutely no vegetation that was comparable to that on the Pinon Canyon site. So for both practical reasons, the need for appropriate training ground to present a realistic training scenario, and because of environmental problems, it, too, was rejected.

Some have suggested we could use Fort Irwin, the National Training Center. That is not possible. Fort Irwin is the graduate course or the postgraduate course for mechanized warfare. It is designed for final evaluations of training rather than day-to-day usage. It would only be available for a 2-week-at-most period in an 18-month cycle. The training is supposed to be done before you get to Fort Irwin, and then tested against appropriate standards once that training

has been accomplished. Transportation costs alone for Fort Irwin would run $11.4 million annually for the entire 4th Division for 2 weeks of training, as opposed to the transportation cost of $2.5 million for 5 to 8 months of training at the Pinon Canyon parcel. As a result, there would not be enough training time, and after 6 to 8 years the cost of acquiring the Pinon Canyon site would be amortized merely by the savings in transportation costs to Fort Irwin.

So the 22 sites that the Army has analyzed, plus 3 other sites—a total of 25 sites—have now been looked at, and the Pinon Canyon site has been chosen as that which best meets not only the environmental requirements but the requirements of the Army, the bottom line of which is saving American lives.

Some Members might recall receiving a Dear Colleague letter sent out by the chairman and the ranking minority member, a bipartisan Dear Colleague letter that had appended to it the statement of the Army's Chief of Staff, General Meyers, about the necessity of acquiring this parcel. I am not going to obviously belabor to you with the entire rendition by General Meyers, but he basically said the same things that I am saying, that there has been an extensive site exploration, and that this site is not just another site; it is the Army's No. 1—the No. 1—military construction priority for 1982. The reason is, in sum, that it is badly needed to bring an incompletely trained unit up to combat-readiness posture for use in Europe and, perhaps, in the Persian Gulf.

Make no bones about it, this vote that we will make today on this parcel is not an environmental vote; it is a readiness vote. It is a vote as to whether or not you want your nation prepared to go to combat if required in Europe or in the Middle East. That is the issue we are talking about. Yes, there will be disruptions when any acreage is required. We in the committee and I know the other Members of Congress will do all they can to mitigate against that disruption. We have extensive report language doing just that, protecting the environment, protecting the landowners. Above all, the bottom line, Mr. Chairman, is that we must protect American soldiers who might be called upon to lay their lives on the line. That is the issue. I hope you will support this acquisition.

□ 1300

Mr. BRINKLEY. Mr. Chairman, I have no further requests for time.

Mr. TRIBLE. Mr. Chairman, I yield 5 minutes to the gentleman from West Virginia (Mr. STATON).

Mr. STATON of West Virginia. I thank the gentleman for yielding to me.

Mr. Chairman, I want to bring to the attention of the gentleman from Georgia and the gentleman from Virginia a project in my home State which I am sorry to say was inadvertently left out of the original draft language due to some problems of which I will not speak, but nonetheless it has to do with a ceding of property in the South Charleston, W. Va., area for a construction and expansion of a Volkswagen of America plant.

In 1974, in South Charleston, W. Va., a former naval ordnance plant was converted to an industrial park, and it included an American Motors stamping plant.

In 1978, this stamping plant was sold to Volkswagen of America.

In the period 1978 to 1980, anticipating an expansion, Volkswagen of America attempted to acquire an adjacent 4.6 acres of property owned by the Department of Defense on which an Army and Marine Corps training center were located.

In 1980, Congress approved legislation permitting Volkswagen of America to acquire Department of the Army land in Sterling Heights, Mich., and this expansion led to an increased demand for expansion of the South Charleston stamping plant.

Parts are now being sent to the Westmoreland assembly plant in New Stanton, Pa., and to Pueblo, Mexico.

In 1982, parts will also be shipped to this Sterling Heights, Mich., plant as well.

The present plans that Volkswagen has for this property which we wish to acquire is an additional $125 million in capital expenditures and an additional 500 employees to add to the approximately 700 employees now engaged in operations at that plant.

In the other body, Senators BYRD and RANDOLPH of West Virginia have requested the chairman of the subcommittee, the Honorable STROM THURMOND, to include this language in the draft bill now being considered in the Senate. Should this take place, I would like to ask the subcommittee chairman and the ranking minority member to look kindly upon this language in the bill, because it enjoys the full support of all Members of the delegation from my State. I would like to ask that they take a careful look at this project, because we believe it is vital for the industrial expansion for our valley.

Mr. TRIBLE. If the gentleman will yield, I will say to my colleague that we appreciate him bringing this matter to our attention. I will tell the gentleman that we will take a special interest in this proposal. It does appear to have merit. We will be pleased to work with the gentleman from West Virginia and our colleagues in the other body to see if it can be brought to pass.

I thank the gentleman again for bringing this to our attention.

Mr. STATON of West Virginia. I thank the gentleman for his comments.

Furthermore, my home city of South Charleston is quite willing to make other land available in a transfer to the Department of Defense for the construction of a new facility which I believe will benefit all concerned.

Mr. BRINKLEY. Mr. Chairman, will the gentleman yield?

Mr. STATON of West Virginia. I yield to the gentleman from Georgia.

Mr. BRINKLEY. Mr. Chairman, I, too, commend the gentleman for bringing this to the attention of the subcommittee, and we will give it close and careful consideration.

I understand our companion body is already considering it. Should it be in the conference, of course, we would examine it at that time.

I understand there could be differences in the justification amounts between DOD and others, but we certainly would wish to hear from the gentleman at that time, and we would give it very careful consideration.

Mr. STATON of West Virginia. I thank the gentleman.

There are differences to be resolved, but I believe this body should be looking toward the expansion of this project, due to its extremely vital nature for our area.

Mr. TRIBLE. Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania (Mr. JAMES K. COYNE).

Mr. JAMES K. COYNE. I thank the gentleman for yielding.

Mr. Chairman, one of the military construction projects included in this authorization causes me and a number of my constituents considerable concern.

It is the $14 million the U.S. Navy would like to spend in the construction of some 200 off-base housing units in the area surrounding the Willow Grove Naval Air Station. I am deeply concerned that the Navy's plan may impose an undue hardship on the taxpayers living in the Hatboro-Horsham area.

Since assuming this office in January, I have been in constant touch with naval officials in an effort to get them to seek other sites that might utilize existing nonprivate lands, instead of taking advantage of an existing tax base.

My constituents and I want very much to provide the Department of Defense with sufficient funds to undertake the military construction projects it feels are essential to enhance the defense readiness of this country. I am concerned, however, that the Navy's housing expansion plans for the Willow Grove Naval Air Station may need to be completely reevaluated

in an effort to insure fair and equitable treatment for the people of Hatboro and Horsham.

Mr. BRINKLEY. Mr. Chairman, will the gentleman yield?

Mr. JAMES K. COYNE. I yield to the gentleman from Georgia.

Mr. BRINKLEY. Mr. Chairman, in response to the Willow Grove naval complex, I would like to offer to the gentleman, in reassurance, that the Navy has an option to buy the tract of land adjacent to Willow Grove for siting of 200 units of family housing, which is correct. The committee has no objection if a site more suitable can be obtained and we will ask the Navy to look into the matter and report back to the committee.

Mr. JAMES K. COYNE. I very much appreciate the gentleman's comments.

Mr. TRIBLE. Mr. Chairman, I yield 2 minutes to the gentleman from Indiana (Mr. MYERS).

Mr. MYERS. Mr. Chairman, I thank my good friend, the gentleman from Virginia, for yielding me this time, and I rise in support of this legislation. But I also have a question pertaining to the procedure used for authorizing Reserve components and National Guard armories.

I note by the committee report that the committee does not specifically authorize Reserve and Guard projects.

I yield to the chairman of the committee to give further enlightenment on just what procedure is used in the authorization of the Reserve component, including National Guard and the various Reserve armories.

Mr. BRINKLEY. I thank the gentleman for his inquiry, and if the gentleman will yield, the answer is that homework is the thing to do because of the fact that we in the committee do provide for lump-sum authority, and we do it under the auspices of the National Guard Bureau.

Of course, the funds that we do provide are with State participation, and before they are funded there must be a unit strength authorized of 75 percent back home wherever one is contemplated. Therefore, if the gentleman will keep this subcommittee informed as to the nature of the need, we will see if we can encourage the National Guard Bureau to be responsive if the level of authorized strength is there. And we also anticipate increasing the lump-sum authority so that some of the backlog can be met.

Mr. MYERS. I thank the gentleman for his response. As I understand, the first move is up to the State, the Guard in the State, and the Guard organization, to request through the National Guard Bureau, and then it comes in lump sum to the gentleman.

Mr. BRINKLEY. That is correct.

If the gentleman will yield further, our colleague, the gentleman from Mississippi, just recently, on his own motion, eliminated some projects from the State of Mississippi because of the fact that the State had not measured up in providing for the State participation, even though the strength authority was at the 75 percent or above level.

So the triggering mechanism will be in the State of Indiana.

Mr. MYERS. I thank my colleague for his response.

Mr. TRIBLE. Mr. Chairman, I yield 5 minutes to the gentleman from South Carolina (Mr. NAPIER).

Mr. NAPIER. Mr. Chairman, on April 15 I had the distinct pleasure of accompanying the chairman of the Military Construction Subcommittee of the Appropriations Committee, the distinguished gentleman from Georgia (Mr. GINN), on a tour of the Myrtle Beach Air Force Base in Myrtle Beach, S.C.

At the time, while we were touring the base, we noticed a number of things that were needed by the facility that had not been requested by the Air Force in the authorization or appropriation process at that time.

The Myrtle Beach Air Force Base had two particular needs that we found which would impact on the military effectiveness of the strategic forces based there.

The fulfillment of these needs would allow the base to operate at a level that would assure safe operations on a daily basis.

Our A-10's are at Myrtle Beach in South Carolina, and the base commander in our tour pointed out that one of the top priorities for facilities is the need to construct an addition to the aircraft operational parking apron. The current apron, frankly, is not of adequate size to accommodate the aircraft that are necessary to deploy the 354th Wing or its squadrons into or out of Myrtle Beach Air Force Base. The wing is now part of the Rapid Deployment Force and, therefore, it is very important that base facilities be of sufficient size and design to insure mobility and readiness.

In order to expand its operational apron, the Air Force is now requesting a total of $5,165,000 to add an additional 84,792 square yards of space. This apron, when completed, would be able to house six C-141 aircraft, thus allowing the unit to be fully deployable.

Second, there was a need, we understood, for a new control tower. The existing control tower at the base is just not of sufficient height to observe all aircraft operations. This would be an authorization of $1,285,000 for the construction of an 80-foot-high steel tower.

Subsequent to that visit, Mr. Chairman, we came back to Washington and requested information from the Air Force. This information was sent over to the House committee for the authorizing process. It was also sent to the Senate committee. Unfortunately, because of the lateness of the information getting over, the House was already beyond the hearing stage and already in the mark up process so it did not arrive in the House in time to be acted upon.

I am hopeful that the Senate will be able to act upon the request this year, since they have yet to mark up the military construction bill in that body.

As a result, I just wanted to call this to the attention of the House and to the attention of the chairman and the ranking minority member and let them know of the grave need we have for a state of readiness at the Myrtle Beach facility.

Mr. TRIBLE. If the gentleman will yield, I will say to my friend, the gentleman from South Carolina, that we appreciate his bringing this matter to our attention, advising this body of the unmet needs of the Myrtle Beach Air Force Base, and I pledge the attention of this Member to those requirements and will be happy to work with our colleagues in the other body in seeing that they are met.

Mr. BRINKLEY. Mr. Chairman, will the gentleman yield?

Mr. NAPIER. I yield to the gentleman from Georgia.

Mr. BRINKLEY. Mr. Chairman, I would wish to offer my appreciation to the gentleman for identifying the needs at Myrtle Beach Air Force Base.

Let me ask the gentleman a question. The gentleman says that it is a parcel of the Rapid Deployment Force there?

Mr. NAPIER. Yes.

Mr. BRINKLEY. And I understand from the gentleman that he is working presently in conjunction with Members of the other body.

Mr. NAPIER. That is correct.

Mr. BRINKLEY. The gentleman has laid an important foundation, and we will look forward to studying this further, if it should be in conference; if not, for the next fiscal year, of course, the gentleman may be certain that it will receive some priority.

Mr. NAPIER. I thank the distinguished chairman and the distinguished ranking minority member. They have been most helpful to us. They do an excellent job, and I appreciate their willingness to move forward on this request. I cannot speak for the other body, but I hope they have received this information in time from the Air Force to move forward.

● Mr. DIXON. Mr. Chairman, we will face many tough decisions in the days ahead.

Passage of the budget resolution may bring cuts in food stamps for the elderly, reduced help for handicapped and disadvantaged youngsters, and the closing of VA medical facilities.

None of these choices is easy.

On the other hand, this amendment offers us an easy way to save $3 million now, and perhaps billions in the long run.

More importantly though, it will show that the United States has taken a courageous and just stand against chemical weaponry, in this case nerve gas.

Nerve gas has rightfully been kept in mothballs for the past 12 years.

Now the administration appears to be knocking at the back door, seeking funds for a facility to produce weapons, without actually seeking to make them, the Pentagon and White House are trying to beg off some fundamental questions:

What will be done with these weapons?

When, where, and how will they be used?

Where can they safely be stored?

And most importantly, will not the undertaking of their production precipitate a chemical weapons race as threatening and difficult to control as the nuclear arms race has been?

Failure to pass this amendment would show that Congress has ignored a dangerous lesson.

In 1968, an occurrence took place that Army officials swore would never happen—when a cloud of nerve gas drifted 30 miles from an Army proving ground in Utah, and 6,000 sheep died.

No human loss of life occurred, but we should not be blinded by good fortune since restocking of nerve gas facilities risks another chemical holocaust in our land.

BINARY GAS WEAPONS ARE NOT SAFE

Despite arguments that these weapons must be detonated before gas is released, the fact remains that one of the components of the nerve gas DF is as toxic as strychnine.

These gruesome weapons represent the lowest form of combat, and deserve to remain a dark remnant of history.

Just yesterday, House and Senate conferees on the 1981 supplemental rescission bill agreed to language which requires the administration to conduct a study on the use and potential cost of such weapons, as well as consultation with our allies before production is resumed.

It does not make sense to construct a facility when serious doubts remain as to the wisdom of reentering chemical weapon production.

In the realm of chemical weaponry we certainly are not empty handed, since it is estimated that the Defense Department has a stockpile of 28,000 tons of gas produced prior to President Nixon's ban in 1969.

In this instance we should act with fiscal and humanitarian responsibility to deauthorize this unnecessary facility.

Congress should close the back door to nerve gas. It is a weapon that offers little security. But it is a clear and present danger to the American people.

I strongly urge the adoption of this amendment.●

● Mr. SANTINI. Mr. Chairman, I wish to add a strong voice in support of the amendment now on the floor to defer $356.8 million for basing construction until such time as the President has made a decision on the final basing mode for MX. Over the last 2 years, as Nevada's only Congressman, I have become more acquainted with the MX missile system than I ever wanted to in my wildest dreams. From the outset I have supported the need for the missile itself, but I have always had grave reservations about the proposed land-based shell game.

I do not claim to be an expert military strategist and I concede that a great deal of my concern is a result of being the representative for the designated MX host State. But I have spent 2 years studying the system and its alternatives and receiving briefings from defense experts within and outside the Department of Defense. I have crisscrossed the Great Basin and listened to the concerns of Nevadans and Utahans about the proposed MX basing system. I have reviewed much of the draft environmental impact statement on MX and I have studied MX reports from the General Accounting Office and the Office of Technology Assessment. And, as a member of the House Public Lands Subcommittee, I have listened to many, many hours of testimony from witnesses both favoring and opposing the proposed MPS basing mode.

My conclusion as we near the end of the road on the MX basing dilemma is: putting MX in the MPS basing mode is not the answer to our current ICBM vulnerability. There are alternatives to MX/MPS and this Nation should pursue them immediately. Reactivating our Grand Forks ABM field, accelerating research on a new generation of ABM systems, putting more B–52's on alert and upgrading our Minuteman guidance system could commence at once. In the long range, MX could be deployed in existing Minuteman fields and additional silos could be added.

In summary, there is every reason not to tie next year's MX basing authorization to one system—the MPS. The new administration has reservations about MPS and has ordered an independent review by a panel of experts known as the Townes Commission. We should not tie the hands of the President at this critical point in time to a basing mode that would likely be obsolete before it is constructed.

MX as planned is a 1990's solution to a 1980's problem. We get little bang for our defense buck until 1990, but our ICBM's are vulnerable now. And if we go forward with MX in the 4,600 to 15,000 plus shelters, Nevada and Utah will sacrifice 40,000 square miles for an MX maginot line. My greatest fear is that the system will be fully deployed, the Great Basin devastated, the lifestyle altered and in the end, our sacrifice will not do one single thing for defense. We are patriotic Americans, but we are not interested in empty gestures.

I urge your support for the amendment to defer $356.8 million for MX construction until the independent review is completed and the President has made a final basing choice for MX.

Mr. Chairman, at this time I would like to address another very significant point in the MX debate—that is, special impact aid.

If the current 4,600-plus MX/MPS deployment is commenced in the Great Basin area, and I hope it will not be, the Congress must bear the responsibility of mitigating the adverse impacts of the project to the greatest extent possible. The General Accounting Office, the Office of Technology Assessment and the Department of the Interior all have agreed that MX physical and socioeconomic impacts will be "severe." MX may well drive 25 to 50 percent of the ranchers in the area out of business. MX will have an adverse impact on mining because of competition for manpower and materials and restrictions on access to public lands. MX will definitely have an inflationary impact on the entire deployment area, and there will be severe problems for local governments as they struggle to supply basic social services to boom-bust communities.

If the administration decides to deploy MX rapidly in remote regions of the West, the requirements for an enhanced impact assistance delivery system will be immediate. Major impacts are inseparable from rapid MX deployment in remote regions. Adequate mitigation involves planning, design, engineering, and other preparations far in advance of actual deployment activities. Legislation must be enacted in the 97th Congress to provide mechanism for adequate and timely impact to aid to the deployment area. This legislation should authorize funds to come out of the Department of Defense's budget and be channeled directly to the impacted State and local governments. Accountability in terms of work programs and plans approved by DOD should be included so that Federal aid is spent for MX-generated impacts only.

In the past month, Nevada and Utah State and local governments, the Office of Economic Adjustment, DOD, OMB, and other Federal agencies have agreed upon language in the draft proposal for special MX impact assistance.

Unfortunately, a Presidential study on impact aid legislation for MX has not been presented to the House Armed Services Committee and so the MX impact aid language is not included in this House military construction authorization bill. I testified before the Subcommittee on Military Installations and Facilities in early April and have talked periodically with my good friend Chairman JACK BRINKLEY about the need for special MX impact assistance. I strongly believe it should be in this 1982 military construction authorization bill, but I do appreciate the chairman's position on this matter. I know Chairman BRINKLEY is sympathetic to the issue, but has problems with the timing.

I encourage the Armed Services Committee and my fellow colleagues to support special MX impact aid should such language later be a subject of conference over this bill. I urge the Senate to include special impact authorization in its 1982 bill.

As a backup, I will be introducing the MX special impact aid in a separate bill. Mr Chairman, the people of the Great Basin have not chosen MX. It has chosen them. I believe, therefore, as a matter of fairness, Nevada and Utah ought to at least be partners with Uncle Sam in setting priorities for MX economic aid. The language I will offer next week substitutes a modified special grant approach for the ususal categorical aid grants.

Mr. Chairman, the communities of Great Basin stand no chance of receiving timely impact aid for MX if they have to beg and borrow and plead with 14 different Federal agencies and 40 different programs for dollars.

I would like to summarize my MX concerns at this time with two points:

First. There are better strategic alternatives than MX in multiple shelters, and;

Second. If the Great Basin gets MX as planned, the physical and socioeconomic impacts will be severe and must be mitigated in large part by the Federal Government.

● Mr. GILMAN. Mr. Chairman, our colleagues on the House Committee on Armed Services and subcommittees are to be commended on the excellent work they have expended on this legislation.

This is truly a worthy piece of legislation, and I am proud to associate myself with it.

As the Representative of the 26th Congressional District of New York, which encompasses our U.S. Military Academy and the scenic region surrounding it, I am expecially proud that the request put into this bill for West Point construction, which the committee readily agrees with, are truly cost effective and a responsible use of our Federal dollars.

The Military Academy is requesting a total of $3,100,000 for repair and replacement of some badly needed utility systems. Waterlines, steam lines, storm drainage systems, metering, and sanitary systems will also be replaced or modified.

These projects will correct existing deficiencies that have been neglected for some time. The Department of the Army is to be commended for limiting these requests to the barest minimums, and for further lowering the total request to comply with the administration's budget.

If this amount is not improved, the situation will only worsen, and will impact operations adversely, so that this expenditure will have to be incurred at a greater cost some time in the future.

The Military Academy has also requested $3,550,000 for energy conservation measures at West Point, and $1,050,000 for similar measures at the Stewart Airport Subpost. These projects, which are long overdue, will help insulate permanent buildings, and enable the installation of storm windows, insulated windows and panels at these buildings. These are projects which will pay for themselves many times over in oil and other heating costs savings. The estimated MBtu savings per year per thousand dollars project cost ratio is 16 for the West Point project and 20 for the Stewart Subpost. Surely, we all appreciate the efforts of the Military Academy to save taxpayers' moneys in this highly cost-effective manner.

Accordingly, Mr. Chairman, I urge all my colleagues to join in supporting this excellent legislation.●

Mr. TRIBLE. Mr. Chairman, there are no further requests for time on this side, and I yield back the balance of my time.

Mr. BRINKLEY. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The CHAIRMAN. All time for general debate has expired. Pursuant to the rule, the Clerk will now read the bill by titles.

□ 1315

The Clerk read as follows:

H.R. 3455

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Military Construction Authorization Act, 1982".

TITLE I—ARMY

AUTHORIZED ARMY CONSTRUCTION PROJECTS

SEC. 101. The Secretary of the Army may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, for the following acquisition and construction:

INSIDE THE UNITED STATES

UNITED STATES ARMY FORCES COMMAND

Fort Bragg, North Carolina, $1,600,000.
Fort Campbell, Kentucky, $1,500,000.
Fort Carson, Colorado, $29,690,000.
Fort Drum, New York, $14,480,000.
Fort Greely, Alaska, $1,150,000.
Fort Hood, Texas, $15,530,000.
Fort Irwin, California, $43,350,000.
Fort Lewis, Washington, $6,700,000.
Fort George G. Meade, Maryland, $3,350,000.
Fort Polk, Louisiana, $630,000.
Fort Riley, Kansas, $4,640,000.
Fort Stewart/Hunter Army Air Field, Georgia, $28,500,000.
Fort J. M. Wainwright, Alaska, $1,200,000.
Presidio of San Francisco, California, $520,000.

UNITED STATES ARMY TRAINING AND DOCTRINE COMMAND

Carlisle Barracks, Pennsylvania, $620,000.
Fort Belvoir, Virginia, $3,600,000.
Fort Benjamin Harrison, Indiana, $5,120,000.
Fort Benning, Georgia, $21,810,000.
Fort Bliss, Texas, $4,700,000.
Fort Dix, New Jersey, $28,040,000.
Fort Eustis, Virginia, $8,280,000.
Fort Knox, Kentucky, $620,000.
Fort Leavenworth, Kansas, $670,000.
Fort Lee, Virginia, $9,870,000.
Fort McClellan, Alabama, $4,780,000.
Fort Pickett, Virginia, $640,000.
Fort Rucker, Alabama, $5,210,000.
Fort Sill, Oklahoma, $4,650,000.
Fort Story, Virginia, $1,050,000.

UNITED STATES ARMY MATERIEL DEVELOPMENT AND READINESS COMMAND

Aberdeen Proving Ground, Maryland, $4,200,000.
Army Materials and Mechanics Research Center, Massachusetts, $1,200,000.
Corpus Christi Army Depot, Texas, $840,000.
Crane Army Ammunition Plant Activity, Indiana, $540,000.
Fort Monmouth, New Jersey, $26,000,000.
Lexington—Blue Grass Army Depot, Kentucky, $1,450,000.
Red River Army Depot, Texas, $2,720,000.
Redstone Arsenal, Alabama, $4,750,000.
Rock Island Arsenal, Illinois, $4,000,000.
Savanna Army Ammunition Depot, Illinois, $3,600,000.
Tobyhanna Army Depot, Pennsylvania, $1,800,000.
Tooele Army Depot, Utah, $1,500,000.

AMMUNITION FACILITIES

Holston Army Ammunition Plant, Tennessee, $2,627,000.
Indiana Army Ammunition Plant, Indiana, $2,453,000.
Iowa Army Ammunition Plant, Iowa, $18,599,000.
Kansas Army Ammunition Plant, Kansas, $4,344,000.
Lake City Army Ammunition Plant, Missouri, $604,000.
Longhorn Army Ammunition Plant, Texas, $257,000.
Milan Army Ammunition Plant, Tennessee, $1,984,000.
Newport Army Ammunition Plant, Indiana, $728,000.
Radford Army Ammunition Plant, Virginia, $17,390,000.

MILITARY DISTRICT OF WASHINGTON

Fort Myer, Virginia, $820,000.

UNITED STATES ARMY COMMUNICATIONS COMMAND

Fort Ritchie, Maryland, $920,000.

UNITED STATES MILITARY ACADEMY

United States Military Academy, West Point, New York, $7,700,000.

UNITED STATES ARMY HEALTH SERVICES COMMAND

Fort Detrick, Maryland, $1,450,000.
Walter Reed Army Medical Center, District of Columbia, $6,250,000.

MILITARY TRAFFIC MANAGEMENT COMMAND

Bayonne Terminal, New Jersey, $2,800,000.
Sunny Point Army Terminal, North Carolina, $880,000.

CONUS VARIOUS

Various Locations, $1,950,000.

OUTSIDE THE UNITED STATES

EIGHTH UNITED STATES ARMY, KOREA

Various Locations, $62,320,000.

UNITED STATES ARMY FORCES COMMAND, OVERSEAS

Egypt, $36,000,000.

KWAJALEIN MISSILE RANGE

National Missile Range, $3,240,000.

UNITED STATES ARMY, JAPAN

Kawakami, Japan, $1,950,000.

UNITED STATES ARMY, EUROPE

Germany, $339,190,000.
Turkey, $20,800,000.

UNITED STATES ARMY INTELLIGENCE AND SECURITY COMMAND

Korea, $1,550,000.
Turkey, $2,550,000.

EMERGENCY CONSTRUCTION

SEC. 102. The Secretary of the Army may establish or develop installations and facilities by proceeding with construction made necessary by changes in missions and responsibilities which have been occasioned by (1) unforeseen security considerations, (2) new weapons developments, (3) new and unforeseen research and development requirements, (4) improved production schedules, or (5) revisions in the tasks or functions assigned to military installation or facility or for environmental considerations, if the Secretary of Defense determines that deferral of such construction for inclusion in the next Military Construction Authorization Act would be inconsistent with interests of national security and, in connection therewith, may acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment in the total amount of $20,000,000. The Secretary of the Army, or the Secretary's designee, shall notify the Committees on Armed Services of the Senate and House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including those real estate actions pertaining thereto. This authorization shall expire on October 1, 1982, or on the date of the enactment of the Military Construction Authorization Act for fiscal year 1983, whichever is later, except for those public works projects concerning which the Committees on Armed Services of the Senate and House of Representatives have been notified pursuant to this section before such date.

MINOR CONSTRUCTION

SEC. 103. The Secretary of the Army is authorized to accomplish minor construction projects under section 2674 of title 10, United States Code, in the amount of $34,150,000.

DEFICIENCY AUTHORIZATIONS FOR PRIOR YEAR PROJECTS

SEC. 104. (a) Section 602(1) of the Military Construction Authorization Act, 1980 (Public Law 96-125; 93 Stat. 941), is amended to read as follows:

"(1) for title I: inside the United States $591,785,000; outside United States $162,950,000; minor construction $52,270,000; for a total of $807,005,000.".

(b) Section 602(1) of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1768), is amended to read as follows:

"(1) for title I: inside the United States $590,440,000; outside the United States $248,140,000; minor construction $44,560,000; for a total of $883,140,000.".

Mr. BRINKLEY (during the reading). Mr. Chairman, I ask unanimous consent that title I be considered as read, printed in the RECORD and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

AMENDMENT OFFERED BY MR. KOGOVSEK

Mr. KOGOVSEK. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. KOGOVSEK: Page 2, strike out line 13.

Mr. KOGOVSEK. Mr. Chairman, let me indicate that the amendment that was just read by the Clerk would deauthorize the Department of the Army from acquiring 244,000 acres of private marginal grazing land in southeastern Colorado and expending $30 million to do so.

I might say in answer to the gentleman from Colorado, who spoke so eloquently just a few minutes ago about the various amounts of support for this acquisition, that as I listened to him I felt somewhat lonely as the gentleman went through the list of supporters, the Governor, the two Senators, himself, other Members, several chambers of commerce who, by the way, are not elected.

I would ask the gentleman to think about this question: As I campaigned for reelection over the past 2 years, my commitment to the people of southeastern Colorado was that I would oppose the expansion of Fort Carson. I might also indicate that my opponent who ran against me in that election indicated that his opposition was to the expansion of Fort Carson.

I feel it is my responsibility to the people who elected me to follow through on that promise to oppose that expansion into that area. I think that when I make a promise during my election that I will oppose something, that I just do not oppose it in the subcommittee, that I just do not oppose it in the full committee, that I oppose it until the last vote is taken.

I would ask the gentleman from Colorado, who went through this long list of supporters, that if by chance his district would be impacted by this tremendous intrusion into his district, what his position would be? I would point out to the people who are here, these people who do not have a feeling for what Douglas County happens to look like, the gentleman from Colorado represents an area between Colorado Springs and Denver, a lot closer to Fort Carson that the Pinon Canyon site, a beautiful area called the Douglas Canyon area. It happens to be the same kind of terrain as Pinon County. They did not select Douglas County because the price of the land up there is quite a bit more expensive because of its location between Colorado Springs and Denver.

But let us just say that that land was going to be looked at. I have a feeling that it would be the responsibility of that Representative to probably take a different view of a Fort Carson expansion than the gentleman is now taking. Let me point out to the people who are here that we are not talking about a 20,000-acre expansion, not a 75,000-acre expansion or a 100,000-acre expansion, we are talking about a 244,000-acre land grab, an area that is bigger than the whole State of Massachusetts.

This is no small matter that we are talking about. I think that if the gentleman or anyone who supports this expansion thinks that the environmental impact of hundreds of tanks rolling back and forth across that desert land is not going to cause some environmental impact, then I think that we better reconsider where we are getting our advice because that area which I am talking about happens to be an area that is know as the Santa Fe trail and wagon tracks that were made over 100 years ago are still recognizable in that terrain.

So, I have a feeling that tanks that are going to be rolling over that land for 4 and 5 months at a time are going to leave a definite impression. Once again, we are still talking about the fact that we have to train our troops and get them militarily prepared for any war that might occur. Let me remind you that we are still talking about 1986—5 years from now. The Army seems to be in no great hurry to get on that land. I think that there are alternatives that will allow us to train those troops a lot more quickly, a lot sooner, and hopefully with a lot less environmental degradation.

I think that we as a Congress have to stop the Federal land grabs that continue to go on in this country. It is kind of what the Sagebrush Rebellion is all about only this goes a bit further.

The people in Alabama do not want nuclear waste deposited there. The People in Colorado I think would like to grow in southeastern Colorado eco-

nomically and they are not going to be able to do it with this kind of intrusion. Whether it is the Army or any other agency, the Forest Service, the Department of Agriculture, I think that all of these agencies, including the Department of the Army, have to be innovative enough to be able to find other solutions other than to continually grab more and more land, at the expense of the people who live in that area.

Mr. REGULA. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I understand the motivation of the sponsor of this amendment and he may well be right. However, I think it is premature at this time to delete the authorization. The Subcommittee on Military Construction of the Committee on Appropriations of which I am the ranking member, will be leaving Sunday to examine the land in question and to make a judgment as a committee as to whether or not we should appropriate the necessary funds to purchase this land if authorized.

I think that to foreclose to the United States any possibility of acquiring the necessary acreage in conjunction with the existing land at Fort Carson would be something we should not do at the present time. We need the flexibility to evaluate whether or not this is in fact necessary to make Fort Carson an effective training base.

It is possible that we need this additional acreage to provide an adequate training facility, particularly as we redirect our efforts toward providing a strengthening of conventional forces. We historically have put a lot of our defense security program dollars into nuclear and now we are redirecting into an expansion of conventional forces, recognizing that this is what may well be needed in the future. Therefore the capability to train for tank warfare is very important.

I think the need has been established. I do think that we should give Congress the flexibility to determine the most favorable approach, perhaps it is an exchange of lands or perhaps it is a sale of some other acreage. This would allow the percentage of Colorado to remain somewhat near the same in terms of Federal ownership.

Mr. KOGOVSEK. Mr. Chairman, will the gentleman yield?

Mr. REGULA. I yield to the gentleman from Colorado.

Mr. KOGOVSEK. I thank the gentleman for yielding.

One of the fears I have had, I would say to the gentleman from Ohio, is that this vote would be perceived as the final action of Congress one way or the other. I think it may be the gentleman's fear also.

Is the gentleman saying to me that he is willing to keep an open mind, as I know he is, on other alternatives other than buying this land? The gentleman serves on the Subcommittee on Military Construction of the Committee on Appropriations. I think there are alternatives. I seem to be hearing the gentleman saying the same thing.

Mr. REGULA. Yes, in response to the gentleman's question, the answer is very much so. I would like to examine the options of trading because I personally do not want to see an expansion of public lands if at all possible and if we can accommodate our needs in any other way. Federal ownership takes the land off the tax rolls. It precludes the use of it for purposes that will be contributing to the economy as opposed to activity that is not any addition to the economic strength of our Nation.

Mr. KOGOVSEK. I appreciate the gentleman's remarks. I think that the gentlelady from Colorado (Mrs. SCHROEDER) has some suggestions or has some indications as to what the Army might be able to do and I think we might be able to discuss those this afternoon.

Mr. REGULA. Let me say, as a member of the Subcommittee on Military Construction of the Committee on Appropriations, I am very interested in all of these. The reason our committee is going out to Fort Carson is to examine all of the options that are available. I would say to the gentleman that I would act from a basis of avoiding expansion of the public domain in the totality as much as possible.

The reason I am speaking on this amendment is that I think it is premature to foreclose the possibility of an acquisition and/or possibly sale, trade, or whatever other way we can accommodate to our military needs while keeping the public acreage at reasonable levels.

Mr. DELLUMS. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, first, I would like to applaud the author of the amendment, the gentleman from Colorado (Mr. KOGOVSEK) for his articulate, diligent and aggressive representation of his constituency in this matter.

I think the gentleman from Colorado has raised an important issue. I would like to, in that context, make a few observations, some of which have already been alluded to.

I would only make them to underscore for the purposes of emphasis. First, Mr. Chairman, the rationale for the development of this training site is to improve combat readiness and in specific the 4th Mechanized Division at Fort Carson.

Mr. Chairman, I question the wisdom of an action that would develop a new training site speaking to the need for combat readiness that would not be constructed for 5 years. I question the wisdom of the definition of the readiness when it takes 5 years for us to prepare for it.

Second, Mr. Chairman, the author of the amendment has thoughtfully proposed a number of alternatives that are available to the 4th Mechanized Division, Fort Irwin and Fort Bliss.

I have talked with the chairperson of the Subcommittee on Military Construction of the Committee on Appropriations who indicated that this Sunday he and members of the subcommittee will be visiting this site to determine whether this is the only available alternative to increase the readiness of the 4th Mechanized Division.

I would suggest, Mr. Chairman, that it is wise to at least provide the opportunity for these people to carry out their study to determine whether or not the acquisition of 244,000 acres is the most efficient, effective, wise way of providing combat readiness.

Fourth, Mr. Chairman, I might indicate that my distinguished colleague, the gentleman from Colorado, in his remarks in the general debate raised a number of significant and important environmental impact issues. It would seem to me they have been vaguely glossed over during the course of these deliberations.

To summarize, Mr. Chairman, in my estimation this proposal may not be the most cost-effective way to accomplish the goal of combat readiness with a 5-year delay.

I would question the wisdom of this action and, the definition of readiness if it takes 5 years to achieve it.

Finally, Mr. Chairman, it would seem to me that given the fact that there are Members of this body, specifically members of the Committee on Appropriations' subcommittee who would have to fund this project, who are prepared to diligently pursue the feasibility of alternatives, that it would behoove us to strike this matter from the authorization until such time as all of the alternatives have been carefully studied and placed before us.

So, I would conclude, Mr. Chairman, by thanking my distinguished colleague for his diligent representation of his constituency by raising this important issue.

Finally, I would urge my colleagues to support this amendment because I believe there are other more efficient and effective ways to address the problem of readiness of the 4th Mechanized Division in Colorado.

□ 1330

Mrs. SCHROEDER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of this amendment, and I really hope that people listen to what my col-

league from the southern part of the State has to say. I think our dealings on this issue have been very frustrating, and I wish rather than just having this map, we had a map of the entire State of Colorado because we have many things that the Army oversees in Colorado. In my district, the First Congressional District, one of the things that we have nearby, near the major airport—in fact, at the end of the runway—is the Rocky Mountain Arsenal overseen by the Army. They are getting the nerve gas out, hopefully cleaning it up, but for the last 3 or 4 years people in my area and the surrounding counties have been trying to find out what it would take from the Army to find out whether or not the city can get that land for expansion of the airport if they need it.

People say, "Why don't you go ahead and plan?"

They hesitate to spend taxpayers' money planning on expanding it if they are never going to get it, and there are just some mere little details about; is there really a chance we will get it, or when might we get it.

It is amazing, because it is very hard to find anyone who can give us specifics. They hold our hands, they bring us over, they have coffee and everyone is nice, they are all sweet, but we never get any of those final details.

Now, that is in the northern part of the State. We have the district of the gentleman who offered this amendment, where there is an Army depot, Pueblo Army Depot, and it is taking care of the Pershing I missile. The number of employees has dropped from 2,000 to 800. There is great fear that it is on the hit list of the 50 things to be shut down.

It seems to me that if we are going to be so concerned about readiness, the Army would talk to us about what they are going to do about the Pueblo Army Depot. I remind the Members how close it is to this new expansion that they have. It would be a very logical place to send the tanks to be rehabilitated and all the other equipment they are going to have in these mechanized divisions, and yet there really is not any dialog about that and no one can find out if it is even on the hit list.

We have another area of the State where there is a hospital, Fitzsimmons Army Hospital, and we are always hearing that it is on the hit list 1 year and off the other.

The reason I am going through all this is that all of these things are under Army control, right now, today, in our State, and a lot of us would like to know about the status of those things. However, no one really wants to talk about that. They only want to talk about how they have to have another part of our State which is bigger than the whole State of Massachusetts.

For those Members in the room who do not live in the West and want to know what the Sagebrush Rebellion is all about, this is it. How much more can they take? There are days in the West when those of us in the West think that we truly are the playground of the DOD; that they would like to drop off all their nerve gas, leave all their nuclear waste, they want things the size of whole States and on and on and on. It takes away our tax base and does all sorts of things.

All we want to do is have equal treatment on both sides as we look at these issues. So far, it has really been very one-sided. Even last week, we had the Secretary of Defense show up at the Air Force Academy, and we were very happy to have him, but he sprung this on us, and that was, "Surprise, maybe you lucky people in Colorado are going to win the draw and get MX."

So, we are wondering what is going to be left of the district if everybody gets his way. I think what the gentleman from Colorado is saying is very important. He is not quarreling with the fact that it needs to be expanded. Practically everyone in the State says there does probably need to be some expansion, but the question is—the size of Massachusetts?

I also call upon a lot of the Members with military expertise, would they tell me when they have ever underestimated their needs? All we have to do is look at the surplus pile, and we know we have morphine for 250 years for a war the size of Vietnam. They always overestimate. No one ever wants to get in trouble, and what the heck, it is just your money.

So the issue is how big; the issue is why, right now, when they cannot talk about the other things; and the issue is, can we not have a little more moderation? It is not as though they have to build massive things here. They are just going to drive tanks. It is not going to hold things up. We would like to know about the other pieces.

Mr. JACOBS. Mr. Chairman, would the gentlewoman yield?

Mrs. SCHROEDER. I would be happy to yield.

Mr. JACOBS. Mr. Chairman, I thank the gentlewoman for yielding. Do I understand the issue correctly to say that as the bill stands now, as the plans of the committee are now, the proposal is to buy the land and then determine whether we need it? Is that a fair statement?

Mrs. SCHROEDER. Well, the proposal is not just that they need expansion, but that they need the size of it.

Mr. JACOBS. But to buy this particular land and later decide whether we need it?

Mrs. SCHROEDER. The parcel has been selected, and the 244,000 acres, that is the designation. The gentleman's amendment is to take it out.

Mr. JACOBS. So here we go with a purchase we are not sure of, and we will find out later whether we really need it.

Mrs. SCHROEDER. Yes, buy now and good luck with it.

The CHAIRMAN. The time of the gentlewoman from Colorado has expired.

(By unanimous consent, Mrs. SCHROEDER was allowed to proceed for 2 additional minutes.)

Mrs. SCHROEDER. What I really wanted to say, this is authorization, and I am sure the gentleman from Indiana understood that this is the authorization and not the appropriation of the money. There is a difference.

Mr. BRINKLEY. Mr. Chairman, will the gentlewoman yield?

Mrs. SCHROEDER. I yield to the gentleman from Georgia.

Mr. BRINKLEY. Mr. Chairman, I am sure the gentlewoman would not have wished to give the gentleman from Indiana the impression that there would not be immediate plans to implement the authority provided with both the Appropriations Committee and within the Department of the Army. This is not just general authority; it is in fact specific authority.

Mrs. SCHROEDER. It is specific authority, but you have to appropriate the money.

Mr. BRINKLEY. It is specific authority with reference to 244,000 acres, commonly referred to as Pinon Canyon, which if approved the Army would go forward with.

Mrs. SCHROEDER. That is right, but you do need the money.

Mr. BRINKLEY. Yes.

Mrs. SCHROEDER. My understanding is, the Appropriations Committee has not been done away with, but there is one more step.

But, I really want to compliment the gentleman from Colorado. I think that all of us know that there needs to be some expansion, and all we are saying in our State is, please treat us as taxpaying citizens and look at the entire package. I think we have the right to ask the Army about these other issues, so that when we giveth, we should be able to taketh away a little bit.

Mr. SEIBERLING. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, as chairman of the Public Lands Subcommittee of the House Interior Committee, I presided at a hearing last year on the question of the acquisition of this land. It is right next to existing Federal national grasslands, and of course the question of Federal land acquisition as well as land disposition is within the jurisdiction of my subcommittee.

It is fashionable right now to give the military about everything they want and then some, but I would like just to point out a few things. First of all, the existing Fort Carson maneuvering area is 70,000 acres. Now, that is not a small area of land. It may be fairly small out in the great spaces of the West, but it is twice the size of, for example, the Cuyahoga Valley national recreational area in Ohio. It is four times the size of the amount of land in that area that is slated for Federal ownership. The Defense Department currently controls 31 million acres of land in the United States—31 million acres. The Park Service has authorized but not yet acquired approximately 475,000 acres of land spread all over the United States.

And yet, the administration is asking that there be a moratorium on all national park land acquisition, and in the very next breath they are asking us to give the Army, in one bite, the right to acquire 244,000 acres of private land.

Now, I submit to the Members that it is illogical to say the least, to ask for an indefinite moratorium on Federal land acquisition for the Park Service and, at the same time to take a 180-degree opposite position as far as the Department of Defense is concerned. It is downright unreasonable to do this if there are viable alternatives.

And there are alternatives; $100 million to expand the existing 71,000 acres at Fort Carson would not buy as much acreage, that is true, but it would add considerably to the existing 70,000 acres and give Fort Carson a very large amount of maneuvering space for their tank operations. That may not be ideal as having 244,000 acres. On the other hand, it means they do not have to transport a whole division over 100 miles, clogging up the existing road system, costing a lot of fuel, and so forth. I submit that maybe we should ask the Army Department to do a little compromising, as we are all being asked to do on other land acquisition matters.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from Arizona.

Mr. UDALL. Mr. Chairman, I thank my friend, and join with my other colleagues in supporting the Kogovsek amendment. I do so with real regret. I hate to oppose the gentleman from Georgia on his first outing on a major bill, because he is one of the most decent and effective Members of this House, and I hope he will be running things on this subcommittee for a long time to come.

So, philosophically I want to say to my Western friends who talk about the Sagebrush Rebellion and how we are going to take all of these Federal lands in the State, one of the great things about our country is that we have a land bank. People of the United States own great chunks of land out West. Some places—maybe not here where you have a lot of private land, but as we look around for nuclear waste disposal, toxic waste disposal, expansion of military facilities, it is a pretty damn good thing to know that we have a lot of extra land out there. The Federal Government will have it and turn it over to the military or to the States when they need it.

But, this is another instance, another illustration of how we think we are such a big country, but even now we are being pressed more and more for available land. So, I think the amendment is a good one, and I endorse what my friend from Ohio is saying.

Mr. ALEXANDER. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from Arkansas.

Mr. ALEXANDER. Mr. Chairman, I thank the gentleman for yielding. I seek this time to support the Kogovsek amendment. I was impressed a minute ago by the remarks of my colleague from Ohio (Mr. REGULA) who is a member of the Military Construction Appropriations Subcommittee, of which I am a member, that he had not decided that this land was needed and that the committee was taking a trip to Colorado this weekend for the purpose of inspecting this site to make a determination.

I have not decided either that the land is needed, and I am a member of that committee, I intend to take this trip and to review the conditions as they are presented to me in order to make that decision, but I am wondering why it is that we need to authorize the acquisition of more than 200,000 acres at a cost of more than $30 million when Members of this Congress who are participating in the debate, some of whom have jurisdiction over the acquisition and the appropriation of funds for the acquisition, when we have not made those decisions.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

(At the request of Mr. ALEXANDER and by unanimous consent, Mr. SEIBERLING was allowed to proceed for 2 additional minutes.)

Mr. ALEXANDER. It occurs to me that the authority to buy this land can be acquired at any time if it is judged that the land is needed, but instead we are rushing into buying a site of land that is larger than the State of Massachusetts when we have not decided that it is necessary to purchase the land.

Certainly, during a time of budgetary restraint and a beginning of an era of austerity, $30 million is an important amount of money that could be applied now to immediate needs of this country. I am supporting this amendment because I think that it is foolish for this Congress to authorize a $30 million expenditure when Members of this body have not even decided that the total amount of land is necessary for acquisition.

I thank the gentleman for yielding.

Mr. SEIBERLING. I thank the gentleman.

□ 1345

The CHAIRMAN pro tempore. (Mr. DANIELSON). The time of the gentleman from Ohio (Mr. SEIBERLING) has expired.

(On request of Mr. RATCHFORD, and by unanimous consent, Mr. SEIBERLING was allowed to proceed for 2 additional minutes.)

Mr. RATCHFORD. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I am glad to yield the gentleman from Connecticut.

Mr. RATCHFORD. Mr. Chairman, I rise in support of the amendment offered by my colleague from Colorado to delete $29.6 million which is authorized in H.R. 3455 for the proposed land acquisition necessary to expand Fort Carson in Colorado.

This amendment to H.R. 3455, the military construction authorization for fiscal year 1982, raises a host of issues which deserve the consideration of my colleagues in the House. Some of them—including the economic and environmental costs of proceeding with the expansion of Fort Carson—can be far better explained by my distinguished colleague from Colorado who has authored this amendment, and I will defer to his greater familiarity on these issues. Yet, I would like briefly to pursue two issues of fiscal responsibility, and accountability, which deserve the attention of the House during this time of scarce Federal resources, and which lead me to rise in support of this amendment.

First, we must question whether the Army's proposal to expand Fort Carson is the most appropriate and cost-effective means of meeting the very legitimate training needs which have already been identified. Neither my colleague from Colorado, nor the members of the committee question the Army's judgment that the military personnel now stationed at Fort Carson require further training to improve their military readiness. However, it is far from clear whether the acquisition of some 244,000 acres of private grazing land, which is 150 miles away from Fort Carson in southern Colorado, represents the best method of accomplishing this important goal.

Mr. Chairman, the Appropriations Subcommittee on Military Construction has already initiated an important and necessary study of the feasibility of using existing military installations for these training purposes rather than expanding Fort Carson's facilities. Before we rush to spend $29 million for this new land acquisition at

a time when Federal funds are so badly needed for other purposes, I strongly suggest that we should defer any action on this authorization until we know what alternative means could provide the necessary training for Fort Carson's troops.

Second, and closely related to the study underway by the Subcommittee on Military Construction, I must rise to challenge the wisdom and rationale for expanding a military installation in Colorado when so many bases have been closed throughout the Northeast and Midwest at considerable economic cost to the region. My colleagues in the House are well aware of the pattern of defense spending and military installation siting in our Nation, which leaves the Northeast-Midwest region with only 25 percent of the total principal installations currently maintained by the Department of Defense. This type of inequitable treatment is only highlighted by the simultaneous closing of existing installations in the declining Northeast-Midwest region and expansion of installations such as Fort Carson in Colorado.

Mr. Chairman, in this time of very tight budgets and scarce resources, when we are struggling under the very difficult requirements of reconciliation and the first budget resolution, we must look very closely at ways in which we can make the best possible use of existing resources rather than expanding into new areas. Over the past decade, 127 principal installations throughout the Nation have been closed, including 50 within the Northeast-Midwest region. It simply seems indefensible that we move forward with an expansion of Fort Carson's facilities without reviewing these closed facilities and other existing military installations to determine whether the Army's training needs cannot be met in a less harmful and expensive manner.

For all of the above reasons, Mr. Chairman, I strongly urge my colleagues to support this amendment which would delete $29.6 million authorized in H.R. 3455 for the expansion of Fort Carson. We are not ignoring the Army's training needs, but simply arguing that they should be met in a thoughtful, cost-effective manner. When considered with the economic and environmental concerns which my colleague from Colorado has raised, I hope the House will adopt a course of action which is fiscally responsible, and approve the gentleman's amendment to delete authorization for the expansion of Fort Carson.

Mr. BRINKLEY. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I will be glad to yield to the gentleman from Georgia.

Mr. BRINKLEY. Mr. Chairman, I thank the gentleman for yielding, and I just wish to respond briefly to the wondering of the gentleman from Arkansas (Mr. ALEXANDER) as to whether or not we were rushing into this transaction. The fact of the matter is that we have been trying to do it since 1974.

Further, reference has been made to the fact that this tract of land is equivalent to the size of the State of Massachusetts. That is not so. Massachusetts is 8,257 square miles, and Pinon Canyon is less than half that amount.

But that is not the issue. The issue is the national need and the national interest.

Mr. ALEXANDER. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I would just like to make one other point, but first I will yield to the gentleman from Arkansas.

Mr. ALEXANDER. Mr. Chairman, I would like to address a question, if I may, to the chairman of the subcommittee.

Is it not so that there is three times as much land provided for in this authorization than is needed for the training of the troops?

Mr. BRINKLEY. Mr. Chairman, if the gentleman will yield, the answer is in the negative. Because of environmental considerations and because the Army will shift from one tract to the other, all of it is needed.

The CHAIRMAN pro tempore. The time of the gentleman from Ohio (Mr. SEIBERLING) has again expired.

(On request of Mr. ALEXANDER, and by unanimous consent, Mr. SEIBERLING was allowed to proceed for 2 additional minutes.)

Mr. ALEXANDER. Mr. Chairman, I have one more question, if the gentleman will yield.

Mr. SEIBERLING. I yield to the gentleman from Arkansas.

Mr. ALEXANDER. Mr. Chairman, let me ask, is it not so that the question of need is in contention here, and that, as the gentleman from Colorado (Mr. KOGOVSEK) has said, environmentally the land will be damaged and degraded regardless of whether or not it is rotated, and that three times as much land as he judges to be needed is provided for in this authorization?

Mr. BRINKLEY. Mr. Chairman, if the gentleman will yield, I do not believe that is the fact. I believe the question of need is not in issue. I believe the gentleman from Colorado admits the need for the land. His interest is in where it is to be located.

The gentleman has pointed to the fact that tanks will degrade the land and it will be impossible for the land to come back. The testimony before the committee was that cattle do prescisely the same thing, and this is no change.

Mr. KOGOVSEK. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from Colorado.

Mr. KOGOVSEK. Mr. Chairman, the gentleman from Georgia (Mr. BRINKLEY) is correct. I have not questioned the need for Fort Carson to expand, and I would indicate that the need is there.

I would correct the gentleman by saying, however, that I am not sure that the Army needs 244,000 acres. The Army, by its own admission, needs 85,000 acres to train troops in the kind of maneuvers that they wish for training purposes. They do not need 244,000 acres except to rotate, as the gentleman pointed out, maybe every several years. It is still my contention that rotation will not have the desired effect of letting the land come back.

The CHAIRMAN pro tempore. The time of the gentleman from Ohio (Mr. SEIBERLING) has again expired.

(By unanimous consent, Mr. SEIBERLING was allowed to proceed for 2 additional minutes.)

Mr. SEIBERLING. Mr. Chairman, if I may reclaim my time, I would simply like to say at this point that in the East, and in other parts of the country an effort is being made by the administration to put a moratorium on Federal land acquisition in national park units that have been authorized by the Congress of the United States, approved by the President, and desired by the local people. We are being told: "Oh, no, we have acquired too much land already." Yet in the next breath we are told that we are going to have to acquire three times as much as is needed for actual maneuvering out in Colorado, where the people do not want the land acquired.

The gentleman from Connecticut (Mr. RATCHFORD) has pointed out that in the East and in the North there are bases that are closed where the local people want them opened again, and we are told: "No, we can't do that. We have to move to the Sun Belt." Mr. Chairman, it seems to me that we ought to make better use of the bases already existing.

The CHAIRMAN pro tempore. The time of the gentleman from Ohio (Mr. SEIBERLING) has again expired.

(On request of Mr. WILLIAMS of Montana, and by unanimous consent, Mr. SEIBERLING was allowed to proceed for 2 additional minutes.)

Mr. WILLIAMS of Montana. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from Montana.

Mr. WILLIAMS of Montana. Mr. Chairman, I thank the chairman of the Subcommittee on Public Lands and National Parks for yielding.

As a westerner, I am absolutely intrigued by this issue. I had not intended to speak on this, but to me as a westerner it follows very close to the line of the whole sagebrush rebellion that has been going on.

We hear a lot about how wilderness areas are oppressive to westerners; we hear a lot about how environmental restraints are oppressive to westerners because, as they say, "You can't graze cattle on the land, and you can't drive vehicles on the land," and some claim incorrectly that "you can't even hunt or fish on them."

There is nothing more oppressive to a westerner than the lockup of Federal land by a military reservation.

You can do absolutely nothing on it; you have absolutely no access to it whatsoever. Yet here we are taking 200,000 acres of privately owned land in a State that already has 36 percent of it that belongs to the Federal Government.

Mr. Chairman, this is the prime sagebrush rebellion issue that this Congress has faced thus far.

Mr. SEIBERLING. And, Mr. Chairman, it is several times the size of any unit the national park system that has ever been authorized by this Congress to be created from private land.

Mr. DAN DANIEL. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I oppose this amendment to delete funds for the Fort Carson land acquistion because I am convinced that such action will be detrimental to the strategic readiness of this Nation.

The 4th Mechanized Infantry Division and Fort Carson are an important part of the national defense of the United States. The 4th Division is the only mechanized and tank division in the continental United States with all three of its brigades assigned and on active duty. It is the strongest and most powerful division in the United States with commensurate emergency deployment responsibilities in Europe and elsewhere. The readiness of the 4th Division is directly related to the quality of training its units receive. Maneuvering under unrealistic conditions, particularly in the severely constricted area at Fort Carson does not provide quality training. As a result, the training readiness of the 4th Division is being adversely affected. The improved range and lethality of modern weapons and their increased mobility on the battlefield have fundamentally altered the way the Army fights and trains. On the modern battlefield, vehicles, men, and equipment must disperse to avoid becoming lucrative targets. This dispersed posture increases problems with communications, command and control, and logistics. Realistic maneuver areas compatible with modern battlefield requirements, warfare techniques, and improved weaponry will increase the division's combat readiness. The Army has selected the Pinon Canyon parcel from among 22 other Federal and private sites because of its superior training value, cost effectiveness, and remotenesss from population centers. The terrain at the Pinon Canyon site is well configured to challenge mechanized and armored battalion task force maneuvers. The terrain is more varied and presents greater latitude for realistic battlefield situations. Additional training value will be realized from the rail transport of units to the Pinon Canyon site. Rail movement of troops and equipment is one of the prime means of deployment for the 4th Division in a wartime emergency.

Mr. Chairman, I strongly recommend to my colleagues that this amendment be defeated in the interest in the national defense of this country.

Mr. BURGENER. Mr. Chairman, will the gentleman yield?

Mr. DAN DANIEL. I yield to the gentleman from California.

Mr. BURGENER. Mr. Chairman, I am going out to Colorado on Monday to examine this area, and hopefully with an open mind, and I would, therefore, associate myself with the remarks of the gentleman from Ohio (Mr. REGULA, who will also be with us, as well as our chairman, the gentleman from Georgia (Mr. GINN).

I wish that Members would not keep referring to the State of Massachusetts. I believe there is a mathematical error here somewhere. If I am figuring correctly, although it is not really that germane, it is about perhaps one-tenth or one-twentieth the size. That does not make it relevant, but we should not keep repeating an inaccuracy.

So I do believe that the amendment was offered prematurely. It is certainly premature, and it might foreclose something that might be very necessary. But I, too, shall look at it, and I shall look at it with an open mind.

Mr. SEIBERLING. Mr. Chairman, will the gentleman yield?

Mr. DAN DANIEL. I yield to the gentleman from Ohio.

Mr. SEIBERLING. Mr. Chairman, yes, I think there is a minor error. The area in question is not as large as the State of Massachusetts. But I would like to say this:

Can we imagine what howls would go up from OMB, under any administration, if we proposed to buy a chunk of private land, 244,000 acres in size, to create a national park somewhere. We would never hear the end of it.

Mrs. SCHROEDER. Mr. Chairman, will the gentleman yield?

Mr. DAN DANIEL. I yield to the gentlewoman from Colorado.

Mrs. SCHROEDER. Mr. Chairman, I have great respect for my chairman on the Readiness Subcommittee, and I have really been honored to serve with him this year.

I think one of the things we want to point out is that this acquisition way more than doubles the size, which I think is a little extreme if we are just calling it an expansion.

The second point is that I know I am concerned, as the gentleman from Virginia has been, as well as everybody else, about fighting in Europe, and that is what this mechanized division probably would do.

I hope that sometime the gentleman from Virginia can come and see the land in Colorado. It does not look like Europe, I can tell him that; it looks a lot more like the Persian Gulf.

There is another point to that, too. I know from the extensive hearings we had about the depots and maintenance of the equipment, which also helps us with readiness, and right next to that we have the Pueblo Army Depot, and this mechanized force would be the one which goes right to Europe. That makes no sense in the whole scheme of readiness.

I hope that the gentleman can help us work on all those things. If the gentleman would come and look at the land, I am sure we would stand there and scratch our heads and say, "This doesn't look like Europe."

We have the Pershing unit there, and we would be a lot more ready with that and all the other things.

Mr. Chairman, the gentleman from Virginia is a very reasonable Member, and I am sure he will help us with all these things.

Mr. KRAMER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment. I, too, am sympathetic with the objectives and goals contained in the sagebrush rebellion. I, too, am not particularly desirous of having the Federal Government acquire great new tracts of land, but there is a demonstrated need for this land.

Our committee diligently spent many days on hearings where all sides were represented. We made a decision by a vote of 9 to 1 in the subcommittee and on voice vote in the full committee that there was a need to acquire this parcel at this time. I hope that the Appropriations Committee will make that same judgment.

If this authorization is deleted today, the Appropriations Committee has no need for a trip to Colorado to make an independent judgment on this issue. Each committee ought to determine in its own jurisdictional area the need for this expansion.

I am not the issue here; the other gentleman from Colorado is not the issue here; the composition of my district is not the issue here. What is at issue here is American lives, as the gentleman from Virginia has amply pointed out.

I do not wish to be melodramatic, but I hope that we do not make a serious mistake here today, delete this au-

thorization, and then find the blood of American soldiers on our hands in a few years.

Now, that is the issue. It is not the Pentagon's bureaucracy; it is the American solider, the little guy who is going to get killed if training opportunities are inadequate. What we are trying to do here is provide that soldier—and every one of the Members out there has some of them in their districts—with the ample opportunity and the maximum opportunity to stay alive if he is getting shot at. That is the issue.

□ 1400

Now, yes, this expansion is controversial, obviously, from the debate here today; but I would point out that we do have a situation in which you weigh parochial interests, a Colorado interest versus a national interest. Yet I would point out that even when examining that parochial interest that the Colorado interest, many of the people in the expansion area have supported the national interest. In fact, 36 of the 41 acquisition landowners involved are supporting the national interest. Every chamber of commerce from every affected community is supporting the national interest.

This expansion, whether it takes place or not, does not put one more additional red cent or one more additional warm body in my own district. Quite frankly, in my own district, this is not a big issue even in parochial terms.

It is the interest in my district, as I hope it is in yours, that we need to do something militarily to get this country where it needs to be to meet the threat of Soviet adventurism around the world.

This vote is the first vote we are going to take on military readiness in this Congress. What kind of a signal are we going to send to the Soviet Union today? Consider that, I hope, when you decide whether or not to support this amendment.

I hope you will oppose the amendment and strike a vote, not for anybody from Colorado, but for that poor soldier whose life is on the line when he is asked to go into combat.

Mr. SKELTON. Mr. Chairman, I move to strike the requisite number of words.

My good friend and colleague from the West a few moments ago said that there is nothing more oppressive to a westerner than to take land for military use. I suggest that there is something more oppressive to a westerner than to take land for military use and that is to have an Army that is not properly trained to defend this country.

Mr. Chairman, George Washington once told us that the nation that maintains an Army that is ready to fight seldom has to use it. I think that this issue today is one of our determination to have a ready and capable military.

It has been mentioned a few moments ago about the signals we might send to a prospective enemy. A number of years ago in 1939 this Chamber turned down construction for a place in the Pacific called Guam. Historians tell us that the signal that was sent to the Empire of Japan by this Congress turning down a $5 million appropriation to construct a better harbor at Guam told them that we were not in a position to respond and that we would not be ready in the event of an attack. We all know what happened not long after that on December 7, 1941.

Mr. Chairman, I rise in opposition to this amendment. First, I would like to say, though, that I have the greatest respect and admiration for my friend, and he is my friend, the gentleman from Colorado. He does an excellent job for his State and for his district.

I find that I must on the principle of the matter take issue with my friend, the gentleman from Colorado (Mr. KOGOVSEK) on this.

Recent improvements, Mr. Chairman, in the accuracy of the firepower and the range of major weapons systems have greatly increased the nature of today's battlefield. Warfare has reached a point where if the enemy can be seen, he can be hit. To train for combat under these conditions, a battalion needs an area in which to do it. I have yet, Mr. Chairman, to hear a suggestion as to where this could go for the 4th Infantry Division that is at Fort Carson, Colo., unless you take the whole 4th Infantry out of the State of Colorado.

The question has been put, Why do you need so much land? Well, for the very simple reason that if we are to follow environmental guidelines that we have laid down, we must have a sufficient amount of land.

Mr. Chairman, with regret to my friend, I must oppose this amendment.

Mr. KOGOVSEK. Mr. Chairman, will the gentleman yield?

Mr. SKELTON. I yield.

Mr. KOGOVSEK. I thank the gentleman.

I would ask the gentleman and I would ask the other gentleman from Colorado, if it is so critical that we give the troops that we are talking about at Fort Carson the proper training, why must we wait 5 years?

Mr. SKELTON. Probably because this Congress has not taken action. This Congress is going to take action. This Congress, I feel, is dedicated to the fact that we are going to have a ready and a trained Army. The best defense is to have a ready and a prepared military defense. That is what we are intending to do by this action, sir.

Mr. KOGOVSEK. I would just tell the gentleman that I feel strongly that there are options. The gentleman has indicated that he has yet to hear some. The gentleman from Colorado does not agree with this, but I still think in spite of the fact that in this quarter, when there is some sort of postgraduate course in military training, that I think there is land available there. I know there is land available in Fort Bliss. I know there are travel problems, but I think that there are options.

Mr. DYSON. Mr. Chairman, I move to strike the requisite number of words. I rise in opposition to the amendment.

Mr. Chairman, this is an issue that is obviously very sensitive. I have had experience in dealing with sensitive issues in the past.

I served in the General Assembly of Maryland for 6 years. During that entire 6 year period, we were plagued with a land acquisition problem, a park expansion in one of the counties which I represented. It was not resolved until my final year.

I think today I would like to offer a perspective about that land acquisition process that may be somewhat different than the way in which the two previous colleagues have approached this issue.

First of all, the author of the amendment, the gentleman from Colorado, in my estimation has done a tremendous and very credible job of making the presentation on behalf of his constituency.

I think this issue, though, is underscored by its national significance. We must do this and I therefore speak against the amendment.

The Army has testified to the Armed Service Committee that the Corps of Army Engineers would expect to begin the preliminary steps in the acquisition process, if the Fort Carson expansion area is approved. This would include title evidence and appraising, early in the calendar year of 1982 and commence negotiations with some land-owners by May of that year. The completion of these negotiations is anticipated by the end of 1982.

Based upon the testimony in the subcommittee, we were advised that 37 of the 41 landowners have indicated publicly and, in fact, have signed affidavits that they would approve the purchase of their lands as long as their rights are protected and, of course, they receive fair market value for their property. These 37 landowners represent approximately 200,000 of the 244,000 acres in question.

It is my further understanding that only seven landowners actually live on the property; and of the seven, six are prepared to sell their land.

Concerning the appraisal process, Mr. Chairman, the Army considers not

only the comparable sales data, but also the capitalized income stream the land is capable of generating when put to its highest and best use, and for improved properties the cost of replacing existing improvements, of course taking into consideration depreciation.

When appropriate, all three approaches to determine value are employed in the final opinion of value. Recognition of mineral rights are given where such rights are pertinent and relevant. Water rights and their value will be given consideration, where such rights are also pertinent. The value of commercially marketable timber will also be given consideration. The value of leaseholds and the present worth of lessee's interests will be considered. The appraisal for any ownership will be current as of the date the owner executes a contract to sell his property to the U.S. Government.

Now, with respect to compensation, our Constitution requires payment of just compensation for any property acquired.

The courts have held for many years that just compensation means fair market value. Public Law 91-646 further requires appraisal of each tract to establish an estimate of fair market value and the Army must offer the owner the full amount of the approved appraisal. The owner is not obligated to accept the Army's initial offer; he may make a counteroffer and the Army is obligated under the law to make every effort to reach a mutually acceptable price.

The act also requires that the Army compensate the owner for any severance damages and to protect him against being left with an uneconomic remnant. The act also provides for payment of relocation assistance benefits, including the cost of moving families and personal property to replacement homes and the cost of moving ranch operations to replacement sites.

In short, Mr. Chairman, our Constitution and public laws protect the landowner and insure fair and just compensation for any land and improvements acquired by the Federal Government.

The CHAIRMAN pro tempore. The time of the gentleman from Maryland has expired.

(By unanimous consent, Mr. DYSON was allowed to proceed for 1 additional minute.)

Mr. DYSON. Further, the landowner may seek redress within the courts if he or she believes that just compensation is not offered.

In my summation, in my opinion, as I said and the previous speakers who have spoken in opposition to this, I think it is simply a point in the national interest that we must consider this and reject the amendment today.

Mr. TRIBLE. Mr. Chairman, I move to strike the requisite number of words. I rise in opposition to the amendment.

Mr. Chairman, we have heard a spirited debate here this morning. I fully understand the opposition of my colleague whose district is affected by this action. I fully understand the opposition of those Members that routinely rise in opposition to any national defense initiative; but I believe that we must underscore several important points.

First of all, this is not a hasty decision. This matter has ben studied and studied and studied for 5 years or more. The need for this land is well documented. Our subcommittee held long and intensive hearings and finally after listening to all parties, we concluded on a bipartisan note that this ought to be done by a vote of 9 to 1.

This land is urgently needed, so that the 4th Mechanized Infantry Division can train in battalion size units. Our units must train in the methods and practices necessary for actual combat.

At present such training is impossible because of lack of space. We cannot acquire that space at Fort Drum or in the Army Arsenal in Colorado or at the other bases mentioned today.

The important point was underscored in testimony before our subcommittee by a company tank commander who testified in a very simple but eloquent terms. He said, "Because of the problem we have at Fort Carson, my junior leaders, my sergeants, who will make money for me in combat, who save my men's lives, are not trained well enough." That is the point here.

National interest must prevail. We must train our people. We must prepare them for combat. That is our highest responsibility.

The Army has designated this acquisition project as its No. 1 project for fiscal year 1982. The need for additional training areas is critical. Today we simply lack the space to prepare our troops for modern tank warfare. The environmental process has been fully completed; 21 alternatives sites, 21, have been studied and found wanting.

It is essential that we move ahead. We must not delay further the training improvements required to prepare our people for combat, for the battlefield. We must move ahead. The time to act is now.

□ 1415

Mr. ASPIN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to address a couple of questions here because I think the gentleman from Virginia (Mr. TRIBLE) is correct. This is not an easy decision and I think it is something that is very, very critical. But I think it is a question that is a close call.

However, at this point, listening to the debate, I think the point of the gentleman from Colorado (Mr. KOGOVSEK) is a very, very good one and I am inclined to go along with him. But I would like to address a couple of questions.

First of all, I think we can all agree. I take it that there is no question but what the Army needs some more facilities and some more lands. The question revolves around what are the alternatives and what is the timetable. I would like to address that question to the proponents of the amendment, what are the alternatives, if I could, that you are suggesting, other than the acquisition of this large amount of land that the Army wants to do and the subcommittee is recommending. What are the alternatives?

Mr. KOGOVSEK. Mr. Chairman, will the gentleman yield?

Mr. ASPIN. I yield to the gentleman from Colorado.

Mr. KOGOVSEK. I think that is one of the reasons why I would tell the gentleman from Wisconsin (Mr. ASPIN) that I went to the chairman of the Subcommittee on Military Construction Appropriations to see if there are alternatives. I mentioned a couple. Nobody thinks they are good ideas, and it is mainly the Army that has given us the studies that indicate they are not.

I think that we have enough Federal land and enough Federal bases, Army bases. We have Fort Bliss, for example. The Army says it is too far away. The Army is telling me they want property that is within a day's march because it is cheaper and they would not have to put soldiers up for two nights. They do not have to travel as far. Fort Bliss is more than a day's march. Fort Irwin is evidently more than a day's march.

We are talking about $30 million. I think the tradeoff of buying more land, possibly that $30 million could be used for travel if there are tanks and equipment already out at Fort Irwin, and it seems to make more sense to just send the troops out there and spend that money that way.

Let me also say that the first $30 million is only the beginning. The Army admits that before the land acquisition and before the first trooper is out there we are talking about a cost of $100 million by the time we buy the barracks and so on.

My point is that building another base 160 miles away from the present base does not sound too logical.

Mr. ASPIN. That is one part that I think is a good point. I would think that the Army would have a very good case if the land that they were purchasing were contiguous to the present land that they owned, but it is

what, 160 miles away? So already they must move the troops to the new site in order for them to train anyway.

Mr. KOGOVSEK. At a cost of about $250,000 a year.

Mr. ASPIN. So what we are talking about is whether we have to move 160 miles or whether we have to move to Fort Bliss or Fort Irwin.

Mr. TRIBLE. Mr. Chairman, will the gentleman yield?

Mr. ASPIN. I yield to the gentleman from Virginia (Mr. TRIBLE).

Mr. TRIBLE. I would say in response to the gentleman's question there is a very important function served by mobilizing and moving. That is what we are going to have to do in Western Europe. We are going to have to move forward and meet the enemy.

But the fact is that that is the most reasonable distance that is attainable. The fact is the Army has looked at some 21 other sites. They have studied those and we have reviewed those. The Fort Bliss alternative is the one that is most often mentioned.

The fact is that we have determined that that was an unsuitable alternative. Over a 10-year period the Fort Bliss alternative would cost twice as much and would be available less than one-half the time than the Colorado site. The fact is, again, alternative sites have been looked at, considered, and reviewed. It is our judgment that this is the best site that is available.

Unfortunately, it is in our friend's backyard and he objects.

Mr. WIRTH. Mr. Chairman, will the gentleman yield?

Mr. ASPIN. I yield to the gentleman from Colorado (Mr. WIRTH).

Mr. WIRTH. I want to thank the gentleman for yielding. I wanted to associate myself with the comments of the gentleman in the well, Mr. ASPIN, as well as the gentleman from Colorado (Mr. KOGOVSEK). I think both of them have made a very compelling case both on the economics and the timeframe of this land question. I would hope the attention of the Members would be drawn to that.

In addition, I would very much hope the House would be down the line considering the elements brought up by the gentleman from Colorado (Mr. KOGOVSEK) and the gentlewoman from Colorado (Mrs. SCHROEDER) related to the arsenal and the land questions surrounding that. But that will be further down the line.

In the meantime, I would very much hope that the Members would support the gentleman from Colorado and I thank the gentleman for yielding.

Mr. ASPIN. Let me just raise one other question before the debate is closed and that is the question of timing. What happens if we postpone the decision at this point?

Mr. KOGOVSEK. Will the gentleman yield?

Mr. ASPIN. I yield to the gentleman from Colorado (Mr. KOGOVSEK).

Mr. KOGOVSEK. I thank the gentleman for yielding. I think if my amendment carries we have not precluded or we have not ended the discussion. I think both the gentleman from Georgia (Mr. BRINKLEY) and the other members of the Armed Services Committee would agree that this matter will come up again in the other body.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. BRINKLEY. Mr. Chairman, I move to strike the requisite number of words and rise in opposition to the amendment.

Mr. GINN. Mr. Chairman, will the gentleman yield?

Mr. BRINKLEY. I yield to the gentleman from Georgia (Mr. GINN).

Mr. GINN. Mr. Chairman, I thank Chairman BRINKLEY for yielding. Before I briefly speak on the purpose for which I asked him to yield, I want to commend the gentleman from Georgia (Mr. BRINKLEY) and the gentleman from Virginia (Mr. TRIBLE) and the members of their subcommittee for delving into this controversial issue as deeply as they possibly could. They have done that. They have made a judgment and they have come here today and I think ably defended it. They have also been fair to the other side in hearing their viewpoint.

As chairman of the subcommittee which must fund this land acquisition in the event it is authorized, I want to explain, Mr. Chairman, why I will vote "present" on this amendment. It will be the first time in my career that I have done that. But I am doing so in an effort to continue to show fairness.

As the gentleman from Ohio (Mr. REGULA) pointed out, the Subcommittee on Military Construction Appropriations will travel to Colorado this Sunday to personally inspect the land acquisition in question. We are doing that in an effort to be fair to the gentleman from Colorado (Mr. KOGOVSEK) and also Mr. KRAMER. We are doing that to be fair to the people of Colorado and the various factions there.

So I wanted to make it very clear that we are attempting to be fair as well as the gentleman from Georgia (Mr. BRINKLEY) and the gentleman from Virginia (Mr. TRIBLE) have, and for that reason I will vote present if there is a vote.

Mr. BRINKLEY. Mr. Chairman, in conclusion of the debate I would simply like to respond to one question raised by the gentleman from Wisconsin (Mr. ASPIN) as to what will happen if we defer this further.

My response is the same thing that has happened since 1974. We have deferred it again and again and again. There is a day to decide. Today is decision day and that is the function of this body, for the majority of us to express ourselves.

Many of us feel very keenly about the problem the gentleman from Colorado (Mr. KOGOVSEK) has experienced. We feel more strongly about the national need which has been given to our committee by a preponderance of the evidence; 3 years is a timeframe about which we are talking. We say 1986. It will take the balance of this year to authorize and fund the measure, and then in the years of 1982, 1983, 1984, 1985, there will be the land acquisitions and the preparation for use in 1986. That is not too far away.

Speaking of Fort Dix, it is open. Speaking of Fort Drum, it is expanding. There is a need, and I ask for my colleagues' negative vote on this amendment. Please vote "no."

Mr. KOGOVSEK. Mr. Chairman, will the gentleman yield?

Mr. BRINKLEY. I yield to the gentleman from Colorado (Mr. KOGOVSEK).

Mr. KOGOVSEK. I would just answer the gentleman by saying that if my amendment carries this afternoon that I am sure this is not the end of the question as far as this year is concerned. The other body I am sure intends to keep this issue very much alive.

I think that we are going to have a chance to discuss this some more in the future, but it is important that this House go on record and let the people of this country and let the other body know that we are through with the Federal land grabbing that has been going on for too long.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Colorado (Mr. KOGOVSEK).

The question was taken; and on a division (demanded by Mr. KOGOVSEK) there were—ayes 24, noes 32.

RECORDED VOTE

Mr. KOGOVSEK. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device and there were—ayes 175, noes 209, answered "present" 1, not voting 46, as follows:

[Roll No. 62]

□ 1430

The Clerk announced the following pairs:

On this vote:

Mr. Boland for, with Mrs. Bouquard against.

Mr. Leland for, with Mr. Mitchell of New York against.

Mr. Fary for, with Mr. Dickinson against.

Mr. Hollenbeck for, with Mr. Badham against.

Messrs. EMERSON, DUNCAN, DAUB, ROSE, LONG of Maryland, and ERLENBORN changed their votes from "aye" to "no."

Mr. CONTE, Mr. ANNUNZIO, and Mrs. HECKLER changed their votes from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

□ 1445

The CHAIRMAN. Are there other amendments to title I?

If not, the Clerk will read.

The Clerk read as follows:

TITLE II—NAVY

AUTHORIZED NAVY CONSTRUCTION PROJECTS

SEC. 201. The Secretary of the Navy may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment for the following acquisition and construction:

INSIDE THE UNITED STATES

UNITED STATES MARINE CORPS

Marine Corps Logistics Base, Barstow, California, $4,700,000.

Marine Corps Base, Camp Lejeune, North Carolina, $28,650,000.

Marine Corps Base, Camp Pendleton, California, $18,550,000.

Marine Corps Air Station, Cherry Point, North Carolina, $4,850,000.

Marine Corps Air Station, El Toro, California, $12,400,000.

Marine Corps Air Station, Kaneohe Bay, Hawaii, $2,650,000.

Marine Corps Air Station, New River, North Carolina, $5,060,000.

Marine Corps Bases Pacific, Camp H. M. Smith, Oahu, Hawaii, $2,900,000.

Marine Corps Recruit Depot, Parris Island, South Carolina, $4,100,000.

Marine Corps Development and Education Command, Quantico, Virginia, $13,560,000.

Marine Corps Recruit Depot, San Diego, California, $1,300,000.

Marine Corps Air Station (Helicopter), Tustin, California, $7,600,000.

Marine Corps Air-Ground Combat Center, Twentynine Palms, California, $5,450,000.

Marine Corps Air Station, Yuma, Arizona, $3,450,000.

OFFICE OF NAVAL RESEARCH

Naval Ocean Research and Development Activity, Bay St. Louis, Mississippi, $5,900,000.

Naval Research Laboratory, Washington, District of Columbia, $6,800,000.

CHIEF OF NAVAL OPERATIONS

Naval Submarine Base, Bangor, Bremerton, Washington, $23,100,000.

Naval Submarine Support Base, Kings Bay, Kingsland, Georgia, $65,060,000.

COMMANDER IN CHIEF, UNITED STATES ATLANTIC FLEET

Naval Air Station, Brunswick, Maine, $12,800,000.

Naval Air Station, Cecil Field, Florida, $21,700,000.

Naval Station, Charleston, South Carolina, $21,660,000.

Naval Submarine Base, New London, Groton, Connecticut, $15,650,000.

Naval Submarine Support Facility, New London, Groton, Connecticut, $3,300,000.

Naval Air Station, Jacksonville, Florida, $6,380,000.

Naval Amphibious Base, Little Creek, Virginia, $27,950,000.

Naval Station, Mayport, Florida, $2,000,000.

Naval Station, Norfolk, Virginia, $46,100,000.

Naval Air Station, Oceana, Virginia, $15,560,000.

COMMANDER IN CHIEF, UNITED STATES PACIFIC FLEET

Naval Station, Adak, Alaska, $1,550,000.

Naval Air Station, Alameda, California, $4,750,000.

Naval Air Station, Barbers Point, Hawaii, $9,650,000.

Naval Air Station, Fallon, Nevada, $8,300,000.

Naval Air Station, Lemoore, California, $2,200,000.

Naval Station, Long Beach, California, $22,000,000.

Naval Air Station, Moffett Field, California, $2,000,000.

Naval Air Station, North Island, California, $13,240,000.

Naval Station, Pearl Harbor, Hawaii, $9,920,000.

Naval Submarine Base, Pearl Harbor, Hawaii, $13,350,000.

NAVAL EDUCATION AND TRAINING COMMAND

Naval Air Station, Chase Field, Texas, $2,800,000.

Fleet Combat Training Center, Atlantic, Dam Neck, Virginia, $4,600,000.

Naval Training Center, Great Lakes, Illinois, $11,800,000.

Naval Explosive Ordnance Disposal School, Indian Head, Maryland, $3,300,000.
Naval Air Station, Memphis, Millington, Tennessee, $11,000,000.
Naval Education and Training Center, Newport, Rhode Island, $1,900,000.
Naval Justice School, Newport, Rhode Island, $1,500,000.
Naval Training Center, Orlando, Florida, $6,880,000.
Naval Air Station, Pensacola, Florida, $14,100,000.
Fleet Combat Training Center, Pacific, San Diego, California, $6,800,000.
Naval Training Center, San Diego, California, $1,150,000.

BUREAU OF MEDICINE AND SURGERY

Naval Regional Medical Clinic, Annapolis, Maryland, $3,560,000.
National Naval Medical Center, Bethesda, Maryland, $1,100,000.

NAVAL MATERIAL COMMAND

Pacific Missile Range Facility, Barking Sands, Hawaii, $8,100,000.
David W. Taylor Naval Ship Research and Development Center, Bethesda, Maryland, $5,050,000.
Puget Sound Naval Shipyard, Bremerton, Washington, $157,300,000.
Charleston Naval Shipyard, Charleston, South Carolina, $7,050,000.
Naval Supply Center, Charleston, South Carolina, $4,200,000.
Naval Weapons Station, Charleston, South Carolina, $1,390,000.
Naval Air Rework Facility, Cherry Point, North Carolina, $2,800,000.
Naval Weapons Center, China Lake, California, $4,400,000.
Naval Weapons Station, Concord, California, $1,280,000.
Naval Weapons Support Center, Crane, Indiana, $3,500,000.
Naval Surface Weapons Center, Dahlgren, Virginia, $4,900,000.
Naval Construction Battalion Center, Gulfport, Mississippi, $680,000.
Naval Ordnance Station, Indian Head, Maryland, $26,100,000.
Naval Air Rework Facility, Jacksonville, Florida, $25,620,000.
Naval Undersea Warfare Engineering Station, Keyport, Washington, $8,300,000.
Portsmouth Naval Shipyard, Kittery, Maine, $2,900,000.
Naval Air Engineering Center, Lakehurst, New Jersey, $3,178,000.
Naval Underwater Systems Center Detachment, New London, Connecticut, $3,100,000.
Naval Air Rework Facility, Norfolk, Virginia, $18,650,000.
Naval Supply Center, Norfolk, Virginia, $6,200,000.
Naval Supply Center, Oakland, California, $2,420,000.
Naval Air Test Center, Patuxent River, Maryland, $3,600,000.
Naval Supply Center, Pearl Harbor, Hawaii, $520,000.
Navy Public Works Center, Pearl Harbor, Hawaii, $13,700,000.
Pearl Harbor Naval Shipyard, Pearl Harbor, Hawaii, $14,100,000.
Navy Public Works Center, Pensacola, Florida, $2,800,000.
Philadelphia Naval Shipyard, Philadelphia, Pennsylvania, $17,030,000.
Norfolk Naval Shipyard, Portsmouth, Virginia, $6,050,000.
Naval Air Rework Facility, North Island, San Diego, California, $1,150,000.
Naval Supply Center, San Diego, California, $2,350,000.
Naval Weapons Station, Seal Beach, California, $520,000.
Naval Air Propulsion Center, Trenton, New Jersey, $720,000.
Mare Island Naval Shipyard, Vallejo, California, $27,700,000.
Naval Surface Weapons Center Detachment, White Oak, Maryland, $4,450,000.

NAVAL TELECOMMUNICATIONS COMMAND

Naval Communication Area Master Station Eastern Pacific, Honolulu, Hawaii, $2,300,000.
Naval Communications Station, Stockton, California, $830,000.

NAVAL SECURITY GROUP COMMAND

Naval Security Group Activity, Adak, Alaska, $5,510,000.

OUTSIDE THE UNITED STATES

CHIEF OF NAVAL OPERATIONS

Circle Transit Station, Blenheim, New Zealand, $1,250,000.
Defense Installation, Mariana Islands, $32,000,000.

COMMANDER IN CHIEF, UNITED STATES ATLANTIC FLEET

Naval Facility, Brawdy, Wales, United Kingdom, $2,800,000.
Naval Station, Keflavik, Iceland, $2,350,000.

COMMANDER IN CHIEF, UNITED STATES PACIFIC FLEET

Naval Air Station, Cubi Point, Republic of the Philippines, $12,150,000.
Naval Support Facility, Diego Garcia, Indian Ocean, $122,750,000.
Naval Activities, Kenya, $4,000,000.
Naval Activities, Somalia, $24,000,000.
Naval Ship Repair Facility, Subic Bay, Republic of the Philippines, $580,000.
Naval Station, Subic Bay, Republic of the Philippines, $6,800,000.
Fleet Activities, Yokosuka, Japan, $1,250,000.

UNITED STATES NAVAL FORCES EUROPE

Naval Station, Rota, Spain, $4,300,000.
Naval Air Facility, Sigonella, Italy, $17,100,000.

NAVAL TELECOMMUNICATIONS COMMAND

Naval Communications Station, Nea Makri, Greece, $520,000.
Naval Communications Station, Ponce, Puerto Rico, $1,600,000.

NAVAL SECURITY GROUP COMMAND

Naval Security Group Activity, Edzell, Scotland, United Kingdom, $3,515,000.

EMERGENCY CONSTRUCTION

SEC. 202. The Secretary of the Navy may establish or develop installations and facilities by proceeding with construction made necessary by changes in missions and responsibilities which have been occasioned by (1) unforeseen security considerations, (2) new weapons developments, (3) new and unforeseen research and development requirements, (4) improved production schedules, or (5) revisions in the tasks or functions assigned to a military installation or facility or for environmental considerations, if the Secretary of Defense determines that deferral of such construction for inclusion in the next Military Construction Authorization Act would be inconsistent with interests of national security and, in connection therewith, may acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment in the total amount of $20,000,000. The Secretary of the Navy, or the Secretary's designee, shall notify the Committees on Armed Services of the Senate and House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including those real estate actions pertaining thereto. This authorization shall expire on October 1, 1982, or on the date of the enactment of the Military Construction Authorization Act for fiscal year 1983, whichever is later, except for those public works projects concerning which the Committees on Armed Services of the Senate and House of Representatives have been notified pursuant to this section before such date.

MINOR CONSTRUCTION

SEC. 203. The Secretary of the Navy is authorized to accomplish minor construction projects under section 2674 of title 10, United States Code, in the amount of $33,320,000.

NAVAL AIR STATION, KEY WEST, FLORIDA

SEC. 204. The Secretary of the Navy may acquire lands or interests in lands necessary to ensure unhampered air operations at the Naval Air Station, Key West, Florida, by exchange of Government-owned land of equal value to the lands or interests in lands acquired.

STEAM SUPPLY, NAVAL STATION, CHARLESTON, SOUTH CAROLINA

SEC. 205. The Secretary of the Navy may construct steam lines and all other needed facilities to tie into the waste heat recovery boilers of the Macalloy Corporation and to contract with such corporation for the supply of steam alone or steam and electricity, should such construction and purchase of steam provide better life cycle cost savings than the alternative in which the Navy would generate and supply steam to the Naval Station, Charleston through construction authorized under this Act for steam distribution lines for the Naval Station, Charleston in the amount of $16,000,000. Before entering into a contract with the Macalloy Corporation for the supply of steam alone or steam and electricity, a report on the costs associated with such contract (including capital costs, annual costs, and the life cycle costs for both parties) shall be submitted for review to the Committees on Armed Services of the Senate and House of Representatives. The Secretary of the Navy may enter into such contract with the Macalloy Corporation after thirty days have elapsed from the date of submission of such report or after both committees have indicated approval of such report. The authority of the Secretary to enter into a contract under this section is subject to the availability of appropriations for that purpose.

Mr. BRINKLEY (during the reading). Mr. Chairman, I ask unanimous consent that title II be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The CHAIRMAN. Are there any amendments to title II?

If not, the Clerk will read.

The Clerk read as follows:

TITLE III—AIR FORCE

AUTHORIZED AIR FORCE CONSTRUCTION PROJECTS

Sec. 301. The Secretary of the Air Force may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, for the following acqusition and construction:

INSIDE THE UNITED STATES

AIR FORCE LOGISTICS COMMAND

Kelly Air Force Base, Texas, $3,550,000.
McClellan Air Force Base, California, $18,830,000.
Robins Air Force Base, Georgia, $6,890,000.
Tinker Air Force Base, Oklahoma, $31,530,000.
Wright-Patterson Air Force Base, Ohio, $120,150,000.

AIR FORCE SYSTEMS COMMAND

Arnold Engineering Development Center, Tennessee, $1,690,000.
Brooks Air Force Base, Texas, $3,110,000.
Buckley Air National Guard Base, Colorado, $14,000,000.
Cape Canaveral Air Force Station, Florida, $1,810,000.
Eglin Air Force Base, Florida, $4,100,000.
Los Angeles Air Force Station, California, $2,370,000.
Patrick Air Force Base, Florida, $2,950,000.
Sunnyvale Air Force Station, California, $7,250,000.

AIR TRAINING COMMAND

Chanute Air Force Base, Illinois, $4,120,000.
Columbus Air Force Base, Mississippi, $510,000.
Keesler Air Force Base, Mississippi, $2,280,000.
Laughlin Air Force Base, Texas, $1,090,000.
Lowry Air Force Base, Colorado, $2,840,000.
Mather Air Force Base, California, $1,520,000.
Randolph Air Force Base, Texas, $3,360,000.
Reese Air Force Base, Texas, $1,140,000.
Sheppard Air Force Base, Texas, $10,745,000.
Vance Air Force Base, Oklahoma, $2,840,000.
Williams Air Force Base, Arizona, $2,600,000.

ALASKAN AIR COMMAND

Eielson Air Force Base, Alaska, $1,700,000.
Elmendorf Air Force Base, Alaska, $7,240,000.
King Salman Airport, Alaska, $8,050,000.
Various Locations, Alaska, $42,750,000.

MILITARY AIRLIFT COMMAND

Altus Air Force Base, Oklahoma, $6,653,000.
Andrews Air Force Base, Maryland, $4,940,000.
Bolling Air Force Base, District of Columbia, $1,280,000.
Charleston Air Force Base, South Carolina, $630,000.
Kirtland Air Force Base, New Mexico, $7,510,000.
Little Rock Air Force Base, Arkansas, $790,000.
McChord Air Force Base, Washington, $1,180.000.
McGuire Air Force Base, New Jersey, $2,680,000.
Norton Air Force Base, California, $9,000,000.
Pope Air Force Base, North Carolina, $5,510,000.
Scott Air Force Base, Illinois, $5,450,000
Travis Air Force Base, California, $3,790,000.

PACIFIC AIR FORCES

Hickman Air Force Base, Hawaii, $1,090,000.

STRATEGIC AIR COMMAND

Barksdale Air Force Base, Louisiana, $3,000,000.
Blytheville Air Force Base, Arkansas $20,440,000.
Carswell Air Force Base, Base, Texas, $39,810,000.
Castle Air Force Base, California, $2,000,000.
Dyess Air Force Base, Texas, $1,420,000.
Ellsworth Air Force Base, South Dakota, $36,880,000.
Francis E. Warren Air Force Base, Wyoming, $720,000.
Fairchild Air Force Base, Washington, $25,800,000.
Grand Forks Air Force Base, North Dakota, $1,420,000.
Griffiss Air Force Base, New York $8,390,000.
Grissom Air Force Base, Indiana, $4,070,000.
K. I. Sawyer Air Force Base, Michigan, $4,370,000.
Loring Air Force Base, Maine, $6,140,000.
March Air Force Base, California, $1,705,000.
McConnell Air Force Base, Kansas, $1,090,000.
Minot Air Force Base, North Dakota, $7,406,000.
Offutt Air Force Base, Nebraska, $4,060,000.
Pease Air Force Base, New Hampshire, $4,920,000.
Peterson Air Force Base, Colorado, $4,260,000.
Plattsburgh Air Force Base, New York, $890,000.
Rickenbacker Air Force Base, Indiana, $540,000.
Vandenberg Air Force Base, California, $9,000,000.
Whiteman Air Force Base, Missouri, $1,090,000.
Wurtsmith Air Force Base, Michigan, $2,270,000.

TACTICAL AIR COMMAND

Bergstrom Air Force Base, Texas, $2,580,000.
Cannon Air Force Base, New Mexico, $2,700,000.
Davis-Monthan Air Force Base, Arizona, $12,460,000.
England Air Force Base, Louisiana, $2,170,000.
George Air Force Base, California, $2,460,000.
Holloman Air Force Base, New Mexico, $7,480,000.
Homestead Air Force Base, Florida, $2,480,000.
Hurlburt Field, Florida, $510,000.
Langley Air Force Base, Virginia, $10,220,000.
Luke Air Force Base, Arizona, $520,000.
MacDill Air Force Base, Florida, $7,960,000.
Moody Air Force Base, Georgia, $650,000.
Mountain Home Air Force Base, Idaho, $3,410,000.
Myrtle Beach Air Force Base, South Carolina, $630,000.
Nellis Air Force Base, Nevada, $6,870,000.
Seymour-Johnson Air Force Base, North Carolina, $1,420,000.
Tyndall Air Force Base, Florida, $510,000.

UNITED STATES AIR FORCE ACADEMY

United States Air Force Academy, Colorado, $510,000.

MX MISSILE SYSTEM

Various Locations, $356,500,000.

OUTSIDE THE UNITED STATES

MILITARY AIRLIFT COMMAND

Rhein-Main Air Base, Germany, $1,500,000.

PACIFIC AIR FORCES

Clark Air Base, Republic of the Philippines, $9,330,000.
Diego Garcia Air Base, Indian Ocean, $114,990,000.
Hampyong Communication Station, Korea, $1,540,000.
Hunghae Communication Station, Korea, $1,500,000.
Kadena Air Base, Japan, $17,490,000.
Kunsan Air Base, Korea, $12,380,000.
Kwang-Ju Air Base, Korea, $6,650,000.
Osan Air Base, Korea, $26,720,000.
Various Locations, $1,250,000.

STRATEGIC AIR COMMAND

Thule Air Base, Greenland, $1,600,000.

UNITED STATES AIR FORCES IN EUROPE

Egypt, Various Locations, $44,400,000.
Germany, Various Locations, $16,780,000.
San Vito Air Station, Italy, $1,540,000.
Camp New Amsterdam, Netherlands, $4,860,000.
Hellenikon, Greece, $800,000.
Oman, Various Locations, $78,480,000.
Spain, Various Locations, $5,390,000.
Incirlik Air Base, Turkey, $1,160,000.
Turkey, Various Locations, $4,000,000.
United Kingdom, Various Locations, $26,190,000.
Various Locations, $121,424,000.

EMERGENCY CONSTRUCTION

Sec. 302. The Secretary of the Air Force may establish or develop installations and facilities by proceeding with construction made necessary by changes in missions and responsibilities which have been occasioned by (1) unforeseen security considerations, (2) new weapons developments, (3) new and unforeseen research and development requirements, (4) improved production schedules, or (5) revisions in the tasks or functions assigned to a military installation or facility or for environmental considerations, if the Secretary of Defense determines that deferral of such construction for inclusion in the next Military Construction Authorization Act would be inconsistent with interests of national security and, in connection therewith, may acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment in the total amount of $20,000,000. The Secretary of the Air Force, or the Secretary's designee, shall notify the Committees on Armed Services of the Senate and House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including those real estate actions pertaining thereto. This authorization shall expire on October 1, 1982, or on the date of the enactment of the Military Construction Authorization Act of fiscal year 1983, whichever is later, except for those public works projects concerning which the Com-

mittees on Armed Services of the Senate and House of Representatives have been notified pursuant to this section before such date.

MINOR CONSTRUCTION

SEC. 303. The Secretary of the Air Force is authorized to accomplish minor construction projects under section 2674 of title 10, United States Code, in the amount of $28,680,000.

DEFICIENCY AUTHORIZATIONS FOR PRIOR YEAR PROJECTS

SEC. 304. (a) Section 602(3) of the Military Construction Authorization Act, 1977 (Public Law 94-431; 90 Stat. 1361) is amended to read as follows:

"(3) for title III: inside the United States $744,759,000; outside the United States $56,650,000; for a total of $801,409,000.".

(b) Section 602(3) of the Military Construction Authorization Act, 1979 (Public Law 95-356; 92 Stat. 580), as amended, is amended to read as follows:

"(3) for title III: inside the United States $505,786,000; outside the United States $68,963,000; minor construction $30,721,000; for a total of $605,470,000.".

(c) Section 602(3) of the Military Construction Authorization Act, 1980 (Public Law 96-125; 93 Stat. 942), is amended to read as follows:

"(3) for title III: inside the United States $448,380,000; outside the United States $87,620,000; minor construction $29,310,000; for a total of $565,310,000.".

(d) Section 602(3) of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1768), is amended to read as follows:

"(3) for title III: inside the United States $567,327,000; outside the United States $146,537,000; minor construction $25,420,000; for a total of $739,284,000.".

MX MISSILE SYSTEM BASING MODE

SEC. 305. No funds appropriated pursuant to the authorization of appropriations for the MX missile system in section 301 may be obligated or expended with respect to a basing mode for the MX missile other than the multiple protective structure (MPS) basing mode unless—

(1) the President determines, and certifies to the Congress, that it is in the national interest of the United States to develop a basing mode for the MX missile system other than a Multiple Protective Structure (MPS) basing mode; and

(2) the Congress, before the end of the sixty-day period beginning on the date of the receipt of such certification, adopts a concurrent resolution stating in substance that it approves the development of the alternative basing mode selected by the President.

Mr. BRINKLEY (during the reading). Mr. Chairman, I ask unanimous consent that title III be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. BRINKLEY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I yield to the gentleman from Georgia (Mr. GINN).

Mr. GINN. Mr. Chairman, I thank the gentleman for yielding so the gentleman and I might have a brief colloquy.

Mr. Chairman, I would like to clarify the action taken in the supplemental relating to the design of facilities for the MX missile system. The fiscal year 1981 Appropriations bill approved last fall included $97 million for planning and design for a land-based multiple protective structure basing mode for the MX missile system. Since that time President Reagan and Secretary of Defense Weinberger have appointed a panel to review the basing mode for the system. This panel is to submit its decision by July 1, and the President's recommendation is to follow.

The conference report that has just passed the House defers any further obligation of planning and design funds until the President has certified his decision on the system. Both the House and Senate felt that since a decision on the system is to be reached shortly, further design contracts should be withheld until a firm decision has been reached.

I want to point out that it is our assumption that the President's decision will be made in July and that the funds could be released at that time. The authorization bill before us today relates to construction and not planning and design. This construction funding would not be available until after October 1 of this year, well after the anticipated decision on the program. A short delay in the obligation of planning and design funds until the President has reached a decision will not significantly effect the overall program development. However, a delay in construction authorization could have a substantial effect on delaying the initial operational capacity of the system.

Mr. BRINKLEY. Mr. GINN, do you feel that the action taken on the MX planning and design funds mandates any subsequent action on construction funding?

Mr. GINN. I do not. I believe the two issues are separate. The release of planning and design funds is a fiscal year 1981 problem that should be solved within the next 60 days. Construction funding is a fiscal year 1982 issue. The authorization bill has sufficient requirements to enable further review of the problem if this should be necessary. Additionally, at this time we are planning to delay marking up the military construction appropriations until decisions have been transmitted on the MX issue.

Mr. BRINKLEY. Do you feel that the authorization provisions in this bill will provide Congress with a sufficient flexibility?

Mr. GINN. The current authorization for the MX construction will allow enough flexibility so that we may follow with specific appropriation funding. In this way we will have an authorization in place when we are ready to move with the appropriations. This will place the Congress in the position of being able to move on a timely basis.

I thank the gentleman for discussing this with me.

Mr. BRINKLEY. I thank the gentleman.

AMENDMENT OFFERED BY MR. SIMON

Mr. SIMON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SIMON: Page 27, strike out lines 10 through 25 and insert in lieu thereof the following:

MX MISSILE SYSTEM

SEC. 305. No funds appropriated pursuant to the authorization for the MX missile system in section 301 may be obligated or expended with respect to a basing mode for the MX missile until—

(1) the President selects a specific basing mode for the MX missile system and transmits to the Congress in writing a description of the basing mode selected;

(2) the Secretary of Defense submits to the Committees on Armed Services of the Senate and House of Representatives a report in writing (A) justifying the selection of the President referred to in paragraph (1), and (B) containing a comparison and evaluation of alternative basing modes to the basing mode selected by the President; and

(3) a period of 60 days has elapsed after the certification under paragraph (1) has been received by the Congress and during which both Houses of Congress have not adopted resolutions of their respective Houses expressing disapproval of the development of the basing mode selected by the President.

Mr. SIMON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. SIMON. Mr. Chairman I want to make clear I have the greatest respect for my colleague, the gentleman from Georgia (Mr. BRINKLEY), who is the chairman of this subcommittee. The gentleman is one of the really fine gentlemen of the House.

The amendment which I offer is identical to the amendment offered in the Senate by the chairman of the Senate Armed Services Committee, Senator JOHN TOWER. It is an amendment which simply says, "Let us wait until the President's Commission reports and then give Congress 60 days in which to react." That is not an unreasonable request for an expenditure that will be the second largest expenditure in the history of humanity on any single project, second only to the Interstate Highway System.

It is offered because there are serious questions not only from an economic viewpoint but from a military viewpoint about where we are going with this mobile basing mode.

I point out to my colleagues in the House not only do we have two former chairmen of the Joint Chiefs of Staff—Admiral Moore and Gen. Maxwell Taylor—who are critical of this particular basing mode, we recently had the former Director of the CIA, Admiral Turner; we have a former Secretary of Defense, Melvin Laird, and let me point out that during the last campaign—and I call this particularly to the attention of my colleagues on this side of the House—on at least five occasions the Republican Presidential candidate, Ronald Reagan, came out in opposition to the mobile basing mode. The time probably all of us saw him express that opposition was in his debate with John Anderson on national television, but it was not just during the campaign.

Let me quote from an interview with President Reagan on March 29 in the Washington Post:

> I do not believe in the basing mode that has been suggested so far. It is so elaborate, so costly, and I am not sure that it is necessary or would be effective. It does not make much sense to me.

I hope we listen to what the President had to say and let us be prudent.

My colleague, the gentleman from Georgia (Mr. BRINKLEY), had a dialog with my other colleague, the gentleman from Georgia (Mr. GINN), in which they point out that the conference committee has suggested that we hold up until the President's commission acts, and by implication they were saying this amendment, therefore, is not necessary.

Just assuming everything they say is accurate, then no harm can come from this amendment, but if that commission does not report on time, if there are delays, then the American people have some additional protection.

Mr. DASCHLE. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to my colleague, the gentleman from South Dakota.

Mr. DASCHLE. Mr. Chairman, I rise in support of the Simon amendment which would prohibit the authorization of funds for the MX/MPS basing mode until Congress has had an opportunity to review the President's recommendation on MX basing. I reiterate the point made by the gentleman from Illinois that the Senate has already approved identical language in their fiscal year 1982 defense authorization bill.

It is only reasonable to defer MX basing funding while the Department of Defense (DOD) is in the midst of reviewing MX basing. I for one, have had grave doubts about the MPS basing mode for some time. The MPS system was devised by the Carter administration to meet the growing vulnerability of our Minuteman silos and still be compatible with the then-pending SALT II Treaty.

Now that SALT II has effectively been scuttled, the virtue of this basing proposal must be reexamined in light of the fact that no limits on Soviet launchers or warheads will be in effect. I am thus pleased that the President and Secretary of Defense have agreed to reevaluate MX basing.

Several esteemed organizations have found serious deficiencies with the MPS basing mode. The Office of Technology Assessment (OTA) for one found that the MPS system is one of the least survivable options for MX basing. This finding was echoed by the Congressional Budget Office (CBO) which added that if the Soviet Union sought to match construction of a warhead for each shelter we build, the potential cost of the MPS basing mode could escalate to $108 billion.

I also must question the likelihood that this system could be completed on schedule by 1986. Secretary of Defense Weinberger himself acknowledged that construction of the MPS could be blocked almost indefinitely in the courts. Growing political and even religious opposition in the States affected (Nevada, Utah) cannot be ignored either as natives in these States learn of the potential environmental and ecological fallout of what has been called the "largest public works project in American history."

I think it is also important to acknowledge, Mr. Chairman, the fact that the water needs for construction of the MX/MPS will be 30,000 acre feet of water per day. This is the equivalent of over one-half of the flow of Missouri River water through the State of South Dakota each day. I fail to see how in the arid regions of the Western United States, the Air Force can come up with this much water without causing severe groundwater problems for the rest of the region.

There is an alternative, however. The alternative is less costly, less environmentally destructive, more survivable, and would likely divert the targetting of a significant number of Soviet missiles from land to the sea. The alternative is the small undersea mobile submarine missile basing system, or SUM (a.k.a. the Shallow Underwater Missile system). Initial construction costs of SUM would be approximately $10 billion less than the MPS. It has been determined to be more survivable by the (OTA), and is equally as capable of delivering the MX. Another important feature of SUM is the fact that survivable megatonnage will be gained with the deployment of each submarine, whereas MX deployment in the MPS system will only achieve survivable megatonnage with the completion of the entire system, which is even then questionable. I plan to soon contact the Secretary and the President to urge adoption of this alternative basing mode.

Mr. Chairman, it grieves me to think that we must invest $50 billion or more in the construction and deployment of the most devastating nuclear weapon this country has ever devised. Unfortunately, MX missile construction must go on. The Soviet Union may now be capable of destroying 90 percent of our land based ICBM missiles. This is a threat that cannot be ignored. It is a threat that must be met and a threat that must be overcome. Construction of a viable basing option is most necessary, and I believe that the SUM system is our best option. But until a final decision on MX basing is reached, it is wasteful and extravagent to invest millions of dollars in a white elephant which may soon be only a memory. I am confident that the President will decide on another form of basing. On an issue of this importance and magnitude, the Congress must be provided an opportunity to review the President's decision. Our constituents as well as our consciences deserve no less.

Mr. BEDELL. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to my colleague, the gentleman from Iowa.

Mr. BEDELL. Mr. Chairman, I thank the gentleman for yielding.

I also rise in strong support of the gentleman's amendment. My only criticism of the amendment would be that it does not go far enough. The gentleman from Iowa has had a resolution in for some time that would say that we would not proceed with the MX missile system until such time as we had again started negotiating our SALT agreements.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. SIMON) has expired.

(On request of Mr. BEDELL and by unanimous consent, Mr. SIMON was allowed to proceed for 3 additional minutes.)

Mr. BEDELL. If the gentleman will yield further, we should realize without a SALT agreement the Soviet Union can simply increase the number of bombs that they put on each missile. They just happen to have larger missiles than we do. If they wish to put as many as 30 per missile, they would do it as they MIRV their missiles. So without SALT, instead of simply needing 4,600 shelters in order to provide us with that capability, that could be increased to 6,000 or even higher as they do so.

So I support the gentleman's amendment. It certainly is a step in the right direction, but I hope we would realize, as we look at this problem, that just in yesterday's paper they talked about the efforts to use laser beams and the experiments at this time to destroy incoming missiles with lasers. I ask: Does it really make sense to spend this kind of money going forward at a time

when it appears there will be those other opportunities, and at a time when we have such a tremendous amount of nuclear deterrent in our other modes, including our submarines, our bombers, and the other methods available?

Mr. SIMON. I thank my colleague from Iowa.

Let me make four points very quickly.

First. I simply want to underscore what the gentleman from Iowa says: Without SALT II, this thing is useless. There is no cap on the number of missiles that the Soviets can have.

Second. Without getting into classified information, there is a serious question by the time this gets finished in 1989 whether the Soviets will have the ability to see which hole we have this particular missile in.

Next, we are talking about scattering 30 percent of our missiles, which are land-based. The Soviets have 70 percent of their missiles land-based. If they follow suit—and we have to assume they will—they end up with greater protection on their missiles than we do.

Finally, I would make this last point, and that is this: We are talking for the first time about a major defense expenditure where fundamentally there are no secrets about the process.

If tomorrow we start construction and the day after the Soviets start construction, who do you think is going to have their system built first? We are going to have environmental lawsuits and all kinds of other things. Do you think there are going to be any environmental lawsuits filed in the Soviet Union?

You know the answer to that. If we start tomorrow and they start the next day, they end up with their system built before ours, and we end up not winning but losing in every respect.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. SIMON) has expired.

(By unanimous consent, Mr. SIMON was allowed to proceed for 1 additional minute.)

□ 1500

Mr. SIMON. I finally urge you to remember what is at question is not the missile itself, it is simply do we wait until the President's commission reports and we have a chance to look at that report before we enter the most costly project this Congress will ever be involved in.

I urge prudence on the part of the House.

Mr. LUJAN. Mr. Chairman, I move to strike the requisite number of words and I rise in support of the amendment.

Mr. Chairman, although I support most of the areas of needed military construction in this bill, I must speak in opposition to it.

Included in this bill, Mr. Chairman, is an appropriation of over $350 million for the initial construction of MX multiple protective structures. This appropriation assumes a land-basing mode for the MX system. Along with the rest of the Members of Congress, I have been told by the Defense Department that they are still studying the basing mode to be adopted.

I have serious questions of placing our strategic retaliatory system in the heartland of our country and thereby invite an attack on the United States mainland.

Adequate environmental impact studies have not been made for this monumental construction in the fragile Western environment. No studies have been made on the environmental and human impact following any attack upon a U.S.-based MX system.

I am of the opinion that it would be environmental insanity. At a time when we are trying to balance the needs of energy extraction with wilderness protection, I cannot, Mr. Chairman, in good faith compare the need for barracks and bridges in this bill, with the need to oppose the land-basing concept of the MX system.

Mr. SEIBERLING. Mr. Chairman, I move to strike the requisite number of words and I rise in support of the amendment.

Mr. Chairman, my colleagues who were in the Congress last year will recall that I raised a few eyebrows when I opposed the amendment to knock out the MX offered by the gentleman from California (Mr. DELLUMS) because, I am known as somewhat of a dove on military spending issues.

The subcommittee I chair, the Subcommittee on Public Lands of the Committee on Interior and Insular Affairs, will have to approve any legislation withdrawing lands for siting this missile system, if that is the route that we go. Of course, we are talking about thousands and thousands of acres of public land in the States of Nevada and Utah under the present program.

In recognition of that fact, starting early last year, my subcommittee held several days of public hearings and two classified secret briefings, and spent a great deal of time in discussing this proposed weapons system, including the military justification for this system, with various experts. As a result of that, I became convinced of two things: First that a strong case exists for developing the MX or some invulnerable missile to solve the problem caused by the development of missiles by the Russians that are sufficiently accurate to knock out our Minuteman ICBM in its silos. I also became convinced that the MX-MPS basing system had not been adequately thought through, that it was going to be incredibly costly, maybe very vulnerable militarily and that further study of possible alternatives is essential.

I spoke personally about this to President Carter, and told him of the results of some of the testimony and the private classified information we received from various experts, and suggested that a new study be made by the administration.

As a result of that, the White House asked the Defense Department to take another look at the small submarine, or SUM, basing mode. Well, we know what is going to happen if the Defense Department itself reexamines a decision it had already made. They came up with a report pooh-poohing the SUM approach and saying that they saw no reason to change the existing plan.

So far this year my subcommittee has held several more days of hearings on this subject and 2 more days of classified briefings. Ten days ago I was out in Nevada, went around and talked to some of the people in the small towns and the ranchers who would be affected by this, flew around with the Air Force, visited some of the sites for deployment of this system. In addition, this year we got the Library of Congress to set up an all-day seminar with naval officers and other experts testifying as to possible alternative basing modes. We also had a briefing by the Office of Technology Assessment on their study which is due out in a couple of weeks evaluating MX/MPS and alternative basing modes.

Shortly after he became Secretary of Defense I talked with Secretary Weinberger. I told him that I felt if he wanted to carry out most effectively President Reagan's directive he should appoint an outside body of experts. I cited the experience we had when the Defense Department did its own restudy. Subsequent to that, I was gratified to see he did appoint the Townes Commission, which is due to make its report sometime around the end of June.

Now, I suggest to my colleagues that this is an extremely serious matter, not only because we are talking about spending at least $50 billion, and if there is no SALT II treaty or the equivalent, $100 billion, or even more, on this system. We are also talking about a system that many experts say is going to be vulnerable from the word "go," that even by the Air Force's own admission will not address the Russian missile threat until almost the complete deployment of the 4,600 shelters and 200 missiles in 1989 and even that is assuming that there is a SALT II ceiling on the total number of warheads that either side may possess. If there is no SALT ceiling, then we may find ourselves with a system that will never do the job that this is supposed to do.

So I think it is a very grave mistake for the Committee on Armed Services to come in here with a bill which in effect stacks the deck and says that we cannot change this basing mode unless there is affirmative action by both Houses of Congress in a concurrent resolution—which of course would have to be reported out of the two committees in the House and Senate.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. SEIBERLING) has expired.

(By unanimous consent, Mr. SEIBERLING was allowed to proceed for 5 additional minutes.)

Mr. SEIBERLING. Mr. Chairman, I suggest that it would be a serious mistake for us, on a matter of this gravity, before the Office of Technology Assessment has reported, before the Townes Commission has reported, before the President of the United States has made a recommendation, to stack the deck so that it will require reporting out a new resolution by both Committees on Armed Services and action by both Houses of Congress if we desire to adopt a different approach in the light of those subsequent events.

Mr. LUNDINE. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from New York.

Mr. LUNDINE. Mr. Chairman, I thank the gentleman for yielding.

I want to associate myself with the gentleman's remarks in support of the amendment of the gentleman from Illinois.

In my judgment, this is one of the most dangerous decisions the United States could possibly embark on. It is not only premature, it is one of the most dangerous kinds of tacks we could take. It is not cost effective and it just does not make any sense.

As one comic recently said, if we want to put our missiles on a railroad and have them be able to be disguised so the Russians would never know where they are, we should put them on Conrail because they can lose boxcars anywhere in America and they could do probably a good job of disguising their whereabouts from the Russians.

Mr. Chairman, I urge strong support for the amendment of my colleague, PAUL SIMON, to prohibit the funds in this bill from being obligated or expended for any MX basing mode until the President has submitted his decision on this matter to the Congress along with a report from the Secretary of Defense justifying his decision, and until Congress has then had a 60-day period to review this matter, and if desirable, disapprove of the President's deployment decision by concurrent resolution.

Because of the concerns the President has over this matter, he has appointed a special panel to review the proposed multiple protective structure basing mode for the MX. The report from this panel is scheduled to be made to the President in July, with a policy directive from the President due shortly thereafter. We should not move forward with a commitment of $356 million before this review has been completed and the recommendations thoroughly debated by the Congress.

More fundamentally, I have consistently opposed deployment of the MX missile system for several reasons. First, I believe the system can neither address the perceived and questionable vulnerability of our strategic nuclear force, nor help control the arms race.

As currently conceived, the MX missile system would consist of 200, 10-warhead intercontinental ballistic missiles, each about two times the size of the present land-based ICBM's and with a great deal more accuracy. The basing system for these missiles proposed in this bill, the multiple protective structure, would utilize 4,600 horizontal missile shelters, spaced about 1 mile apart in a network of roadways to hide the missiles. The missiles would be concealed from the Soviet Union by shuffling them from shelter to shelter using transport vehicles. Utilization of the vast majority of the States of Utah and Nevada would be required to implement the system.

The dedication of this large land area in our now productive Western States is justified by advocates of the MX missile system as necessary to eliminate the vulnerability of our land-based ICBM's. The vulnerability of our ICBM's and our strategic nuclear force is a myth. In order to examine this issue carefully, one has to consider the case for vulnerability which could theoretically be established on paper versus an honest assessment of operational vulnerability. A careful analysis will show that neither the United States or Soviet system can be assured of total accuracy in a nuclear exchange, or of any assurances that the benefits of such an encounter outweigh the grave risk and consequences of nuclear confrontation.

Moreover, the U.S. strategic nuclear force does not rest on the viability of our land-based ICBM's alone. For good reasons, our strategic nuclear force is based on a "triad" consisting of the land-based ICBM's, and air bomber force, and a sea-based nuclear force. Even if the Soviets were to successfully undertake a nuclear strike against our land-based ICBM's, our sea-based and bomber nuclear force would provide adequate retaliatory capability.

I am also concerned that the MX system, if deployed, will escalate the arms race between the United States and Soviet Union. Such a land-based MX system is likely to force the Soviets to target the U.S. land mass in Nevada and Utah currently planned for deployment. If this does occur, the only recourse the United States will have is consideration of development of an antiballistic missile system to then protect our "vulnerable" MX missile system. And so the arms race will go on and on.

Second, the costs of deployment of this missile system are prohibitive. In a tight budgetary climate, we cannot afford to throw billions and billions of dollars at a major commitment of questionable value. The first estimate of the cost of the MX system by the Air Force in 1978 was $33.5 billion. Estimates in 1982 by the Congressional Budget Office have grown to $121 billion. Taxpayers, dollars, and indeed, our defense dollars, can be spent much more wisely.

Third, the favored basing mode for the MX, the multiple protective structure, will have serious and irreversible impacts on the land on which it is based. It will affect approximately 48,000 square miles and require a huge influx of about 85,000 people during construction. Large amounts of water will be needed to support the system, thereby drawing precious water supply from Western ranchers and Indians. This boom-bust activity, combined with restricted use of land and water resources will handicap the productivity of our Western States.

For all these reasons, I urge your opposition to the MX missile and basing system. This attempt to bolster our national security will not work. In fact, it can only lead to escalated tensions between the Soviet Union and United States and result in a need for us to devote a yet larger amount of our national resources to an unwinable nuclear arms race. This, ironically enough, will weaken our ability to strengthen our economic position in the world and contribute to a weakened U.S. position to deal with both domestic and international problems. I urge your support for the Simon amendment.

Mr. SEIBERLING. I think the gentleman's comment about Conrail, while it was meant to be facetious, is not very far off.

Let me just tell you about some of the possible alternatives and some of the vulnerabilities of this system.

If the military are correct, and if some of the scientists are correct in terms of the timing, then by the end of this year the Russians will have the capability of knocking out our Minuteman missiles in their silos by a first strike. Obviously nothing we do is going to remedy that deficiency immediately unless we adopt some very dangerous policies, such as a launch-on-warning policy.

Now what are the alternatives to this MX so-called racetrack or dragstrip deployment system? Well, one of

the alternatives is to adopt the kind of policy I referred to, and that may be necessary in the short run.

Another one is, instead of placing the MX on land at all, to place it in a fleet of small submarines that would cruise off of our coast at depths of about 200 feet and about 200 miles off the coast, and have a system which the scientists say is technologically feasible using existing technology so that those can be launched from the submarines and guided the minute they pop up out of the surface.

Let me tell my colleagues something that may surprise them. Admiral Moorer, former Chairman of the Joint Chiefs of Staff and hardly a dove, testified in the Library of Congress seminar this spring that never in the history of the United States have we adopted a strategy that would make the continental United States the target for a major attack. Admiral Moorer pointed out that in two world wars the United States managed to keep the fighting away from our homeland.

Yet the MX-MPS basing mode would use the States of Nevada and Utah as a sponge to soak up an enemy first strike. In such event, by the Air Force's own calculations, tens of thousands and indeed millions of Americans would be wiped out, even if there was an attack on only those missiles.

There is a very basic question of strategy here. The submarine approach is one that would get away from the problems associated with using our land base as a target. The submarine approach would also be much less vulnerable to enemy attack.

Another alternative would deploy the MX missiles in silos in the existing Minuteman fields and perhaps even putting an ABM shield over those bases which we are authorized to do by the ABM treaty.

A third alternative similar to the one described facetiously by the gentleman from New York (Mr. LUNDINE) is to have small missiles, perhaps Minuteman size or even smaller, in ordinary truck trailers around the country, concealed as cargo and able to be set up at any point and fired. This would be a far less costly and completely invulnerable system.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. SEIBERLING) has again expired.

(By unanimous consent, Mr. SEIBERLING was allowed to proceed for 2 additional minutes.)

Mr. SEIBERLING. Now I could go on and outline some of the additional alternatives that are under consideration. But my point is this. Not only are some of these alternatives better from a military standpoint, not only are they cheaper from a cost standpoint, but they need to be considered and they are being considered by the administration in the Townes Commission.

I suggest that my subcommittee in the last 1½ years has held more hearings and gone into this subject in more depth than all of the other committees of the Congress put together. So I speak from an informed position.

I also suggest that it would be a serious mistake—I reiterate that it would be a serious mistake—for us to stack the deck at this time in favor of the MPS basing system, when all these studies are just about to come to a head.

I commend the gentleman from Illinois (Mr. SIMON) for giving us the opportunity to climb down off this limb before it is too late.

Mr. BRINKLEY. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

Mr. Chairman, this issue represents at least a possibility of a headstart versus no headstart in an important cog in the defense mechanism for this country.

Mr. Chairman, the committee's section 305 accomplishes essentially the same purpose. It freezes the obligation of funds for any new MX basing mode until the President has made a decision. Furthermore, the authorization will not be available until October 1, the start of the new fiscal year. By that time, the Townes panel should have completed its review and the President will have made a decision.

The important difference between the committee language and the pending amendment is that work may proceed on the MPS basing mode if that is the decision of the President. The amendment has the practical effect of delaying work on any basing mode until the prescribed conditions are met. Such delay could mean that the congressionally mandated initial operating capability (IOC) of 1986 for the MX would not be met. I do not believe that we want to run the risk of delaying any further the opportunity of putting our strategic house in order.

It should be noted that the Congress is on record in support of MX-MPS basing system. Furthermore, the administration has not submitted anything officially or unofficially indicating that there has been any change in the basing mode. If there is a change, the committee language provides for Congress active participation in that decision.

Section 305 in the military construction authorization bill is consistent with the language in the defense authorization bill that the House will soon consider. If the pending amendment is adopted, then the carefully tailored work on both bills by the House Armed Services Committee will be overturned. Given the time and effort devoted to these bills on this important issue, I do not believe that we should try to rewrite or mark up such a complex and sensitive issue on the House floor and effectively dictate the requirement to adopt a similar amendment to the defense authorization bill.

The pending amendment is similar to language in the Senate-passed defense authorization bill. The Senate version of the military construction authorization bill will, in all likelihood, contain similar language. Therefore, the matter will be an issue for conference on both bills.

I strongly believe that we can resolve any differences in conference and should be permitted to do so. Therefore, I ask my colleagues to stand by their Armed Services Committee and vote down the amendment.

□ 1515

Mr. SEIBERLING. Mr. Chairman, will the gentleman yield?

Mr. BRINKLEY. Yes.

Mr. SEIBERLING. As I understand the language of the bill before us, it requires two things to happen to change the basing mode. One is the determination and certification by the President, which certainly is in order; and second, that the Congress before the end of 60 days adopt a concurrent resolution stating that it approves the development of the alternative basing mode.

Mr. BRINKLEY. Yes.

Mr. SEIBERLING. Now, is there provision in the bill that any Member of the House could bring such a resolution to the floor, or would it have to go through the Armed Services Committee?

Mr. BRINKLEY. One might think that it would go through the Armed Services Committee, although I would think that any Member could initiate it.

Mr. SEIBERLING. Well, the burden then becomes a burden on those, including the administration, who would upset this basing decision, and yet it is not really necessary to make that decision now because it will be about 3 years before the MX is even ready to start being deployed. I do not think that the gentleman from Georgia would knowingly participate in an effort to stack the deck, but I suggest that if this idea originated from the Pentagon, it is an effort by the Air Force to try to lock us in before we have even received the report of the Townes Commission.

Mr. BRINKLEY. I would like to reassure the gentleman, because it really was not a mandate or an initiative of the Department of Defense. It came from our full Armed Services Committee under the leadership of Chairman MELVIN PRICE, who as we all know is certainly middle of the road and gives a great deal of care to these things.

Mr. SEIBERLING. I know the gentleman himself always does a careful and responsible job, and I would merely suggest that maybe the full

amount of reflection had not taken place on some of the implications of adopting this particular provision.

Mr. BRINKLEY. I want to commend the gentleman for supporting the Simon amendment, because if the decision should be made by the administration by August 1, no harm would be done and there would be no reference in my statement to a head start, but should there be delay at any point and the decision not made by August 1, then we would have a start over of some of the things we have already got behind us. I think my statement further assures the gentleman.

The CHAIRMAN. The time of the gentleman from Georgia has expired.

(At the request of Mr. SEIBERLING and by unanimous consent, Mr. BRINKLEY was allowed to proceed for 2 additional minutes.)

Mr. SEIBERLING. If the gentleman will yield further, the last year when this came up in the authorizing legislation I asked Chairman PRICE two things. I said:

Is it the intent of the language approving this system to waive the environmental impact statement or in effect, to authorize the withdrawal of the lands?

He assured me that it did not do either of those two things. Since that time the draft environmental impact statement has been issued, and my subcommittee had a day of hearings on that. The draft was full of glaring deficiencies which most of the people involved conceded were the case. Of course we have not seen the final environmental impact statement, so that is one of the unknowns, another one of the unknowns.

The other aspect on which he assured me was that this did not mean we would not be able to go to a different approach, and that we would be able to consider withdrawal of the land in question as a separate issue. I assume that the committee recognizes that that is still the state of affairs. However, if we now approve this as is and say that no other basing system will be considered, we are almost making it impossible, without additional legislation, to take another look at this.

Mr. BRINKLEY. Not quite. Let me respond quickly. The funds for the land acquisition, $9.5 million, were deleted by the subcommittee and therefore I think that serves as reassurance to the gentleman.

Also the environmental considerations to which the gentleman refers might be perceived to be a dilatory tactic on the part of those who do oppose the MX.

Mr. SEIBERLING. I would simply say that it is very important that we have an adequate environmental impact statement so that they cannot use its deficiencies as a means of dilatory tactics. I want to see a good environmental impact statement.

Mr. BRINKLEY. We all do.

Mr. HUTTO. Mr. Chairman, I move to strike the requisite number of words, and I rise to speak against the amendment.

Mr. Chairman, it is with some reluctance that I rise to speak against the amendment offered by my good friend from Illinois (Mr. SIMON) and supported by my friend, the gentleman from Ohio, but I am deeply concerned with the possibility of any delay in the MX program. The Congress has previously mandated full-scale engineering development on the MX missile to provide this country with a survivable land-based leg of the Triad.

We have also mandated an initial operating capability—IOC—of 1986.

We cannot engage in a stop-start process without raising cost, delaying completion, and further exposing our Nation to the gravest of threats.

This amendment contains in it the potential for delay with the 60-day period for congressional review. Should the President not make this decision by August 1, and an automatic 60-day period ensues, the construction process dependent upon the authority of this measure must be delayed, and that delay has serious ripple effects for the entire program.

Mr. Chairman, I urge my colleagues to vote against this amendment and support the committee's language. The Department of Defense opposes this amendment and is seriously concerned with the ultimate strategic implications of delaying the program.

Since the military construction portion of the MX program is a tightly integrated unit of full-scale engineering development activity, delay in initiating construction contracts will have a direct effect on engineering, forcing the Air Force to restructure the R. & D. program to accomodate anticipated delays in construction. With planned obligations for R. & D. in fiscal year 1982 averaging over $200 million per month, the Air Force would have no choice but to alter, defer, or terminate existing engineering contracts so as not to waste money or destroy program integration.

So I say, in order to avoid this waste of money, vote against the amendment offered.

Mr. SIMON. Mr. Chairman, will my colleague yield?

Mr. HUTTO. I yield to the gentleman from Illinois.

Mr. SIMON. I thank the gentleman, who had the good judgment to marry a girl from southern Illinois, which shows uncommon good judgment. He mentioned the delay, the cost, and these other things. Is the gentleman aware that this amendment is identical to the amendment agreed to in the Senate, offered by the chairman of the Senate Armed Services Committee?

Mr. HUTTO. No; I am not. I am merely going on the testimony we had before our committee on the facts that we had, which I believe to be correct and in the best interests of the country for having the third leg of the Triad.

Mr. SIMON. I would just assure the gentleman from Florida that this is identical to the amendment tossed in by Senator TOWER over in the Senate, and I would hope my colleagues would keep that in mind as we weigh this matter.

Mr. EDGAR. Mr. Chairman, will the gentleman yield?

Mr. HUTTO. I would be glad to yield to the gentleman from Pennsylvania.

Mr. EDGAR. Mr. Chairman, I thank the gentleman for yielding. I would ask the gentleman—the gentleman indicated that the Defense Department supports the land-based mode.

Mr. HUTTO. They support what is in the military construction bill. The decision on the basing, as the gentleman knows, is to be made by the President within the next few months.

Mr. EDGAR. I appreciate the gentleman clarifying that subject. Caspar Weinberger, as a Defense Secretary-designate on January 15, in a story in the New York Times, reported that in regard to the MX missile mode, "I like the idea of going to sea if you can do it."

There are a number of illustrations where people within the administration have questioned whether or not the land-based mode is the appropriate mode at this time. I think, as the gentleman from Illinois has suggested, this language is not language that was just dreamed up on the spur of the moment. It is language that has been supported on the Senate side by some prominent Senators who could not be labeled as doves, but in fact are very interested in the strongest possible national defense, so I think the gentleman should, in fact, support the amendment of the gentleman from Illinois.

Mr. HUTTO. I understand what the gentleman is saying.

The CHAIRMAN. The time of the gentleman from Florida has expired.

(At the request of Mr. EDGAR and by unanimous consent, Mr. HUTTO was allowed to proceed for 2 additional minutes.)

Mr. HUTTO. Of course, if we went to sea that would leave us not with a Triad, but a Duad. We believe, and I believe most of the American people feel, that we need the Triad in our strategic position for the defense of this Nation. The President, as the gentleman knows, has indicated that he has some reservations about the land basing of the MX, but I say to the Members here that we do not want to delay in case he makes the decision on

this, and we will be seeing that very shortly.

So, the delays that I have addressed and which have been addressed by others here would put the program well behind.

Mr. SEIBERLING. Mr. Chairman, will the gentleman yield?

Mr. HUTTO. I yield to the gentleman from Ohio.

Mr. SEIBERLING. Well, at this time we do not need to get into a debate about whether it would be a Diad or maybe a Quadrad, because we would have two different types of submarine fleets deployed in different areas of the ocean with different characteristics. Actually, the small submarine at 200 feet is the least detectable type of undersea system there is, and there are no known methods of detecting it at the present time.

But, the real point is, we do not really know what the other suggestions are that are being evaluated by the Townes Commission. Some of them are land based. A very strong case can be made for several different types of land-based deployment quite different from this, much less vulnerable and much more quickly effective than this tremendous MPS system that would have to be built.

I just feel that we ought to make it as clear as we possibly can that the options are remaining open, that we are going ahead with MX missile development and design, but that at present we are leaving the basing point question open.

Mr. HUTTO. I appreciate what the gentleman says, but I believe there is strong sentiment on the part of our committee that we should have the Triad, and that is the position we have taken. So, I would urge a vote against the amendment.

Mr. HANSEN of Utah. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment to the military construction authorization bill.

Mr. Chairman, while possibly everything has been said concerning this, I would like to say a few things, coming from one of the proposed areas where this thing possibly could be deployed.

I would like to say that I am past chairman of the MX Committee in the State legislature of the State of Utah. I traversed the State; I have seen and talked to the people; been on the site. I went with the gentleman from Ohio (Mr. SEIBERLING) on his trip to Nevada when we looked at this thing.

Let me say that I think the people of Utah are as patriotic as anyone, but they would like to know where this ball game is going to be played before we build the stadium.

□ 1530

I think in this particular instance we are going to build the stadium not knowing if we are going to get into the ball game at all.

First, let me state my continued and unequivocal support for the MX missile itself. The need to augment the Minuteman, our aging land-based strategic deterrent, with the MX missile is of the highest priority, and I cannot see how this is going to delay it. It seems to me in the past few years this has been delayed on one point or another, for the past 2 or 3 years anyway, regarding different things coming down the pike. I would not see where it would not be prudent to delay it now when we are trying to find out where the thing is going.

The current language in the bill restricts funding to the multiple protection structure (MPS) basing mode, commonly known as the MX shell game or racetrack deployment, unless a concurrent resolution is adopted approving an alternative mode as certified by Congress and by the President.

I feel that this is highly premature in light of the fact that President Reagan and Secretary Weinberger have appointed a blue ribbon panel to review the MX—the first high-level study as yet on the missile's basing done in an objective, nonpartisan manner. Their recommendation on MX basing and the final decision by the President which follows are due this summer.

The amendment would have the effect of allowing Congress to wait and act on the President's decision without already being prematurely committed to another, potentially less desirable, basing mode as in the current legislation.

I personally do not see how this amendment would delay in any way the development of the MX missile system. Since the final decision on its basing is due this summer and the bill would not take effect until fiscal year 1982, the basing on MX should likewise remain unaffected.

Mr. Chairman, I, therefore, urge my colleagues to support this amendment and allow the Congress and the President to make a final, unhindered decision on the basing of the MX.

Mr. SIMON. Mr. Chairman, will the gentleman yield?

Mr. HANSEN of Utah. I yield to the gentleman from Illinois.

Mr. SIMON. Mr. Chairman, I would simply point out that not only is the gentleman representing a district in Utah but he is a former speaker of the Utah House and served as chairman of the committee in the Utah Legislature to look at this whole MX question. So this is not just a matter of a freshman Member of the House standing up and speaking.

Mr. Chairman, I commend the gentleman from Utah (Mr. HANSEN) for his remarks in support of the amendment.

Mr. HANSEN of Utah. Mr. Chairman, I thank the gentleman from Illinois (Mr. SIMON).

Mr. ERDAHL. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I think that today we have some very fundamental questions before us as to whether we should go ahead with the basing mode for the MX missile. I think one could argue on both sides whether we should proceed with the MX, but I think here today we are talking primarily about the basing mode.

It seems to me we have before us on this MX track business in Utah and Nevada one of the biggest Rube Goldberg schemes we have ever been faced with. Personally, I think it will be the biggest boondoggle—a multibillion-dollar boondoggle—since the Great Wall of China. I am willing to predict that it will not work and will never be finished.

Let me talk about several specifics I think we should take a look at and why we can support the amendment before us. First of all, it seems to be ill-advised for the Congress to continue to appropriate funds for the MX missile basing mode in Nevada and Utah when the President is still pondering less drastic and less dramatic alternatives.

Second, without some assurance of a limitation on the construction of Soviet ICBM's, we can only realistically believe that they will construct enough missiles to take out the MX should they feel they need to destroy. Although the missiles will be mobile, the system itself is not mobile, and we still have a very finite security system. There is reason to believe that the map of this plan will be available in an environmental impact study and in the Washington Post or the New York Times.

Third, there is no doubt that there is increasing evidence that the basing mode proposed in this bill will be an environmental disaster for vast areas of the West.

As has already been mentioned, Secretary of Defense Weinberger indicated that he is particularly interested in studying the feasibility of basing the MX at sea aboard small submarines. That possibility should be explored before the Congress continues to reauthorize the current basing mode.

Fourth, the currently proposed basing mode will take so long to complete that the perceived strategic nuclear advantage on our part will certainly be more than compensated by the Soviet Union, who are not concerned about public opinion and do not have to worry about environmental impact statements and, therefore, could probably build one of their own before ours is even operational.

I think we have to take a strong and a careful look before proceeding with this MX basing mode at this time.

Really an escalation of the nuclear arms race is not in the interest of the national security of our country.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. ERDAHL. Of course, I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Chairman, I thank my colleague for yielding, and I heartily endorse his remarks.

I am interested in the money here, too. This is an awful lot of money to risk before we know what we are doing, and I think we really must be careful before we spend the people's money in this way.

Mr. EDGAR. Mr. Chairman, will the gentleman yield?

Mr. ERDAHL. Of course, I yield to the gentleman from Pennsylvania.

Mr. EDGAR. Mr. Chairman, I would like to compliment the gentleman for his statement. I think it is articulate and to the point.

In a recent issue of Newsweek magazine, in the June 8 edition, there is an extensive discussion of our defense capabilities and commitments. I found it striking in the first paragraph where it focuses on the fact that:

> It will cost an unfathomable $1.5 trillion over the next five years, fundamentally alter the economy and radically change America's military posture in the world.

That is the first sentence. It concludes by saying this:

> Even more surprising, the buildup is going ahead without any clear strategy—except to send a signal of American resolve to the Soviet Union. In a very real sense, the administration is throwing money at the problem of national defense. "Increases in defense outlays are long overdue," says former Pentagon chief James Schlesinger. "But there must be a vision and explicit strategy along with expenditures."

Mr. Chairman, I commend the gentleman for his vision and for asking that we postpone the decision on the basing mode until we have an explicit strategy. I think that is the point the gentleman from Illinois (Mr. SIMON) is making with his amendment.

Mr. ERDAHL. Mr. Chairman, I thank the gentleman for sharing that with us, and I think the article in Newsweek is one that we should commend to all our colleagues.

Mr. SEIBERLING. Mr. Chairman, will the gentleman yield?

Mr. ERDAHL. I yield to the gentleman from Ohio.

Mr. SEIBERLING. Mr. Chairman, I, too, want to commend the gentleman from Minnesota (Mr. ERDAHL), and I want to say that he has brought another important new dimension into this debate, really the most important one of all.

We are edging into a decision of tremendous fiscal, strategic, and political ramifications without even having an overall strategy for dealing with it or of which it is a part.

The CHAIRMAN. The time of the gentleman from Minnesota (Mr. ERDAHL) has expired.

(On request of Mr. SEIBERLING, and by unanimous consent, Mr. ERDAHL was allowed to proceed for 2 additional minutes.)

Mr. SEIBERLING. Mr. Chairman, if the gentleman will yield further, the decision on whether finally to take this plunge should be based on the maximum amount of information reasonably available.

We do not have the report of the Townes Commission and will not until the end of June. We do not have the report of the Office of Technological Assessment. We do not have the final environmental impact statement. Those are three very key pieces of information that are needed for the Congress, as well as the President, to make an intelligent decision, and we should be basing our decision on the answer to one more question.

That is this: What is the administration's strategy to try to get us out of this terrible spiraling nuclear arms race which has long since gone way beyond the point where it makes any sense?

Mr. Chairman, I suggest the time to deal with that question is when we have all the facts before us and not before.

Mr. ERDAHL. Mr. Chairman, I thank the gentleman from Ohio (Mr. SEIBERLING).

Mr. TRIBLE. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, this discussion is much ado about nothing. The amendment offered by the gentleman from Illinois (Mr. SIMON) really does not reach a substantially different result from the language the committee advances. This is not a vote against MX. This amendment, if approved, will not defeat MX.

Let me relate the thrust of these two amendments so our colleagues can evaluate these two approaches. The Committee on Armed Services has taken this approach: We believe that money should be authorized for MPS, and we would say that it can only be used for that purpose. After all, we have debated and approved this system. If the basing mode is changed by the President, funds cannot be used for an alternative unless the President certifies that alternative to us and both Houses approve within 60 days.

Now, the Simon amendment would not reach a substantially different result. It would not defeat the MX basing mode as presently contemplated. What it would do is simply this: It would say that no authorized funds can be obligated for any basing mode until the President, first, selects the mode and certifies it to Congress; second, the Secretary of Defense submits a written justification; and third, 60 days have elapsed after the certification and both Houses have not adopted a resolution of disapproval.

So let us put this matter in a proper context. This is not a vote against MPS. The amendment offered here would not reach a fundamentally different result than the language of the committee.

I believe that the language of the committee is preferable. I believe it is preferable because it will in no way bias the review now ongoing on the part of the President. It would permit us to move forward more quickly should the President believe that MPS should be implemented.

Mr. Chairman, it is time to make a decision on what language ought to be adopted but this is not a vote on the future of the MX.

Mr. DICKS. Mr. Chairman, will the gentleman yield?

Mr. TRIBLE. I am happy to yield to my friend, the gentleman from Washington.

Mr. DICKS. Mr. Chairman, I think that we can make a case that the committee language is in fact stronger in that it requires a joint resolution to be adopted within 60 days by an affirmative vote before the money can be used for some other system.

Therefore, once the certification has been received we have got to act in order to prevent the money being used on an alternative system.

Mr. TRIBLE. Mr. Chairman, the gentleman's points are well taken. The language crafted by the committee would fully protect the prerogatives of this body and would require our affirmative vote before any alternative could be implemented. On the other hand, the language offered by the gentleman from Illinois would require a resolution of disapproval, which is most unlikely.

Mr. DICKS. Yes; that would be most unlikely. So in fact I would think the committee language is better.

I certainly do not read this as an anti-MX vote.

Mr. Chairman, I appreciate the gentleman's yielding, and I thank him for his comments.

Mr. REGULA. Mr. Chairman, will the gentleman yield?

Mr. TRIBLE. I am happy to yield to my colleague, the gentleman from Ohio.

Mr. REGULA. Mr. Chairman, I want to point out that just a short time ago we adopted the supplemental—and it was adopted by voice vote without any opposition. Contained therein was language deferring $92 million for the MX basing mode construction in fiscal 1981 "until the President of the United States certifies to the Congress his decision on the basing mode for the MX missile."

So that what we have done in effect in the supplemental is to say that we would defer the $92 million—this was my amendment in the full Appropriations Committee; it was accepted unanimously there—until we had a certification from the President. In essence, this is the committee language in this authorization as it is presently crafted.

Would the gentleman who sponsored the amendment allow me to ask him a question? In your judgment as a sponsor of this amendment, am I correct that it does not prohibit the basing of the MX system but simply requires Presidential certification before construction with a possible veto by the Congress? Would that be a fair statement?

The CHAIRMAN. The time of the gentleman from Virginia (Mr. TRIBLE) has expired.

(On request of Mr. REGULA, and by unanimous consent, Mr. TRIBLE was allowed to proceed for 2 additional minutes.)

Mr. SIMON. Mr. Chairman, will the gentleman yield?

Mr. TRIBLE. I yield to the gentleman from Illinois.

Mr. SIMON. Mr. Chairman, I thank my colleague, the gentleman from Virginia, for yielding.

First of all, I commend the gentleman from Ohio (Mr. REGULA) for his amendment on the 1981 bill.

The gentleman is correct, and I also agree with my colleague, the gentleman from Washington (Mr. DICKS), that this is not an anti-MX amendment.

The question, it seems to me, is this: Are we going to, on this bill, exercise some prudence, as we have done with the gentleman's amendment on the 1981 bill? It seems to me the sensible thing is to exercise that prudence.

□ 1545

Mr. REGULA. Would the gentleman agree that essentially the difference between the two sets of language is the 60-day congressional period for a possible veto, but otherwise the bill language pretty well tracks with that of the gentleman's amendment.

Mr. SIMON. There is not a huge chasm of difference. The gentleman is correct.

There is, I would disagree with my colleague, the gentleman for Washington, only to the extent that I think there is a little added protection for the Congress and the American people if the President makes a different decison.

Mr. REGULA. I thank the gentleman, because I think it is important that we understand that a vote for the gentleman's amendment is not a vote against the MX basing system necessarily, but it simply involves additional time for a congressional veto of any Presidential decision.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. SIMON).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. YOUNG OF FLORIDA

Mr. YOUNG of Florida. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. YOUNG of Florida: On page 23, line 5, strike "$7,960,000" and insert in lieu thereof "$16,960,000".

Mr. YOUNG of Florida. Mr. Chairman, the amendment adds $9 million to the bill as originally requested by the administration for the purpose of constructing facilities for the Rapid Deployment Joint Task Force Headquarters at MacDill Air Force Base. I can understand why the committee determined not to fund these, not to authorize the funds for the program, because the decision was announced that the Rapid Deployment Joint Task Force would eventually have a headquarters established somewhere in Southwest Asia or in the Middle East.

The problem that we have, and after having spent a considerable amount of time dealing with this subject on the Subcommittee on Defense of the Appropriations Committee, I have become aware of the fact that those plans are merely assumptions today. We are assuming that we will have base rights in Oman or Kenya, and Somalia or Egypt, or someplace else; but at this point, it is all assumption and that is only for basing rights. The truth of the matter is that we have not even discussed the headquartering rights for the Rapid Deployment Joint Task Force.

The other point I think equally important is that even if we did establish a headquarters overseas for the RDJTF, we still need these facilities at MacDill Air Force Base for the Readiness Command, the rear elements of the Rapid Deployment Joint Task Force Headquarters and the rapid mobilization force that is also there at MacDill Air Force Base.

I hope that the committee will be agreeable to allowing these funds to be reinserted into the bill and if something should develop along the way where it was determined the funds really were not needed, we could take them out at a later date or during the appropriations process.

Mr. BRINKLEY. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Florida. I would be happy to yield to the gentleman from Georgia.

Mr. BRINKLEY. I appreciate the experience the gentleman brings to this committee and I respect very highly his judgment.

I wonder if the gentleman knows if the other body is presently considering this in its deliberations in the Armed Services Committee over there? I was wondering whether or not we might arrive at some middle ground in conference.

Our committee did consider the issue the gentleman raises. On balance, it seemed that the case was not made because of the uncertainty of the Air Force itself.

Mr. YOUNG of Florida. Well, my response to the gentleman would be, first, I would prefer to do my job here in the House.

Mr. BRINKLEY. Yes.

Mr. YOUNG of Florida. Rather than wait for the other body; that is always a little unsure.

Second, in my own opinion, I have no doubt, and I will say to the gentleman that I spent many, many hours and days involved in this subject. The point is that even if we should establish an overseas headquarters for the RDJTF, we are still going to need this facility at MacDill. The RDJTF headquarters at MacDill today is in a bunker that goes back to the days of the Strategic Air Command, when the SAC base was there at MacDill.

The readiness command needs the facility. The element of the RDJTF headquarters that would have to remain even if we did deploy an advance element of the headquarters would still need the facility at MacDill Air Force Base.

I would hope that the Chairman would be willing to allow us to put this authorization back into the bill and then if it appears that something changes along the way, we certainly would be willing to make whatever accommodation would be appropriate.

Mr. GIBBONS. Mr. Chairman, will the gentleman yield to me?

Mr. YOUNG of Florida. I yield to my colleague, the gentleman from Florida.

Mr. GIBBONS. I first want to commend the gentleman for his diligence and for his awareness of this problem and for the fine way he has supported this project.

I hope that the committee will support his position. I certainly support it. It is needed.

I will cooperate with the committee and with the gentleman from Florida to make sure that no funds are wasted, that we only spend what is needed and we will have no trouble at all in this.

Mr. YOUNG of Florida. The gentleman from Florida makes an excellent point.

The CHAIRMAN. The time of the gentleman from Florida has expired.

(At the request of Mr. BRINKLEY, and by unanimous consent, Mr. YOUNG of Florida was allowed to proceed for 1 additional minute.)

Mr. YOUNG of Florida. The gentleman from Florida (Mr. GIBBONS) makes an excellent point. None of us want to spend a dollar for any reason, including defense, that we do not need

to spend; but this is a case where I would rather be prepared and if we have to back off at a later date because someone changes their mind, we will do so; but I think today we ought to put this money back in.

Mr. BRINKLEY. Mr. Chairman, if the gentleman will yield further, the gentleman has used the magic word of being prepared. Of course, in the Rapid Deployment Force, we obviously must look to that quality.

This side, therefore, would have no objection to the add-on.

Mr. YOUNG of Florida. I thank the chairman very much.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Florida (Mr. YOUNG).

The amendment was agreed to.

Mr. MARRIOTT. Mr. Chairman, I ask unanimous consent to offer an amendment to section 305, as amended.

The CHAIRMAN. Is there objection to the request of the gentleman from Utah?

Mr. BRINKLEY. Mr. Chairman, reserving the right to object, this is a perfecting amendment to the Simon amendment to which the committee chairman and the ranking minority member have agreed, if we may have unanimous consent to do so.

Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Utah?

Mr. SIMON. Reserving the right to object, Mr. Chairman, I concur with the gentleman from Utah in this and I commend him for this perfecting amendment.

Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Utah (Mr. MARRIOTT)?

There was no objection.

AMENDMENT TO SECTION 305, AS AMENDED, OFFERED BY MR. MARRIOTT

Mr. MARRIOTT. Mr. Chairman, I offer an amendment to section 305, as amended.

The Clerk read as follows:

Amendment to Section 305, as amended, offered by Mr. MARRIOTT: Paragraph (2) of section 305, as proposed to be inserted by the amendment, is amended to read as follows:

(2) the Secretary of Defense submits to the Committees on Armed Services of the Senate and House of Representatives a report in writing (A) justifying the selection of the President referred to in paragraph (1), (B) containing a comparison and evaluation of alternative basing modes to the basing mode selected by the President, and (C) recommending a plan to mitigate the economic, social and cultural impacts of the selected basing mode on the affected State and local communities, including through the provision of Federal financial assistance; and

Mr. MARRIOTT. Mr. Chairman, this is very simple and I will not take a lot of time, only to say that what this amendment does is adds to the amendment of the gentleman from Illinois (Mr. SIMON) which simply says that in addition to all the other things that must be done before we implement the program, that the Secretary will write an impact plan to deal with the economic, environmental, and social impacts of the MX system.

Second, that this plan will include Federal financial assistance, a commitment, that is, from the Federal Government to provide the funds to deal with those economic impacts.

We are not addressing the basing mode. We are simply asking that we send a signal to the people of Utah and Nevada that a priority of Congress will be to deal with economic impacts. The impact of the MX system is horrendous. We are asking that before any system is implemented that we look at the effects of the system on the water, on the population, on the energy compatibility of the State. After all, we are going to be providing the oil shale, the tar sands, the coal for the country, and we want to make sure that the priority of this body is to look at those economic, environmental, and social impacts.

I have no other comments to make, Mr. Chairman, except that I appreciate the chairman and the ranking minority member accepting this perfecting amendment.

Mr. BRINKLEY. Mr. Chairman, I move to strike the requisite number of words and add my commendation to the thoughtful remarks of the gentleman.

We do support the perfecting amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Utah (Mr. MARRIOTT).

The amendment was agreed to.

The CHAIRMAN. Are there further amendments to title III? If not, the Clerk will read.

Mr. BRINKLEY. Mr. Chairman, I ask unanimous consent that title IV through title VII be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Titles IV, V, VI, and VII are as follows:

TITLE IV—DEFENSE AGENCIES

AUTHORIZED CONSTRUCTION PROJECTS FOR THE DEFENSE AGENCIES

SEC. 401. The Secretary of Defense may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, for defense agencies for the following acquisition and construction:

INSIDE THE UNITED STATES

DEFENSE INTELLIGENCE AGENCY

Bolling Air Force Base, District of Columbia, $72,500,000.

DEFENSE LOGISTIC AGENCY

Defense Construction Supply Center, Columbus, Ohio, $680,000.
Defense Depot, Tracy, California, $554,000.
Defense Depot, Mechanicsburg, Pennsylvania, $2,050,000.
Defense Depot, Memphis, Tennessee, $5,220,000.
Defense Depot, Ogden, Utah, $2,670,000.
Defense Fuel Support Point, Grand Forks, North Dakota, $1,690,000.
Defense Fuel Support Point, Pearl City, Hawaii, $3,600,000.
Defense General Supply Center, Richmond, Virginia, $5,600,000.
Defense Property Disposal Office, Fort Bragg, North Carolina, $2,800,000.

DEFENSE MAPPING AGENCY

Aerospace Center, St. Louis, Missouri, $10,750,000.

NATIONAL SECURITY AGENCY

Fort George G. Meade, Maryland, $57,596,000.

OFFICE OF THE SECRETARY OF DEFENSE

Classified Activity, Classified Location, $10,000,000.
Classified Activity, Fort Belvoir, Virginia, $2,100,000.

OUTSIDE THE UNITED STATES

DEFENSE COMMUNICATIONS AGENCY

Patch Barracks, Vaihingen, Germany, $900,000.

DEFENSE LOGISTICS AGENCY

Defense Fuel Support Point, Wake Island, $14,500,000.
Defense Property Disposal Office, Kaiserslautern, Germany, $1,480,000.

OFFICE OF THE SECRETARY OF DEFENSE

Classified Activity, Classified Location, $2,000,000.

DEPARTMENT OF DEFENSE DEPENDENTS SCHOOLS

Croughton Royal Air Force Station, United Kingdom, $13,700,000.
Dexheim, Germany, $980,000.
Fulda, Germany, $10,500,000.
Landstuhl Air Base, Germany, $6,140,000.
Misawa Air Base, Japan, $6,180,000.
Naval Station, Guantanamo Bay, Cuba, $5,900,000.
Pusan, Korea, $2,460,000.
Schwaebisch Hall, Germany, $780,000.
Seoul, Korea, $4,350,000.
Vilseck, Germany, $9,920,000.
Yokota Air Base, Japan, $3,290,000.

EMERGENCY CONSTRUCTION

SEC. 402. The Secretary of Defense may establish or develop installations and facilities which he determines to be vital to the security of the United States and, in connection therewith, may acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment in the total amount of $15,000,000. The Secretary of Defense, or the Secretary's designee, shall notify the Commodities on Armed Services of the Senate and House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including real estate actions pertaining thereto.

MINOR CONSTRUCTION

SEC. 403. The Secretary of Defense is authorized to accomplish minor construction projects under section 2674 of title 10, United States Code, in the amount of $6,210,000.

TITLE V—NORTH ATLANTIC TREATY ORGANIZATION INFRASTRUCTURE

AUTHORIZED CONTRIBUTION

SEC. 501. (a) The Secretary of Defense is authorized to incur obligations in amounts not to exceed $425,000,000 for the United States share of the cost of multilateral programs for the acquisition or construction of military facilities and installations (including international military headquarters) for the collective defense of the North Atlantic Treaty Area.

(b) Within thirty days after the end of each calendar-year quarter, the Secretary of Defense shall furnish to the Committees on Armed Services and on Appropriations of the Senate and House of Representatives a description of obligations incurred by the United States during the preceding quarter for the United States share of the cost of such multilateral programs.

TITLE VI—MILITARY FAMILY HOUSING AND HOMEOWNERS ASSISTANCE PROGRAM

AUTHORIZATION TO CONSTRUCT OR ACQUIRE HOUSING

SEC. 601. (a) The Secretary of Defense, or the Secretary's designee, is authorized to construct or acquire sole interest in existing family housing units in the numbers and at the locations hereinafter named, but no family housing construction shall be commenced at any such location in the United States until the Secretary shall have consulted with the Secretary of Housing and Urban Development as to the availability of suitable private housing at such location. If agreement cannot be reached with respect to the availability of suitable private housing at any location, the Secretary of Defense shall notify the Committees on Armed Services of the Senate and House of Representatives, in writing, of such difference of opinion, and no contract for construction at such location shall be entered into for a period of thirty days after such notification has been given. This authority shall include the authority to acquire land, and interests in land, by gift, purchase, exchange of Government-owned land, or otherwise. The Secretary of Defense is authorized to acquire less than sole interest in existing family housing units in foreign countries when determined to be in the best interests of the Government.

(b) With respect to the family housing units authorized to be constructed by this section, the Secretary of Defense is authorized to acquire sole interest in privately owned or Department of Housing and Urban Development-held family housing units in lieu of constructing all or a portion of the family housing authorized by this section, if the Secretary, or the Secretary's designee, determines such action to be in the best interests of the United States, but any family housing units acquired under authority of this subsection shall not exceed the cost limitations specified in this section for the project nor the limitations on size specified in section 2684 of title 10, United States Code. In no case may family housing units be acquired under this subsection through the exercise of eminent domain authority, and in no case may family housing units other than those authorized by this section be acquired in lieu of construction unless the acquisition of such units is hereafter specifically authorized by law.

(c) Family Housing units:

Marine Corps Air Station, El Toro, California, two hundred and twelve units, $15,540,000.

Fort Irwin, California, four hundred and fifty-four units, $29,859,000.

Naval Complex, San Diego, California, two hundred and ninety units, $25,350,000.

Naval Submarine Support Base, Kings Bay, Georgia, one hundred and sixty-five units, $12,740,000.

Picatinny Arsenal, New Jersey, twenty-six units, $2,141,000.

Fort Drum, New York, two hundred and thirty-two units, $15,865,000.

Naval Complex, Warminster/Willow Grove, Pennsylvania, two hundred units, $14,910,000.

Naval Air Station, Chase Field, Texas, eighty-eight units, $6,360,000.

Incirlik Air Base, Turkey, four hundred units, $29,000,000.

Greenham-Common, United Kingdom, two hundred and seventy units, $27,200,000.

Classified Location Overseas, six units, $765,000.

(d) The amounts specified in this section may, at the discretion of the Secretary of Defense, or the Secretary's designee, be increased by 10 per centum, if he determines that such increases (1) is required for the sole purpose of meeting unusual variations in cost, and (2) could not have been reasonably anticipated at the time such estimate was submitted to the Congress. The amounts authorized include the costs of shades, screens, ranges, refrigerators, and all other installed equipment and fixtures, the costs of the family housing unit, supervision, inspection, overhead, land acquisition, site preparation, installation of utilities, and solar energy systems.

IMPROVEMENT OF EXISTING QUARTERS

SEC. 602. (a) The Secretary of Defense, or the Secretary's designee, is authorized to accomplish alterations, additions, expansions, or extensions, not otherwise authorized by law, to existing public quarters at a cost not to exceed $109,819,000 of which $44,878,000 shall be available only for energy conservation projects.

(b) The Secretary of Defense, or the Secretary's designee, within the amount specified in subsection (a), is authorized to accomplish repairs and improvements to existing family housing in amounts in excess of the dollar limitation prescribed in section 610(a) of the Military Construction Authorization Act, 1968 (42 U.S.C. 1594h-2), as follows:

Marine Corps Air Ground Combat Center, Twenty-nine Palms, California, one hundred and thirty-five units, $2,897,300.

Navy Public Works Center, Honolulu, Hawaii, one hundred units, $3,190,000.

Chanute Air Force Base, Illinois, two hundred and twenty-two units, $4,662,000.

Fort Knox, Kentucky, one hundred units, $2,851,000.

Nellis Air Force Base, Nevada, two hundred thirty-six units, $4,956,000.

Kirtland Air Force Base, New Mexico, one hundred and fifty-five units, $3,875,000.

Offutt Air Force Base, Texas, eighty units, $1,599,000.

Randolph Air Force Base, Texas, one hundred and sixty-seven units, $3,839,000.

Fort Lewis, Washington, fifty-eight units, $1,378,000.

Mildenhall, United Kingdom, thirty units, $1,511,600.

Upper Heyford, United Kingdom, twelve units, $648,400.

ADVANCE PLANNING AND DESIGN

SEC. 603. The Secretary of Defense, or the Secretary's designee, may carry out advance planning and construction design and may obtain architectural and engineering services in connection with any family housing construction, including improvements, authorized or not otherwise authorized by law at a total cost of not to exceed $9,100,000.

LEASING OF FAMILY HOUSING

SEC. 604. Section 2675(d) of title 10, United States Code, is amended—

(1) by striking out "150" in paragraph (1) and inserting in lieu thereof "200"; and,

(2) by striking out "17,000" in paragraph (2) and inserting in lieu thereof "22,000".

AUTHORIZATION OF APPROPRIATIONS

SEC. 605. (a) There is authorized to be appropriated for fiscal year 1982 for use by Secretary of Defense, or the Secretary's designee, for military family housing as authorized by law for the following purposes:

(1) For construction or acquisition of family housing, including minor construction, improvements to public quarters, relocation of family housing, and planning, an amount not to exceed $298,649,000.

(2) For support of military family housing, including operating expenses, leasing, maintenance of real property, payments of principal and interest on mortgage debts incurred, payment to the Commodity Credit Corporation, and mortgage insurance premiums authorized under section 222 of the National Housing Act (12 U.S.C. 1715m), an amount not to exceed $2,079,184,000, of which not more than $8,600,000 may be obligated or expended for the leasing of military family housing in the United States, the Commonwealth of Puerto Rico, and Guam, and of which not more than $113,717,000 may be obligated or expended for the leasing of military family housing in foreign countries.

(3) For homeowners assistance under section 1013 of the Demonstration Cities and Metropolitan Development Act of 1966 (42 U.S.C. 3374), including acquisition of properties, an amount not to exceed $2,000,000.

(b) The amounts authorized to be appropriated in subsection (a)(2) may be increased to the extent additional funds are necessary for increased pay costs associated with actions taken pursuant to law.

TITLE VII—AUTHORIZATION OF APPROPRIATIONS AND ADMINISTRATIVE PROVISIONS

WAIVER OF RESTRICTIONS

SEC. 701. The Secretary of each military department may proceed to establish or develop installations and facilities under this Act without regard to section 3648 of the Revised Statutes (31 U.S.C. 529), and sections 4774 and 9774 of title 10, United States Code. The authority to place permanent or temporary improvements on land includes authority for surveys, administration, overhead, planning, and supervision incident to construction. That authority may be exercised before title to the land is approved under section 355 of the Revised Statutes (40 U.S.C. 255), and even though the land is held temporarily. The authority to acquire real estate or lands includes authority to make surveys and to acquire land and interests in land (including temporary use), by gift, purchase, exchange of government-owned land, or otherwise.

AUTHORIZATION OF APPROPRIATIONS

SEC. 702. There are authorized to be appropriated for fiscal years beginning after September 30, 1981, such sums as may be necessary for the purposes of this Act, but appropriations for public works projects authorized by titles I, II, III, IV, and V, shall not exceed—

(1) for title I: inside the United States $376,856,000; outside the United States $467,600,000; minor construction $34,150,000 for a total of $878,606,000.

(2) for title II: inside the United States $947,078,000; outside the United States $236,965,000; minor construction $33,320,000; for a total of $1,217,363,000.

(3) for title III: inside the United States $975,239,000; outside the United States $499,974,000; minor construction $28,680,000; for a total of $1,503,893,000.

(4) for title IV: a total of $282,100,000, including $6,210,000 for minor construction.

(5) for title V: a total of $425,000,000.

COST VARIATIONS

SEC. 703. (a) OVERALL TITLE TOTAL LIMITATION.—Notwithstanding the provisions of subsections (b), (c), (e), and (h), the total cost of all construction and acquisition in each of titles I, II, III, IV, and V, except as provided in subsection (d), may not exceed the total amount authorized to be appropriated in that title.

(b) VARIATIONS IN INSTALLATION TOTALS—UNUSUAL VARIATIONS IN COST.—Except as provided in subsections (c) and (e), any of the amounts specified in titles I, II, III, and IV of this Act (other than in sections 103, 203, 303, and 403) may, at the discretion of the Secretary of the military department or Director of the defense agency concerned, be increased by 5 percent when inside the United States (other than Alaska or Hawaii), and by 10 percent when outside the United States or in Alaska or Hawaii, if the Secretary of the military department or Director of the defense agency concerned determines that such increase (1) is required for the sole purpose of meeting unusual variations in cost, and (2) could not have been reasonably anticipated at the time such estimate was submitted to the Congress.

(c) VARIATIONS IN INSTALLATION TOTALS—ONLY ONE PROJECT AT AN INSTALLATION.—When the amount named for any construction or acquisition in title I, II, III, or IV of the Act involves only one project at any military installation and the Secretary of the military department or Director of the defense agency concerned determines that the amount authorized must be increased by more than the applicable percentage prescribed in subsection (b), the Secretary of the military department or Director of the defense agency concerned may proceed with such construction or acquisition if the amount of the increase does not exceed by more than 25 percent the amount named for such project by the Congress.

(d) VARIATIONS IN NORTH ATLANTIC TREATY ORGANIZATION TOTAL.—When the Secretary of Defense determines that the amount set forth in title V for the United States share of the cost of the North Atlantic Treaty Organization program must be increased, the Secretary may incur obligations in excess of such amount if the amount of the increase does not exceed by more than 25 percent the amount set forth in such title.

(e) VARIATIONS IN INSTALLATION TOTALS—REPORTS BY THE SECRETARY OF DEFENSE.—When the Secretary of Defense determines that any amount named in title I, II, III, IV, or V of this Act must be exceeded by more than the percentages permitted in subsections (b), (c), and (d) to accomplish authorized construction or acquisition or for the United States share of the cost of the North Atlantic Treaty Organization infrastructure program, the Secretary of Defense or the Secretary of the military department or Director of the defense agency concerned may proceed with such construction or acquisition after a written report of the facts relating to the increase of such amounts including a statement of the reasons for such increase, has been submitted to the Committees on Armed Services of the Senate and House of Representatives and either (1) thirty days have elapsed from the date of submission of such report, or (2) both committees have indicated approval of such construction or acquisition. Notwithstanding the provisions in prior Military Construction Authorization Acts, the provisions of this subsection shall apply to such prior Acts.

(f) COST AND SCOPE VARIATIONS OF INDIVIDUAL PROJECTS: REPORTS TO CONGRESS.—No individual project authorized under title I, II, III, or IV of this Act for any specifically listed military installations for which the current working estimate is greater than the statutory upper limit for minor construction projects may be placed under contract if—

(1) the approved scope of the project is reduced in excess of 25 percent; or

(2) the current working estimate, based upon bids received, for the construction of such project exceeds by more than 25 percent the amount authorized for such project by the Congress;

until a written report of the facts relating to the reduced scope or increased cost of such project, including a statement of the reasons for reduction in scope or increase in cost, has been submitted to the Committees on Armed Services of the Senate and House of Representatives and either thirty days have elapsed from the date of submission of such report or both committees have indicated approval of such reduction in scope or increase in cost, as the case may be.

(g) ANNUAL REPORTS TO CONGRESS.—The Secretary of Defense, or the Secretary's designee, shall submit an annual report to the Congress identifying each individual project (other than a project authorized under section 103, 203, 303, or 403) which has been placed under contract in the preceding twelve-month period and with respect to which the then current working estimate of the Department of Defense, based upon bids received, for such project exceeded the amount authorized by the Congress for that project by more than 25 percent. The Secretary shall also include in such report each individual project with respect to which the scope was reduced by more than 25 percent in order to permit contract award within the available authorization for such project. Such report shall include all pertinent cost information for each individual project, including the amount in dollars and percentage by which the current working estimate based on the contract price for the project exceeded the amount authorized for such project by the Congress.

(h) COST AND FLOOR AREA VARIATIONS—SOLAR ENERGY.—The Secretary of Defense shall encourage the utilization of solar energy as a source of energy for projects authorized by this Act where utilization of solar energy would be practical and economically feasible. In order to equip any project authorized by this Act with solar heating equipment, solar cooling equipment, or both solar heating and solar cooling equipment, the Secretary of Defense may authorize increases in the cost limitations or floor area limitations for such project by such amounts as may be necessary for such purpose. Any increase under this section in the cost or floor area of a project authorized by this Act shall be in addition to any other increase in such cost or variation in floor area limitations authorized by this or any other Act.

CONSTRUCTION SUPERVISION

SEC. 704. Contracts for construction made by the United States for performance within the United States and its possessions under this Act shall be executed under the jurisdiction and supervision of the Corps of Engineers, Department of the Army, the Naval Facilities Engineering Command, Department of the Navy, or such other department or Government agency as the Secretaries of the military departments recommend and the Secretary of Defense approves to assure the most efficient, expeditious, and cost-effective accomplishment of the construction herein authorized. The Secretaries of the military departments shall report annually to the President of the Senate and Speaker of the House of Representatives a breakdown of the dollar value of construction contracts completed by each of the several construction agencies selected together with the design construction supervision, and overhead fees charged by each of the several agents in the execution of the assigned construction. Further, such contracts (except architect and engineering contracts which, unless specifically authorized by the Congress shall continue to be awarded in accordance with presently established procedures, customs, and practices) shall be awarded, insofar as practicable, on a competitive basis to the lowest responsible bidder, if the national security will not be impaired and the award is consistent with chapter 137 of title 10, United States Code. The Secretaries of the military departments shall report annually to the President of the Senate and Speaker of the House of Representatives with respect to all contracts awarded on other than a competitive basis to the lowest responsible bidder. Such reports shall also show, in the case of the ten architect-engineering firms which, in terms of total dollars, were awarded the most business, the names of such firms, the total number of separate contracts awarded each firm, and the total amount paid or to be paid in the case of each such action under all such contracts awarded such firm.

REPEAL OF PRIOR YEAR AUTHORIZATIONS: EXCEPTIONS

SEC. 705. (a) As of October 1, 1982, or the date of the enactment of the Military Construction Authorization Act for fiscal year 1983, whichever is later, all authorizations for military public works, including family housing, to be accomplished by the Secretary of a military department in connection with the establishment or development of installations and facilities, and all authorizations for appropriations therefor, that are contained in titles I, II, III, IV, and V, of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1749), and all such authorizations contained in Acts approved before October 10, 1980, and not superseded or otherwise modified by a later authorization are repealed except—

(1) authorizations for public works and for appropriations therefor that are set forth in those Acts in the titles that contain the general provisions; and

(2) authorizations for public works projects as to which appropriated funds have been obligated for construction contracts, land acquisition, or payments to the North Atlantic Treaty Organization, in whole or in part, before October 1, 1982, or the date of the enactment of the Military Construction Authorization Act for fiscal year 1983, whichever is later, and authorizations for appropriations therefor.

(b) Notwithstanding the repeal provisions of subsection (a) of this section and section 605 of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1770), authorization for the following items authorized in section 101 of the Military Construction Authorization Act, 1980 (Public Law 96-125; 93 Stat. 928) shall remain in effect until October 1, 1983, or the date of enactment of the Military Construction Authorization Act for fiscal year 1984, whichever is later.

(1) Boiler Plant Emission Control System construction in the amount of $1,900,000 at Anniston Army Depot, Alabama.

(2) Boiler Plant Emission Control System construction in the amount of $3,000,000 at Tobyhanna Army Depot, Pennsylvania.

(3) Boiler Plant Emission Control System construction in the amount of $2,800,000 at Fort Benjamin Harrison, Indiana.

(4) Industrial Waste Treatment Plant construction in the amount of $1,100,000 at Riverbank Army Ammunition Plant, California.

(5) Advanced Power Train Test Facility construction in the amount of $1,560,000 at Corpus Christi Army Depot, Texas.

(6) Ammunition Inspection and Test Facility construction in the amount of $1,200,000 at Letterkenny Army Depot, Pennsylvania.

(7) Replace Boilers construction in the amount of $8,600,000 at Red River Army Depot, Texas.

(8) Dental Clinic construction in the amount of $2,750,000 at Schofield Barracks, Hawaii.

(9) Centralized Container Ammunition Facility construction in the amount of $920,000 at Lone Star Army Ammunition Plant, Texas.

(10) Indoor Athletic Facilities Construction in the amount of $12,200,000 at the United States Military Academy, West Point, New York.

(11) Temperature-Altitude Test Facility construction in the amount of $2,000,000 at the White Sands Missile Range, New Mexico.

(12) Water Monitor Station construction in the amount of $220,000 at Riverbank Army Ammunition Plant, California.

(c) Notwithstanding the repeal provisions of subsection (a) of this section and section 605 of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1770), authorization for the construction of the Reception Station at Fort Benning, Georgia, in the amount of $5,886,000 authorized in section 101 of the Military Construction Authorization Act, 1978 (Public Law 95-82; 91 Stat. 358), as such authorization was extended in section 605 of the Military Construction Authorization Act, 1980 (Public Law 96-125; 93 Stat. 945), shall remain in effect until October 1, 1983, or the date of enactment of the Military Construction Authorization Act for fiscal year 1984, whichever is later.

(d) Notwithstanding the provisions of subsection (a) of this section and of section 605 of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1770) authorizations for the following items authorized in section 201 or such authorizations as were extended in section 605 of the Military Construction Authorization Act, 1980 (Public Law 96-125) shall remain in effect until October 1, 1983, or the date of enactment of the Military Construction Authorization Act for fiscal year 1984, whichever is later:

(1) Municipal Sewer Connection construction in the amount of $2,200,000 at the Naval Submarine Base, New London, Connecticut.

(2) Insulation and Storm Windows construction in the amount of $2,350,000 at the Naval Weapons Station, Charleston, South Carolina.

(3) Applied Instruction (Morse Training) Building construction in the amount of $2,400,000 at the Naval Technical Training Center, Pensacola, Florida.

(4) Engine Test Cell Modernization in the amount of $3,500,000 at the Naval Air Rework Facility, Alameda, California.

(5) Municipal Sewer Connection construction in the amount of $2,100,000 at the Naval Shipyard, Long Beach, California.

(6) Industrial Waste Collection and Treatment construction in the amount of $6,500,000 at the Naval Shipyard, Long Beach, California.

(7) Engine Test Cell Modernization in the amount of $3,200,000 at the Naval Air Rework Facility, North Island, California.

(e) Notwithstanding the repeal provisions of subsection (a) of this section and section 605 of the Military Construction Authorization Act, 1981 (Public Law 96-418, 94 Stat. 1770), authorizations for the following items authorized in section 301 of the Military Construction Authorization Act, 1980 (Public Law 96-125; 93 Stat. 934) shall remain in effect until October 1, 1983, or the date of the enactment of the Military Construction Authorization Act for fiscal year 1984, whichever is later:

(1) Connect to Regional Sewage System in the amount of $1,100,000 at Richards-Gebaur Air Force Base, Missouri.

(2) Pave roads in the amount of $690,000 at Davis-Monthan Air Force Base, Arizona.

(3) Aircraft Maintenance Control Facility in the amount of $850,000 at England Air Force Base, Louisiana.

(4) Composite Medical Facility in the amount of $16,500,000 at George Air Force Base, California.

(5) Air Installation Compatible Use Zone in the amount of $1,950,000 at Buckley Air National Guard Base, Colorado.

(6) Various Operational Facilities in the amount of $4,950,000 at Roberts International Airport, Liberia.

(7) Unaccompanied Officer Personnel Housing in the amount of $510,000 at Taegu Air Force Base, Korea.

(8) Security Facilities in the amount of $3,485,000 at Howard Air base, Canal Zone.

(9) Special Operations Facilities in the amount of $2,800,000 at Various Locations Overseas.

UNIT COST LIMITATIONS

SEC. 706. None of the authority contained in titles I, II, III, and IV of this Act shall be deemed to authorize any building construction projects inside the United States in excess of a unit cost to be determined in proportion to the appropriate area construction cost index, based on the following unit cost limitations where the area construction index is 1.0:

(1) $53 per square foot for permanent barracks; or

(2) $57 per square foot for unaccompanied officer quarters;

unless the Secretary of Defense, or the Secretary's designee, determines that, because of special circumstances, application to such project of the limitation on unit cost contained in this section is impracticable. Notwithstanding the limitations contained in prior Military Construction Authorization Acts on unit costs, the limitations on such costs contained in this section shall apply to all prior authorizations for such construction not heretofore repealed and for which construction contracts have not been awarded by the date of enactment of this Act.

EFFECTIVE DATE FOR PROJECT AUTHORIZATIONS

SEC. 707. Titles I, II, III, IV, V, and VI shall take effect on October 1, 1981.

Mr. BRINKLEY. Mr. Chairman, I offer an amendment.

AMENDMENT OFFERED BY MR. BRINKLEY

The Clerk read as follows:

Amendment offerd by Mr. BRINKLEY: Page 39, line 16, strike out "$975,239,000" and insert in lieu thereof "$984,239,000".

Page 39, line 18, strike out "$1,503,893,000" and insert in lieu thereof "$1,512,893,000".

Mr. BRINKLEY. Mr. Chairman, this is a conforming amendment because of the addition of the MacDill Air Force Base RDF project. It brings the total figures into line. I ask for support of the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia (Mr. BRINKLEY).

The amendment was agreed to.

The CHAIRMAN. Are there other amendments? If not, the Clerk will read title VIII.

The Clerk read as follows:

TITLE VIII—GUARD AND RESERVE FORCES FACILITIES

AUTHORIZATION FOR FACILITIES

SEC. 801. Subject to chapter 133 of title 10, United States Code, the Secretary of Defense may establish or develop additional facilities for the Guard and Reserve Forces, including the acquisition of land therefor, but the cost of such facilities shall not exceed the following amounts:

(1) For the Department of the Army—

(A) for the Army National Guard of the United States, $57,725,000; and

(B) for the Army Reserve, $49,477,000.

(2) for the Department of the Navy: for the Naval and Marine Corps Reserves, $39,000,000.

(3) For the Department of the Air Force—

(A) for the Air National Guard of the United States, $108,000,000; and

(B) for the Air Force Reserve, $37,500,000.

WAIVER OF CERTAIN RESTRICTIONS

SEC. 802. The Secretary of Defense may establish or develop installations and facilities under this title without regard to section 3648 of the Revised Statutes (31 U.S.C. 529) and sections 3648 of the Revised Statutes (31 U.S.C. 529) and sections 4774 and 9774 of title 10, United States Code. The authority to place permanent or temporary improvements on lands includes authority for surveys, administration, overhead, planning, and supervision incident to construction. That authority may be exercised before title to the land is approved under section 355 of the Revised Statutes (40 U.S.C. 255) and even though the land is held temporarily. The authority to acquire

real estate or land includes authority to make surveys and to acquire land and interests in land (including temporary use), by gift, purchase, exchange of Government-owned land, or otherwise.

EXPANSION OF FEDERAL FACILITIES BY THE NATIONAL GUARD

SEC. 803. Section 2233 of title 10, United States Code, is amended—

(1) by inserting "or by the United States" after "or convert facilities owned by it" in subsection (a)(2); and

(2) by adding at the end of subsection (b) the following new sentence: "Such property may be transferred to any State or Territory, Puerto Rico, or the District of Columbia incident to the expansion, rehabilitation or conversion of such property under subsection (a)(2) so long as the transfer of such property does not result in the creation of a State or Territory, Puerto Rico, or the District of Columbia owned enclave within a larger Federal installation.".

FEDERAL FUNDING OF DIRECTED PROGRAMS

SEC. 804. Section 2233(a) of title 10, United States Code, is amended—

(1) by striking out "and" after clause (4);

(2) by striking out the period at the end of clause (5) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new clause:

"(6) contribute to any State or Territory, Puerto Rico, or the District of Columbia such amounts for the construction, alteration, or rehabilitation of arms storage rooms as the Secretary determines to be required to meet a change in Department of Defense standards related to the safekeeping of arms.".

Mr. BRINKLEY (during the reading). Mr. Chairman, I ask unanimous consent that title VIII be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The CHAIRMAN. Are there any amendments? If not, the Clerk will read title IX.

The Clerk read as follows:

TITLE IX—GENERAL PROVISIONS

USE OF SOLAR ENERGY SYSTEMS IN NEW CONSTRUCTION

SEC. 901. Section 2688(b) of title 10, United States Code, is amended to read as follows:

"(b) For the purposes of this section, a solar energy system shall be considered to be cost effective if the original investment cost differential can be recovered over the expected life of the facility using accepted life cycle costing procedures. Such accepted life cycle costing procedures shall include the use of the sum of all capital, operating, and maintenance expenses associated with the energy system of the building involved over the expected life of such system or during a period of twenty-five years, whichever is shorter, and using marginal fuel cost as determined by the Secretary of Defense and at a discount rate of seven percent per year.".

FOREIGN GOVERNMENT FUNDED CONSTRUCTION

SEC. 902. Section 504 of the Act of September 28, 1951 (31 U.S.C. 723), is amended—

(1) by inserting "(1)" after "in connection with"; and

(2) by striking out the period at the end and inserting in lieu thereof ", and (2) construction management of those projects funded by foreign governments directly or through international organizations for which United States forces are the sole or primary user.".

CONSTRUCTION AUTHORITY UNDER A DECLARATION OF WAR OR NATIONAL EMERGENCY

SEC. 903. (a) Chapter 159 of title 10, United States Code, is amended by adding at the end thereof the following new section:

"§ 2689. CONSTRUCTION AUTHORITY IN THE EVENT OF A DECLARATION OF WAR OR NATIONAL EMERGENCY

"(a) In the event of a declaration of war by the Congress or the declaration by the President of a national emergency in accordance with the National Emergencies Act (Public Law 94-412; 90 Stat. 1255) requiring use of the Armed Forces, the Secretary of Defense is authorized, without regard to any other provisions of law, to undertake military construction necessary to support such use within the total amount of funds that have been appropriated for military construction, including funds appropriated for family housing, that have not been obligated.

"(b) Authority under subsection (a) includes authority for (1) acquisition of real estate and interests in land (including temporary interests) by lease, purchase, gift, exchange of government-owned land, or otherwise, (2) surveys and site preparation, (3) acquisition, lease, conversion, and rehabilitation of permanent or temporary facilities, (4) appurtenances, supporting facilities, and utilities incident to such construction, (5) acquisition of and installation of equipment integral to the construction, and (6) planning, supervision, administration, and overhead incident to such construction.

"(c) Whenever a decision to undertake military construction authorized by this section is made, the Secretary of Defense shall notify the Committees on Armed Services and Approriations of the Senate and the House of Representatives of the decision and the estimated cost of such construction, including the cost of real estate actions pertaining to the construction.".

(b) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"2689. Construction authority in the event of a declaration of war or national emergency.".

LAND CONVEYANCE, CECIL COUNTY, MARYLAND

SEC. 904. (a) The Federal property constituting the former Naval Training Center, Bainbridge, Cecil County, Maryland, is hereby declared to be surplus property within the meaning of section 3(g) of the Federal Property and Administrative Services Act of 1949, and the Administrator of General Services is authorized to dispose of that property under such Act.

(b)(1) Proceeds from the disposition of property under this section may be used by the Administrator to discharge any lien, encumbrance, contract claim, or other charge on or related to the property.

(2) The Secretary of the Navy, after consultation with the Administrator, may determine the form and amount of any compromise or settlement of any claim against the United States with respect to the water agreement dated March 24, 1943, between the United States and the town of Port Deposit, Maryland.

(c) The exact acreages and legal descriptions of the property declared to be excess property by subsection (a) shall be determined by surveys that are satisfactory to the Secretary of the Navy.

IMPACT PLANNING ASSISTANCE FOR AREAS AFFECTED BY THE MX WEAPON SYSTEM AND THE EAST COAST TRIDENT BASE

SEC. 905. Section 801 of the Military Construction Authorization Act, 1981 (94 Stat. 1775), is amended by striking out "During fiscal year 1981" and all that follows through the colon and inserting in lieu thereof the following: "The Secretary of Defense may use funds appropriated for fiscal year 1981 for planning and design purposes to provide community planning assistance, by grant or otherwise, as follows:".

Mr. BRINKLEY (during the reading). Mr. Chairman, I ask unanimous consent that title IX be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

AMENDMENT OFFERED BY MR. BONIOR OF MICHIGAN

Mr. BONIOR of Michigan. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BONIOR of Michigan: At the end of the bill, add the following new section:

REPEAL OF AUTHORIZATION FOR CONSTRUCTION OF BINARY NERVE GAS PRODUCTION FACILITIES

SEC. 906 Notwithstanding section 705(a), the authorization for military public works to be accomplished by the Secretary of the Army at Pine Bluff Arsenal, Arkansas, contained in title I of the Military Construction Authorization Act, 1981 (94 Stat. 1750), and the authorization of appropriations therefor, are repealed as of the date of the enactment of this Act. If appropriated funds have previously been obligated for construction contracts for such military public works, such contracts shall be cancelled and the contractors involved shall be paid the cancellation liability of the United States under such contracts.

□ 1600

(By unanimous consent Mr. BONIOR of Michigan was allowed to proceed for 2 additional minutes.)

The CHAIRMAN. The gentleman from Michigan (Mr. BONIOR) is recognized for 7 minutes.

Mr. BONIOR of Michigan. Mr. Chairman, first of all, I would like to say that I have a great deal of respect for Chairman BRINKLEY. Although we may disagee on this particular issue, I think that his is a very difficult assignment and yet he has done an admirable job in shaping and guiding the legislation before us today.

BINARY NERVE GAS STATEMENT

Mr. Chairman, my amendment is straightforward. It would deauthorize the construction of the Army's binary nerve gas facility at Pine Bluff, Ark. That project was authorized last year through this bill for $3.15 million. At this point, no contracts have been let, no construction begun, no funds expended.

Mr. Chairman, in my opinion, the arguments—economic, military, and moral—all lead to the conclusion that this weapon should not be produced. Propelling its acceptance is the unjustified militaristic hysteria which seems to have dominated the Congress following the international events of the past year and a half. The panicked reaction of the U.S. Government does not befit a great nation, the production of this weapon does not befit a civilized one.

Estimates of the total eventual cost of this program range up to $4 billion. Yet, Defense Department officials admit that unless totally caught by surprise, the defensive equipment of United States and Soviet troops would effectively neutralize this weapon. What is being sought, then, is $4 billion for a weapon without a mission, the justification being that mystical catch-phrase oft-repeated and oft-accepted: "the Russians have it."

Even in a year when the Defense Department is being allowed "to run away with the store," our defense expenditures should be made to increase our security, not to mimic Soviet behavior. What we need is the best defense, not merely the most expensive.

In the next few minutes, Members will see all the arguments in favor of production march before them.

You will hear that Soviet stocks are greater than ours. The fact of the matter is that we have no reliable estimates of the size of Soviet stocks and the former Secretary of Defense has stated that our stocks are a credible deterrent.

You will hear that the Soviets are moving forward with their nerve gas program. In fact, we have no evidence that the Soviets have increased their stocks since 1969. They do not have binary capability. What they have done is what we should be doing here today: Improving defensive equipment. Good military planners will not waste resources on weapons they are reasonably certain will present no military advantage.

You will hear that our stocks are deteriorating. What you probably will not hear are the words of a 1977 GAO report which stated that the "serviceability of our stocks may have been greatly understated."

You will hear that this is not a decision to produce. Do we really believe that we will spend scores of millions to build a facility with no intention to use it?

You will hear that the Soviets have used lethal gas in Afghanistan. There is no definitive proof of this and the Defense Intelligence Agency and the Central Intelligence Agency have said so.

You will hear that the newer chemicals are safer. In relative terms, they undoubtedly are. The new chemicals, however, are not harmless. They still contain toxic materials. Some will say not harmfully toxic, that is what they said about agent orange. It also seems incongruous, at a time when serious bilateral and multilateral negotiations are taking place to limit this weapon, that the United States is committing itself to a new generation of them.

You will hear that we should follow the committee's lead on this issue. However, despite the pleas of several Members last year, we are still without distinct and thorough hearings on what will eventually be a very costly program for one of the most devastating weapons known. The last full set of House chemical weapons hearings were held in 1975. I think it more than coincidence that that was the same year we finally became a party to the Geneva Protocol on Chemical and Biological Warfare of 1925 and the Congress enacted additional restraints on the production of chemical weapons.

As I read the floor debate from the 96th Congress, I was stunned to hear proponents of this program decrying the emotional nature of the debate. When parliamentary bodies are asked to leave emotions aside to create a weapon with such pernicious effects on the human body, when we are asked to be dispassionate about the specter of large populations of civilians—not military—convulsing in uncontrollable vomiting and diarrhea, blinded and ultimately strangled by a weapon we vote to create, then the ship of civilization is lost.

In a year when the Congress faces difficult questions on funding priorities, we have to ask ourselves whether this weapon will create more security for Americans than some of the social programs we have been asked to cut: social security and other programs for our elderly, food stamps, educational loans, and so forth.

For those of my colleagues who assert that it will, I ask that you further consider whether a costly weapon which offers no military advantage provides more security than improved chemical defense equipment, the renovation of some of our naval vessels, adequate pay for people in our armed services.

The logic that we must produce this weapon so that we will never have to use it is sophistry. The way to assure that it will never be used is to be sure that it is never produced.

To be strong is not to be unmindful of the responsibility of our strength. This is not security, it is madness, and as Mrs. FENWICK said in debate last year, it is an idea that is unworthy of this country. I urge my colleagues to turn back from our present course, to assert your desire for a negotiated ban on this weapon, to pass this amendment.

Mr. WHITEHURST. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, honest men can disagree. I listened with a great deal of interest to what the gentleman from Michigan (Mr. BONIOR) has just had to say. I, too, feel terrible about the prospect of the United States undertaking a program to develop binary gas. But I would like to answer the gentleman's remarks in this way: Three years ago, in 1978, I was with a group from the Armed Services Committee that had the opportunity to visit the Soviet Union. On that occasion in Moscow we had a rather remarkable experience. We spent one entire afternoon with Marshal Ogarkov, the chairman of the Soviet general staff, and the Deputy Foreign Minister Kornienko. We had what I would call a frank and full discussion.

In the opportunity that I had to ask questions I raised this question with Marshal Ogarkov. I said, "We are bothered by the developments that you have undertaken in the development of chemical agents. We know, for example, that you have 100,000 troops dedicated to chemical warfare."

I said, "Marshal Ogarkov, we have chemical stocks of a sort in Europe but we believe they do not begin to approach yours." So I said to him, "How do you feel about entering into negotiations with us to put a ban on chemical weapons?"

The Marshal's answer was rather interesting. "Well," he said, "Mr. Whitehurst," through his interpreter, "we are already in negotiations to do this. So we expect that there will be results from those negotiations, either in Helsinki or in Geneva."

That was 3 years ago, and if there has been any progress toward reaching an agreement between the United States and the Soviet Union on balancing chemical agents, I have not heard about it.

I submit to my colleagues that they are not going to get any progress until the United States starts to do something that gets the Russians' attention. A couple of years ago I had the opportunity to be with the old NATO Subcommittee, the one that the Readiness Subcommittee has grown out of, to go to Europe, talk to our military commanders. I remember asking a question of the commander of the Air Force base at Ramstein, which happens to be the largest Air Force base we have in Europe.

I said, "General, what is the greatest fear that you have for the security of this base?" His answer was, "An attack by SCUD missiles with chemical agents in the warheads; that is what I fear the most."

The gentleman has said in his remarks that if we go forward with this, if we build this system, we are certain to use it. I submit that is not true, and I submit on the basis of history that it is not true. In World War II both sides

had copious stocks of gas of one kind or another. The principal reason, if one talks to the Germans—after the war they said, "We did not use our stocks because we were afraid of what the Allies had."

Hitler himself had been gassed in the First World War. He knew personally what it was like, and, although they had these tremendous stocks, they did not use them; they refrained from using them because of that.

There are two things that we need to do this afternoon besides kill this amendment. First is to realize that there is not going to be any agreement with the Russians until we get off dead center and get moving with this program. Anytime we can get that agreement, I say fine, let us stop right there.

No. 2 is this: It is not enough to say we have equipped our soldiers with protective clothing. That is not going to stop the Russians. That is not going to protect the Ramstein Air Force Base or military facilities in central Europe where our allies are. The only thing that is going to prevent it is the presence and the known presence of American chemical agents of a highly lethal nature.

One last item, and no one should forget this because perhaps this is the most important point of all.

The CHAIRMAN. The time of the gentleman from Virginia (Mr. WHITEHURST) has expired.

(By unanimous consent Mr. WHITEHURST was allowed to proceed for 1 additional minute.)

Mr. WHITEHURST. Mr. Chairman, if the balloon goes up, and God forbid that should happen, and the Soviets decide to use chemical agents, and we find ourselves militarily in the position where we are going to be terribly handicapped because they have done that, the only other recourse the United States has is a nuclear one. Who wants in this Chamber to lower the nuclear threshold? No one. I certainly do not.

So I say to my colleagues if we kill this program, if we withdraw support from it, what we are doing most assuredly is lowering that threshold and raising ever higher the spectre of a nuclear war.

I yield back the balance of my time.

Mr. ANTHONY. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I would like to respond to the gentleman from Michigan and others. In their comments they raise a number of points that need to be clarified.

First, it is stated, without qualification, that the two binary chemical components are toxic in themselves. This is correct, to a degree. Everything we have in our world is, to a degree, toxic. Let me provide you with a few facts about the two components of the binary munition in question, the 155-millimeter artillery projectile. The first component is alcohol, and we all know alcohol can be toxic, but when we compare the alcohol component of the binary with actual nerve agent and other compounds, we can better understand Mr. BONIOR'S of Michigan statement on toxicity. Let me explain. The isopropyl alcohol, used in the production of isopropyl alcohol/amine, is 7,000 times less toxic than nerve agent GB. The alcohol binary component, isopropyl alcohol/amine, which will be manufactured by industry, is 53,000 times less toxic than nerve agent GB. In a more understanding comparison, ethyl alcohol, which is that spirit which is taken internally by many here in this Chamber and throughout our country, is 15 times more toxic when inhaled than the binary alcohol component.

The second component, difluoro, is more toxic than the first, but we are still talking about a chemical compound that is 3,500 times less toxic than the nerve agent itself. Gentlemen, difluoro is less toxic than tear gas used by our police forces. I submit, therefore, the production of binary chemical munitions will not only provide a modernized stockpile of chemical weapons, but will be extremely safer in production, transportation, storage, and finally handling by our artillery troops.

Next, it is suggested that no European allied country has agreed to permit the forward storage of binary chemical munitions on their soil. We are concerned with the building of a facility which will permit us, the United States, to be prepared to produce chemical munitions should the President notify the Congress of the need for production of chemical weapons.

The construction of the binary munitions facility has not been a secret. Its potential has been known by our allies since the positive action taken by the last Congress in authorizing and appropriating the necessary construction funds. I am further assured that our allies are fully aware of the current request which we approved in the fiscal year 1981 supplemental request for $20 million to provide equipment for the plant. To date, I have been informed by both the Departments of State and Defense that the allies have expressed no concern with our actions. In fact, our allies consider the current chemical warfare issue an internal national security problem, and recognize that the proper time for their views to be considered is when and if there is a decision by the United States to increase its forward deployed quantities of chemical munitions.

Mr. Chairman, it is not difficult to understand our allies' attitudes on this issue. They are, after all, facing the same serious threat. The imbalance in chemical warfare capabilities which necessitates the need for modernizing our stockpile is a risk which they equally share.

Further, the silence of our allies should be interpreted as an indication that there is a serious concern for the chemical threat in Europe, and they are waiting for the United States to exercise its position of leadership. Mr. Chairman, we must not abandon the leadership responsibility we have within NATO. We must convey to our allies that the responsibility for deterring chemical warfare is the paramount issue, and that the United States is ready to act responsively and decisively.

It is suggested that the House has not conducted distinct and thorough hearings on this matter since 1975. I must differ with my distinguished colleague because I know that the 96th Congress, as well as this Congress, has, in fact, had a number of hearings on this subject. There were extensive floor debates in both the House and Senate last year and in the Senate this year, as well as numerous closed hearings in both Houses—necessarily closed because of the classification and national security implications of the chemical warfare threat and the poor U.S. posture—all of which thoroughly discussed the issue at hand. I must differ, therefore, with the statement that the issue has only received passing reference in the Congress. I believe the Congress has acted, and is acting most responsibly.

I must point out that war has more of a catastrophic potential from the use of nuclear weapons—a position we could be forced into if we have no credible chemical deterrent/retaliatory capability upon which to rely.

My dear colleagues, if deterrence fails, we must have a flexible response option, and this means chemical weapons with which to retaliate if it becomes necessary. A strong chemical defense only posture will not deter nor allow us to overcome the advantages gained by Soviet-Warsaw Pact use of chemical weapons without our having to resort to nuclear weapons.

It is suggested that the binary facility should not be built because of the current bilateral negotiations between the U.S.S.R. and the United States to achieve a ban on the production and use of chemical warfare munitions and agents. I question the premise that delay of our binary stockpile modernization program would aid in these negotiations.

Mr. Chairman, first I would like to clarify one point. We ceased producing nerve gas in 1969 at the direction of the then Deputy Secretary of Defense, the Honorable David Packard, and that, Mr. Chairman, was because we were looking at new technology—the binary munition.

The negotiations which have been referred to have not been as productive as many believe, or want to believe. Since the negotiations began in 1977, the United States has attempted to achieve a comprehensive arms control agreement. The goal in these negotiations is a joint U.S.-U.S.S.R. proposal to the Committee on Disarmament, which would then negotiate a multilateral chemical arms control treaty. Bilateral negotiations have met with only limited success. Disagreement continues to exist in verification, declaration of stockpiles and facilities, and entry-into-force. It is unlikely that a joint proposal will be reached in the near term. The Defense Science Board summer study, reviewing the overall chemical program, concluded that there were only poor prospects for achieving an acceptable chemical warfare treaty.

To negotiate, one must be able to bargain from a position of strength. I submit to this Chamber that we do not have this luxury. If we continue our course, then the effect will assuredly be unilateral disarmament by the late 1980's. In view of this, it becomes readily apparent that the Soviets would have no need to enter into an agreement. However, to produce binary weapons could be the necessary ingredient that we need to get these talks moving.

In a recent letter to the chairman of the Senate Armed Services Committee, Senator TOWER, the Secretary of State, Mr. Haig, stated:

The Administration considers it vital that the United States maintain the credibility of its chemical weapons deterrent. Since no steps have been taken since 1969 to ensure the continuing effectiveness of this deterrent, it is now in serious danger of deteriorating and of losing its credibility. Faced with this urgent need, we think it important to take advantage of the significant safety and environmental advantages afforded by binary weapons.

The Administration's decision does not represent a new policy departure in the chemical weapons area, nor a decision to place greater emphasis upon chemical weapons in our overall national security policy. Rather, it represents a necessary step in maintaining the effectiveness of existing United States policy of no first use of chemical weapons, and the maintenance of a limited (but effective) retaliatory capability.

And lastly, a few words on the Soviet capability. The question is raised about the activities of the Soviet Union over the past years. Let me say that even though the information that I have seen is classified, and what I am about to say is unclassified, the Soviets have not been dormant. There is shocking proof of extensive research efforts and improvement in production capability. Soviet forces are continually upgraded with new, modern, and sophisticated equipment that will permit them to operate in a toxic environment for extended periods. I personally believe the evidence of their reported use of chemicals in Afghanistan supports their doctrine of using chemicals to achieve their goals, and irrespective of their obligation under treaty, international law, or any concern for humanity.

Mr. Chairman, it is suggested that we will be authorizing the killing of innocent civilians, and that the overwhelming majority of victims will then be unprotected civilians.

Let me say that if the Soviets or other states are not deterred from initiating chemical warfare, then unnecessary loss of civilian life, as is suggested, will most certainly occur from chemical weapons, as well as from other, more catastrophic weapons which may have to be relied on to try and negate the significant advantages the Soviets will have gained from using chemical weapons. If anything, this argument is strong rationale for developing a credible chemical deterrent capability rather than spurning one.

It has been said before, and I will say it again, that defense is not enough—any football coach will tell you that. The severe combat degradation and unit ineffectiveness caused by the use of chemical defensive equipment is more than enough in itself to cause an enemy to use chemical weapons. Just think what our capability would be if chemical weapons were used against our forces, and our enemy was not forced to the same degraded posture.

Gentlemen, if the Soviets employed chemicals today, NATO could suffer a decisive defeat if it did not exercise its nuclear option. And in a period of nuclear parity, or possibly even inferiority, the nuclear option is not the deterrent of 10 to 20 years ago.

Mr. Chairman, it is also suggested that the binary modernization program will cost $4 billion, and our tax money would be better spent on defense. First of all, to my knowledge the estimated cost of developing a credible deterrent/retaliatory capability by binary modernization is about $2 billion at the very most. The $4 billion mentioned covers costs over the next 20 years, and includes $2 billion or more for demilitarization of the current aging and obsolescent stockpile—the very reason why modernization is required. This demilitarization cost is given whether we modernize or not.

The comment that chemical weapons have no military utility if we have protective gear is simply wrong. The inability for over 100 years to conclude an effective prohibition of chemical weapons attests to the significance of chemical warfare. The Soviets know the significance of chemical warfare, and they are not going to give up their capability when they are the superior. The point has already been well made that while defensive or protective equipment is necessary for survival, it will not, in itself, deter chemical attack; the required chemical protective clothing and equipment degrade a fighting force. Is the cost of one aircraft carrier, or even if it were more, worth the possibility of losing a war in Europe or being forced to resort to nuclear weapons? I think not.

And finally, Mr. Chairman, I submit that if the Soviets are not deterred from initiating chemical warfare, and if NATO allies continue to take little or no action to protect the civilian population, large and unnecessary loss of civilian life will certainly occur. Mr. Chairman, our efforts here today seek to protect the civilian populace of Europe by development of a production facility which will either cause the Soviets to negotiate with reason, or allow the United States to acquire a credible deterrent. To take the necessary action to deter chemical warfare cannot be either inhumane or immoral. To do nothing any longer is assuredly both.

Mr. HOPKINS. Mr. Chairman, I move to strike the requisite number of words. I intend to vote for the Bonior amendment to the military construction bill, even though I believe binary capabilities are needed and overdue, and certainly a great improvement over our current system.

In brief, I believe a binary capability would give us a creditable deterrent against what I believe is a very serious Soviet-Warsaw Pact threat. In our current state of preparedness, our deterrent capabilities are actually regressing as our older chemical weapons break down, and binary to a very large extent removes the storage problems we are experiencing today with our older chemical weapons. It is exactly this problem to which I wish to speak today.

We have not produced any chemical or nerve agents in the United States since 1969, and those we produced prior to that time are already mixed, lethal, toxic agents. Naturally, we have to store those agents somewhere, and as they get older, they break down. They leak and they create hazardous conditions.

As we move forward on binary capabilities, we must not forget the problems that we have already created—a problem we are ignoring, somehow hoping it is just going to go away.

Let me tell you about the extent of the problem.

Our stockpile of chemical weapons is stored at nine locations throughout the country. A good portion of these agents are in weapons that are obsolete. Some of these weapons are leaking. Fortunately, this is a very small percentage of the total stockpile, but obviously they are no good to the military and they create a serious health hazard.

Finally, after a period of time, the agents themselves break down and are no good. In other words, pretty soon we are going to have to dispose of our entire stockpile.

We have the technology to demilitarize this aging chemical stockpile. The problem is we do not know how to do it efficiently.

The Army, which has executive branch responsibility for this program, asked for $12 million in the fiscal year 1982 budget in R. & D. funds to further understand and expand our technology to improve this demilitarization process. I was distressed to find that the R. & D. Subcommittee on Armed Services cut these funds out.

I can only view this decision as burying our heads in the sand, limping along with our current inadequate demilitarization program, and praying that we do not have an accident.

I have been told that even if we fully understood the best technical process for destroying our entire supply of chemical agents in stockpile, and if we had the money required, it would take 10 years to do this job. That is 10 years of unnecessarily provoking fate and 10 years of paying to store these agents at nine different locations throughout the country. I wish I could give you today a dollar figure for the cost of this storage, but I think you get the idea if you appreciate that it takes approximately $25,000 annually to pay and support just one guard at one facility. But, of course, we have nine facilities and obviously more than one guard.

I am personally inclined to feel that we could, perhaps, for example, find one isolated location and store all our obsolete chemical agents there instead of spreading them all over the country.

I also think we should devote the necessary R. & D. funds to safely and rapidly detoxify these older munitions.

I will vote shortly in favor of the Bonior amendment as a symbolic vote against our unwillingness to come to grips with this potentially explosive problem in this country.

Mr. Chairman, I yield back the balance of my time.

Mr. SKELTON. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I strongly oppose this amendment, this amendment which will attempt to nullify the work of the previous Congress in initiating a program that would be the first step toward providing a creditable deterrent against the Soviet Union's chemical warfare capability.

Mr. Chairman, let me point out that history has shown that the only real defense against chemical warfare is an offense of such weapons so formidable that it deters the enemy from using theirs.

As many of my colleagues will recall, this issue was before the 96th Congress last year. Both the House and Senate on their own initiatives added $3.15 million to both versions of the military construction authorization and appropriations bills to provide the construction necessary to house the equipment that could eventually produce the 15-mm artillery round filled with one element of the binary agent. It is my understanding that OMB apportioned these funds last March and that the Army plans to award a construction contract this September.

Mr. Chairman, may I further remind my colleagues that during the previous session, an amendment offered to deny funds in the Defense appropriation bill to procure production equipment for the binary facility was defeated by a vote of 276 to 125.

Mr. Chairman, the House of Representatives is on record on this issue. We must allow the Army to proceed with construction. I urge the defeat of this amendment.

Mr. MONTGOMERY. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, as the ranking member on this subcommittee, I had the privilege of attending a number of the hearings pertaining to chemical warfare. We really do not have any choice but to start building back our chemical warfare capabilities. There is no question about it. The Soviets are way out in front of us. If we really believe in a strong defense, we are going to have to take steps in improving both our defensive and offensive chemical warfare capabilities. As the gentleman from Kentucky (Mr. HOPKINS) said, we have not built any chemical warfare munitions since 1969. The chemicals we have are old. They are dangerous, and they should be done away with. So If you want a strong defense, certainly this amendment should be defeated.

Mr. BONIOR. Mr. Chairman, will the gentleman yield?

Mr. MONTGOMERY. I will be glad to yield to the gentleman from Michigan.

Mr. BONIOR. I thank my friend for yielding. One of the main concerns that I have and that I tried to point out in my presentation when addressing the amendment is the fact that we have not had since 1975 a set of hearings in the House on this most important and crucial question. We are talking about $4 billion which also includes, of course, as the gentleman from Arkansas (Mr. ANTHONY) pointed out, the detoxification of existing stocks. But we are talking about a very expensive program. My friend, the gentleman from Mississippi (Mr. MONTGOMERY) has indicated that he attended hearings. What hearings has he attended that have led to the conclusions which he has just made?

Mr. MONTGOMERY. I have been involved in some briefings. I will be glad to invite the gentleman the next time we have the Department of Defense, the DIA over, and the CIA over. The gentleman certainly is welcome as a Member of Congress to come to some of these briefings. We were shown pictures. It is very frightening what the Soviets have done. I wish I could tell the gentleman more, but it is classified, and I think I had better not say anything further.

Mr. BRINKLEY. Mr. Chairman, will the gentleman yield?

Mr. MONTGOMERY. I yield to the gentleman from Georgia.

Mr. BRINKLEY. I thank the gentleman for yielding. It is my understanding that the R. & D. Subcommittee and the Committee on Armed Services has just this year conducted hearings on the overall issue, not with reference to the facilities at all. Those are probably the ones the gentleman has attended.

Mr. MONTGOMERY. That is correct. I thank the gentleman for helping me.

□ 1630

Mrs. FENWICK. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Every moment is a moment of decision. We have come to another one now. Yes, I think it is true that the Soviet Union is using gas. It has not been proved in Afghanistan, but I have seen those who lived in the villages of Laos and have seen people die of the yellow, red, or white gas that is dropped in canisters from the Soviet planes.

I think it is significant that so far, in late years now, these filthy chemicals are use against the poorest and most helpless people, those who have no defense against the lethal planes that deliver the canisters, just country people, poor people, helpless on the ground.

Yes, the Soviet Union is apparently armed and prepared to sink to this level of frightfulness, but I really do not think the United States is. I do not think this country intends that we should conduct this kind of warfare. I have voted for every defense bill but one since I have been in this House. I think the defense of our country is the first duty of Congress, because nobody else can provide for it, but not like this. It is indeed not worthy of our Nation that we should even contemplate spending such huge sums of money to endanger people's lives in this particular way.

I think it is time to consider what we are doing on this Earth? What kind of

a country do we want to be? What does this country stand for?

If the Soviet Union is going to sink to those despicable methods, surely the United States is not.

Mr. BRINKLEY. Mr. Chairman, will the gentlewoman yield?

Mrs. FENWICK. Of course I yield to the gentleman.

Mr. BRINKLEY. I thank the gentlewoman for yielding.

Of course, the gentlewoman is right as to the nature and consequences of this weapon. Surely she is not suggesting that we render ourselves and our helpless men, women, and children impotent and that we be victimized, that we not have this as a deterrent to this aggressive nation that is proceeding.

Mrs. FENWICK. If the gentleman would yield, I do not think the way to handle that is to spend $2 billion—if $2 billion is the cost when you subtract what we have to spend to care for the old gas. No. I think the strongest thing we could do would be to say to the world here today, this House is not prepared for this kind of frightfulness in warfare. I think we should say it to all the countries. I think we should shame the Soviet Union. We should not descend to their level. If this is what they see as the way in which great nations conduct their affairs, it is not the way the United States sees it.

Mr. LEACH of Iowa. Mr. Chairman, will the gentlewoman yield?

Mrs. FENWICK. I yield to the gentleman from Iowa.

Mr. LEACH of Iowa. I thank the gentlewoman for yielding.

Mr. Chairman, I would just make several points that I think are very relevant to this discussion.

There are basically three weapons of mass destruction that exist in the 20th century. One is biological, one is chemical, and one is nuclear. Biological has been dealt with in an arms control convention. In fact, part of the Biological Weapons Convention of 1972 is a commitment on the part of the United States of America to move expeditiously toward a prohibition of the development, production, and stockpiling of chemical weapons.

This particular effort in this House to go forward with a new chemical weapons facility is in the opposite direction of a commitment of the U.S. Government.

Second, as far as the defense of this country is concerned, it should be stressed that once you have one weapon of mass destruction, all other weapons become less significant. Beyond that, it should be stressed that chemical weapons are cheap to develop—even though some may cost several hundreds of millions of dollars—in comparison with nuclear weapons.

If we fund this new chemical weapon facility, we will, in effect, be saying to the rest of the world: yes, chemical weapons are legitimate; yes, you countries that are poorer than we must for the sake of your security consider developing chemical weapons—something I do not think we want to do.

Finally, it should be stressed that the perversion of science that is involved in the exploitation of chemical weapons represents one of the great tragedies of the 20th century. Arms control rather than an arms race should be the goal of this country. It is a more moral as well as a more effective approach to take.

Finally, let me just stress that it is chemical weapons that have been used in the last half decade not nuclear, not biological. It is therefore imperative that this administration give the highest priority to honoring the commitment that this Government itself made in the direction of restraining the proliferation of chemical weapons. That would be a far better way to proceed than going forth with another generation of chemical weapons.

The CHAIRMAN. The time of the gentlewoman from New Jersey (Mrs. FENWICK) has expired.

Mr. BONIOR of Michigan. Mr. Chairman, I ask unanimous consent that the gentlewoman be allowed to proceed for 5 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan (Mr. BONIOR)?

Mr. BRINKLEY. Mr. Chairman, reserving the right to object—and I shall not—I would indicate to the Members of the body we are making excellent time. Under the 5:30 time constraint, I think we will make our deadline very well.

If we could make points that we want to make and proceed with dispatch, I know all of those here would appreciate it, and our other Members would, too.

Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan (Mr. BONIOR)?

There was no objection.

Mrs. FENWICK. I yield briefly to the gentlewoman from New Jersey (Mrs. ROUKEMA).

Mrs. ROUKEMA. I thank the gentlewoman for yielding.

Mr. Chairman, when I sought election to the Congress in 1980, I endorsed the need for a stronger national defense because of my belief that our defense capabilities have so deteriorated that we could not effectively deter international aggression and defend our vital national interests. And I support the administration's defense proposals to move swiftly and vigorously to reverse this dangerous trend.

I believe that those of us who campaigned on this issue have a particular obligation to review, with the greatest care, each and every defense proposal. I am deeply concerned that today we are in danger of approving funds for construction of this nerve gas facility without understanding the implications and consequences of such an action.

I am not an expert on defense spending, nor am I an expert on chemical warfare. What I have attempted to do, therefore, is go back over the written record on this issue in an effort to understand the reason for the request and the policy implications, if any.

In 1969, President Nixon asked the Senate to ratify the Geneva Protocol of 1925, which prohibits the first use of chemical warfare weapons. He said:

> I hereby reaffirm that the United States will never be the first country to use chemical weapons to kill. And I have also extended this renunciation to chemical weapons which incapacitate * * *. These steps should go a long way toward outlawing weapons whose use has been repugnant to the conscience of mankind.

In 1974, the House Foreign Affairs Committee report on the ratification of the Geneva Protocol stated clearly that research and development of chemical weapons must be based on how such weapons fit into a broad U.S. national security framework, not merely within the context of an isolated tactical problem—this in reference to the Soviet Union.

In fact, the Foreign Affairs Committee noted that the ability of a target nation to defend itself well against such a chemical warfare attack may, in fact, be more important than the possession of a chemical warfare capability, and that it is possible that the U.S. deterrent chemical warfare stockpile could be interpreted by a suspicious potential enemy as a means of achieving a preemptive first strike. Thus, the potential enemy would engage in similar stockpiling, resulting in an arms race.

The committee recommended the policy of deterrence of chemical warfare based on the idea of retaliation in kind should be reviewed and reevaluated to guarantee that it is the only effective method of achieving the broad national security interests of the United States.

In reviewing subsequent committee reports and last year's debate on this issue, Mr. Chairman, I can find no solid evidence of further extensive analysis and study. The debate in the House last year centered on challenges to this very point.

The conference report we have passed earlier says quite clearly that the committee of conference remains deeply concerned about the many as yet unanswered questions surrounding this effort.

We are taking a significant step toward a major policy change without consideration of those policy questions the Foreign Affairs Committee—to their credit—identified for thorough

study in 1974. I fear that by the construction of this facility at Pine Bluff we are not only deflecting attention and resources away from our primary defense needs, but, more importantly, we are casually accepting a basic new doctrine of defense that would integrate chemical weapons into our tactical planning. If the Bonior amendment fails, the new doctrine of tactical use—as opposed to deterrence—will be initiated with little understanding of the foreign policy, national security, and arms control implications. The conference report states:

> The committee also believes it is imperative that the administration provide an overview of the mission-oriented requirements for the various binary weapons, as well as an arms control impact study of such requirements, before further funding is approved.

The CHAIRMAN. The time of the gentlewoman from New Jersey (Mrs. FENWICK) has again expired.

Mrs. FENWICK. Mr. Chairman, I ask unanimous consent to proceed for 2 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentlewoman from New Jersey?

Mr. HAMMERSCHMIDT. Reserving the right to object, I would hope in floor procedure Members would get their own time and not go through this yielding procedure, as an observation.

Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentlewoman from New Jersey (Mrs. FENWICK)?

There was no objection.

Mrs. ROUKEMA. Mr. Chairman, if the gentlewoman will yield further, this is also coming at a time when our NATO allies are pressuring for resumption of arms talks and have stated objections to the deployment of chemical weapons. The conference report directs the administration to provide a country-by-country report from our NATO allies with respect to their official views on the long-range program.

The record is clear that we have not done any real planning on this issue, as has been suggested on numerous occasions. Yet we are considering taking a major step toward a new chemical weapons policy without the necessary analysis.

As the leader of the free world and as a nation that has prided itself on its historic commitment to humanitarianism, let us look at this issue more closely before we leap into a new policy direction. Let us find a way to say to the world: We can find better ways to be prepared. We need not resort to a weapon that cannot be controlled and will, for the most part, only kill innocent civilians.

By adopting the Bonior amendment, we can insure that America will examine and pursue every possible military and diplomatic alternative to prevent this terrible scourge of warfare from use. As social philosopher Christopher Dawson wrote in 1942, "As soon as men decide that all means are permitted to fight an evil, then their good becomes indistinguishable from the evil that they set out to destroy."

Mrs. FENWICK. I thank my colleague for her remarks.

The CHAIRMAN. The time of the gentlewoman has again expired.

Mr. HAMMERSCHMIDT. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I rise to express my firm opposition to the Bonior amendment deauthorizing construction of the Army's binary nerve gas facility at Pine Bluff, Ark.

As a Representative from the State of Arkansas where this plant is to be located, I have taken to the floor before to discuss our national requirement for a modern chemical weapons production capability. During the last session, this body aired all the issues surrounding this project including: The mounting threat of a Soviet first use of these weapons; the hazardous condition of our chemical deterent; and the lack of any progress in a Soviet-American arms control negotiation regarding chemical warfare. The fact remains that all of the arguments have been made previously, and Congress in its wisdom decided that this Nation must have a capability to produce chemical weaponry by giving approval to this construction project.

Too much time has been allowed to lapse already. The American people must be alerted to the danger we face and complete the first step taken last Congress toward restoring the credibility of our chemical deterrent. As I have pointed out previously, it is time to stop debating this issue and start acting in the best interest of our country. Today, the Soviet Union has the best equipped and trained forces in the world for conducting sustained operations on a chemical battlefield. The Soviet Union considers chemical weapons to be an integral part of modern warfare and one of the most powerful means of destroying their enemies. U.S. Army intelligence analysts believe that the Soviet forces are capable of initiating and sustaining large-scale use of chemical weapons in either a conventional or nuclear conflict.

Soviet chemical warfare specialists and forces are integrated into every level of their military structure, to include a Chemical Directorate within the Ministry of Defense. Each Soviet Army front is supported by a chemical brigade, each combined army or tank army by a chemical battalion, each division by a chemical battalion, and each motorized and tank regiment by a chemical company.

The extent of Soviet training in chemical warfare is unequaled and stresses individual and unit proficiency for exploiting their own offensive chemical operations. Use of diluted chemical agents to provide realism in training has been confirmed. The individual Soviet soldier is well trained in the use of his protective clothing. Extensive exercises are utilized to increase the soldier's psychological preparedness, improve combat proficiency while in protective clothing, and develop confidence in the adequacy of protective clothing and equipment. Decontamination equipment is especially plentiful and can be made available in every tactical operation to reduce or eliminate contamination, thereby preserving combat effectiveness. Similarly, a wide spectrum of combat vehicles have been developed and fielded with an integral overpressure system which affords the personnel a "shirt sleeve" fighting environment. This total system approach for maintaining the combat effectiveness of their forces is complemented by equipment and unit operational capabilities for detecting/warning and rapid reconnaissance of contaminated areas.

Research and development programs within the Soviet Union have been extensive and are continuing in all areas of chemical warfare activities. Protective masks and individual clothing, as well as collective protection systems, chemical agent detector alarms, and personnel and equipment decontamination means are continually being improved. In addition, their research programs to develop new chemical warfare agents and weapon systems, including dual or multiple agent systems, continue unabated. As a result, the Soviet Union could remain the best equipped nation in the world to conduct chemical warfare.

Our current chemical stockpile is totally inadequate and continues to deteriorate. Unless our stockpile is modernized with the safer binary munitions, the result will be almost the same as unilateral disarmament in the chemical arena. The failure of this country to construct and equip a binary production facility would place an undue reliance on conventional forces and would invite the initiation of chemical warfare in any future conflict.

Many of my colleagues believe that the best way to prevent the use of chemical munitions is for the United States to unilaterally disarm in this area, in the hope that the rest of the world, in particular the Soviet Union, will follow our example. Unfortunately, the history of chemical munitions reveals this is a dangerously mistaken viewpoint. Soviet military doctrine calls for employment of nerve gas in event of a war in Europe, and the Soviets have taken extensive steps to pre-

pare its manpower for this type of warfare. We must convey to our allies that the responsibility for deterring chemical warfare is the paramount issue, and that the United States is ready to act responsively and decisively.

It is suggested that we will be authorizing the killing of innocent civilians, and that the overwhelming majority of victims will then be unprotected civilians. Let me say that if the Soviets or other states are not deterred from initiating chemical warfare, then unnecessary loss of civilian life will most certainly occur from chemical weapons, as well as from other, more catastrophic weapons which may have to be relied on to try and negate the significant advantages the Soviets will have gained from using chemical weapons. If anything, this argument is strong rationale for developing a credible chemical deterrent capability rather than rejecting it. The severe combat degradation and unit ineffectiveness caused by the use of chemical defensive equipment is more than enough in itself to cause an enemy to use chemical weapons—just think what our capability would be if chemical weapons were used against our forces, and our enemy was not forced to the same degraded posture.

Chemical agents are employed in war as force multipliers. They cause casualties and they degrade the operational effectiveness of military forces. Casualty effects are most pronounced against unprotected personnel, but we expect casualty rates as high as 10 percent against fully protected soldiers due to equipment failures, improper fitting, and individual errors in the use of protective devices.

Perhaps more importantly, when military units assume a chemical warfare protected posture, they reduce their operational effectiveness by 25 percent or more. Communication becomes more difficult, physical movement becomes more difficult due to the encumbrance of protective clothing, and weapons are harder to sight and align on target because of the interference of the protective mask. In warm climates, heat casualities are a secondary bonus effect of the employment of chemicals.

The contamination of material—trucks, tanks, rations, ammunition—further degrades military operations. Resources must be diverted to decontamination efforts. Delivery of supplies to fighting units must be delayed. Some supplies must be destroyed. Maintenance operations become slower and more difficult.

The ultimate impact of a chemical attack on military operations must be viewed as a composite of some of all of the above factors. In no case will the result be negligible, regardless of the level of protection provided.

A military force that can impose such penalties without fear of retaliation in kind has a substantial advantage in battle. By developing a credible chemical warfare capability of our own, we negate that advantage, introduce a degree of uncertainty, and make the use of the enemy's chemicals less likely. It is this aspect—reducing the likelihood of use of chemicals—that will save the lives of the civilian men, women, and children for whom concern is expressed.

The comment that chemical weapons have no military utility if we have protective gear is simply wrong. The ability for over 100 years to conclude an effective prohibition of chemical weapons attests to the significance of chemical warfare. The Soviets know the significance of chemical warfare, and they are not going to give up their capability when they are superior. The point has already been made again and again that while defensive or protective equipment is necessary for survival, it will not, in itself, deter chemical attack; the required chemical protective clothing and equipment degrade a fighting force. Is the cost of one aircraft carrier, or even if it were more, worth the possibility of losing a war in Europe or being forced to resort to nuclear weapons?

In a recent letter to the chairman of the Senate Armed Services Committee, Senator TOWER, Secretary of State Haig stated:

> The administration considers it vital that the United States maintain the credibility of its chemical weapons deterrent. Since no steps have been taken since 1969 to ensure the continuing effectiveness of this deterrent, it is now in serious danger of deteriorating and of losing its credibility. Faced with this urgent need, we think it is important to take advantage of the significant safety and environment advantages afforded by binary weapons.
>
> The administration's decision does not represent a new policy departure in the chemical weapons area, nor a decision to place greater emphasis upon chemical weapons in our overall national security policy. Rather, it represents a necessary step in maintaining the effectiveness of existing United States policy of no first use of chemical weapons, and the maintenance of a limited, but effective, retaliatory capability.

I personally believe the evidence of the reported use of chemicals in Afghanistan by the Russians supports their chief doctrine of using chemicals to achieve their expansionist goals in the world. Hundreds of refugees fleeing to Pakistan have testified to Soviet gas attacks on defenseless Afghan villages. Therefore, considering the Russian stockpiles, and recent reports of its use, it is essential that the United States begin to rebuild our own stockpiles to serve as a deterrent. Binary munitions are safe to manufacture, handle, and store, and become lethal only when they are fired at an enemy. The sooner we move forward with construction of our Pine Bluff facility the sooner we will be able to assure the American people of our national security.

□ 1645

Mr. KAZEN. Mr. Chairman, will the gentleman yield?

Mr. HAMMERSCHMIDT. I yield to the gentleman from Texas.

Mr. KAZEN. I thank the gentleman for yielding.

I rise to associate myself with the remarks of the gentleman from Arkansas (Mr. HAMMERSCHMIDT). It is true that we have subscribed to the fact that we will never use chemical warfare as a first strike. The Soviet Union has been using chemical warfare and we know it. The gentlewoman from New Jersey has given us some examples in Laos. We have heard that they have used it in Afghanistan. I do not know whether they have or not, but the persistent reports are that they have. If they have done this, there has been no world outcry against their doing it.

Now we know that the only deterrent then, if they should decide to use it in the future against us or against our allies, if they should know that we have the power to retaliate with the same, they are going to be very careful about how they use it or if they use it at all.

We have only used the nuclear power one time or two times when we ended the war. Since then both sides have had it and neither side has used it. I think the same will happen with chemical warfare in the future.

Mr. WOLPE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment offered by my distinguished colleague from the State of Michigan, (Mr. BONIOR).

The development of binary chemical weapons will neither enhance our deterrent force nor provide us with an effective weapon for development in battle situations. Consequently, this amendment offers us an important opportunity to eliminate over $3 million of pointless military spending, and to head off an eventual $4 billion investment.

Neither the United States nor the Soviet Union has increased its stocks of chemical weapons since the late 1960's; in effect, both nations have observed an unofficial moratorium on the expansion of chemical munitions. And to the extent that any chemical deterrent may ever be necessary, our Nation already has over 3 million nerve gas projectiles in its arsenal.

Moreover, should we choose to deploy chemical weapons in military confrontations, we would soon learn that they are an ineffective weapon. Enemy troops, equipped with protec-

tive clothing, would escape the lethal effects of the aerosol clouds released by detonation. Only civilians would be vulnerable to the noxious fumes unleashed into the atmosphere—the civilian death toll would be devastating. And in the midst of all this human destruction, enemy troop movement would continue unimpeded.

A noted defense specialist has commented that our current military strategy is based upon the concept of "more." More weapons, more carriers, more aircraft, more bases, more everything. But "more" is not always better. It is, however, always more expensive. The effort to secure an adequate national defense is one which demands our unwavering support, but military spending that does nothing to render our Nation stronger is wasteful and should be eliminated. We have before us an opportunity to curtail over $3 million of pointless military expense in the short term and $4 billion over the long term. I urge my colleagues to support the Bonior amendment.

Mr. BONIOR of Michigan. Mr. Chairman, will the gentleman yield?

Mr. WOLPE. I yield to the gentleman from Michigan.

Mr. BONIOR of Michigan. I thank my colleague for yielding and commend him on his statement.

Let me answer a few of the criticisms that have been lent by the Members who have spoken against the amendment.

The gentleman from Virginia has indicated to this body that he knows of no progress being made in the discussions with the Soviet Union. I would add that in the session that ended in July both sides agreed to the principle of onsite inspections. I indeed think that is progress.

The gentleman from Arkansas (Mr. ANTHONY) indicated the very innocuous nature of the agents used in this binary chemical system. I have information that says that some of the agents are as powerful as strychnine. I think that lends credence to the argument that we need more hearings on exactly what we are doing in terms of this capability.

Finally, let this debate not end without the point being made that our NATO partners are not in agreement with what we are doing here today. The countries of Denmark, Greece, Iceland, Italy, Luxembourg, Norway, and Turkey have renounced its use. West Germany renounced use and possession in perpetuity but reluctantly allows the United States to stockpile in West Germany. The British have shifted emphasis to defending against the weapon. Secretary of Defense Weinberger has stated that we have not yet even consulted with our NATO allies about the deployment of this very lethal weapon. I think that ought to be part of the record.

When Members vote on this amendment they ought to consider that and the international ramifications of our NATO allies.

I thank the gentleman for yielding.

Mr. BETHUNE. Mr. Chairman, I move to strike the requisite number of words and rise in support of the amendment.

Mr. Chairman, I rise in support of the amendment because last fall, along about September 10, I suppose I was the Member who incited the abbreviated debate that we had on binary gas at that time. While it was abbreviated, it was the best debate that we have had in the last 3 years and lasted a good deal longer than this one appears headed for.

But, at that time, I had the impression that we were bootstrapping on this issue because I am a new Member of Congress, just having come in, in the 96th Congress, and I tried as best I could to get up to speed on this issue because the site we are discussing is only about 30 miles from my district as the crow flies, so I was naturally interested.

I discovered that for the most part Members in this body really do not know anything about this issue. In fact, I would submit that the majority of the Members here could not define for you what binary gas is, have not the faintest idea how the relationship is with our NATO allies, as the gentleman has indicated.

While there is allegation that we have had briefings and hearings on the subject out here in the Congress, I took the time last September to look up one of the hearings and it consists of four transcribed pages and that was all. I do not know what happened out in the hearing on R. & D. that the gentleman from Mississippi mentioned, but I doubt seriously if it was a comprehensive hearing which treated all of the very sophisticated issues that come up on this subject.

So the gentlewoman from New Jersey was right when she said the last time we treated the issue we polarized around the point, that we did not have a good in-depth debate and consideration of the point.

So I was troubled at that time as to whether this Congress really knew what it was doing on an issue of this importance. I am still troubled. Some people say that the Soviets have binary gas. Some say they do not have binary gas. Some say we need this for an offensive weapon. Some say we need it for a defensive weapon. Some say we need it for leverage in negotiations.

It is a big issue, much bigger than many Members think. It is much larger and deserves much more attention than we have given it here so far in this Congress. We have had changes in leadership. The gentleman from Michigan mentioned the fact that many of our NATO allies do not support this. We have had a change in leadership in France, in Italy. We have had a change in leadership in this country.

The mix of forces that controls foreign policy has altered substantially just since the last time we discussed it. We are discussing here a policy. The perception around the world is that the United States is not in favor of the use or the production of binary gas because we have not produced any for 10 years.

Now my colleagues may split hairs and say go back to the wording of the statements that were made 10 years ago and you may discover that we came out at that time against the use of binary gas. But the perception around the world—and that is what is important—is that we do not intend to produce binary gas.

So I would say to my colleagues that we really need to talk about this in more detail than we have. We are 7 years away from the time that any of this new binary gas would come off the production line. There is no rush here. We are being bold enough in this Congress to deal with some tough issues that we have not faced in the past. Why do we not deal with this issue in like fashion? Why do we not bring it up and discuss it as we should in great detail and give the people a chance to communicate with us as to their sentiment?

Finally, I would make this point because one of the best arguments I heard on this floor last September was made by the chairman of the Committee on Foreign Relations, the distinguished gentleman from Wisconsin (Mr. ZABLOCKI). The gentleman raised three questions. He said:

> In sum, Mr. Chairman, adoption of this military construction project in fiscal year 1981: Unnecessarily complicates our present efforts to maintain positive relations with our NATO allies to preserve an effective deterrent to the Soviet threat in Europe; undermines our longstanding commitment to the ban on production and use of lethal chemical warfare through negotiations; and undermines our efforts to reduce the proliferation of arms worldwide . . .

I feel that any committee that brings a bill to this floor has the responsibility to rebut those arguments and to carry the proof.

I do not think the committee has in this instance. Therefore, I urge that Members support the gentleman's amendment, and I think that he is on the right track. I think that we can do a much better, much more responsible job of analyzing a very difficult issue here in the Congress.

Mr. OTTINGER. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I would like to congratulate the gentleman from Michi-

gan (Mr. BONIOR) for his amendment. I carried the burden of this fight on occasions in previous Congresses, at least once successfully, and I think the issues involved are terribly important. I think it is most important that we pass his amendment.

The fact of the matter is that we are talking about the investment of many billions of dollars in a series of weapons the terror of which is almost unparalleled. We are talking about chemical weapons that work on the nervous system, cause paralysis and asphyxiation and yet are of very little military value.

We already have a large stockpile of chemical weapons. The United States has enough chemical weapons stockpiled to kill or maim millions of human beings within an area of thousands of square miles.

Moreover, these chemical weapons can only be used effectively against civilians as the Russian troops are prepared to wear protective clothing. Our European allies have already said they do not want to get involved in this. Not one European country has agreed to allow binary weapons to be pre-positioned on its soil. So this huge expenditure of taxpayers' dollars is largely going to be wasted.

This situation is very much like the strategic mistake we made when we decided to develop and deploy MIRV. It was not long before the Soviets felt compelled to engage in their own MIRV production. Now, once again, we will spur the Russians into similar activity and we are going to leave ourselves less secure than we were before. The Russians are not going to sit still while we produce these binary weapons. They are going to go ahead and increase their own stockpile. We are going to again have a situation where we will have spent billions of dollars and they will have spent billions of dollars and we will be less secure than we are now.

In addition, the technology for producing chemical weapons may be easily acquired by other governments, fringe organizations, and terrorist groups, a most dangerous development indeed.

Lastly, we are still involved in negotiations with the Russians to try and limit use of chemical weapons. I think that that effort ought to be pursued, that it would result in much greater security than anything we could possibly do by producing these weapons. The Pine Bluff facility is a bad investment economically and militarily.

I strongly urge that this amendment be adopted.

Mr. BRINKLEY. Mr. Chairman, I notice there are two Members standing who wish to speak on this amendment.

Mr. Chairman, I ask unanimous consent that debate on this amendment and all amendments thereto conclude in 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. SMITH of New Jersey. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment offered by the gentleman from Michigan to deauthorize construction of the Pine Bluff Binary Chemical Weapons Facility.

Mr. Chairman, I believe we need a strong national defense, but I do not feel that that means we should scrap the 11-year moratorium on production of chemical weapons.

Mr. Chairman, I believe that the estimated $4 billion program for nerve gas production is repugnant and of dubious military usefulness.

From my research on the issue, I am convinced that the majority of victims of chemical warfare would undoubtedly be civilians, since potential adversaries, like the Soviet Army, are fully equipped with protective gear. If chemical weapons are used in a military conflict, then the overwhelming majority of victims will be the men, women, and children on the street—not advancing soldiers. Furthermore, it is my understanding that nerve gas can kill up to 12 miles away—and maim up to 24 miles away, inflicting terrible damage on nearby populations.

The gruesome nature of the weapon is frightening and scary. A few minutes ago, the gentleman from Michigan recounted the effects of nerve gas on the human person.

Nerve gas works on the central nervous system to cause sweating, convulsions, uncontrollable vomiting and diarrhea, dimming of vision, and ultimately, asphyxiation by paralyzing the respiratory system. Even nonlethal exposure will produce neurological and psychiatric disorders.

Mr. Chairman, because the military usefulness of nerve gas is questionable, because it would take its heaviest toll on civilians, I urge support for the Bonior amendment.

□ 1700

The CHAIRMAN. The Chair recognizes the gentleman from Georgia (Mr. BRINKLEY).

Mr. BRINKLEY. Mr. Chairman, in conclusion I rise in opposition to the Bonior amendment.

Mr. Chairman, in response to the gentleman from Arkansas (Mr. BETHUNE) there has been no rush. There has been perhaps delay on this issue. The issue was met, addressed, and decided last year. The statement of the managers is in yesterday's RECORD at page 11357, and it addresses existing authority and existing appropriations thereunder.

In the statement it clearly shows, as the gentlewoman from New Jersey has indicated, that the other body did recede to this body in appropriating some funds, and of course we have voted on that today in the supplemental appropriations bill.

This is a fairly modest beginning. We can make a beginning, and therefore, Mr. Chairman, I ask the Committee of the Whole to vote down the Bonior amendment.

● Mr. WYDEN. Mr. Chairman, I rise today in support of the amendment offered by my friend from Michigan (Mr. BONIOR).

This amendment would deauthorize the construction of the Army's binary nerve gas facility at Pine Bluff, Ark. I fear that unless this amendment is adopted, we will embark upon yet another arms race—an arms race for which there is no justification.

We hear the familiar refrain that. "The Soviets are increasing their nerve gas arsenal, so we better do the same." Mr. Chairman, that argument is as valid as the argument that since they have 5,000 statues of Lenin, we should build 5,000 statues of Jefferson. I ask my colleagues, will the production of artillery shells containing binary nerve gas make us any safer? Will we sleep any better at night? Will our children live in a more secure world?

Their increased manufacture and deployment will not provide a ligitimate deterrent to the Warsaw Pact countries. In the current climate of strained relations between ourselves and the Soviet Union, the production of binary nerve gas sends precisely the wrong message to our adversaries.

We must learn from history. Nerve gas has been used effectively only on defenseless, often civilian populations. Intelligence estimates tell us that the Warsaw Pact troops in Eastern Europe are equipped with sufficient protective gear to endure an attack of chemical weapons. In addition, our Armed Forces are equipped with similar protective gear.

With this in mind, we should realize that debate over chemical weapons does not center on their use in a superpower conflict. A weapon is not effective if both sides are protected from it. The only effective use of chemical weapons is against a nation which lacks protection.

If we manufacture these artillery shells, the so-called "Big-eyes," we are preparing a weapon for use in the Third World. For that is the only theater in the world where they would be effective—since the troops and guerrillas in these theaters seldom have sufficient protection. These are the kinds of fundamental changes in foreign policy we should be considering soberly and carefully.

Apparently, the Soviets are prepared to use chemical weapons in warfare, as they may have used it on Afghans and supplied it to the Vietnamese.

It is clear, that the only significant casualties of chemical warfare will be the innocent civilian population. I ask my colleagues in the Chamber today, "Can we honestly justify the manufacture of a sophisticated weapon, whose effectiveness is aimed not at an aggressor, but at civilian populations?" Not at soldiers but at defenseless men, women, and children.

Just a few weeks ago, we heard that the 1980's had proved wrong the idea that we can solve problems simply by throwing money at them. Mr. Chairman, if you can not solve social problems by throwing money at them, how can you make the world safer by carelessly throwing money at the Pentagon.

I do not believe we should manufacture a weapon whose real potential is for export to other countries.

We have already stockpiled millions of this type of shell. In fact, a significant amount of nerve gas stockpiles call my State of Oregon their home. There is nerve gas stored in Umatilla, Oreg., and I have never met an Oregonian who feels safer or less threatened because we have our share of nerve gas in our State.

As we engage in the debate, let us make no mistake about what we do by approving funds for this facility. We are talking about the manufacture of a weapon which kills in an extremely gruesome and evil way.

Death by nerve gas does not come quickly or painlessly. Rather, because the central nervous system is attacked, intense sweating, convulsions, uncontrollable vomiting, diarrhea, dimming of vision, and final asphyxia following paralysis of the respiratory system takes place. According to the dose, this torture may last from several minutes to several hours.

Oh, yes, we are told that because the artillery shells would contain two separate compartments, the chemicals are not toxic until detonation. But these chemicals, stored separately, are certainly not harmless—one of the chemicals, DF, is as toxic as strychnine.

I for one, cannot cast a vote to build this kind of weapon, and I urge my colleagues to support this amendment.●

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan (Mr. BONIOR).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. BONIOR of Michigan. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 135, noes 220, present 1, not voting 75, as follows:

[Roll No. 63]

□ 1715

The Clerk announced the following pairs:

On this vote:

Mr. Wyden for, with Mr. Alexander against.

Mr. Moffett for, with Mr. Emery against.

Mr. Florio for, with Mr. Johnston against.

Mr. Phillip Burton for, with Mr. Petri against.

Mr. AuCoin for, with Mr. Hyde against.

Mr. Leland for, with Mr. Mitchell of New York against.

Mr. Rangel for, with Mr. Badham against.

Mr. Richmond for, with Mr. Burgener against.

Mrs. Collins of Illinois for, with Mr. Lungren against.

Mr. Jeffords for, with Mr. Lowery against.

Mr. ATKINSON and Mr. ROBERTS of South Dakota changed their votes from "aye" to "no."

Mrs. BOGGS changed her vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

Mr. McCLORY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I am pleased indeed to note in this legislation authorizing military construction (H.R. 3455) that substantial improvements are being authorized for the Great Lakes Naval Training Center in my congressional district.

Of utmost importance is the construction of quarters for men and women of the Navy at Great Lakes who are part of the Service School Command. The Navy service schools are perhaps the most significant elements in the modern Navy. The facilities for instruction and the trained personnel for providing this critical instruction are currently available. There are not, however, the quarters necessary to meet the housing needs at the Service School Command. Accordingly, the principal item which is included in the military construction program at Great Lakes is that of quarters for enlisted personnel—$8.8 million.

Mr. Chairman, other improvements at Great Lakes which have been authorized by the committee include $3 million for construction of a cold storage warehouse and $240,000 for construction of a family service center. These also are of significance at this Great Lakes Naval Training Center.

Mr. Chairman, I commend the administration for its emphasis on military preparedness. In turn, I salute the committee for its response to the military construction needs which are vital elements in behalf of our national security. In meeting these needs at Great Lakes, the committee is fulfilling its responsibilities in a substantial way.

AMENDMENT OFFERED BY MR. HARTNETT

Mr. HARTNETT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HARTNETT: Page 59, after line 11, add the following new section:

DISTRICT OFFICES OF ARMY CORPS OF ENGINEERS

SEC. 906. (a) During fiscal 1982, the Secretary of the Army shall maintain a District Office of the United States Army Corps of Engineers at each site within 25 miles of each major defense port within the continental United States, where there is such an office on June 4, 1981.

(b) For the purposes of this section, the term "major defense port" means any of the following:

(1) A major United States Navy shipyard.

(2) A home port for major naval forces.

(3) A major supply and embarkation port for elements of the Armed Forces.

Mr. HARTNETT. Mr. Chairman, I address this House in regard to this amendment which I am proposing to the military construction and authorization bill. I want to express my deepest appreciation to Chairman BRINKLEY and to ranking member, Mr. TRIBLE, for their diligence in helping me prepare this amendment. Mr. Speaker, the administration through OMB has mandated the Corps of Engineers civil works programs must lose 790 manpower spaces by fiscal year 1981; 2,205 spaces will be deleted during fiscal year 1982; 790 plus 2,205 comes out to 2,995 spaces, or approximately 11 percent reduction of the fiscal year 1980 authorization for the U.S. Army Corps of Engineers. The Chief of Engineers, Lt. Gen. J. K. Bratton, anticipates making realinement and reduction recommendations to Secretary of the Army by the middle of this month. I am confident that the closing of several district offices, Charleston included, cannot be ruled out. I am very much concerned for the welfare and the jobs of the 150-plus workers who now man the Charleston Office of the U.S. Army Corps of Engineers. These have been dedicated public servants and are a great asset to the U.S. Army Corps of Engineers. Within the totality of the manpower of the Southeast region and Nation, numerous areas exist where curtailment of least productive activities can concur without reducing the support in South Carolina. If the Secretary of the Army were to exercise his authority to trim 11 percent of all the offices, such as Wilmington, Savannah, Jacksonville, Charleston, I would understand it. But I cannot understand the possiblity of the Secretary closing the entire Charleston District Office.

Accordingly, I am introducing my amendment which says the Secretary of the Army will maintain a district office in Charleston and in other ports, such as Charleston, where there is a naval facility or major defense installations. The necessary manpower reductions should not have a detrimental effect on our national security. This amendment will not cost the Government any additional money, but will insure that Charleston, and other critical ports, will have the continuation of corps support, so that their vital mission can be met.

Again, I want to express my appreciation to the Chairman and to the ranking Member, and I urge my colleagues of the House to support my amendment.

Mr. BRINKLEY. Mr. Chairman, will the gentleman yield to me?

Mr. HARTNETT. I yield to the gentleman from Georgia.

Mr. BRINKLEY. Mr. Chairman, for the information of the Members, besides this amendment, we have two amendments, both of which have been reviewed by the staff and by the committee members. We intend to accept both of them. There may be two or three minor colloquys, and I believe we will be through within 10 or 15 minutes.

Mr. Chairman, concerning the pending amendment offered by the gentlemen from South Carolina (Mr. HARTNETT), this side has reviewed the amendment and accepts the amendment.

Mr. TRIBLE. Mr. Chairman, will the gentleman yield?

Mr. HARNETT. I yield to the gentleman from Virginia.

Mr. TRIBLE. Mr. Chairman, we on the Republican side have also reviewed the gentleman's amendment and recommend that it be adopted by the committee.

The CHAIRMAN. The question is on the amendment offered by the gentleman from South Carolina (Mr. HARTNETT).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. ANDERSON

Mr. ANDERSON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ANDERSON: At the end of the bill, add the following new section:

LAND CONVEYANCE, LONG BEACH, CALIFORNIA

SEC. 906. (a) The Secretary of the Army (hereinafter in this section referred to as the "Secretary") is authorized to convey to the City of Long Beach, California (hereinafter in this section referred to as the "City"), all right, title, and interest of the United States in and to a tract of land of varying width consisting of 0.7176 acres and extending from the south boundary of the Long Beach Army Reserve Training Center, Long Beach, California, north along the west boundary of such training center to Willow Street.

(b) (in consideration for the conveyance under subsection (a), the City shall convey to the United States all right, title, and interest of the City in and to a tract of land of varying width consisting of 0.7176 acres and coextensive with and immediately adjoining the south boundary of the Long Beach Army Reserve Training Center, as established after the conveyance authorized in subsection (a).

(c) The City of Long Beach shall pay to the United States an amount equal to the amount by which the fair market value (as determined by the Secretary) of the property to be conveyed by the United States to the City under subsection (a) exceeds the fair market value (as determined by the Secretary) of the property to be conveyed by the City to the United States under subsection (b).

(d)(1) The exact acreages and legal descriptions of any property acquired or conveyed under subsection (a) or (b) shall be determined by surveys that are satisfactory to the Secretary. The cost of any such survey shall be borne by the City.

(2) The Secretary may require such additional terms and conditions with respect to the acquisition and conveyance authorized by this section as he considers appropriate to protect the interests of the United States.

Mr. ANDERSON (during the reading). Mr. Speaker, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. ANDERSON. Mr. Chairman, my amendment to title IX of H.R. 3455 involves a land exchange between the city of Long Beach, Calif., and the Long Beach Army Reserve Training Center.

Specifically, this amendment would allow the Secretary of the Army to convey to the city of Long Beach all right, title, and interest of the United States a tract of land consisting of about three-quarters of an acre. In exchange, the city of Long Beach shall convey to the United States all right, title, and interest of the city a tract of land of equal size. The Army has analyzed the proposed land exchange and concluded that land which they currently hold title to is worth $1 per square foot more than the land the city would relinquish, for a total value difference of $31,259. City officials will settle this difference by making a payment directly into the U.S. Treasury.

Mr. Chairman, this land exchange will allow an important redevelopment project within Long Beach to continue and will bring added jobs and income to the surrounding area. I have worked very closely with my good friend and colleague from Long Beach, DAN LUNGREN, on this amendment and urge the committee to adopt it.

Mr. BRINKLEY. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. I yield to the gentleman from Georgia.

Mr. BRINKLEY. Mr. Chairman, for the information of the committee, we have reviewed this amendment. It is a good amendment, and we accept it on this side.

Mr. TRIBLE. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. I am happy to yield to the gentleman from Virginia.

Mr. TRIBLE. Mr. Chairman, we have reviewed the gentleman's amendment on the Republican side. We do not object to it and recommend that it be adopted.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. ANDERSON).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. ERTEL

Mr. ERTEL. Mr. Chairman, I offer an amendment.

The clerk read as follows:

Amendment offered by Mr. ERTEL:

REALINEMENT OF FORT INDIANTOWN GAP

SEC. 906. (a) No funds appropriated pursuant to any authorization contained in this Act may be used to realign, or terminate any component of, Fort Indiantown Gap located in Annville, Pennsylvania, before November 1, 1981.

(b) No funds appropriated pursuant to any authorization contained in this Act may be used to realign, or terminate any component of, Fort Indiantown Gap located in Annville, Pennsylvania, if before November 1, 1981, both the Armed Services Committee of the Senate and the Armed Services Committee of the House of Representatives pass, by a majority vote of those members of the committee present and voting, a quorum being present, resolutions disapproving such realinement or termination.

(c) For purposes of this section, the term "to realign" includes any action which both reduces and relocates functions and civilian personnel positions, but does not include a reduction in force resulting from workload adjustments, reduced personnel or funding levels, skill imbalances, or other similar causes.

Mr. ERTEL (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD, since it has been provided to both sides.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. ERTEL. Mr. Chairman, the intent of this amendment is straightforward. It delays the Department of the Army's implementation of the realinement of Indiantown Gap until November 1, 1981. The amendment also gives the Armed Services Committee of both the House and Senate the authority to override the Army's realinement decision in this instance, if the committees act by resolution before November 1.

Why the need for this amendment?

The Army announced its decision to realine Indiantown Gap on April 1, 1976, before I ever got to Congress in 1979, the Army's data justifying the realinement was audited by the General Accounting Office. Let me read to you what GAO had to say about the Army's data:

Our (GAO's) review of the study disclosed data changes, errors, omissions, and questionable procedures that caused us (GAO) to challenge the use of the study as a basis for the decision.

That is very sharp criticism. The Army agreed at least to part of GAO's findings. The Army went back and revised its economic data justifying the realinement.

Unfortunately, a second GAO audit of the revised data will not be completed until mid to late August. Given a substantial doubt about whether this particular realinement is cost effective for the taxpayers, I think it makes good commonsense to delay implementing action until the GAO audit is completed and its findings are reviewed.

Mr. Chairman, let me say that I do not take this action lightly. Previously Congressman BOB WALKER and Congressman GUS YATRON, whose districts would also be affected adversely by the realinement, joined with me in a letter to Army Secretary Marsh asking him to delay the final decision and recommendation on his own volition. While the Secretary has not yet responded, I understand from his staff that he does not intend to respond favorably. My last contact with Secretary Marsh's staff was about 1 p.m. today.

In closing, Mr. Chairman, Congressman WALKER is not present today because of committee business. But I understand his staff has relayed to him the content of this amendment, and the indication is that Congressman WALKER does support it.

Mr. BRINKLEY. Mr. Chairman, will the gentleman yield?

Mr. ERTEL. I yield to the gentleman from Georgia.

Mr. BRINKLEY. Mr. Chairman, the Secretary of the Army has today agreed to defer final action on Indiantown Gap until he has had an opportunity to review the GAO data, which he understands will be available shortly. In view of that, we hope that the gentleman will withdraw his amendment.

Mr. ERTEL. Mr. Chairman, it is my understanding that the Secretary has responded and there will be a delay until the GAO audit is completed, is that correct?

Mr. BRINKLEY. That is correct.

Mr. ERTEL. Mr. Chairman, I thank the gentleman from Georgia (Mr. BRINKLEY).

Mr. YATRON. Mr. Chairman, will the gentleman yield?

Mr. ERTEL. I yield to my colleague, the gentleman from Pennsylvania.

Mr. YATRON. Mr. Chairman, I thank my colleague, the gentleman from Pennsylvania (Mr. ERTEL), for yielding.

Mr. Chairman, I was prepared to speak in support of the amendment offered by the gentleman form Pennsylvania (Mr. ERTEL) with respect to the Army realinement at Fort Indiantown Gap. However, I am most pleased to learn that the Secretary of the Army has accepted our position and will delay the implementation of their proposal until they have had an opportunity to receive and study the GAO report.

I believe this is a prudent and economically sound decision by the Secretary, and we will certainly hold him to his word.

My deepest and most sincere thanks go to the gentleman from Pennsylvania (Mr. ERTEL), because without his tireless efforts in this matter, I do not believe a favorable decision would have been forthcoming. The gentleman has done a superb job, and I want to commend him for it.

Mr. ERTEL. Mr. Chairman, based upon the Secretary's statement, I ask unanimous consent that I may be permitted to withdraw the amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The CHAIRMAN. The amendment is withdrawn.

□ 1730

Mr. ENGLISH. Mr. Chairman, I move to strike the last word.

I would like to say to the gentleman from Georgia (Mr. BRINKLEY), that I have been made aware of three vital military construction projects that are required at Vance Air Force Base in my district. These projects have been requested by Vance for some time, but the various Air Force and Department of Defense review levels have not yet provided these for our consideration. I strongly support these projects to improve living conditions for our bachelor officer personnel and to replace deteriorating operations and maintenance facilities. I request the gentleman from Georgia and his subcommittee to consider the following Vance Air Force Base projects for funding:

Bachelor officers' quarters for 240 personnel at an approximate cost of $8,800,000;

A base flight operational facility sized at 8,715 square feet at an approximate cost of $800,000; and

A flight maintenance facility sized at 3,600 square feet at an approximate cost of $300,000.

VANCE AIR FORCE BASE

Project	Approximate cost	Fiscal year	
		ATC	AF
Bachelor officers' quarters for 240 personnel	$8,800,000	1985	1985
Base flight operational facility sized at 8,715 SF	800,000	1987	1985
Flight maintenance facility sized at 3,600 SF	300,000	1984	1985

Mr. BRINKLEY. Mr. Chairman, will the gentleman yield?

Mr. ENGLISH. I would be happy to yield.

Mr. BRINKLEY. The gentleman from Oklahoma and myself have conferred together with reference to the bachelor officers' quarters for 240 personnel at an approximate cost base of $8.8 million, a base flight operational facility and a flight maintenance facility at the Vance Air Force Base. We have been advised that they are not yet under design, that they are currently programed by the Air Force in later fiscal years. We will review these projects, based upon the gentleman's strong support and evaluate them for inclusion in the fiscal year 1983 military construction program.

Mr. PANETTA. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would like to ask a few questions, if I may, of the distinguished chairman of the Military Installations and Facilities Subcommittee. As the gentleman knows from my March 31, 1981, letter to him, I am very concerned about the lack of adequate facilities at the Defense Language Institute located in Monterey, Calif., in the 16th Congressional District. I am concerned that the military construction bill under consideration today does not include any projects designed to alleviate the overcrowding in classrooms and barracks at DLI. This installation, as the chairman knows, is critical to the intelligence capability of the United States. The training of language-competent personnel in the military services and other intelligence-related agencies should be given top priority in our defense planning and our military construction programs.

Right now, DLI's increasing student inputs have outstripped the limits of the physical plant. Although the DLI was created to centralize foreign language training, in October, 1980, the Army announced a shift of about 500 Russian students to Lackland AFB. The Lackland offshoot is expected to continue over the next few years, thus threatening the integrity of DLI as an installation and endangering the effectiveness of our military foreign language program. I want to ask the distinguished chairman what the subcommittee's intentions are with regard to military construction at DLI? As a result of your subcommittee's consideration of the needs at DLI, do you have a timeframe for building the classroom and barracks facilities at DLI needed to meet the pressing foreign language training requirements of our defense intelligence community?

Mr. BRINKLEY. I thank the gentleman from California for raising this very important issue during the debate on the military construction bill for fiscal year 1982. The subcommittee looked into the construction needs at the Defense Language Institute and found that there appears to be a serious problem of overcrowding. I share the gentleman's concern about the impact of this situation on the mission of DLI. However, the subcommittee had to consider the administration's request for projects and some other ongoing programs within the constraints of a tight budget. My hope is that the subcommittee will be able to approve an expedited construction program at DLI in the military construction bill for fiscal year 1983. I want to assure the gentleman from California that I recognize and appreciate the important mission of DLI and that I will do all I can to insure that its physical capacity is improved to meet increased student loading in foreign language training.

Mr. PANETTA. I thank the distinguished chairman for his consideration and cooperation. I would only underline that we have a very serious shortage of space at DLI, and I would be pleased if the chairman or if staff of the subcommittee would visit DLI in the near future to see in person how serious the problem is. I strongly hope that we can include the classroom and barracks construction as soon as possible.

The CHAIRMAN. There being no further amendments, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. DERRICK) having assumed the chair, Mr. PICKLE, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3455) to authorize certain construction at military installations for fiscal year 1982, and for other purposes, pursuant to House Resolution 144, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. LEVITAS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 311, nays 36, not voting 84, as follows:

Mr. White with Mr. Badham.

Mr. Traxler with Mr. Goldwater.

Mr. Wirth with Mr. Evans of Iowa.

Mr. Stratton with Mr. Brown of Ohio.

Mr. Santini with Mr. Jeffords.

Mr. Hatcher with Mr. Bailey of Missouri.

Mr. Washington with Mr. Ralph M. Hall.

Mr. Flippo with Mr. Bliley.

Mr. Hubbard with Mr. Hillis.

Mr. Foglietta with Mr. Lujan.

Mr. Stump with Mr. Marriott.

Mr. Bellenson with Mr. Lungren.

Mr. Howard with Mr. Broyhill.

Mr. Grisham with Mr. Burgener.

Mr. Carney with Mr. Emery.

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

AUTHORIZING CLERK TO MAKE CORRECTIONS IN ENGROSSMENT OF H.R. 3455, MILITARY CONSTRUCTION AUTHORIZATION ACT, 1982

Mr. BRINKLEY. Mr. Speaker, I ask unanimous consent that in the engrossment of the bill, H.R. 3455, the Military Construction Authorization Act, 1982, the Clerk be authorized to make necessary technical corrections, including section numbers, punctuation, and cross references.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

GENERAL LEAVE

Mr. BRINKLEY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include extraneous matter on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3512) entitled "An act making supplemental and further continuing appropriations for the fiscal year ending September 30, 1981, rescinding certain budget authority, and for other purposes."

The message also announced that the Senate agrees to the amendments of the House to the amendments of the Senate numbered 15, 17, 20, 21, 29, 38, 41, 42, 47, 49, 50, 53, 68, 72, 81, 84, 111, 113, 118, 123, 140, 142, 143, 145, 147, 148, 154, 155, 158, 161, 169, 171, 173, 184, 185, 189, 197, 202, 204, 205, 206, 207, 208, 210, 225, 240, 241, 260, 267, 268, 269, 272, 275, 284, 285, 293, 325, 331, 337, 342, 351, 356, 365, 428, and 429 to the above entitled bill.

CONGRESSMAN SKELTON INTRODUCES THE FAMILY ENTERPRISE ESTATE TAX EQUITY ACT

(Mr. SKELTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SKELTON. Mr. Speaker, I rise today to introduce a bill which simply and directly addresses one of the most intimidating situations facing farmers and small businessmen: The dismantling of their lifetime enterprise

through outdated estate tax laws. The Family Enterprise Estate Tax Equity Act contains two straightforward provisions:

The first would permit estates valued at $500,000 or less to pass to the heirs free of tax obligation. This is accomplished by increasing the unified tax credit to $155,800 and the increase would be phased in over a 5-year period to be fully effective by 1985.

The second provides for a 100-percent deduction against the value of the property of an estate which is inherited by a spouse.

I believe that there is ample evidence that our help is needed to strengthen and promote the survival of our small business and family farms. Indeed, estate tax reform was one of the principal recommendations of the White House Conference on Small Business. Family enterprise presents one of our best hopes for continued economic strength in the future. Small businesses, for example, account for 80 percent of all new jobs and over 50 percent of all new technical innovations not to mention 40 percent of our gross national product. Family farms are the most productive agricultural units yet devised and an historical bastion of our free entrepreneurial spirit.

Yet over the last few decades more and more of these businesses and farms have become subject to estate taxes despite our recent efforts to increase the value of the minimum estate. In the last 30 years, for example, over 50 percent of our farms have disappeared or been swallowed up by larger operations. Small businesses of all kinds have been put in jeopardy because our estate tax law has made it more attractive for them to sell out to conglomerates or big businesses than to run the risk that the business will have to be chopped up piecemeal to meet tax obligations.

Finally, I feel it is time that we once and for all recognized the inexorable contribution of the spouse in any small business or farm. The laws of the United States should not be constructed in such a way as to separate the product of a partnership that predates our country by thousands of years and is sanctioned by a higher authority. The exemption from estate tax of property inherited by a spouse will only permit that spouse to keep what is rightfully his or hers in the first place.

CONCERN OVER ANNOUNCEMENT OF LASER TESTS BY DEFENSE DEPARTMENT

(Mr. McEWEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McEWEN. Mr. Speaker, I rise to express some degree of concern that I have experienced, as well as some of the residents of the Sixth Congressional District of Ohio. This past weekend we heard repeatedly announcements that the Department of the Air Force would conduct certain testing of the laser defense technology.

Then, having heard that repeatedly over the weekend, we were informed on Tuesday of this week that the test was unsuccessful.

Then I was subjected to the reports again this morning on my way to the House of some entire week of this type activity.

I request the Department of the Air Force henceforth conduct these tests in less openness with less announcement until such time as they are successful.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 3462 DEPARTMENT OF JUSTICE APPROPRIATION AUTHORIZATION ACT, 1982

Mr. BONIOR of Michigan, from the Committee on Rules, submitted a privileged report (Rept. No. 97-125) on the resolution (H. Res. 147) providing for consideration of the bill (H.R. 3462) to authorize appropriations to carry out the activities of the Department of Justice for fiscal year 1982, and for other purposes which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 3480, LEGAL SERVICES CORPORATION ACT AMENDMENTS OF 1981

Mr. BONIOR of Michigan, from the Committee on Rules, submitted a privileged report (Rept. No. 97-126) on the resolution (H. Res. 148) providing for consideration of the bill (H.R. 3480) to amend the Legal Services Corporation Act to provide authorization of appropriations for additional fiscal years, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 3238, PUBLIC BROADCASTING AMENDMENTS ACT OF 1981

Mr. BONIOR of Michigan, from the Committee on Rules, submitted a privileged report (Rept. No. 97-127) on the resolution (H. Res. 149) providing for consideration of the bill (H.R. 3238) to amend the Communications Act of 1934, to extend certain authorizations of appropriations contained in such act relating to public broadcasting, and for other purposes, which was referred to the House Calendar and ordered to be printed.

ADJOURNMENT TO MONDAY, JUNE 8, 1981

Mr. HOYER. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 12 noon on Monday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. HOYER. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

There was no objection.

STATES CAN DO THE JOB ON MANAGING BLOCK GRANTS

(Mr. SHUMWAY asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. SHUMWAY. Mr. Speaker, recent news reports have warned of conflicts between the States and the cities over the desirability of President Reagan's block grant proposals. As a rule, it appears that the States favor the concept while the mayors oppose it. That is not surprising, since over the last 15 years or so the local communities, especially those cities which are of a certain size, with their own political clout, have developed a cozy relationship with Washington bureaucrats, whereby financial goodies have gone directly to the cities, bypassing Governors and State legislators.

If the conflict is not surprising, it is unfortunate. It will be especially unfortunate if it delays the enactment of the Reagan block grant program. That is so, Mr. Speaker, because the block grant is one of the two critical elements of the Reagan program. Along with the reduction in marginal tax rates, it is block grants which change the direction of Government in the United States. Other economic proposals of the President, such as balanced budgets, spending reductions, and increased defense spending, are important, but they do not produce the kind of fundamental change the voters asked for last November. The marginal tax rate reductions and the block grants are the fulfillment of the Reagan campaign for a change in national direction.

In a recent thoughtful article in the Washington Star, Gov. George Busbee of Georgia defends the States' ability to manage the block grants. Governor

Busbee notes that the States have changed in the last 20 years, acquiring a flexibility and sophistication in delivery of vital services that they may have lacked in years past. The Governor makes a strong case that the States are vastly superior to the Federal Government in targeting and delivery of services, and he has some reassuring words for the mayors as well.

In a way, the Governor challenges the mayors to forget the past, which has not worked as well as many hoped it would, and move on to something new. We are entering a new era, one which some will welcome and some will fear. But in either case, that new era is here, and it will do none of us any good to dispute that fact.

Mr. Speaker, I urge the locally elected officials to accept Governor Busbee's challenge, and to work together to meet the needs of their citizens. Enactment of the President's block grant proposals will remove the dead hand of the Washington bureaucracy, and allow them to get on with the job.

I ask unanimous consent that Governor Busbee's article be printed at this point in the RECORD for the edification of my colleagues.

[From the Washington Star, May 25, 1981]

A GOVERNOR RESPONDS: STATES CAN DO THE JOB

(By George Busbee)

With deep, permanent cuts in federal aid now inevitable, state and local government face a new world in the 1980s. It is a world that will require us to be more self-reliant, to re-examine our basic relationships with the federal government and each other and to cooperate in using our limited resources to meet the most important needs of the people.

We have entered that new world inauspiciously, with local officals firing the opening shots against the states in what they see as a war to protect their "Washington turf." At issue are the administration's proposed block grants that would give states greater flexibility to allocate federal funds so as to ease the hardships that the cuts will cause.

Thus Mayor Charles Royer of Seattle, in a recent column in The Star, wondered publicly and at length whether states are capable of handling the new responsibilities now looming before them. Most state governments are not as sophisticated as President Reagan's California, Royer said; rather, most state governments are like my Georgia.

POOR RESULTS

Given Washington's old ways of looking at things, this may sound plausible. But new eras do not come about by accident; they begin because old perceptions are no longer adequate as a basis for action. It should be obvious that, whatever the good intentions involved, the federal government's plethora of programs designed to address scores of problems once the exclusive reponsibility of state and local governments have not worked very well.

It should also be evident to anyone who looks deeply into the matter that the states have undergone tremendous changes in the last 20 years and, along with better local management, now represent the best hope for the future of our communities, great and small.

The perception that the federal government cares about cities and that the states do not has a number of roots, the most important of which probably is that it was once true. But state legislatures have long since been reapportioned, state work forces professionalized, state revenue-raising capacity expanded, state administrative and planning systems modernized.

Perhaps equally important, we once believed that the best way to deal with domestic problems was through the creation of federal grants, and so both grants and grantsmen grew by leaps and bounds, addressing problems from the momentous to the mundane. By the end of the 1970s, scores of our largest cities had become dangerously dependent on a federal treasury that was obviously overcommitted.

And with the grants came federal strings that gave Washington bureaucrats increasing control over the cities' own resources and that forced the use of those resources to provide services never intended to be supported by a local tax base.

Because most states did not develop the same kind of highly visible urban grant programs developed by the federal government, mayors have argued that the states have ignored their needs. Ironically, states continue to provide local governments with more grant funds than the federal government, and recent studies by the National Governors' Association, National Science Foundation and others have shown that overall aid flowing to cities from state capitals is more responsive to need than aid flowing directly from Washington.

STATES MORE FLEXIBLE

But states have far more flexible, and in the long run more reliable, ways to aid local governments than simply through grants, and the states have been using them. During the last 20 years, states have steadily removed service responsibilities from the local tax base. Few federal programs, if any, have as highly targeted an impact on needy communities as state assumption of welfare and education costs.

And few federal programs, if any, can match the targeting impact of state "circuit-breaker" programs, which take the sting out of local property taxes by protecting low-income households from inordinately large tax bills. The states have also financed an extraordinary amount of broad-based property tax relief, reducing public resentment of that levy and leaving the spiraling federal income tax as the nation's most unpopular revenue-raising instrument.

And although Mayor Royer worries that states do not care about urban problems like mass transit, what local transit operator today would not trade his highly tenuous federal operating subsidy for much larger assured sources of dedicated revenues such as the Georgia and Washington state legislatures have provided to Atlanta and Seattle? These revenues are truly without strings.

None of these forms of assistance—taking over service responsibilities, granting local tax relief or authorizing new revenue sources—shows up in U.S. Census Bureau reports under the category of state aid to local governments. Nor do increasingly sophisticated state economic development tools, such as regulatory powers, capital investment policies and trade promotion efforts which can strengthen local economies. Washington still measures aid by grants and while grants will continue to be important, we now know they are not the answer.

The answer, for state and local officials, is to work together both at home and in Washington. The answer is to devise new solutions to our problems in our statehouses and city halls, not to fight the battles of the past in the halls of Congress. States have the will and the resources to help the cities, but they will not take on responsibilities for services and programs in which they have no voice.

TEAMWORK POSSIBLE

Such teamwork is possible. Although the National League of Cities is opposing a state role in the administration of federal economic development grants to small cities, the Georgia Municipal Association supports it. We are eager to prove we can run this program better than HUD.

It is time for local officials to decide whether they want to scrap hundreds of diminishing federal programs now distributed by Washington to 65,000 local governments through formulas and procedures that often defy logic, or whether they want to forge a new partnership with the states in which we recognize that we hold our futures jointly in our own hands.

EL SALVADOR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DORNAN) is recognized for 60 minutes.

Mr. DORNAN of California. Mr. Speaker, I take out this special order tonight on El Salvador because the situation in this neighboring country to us here on the North American Continent is still in doubt. It is very much in doubt. The centrist government of President Jose Duarte is suffering in this country and even more so in Europe, the most intensively organized leftist campaign to discredit him that we have seen since that same organized effort was concentrating all of its fury against the now much missed government of the President of South Vietnam.

I think some of our Members should be informed, as I was when I went down to El Salvador last month, where that small country gets its name. Whenever I travel, the first thing I like to ask is something about the history of the nation. It struck me that the name of this nation, separated from my State of California only by Mexico and the nation of Guatemala, is a particularly beautiful name. Like the county and city that I represent part of here, it is a religious name. It is not a name like Nicaragua, or Vietnam, or other geographical names that have fallen under a Marxist, a Leninist government.

□ 1800

It is not a name like Nicaragua or Vietnam or other geographical names that have fallen under a Marxist-Leninist government. If the Leftist forces prevail there and we see this country go the way of so many of the other dominoes in the last 35 years since the conclusion of World War II, the Marx-

ist forces around the world will have captured a particular prize because they will take no small delight in knowing that they have taken a country named after Jesus Christ himself. The formal name of El Salvador is Nuestro Dueño Amo, El Salvador del Mundo.

I am going to submit a report that I have written on my trip to El Salvador during Holy Week, and with it I want to submit for the record, Mr. Speaker, an abbreviated version of the State Department White Paper on Central America of last February. This abbreviated report is titled "Special Report No. 80, Communist Interference in El Salvador." It is dated February 23, 1981. For such a small document it contains the most incredible relating of events during the latter part of 1979 throughout 1980 and the first part of this year of the most massive gunrunning, weaponsrunning, that has ever taken place in the entire history of our hemisphere going back to the days of the Spanish Main.

To see weapons of American manufacture, M-16's principally, and M-69 grenade launchers that we left behind in warehouses in South Vietnam when we left that forsaken area of the world and left behind $8 billion of American equipment—that is in 1979 dollars; it probably would be replaced only at the cost of about $12 to $13 billion today—to see American M-16's turning up directly from Vietnam and Ethiopia in this tiny little country of El Salvador is not just disturbing; it is outrageous.

I last week had the opportunity for a week and a half to visit Argentina, Chile, and Uruguay. I thought that I knew something about the agony that those three nations had suffered under the Marxist terrorism and the urban guerrillas that had torn those nations apart, particularly the major cities of Montevideo, Santiago, and Buenos Aires; but I found out that my historical knowledge was weak, indeed. It is a stunning thing to visit a so-called people's jail, to descend into the cellar of a residential home in a nice neighborhood and find yourself in a little concrete bunker where you cannot even lie down, and realize that human beings were forced to live in these conditions for a year or more. Then they were taken out and executed anyway. That is what I would call a prima facie human rights violation.

In the terrorist museum at the Campo de Mayo, the major army base in Buenos Aires Province, in the suburbs of Buenos Aires, I was shown among the incredible array of weaponry from around the world a locker larger than a high school locker, about the size that a professional football player would use but not big enough to put a man in standing up. This locker had a small mattress in it and a huge blood stain at one end.

Then I was shown photographs of the body of Lt. Col. Ibar Zabel. He was held captive by these upper-class, upper middle-class-rich, Marxist-Leninist urban guerrilla kids for 372 days and was most of that time in this large wall locker lying on his back. In the last 32 days of his life, Col. Ibar Zabel was not allowed out of the locker for 1 minute. Naturally, the spinal pain must have been intense, and his muscles must have begun to atrophy. They were carrying him from one people's jail to another around Buenos Aires, and his captors were caught in a roadblock, cut off back and front, so they lifted open the locker door and shot the lieutenant colonel in the face. Displaying a lack of intestinal fortitude to shoot it out themselves, they all took their cyanide tablets. They had a smaller size for the women and a larger size for the men.

As we left there, we went in the terrorism museum. A young lady, a master in economics, who had lived through all of this terror, broke down and began to cry as she looked at a full automobile, what was left of it, the rusted hulk of a car that had been bazooked—as she called it—in the streets of Buenos Aires. When translating the sign for me on the car, she realized that this was the 80-year-old gentleman, father of one of her good friends who worked with her in the Department of Monetary Economics. They could not get to the son, so they murdered the 79- or 80-year-old father.

Those three examples, just being down in that people's liberation cell below the ground, looking at the bloody mattress that had been the last resting spot of a kidnaped lieutenant colonel from the military in Buenos Aires, and then seeing this girl crying before this destroyed automobile, made me realize violations in the cone of South America are one sided, indeed. Certainly there are tragic violations of civil and human rights continuing on, but most of it is an ugly reaction or overreaction, if that is possible, to the nightmare of Marxist-Leninist terrorism that almost destroyed these countries, one of them Argentina, the second richest agricultural nation to our own in this hemisphere.

I think that what I learned down there so far from El Salvador, much further away than my own State of California, is that El Salvador is up now first in the box to be destroyed by this same concentrated effort that succeeded in Nicaragua and Cuba, and Grenada, the island nation, that has failed in Santiago, Chile, and Argentina.

Mr. RUDD. Mr. Speaker, will the gentleman yield?

Mr. DORNAN of California. I gladly yield to my distinguished gentleman and colleague from Arizona (Mr. RUDD) who has such a long, extensive background of service in both Mexico and in Buenos Aires.

Mr. RUDD. I thank the gentleman for yielding.

Mr. Speaker, I commend my colleague from California (Mr. DORNAN) for his courage and dedication to freedom for speaking out in this body against the organized Communist infiltration and domination of El Salvador, a country struggling to remain free and democratic. Having spent many years in Latin America on diplomatic assignment, I know that the people value freedom and justice, which we sometimes take for granted, and I am committed to supporting them in their struggle.

In the face of the massive campaign in the United States by people who have been brainwashed by Communist propaganda to paint the disguise of an interior revolution, the facts spell out a very different story. As my colleague has pointed out, evidence of tremendous support from outside Communist sources has been gathered and documented in El Salvador, and the ugly truths of intrinsic Soviet complicity in the affairs of our Central American neighbor are beginning to surface. They are:

That the Leftist guerrillas are the arm of Cuban, Nicaraguan, and ultimately Soviet efforts to thwart democratic reforms;

That the bloodletting in El Salvador is a direct consequence of the organized efforts by these Communist guerrilla forces to foment political divisions and incite violence;

And that the only objective of these forces in attempting to overthrow the Duarte government is to strap the El Salvadoran people in the bonds of communism and further the entrenchment of communism in Central America.

Mr. Speaker, these traits bear no resemblance to the popular insurrection which the Left purports. What we are witnessing is the domination of a country which is strategic to the further spread of communism within our hemisphere.

We cannot afford to be naive. If Moscow and Havana, and Marxist governments around the world did not view El Salvador as such an opportunity, they would not be spending these vast sums on weapons and support to turn El Salvador into another Marxist state, which they have achieved in Nicaragua. Soviet-made heavy war tools such as tanks, planes are now arriving in Nicaragua to be passed on to El Salvador. We must not ignore these grim facts of aggression at America's back door. International communism's ultimate goal is the U.S.A., make no mistake about this.

El Salvador is a clear case of Communist aggression and expansionism. We must deal with the present situa-

tion in light of every known component and act to preserve freedom and survival.

This means supporting a friendly government which would provide for free elections. President Reagan has acted wisely. We must support him.

Mr. DORNAN of California. I thank the gentleman for joining me. I want to reemphasize that although the gentleman serves on the Appropriations Committee and one of the three exclusive, key committees of the House, and not on the Committee on Foreign Affairs, I would say that it is not arguable that there is no one in this entire body of 435 Members, shy a couple of vacancies, who is more experienced in any of the Latin American issues than is the distinguished gentleman from Arizona. I might add to that that I hope our colleagues are aware that the gentleman from Arizona is totally bilingual in the language that is spoken from the Rio Grande all the way to Tierra del Fuego, and that his years of service down there in the diplomatic corps were spent mostly in an intelligence-gathering capacity. I am just honored that he joined me in my special order tonight.

Mr. RUDD. I thank the gentleman.

Mr. LAGOMARSINO. Mr. Speaker, will the gentleman yield?

Mr. DORNAN of California. I yield to my distingushed colleague, the gentleman from Santa Barbara.

Mr. LAGOMARSINO. I thank the gentleman for yielding.

Mr. Speaker, I want to commend the gentleman for taking this special order today so that we can discuss this very important subject.

Mr. Speaker, outside interference in the political and military struggle taking place in El Salvador threatens to overthrow by force the current revolutionary civilian-military government headed by President José Duarte and replace it with a Communist-trained and armed guerrilla coalition, ironically named the Democratic Revolutionary Front. The present form of the Duarte government, and many of its reform policies, including agrarian reform, were brought about at the urging, if not insistence, of the Carter administration. There is no question but that there has been, and still continues, Communist intervention in the form of military arms and equipment from the Soviet bloc, Cuba, Vietnam, and Nicaragua, under the direction of Cuba, and in most cases, through Nicaragua by land, air, and water. While apparently air transport has slowed, land routes are still open. Radical Arab States and the Palestine Liberation Organization (PLO) have also furnished funds, arms, and training.

President Rodrigo Corazo of Costa Rica, highly respected as a proponent of democracy and human rights, has urged that the United States: First, provide the Salvadoran Government with sufficient military equipment to meet the externally armed leftist opposition; second, continue to push for political and economic reforms, particularly agrarian reform; and third, stop the extreme right, an urgent necessity. This is the Reagan administration policy.

Venezuela, one of the few democracies in the area, also strongly supports Duarte. Mexico has agreed to provide economic assistance to the Government of El Salvador. Duarte says that his country will need economic aid more than military aid when the military situation is controlled. Our policy reflects this need—economic aid will be three times as much as military aid, and twice that proposed by Carter. It is important to note that President Duarte also specifically and personally requested military aid and trainers from both the Carter and Reagan administrations. Military trainers were already present when President Carter agreed to send military aid and additional trainers in late January 1980. A telegram from then U.S. Ambassador to El Salvador Robert White, at the time of the terrorist-announced "final offensive," specifically requested lethal military assistance. That "final offensive" was not supported by the people, however, and failed.

I believe it is important to also keep in mind that U.S. Presidents, under the provisions of the War Powers Act, no longer have the ability to unilaterally embark on actions such as Vietnam. The act now requires consultation with Congress and specific approval of actions such as sending combat troops into another country. For that reason, I feel it is important that Congress continue to seek as much information as possible and act in an informed and judicious manner on this issue. The House Foreign Affairs Subcommittee on Inter-American Affairs, on which I serve, has already held several hearings. I can assure you that there will be even more investigation of any further proposals for additional aid, especially military aid.

The Committee on Foreign Affairs, with its Democratic majority in the House of Representatives, rejected specific amendments to, first, stop all further military aid to El Salvador and, second, bring about the immediate withdrawal of all military training personnel. The committee overwhelmingly defeated those amendments, by votes of 9 to 22 and 11 to 19, respectively.

The amendment is a reinforcement of the administration policy and will insure that our involvement continues to be carefully monitored by Congress. Many of those who voted for the amendment stated their support for the administration's El Salvador amendment.

The Salvadoran military has announced the arrest of six members of the national guard as suspects in the murders of the Maryknoll nuns and missionary. The junta has also announced it will try those charged with the murders of the chairman of the Institute of Agrarian reform and two U.S. labor advisers.

Former three-time President of Costa Rica, Jose Figueres, who assisted the Nicaraguan Sandinistas in their plot to overthrow Somoza, says:

> If the U.S. succeeds in stopping the flow of arms from the enemy, which is Cuba, then they (El Salvador) will straighten out their own situation.

The present Foreign Minister of Costa Rica remarks:

> In the Nicaraguan revolutionary movement, we had the impression in Costa Rica that it was the voice of an entire nation, that the people fully identified with the movement. In El Salvador, however, we have the impression the great masses of people are apathetic to the revolution and do not participate in it.

The acting Archbishop of El Salvador, successor to the slain Archbishop Romero, the Reverend Arturo Rivera y Damas, stated:

> It is true that the leftist groups have maximized violence and their adherence to Marxism, and for this reason, the majority of the people have turned their backs on them.

The archbishop also said:

> There is a left that is struggling for power and wants to impose its ideology. There is a right that quietly but very effectively wants to recover power and reestablish its ideology.

Also, a high, non-Salvadoran Catholic Church official has indicated his support of our policy in El Salvador.

Elections in El Salvador have been scheduled for March 1982, and presidential balloting for 1 year later. President Duarte says his government is not permanent, but is a transition government until popular elections can be held. The United States, as well as the governments and leaders of many European and Latin American nations believe that President Duarte and his civilian-military junta are the best hope for El Salvador, the only viable moderate alternative between the warring factions of the extreme right and the extreme left. They are working for practical reforms in order to stabilize the country and implement democracy.

Dr. Constantine C. Menges, a learned Latin-American scholar, postulates what would happen to the United States directly should El Salvador become a Cuba-like Marxist dictatorship, or even a Nicaragua-style Marxist government. It would seem beyond question that the same thing could, and likely would, happen in Guatemala and adversely affect Mexico, its neighbor. Great civil unrest in Mexico, let alone Marxist domination, would result in additional

millions of refugees pouring into the United States.

□ 1815

Mr. DORNAN of California. Mr. Speaker, I thank the gentleman for joining this special order.

Our colleagues are well aware of his years of distinguished service on the Foreign Affairs Committee of the House, and particularly on the Subcommittee on Inter-American Affairs. He and I are well aware in the area we represent in southern California and Arizona—the area of the distinguished gentleman from that great State—that our Hispanic population has its highest concentration in the hemisphere, outside of Mexico and some of the larger Portuguese culture cities in Brazil, and those who are most aware are keenly aware of what a key domino—and that is the correct word—what a key domino this tiny, but heavily populated nation of El Salvador is, this small nation of close to 5 million citizens.

Mr. RUDD. Mr. Speaker, will the gentleman yield?

Mr. DORNAN of California. I yield to the gentleman from Arizona.

Mr. RUDD. I thank the gentleman for yielding.

Mr. Speaker, I just want to express deep appreciation to our colleague, the gentleman from California, who has provided some fresh, very interesting data, and it is most unfortunate that the people across this land are not aware of these facts and figures that our colleague, the gentleman from California, has presented to us on the floor tonight.

I also want to commend the gentleman from California again for the fact that he had the courage and took the time alone to go into Latin America to conduct a personal investigation as to what we are talking about here tonight, and that should be appreciated. It is by this Congressman.

Mr. DORNAN of California. Mr. Speaker, I know that the gentleman is going to take his skills of many decades to that area also.

And I would just like to point out to my colleagues an interesting fact: That if anyone from the west coast pays any of our Members the courtesy of asking them to come to speak in California and gives them a first-class ticket, they can take their return first-class ticket, trade it in on a coach ticket to Guatemala, El Salvador, Miami, back to D.C., and it will cost them less money than the first class return. There is a nonstop Pan American flight from my airport in my district at LAX to Guatemala City.

I mention that to make the point that this is, as the gentleman mentioned, our backyard. One of the most disconcerting aspects of what has happened to El Salvador, as opposed to, say, Indochina, is the even further involvement of naive members of the clergy of every faith in this struggle. That is why I begin my brief report on El Salvador—it is only 11 pages; I hope some of the Members will take the time to read it and, more importantly, that they will read the State Department Special Report No. 80—with a poem by one of the greatest Irish poets, William Butler Yeats, that he wrote just prior to the Second World War. I think the symbolic message of the poem has even more impact upon the world today. It is the one called "The Second Coming," and it begins:

Turning and turning in the widening gyre,
The falcon cannot hear the falconer;
Things fall apart; the center cannot hold;
Mere anarchy is loosed upon the world,
The blood-dimmed tide is loose, and everywhere
The ceremony of innocence is drowned;
The best lack all conviction, while the worst
Are full of passionate intensity.

I have seen the worst, and what it can do to nations in the cone of South America, and I have seen what the worst, with its passionate conviction, is doing to our neighbors in the back door of the North American Continent in Central America.

I only hope that the best will find some conviction to come forward here.

When I entered the Ambassador's residence—and, tragically, we are too long in appointing an Ambassador to Argentina; the Ambassador's residence in Buenos Aires is empty, only a DCM there—I saw a plaque on the main wall of the foyer as you come in that President Franklin Delano Roosevelt had lived in our Embassy in Buenos Aires shortly after his second reelection in 1936, he spent the nights of November 30, December 1, and December 2 of that year there. And after it says, "President Franklin Delano Roosevelt slept here," it quotes him on that trip to South America. His words are simply: "Democracy is still the best hope of the world."

And that message of Franklin Roosevelt 45 years ago is still true today. We have yet to see an election in Castro's Cuba, a palm-covered prison, where 10 million people suffer, and his young men, their Christian faith not allowed to be practiced, are sent to 19 countries in Africa and even on the Saudi Arabian peninsula in the nation of Yemen, to make sure that democracy does not prevail there.

It is not democracy that we see in Nicaragua, in spite of the fact that the Foreign Minister is a Maryknoll priest who is now in the wrong profession.

I hope that the best of our country, and particularly in Europe, where the main propaganda organizing is taking place against El Salvador, will realize that we are not watching a struggle for democracy in El Salvador. There are many social ills there that have to be reformed. But what Duarte represents is democracy, not the Communist-supplied cadres that are killing people in Chalatenango Province or Santa Ana or San Fernando or all of the other names in El Salvador that are so common to anyone who was raised in the adjoining State up the coast of California.

At this time I submit my report and the State Department report for the official record:

REPORT ON EL SALVADOR

(By Congressman ROBERT K. DORNAN)

Things fall apart; the center cannot hold;
Mere anarchy is loosed upon the world,
The blood-dimmed tide is loosed, and everywhere
The ceremony of innocence is drowned;
The best lack of conviction, while the worst
Are full of passionate intensity.

—WILLIAM BUTLER YEATS, "The Second Coming."

It is an incontrovertible fact of contemporary history that Western Civilization (with all that is symbolized by that term such as the Judaeo-Christian and Greco-Roman traditions, the dignity of the individual and the related concept of human rights, popular sovereignty, rule of law, and free enterprise) has been in full retreat and is reeling under the hammer-like blows of the militant, atheistic, totalitarian political religion of Marxism-Leninism. One need only read the eloquent testimony of Alexandr Solzhenitsyn to underscore that tragic fact. From its conquest of Russia in 1917, Marxism-Leninism has spread like a virulent cancer over the face of the globe and its victims now number legion: Latvia, Lithuania, Estonia, China, East Germany, Hungary, Poland, Albania, Yugoslavia, Bulgaria, Czechoslovakia, the Ukraine, North and South Vietnam, North Korea, Laos, Cambodia, Ethiopia, Cuba, South Yemen, Angola, Afghanistan, Grenada, and Nicaragua.

The only real empire in the world today is the Communist empire, principally the Soviet, and it goes about like a lion seeking whom it may devour. Can there be any doubt that, in addition to Nicaragua, other central American countries have been targeted to enlarge even further the far-flung Soviet empire, countries such as Honduras, Guatemala, Belize, and, yes, El Salvador? The Soviets have publicly, repeatedly, and arrogantly stated that they seek, in accord with the dialectical laws of history, to further the class struggle by any means, including violent revolution, until they achieve global hegemony over the Western forces of decadent, bourgeois capitalism. Yet we in the West seem to be morally and intellectually disarmed in the face of this demonic, ideological onslaught as if subconsciously fulfilling those terrible prophetic words of the Irish poet Yeats: "the best lack all conviction, while the worst are full of passionate intensity."

Recently, I received a letter from a constituent, a Catholic nun who chairs the Department of Theology of my own alma mater of Loyola-Marymount University in Los Angeles, in which she ripped into me for not personally talking with the people in El Salvador and said she is going to do all that she can to rip me out of office because I oppose the revolutionary activities of the leftist guerrillas. She also implied that there are benevolent Marxist regimes (she mentioned Yugoslavia and Nicaragua) and that they should be preferred to right-wing, authoritarian regimes.

It is a sad commentary on our times when a prominent representative of a religious order actually believes that Marxism has a human face in the wake of Afghanistan, the Cuban and Vietnamese boat people, and the current heroic efforts of the Catholic people of Poland to rid themselves of the yoke of Marxist tyranny. Nobody is going to tell me about the face of Communism because I've been there. I've walked the streets of Riga, Leningrad, and Kiev, all night, meeting with Jewish dissidents and Christian Pentecostals. I know what we're up against. The good but naive sister also ignores the teaching authority of her own Church which has repeatedly denounced Marxism-Leninism in no uncertain terms as being intrinsically at war with Christianity. She even has the temerity to contradict the assessment of the acting Archbishop of San Salvador, the Reverend Arturo Rivera y Damas. In a homily delivered on March 8 of this year, Archbishop Damas emphatically stated that "It is true that the leftist groups have maximized violence and their adherence to Marxism, and for this reason that majority of the people have turned their backs on them * * * But now the Church is raising her voice more insistently with the extreme leftists, telling them not to insist on using weapons as a solution, since obviously there is no advantage to it * * * Terrorism is not liberation, but merely a pseudo-political form of destabilization which paralyzes creative initiative, causes exhaustion and frustration in those who have nothing to look forward to, and encourages anarchy, disorder, theft, and other crimes."

A PERSONAL VISIT

When I was elected to our Congress in 1976, I vowed that if ever there was going to be a debate about giving military aid to a government suffering Communist subversion and terrorism I would, if at all possible, avail myself of first-hand knowledge and try to immerse myself in the situation as much as time would allow. This past Easter week, I spent five days and four nights in El Salvador—at my own expense. During my stay in the smallest and most densely populated country in Central America (about the size of Massachusetts with a population of 4.67 million people), I drew upon my former experiences as an Air Force intelligence officer and as a news reporter and visited with as many people from all walks of life as I possibly could. I talked with a simple fisherman down on the beach Holy Saturday night; I spoke with a fringe element of the former propertied elite class now angrily referred to as the "oligarch"; I spoke with our people in the U.S. embassy including the Marines in the sandbagged strongpoints on the embassy roof; I talked with people who are investigating the killing of Mike Hammer, Mark Pearlman, and Señor Rodolfo Viera as well as the brutal execution-style killing of three U.S. nuns and a Catholic social worker; I spent one night near La Libertad, the work area of the murdered nun and social worker who were assigned to El Salvador by their Cleveland bishop. The conclusion of my trip was a two hour meeting with President Jose Napoleon Duarte who is a respected Catholic (a Notre Dame graduate of the class of '48) and a trained civil engineer. My conversations with President Duarte and Salvadorans who are working hard for land reform and social justice have convinced me beyond any possible doubt that the El Salvadoran government is up against the most infamous gun-running operation in the history of the western hemisphere. There has never been a parallel, even taking into account Nicaragua in 1979 or Cuba in the 50's. The strategy is clear: the establishment of yet another armed Soviet client state to further Soviet imperialistic aims in Central America and the Caribbean—and this time within striking distance of the critical oil fields in Mexico.

That is why State Department Special Report No. 80 should be required reading for every member of the House and Senate. This report documents with incontrovertible evidence what it graphically describes as "a textbook case of indirect armed aggression by Communist powers through Cuba." It provides a detailed chronology: in 1980, El Salvador's Communist party leader Shafik Handal personally visited and received commitments of arms, materiel, and promises to train insurgent forces from the Soviet Union and such Soviet client states as Vietnam, East Germany, Czechoslovakia, Bulgaria, Hungary, Ethiopia, and the Palestine Liberation Organization (PLO). Vietnam alone agreed to provide 60 tons of arms, most of it part of the $8,000,000,000 we left behind in Indochina. According to captured documents, arms and materiel commitments by these Communist countries to the El Salvadoran guerrillas totaled 780 tons!

To get an idea of the magnitude of this commitment, the Vietnamese offer of 60 tons included 2 million rifle and machinegun bullets; 14,500 mortar shells; 1,620 rifles; 210 machineguns; 48 mortars; 12 rocket launchers; and 192 pistols. Weapons that the El Salvadoran leftist guerrillas now have in their possession include: Israeli UZI submachineguns and Galil assault rifles; powerful German G-3 rifles; Belgian FAL semiautomatic rifles; U.S. M-1, M-16, and AR-15 semiautomatic and automatic rifles; 30 and 50 caliber machineguns; U.S. M-60 machineguns; U.S. and Soviet hand grenades; U.S. and Chinese grenade launchers; U.S. M-72 light antitank weapons; and U.S. 81mm mortars.

These massive supplies of arms and ammunition were to be sent, and now are being sent, to El Salvador by way of Cuba and Nicaragua—a veritable Castro-Sandinista Caribbean pipeline! This unprecedented gun-running operation must be judged against the fact that from 1977 until January of 1981, the United States provided absolutely no weapons or ammunition to the Salvadoran armed forces. In January of 1981, mounting evidence of Communist involvement compelled President Carter to authorize a resupply of weapons and ammunition to El Salvador. This massive outside intervention on the part of Communist countries dramatically changed the nature of the struggle in El Salvador from an internal conflict to an international one with East-West dimensions.

DUARTE VERSUS EXTREME RIGHT AND LEFT

The Marxist guerrilla-front organization FDR, the Revolutionary Democratic Front, has successfully influenced the Western media by pushing the big lie of a freedom-loving band of revolutionaries seeking to "liberate" the El Salvadoran people from the oppressive "rightist" regime of President Duarte. The truth as documented by the State Department and corroborated by my own visit is far different. The present government headed by President Duarte which includes three civilians (two Christian Democrats and one independent) and one military officer is a centrist government opposed to both the extreme left and the extreme right. On October 15, 1979, progressive Salvadoran military officers and moderate civilian leaders overthrew the right-wing regime of General Humberto Romero in a bloodless coup and ousted over 80 senior officers, installing an interim governing council.

In the proclamation of October 15, the new government announced its commitment to far-reaching reforms aimed at breaking the political and economic power of a small, wealthy, propertied oligarchy (sometimes referred to as "the 14 families" but, in fact, including many more) which had dominated El Salvador for the past 50 years. Both the far left and the far right were taken by surprise. The far left accused the new government of being a puppet of the United States and of the far right and moved to open confrontation. The far right attempted to block the reform measures and, when that failed, attempted to overthrow the government.

In January 1980, the first junta dissolved because it could neither implement its announced reforms nor deal with increasing violence. The young officers responsible for the October 15 coup succeeded, however, in persuading the Christian Democrats to join them in an interim coalition until a new government could be freely elected. Since March 1980 and despite continued resistance from both the right and the left, the Duarte government has proceeded with its sweeping reform program which includes the following: (1) an agrarian reform which expropriated all estates larger than 1250 acres, and set the stage for granting 90% of all other arable land to peasant cooperatives or sharecroppers; (2) financial reforms, primarily through the nationalization of banks. The government assumed 51 percent ownership in the banks and stipulated that the remaining shares be sold to bank employees and to the public, with no individual or family allowed to hold more than one percent of the total; (3) nationalization of export marketing of primary products (coffee, sugar, and cotton); (4) electoral reform by means of an electoral commission which will prepare the ground work for voter registration as well as electoral procedures and laws that will culminate in the election of a constituent assembly in 1982 and popular elections for a president and congress by mid-1983; (5) a military code of conduct which provides the government and military high command with a basis for punishing elements of the security forces who engage in abuses of authority and human rights violations. In addition, the Duarte government has made clear its willingness to negotiate the terms of future political processes with democratic members of all opposition forces—most notably, by accepting the offer of El Salvador's Council of Bishops to mediate between the government and the Revolutionary Democratic Front of the leftist guerrillas. The leftist Front rejected the offer.

On January 10, 1981, the Marxist guerrilla forces in El Salvador under the command of the Cuban-organized Unified Revolutionary Directorate, the DRU, began their so-called "final offensive" to overthrow the Duarte government calling for strikes and a popular insurrection. They called three general strikes in June, July, and August of 1980 which proved to be disappointing failures.

With the failure of the strikes, the left realized that it had little popular support and turned increasingly to a campaign of outright terrorism, burning crops and businesses and murdering hundreds of people—all with Cuban counseling and assistance. But by demonstrating their political failure in the ineffectual strikes of last summer, the

leftist guerrillas revealed their vulnerability—their lack of support among the people. As Mao Tse-tung, the premier guerrilla leader of this century said: "The guerrilla swims in the sea of people," but there is no sea for the guerrillas to swim in El Salvador. And in the process the Marxist guerrillas have shown once again, for all who would see, the true face of Marxist-Communism: hatred, violence, and murder by a self-annointed elite seeking to impose its totalitarian ideology. As the Archbishop of San Salvador, the Reverend Arturo Rivera y Damas stated on March 8 of this year (1981): "It is true that the leftist groups have maximized violence and their adherence to Marxism, and for this reason the majority of the people have turned their backs on them."

The crackdown on the right by the Duarte government also continues without letup. The government in the early part of May of this year arrested six members of the nation's security forces in connection with last year's execution-style slayings of three U.S. Catholic nuns and a social worker, an action praised by Archbishop Damas as evidence that justice is possible in El Salvador.

In sum, although many people have reserved judgment on the government, the increasing terrorism perpetrated by the far right and the far left appears to have convinced the vast majority of the people that these extremes offer no valid alternatives for the future of El Salvador.

WHAT IS TO BE DONE?

Can the United States afford to stand idly by in the face of the largest gun-running operation in the history of the western hemisphere with the prospect of El Salvador becoming yet another Soviet client state in the business of exporting Marxist-Leninist revolutions throughout the rest of Central and South America? We already face that prospect in Nicaragua. As the respected author and journalist, Cord Meyer, pointed out in an editorial (May 9, The Washington Star): "The American media are overlooking more significant developments in Nicaragua that could transform that country into Castro's first armed beachhead on the mainland of the hemisphere. Contrary to the expectations of Jimmy Carter's more naive advisers, the Sandinista regime is turning out to be dominated by ideologically committed Communists. Castro's man in Managua, Sandinista Defense Minister Humberto Ortega, has boasted that he is reorganizing the ill-trained Sandinista guerrillas into a regular army of 50,000 backed up by an armed militia of 200,000 to make it by far the largest force in Central America."

Mr. Meyer goes on to note (construction I've seen beginning with my own eyes): "More ominously, two Nicaraguan airfields are being extended to accommodate MIG 23s and Nicaraguan pilots are being trained in Bulgaria * * * The Soviet-assisted Cuban strategy for Central America should now be apparent to anyone prepared to put the various pieces of the puzzle together. While keeping the guerrilla resistance in El Salvador alive by clandestine arms deliveries and the continuous infiltration of new recruits trained in Cuba, Castro's main objective is to consolidate his foothold in Nicaragua until the Sandinistas are sufficiently organized to eliminate their domestic opposition. Once the Nicaraguan base has been secured by the establishment of a one-party police state on the Cuban model, there will be time enough for a massive infusion of 'volunteers' to turn the tide of the Salvadoran civil war and to open the way for a final guerrilla offensive into Guatemala * * * I would like to emphasize, once again, that El Salvador, as well as Guatemala, are within easy striking distance of the critically important oil fields of Mexico, Should the Soviets deny us oil from Mexico as well as the Persian Gulf, we would be effectively Finlandized."

On January 17, 1981, for the first time since 1977, the United States began to ship military items to El Salvador, including arms and munitions, C-rations, uniforms, and six leased "Huey" helicopters to increase the mobility of Salvadoran troops. Our January 17 emergency increase in FY 1981 military assistance (equipment and training) from $5.4 million to $10.4 million was not sufficient to permit the government to meet the threat of the foreign-supplied leftist guerrillas. We are now in the process of increasing the amount by $25 million to provide additional helicopters, to equip new quick-reaction forces, and to increase mobility and communications as well as provide needed spares and ammunition. The current fiscal year 1981 $63 million for economic assistance will also require substantial upward adjustment. At that level, economic assistance would be more than three times larger than our military assistance.

Currently, there are 54 U.S. military personnel on temporary duty to help train the Salvadoran Air Force, Army and Navy. I think I am safe in saying that I am the only member of our Congress who has spoken with these U.S. military instructors down there. I met with six of the Army people and an equal number of our Air Force personnel. We have only one Navy officer down there at present trying to figure out how to overhaul the 30 year old battered boats that are supposed to control not only the Gulf of Fonseca but the whole southern coastline of El Salvador. Let me emphasize: these military personnel are instructors, not advisors. This is not an euphemism but rather a very real distinction. In the military lexicon the word "advisor" took on a specific meaning in Indochina. It meant that when you went out with your Vietnamese Marine Unit, your Vietnamese paratroopers or other ARVN unit, you fired your weapon alongside them in hot combat. Every single military person down in El Salvador, however, has orders that he is not to engage in any fire fight or any other type of combat situation. No pulling lanyards on artillery, no hot pursuit on fast boats. All of our instructor personnel for the loaned "Huey" helicopters, the instructor pilots and the maintenance trainers, will stay at the air bases training people. Moreover, all of our people (and this is a wise requirement where we really fell apart in Vietnam) are required to be bilingual. Most do not just speak Spanish. They are literally bilingual and have Latin surnames. But one thing that all of our military instructors in El Salvador are agreed upon is that the El Salvadoran centrists can defeat the Marxist guerrillas if the Duarte armed forces are adequately supplied with arms and ammunition to counteract the massive influx of weapons from Cuba, Vietnam, and other Soviet client states (Cuba announced the morning that I was meeting with Duarte, April 20, that Castro expected the Soviet Union to double their Cuban aid from $9 million to $18 or $20 million a day). Estimates of the number of guerrillas in El Salvador are around 4,000 with approximately 5,000 irregulars. The regular Salvadoran armed forces—the recipients of our security assistance—total about 9,000. Various police or constabulary forces have a similar combined strength. It is absolutely imperative that we assist the Duarte government in raising that ratio of troops to guerrillas as high as possible.

EL SALVADOR IS NOT GOING TO BE ANOTHER VIETNAM

We are not going to send the Marines in here so that we can be excoriated worldwide by Communist propaganda. Our objectives are limited: (1) to help the government with its problems of training, equipment repair and maintenance mobility, and resupply so that they can adequately meet the Soviet-backed Cuban threat; (2) to assist the Duarte government eradicate the chronic social and economic ills that have fostered unrest. We agree with President Duarte that his government is not a permanent repository of power in El Salvador but simply an interim arrangement until electoral reforms and popular elections can be implemented. We believe that the future of El Salvador should be determined at the ballot box, not out of the barrel of a gun.

The United States has a solemn obligation to help its North American brothers in El Salvador in their time of need. The Spanish heritage has had a deep influence upon our own culture, enriching it immeasurably. Both of the continents in our western hemisphere share the name "America." The bonds of inter-American friendship can, and must, remain close. In the face of a militant, imperialistic, totalitarian ideology, which is hell-bent on crushing the people of El Salvador with the nightmare of yet another Gulag police state, the United States dare not retreat into a fortress-America mentality, holding our breath like ancient Troy, wondering how long we can survive and hold out as the last free country on earth. El Salvador is, after all, only two countries away from my own state of California (only Guatemala and Mexico separate us). We know that Guatemala has already been targeted for subversion by the Soviet Union and Cuba and we also know that the present Mexican government has played a very dangerous game with Fidel Castro. Unless we act now and unless we act decisively, there will be only one domino left standing in the western hemisphere—ourselves.

The last week in May of 1981, Deane R. Hinton, Ambassador to El Salvador, began his service in one of the most difficult assignments in the U.S. Foreign Service. He deserves the support of the Congress of the United States.

COMMUNIST INTERFERENCE IN EL SALVADOR

(Special Report by U.S. Department of State, Bureau of Public Affairs, February 23, 1981)

SUMMARY

This special report presents definitive evidence of the clandestine military support given by the Soviet Union, Cuba, and their Communist allies to Marxist-Leninist guerrillas now fighting to overthrow the established Government of El Salvador. The evidence, drawn from captured guerrilla documents and war materiel and corroborated by intelligence reports, underscores the central role played by Cuba and other Communist countries beginning in 1979 in the political unification, military direction, and arming of insurgent forces in El Salvador.

From the documents it is possible to reconstruct chronologically the key stages in the growth of the Communist involvement:

The direct tutelary role played by Fidel Castro and the Cuban Government in late

1979 and early 1980 in bringing the diverse Salvadoran guerrilla factions into a unified front.

The assistance and advice given the guerrillas in planning their military operations;

The series of contacts between Salvadoran Communist leaders and key officials of several Communist states that resulted in commitments to supply the insurgents nearly 800 tons of the most modern weapons and equipment;

The covert delivery to El Salvador of nearly 200 tons of those arms, mostly through Cuba and Nicaragua, in preparation for the guerrillas' failed "general offensive" of January 1981;

The major Communist effort to "cover" their involvement by providing mostly arms of Western manufacture.

It is clear that over the past year the insurgency in El Salvador has been progressively transformed into another case of indirect armed aggression against a small Third World country by Communist powers acting through Cuba.

The United States considers it of great importance that the American people and the world community be aware of the gravity of the actions of Cuba, the Soviet Union, and other Communist states who are carrying out what is clearly shown to be a well-coordinated, covert effort to bring about the overthrow of El Salvador's established government and to impose in its place a Communist regime with no popular support.

I. A CASE OF COMMUNIST MILITARY INVOLVEMENT IN THE THIRD WORLD

The situation in El Salvador presents a strikingly familiar case of Soviet, Cuban, and other Communist military involvement in a politically troubled Third World country. By providing arms, training, and direction to a local insurgency and by supporting it with a global propaganda campaign, the Communists have intensified and widened the conflict, greatly increased the suffering of the Salvadoran people, and deceived much of the world about the true nature of the revolution. Their objective in El Salvador as elsewhere is to bring about—at little cost to themselves—the overthrow of the established government and the imposition of a Communist regime in defiance of the will of the Salvadoran people.

The Guerrillas: Their tactics and propaganda. El Salvador's extreme left, which includes the long-established Communist Party of El Salvador (PCES) and several armed groups of more recent origin, has become increasingly committed since 1976 to a military solution. A campaign of terrorism—bombings, assassinations, kidnapings, and seizures of embassies—has disrupted national life and claimed the lives of many innocent people.

During 1980, previously fragmented factions of the extreme left agreed to coordinate their actions in support of a joint military battle plan developed with Cuban assistance. As a precondition for large-scale Cuban aid, Salvadoran guerrilla leaders, meeting in Havana in May, formed first the United Revolutionary Directorate (DRU) as their central executive arm for political and military planning and, in late 1980, the Farabundo Marti People's Liberation Front (FMLN), as the coordinating body of the guerrilla organizations. A front organization, the Revolutionary Democratic Front (FDR), was also created to disseminate propaganda abroad. For appearances sake, three small non-Marxist-Leninist political parties were brought into the front, though they have no representation in the DRU.

The Salvadoran guerrillas, speaking through the FDR, have managed to deceive many about what is happening in El Salvador. They have been aided by Nicaragua and by the worldwide propaganda networks of Cuba, the Soviet Union, and other Communist countries.

The guerrillas' propaganda aims at legitimizing their violence and concealing the Communist aid that makes it possible. Other key aims are to discredit the Salvadoran Government, to misrepresent U.S. policies and actions, and to foster the impression of overwhelming popular support for the revolutionary movement.

Examples of the more extreme claims of their propaganda apparatus—echoed by Cuban, Soviet, and Nicaraguan media—are:

That the United States has military bases and several hundred troops in El Salvador (in fact, the United States has no bases and fewer than 50 military personnel there);

That the government's security forces were responsible for most of the 10,000 killings that occurred in 1980 (in their own reports in 1980, the guerrillas themselves claimed the killings of nearly 6,000 persons, including noncombatant "informers" as well as government authorities and military).

In addition to media propaganda, Cuba and the Soviet Union promote the insurgent cause at international forums, with individual governments, and among foreign opinion leaders. Cuba has an efficient network for introducing and promoting representatives of the Salvadoran left all over the world. Havana and Moscow also bring indirect pressure on some governments to support the Salvadoran revolutionaries by mobilizing local Communist groups.

II. COMMUNIST MILITARY INTERVENTION: A CHRONOLOGY

Before September 1980 the diverse guerrilla groups in El Salvador were ill-coordinated and ill-equipped, armed with pistols and a varied assortment of hunting rifles and shotguns. At that time the insurgents acquired weapons predominantly through purchases on the international market and from dealers who participated in the supply of arms to the Sandinistas in Nicaragua.

By January 1981 when the guerrillas launched their "general offensive," they had acquired an impressive array of modern weapons and supporting equipment never before used in El Salvador by either the insurgents or the military. Belgian FAL rifles, German G-3 rifles, U.S. M-1, M-16, and AR-15 semiautomatic and automatic rifles, and the Israeli UZI submachinegun and Galil assault rifle have all been confirmed in the guerrilla inventory. In addition, they are known to possess .30 to .50 caliber machineguns, the U.S. M-60 machinegun, U.S. and Russian hand grenades, the U.S. M-79 and Chinese RPG grenade launchers, and the U.S. M-72 light antitank weapon and 81mm mortars. Captured ammunition indicates the guerrillas probably possess 60mm and 82mm mortars and 57mm and 75mm recoilless rifles.

Recently acquired evidence has enabled us to reconstruct the central role played by Cuba, other Communist countries, and several radical states in the political unification and military direction of insurgent forces in El Salvador and in equipping them in less than 6 months with a panoply of modern weapons that enabled the guerrillas to launch a well-armed offensive.

This information, which we consider incontrovertible, has been acquired over the past year. Many key details, however, have fallen into place as the result of the guerrillas' own records. Two particularly important document caches were recovered from the Communist Party of El Salvador in November 1980 and from the Peoples' Revolutionary Army (ERP) in January 1981. This mass of captured documents includes battle plans, letters, and reports of meetings and travels, some written in cryptic language and using code words.

VIETNAM PROMISES WEAPONS

Quantity and type:
192—9mm pistols.
1,620—AR-15 (M-16) semiautomatic rifles.
162—30-caliber machineguns.
36—7.62mm M-60 machineguns.
12—12.7-caliber M-50 antiair machineguns.
36—62mm mortars.
12—81mm mortars.
12—DKZ-57 antitank rocket launchers.
15,000—9mm rounds.
1,500,000—AR-15 rounds (5.56mm).
240,000—7.62mm M-60 rounds.
240,000—30-caliber rounds.
130,000—12.7-caliber M-50 rounds.
9,000—62mm mortar rounds.
4,000—81mm mortar rounds.
1,500—DKZ-57 antitank rocket grenades.

MODERN WEAPONS NOW IN GUERRILLA INVENTORY

Belgian FAL semiautomatic rifle
German G-3 rifle
U.S. M-1, M-16, and AR-15 semiautomatic and automatic rifles
Israeli UZI submachinegun and Galil assault rifle
30 and 50 caliber machineguns
U.S. M-60 machinegun
U.S. and Soviet hand grenades
U.S. and Chinese grenade launchers
U.S. M-72 light antitank weapon
U.S. 81mm mortars

When deciphered and verified against evidence from other intelligence sources, the documents bring to light the chain of events leading to the guerrillas' January 1981 offensive. What emerges is a highly disturbing pattern of parallel and coordinated action by a number of Communist and some radical countries bent on imposing a military solution.

The Cuban and Communist role in preparing for and helping to organize the abortive "general offensive" early this year is spelled out in the following chronology based on the contents of captured documents and other sources.

Initial steps. The chronology of external support begins at the end of 1979. With salutations of "brotherly and revolutionary greetings" on December 16, 1979, members of the Communist Party of El Salvador (PCES), National Resistance (FARN), and Popular Liberation Forces (FPL) thank Fidel Castro in a letter for his help and "the help of your party comrades . . . by signing an agreement which establishes very solid bases upon which we begin building coordination and unity of our organizations." The letter, written in Havana, was signed by leaders of these three revolutionary organizations.

At an April 1980 meeting at the Hungarian Embassy in Mexico City, guerrilla leaders made certain "requests" (possibly for arms). Present at this meeting were representatives of the German Democratic Republic, Bulgaria, Poland, Vietnam, Hungary, Cuba, and the Soviet Union.

In notes taken during an April 28, 1980 meeting of the Salvadoran Communist Party, party leader Shafik Handal mentions the need to "speed up reorganization and

put the Party on a war footing." He added, "I'm in agreement with taking advantage of the possibilities of assistance from the socialist camp. I think that their attitude is magnificent. We are not yet taking advantage of it." In reference to a unification of the armed movement, he asserts that "the idea of involving everyone in the area has already been suggested to Fidel himself." Handal alludes to the concept of unification and notes, "Fidel thought well of the idea."

GUERRILLA CONTACTS IN HAVANA

From May 5 to June 8, 1980, Salvadoran guerrilla leaders report on meetings in Honduras, Guatemala, Costa Rica, and Nicaragua. They proceed to Havana and meet several times with Fidel Castro; the documents also note in interview with the German Democratic Republic (G.D.R.) Chairman Erich Honecker in Havana. During the Havana portion of their travels, the Salvadoran guerrilla leadership meets twice with the Cuban Directorate of Special Operations (DOE, the clandestine operations/special forces unit of the Cuban Ministry of Interior) to discuss guerrilla military plans. In addition, they meet with the Cuban "Chief of Communications."

During this period (late May 1980), the Popular Revolutionary Army (ERP) is admitted into the guerrilla coalition after negotiations in Havana. The coalition then assumes the name of the Unified Revolutionary Directorate (DRU) and meets with Fidel Castro on three occasions.

After the Havana meetings, Shafik Handal leaves Havana on May 30, 1980 for Moscow. The other Salvadoran guerrilla leaders in Havana leave for Managua. During the visit of early June, the DRU leaders meet with Nicaraguan revolutionary leaders (Sandinistas) and discuss: (1) a headquarters with "all measures of security"; (2) an "international field of operations, which they (Sandinistas) control"; and (3) the willingness of the Sandinistas to "contribute in material terms" and to adopt "the cause of El Salvador as its own." The meeting culminated with "dinner at Humberto's house" (presumably Sandinista leader Humberto Ortega).

Salvadoran Communist Party Leader's Travels in the East. From June 2 to July 22, 1980, Shafik Handael visits the U.S.S.R., Vietnam, the German Democratic Republic, Czechoslovakia, Bulgaria, Hungary, and Ethiopia to procure arms and seek support for the movement.

On June 2, 1980, Handal meets in Moscow with Mikhail Kudachkin, Deputy Chief of the Latin American Section of the Foreign Relations Department of the CPSU Central Committee. Kudachkin suggests that Handal travel to Vietnam to seek arms and offers to pay for Handal's trip.

Continuing his travels between June 9 and 15, Handal visits Vietnam where he is received by Le Duan, Secretary General of the Vietnamese Communist Party; Xuan Thuy, member of the Communist Party Central Committee Secretariat; and Vice Minister of National Defense Tran Van Quang. The Vietnamese, as a "first contribution," agree to provide 60 tons of arms. Handal adds that "the comrade requested air transport from the USSR."

From June 19 to June 24, 1980, Handal visits the German Democratic Republic (G.D.R.), where he is received by Hermann Axen, member of the G.D.R. Politburo. Axen states that the G.D.R. has already sent 1.9 tons of supplies to Managua. On July 21, G.D.R. leader Honecker writes the G.D.R. Embassy in Moscow that additional supplies will be sent and that the German Democratic Republic will provide military training, particularly in clandestine operations. The G.D.R. telegram adds that although Berlin possesses no Western-manufactured weapons—which the Salvadoran guerrillas are seeking—efforts will be undertaken to find a "solution to this problem." (NOTE: The emphasis on Western arms reflects the desire to maintain plausible denial.)

From June 24–27, 1980, Handal visits Czechoslovakia where he is received by Vasil Bilak, Second Secretary of the Czech Communist Party. Bilak says that some Czech arms circulating in the world market will be provided so that these arms will not be traced back to Czechoslovakia as the donor country. Transportation will be coordinated with the German Democratic Republic.

Handal proceeds to Bulgaria from June 27 to June 30, 1980. He is received by Dimitir Stanichev, member of the Central Committee Secretariat. The Bulgarians agree to supply German-origin weapons and other supplies, again in an apparent effort to conceal their sources.

In Hungary, from June 30 to July 3, 1980, Handal is received by Communist Party General Secretary Janos Kadar and "Guesel" (probably Central Committee Secretary for Foreign Affairs Andras Gyenes). The latter offers radios and other supplies and indicates Hungarian willingness to trade arms with Ethiopia or Angola in order to obtain Western-origin arms for the Salvadoran guerrillas. "Guesel" promises to resolve the trade with the Ethiopians and Angolans himself, "since we want to be a part of providing this aid." Additionally, Handal secures the promise of 10,000 uniforms to be made by the Hungarians according to Handal's specifications.

Handal then travels to Ethiopia, July 3 to July 6. He meets Chairman Mengistu and receives "a warm reception." Mengistu offers "several thousand weapons," including: 150 Thompson submachineguns with 300 cartridge clips, 1,500 M-1 rifles, 1,000 M-14 rifles, and ammunition for these weapons. In addition, the Ethiopians agree to supply all necessary spare parts for these arms.

Handal returns to Moscow on July 22, 1980 and is received again by Mikhail Kudachkin. The Soviet official asks if 30 Communist youth currently studying in the U.S.S.R. could take part in the war in El Salvador. Before leaving Moscow, Handal receives assurances that the Soviets agree in principle to transport the Vietnamese arms.

Further Contacts in Nicaragua. On July 13, representatives of the DRU arrive in Managua amidst preparations for the first anniversary celebration of Somoza's overthrow. The DRU leaders wait until July 23 to meet with "Comrade Bayardo" (presumably Bayardo Arce, member of the Sandinista Directorate). They complain that the Sandinistas appear to be restricting their access to visiting world dignitaries and demanding that all contacts be cleared through them. During the meeting, Arce promises ammunition to the guerrillas and arranges a meeting for them with the Sandinista "Military Commission." Arce indicates that, since the guerrillas will receive some arms manufactured by the Communist countries, the Sandinista Army (EPS) will consider absorbing some of these weapons and providing to the Salvadorans Western-manufactured arms held by the EPS in exchange. (In January 1981 the Popular Sandinista Army indeed switched from using U.S.-made weapons to those of Soviet and East European origin.)

The DRU representatives also meet with visiting Palestine Liberation Organization (PLO) leader Yasir Arafat in Managua on July 22, 1980. Arafat promises military equipment, including arms and aircraft. (A Salvadoran guerrilla leader met with FATAH leaders in Beirut in August and November, and the PLO has trained selected Salvadorans in the Near East and in Nicaragua.)

On July 27, the guerrilla General Staff delegation departs from Managua for Havana, where Cuban "specialists" add final touches to the military plans formulated during the May meetings in Havana.

Arms Deliveries Begin. In mid-August 1980, Shafik Handal's arms-shopping expedition begins to bear fruit. On August 15, 1980, Ethiopian arms depart for Cuba. Three weeks later the 60 tons of captured U.S. arms sent from Vietnam are scheduled to arrive in Cuba.

As a result of a Salvadoran delegation's trip to Iraq earlier in the year, the guerrillas receive a $500,000 logistics donation. The funds are distributed to the Sandinistas in Nicaragua and within El Salvador.

By mid-September, substantial quantities of the arms promised to Handal are well on the way to Cuba and Nicaragua. The guerrilla logistics coordinator in Nicaragua informs his Joint General Staff on September 26 that 130 tons of arms and other military material supplied by the Communist countries have arrived in Nicaragua for shipment to El Salvador. According to the captured documents, this represents one-sixth of the commitments to the guerrillas by the Communist countries. (NOTE: To get an idea of the magnitude of this commitment, the Vietnamese offer of only 60 tons included 2 million rifle and machinegun bullets, 14,500 mortar shells, 1,620 rifles, 210 machineguns, 48 mortars, 12 rocket launchers, and 192 pistols.)

In September and October, the number of flights to Nicaragua from Cuba increased sharply. These flights had the capacity to transport several hundred tons of cargo.

At the end of September, despite appeals from the guerrillas, the Sandinistas suspend their weapons deliveries to El Salvador for 1 month, after the U.S. Government lodges a protest to Nicaragua on the arms trafficking.

When the shipments resume in October, as much as 120 tons of weapons and materiel are still in Nicaragua and some 300–400 tons are in Cuba. Because of the difficulty of moving such large quantities overland, Nicaragua—with Cuban support—begins airlifting arms from Nicaragua into El Salvador. In November, about 2.5 tons of arms are delivered by air before accidents force a brief halt in the airlift.

In December, Salvadoran guerrillas, encouraged by Cuba, begin plans for a general offensive in early 1981. To provide the increased support necessary, the Sandinistas revive the airlift into El Salvador. Salvadoran insurgents protest that they cannot absorb the increased flow of arms, but guerrilla liaison members in Managua urge them to increase their efforts as several East European nations are providing unprecedented assistance.

A revolutionary radio station—Radio Liberacion—operating in Nicaragua begins broadcasting to El Salvador on December 15, 1980. It exhorts the populace to mount a massive insurrection against the govern-

ment. (References to the Sandinistas sharing the expenses of a revolutionary radio station appear in the captured documents.)

On January 24, 1981, a Cessna from Nicaragua crashes on takeoff in El Salvador after unloading passengers and possibly weapons. A second plane is strafed by the Salvadoran Air Force, and the pilot and numerous weapons are captured. The pilot admits to being an employee of the Nicaraguan national airline and concedes that the flight originated from Sandino International Airport in Managua. He further admits to flying two earlier arms deliveries.

Air supply is playing a key role, but infiltration by land and sea also continues. Small launches operating out of several Nicaraguan Pacific ports traverse the Gulf of Fonseca at night, carrying arms, ammunition, and personnel. During the general offensive on January 13, several dozen well-armed guerrillas landed on El Salvador's southeastern coast on the Gulf of Fonseca, adjacent to Nicaragua.

Overland arms shipments also continue through Honduras from Nicaragua and Costa Rica. In late January, Honduran security forces uncover an arms unfiltration operation run by Salvadorans working through Nicaragua and directed by Cubans. In this operation, a trailer truck is discovered carrying weapons and ammunition destined for Savadoran guerrillas. Weapons include 100 U.S. M-16 rifles and 81mm mortar ammunition. These arms are a portion of the Vietnamese shipment: A trace of the M-16s reveals that several of them were shipped to U.S. units in Vietnam where they were captured or left behind. Using this network, perhaps five truckloads of arms may have reached the Salvadoran guerrillas.

The availability of weapons and materiel significantly increases the miltary capabilities of the Salvadoran insurgents. While attacks raged throughout the country during the "general offensive" that began on January 10, it soon became clear that the DRU could not sustain the level of violence without suffering costly losses in personnel. By the end of January, DRU leaders apparently decided to avoid direct confrontation with government forces and reverted to sporadic guerrilla terrorist tactics that would reduce the possibility of suffering heavy casualties.

III. THE GOVERNMENT: THE SEARCH FOR ORDER AND DEMOCRACY

Central America's smallest and most densely populated country is El Salvador. Since its independence in 1838, the country has experienced chronic political instability and repression, widespread poverty, and concentration of wealth and power in the hands of a few families. Although considerable economic progress took place in the 1960s, the political system remained in the hands of a traditional economic elite backed by the military. During the 1970s, both the legitimate grievances of the poor and landless and the growing aspirations of the expanding middle classes met increasingly with repression. El Salvador has long been a violent country with political, economic, and personal disputes often resulting in murders.

The present government. Aware of the need for change and alarmed by the prospect of Nicaragua-like chaos, progressive Salvadoran military officers and civilians overthrew the authoritarian regime of General Carlos Humberto Romero in October 1979 and ousted nearly 100 conservative senior officers.

After an initial period of instability, the new government stabilized around a coalition that includes military participants in the October 1979 coup, the Christian Democratic Party, and independent civilians. Since March 1980, this coalition has begun broad social changes: conversion of large estates into peasant cooperatives, distribution of land to tenant farmers, and nationalization of foreign trade and banking.

Four Marxist-Leninist guerrilla groups are using violence and terrorism against the Salvadoran Government and its reforms. Three small non-Marxist-Leninist political parties—including a Social Democratic Party—work with guerrilla organizations and their political fronts through the Democratic Revolutionary Front (FDR), most of whose activities take place outside El Salvador.

The Government of El Salvador—headed since last December by Jose Napleon Duarte, the respected Christian Democrat denied office by the military in the Presidential elections of 1972—faces armed opposition from the extreme right as well as from the left. Exploiting their traditional ties to the security forces and the tendency of some members of the security forces to abuse their authority, some wealthy Salvadorans affected by the Duarte government's reforms have sponsored terrorist activities against supporters of the agrarian and banking reforms and against the government itself.

A symbiotic relationship has developed between the terrorism practiced by extremists of both left and right. Thousands have died without regard to class, creed, nationality, or politics. Brutal and still unexplained murders in December of four American churchwomen—and in January of two American trade unionists—added U.S. citizens to the toll of this tragic violence. The United States has made clear its interest in a complete investigation of these killings and the punishment of those responsible.

Despite bitter resistance from right and left, the Duarte government has stuck to its reform programs and has adopted emergency measures to ease the lot of the poor through public works, housing projects, and aid to marginal communities. On the political front, it has offered amnesty to its opponents, scheduled elections for a constituent assembly in 1982, and pledged to hand power over to a popularly elected government no later than mid-1983.

The government's pursuit of progress with order has been further hampered by the virtual breakdown of the law enforcement and judicial system and by the lack of an effective civil service.

The introduction of the reforms—some of which are now clearly irreversible—has reduced popular support for those who argue that change can only come about through violence. Few Salvadorans participate in antigovernment demonstrations. Repeated calls by the guerrillas for general strikes in mid- and late-1980 went unheeded. The Duarte government, moreover, has made clear its willingness to negotiate the terms of future political processes with democratic members of all opposition forces—most notably, by accepting the offer of El Salvador's Council of Bishops to mediate between the government and the Democratic Revolutionary Front.

In sum, the Duarte government is working hard and with some success to deal with the serious political, social, and economic problems that most concern the people of El Salvador.

U.S. Support. In its commitment to reform and democracy, the Government of El Salvador has had the political support of the United States ever since the October 1979 revolution. Because we give primary emphasis to helping the people of El Salvador, most of our assistance has been economic. In 1980, the United States provided nearly $56 million in aid, aimed at easing the conditions that underlie unrest and extremism. This assistance has helped create jobs, feed the hungry, improve health and housing and education, and support the reforms that are opening and modernizing El Salvador's economy. The United States will continue to work with the Salvadoran Government toward economic betterment, social justice and peace.

Because the solution in El Salvador should be of the Salvadorans' own making and nonviolent, the United States has carefully limited its military support. In January, mounting evidence of Communist involvement compelled President Carter to authorize a resupply of weapons and ammunition to El Salvador—the first provision of lethal items since 1977.

IV. SOME CONCLUSIONS

The foregoing record leaves little doubt that the Salvadoran insurgency has become the object of a large-scale commitment by Communist states outside Latin America.

The political direction, organization, and arming of the insurgency is coordinated and heavily influenced by Cuba—with active support of the Soviet Union, East Germany, Vietnam, and other Communist states.

The massing and delivery of arms to the Salvadoran guerrillas by those states must be judged against the fact that from 1977 until January 1981 the United States provided no weapons or ammunition to the Salvadoran Armed Forces.

A major effort has been made to provide "cover" for this operation by supplying arms of Western manufacture and by supporting a front organization known as the Democratic Revolutionary Front to seek non-Communist political support through propaganda.

Although some non-Communist states have also provided material support, the organization and delivery of this assistance, like the overwhelming mass of arms, are in the hands of Communist-controlled networks.

In short, over the past year, the insurgency in El Salvador has been progressively transformed into a textbook case of indirect armed aggression by Communist powers through Cuba.

HUMAN RIGHTS: NO TIME FOR BACKING OFF

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. FASCELL) is recognized for 30 minutes.

Mr. FASCELL. Mr. Speaker, nothing is closer to the soul of the American character than its concern for human rights and freedom.

In our Declaration of Independence, we stated first our belief in the individual's unalienable right to life, liberty, and the pursuit of happiness, and then our conviction that the purpose for which governments are established is to secure those rights.

During the course of two centuries, we Americans have struggled constant-

ly to achieve the high ideals of human conduct that we set for ourselves in our founding documents. And, in the process of this struggle, sometimes bloody, often litigious, and always continuing, America has come to be seen by generations of people at home and abroad as a bulwark of human rights and freedom.

During the past 8 years, the Congress has initiated and seen to the implementation of a body of legislation that has gone far to enhance that image. By weaving the expression of our concern for human rights into the fabric of our international activity, we have moved to insure that our action in the community of nations is reflective of the ideals we have set for ourselves as a people. The last administration, cooperating with the Congress, attracted widespread support for the cause of human rights internationally by making it a prominent feature of its foreign policy.

Important elements of machinery were put in place in our Government to insure that promotion of respect for human rights and fundamental freedoms would be taken into account in the formulation and execution of foreign policy. Each Ambassador was made responsible for reporting to the Secretary of State, and, in his turn, the Secretary to the Congress, the record of each country with which we maintain relations, in regard to its protection of human rights and freedom. And it was made clear that the record would play a consequential role in determining the nature of our relations with such governments. At the same time, important new initiatives were undertaken in the United Nations, with international financial institutions, and in other international fora to engender more effective multilateral activity on behalf of human rights.

The construction of this policy, as many of our colleagues will recall, was not easy, and it entailed a great deal of effort by many people, not only in the Congress and the executive branch, but in the private sector as well. Indeed, the aegis for this policy came, as is natural for those major directions of government which express most fundamentally the national character, from the electorate itself.

Recently, we have been in a time of transition as a new administration has taken office and begun to establish its positions. During the past few months, we have watched and listened to determine what this administration's program for implementation of the country's human rights policy would be. Although its early words and actions indicated clearly that the new administration would not follow certain patterns established by its predecessor, we have waited to learn what it is that the administration will do.

It is now 4 months into the new administration, and we are still waiting. To date, the single definitive on-the-record statement by an administration spokesman is that of the State Department's Mr. William Dyess who said on March 11, in essence, that the new policy is to make friends first and raise human rights questions later, and then only in private. While this declaration does tell us something important about the new administration's style, it still says nothing about substance. And as recently as May 1, when testifying before the Senate Appropriations Committee, the Secretary of State, while assuring his questioners that human rights is not ignored in our international dealings, declined to state publicly what is being done or to give a public accounting of results.

Meantime, around the world a troublesome impression is building not only that the United States has abandoned its leadership in promotion of human rights, but that it is ready to welcome the most oppressive regimes into partnership if they but meet the test of opposition to Soviet expansionism. We do not have to look far for examples of the complications that can arise from letting such an impression develop. Only weeks after the administration lifted economic sanctions against Chile and invited it to resume military cooperation with us, the Chilean Government has become the first member of the Organization of American States to sever ties with that body's Inter-American Human Rights Commission.

In international politics, as elsewhere, perceptions are often as important as reality. The risk the administration is running by failing to offer evidence to counter this impression is that the United States will become reidentified with international racism, colonialism, and imperialism precisely at a time when we have done so much to set our own house in order and when our chief adversary, the Soviet Union, is in fact identifiable with all of the above. And, regrettably, we cannot close our eyes to another risk involved in the administration's failure to act—and that is the danger that the perception will become the reality.

The Secretary of State referred the members of the Appropriations Committee to his remarks given in an off-the-record session to the Trilateral Commission meeting in Washington on March 31, in which he outlined what he described as the administration's position on human rights. For those who might have expected that here, surely, they would find described the administration's action program, there was again disappointment and perhaps worse.

One searches the Secretary's remarks in vain for any commitments to action—any mention of specific means by which it intends to promote respect for human rights other than "to hold forth ourselves as a model worthy of imitation." One even fails to find—as a counterbalance to disquieting signals already sent—any explicit assurance that the administration intends to implement existing human rights legislation. Instead, one sees such gratuitous rebuttals of unstated premises as "we have neither the power nor the desire to remake the world in our own image," and "It does little good to remedy the grievances of a few if that brings down worse oppression on the many," and a discouraging series of "yes, buts." "Foreign policy * * * expounds a nation's ideals. But * * *;" "America is the friend of liberty everywhere, but * * *;" "We wish that every people could enjoy the blessings of liberty as we enjoy them, but * * *;" "The United States opposes the violation of human rights by ally or adversary, friend or foe * * * but * * *".

When the buts are over, there is little left but a collection of caveats and cautions, adding up to the apparent conclusion that the United States is for human rights, and will always defend them, but will do little, if anything, to extend them. It appears to be, if anything, a program of inaction.

The Secretary's statements, regrettably, only reinforce the impression already reflected by the world's press of a national government abandoning the high ground won by its previous initiatives and now in retreat from its recently shouldered international responsibilities.

The most disturbing aspect of the administration's position is its overall tone of defensiveness. It is a strange posture, indeed, for a country which has in recent years demonstrated so much capacity to effect major improvement in the protection of human rights both at home and abroad.

Throughout the Secretary's discussion, human rights policy is subsumed into the framework of resistance to Soviet aggression. "Our resistance to this aggression and our assistance to its victims"—unspecified—"constitutes a defense of human rights," he notes. And in summing up his remarks, he begins and ends on a note of defense:

"We have great principles to defend * * *;" "Human rights remains a major focus of our foreign policy, especially when we are beset * * * by the overriding issue of how to stem the advance of the enemies of human rights." And lastly, "We can advance human rights more effectively through * * * defense of our positions."

It is here that the administration is most precisely wrong. Resistance to Soviet military or economic aggression at its most is defensive containment. At its least, it means the United States refuses to use a potent and persuasive "idea weapon." Human rights is a concept more penetrating than a bomber

and eagerly embraced by millions of people in the East and throughout the world. It is fundamental. It is instinctive.

It is not the United States which should be taking the defensive where human rights are concerned. It is the Soviet Union and all other governments which practice terrorism against their own people, be they "totalitarian" or "authoritarian." The open advocacy of human rights as an important factor of U.S. foreign policy goes far beyond U.S. confrontration with the Soviet Union. It is vital in U.S. dialog and action with the Third World. To believe that a strong stance for human rights will upset the applecart in the struggle with the Soviet Union is to miss the point of how intimately the issue of human rights is bound up in the overall conflict between East and West.

There was, indeed, a time for caution, as we found when we first joined ideological battle with the Soviet Union in the cold war contests of the late 1940's and the 1950's. In the 1950's, Americans who were engaged in argumentation with the Soviet Union's trained polemicists before Third World audiences were greatly disadvantaged by the Soviets' ability to cite the human rights abuses still largely unaddressed in the United States.

In the intervening years, the United States, through the dynamics of its own democratic framework, has gone through an evolutionary process which has seen the virtual eradication of governmentally condoned human rights abuses and their replacement by a multitude of vigorous government actions at Federal, State, and local levels to secure the rights of all citizens.

During this same period, the Soviet Union has remainded a closed, oppressive and fearful regime, bullying its neighbors and afraid to allow elementary freedoms to its own citizens. It is so afraid of the issue of human rights that it generally refuses not only to discuss the subject in international fora, but even to acknowledge that it exists. The Soviet Union is so out of ammunition on this issue that, in the instances in which it tries to distract attention from its own sorry record by pointing at problems in the United States, it comes up with "Chicago gangsterism" and crime in Central Park. The Soviets' basic contention is that the U.S. human rights policy is hypocritical. For the new administration to pull back on human rights and begin once again to prop up anti-Communist dictators would be to throw the Kremlin's propagandists a lifeline when they are going down for the third time.

Somehow, the administration seems to have perceived neither how times and circumstances have changed nor how our relative position in the ideological contest with the Soviets has been strengthened. Perhaps the military aspects of the struggle loom so large that the administration's vision is obscured, but when we are talking about winning and keeping allies in a global ideological struggle, we must consider how that struggle is perceived by others.

It was put most succinctly by Wall Street lawyer and international business man Orville Schell, speaking for the Lawyers' Committee on International Human Rights, in his recent testimony before a joint session of the House Foreign Affairs Subcommittees on Human Rights and International Organizations and on Inter-American Affairs. Mr. Schell said an idea had been growing on him, particularly since attending the current Madrid Conference to review compliance—East and West—with the Helsinki accords, that:

"The real difference between the West and communism is our ideology about human rights * * *. The real operating principle in the world today, I think, is the ideological difference between the West with its human rights and the East and certain other countries * * * who do not practice those human rights." Mr. Schell described the United States focus on human rights as a "hardheaded, practical, vital element of security" and as the "best weapon" of a cold warrior. But, he admonished, it has to be applied to regimes of both the left and the right with equal fervor. He warned that it must not be seen merely as a propaganda weapon to be brandished against our enemies.

In beginning his remarks to the Trilateral Commission, the Secretary of State answered his self-posed question of whether concern for human rights is compatible with the pursuit of America's national interest by saying, "My answer to that is a resounding yes." On that we can agree. He failed in the remainder of his remarks to offer any administration program that translates that concern into action.

Congress, through foreign policy legislation, has recognized human rights advocacy as an expression of the American character. Consequently, American initiative in fostering respect for human rights has caught the imagination of the world, and, more importantly, has enlisted a great proliferation of allies, both governmental and private, in many parts of Asia, Africa, Latin America, and Europe in establishing institutions to secure and protect these rights.

This is a tide running strongly in favor of all persons and societies who would be free, and we have helped create it. We must not let that tide run out while debating whether we still have the courage to ride it.

ARSON BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Massachusetts (Mrs. HECKLER) is recognized for 10 minutes.

● Mrs. HECKLER. Mr. Speaker, I am introducing a bill today that is aimed at reducing one of America's most brutal and expensive crimes, arson. There is no more senseless and ugly death and no more painful and lasting an injury than that caused by fire. And there are few crimes that are costing Americans as much as the crime of arson.

Almost 1,000 people died and 3,000 were injured as a result of arson in 1979 including dozens of brave firefighters. Over 600,000 fires were set intentionally in the same year, about one-third of them in buildings and other structures. It has been said that in the United States, one can assume that one out of every four fires is the result of arson. The sounds of sirens can be heard in every city; arson has become an epidemic.

The average consumer must pay for all of these fires even if he or she never sees one. One out of every three dollars Americans pay for insurance is due to arson. This is one crime where all Americans pay. One of the factors fueling inflation is fire itself, and the flames touch us all.

In the last several years we have witnessed many arson incidents in hotels around the country. These fires affect not only foreign and local travelers, but all Americans who may have occasion to use a hotel facility.

To my surprise, I have recently learned that there are certain instances where arson in hotels and other places of public accommodation may not come under Federal jurisdiction and therefore would not involve the needed expertise of Federal agencies like the FBI and the U.S. Fire Administration.

Federal authorities become involved in arson-related fires only when there is a profit motive involved or an explosive device is used. Arson-for-profit schemes account for only 14 percent of all arson-related fires, so there are a great many instances where the arsonist is unhindered by Federal statute.

The bill I am introducing today would make the act of arson involving places of public accommodation a Federal crime. If no one is injured, the penalty could range from a $5,000 fine to 20 years in prison, or both. If someone is injured or killed, the penalty ranges from $50,000 to life in prison, or both.

The bill asks the existing Federal Arson Prevention and Control Task Force to report to the Congress on its activities and provide the hotel industry with preventive measures to be used against this crime.

The bill also establishes certain tax incentives for the hotel industry to invest in new and updated fire prevention and detection equipment.

This bill will play a vital role in the many areas now being pursued to stem the growing tide of arson. I would urge all of my colleagues to support this action. The bill follows:

H.R. 3795

A bill to amend title 18 of the United States Code to make arson involving public accommodations affecting interstate or foreign commerce an offense, to require a report to Congress from the Federal Arson Prevention Control Task Force, and to amend the Internal Revenue Code of 1954 to provide an investment tax credit for the installation of certain fire prevention equipment

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Arson Prevention Act of 1981".

ARSON INVOLVING PUBLIC ACCOMMODATIONS

SEC. 2. (a) Chapter 5 of title 18 of the United States Code is amended by adding at the end the following:

"§ 82. Arson involving public accommodations

"(a) Whoever willfully and maliciously sets fire to or burns, or attempts to set fire to or burn any building or structure that contains a place of public accommodation that is in or affects interstate or foreign commerce shall be fined not more than $5,000 or imprisoned not more than 20 years, or both, but if any person is placed in jeopardy of personal injury or death by the offense, the person convicted under this section of that offense shall be fined not more than $50,000, or imprisoned for life or any term of years, or both.

"(b) As used in this section, the term 'place of public accommodation' means any hotel, motel, or similar lodging that regularly accommodates short-term travellers or other temporary guests for a consideration and has more than ten rooms for the purpose of such accommodation.".

(b) The table of sections at the beginning of chapter 5 of title 18 of the United States Code is amended by adding at the end the following new item:

"82. Arson involving public accommodations.".

FEDERAL ARSON PREVENTION AND CONTROL TASK FORCE REPORT

SEC. 3. The Federal Arson Prevention Control Task Force shall report to the Congress, not later than 180 days after the date of the enactment of this Act, on the activities of such Task Force. Such report shall include—

(1) profiles on arsonists and a description of a method by which place of public accommodation can utilize such profiles to assist in arson prevention; and

(2) a description of model investigation methods and procedures that could be used by local police and fire fighting authorities to standardize investigation methodology with respect to suspicious fires at places of public accommodation.

INVESTMENT CREDIT FOR FIRE PREVENTION EQUIPMENT

SEC. 4. (a) Subparagraph (A) of section 46(a)(2) of the Internal Revenue Code of 1954 (relating to amount of investment credit) is amended by striking out "and" at the end of clause (ii), by striking out the period at the end of clause (iii) and inserting in lieu thereof ", and", and by adding at the end thereof the following new clause:

"(iv) in the cases of qualified fire prevention property, the fire prevention percentage."

(b) Paragraph (2) of section 46(a) of such Code is amended by adding at the end thereof the following new subparagraph:

"(F) FIRE PREVENTION PERCENTAGE.

"(i) IN GENERAL.—For purposes of this paragraph, the fire prevention percentage is—

"(I) 20 percent in the case of qualified fire prevention property which is an automatic sprinkler system, and

"(II) 10 percent in the case of qualified fire prevention property which is not an automatic sprinkler system.

"(ii) SPECIAL RULE FOR CERTAIN QUALIFIED FIRE PREVENTION PROPERTY.—For purposes of this paragraph, the regular percentage shall not apply to any qualified fire prevention property which is—

"(I) an automatic sprinkler system, or

"(II) property which, but for section 48(q)(1), would not be section 38 property."

(c) Section 48 of such Code (defining section 38 property) is amended by redesignating subsection (q) as subsection (r) and by inserting after subsection (p) the following new subsection:

"(q) QUALIFIED FIRE PREVENTION PROPERTY.—For purposes of this subpart—

"(1) TREATMENT AS SECTION 38 PROPERTY.—In the case of qualified fire prevention property.—

"(A) such property shall be treated as meeting the requirements of paragraph (1) of subsection (a), and

"(B) paragraph (3) of subsection (a) shall not apply to such property.

"(2) QUALIFIED FIRE PREVENTION PROPERTY DEFINED.—The term 'qualified fire prevention property' means property—

"(A) which is fire prevention property,

"(B) which is certified by the State or local agency with jurisdiction over the installation of such property as meeting the applicable State or local standards for such property (or if no State or local standards, standards promulgated by the National Fire Protection Association),

"(C)(i) the construction, reconstruction, or erection of which is completed by the taxpayer after December 31, 1980, or

"(ii) which is acquired after December 31, 1980, if the original use of the property commences with the taxpayer and commences after such date, and

"(D) with respect to which depreciation (or amortization in lieu of depreciation) is allowable, and which has a useful life (determined as of the time the property is placed in service) of 3 years or more.

"(3) FIRE PREVENTION PROPERTY.—The term 'fire prevention property' means—

"(A) an automatic sprinkler system;

"(B) a fire detection system, including a smoke detector;

"(C) a fire alarm system, including a remote alarm system;

"(D) a parapeted fire separation and division wall;

"(E) a fire door or window;

"(F) a fire door jamb and hardware;

"(G) a fire standpipe system;

"(H) a fire protection system installed in connection with any restaurant, including hoods, vents, and protected ventilator shafts;

"(I) a fire pump;

"(J) fire stairs with ventilated vestibules;

"(K) a fireproof vault for the protection of essential records;

"(L) a fire-protected computer-room installation;

"(M) equipment for the programming of elevators, with standby power to assure operation and access for firemen during a fire; and

"(N) a fire-ready room or closet containing firefighting tools and supplies."

(d) The amendments made by this section shall apply to periods—

(1) after December 31, 1980, and before January 1, 1986, under rules similar to the rules under section 48(m) of the Internal Revenue Code of 1954, and

(2) in taxable years ending after December 31, 1980.●

ESC ELECTS NEW EXECUTIVE COMMITTEE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Vermont (Mr. JEFFORDS) is recognized for 5 minutes.

● Mr. JEFFORDS. Mr. Speaker, I have the honor to call attention to the elections of an excellent House leadership team for the Environmental Study Conference for the 97th Congress.

PETE MCCLOSKEY was elected to a full term as House chairman by a unanimous vote of the executive committee May 13.

HOWARD WOLPE was elected House vice chairman by unanimous vote.

Serving with them on the conference's governing body for the 97th Congress are: TONY BEILENSON, GEORGE BROWN, DICK CHENEY, BILL CLINGER, TOM CORCORAN, BOB EDGAR, TOM EVANS, HAM FISH, DAN GLICKMAN, JOHN PAUL HAMMERSCHMIDT, CEC HEFTEL, JACK HIGHTOWER, CAP HOLLENBECK, DALE KILDEE, ELLIOTT LEVITAS, BOB LIVINGSTON, DICK OTTINGER, JIM SANTINI, CLAUDINE SCHNEIDER, JOHN SEIBERLING, TED WEISS and RON WYDEN. I will also be serving again on the executive committee.

This group is dedicated to the conference's goal of providing its Members with the best objective, reliable legislative research and constituent support on environmental, energy and natural resources issues. They will serve the conference well.●

BINGHAM OPPOSES SOCIAL SECURITY CUTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. BINGHAM) is recognized for 20 minutes.

● Mr. BINGHAM. Mr. Speaker, the administration's proposed cuts in social security benefits have alarmed millions of Americans, and understandably so. I am receiving many letters from my constituents in the Bronx and the message is loud and clear: Oppose President Reagan's cuts.

I share the concerns of my constituents.

Apparently the public outcry against these proposals is so great that the administration is slowly backing away from them. Certainly the 96–0 vote in the Senate against the cuts and the unanimous vote of the House Democratic caucus against them should convince the administration to abandon its intolerable proposals which run counter to President Reagan's campaign pledges. These cuts must not become law. I shall do what I can to see that they do not.

Certain groups would be hit especially hard by the cuts. There would be a one-third cut for the totally disabled and a 40-percent cut for those forced to retire before age 62. These cuts which would save $82 billion over the next 5 years are far greater than is necessary to insure the stability of the social security system. President Reagan and Budget director David Stockman are not attempting to protect the social security system. Their intent is to balance the budget—and on the backs of senior citizens, their dependents, and the disabled.

These proposals would break faith with millions and millions of workers who have contributed to the social security system. Let us not forget that social security represents a compact between a worker, his employer, and the Federal Government. The Reagan proposals, if enacted, would tear that compact asunder. Benefits are a right—an earned right—and any attempt to cut these benefits would be a statement that the U.S. Government is not as good as its word.

The Reagan administration has claimed that only one of its proposals—the delay in the effective date of the cost-of-living adjustment—would affect current retirees. Unfortunately this is not the case. The administration has proposed eliminating the minimum $122 social security benefit for 3 million people now receiving it. Such persons would see their benefits calculated to reflect their actual earnings. Many of them would not lose money. Spouses' benefits and SSI payments would make up for any loss. But there are some 1.5 million people who would see their income reduced. Tragically, these would be our most needy senior citizens. In fact, tens of thousands of Americans above the age of 90 would be hit hard if this proposal became law.

President Reagan would also cut benefits for 800,000 students who are survivors and dependents of workers. These students would have their benefits cut 25 percent the first year; 50 percent the second year; 75 percent the third year, and then eliminated in the fourth year. This would badly hurt thousands of middle- and low-income students, many of whom would be forced to end their education.

Current recipients would also be hurt by the proposals to delay the cost-of-living adjustment (COLA) from July to October and to base the COLA on a cost-of-living comparison over a full year rather than two calendar quarters as is now done. The cost-of-living adjustment must be protected. There are those who argue that the present COLA is too high because it is based on the increase in prices rather than on wages. I disagree. It is perhaps true that the Consumer Price Index, on which we base the COLA, overstates the impact of increases in housing costs. But in three other areas—food, fuel costs, and medical expenses—the CPI does not reflect the special needs of the elderly. In these areas the elderly suffer from higher costs more than the average middle-aged person.

The administration's proposal to drastically cut benefits for future early retirees is especially brutal. Most people who take the age 62 retirement option do so because they are sick or because they were forced out of their jobs. Now the administration announces that it will cut benefits for early retirees by some 40 percent and that this cut will go into effect in just 7 months. This is terribly unfair. Today workers retiring at 62 receive 80 percent of their full entitlement. Each year that ratio goes up so that those retiring at 65 receive the full 100 percent entitlement. But the administration would reduce that 80 percent entitlement to 55 percent. Over his expected lifetime, the average person would lose 31 percent of their benefits by retiring early. This is no social security reform. It is a travesty and, if enacted, would undermine and tend to destroy public faith in the social security system. Fortunately, this proposal has very little chance of passage.

The administration has also proposed changing the benefit computation formula for all future retirees by 1987. This change would permanently reduce monthly benefits by approximately 10 percent. This will result from the reduction in the so-called replacement rate. Today a retiree receives an average of 42 percent of his or her 30-year average earnings. President Reagan would reduce that "replacement" rate to 38 percent. This will especially hurt low- and medium-income workers who, in most cases, will have no other income besides social security benefits after retirement.

The President's proposal would also cut disability benefits by severely tightening eligibility requirements. Today disability is determined by looking at a number of variables. In addition to medical factors, the determination takes into account experience, age, and training. Obviously a condition that would disable a 60-year-old bricklayer might not disable a secretary or a clerk. The Reagan proposal would not permit examiners to look at the whole person. The only criterion considered would be medical condition. The administration would also require applicants for disability insurance to have worked 7½ years out of the last 10 and also 1½ years out of the last 3 years. This will badly hurt those suffering from degenerative diseases who may not have been incapacitated at a single moment in time but over the course of years. Such people are often employed only intermittently before meeting the definition of totally disabled. Under the Reagan proposal a person suffering from a disease like multiple sclerosis might not be disabled enough to qualify for disability insurance but might suffer enough from the condition to be rendered basically unemployable. By the time this person became totally disabled, he might be rendered ineligible for benefits because of the test of recent earnings.

These proposals are as unnecessary as they are unfair. The administration argues that these proposals will save the social security system from bankruptcy. If forsees an $11 billion deficit in the trust funds by 1986. But the cuts proposed to eliminate this deficit would not save $11 million. They would save more than $82 billion by 1986. Clearly these cuts are part of an administration strategy to balance the budget while at the same time increasing defense expenditures and cutting taxes. At one time it was charged that such a feat could only be accomplished with mirrors. We now know that it is possible to achieve these goals without mirrors—by taking billions of dollars out of the social security system. I am confident that the Congress will not permit this to happen.

There is a short-term social security financing problem. But it can be resolved by allowing the three social security funds to borrow from each other. We can also permit the trust funds to borrow from the Treasury, particularly during times of high unemployment when contributions to the system dwindle. The long-range financing problem, if it ever develops, must be addressed through partial general revenue funding of social security. This was forseen by social security's original sponsors in the 1930's. It may be inevitable and it is certainly preferable to cutting benefits. I have always favored this approach. After all, the well-being of our senior citizens is certainly worthy of funding by the Treasury. These general revenue dollars are tax dollars which come out of the pockets of each and every one of us. Here we have an administration which is willing to spend billions and billions on the Pentagon—with no concern for cost—but which shrinks in horror at the thought of using our tax

revenues to pay social security benefits.

Mr. Speaker, I trust that the Congress will not be bamboozled into enacting these ill-considered and punitive proposals by the administration's talk about averting the bankruptcy of the social security system. That system cannot, and will not be allowed to go bankrupt. The administration must understand that cutting benefits does not solve the problem of social security financing. On the contrary, cuts in benefits are the very disasters we must work to avoid. I will fight these proposals and will do what I can to see that the social security system remains on a sound footing without unfair and regressive cuts. A balanced budget is a desirable goal but a budget that is balanced on the backs of senior citizens is a travesty. The Reagan cuts in social security benefits must be rejected.●

EXPLANATION OF MISSED VOTE ON H.R. 3499

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. KASTENMEIER) is recognized for 5 minutes.

● Mr. KASTENMEIER. Mr. Speaker, I was addressing the members of the First Amendment Congress at the Decatur House when the rollcall on H.R. 3499, the Veterans' Health Care Act of 1981, began. I left for the Capitol, and when I returned to the House Chamber, I learned, much to my chagrin, that the vote had just been completed. Had I been present, I would have voted "yea."

This legislation is extremely important to Vietnam-era veterans exposed to agent orange who may be suffering health problems as a result of such exposure. It would provide medical care to veterans who served in Vietnam if a physician employed by the Veterans' Administration determines that medical care is necessary for the treatment of a condition that may be associated with exposure to agent orange. I want to commend the House Committee on Veterans' Affairs for bringing this bill to the House floor.●

MKU INTRODUCTORY STATEMENT NUCLEAR POLICY BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arizona (Mr. UDALL) is recognized for 10 minutes.

● Mr. UDALL Mr. Speaker, today, I am introducing a national nuclear policy bill that addresses fundamental issues associated with the regulation and safety of commercial nuclear power. The bill is derived in large measure from similar legislation that I sponsored last year (H.R. 6390).

The policies in this new bill are well reasoned and firmly supported by the record compiled by the Interior Committee during its 4½ years of legislative jurisdiction over the nuclear regulatory process and the NRC. By and large, the provisions in this bill are substantially similar to previous proposals that have been extensively aired in committee hearings and House floor debate. The underlying concepts are sound, and the legislative language, in many cases, has been refined and perfected by the committees of jurisdiction and the House.

This new bill addresses key issues that are ripe; unlike last year when I introduced H.R. 6390 primarily to focus debate, the new bill is one that I believe the Congress can act upon before the end of this session. It addresses issues that I believe the Nation wants and deserves answers to from the Congress. The Congress owes the American people a decision on these critical nuclear policy questions. I believe my bill is comprehensive, balanced, and fair in this regard. It contains provisions that will enable nuclear to fulfill its proper role in our society without infringing upon the rights of the general public to participate in defining what that appropriate role will be.

This bill will not cure the problems faced by nuclear proponents or nuclear opponents. I do not pretend that this bill will restore nuclear utilities to good financial health. As a practical matter, I believe the Congress is limited in its ability to determine the fate of commercial nuclear power. What my bill does is address those matters where the Congress can have an impact by redirecting or clarifying national policy and then providing a push in that direction.

Let me once again share with you my view of the role of Congress in this difficult area. We can and should legislate procedures and requirements which determine the way the technology is managed. We can and should conduct vigorous oversight to insure that our mandates are carried out. On the other hand, we have little ability to make informed judgments on the seeming infinity of complex technical matters which must be addressed. The NRC has been set up to make such judgments, and through oversight we can help to make sure the NRC does its job.

Accordingly, as I said at the time I introduced H.R. 6390, I believe that we must rely on the Commission to determine whether the currently operating power reactors pose an undue risk to the public health and safety. We must insist, however, that the Commission be exceedingly conservative in its safety assessments and that it must be prepared when necessary to require costly modifications.

ORIGINS OF THE BILL

As I have said, the new bill is based upon several years of Interior Committee work on nuclear regulatory matters.

In June of 1977 the Subcommittee on Energy and the Environment held 3 days of hearings that marked the beginning of the subcommittee's effort to confront the difficult task of thoroughly reviewing the nuclear facility licensing process with an eye toward recommending legislative reforms to the Congress. At that time, several bills relating to the NRC licensing process had been referred to the Interior Committee. The proposed legislation covered a broad spectrum of reform options ranging from a 5-year moratorium on all new licensing—as provided for in H.R. 882—all the way to a comprehensive bill intended to streamline the nuclear plant licensing leadtime (H.R. 18). The subcommittee also had under consideration so-called nuclear States rights bills that I had introduced.

The testimony received at these hearings made clear to me and my subcommittee colleagues that general agreement existed among all parties—NRC, electric utilities, nuclear industry, and concerned citizens—that the existing licensing process was inefficient, sometimes illogical, and in need of reform. There was no consensus, however, about what specific changes ought to be made. In many cases, what one group regarded as licensing inefficiency and unnecessary delay, another group saw as an opportunity for access and participation in the decisionmaking process. This general theme, the product of strongly held and deeply divided public views, has pervaded the committee's subsequent efforts to frame a national nuclear policy bill that can enjoy broad based support.

On March 17, 1978, as a key element in President Carter's energy program, Secretary of Energy Schlesinger transmitted to Congress the proposed Nuclear Siting and Licensing Act of 1978. This administration bill (H.R. 11704) sought to improve the nuclear facility siting and licensing process in five major ways:

First, to improve the nature of public participation in the licensing process by providing early notice of an opportunity for participation in actions relating to the siting, construction, and operation of nuclear facilities;

Second, to promote the early identification and resolution of issues with respect to potential sites and designs for nuclear facilities;

Third, to expedite the licensing process by providing for the issuance of a combined construction permit and operating license;

Fourth, to preclude the litigation of certain issues in licensing proceedings if there had been a prior opportunity for such issue to be raised; and,

Fifth, to define and clearly establish State responsibilites in the nuclear siting and licensing process.

The Subcommittee on Energy and the Environment held 9 days of hearings on H.R. 11704 during the spring and summer of 1978. The bill raised a large number of thorny issues. In an effort to have the subcommittee develop a consensus resolution to the problems pointed out by the hearings, I developed an issues paper as a vehicle for a concept markup. Unfortunately, this effort withered as the subcommittee members remained largely polarized in their views, and a middle ground proved difficult to find.

Then, on October 25, 1978, I sent a letter to the Carter administration transmitting recommendations for a new bill. The proposed changes were developed by Congressman BINGHAM and myself based upon the extensive hearing record compiled on H.R. 11704. We asked that the Carter administration draft a new bill incorporating our suggestions and submit it for consideration in the 1st session of the 96th Congress. My intention was to give any such proposal high priority on the Interior Committee agenda.

Before the Carter administration was able to resubmit proposed nuclear siting and licensing legislation, the situation was suddently and profoundly changed on March 28, 1979, by the accident at Three Mile Island (TMI).

In the weeks immediately following the accident, I together with Representative DON CLAUSEN—who was then banking minority member of the Interior Committee—charted a course for a sweeping inquiry by the committee into national nuclear policy matters in light of TMI. The immediate and important message TMI conveyed to me was that there should be a national debate to help us decide where we should go with nuclear. In my mind, the basic question was whether we should stop nuclear development with what we have. Or should we do what was necessary to fix the faults and then proceed with whatever expansion might be dictated by the economics of nuclear technology versus that of the alternatives.

The Subcommittee on Energy and the Environment subsequently held an extensive series of oversight hearings on a broad range of issues including: the accident at Three Mile Island; the nuclear regulatory process; security in the domestic nuclear industry; nuclear waste facility siting; liability for nuclear accidents; nuclear economics; the agreement states program; regional power needs; proliferation issues; and, the nuclear industry's response to TMI.

Following these oversight hearings an effort was made to write a consensus subcommittee nuclear policy bill. This effort stalled, and in its place I drafted a bill (H.R. 6390) that was introduced on January 31, 1980. My intent in drafting this bill was to give Congress an opportunity to state clearly the direction and scope of the Nation's nuclear policy.

In general, the provisions included in H.R. 6390 sought to reduce the risk of nuclear accidents; they were intended to provide local communities a greater voice in nuclear facility siting decisions; and they would have established a firm plan for dealing with the nuclear waste problem.

During 1980, the Subcommittee on Energy and the Environment conducted 4 days of hearings on H.R. 6390 as well as 5 days of markup. Then, on September 16, 1980, the Interior Committee voted to report two of the bill's four titles, and did so in Report No. 96-1382, part II.

The Interior Committee reported those titles that provided for management of high-level and low-level nuclear wastes and for creation of a new independent agency to investigate events related to nuclear safety. This committee action was taken without prejudice against those provisions in H.R. 6390 which were not reported. I supported the committee action because the bill as reported provided a useful vehicle for House consideration of important nuclear waste management legislation prior to the end of the 96th Congress.

While H.R. 6390 as reported did not speak to a number of significant nuclear policy issues that were addressed in the bill as introduced, I regarded the promising opportunity that the House had at that time last fall to act on nuclear waste legislation to have been on overarching priority. The remaining issues were set aside only temporarily, and in modified form have been incorporated as key elements of the bill I introduce today.

CONTENTS OF THE NEW BILL

Keeping in mind the current attitudes toward power needs and nuclear in particular, the bill I introduce today has been put together to facilitate consideration and prompt reporting of the entire package by the Interior Committee. With this objective in mind, the bill has been based upon the record that the committee has compiled on these matters during the past several years. In this way, my new legislative proposal contains familiar language derived from and supported by our previous work. Also, I have deleted some unripe provisions from last year's bill, H.R. 6390; and, with the exception of two sections—which I will explain shortly—I am introducing no new language.

The new bill drops certain of the licensing reform amendments previously contained in H.R. 6390 that were directed toward the so-called delay problem in the licensing of new reactors. The concepts of early site permits and eliminating unnecessary duplication in Federal and State regulation—which have been before the Congress in one form or another for at least 6 years—have been deleted because they are seen by industry and environmental groups alike as addressing licensing issues associated with the next generation of reactors. Primarily because the utility industry overpredicted its power needs in the coming years, we are presently in a de facto moratorium on nuclear expansion so the Congress * * *.

Let me now describe the specific provisions in the new bill which includes three separate titles: Title I—Nuclear Waste; Title II—Price Anderson; and Title III—Licensing and Safety Amendments.

TITLE I—NUCLEAR WASTE

Title I of the bill sets out my proposal for a program for the development of permanent repositories for nuclear wastes. Subtitle A of the title was passed by the House during the 96th Congress as H.R. 8378. It represents the agreement reached in that Congress between the Interior Committee and the Committee on Interstate and Foreign Commerce—now the Committee on Energy and Commerce—on high-level nuclear waste management. The bill last year was supported by environmental groups and by the nuclear industry. I think we made tremendous progress on the legislation last year, and that this will be a good place to start in this Congress.

The high-level waste management program in my bill is founded on three basic principles: First, the Congress must provide for the States a statutorily guaranteed process for participating in decisions regarding siting of permanent waste repositories; second, the program must be consistent with the requirements of the National Environmental Policy Act and with the Nuclear Regulatory Commission's licensing and regulatory requirements; and, third, the Congress must set deadlines and guidelines for progress in the resolution of technical and institutional problems affecting nuclear waste management. My experience with this proposal last year leads me to believe that these principles are almost universally accepted by professionals and others closely involved in nuclear waste management issues.

One aspect of the waste management system which has yet to be brought to a general consensus of thought regards the proper scope of testing activites at potential nuclear waste repository sites. The bill passed by the House last year, and the one I am introducing today, limit the amount of radioactive material which can be emplaced at an unlicensed repository site for testing purposes to an amount representing the curie equivalent of 10 metric tons of spent nuclear fuel. Other proposals from my col-

leagues and from the new administration recommend that up to several hundred tons of spent fuel curie equivalent be emplaced in an unlicensed test and evaluation—T. & E.—facility at at least one potential repository site. It is my intention to address this issue to find a balance between the cost and possible negative impacts of a large T. & E. facility, and the necessity to proceed expeditiously, fairly, and safely to get a repository through the licensing process.

My bill provides a step-by-step process for finding potential host sites, evaluation sites, and bringing the States, the public, and the Congress into very clearly defined decisionmaking roles. It is consistent in most respects with the program recommended in 1979-80 by the Interagency Review Group on Nuclear Waste Management, and with the program continuing under the new administration. I believe it is the best way to assure that the technical issues still remaining to be resolved in the nuclear waste management field will be put to rest quickly.

Subtitle B of title I of the bill sets out standards for the regulation of low-level nuclear waste disposal facilities by the Nuclear Regulatory Commission and by States authorized to license such facilities under the Commission's agreement States program. The standards are consistent with the Commission's current effort to control development of low-level waste burial sites so that when they are closed down they will not present a hazard to future generations. My bill requires that bonds or other surety be provided by operators of these facilities so that in case of bankruptcy or other problems sites can still be decommissioned properly.

The statutory clarification of low-level waste burial standards is particularly important since the passage by the 96th Congress of the Low-Level Radioactive Waste Policy Act—Public Law 96-573. Under that act, each State is responsible for assuring that disposal capacity is available for low-level wastes generated within the State. The act makes possible and encourages the development of regional disposal facilities by the States. The States are now engaged in planning these facilities. Their development will be improved by passage of subtitle B of my nuclear waste management program.

Title II amends the Price-Anderson Act which establishes statutory limits of liability for damages resulting from nuclear accidents. the present Price-Anderson Act, enacted in 1957, sets a limit of $560 million per accident. At the time the original Price-Anderson was passed, the possibility of a nuclear accident resulting in greater liability was thought to be so remote that this sum was considered to provide adequate coverage for the public.

In 20 years we have discovered that the probability of an accident causing damage in excess of $560 million is not as remote as we once thought.

In view of these developments, I feel that Congress has an obligation to reexamine its policy on limited nuclear liability to provide more adequate financial protection for the public.

The present act limits liability for off-site damages to $560 million. This insurance fund is provided from three sources, or layers: first, the private insurance industry insures nuclear reactors for the maximum amount their participants will cover, at present this is $160 million. Second, the nuclear industry has a retrospective premium pool to meet damage claims above $160 million. The individual utilities can be assessed a premium of from $2 to $5 million per accident. Assuming 70 currently active reactors, this layer would contribute $350,000,000. Finally, the amount by which the sum of the first two layers falls short of the $560 million ceiling is contributed by the Federal Government.

My bill increases the limit on liability for reactors that have already been granted construction permits and removes the limit for reactors that have not obtained a construction permit by date of enactment.

The limit for old reactors is raised from $560 million to $5 billion per accident. Both the industry's financial obligation and the Federal indemnity component are increased to create these new funds: The retrospective premium is raised to a maximum of $20 million, and, the Federal indemnity increases to pay damages up to $5 billion.

New reactors would have unlimited liability. Again, layers one and two would create a fund to pay damages but damages in excess of that amount would be the responsibility of the individual reactor involved in the incident.

TITLE III—AMENDMENTS RELATED TO REACTOR LICENSING AND SAFETY

The new title III that I propose, to a greater extent than did last year's bill, focuses on the licensing and safety of operating plants and those in the pipeline rather than on long-term regulatory fixes. In my view, the provisions in this title are necessary but not sufficient to make the regulatory process function more satisfactorily for all participants.

Section 301 of the bill requires the Commission itself to issue new reactor licenses, and prohibits the delegation of this authority to NRC staff. I included a similar provision in H.R. 6390 last year.

Section 302 would amend the Atomic Energy Act for the purpose of clarifying the relative roles of NRC and the Federal Emergency Management Agency (FEMA) in reviewing and approving emergency response plans around nuclear facilities. One effect of this provision would be to minimize uncertainty about licensing decisions that now can result from ambiguity associated with the overlapping jurisdictions of the two agencies. A similar provision was incorporated last year in H.R. 6390.

Section 303 directs the Commission to develop alternative reactor safety objectives. Under this section, the Congress would then choose that alternative best suited to be the objective of the Nation's nuclear regulatory process. This provision would set in motion a process to produce a policy answer to the question "How safe is safe enough?", a nagging question that the nuclear industry has told us time and time again undermines the regulatory process by leaving it open-ended vis-a-vis the level of risk acceptable to society.

Section 304 would make the remote siting requirements approved by the Congress in section 108 of Public Law 96-295, the NRC Authorization Act for fiscal year 1980, a permanent part of the Atomic Energy Act. The Commission has underway an effort to respond to the requirement in the Authorization Act, and this provision would reiterate the importance of this matter in the eyes of the Congress. Section 108 of Public Law 96-295 was substantially drawn from section 111 of H.R. 6390.

Section 305, derived from a similar provision in H.R. 6390, would limit the relitigation of certain construction permit issues during operating license proceedings, absent significant new information or substantially changed circumstance. The specific issues covered by this section include site suitability, need for power, alternate energy sources, and utility financial qualifications. As a practical matter, the Commission probably has sufficient existing authority to limit by rule the relitigation of such issues. For example, on May 19, 1981, I received from the NRC a final rule to be published in the Federal Register that will preclude the consideration of alternative sites in Commission operating license reviews in the context of NEPA. In forwarding this final rule, the agency also informed me that:

> It has been the Commission's experience that, in contrast to construction permit proceedings, the issue of alternative sites is not raised by parties to operating license proceedings.

Section 306 provides limited authority to the Commission to fund intervenors in the agency's rulemaking proceedings. The authority would not extend to the funding of intervenors in licensing proceedings for individual facilities. While it is true that the Congress several times in recent years has rejected efforts to provide funds

for public participants in NRC proceedings, I continue to believe that such a program would lead to better, and possibly more timely, regulatory decisions. Based upon a similar provision in H.R. 6390, the new provision would not delay the licensing of plants in the pipeline, and it would not be available to those whose only interest is in frustrating the regulatory process by introducing delay for delay's sake. It seems to me a matter of fundamental fairness to include in a bill with other provisions to eliminate inefficiencies from the licensing process a measure of support for those who seek to raise in rulemaking proceedings legitimate concerns regarding nuclear safety.

Section 307, which is extracted from H.R. 6390, is intended to ease the burden currently imposed on the Advisory Committee on Reactor Safeguards—ACRS—by the Atomic Energy Act requirement that every facility license application be thoroughly reviewed. This provision in my bill would give the ACRS discretion to choose which license applications required detailed review. The effect of this amendment would be to enable ACRS to focus on those issues most in need of technical peer group scrutiny, and to lessen the chance that the ACRS review might become a pacing item in plant licensing.

Section 308 is a new provision rooted in Congressman BINGHAM's amendment to the fiscal year 1980 NRC Authorization Act—section 110 of Public Law 96-295—which directed the Commission to develop a comprehensive plan for a systematic safety evaluation of currently operating reactors. The Bingham amendment was derived directly from a recommendation of the Kemeny Commission investigation of Three Mile Island. On February 27, 1981, my Subcommittee on Energy and the Environment held a hearing on the implementation of this provision and learned that NRC is launching an 8-year multimillion dollar program. This revelation prompted me, together with the Committee's ranking minority member, Congressman LUJAN, to write to the Commission to request that a much simpler review be tried on a pilot program basis. Section 308 would make this request, which the Commission appears to have chosen to ignore, a statutory requirement. This section will either provide the Congress and the public with a snapshot of the extent to which currently operating reactors measure up to important safety regulations, or it will demonstrate more clearly in lay terms why the NRC is unable to provide a relatively simple answer to this seemingly straightforward question.

Section 309 is a new section that would create a temporary advisory panel to NRC to make recommendations about long-term fixes for the licensing process. A similar provision recently has been added without controversy to the Senate Committee on Environment and Public Works' version of the NRC authorization bill for fiscal year 1982 and 1983—section 303 of S. 1207. While I am not enamored with the prospects of yet another study of the licensing process, it may be the case in light of the de facto moratorium on nuclear expansion that a rethinking of old regulatory reform laws is now appropriate.

ISSUES NOT ADDRESSED

Let me make a few comments about several issues I have chosen not to address in this bill, and why.

Unlike H.R. 6390, the new legislation does not include an amendment to the Atomic Energy Act requiring that no new construction permits beyond those now being processed be issued until the Commission certifies fulfillment of certain conditions, or for 3 years, whichever comes first. Last year, when I put this provision in H.R. 6390, I did so because I thought there should be a pause before new construction is allowed to begin on plants where no construction permit application has yet been filed. My rationale was that if further expansion of the nuclear industry beyond this is to occur, the NRC should first review its regulations from the ground up, and get a firmer grasp on the conditions at currently operating plants. I was diasppointed last year during our hearings when this provision was construed as merely another garden variety antinuclear moratorium, rather than as providing an opportunity, during a period when new plant orders were not in prospect, for the NRC and the industry to get their houses in order to inspire greater public confidence in nuclear technology. I still believe that the underlying concept is sound. Nevertheless, I do not perceive sufficient support among my colleagues to justify raising this issue again at this time, and thereby running the risk of impeding congressional action on other issues such as waste management and Price-Anderson. Consequently, I have dropped this provision from the new bill.

Similarly, I have decided to drop the provisions of H.R. 6390 calling for creation of a Nuclear Safety Board that would have inquired into accidents at nuclear power plants. The Board's mission would have been to determine whether events that were the subject of its inquiries had generic significance indicative of a serious safety hazard at other nuclear powerplants. I was and continue to be in substantial agreement with the intent of this proposal which was offered by our colleague, MICKEY EDWARDS, who believed that such an organization should be set up as an entity independent of the NRC. Since the proposal was introduced, however, we have received comments that have convinced me that establishment of such an organization would, in effect, be creating a new bureaucracy which would have responsibilities which overlapped substantially with those currently held by the Office of Evaluation and Analysis of Operational Data—OEAOD—that was established at the NRC in the wake of the accident at TMI. I believe these comments make sense and I believe, therefore, that we should defer consideration of the Nuclear Safety Board until we have had an opportunity to determine whether the OEAOD fulfills the role Mr. EDWARDS had in mind when he made his commendable proposal.

The interim spent fuel storage program proposed during the last Congress in H.R. 6390 is not included in this legislation. I have made a commitment to address the interim spent fuel storage issue, and I continue to believe that there must be a Federal role in determining how this part of the nuclear waste management program will be carried out. We are going to have to take a fresh look at this issue this year in light of the new administration's policies. Secretary of Energy James Edwards has testified before the Interior Committee and in other hearings that the administration does not support Federal construction of centralized away-from-reactor—AFR—interim spent fuel storage facilities. The administration policy is to promote the initiation of spent fuel reprocessing by the private sector, which would render centralized spent fuel storage unnecessary.

I do not believe that the initiation of private sector fuel reprocessing is imminent, however, and the national inventory of spent nuclear fuel continues to increase. We must attempt to develop innovative ways in which the Federal Government and the utilities can resolve the problem of how and where to store spent nuclear fuel recognizing that the future of reprocessing in this country remains highly uncertain. I hope that we can resolve some of the technical and procedural problems which seem to be affecting temporary storage of spent fuel at reactor sites.

The bill I am introducing today does not address the issue of who should pay for the billion dollar cleanup of Three Mile Island Unit 2. This is not to say that the issue is of secondary importance, but rather, that the need for a legislative response to this problem has not, as yet, been adequately demonstrated. On May 4 and 5, 1981, my Subcommittee on Energy and the Environment held hearings on the financial implications of the accident at TMI. Among the proposals on the table were Congressman ERTEL's Nuclear Powerplant Property Damage Insurance Act of 1981 (H.R. 2512), and

Congressman HUGHES' bill amending the Atomic Energy Act for the purpose of distributing replacement power costs from an unplanned nuclear plant shutdown. I commend my colleagues for developing these thoughtful proposals which have helped to focus congressional debate of this difficult issue.

In the course of the May 4 and 5 hearings the subcommittee received testimony from the Edison Electric Institute and the private nuclear insurance pools that contained some hopeful signs that the private sector is willing and may be able to come up with some answers to TMI's financial problems. I was also impressed by the creativity with which a consortium of commercial banks is seeking to assist the financially troubled General Public Utilities Corp.

The situation is still critical, and I intend to monitor it closely. I believe, however, that before the Congress rushes to legislate in this area additional time should be given the private sector and the State ratemakers to fashion a plan to fund the cleanup of TMI Unit 2.

THE BOTTOM LINE

I would like to say that in introducing this bill, I do not in any way intend to suggest that I believe reactors are sufficiently safe, or that the obstacle to timely licensing lies primarily in inefficiencies at the NRC that can be eliminated by legislation and administrative fiat. While it may in fact be the case that the NRC's procedures are not as efficient as they should be, the main problem, as I see it, is that the regulators have, as a consequence of the accident at Three Mile Island, begun to deal with a host of problems that had hitherto been considered either inconsequential or had simply been unrecognized.

The reviews undertaken in the wake of TMI have led to imposition of many new requirements intended to correct these newly recognized problems and deficiencies. Unfortunately, as laymen, we cannot know whether these requirements insure an adequate level of safety; this is a matter that must be decided by the Commission. But, the requirements are in place, and partly as a result of their sheer numbers and partly because of the large amount of manpower required to satisfy them, the Commission has been faced with having to decide whether reactors should be licensed to operate even though significant numbers of these requirements have not been met. The Commission has determined in the only cases to come before it for full power licenses—that is, North Anna 2, Sequoyah 1, and Salem 2—that the reactors should be allowed to operate; yet in each instance the Commission has allowed operation to begin while numerous of its requirements have not been met. The rationale is that the operation can be safely conducted while the requirements are satisfied at a later date. I am in no position to contest the Commission decision which is necessarily based on subjective judgment. I do note, however, that these requirements are extensive and some of them appear to be of a kind that should have been satisfied already. Other requirements, with regard to which implementation has been delayed, are of a kind to suggest that there is insufficient understanding of important aspects of those reactors.

What this says to me is that reactors are not as safe as we might have thought prior to TMI. What we need then, is a recognition that the Commission is allowing reactors to operate even though the NRC's requirements have not been met. We should recognize that the Commission with the tacit concurrence and in some ways active encouragement by Congress has made a tradeoff between economics and safety, and that hopefully we will not regret having done so.

As I watch the Commission arrive at these licensing decisions in an increasingly incomprehensible fashion, I cannot help but be reminded of one of the most fundamental findings of the Kemeny Commission:

> The NRC is so preoccupied with the licensing of plants that it has not given primary consideration to overall safety issues. (President's Commission on Accident at TMI, page 51.)

As TMI fades into the past, the old regulatory attitudes existing prior to the accident seem to be reappearing as a consequence of pressure to take steps to expedite the licensing process. Apparently underlying these pressures is the belief in some quarters that a good deal of the NRC's licensing requirements are superfluous and can be eliminated without causing a significant diminution in safety. As I have indicated, I do not share the view that the safety situation is in a condition such that it is appropriate for the Commission to have assigned so high a priority to licensing vis-a-vis analysis of safety issues.

While I agree that the Commission should make every effort to eliminate inefficiencies in its proceedings, my concern is that the emphasis on licensing will result in reactors prone to disabling accidents. I fear that a climate at the NRC is developing wherein the staff will be discouraged from pointing out problems which are costly to correct, particularly when the matter in question is sufficiently complex and uncertain that it can be argued that the alleged defect was so unlikely to result in an accident, that it could be safely ignored. Should the product of this climate be an accident as or more serious than that which occurred at Three Mile Island, the nuclear technology will have suffered a setback from which it is likely not to recover.

I believe there are signs that the Commission has indeed relaxed its regulatory requirements in order that licensing might be expedited. I have already noted what seems to me to be an unduly long list of items to be resolved after rather than prior to beginning of operations of the only plants to be issued full power operating licenses since TMI. I also infer the character of the Commission's allocation of priorities between licensing on the one hand and resolving recognized problems on the other by comparing the zeal with which it has developed proposals for more rapid licensing with the failure to respond in a forthright and candid manner to fundamental questions about reactor safety raised by the Interior Committee.

In closing, I would like to make clear my belief the fundamental responsibility for safety rests with the utilities licensed to operated nuclear reactors. It is the job of the NRC to make sure that these utilities do in fact adhere to the Commission's regulations. The Congress can conduct oversight to determine whether the present system of handling the technology is able to provide the requisite level of safety. If the Congress does not like what it finds, changes can be made but these will necessarily be crude, and might or might not bring about the intended objective. The legislation that I am proposing today will address the important issues of nuclear waste, Price-Anderson reform, improved regulation of the next generation of powerplants as well as taking care of some loose ends in the current regulatory process. I am aware that some of my colleagues will propose amendments having the effect of making nuclear regulation less stringent; I believe such proposals to be unwise.

If it should turn out that additional steps are necessary to protect the public health and safety, I think that instead of proceeding along the seemingly fruitless track of past proposals for regulatory reform, we should undertake a fundamental reappraisal and give consideration, for example, to the manner in which the technology is handled in France where there is one utility, one reactor manufacturer, and one architect engineer. This system has allowed the French to achieve a high degree of standardization in design and in operating practices. While we clearly are not going to move in the direction of one utility in the United States, we should perhaps consider the merits of establishing one or more organizations, organized along the lines of Comsat, for the purpose of owning and operating nuclear generating stations. We should also consider establishing a mechanism through which we would achieve a much higher degree of standardization among nuclear reactors than now

exists or is likely to exist in the future in the absence of a legislative requirement. These are matters that we should keep in mind as we consider the bill I am introducing today.

I am offering this legislation with the hope that we will act wisely, avoiding the temptation to close our eyes to the real dangers and to send a message which says: Full speed ahead. Rather I would hope we will achieve some good by adopting these modest licensing proposals and making clear to the industry and NRC that they will have our support as long as they are able to assure us that safety is their No. 1 priority.●

STATUS OF THE CONGRESSIONAL BUDGET FOR FISCAL YEAR 1981

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma (Mr. JONES) is recognized for 5 minutes.

● Mr. JONES of Oklahoma. Mr. Speaker, the House Budget Committee today is notifying the Speaker of the House on the status of the 1981 congressional budget. This report compares current levels of congressional action on the budget to the spending ceilings and revenue floors established by the revised second budget resolution for fiscal year 1981. In order to keep Congress advised of the effect of its spending and revenue actions compared to the overall totals set in the most recently adopted budget resolution, periodic reports are required by section 308(b) of the Budget Act. Under the Budget Act a point of order lies against any measure that would cause the spending ceiling or revenue floor established by a concurrent resolution to be breached.

The report being submitted today for fiscal year 1981 is tabulated as of close of business June 1, 1981, and is comprised of estimates of budget authority and outlays based on action Congress has taken to date, using the economic assumptions specified in the conference report on the first resolution (H. Con. Res. 115). The revenue estimates are the estimates included in the conference report.

Action to date as compared to the revised second budget resolution ceilings is as follows:

First. Budget authority—$702,363—$15,137 million under the resolution ceiling.

Second. Outlays—$647,667—$13,683 million under the resolution ceiling.

Third. Revenues—$611,900—$8,600 million over the revenue floor.

These aggregate levels advise the House of congressional status until June 5, 1981, when the continuing resolution expires, The Committee of the Budget met and ratified these estimates of current level on June 3, 1981.

Conference action on the supplemental appropriations and rescission bill for fiscal year 1981 (H.R. 3512) was completed on Tuesday, June 2, 1981. This conference report is now being considered. Based on estimates made by the Congressional Budget Office, the conference report on the supplemental appropriations and rescission bill is within the revised second budget resolution ceilings for fiscal year 1981. A CBO advisory letter shows that passage of the conference report would revise the current level estimates as compared to the budget resolution ceiling as follows:

First. Budget authority—$715,200—$2,300 million under the resolution ceiling.

Second. Outlays—$661,100—$250 million under the resolution ceiling.

Third. Revenues—$611,900—$8,600 million over the revenue floor.

A copy of my letter to the Speaker, the committee's report, and the CBO advisory letter are attached.

COMMITTEE ON THE BUDGET,
Washington, D.C., June 2, 1981.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker, House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: On January 30, 1976, the Committee on the Budget outlined the procedure which it had adopted in connection with its responsibilities under Section 311 of the Congressional Budget Act of 1974 to provide estimates of the current level of revenues and spending. I am herewith transmitting the status report under H. Con. Res. 115, the Revised Second Budget Resolution for Fiscal Year 1981. This report reflects the resolution of May 20, 1981, and estimates of budget authority, outlays, and revenues based on all completed action on spending and revenue measures as of the close of legislative business June 1, 1981.

With best wishes,
Sincerely,

JAMES R. JONES,
Chairman.

REPORT TO THE SPEAKER OF THE U.S. HOUSE OF REPRESENTATIVES FROM THE COMMITTEE ON THE BUDGET ON THE STATUS OF THE FISCAL YEAR 1981 CONGRESSIONAL BUDGET ADOPTED IN H. CON. RES. 115 (REFLECTING COMPLETED ACTION AS OF JUNE 2, 1981)

[In millions of dollars]

	Budget authority	Outlays	Revenues
Appropriate level	717,500	661,350	603,300
Current level	702,363	647,667	611,900
Amount over resolution			8,600
Amount under resolution	15,137	13,683	

BUDGET AUTHORITY

Any measure providing budget or entitlement authority which is not included in the current level estimate and that exceeds $15,137 million for fiscal year 1981, if adopted and enacted, would cause the appropriate level of budget authority for that year as set forth in H. Con. Res. 115 to be exceeded.

OUTLAYS

Any measure providing budget or entitlement authority which is not included in the current level estimate and that exceeds $13,683 million in outlays for fiscal year 1981, if adopted and enacted, would cause the appropriate level of outlays for that year as set forth in H. Con. Res. 115 to be exceeded.

REVENUES

Any measure that would result in a revenue loss exceeding $8,600 million for fiscal year 1981, if adopted and enacted, would cause revenues to be less than the appropriate level for that year as set forth in H. Con. Res. 115.

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., June 3, 1981.

Hon. JAMES R. JONES,
Chairman, Committee on the Budget,
House of Represenatives, Washington, D.C.

DEAR MR. CHAIRMAN: In response to your request, this is to advise you that enactment of the conference agreement on the Supplemental Appropriation and Rescission Bill, 1981 (H.R. 3512), would result in estimated current level of 1981 budget authority and outlays of $715.2 billion and $661.1 billion, respectively.

The revised budget resolution for 1981, H. Con. Res. 115, approved by the Congress on May 21, 1981, provides budget authority of $717.5 billion and outlays of $661.35 billion. Thus, the current level assuming enactment of the conference agreement on H.R. 3512 is within the revised budget resolution.

Sincerely,

RAYMOND C. SCHEPPACH
(For Alice M. Rivlin, Director).●

CONCERN OVER THE PROPOSED SALE OF ARMS TO SAUDI ARABIA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. WOLPE) is recognized for 5 minutes.

● Mr. WOLPE. Mr. Speaker, I rise today to reiterate my deep concern over the proposed arms sale to Saudi Arabia. My feelings are shared with U.S. citizens throughout the country. I was an initiator of an earlier congressionally circulated letter expressing strong opposition to this sale which threatens both Israel's security and America's long-standing relationship with Israel. U.S. foreign policy is best served by a strong and secure Israel, not by an Israel whose security is jeopardized by a militarily threatening Saudi Arabia. The proposed arms package includes equipment with which Saudi Arabia would be able to monitor all of Israel's internal military activities. This sale, by escalating the Middle East arms race, would serve only to increase the potential for regional conflict, and to undermine America's own security interests.

I therefore state once again my intention to work with my colleagues to take any action necessary to prevent this sale from ever taking place.●

AMBASSADOR MORTON ABRAMOWITZ

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. MOAKLEY) is recognized for 5 minutes.

● Mr. MOAKLEY. Mr. Speaker, one of the most commendable diplomatic decisions of the new administration has been the retention of career diplomat Morton I. Abramowitz as U.S. Ambassador to Thailand.

Ambassador Abramowitz will conclude his third year in this sensitive post next month. In any circumstances the Bangkok post requires significant diplomatic skills and high professional standards because of Thailand's great economic and strategic importance to our Nation.

But, throughout his tenure as our Ambassador there, he has borne the enormous additional burden of dealing with the waves of humanity fleeing there from tyranny, oppression, and even genocide in Cambodia, Laos, and Vietnam. The Ambassador has handled this matter with enormous compassion and his personal involvement in the plight of refugees has saved thousands of lives and brought relief from hunger and illness for scores of thousands more. At the same time he has dealt on a level of fairness and responsibility toward the legitimate concerns of Thailand that has won dramatic cooperation from the Royal Government.

Ambassador Abramowitz received the 1980 President's Award for Distinguished Federal Civilian Service in recognition of his work in the Foreign Service:

CITATION

Presented to Ambassador Morton Abramowitz for his outstanding contributions to the Indochina relief effort and to the search for peace and stability in Southeast Asia.

In the face of an accelerating crisis where today's solutions were frequently relevant only to yesterday's problems, Ambassador Abramowitz' imagination, courage and unmatched energy were directly responsible for saving thousands of Cambodian lives. His analytical insight and policy formulation provided invaluable guidance to Washington decision makers. Inspired by the highest humanitarian and political ideals, his work fully merits the special recognition this award confers.

The Ambassador also received the John C. Wilson Award in 1980 for his contributions to Cambodian relief efforts.

I know Ambassador Abramowitz would feel I had done him a disservice if, in praising his work, I neglect to also point out the tremendous effort exerted by the entire Embassy staff. In their efforts to assist in the support and relocation of Indochina refugees, the entire Embassy staff, and especially the Khymer section under the direction of refugee coordinator Lionel Rosenblatt, work tirelessly and with compassion at a tough and often heartbreaking task.

Mr. Speaker, it is with great pride that I take this opportunity to call the attention of the House to a distinguished public servant.●

WE NEED TO INSURE AN ADEQUATE STRATEGIC PETROLEUM RESERVE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. SHARP) is recognized for 5 minutes.

Mr. SHARP. Mr. Speaker, filling the strategic petroleum reserve is critical to our economy and national security, and the time to do it is now. Financially, the best way to do it is with direct on-budget appropriations. However, in order to comply with the budget resolution, I have today introduced a bill to take strategic petroleum reserve oil purchases off the Federal budget starting in 1982. I truly do not believe this bill provides the best method to finance the SPR; but given that SPR purchases must be off budget, this bill provides a workable concept with sufficient congressional oversight, coupled with the flexibility that the Department of Energy needs to respond to changes in oil market conditions.

All the testimony received by the Fossil and Synthetic Fuels Subcommittee clearly indicates that the best, most straightforward, and least expensive method is to pay for SPR oil directly on budget as a conventional Government obligation.

All witnesses repeatedly warned against a so-called unique or creative financing basis. No one was in favor of off-budget financing. The administration clearly wanted SPR oil purchases on budget. Both the Carter and Reagan budget submissions requested direct authorizations and appropriations of the oil purchase funds. Only in early May did OMB, Treasury, and DOE acknowledge that they would reluctantly agree to off-budget financing.

The oil industry unanimously agrees that purchases should be on budget.

The financial community, which could stand to make a profit from the secondary sale of off-budget SPR certificates, also stood firm and said the best method is on budget. I, and perhaps a majority of my colleagues, feel SPR oil purchases should be on budget.

Nonetheless, because of the adoption of the budget resolution, the Energy and Commerce Committee is now considering methods to remove the SPR from the Federal budget. The bill I have introduced is an attempt to do this without jeopardizing the filling of the SPR.

The true concern should be to insure an adequate strategic petroleum reserve. This entire debate over financing detracts from the importance of the reserve.●

EXPLANATION AS TO VOTE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DANIELSON) is recognized for 5 minutes.

● Mr. DANIELSON. Mr. Speaker, I was unable to be present on the floor of the House of Representatives on May 28, 1981, when the House voted on rollcall No. 52, and voted to approve the Journal of Wednesday, May 27, 1981, and on rollcall No. 53, to suspend the rules and pass H.R. 3520, to amend the Clean Air Act to provide compliance date extensions for steelmaking facilities on a case-by-case basis to facilitate modernization. Had I been present, I would have voted "aye" on rollcall No. 52 and "aye" on rollcall No. 53.●

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. NELLIGAN) to revise and extend their remarks and include extraneous material:)

Ms. FIEDLER, for 60 minutes, June 10.
Mr. KEMP, for 60 minutes, today.
Mrs. HECKLER, for 10 minutes, today.
Mr. JEFFORDS, for 5 minutes, today.

(The following Members (at the request of Mr. HOYER) to revise and extend their remarks and to include extraneous matter:)

Mr. NELSON, for 5 minutes, today.
Mr. BINGHAM, for 20 minutes, today.
Mr. KASTENMEIER, for 5 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. UDALL, for 10 minutes, today.
Mr. JONES of Oklahoma, for 5 minutes, today.
Mr. WOLPE, for 5 minutes, today.
Mr. MOAKLEY, for 5 minutes, today.
Mr. SHARP, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. BOLAND, and to include extraneous matter, following the remarks of Mr. CONTE on the conference report on H.R. 3512 today.

(The following Members (at the request of Mr. NELLIGAN) and to include extraneous matter:)

Mr. GILMAN.
Mr. FINDLEY.
Mr. FORSYTHE.
Mr. NELLIGAN.
Mr. KEMP in three instances.
Mr. RUDD in two instances.
Mr. DERWINSKI.
Mr. GRADISON.
Mr. HAGEDORN.
Mr. WEBER of Minnesota.
Mr. HOLLENBECK.
Mr. REGULA.
Mr. MCCLORY in two instances.

Mr. DAUB.
Mr. MOORE.
Mr. EDWARDS of Oklahoma in two instances.
Mr. PHILIP M. CRANE.
Mr. RAILSBACK.
Mr. GREEN.
Mr. COLLINS of Texas in two instances.
Mr. BADHAM.
Mr. MCGRATH.
Mr. WOLF.
Mr. PORTER.

(The following Members (at the request of Mr. HOYER) and to include extraneous matter:)

Mr. COELHO.
Mr. FAUNTROY.
Mr. BOLLING.
Mr. MILLER of California in five instances.
Mr. YATRON.
Mr. BARNES in two instances.
Mr. ROE.
Mr. HARKIN.
Mr. CORRADA.
Mr. SKELTON in two instances.
Ms. FERRARO.
Mr. GEJDENSON.
Mr. ERTEL.
Mr. AKAKA.
Mr. EDWARDS of California in two instances.
Mr. NOWAK in two instances.
Mr. ECKART.
Mr. FORD of Michigan in two instances.
Mr. MCDONALD.
Mrs. BOGGS.
Mr. MATTOX.
Ms. OAKAR.
Mr. FOGLIETTA.
Mr. BENJAMIN.
Mr. LANTOS.
Mr. MARKEY.
Mr. MOAKLEY.
Mr. VENTO.
Mr. MITCHELL of Maryland.
Mr. FITHIAN in five instances.
Mr. WEAVER.
Mr. FRANK.
Mr. MOFFETT.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 1070. An act to extend the authorization for youth employment and demonstration programs, and for other purposes.

ADJOURNMENT

Mr. FASCELL. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 30 minutes p.m.), under its previous order, the House adjourned until Monday, June 8, 1981, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXVI, executive communications were taken from the Speaker's table and referred as follows:

1508. A letter from the Principal Deputy Assistant Secretary of Defense (Comptroller), transmitting a report on the value of property, supplies and commodities provided by the Berlin Magistrate, and under the German Offset Agreement for the quarter ended March 31, 1981, pursuant to section 720 of Public Law 96-527; to the Committee on Appropriations.

1509. A letter from the Principal Deputy Assistant Secretary of Defense (Comptroller), transmitting notice of the proposed obligation of $15.1 million in the Navy Stock Fund for war reserve stocks, pursuant to section 734 of Public Law 96-527; to the Committee on Appropriations.

1510. A letter from the Secretary of the Navy, transmitting a draft of proposed legislation to amend the Department of Defense Appropriation Authorization Act, 1978 (Public Law 95-79, 91 Stat. 323) concerning a congressionally mandated reduction of numbers of civilian employees within the Department of Defense; to the Committee on Armed Services.

1511. A letter from the Secretary of the Air Force, transmitting notice of the proposed withdrawal of Air Force support activities at Hancock Field, N.Y., during calendar year 1983, pursuant to 10 U.S.C. 2687; to the Committee on Armed Services.

1512. A letter from the Deputy Assistant Secretary of Defense (Installations and Housing), transmitting notice of the location, nature, and estimated cost of various construction projects proposed to be undertaken by the Naval and Marine Corps Reserve, pursuant to 10 U.S.C. 2233a(1); to the Committee on Armed Services.

1513. A letter from the Deputy Assistant Secretary of Defense (Administration), transmitting a report on the financial condition and operating results of Working Capital Funds of the Department of Defense for fiscal year 1980, pursuant to section 405(c) of the National Security Act of 1947, as amended; to the Committee on Armed Services.

1514. A letter from the Secretary of the Treasury, transmitting his annual report on the economic viability of depository institutions, pursuant to section 206 of the Depository Institutions Deregulation and Monetary Control Act of 1980; to the Committee on Banking, Finance and Urban Affairs.

1515. A letter from the Secretary of Housing and Urban Development, transmitting a report on the study of the impacts of excluding pension cost-of-living increases from rent charges in HUD-assisted rental housing programs, required by the conference report on the Housing and Community Development Act of 1980; to the Committee on Banking, Finance and Urban Affairs.

1516. A letter from the Secretary of Labor, transmitting a draft of proposed legislation to amend the Federal Employees' Compensation Act, as Amended (FECA) and related programs; to the Committee on Education and Labor.

1517. A letter from the Secretary of Health and Human Services, transmitting notice of a further delay in submission of the report on the study of State laws, practices and systems relating to death investigation and their impact on sudden and unexplained infant deaths, required by section 1121(c)(2) of the Public Health Service Act; to the Committee on Energy and Commerce.

1518. A letter from the Director, Office of Personnel Management, transmitting a draft of proposed legislation to repeal statutory minimum grade levels for certain Federal positions; to the Committee on Energy and Commerce.

1519. A letter from the Acting General Counsel, Department of Energy, transmitting a draft of proposed legislation to reduce regulatory burdens and authorize the waiver of licensing requirements with respect to certain non-Federal hydroelectric power projects; to the Committee on Energy and Commerce.

1520. A letter from the Secretary of State, transmitting the first annual report on the professional development programs of the State Department, the Agency for International Development, the International Communication Agency, the Foreign Agricultural Service, and the Foreign Commercial Service, pursuant to section 703 of Public Law 96-465; to the Committee on Foreign Affairs.

1521. A letter from the Acting Inspector General, Department of Health and Human Services, transmitting the quarterly report of his office for the period ended March 31, 1981, pursuant to section 204(b) of Public Law 94-505; to the Committee on Government Operations.

1522. A letter from the Secretary of Commerce, transmitting the semiannual report of the Inspector General of the Department of Commerce for the period ended March 31, 1981, pursuant to section 5(b) of Public Law 95-452; to the Committee on Government Operations.

1523. A letter from the Secretary of Labor, transmitting the semiannual report of the Inspector General of the Department of Labor for the period ended March 31, 1981, pursuant to section 5(b) of Public Law 95-452; to the Committee on Government Operations.

1524. A letter from the Secretary of Transportation, transmitting the semiannual report of the Inspector General of the Department of Transportation for the period ended March 31, 1981, pursuant to section 5(b) of Public Law 95-452; to the Committee on Government Operations.

1525. A letter from the Administrator of General Services, transmitting the second report, covering fiscal year 1980, on the general causes and purposes of travel in agencies spending more than $5 million annually on the transportation of people, certain cost data, and inefficient travel practices, pursuant to section 3 of Public Law 96-346; to the Committee on Government Operations.

1526. A letter from the Executive Director, Advisory Commission on Intergovernmental Relations, transmitting a copy of the study on State and local roles in the federal system, and the Federal influence on State and local roles in the federal system, pursuant to section 145(a)(2) of Public Law 94-488; to the Committee on Government Operations.

1527. A letter from the Assistant Secretary of the Interior for Indian Affairs, transmitting a proposed plan for the use and distribution of the judgment funds awarded to the Confederated Tribes of the Colville Reservation of Washington by the U.S. Court of Claims in dockets Nos. 181-C, 342-70 and 343-70, pursuant to sections 2(a) and 4 of Public Law 93-134; to the Committee on Interior and Insular Affairs.

1528. A letter from the Clerk, U.S. Court of Claims, transmitting a copy of the court's judgment order in docket No. 350-G, *The Three Affiliated Tribes of the Fort Berthold Reservation* v. *The United States;* to the Committee on Interior and Insular Affairs.

1529. A letter from the Director, Administrative Office of the United States Courts; transmitting his annual report for fiscal year 1980, pursuant to 28 U.S.C. 604(a)(4), together with the reports of the sessions of the Judicial Conference of the United States held in 1980; to the Committee on the Judiciary.

1530. A letter from the Acting Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders entered in the cases of certain aliens found admissible to the United States, pursuant to section 212(a)(28)(I)(ii) of the Immigration and Nationality Act; to the Committee on the Judiciary.

1531. A letter from the Acting Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders suspending deportation under the authority of section 244(a)(1) of the Immigration and Nationality Act, together with a list of the persons involved, pursuant to section 244(c) of the act; to the Committee on the Judiciary.

1532. A letter from the Secretary of Defense, transmitting a draft of proposed legislation to amend titles 10 and 5, United States Code, to increase the number of Assistant Secretaries in the Department of Defense and for other purposes; jointly, to the Committees on Armed Services and Post Office and Civil Service.

1533. A letter from the Comptroller General of the United States, transmitting a report on changes in natural gas prices and supplies since passage of the Natural Gas Policy Act of 1978 (EMD-81-73, June 4, 1981); jointly, to the Committees on Government Operations and Energy and Commerce.

1534. A letter from the Secretary of the Interior, transmitting the Outer Continental Shelf oil and gas leasing and production annual report for fiscal year 1980, pursuant to sections 15(l) and 22(g) of Public Law 95-372; jointly, to the Committees on Interior and Insular Affairs and Merchant Marine and Fisheries.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. ZEFERETTI: Committee on Rules. House Resolution 147. Resolution providing for the consideration of H.R. 3462. A bill to authorize appropriations to carry out the activities of the Department of Justice for fiscal year 1982, and for other purposes (Rept. No. 97-125). Referred to the House Calendar.

Mr. FROST: Committee on Rules. House Resolution 148. Resolution providing for the consideration of H.R. 3480. A bill to amend the Legal Services Corporation Act to provide authorization of appropriations for additional fiscal years, and for other purposes (Rept. No. 97-126). Referred to the House Calendar.

Mr. BONIOR: Committee on Rules. House Resolution 149. Resolution providing for the consideration of H.R. 3238. A bill to amend the Communications Act of 1934, to extend certain authorizations of appropriations contained in such Act relating to public broadcasting, and for other purposes (Rept. No. 97-127).

SUBSEQUENT ACTION ON A BILL SEQUENTIALLY REFERRED UNDER TIME LIMITATION

Under clause 5 of rule X the following action was taken by the Speaker:

The Committee on Energy and Commerce consideration of the bill (H.R. 2330) extended for an additional period ending not later than June 9, 1981.

PUBLIC BILLS AND RESOLUTIONS

H.R. 3541: Mr. BURGENER, Mr. DERWINSKI, Mr. WILSON, Mr. BAFALIS, Mr. WHITEHURST, and Mr. BARNARD.

H.R. 3614: Mr. LOTT, Mr. GUARINI, Mr. FORSYTHE, Mr. WOLPE, Mr. HEFNER, Mr. SAM B. HALL, JR., Mr. SAWYER, Mr. GINGRICH, Mr. BETHUNE, and Mr. HAMMERSCHMIDT.

H.R. 3619: Mr. BAILEY of Pennsylvania, Mr. BENEDICT, Mr. ATKINSON, and Mr. MARKS.

H.R. 3666: Mr. LEATH of Texas.

H.R. 3688: Mrs. COLLINS of Illinois.

H.R. 3689: Mrs. COLLINS of Illinois.

H.R. 3690: Mrs. COLLINS of Illinois.

H.R. 3704: Mr. BAFALIS, Mr. BAILEY of Pennsylvania, Mr. HUTTO, Mr. LAGOMARSINO, Mr. LEHMAN, Mr. LENT, Mr. MURPHY, Mr. PEPPER, Mr. PORTER, Mr. SCHEUER, Mr. WINN, Mr. BENNETT, and Mr. CORRADA.

H.R. 3706: Mr. RAHALL and Mr. BENEDICT.

H.R. 3769: Mrs. SCHROEDER.

H.J. Res. 72: Mr. DERWINSKI, Mr. PEPPER, Mr. BINGHAM, Mr. OBERSTAR, Mr. WILSON, Mr. LUNGREN, Mr. LEACH of Iowa, Mr. DE LA GARZA, Mr. MURPHY, Mr. DYSON, Mr. LAGOMARSINO, Mr. MCEWEN, Mr. CAMPBELL, and Mr. MOLINARI.

H.J. Res. 235: Mr. RICHMOND.

H. Con. Res. 139: Mr. HORTON, Ms. MIKULSKI, Mr. FOGLIETTA, Mr. GRAY, Mr. MOLINARI, Mr. GINN, Mrs. HOLT, and Mr. FORD of Michigan.

H. Res. 29: Mrs. BOUQUARD, Mr. DREIER, Mr. HANSEN of Idaho, and Mr. SMITH of Alabama.

H. Res. 48: Mr. MILLER of Ohio, Mr. MOORHEAD, and Mr. ROBINSON.

H. Res. 112: Mr. GRAY, Mr. STOKES, Mr. DELLUMS, and Mr. CONTE.

H. Res. 124: Mr. ALBOSTA, Mr. BROWN of California, Mr. CLINGER, Mrs. FENWICK, Ms. FIEDLER, Mr. FORSYTHE, Mr. LUNGREN, Mr. PETRI, Mr. PORTER, Mr. REGULA, Mr. ROTH, Mr. RITTER, Mr. SMITH of New Jersey, Mr. VENTO, and Mr. WORTLEY.

H. Res. 145: Mr. BAFALIS, Mr. CLINGER, Mr. COTTER, Mr. COURTER, Mr. DORNAN of California, Mr. DYSON, Ms. FIEDLER, Mr. FLORIO, Mr. HUTTO, Mr. LENT, Mr. MADIGAN, Mr. MCCLORY, Mr. MINISH, Mr. MITCHELL of New York, Mr. RUSSO, Mrs. FENWICK, Mrs. HECKLER, Mr. PANETTA, Mr. FRENZEL, and Mr. YATRON.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

106. By the SPEAKER: Petition of Iris K. Holland, Boston, Mass., relative to the promotion of infant formula around the world; to the Committee on Foreign Affairs.

107. Also, petition of the city council, Holtville, Calif., relative to a proposed amendment to the Constitution of the United States adopting the English language as the official language of the United States; to the Committee on the Judiciary.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 3455

By Mr. HARTNETT:

—Page 59, following line 11, add the following new section:

SEC. 906. The Secretary of the Army will maintain District Offices of the U.S. Army Corps of Engineers in any coastal area of the Continental United States having a major military installation or facility located within 25 miles of a major defense port. For the purpose of this section, a major military installation is defined to be any one of the following:

1. Major U.S. Navy Shipyard.

2. Home port for major Naval Forces.

3. Major supply and embarkation port for elements of the Armed Forces.

EXTENSIONS OF REMARKS

PEACEMAKING IN THE MIDDLE EAST: THE NEXT STEP

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. FINDLEY. Mr. Speaker, "Peacemaking in the Middle East: The Next Step," an article by Shai Feldman, appearing in the spring 1981 issue of Foreign Affairs, offers creative proposals for reaching peace in the Middle East. I strongly urge my colleagues to read this important article by Mr. Feldman who is a research associate at the Center for Strategic Studies of Tel Aviv University.

I have circulated a copy of the full text of this article to each member of the Committee on Foreign Affairs but have condensed it to reduce printing costs. I hope these excerpts will encourage my colleagues to obtain and read the article in its entirety.

PEACEMAKING IN THE MIDDLE EAST: THE NEXT STEP

(By Shai Feldman)

Three years into the Camp David process, it is time to question its continued usefulness. On the level of their bilateral relations, Egypt and Israel continue to fulfill their respective obligations under the 1978 Accords and the March 1979 Peace Treaty. Yet attempts to elaborate and expand upon these agreements in an effort to achieve a comprehensive Middle East peace have met enormous obstacles. Negotiations over the proposed "autonomy" for the West Bank and the Gaza Strip are nearing a dead end. At issue are the most fundamental national aspirations and interests of the parties involved. Their differences on these issues can no longer be papered over by ambiguous legal formulations. Efforts to overcome these various problems incrementally are unlikely to produce significant results.

In Israel, enthusiasm for the proposed West Bank autonomy has withered—a process that began almost as soon as the plan was conceived. Increasingly, Israelis conclude that "real autonomy" can lead only to an independent Palestinian state—a perception which is not shared by their Palestinian neighbors. The fundamental problem from Israel's perspective is whether it can afford to yield control over the West Bank. The area's proximity to the state's essential core makes this a critical issue. The establishment of a possibly radical Palestinian state so close to Israel's heart is a source of much Israeli concern. Fear that such a state would threaten Israel's very existence is widely shared.

With such fears, Israel's flexibility in the autonomy talks is necessarily limited. * * *

Other parties to the "autonomy" talks do not enjoy greater room for maneuver. At stake for Egypt is her ability to escape her present isolation within the Arab world. Having broken ranks with her former allies by signing a separate peace treaty with Israel, Egypt must now devote much effort to restoring her regional ties. To achieve this goal, Egypt needs to demonstrate that she continues to care for her Arab brothers. Her ability to establish her former position of leadership in the Arab world requires that she champion the Palestinian cause with no less enthusiasm than her chief competitors. Egypt must show that her political strategy will bring greater gains for the Palestinians than will the "military-confrontation" strategy of Syria and Iraq. Her ability to deliver Palestinian self-determination would provide conclusive evidence of the utility of her political approach.

* * * * *

For the Palestinians, the ever-absent party to the "autonomy" triangle, the dilemma is no less cruel. The Camp David agreement calls for the participation of West Bank Palestinians in the autonomy negotiations. However, the latter refuse to join the talks until permission from the Palestine Liberation Organization is received. The PLO, in turn, faces three difficult choices. By refusing to sanction the participation of local Palestinians in the autonomy talks, it loses a clear opportunity to exert indirect influence over the negotiations' outcome. On the other hand, were the PLO to permit such participation, it would risk the possibility that the West Bank leaders would exploit the talks to establish independent power bases of their own. A third PLO option—joining the negotiation process directly—is likewise hazardous. Its advantage would be in providing the PLO, for the first time, with direct leverage on the negotiations' outcome. However, such a move would have to be made outside the Camp David framework, which recognizes no role for the PLO. In addition, it would require that the PLO meet America's preconditions for negotiation: recognition of Israel's right to exist, and acceptance of U.N. Resolutions 242 and 338, which evisage a peaceful settlement entailing Israeli withdrawal from occupied territories in return for Arab recognition of Israel's integrity as a sovereign state within secure and recognized boundaries.

* * * * *

The three regional partners to the proposed autonomy scheme are thus completely deadlocked. Substantial progress in these negotiations is extremely unlikely. As long as the issues involved are weighed in their present context, a regional settlement is unlikely to result. An alternative framework is urgently needed.

The proposed "Jordanian option" is unlikely to provide a viable alternative to the "autonomy" framework. This option calls for Israeli-Jordanian negotiations aimed at returning large portions of the West Bank to Jordan's control. However, whether King Hussein would agree to negotiate such a deal is still a question. At present, Israel will not—indeed, cannot—meet Hussein's minimal condition for such talks, namely an expressed Israeli willingness to withdraw from the entire West Bank, including East Jerusalem. Small wonder, then, that Jordan's king remains dubious about the entire exercise, emphasizing his acceptance of the PLO's role as the Palestinians' only legitimate representative.

* * * * *

Israel's moral fiber weakened after the 1967 War because the two principal sources which had sustained it up to that point no longer existed: a new reality threatened to compromise the preferred character of the Jewish state; and Israel's leaders refused to address the apparent dilemma, thus allowing the state's character to be eroded. Increasingly, Israelis raised fundamental questions about the purposes of their state and the nature of the road it was taking. Basic political and moral objections to Israel's foreign and defense policies were raised: many Israelis queried whether their leader's demand for absolute security would not lead to permanent war. Such objections found widespread expression during the 1969–70 War of Attrition, and later, as Israelis found that controlling the increasingly hostile Palestinians in the West Bank and the Gaza Strip was a rather unpleasant proposition. Thus, Israel's national consensus on the basic principles of its policy was significantly eroded.

Seen from this perspective, Israel has a fundamental interest in ridding itself of control over the West Bank. Numerically inferior to its adversaries, the state must rely on superior quality and high motivation among its citizens. To withstand their more numerous enemies, Israel's citizen-soldiers must be completely persuaded of the purposes of their state's policies. Once its national consensus is lost, Israel's very survival is in question. A return to lines approximating those held prior to the 1967 War implies both the return to the borders of a Jewish state and the reconstruction of its national consensus. It would constitute a reestablishment of the common denominator uniting all Israelis. Were they ever attacked again, they would at least enjoy a common purpose and common conviction that they had done everything possible to establish peace. Thus, the high motivation of Israel's soldiers will not be in doubt. This by itself is a major factor to be considered in weighing the security risks associated with giving up control over the West Bank.

Israel's withdrawal from the West Bank could be implemented only in the framework of a new national security package encompassing four elements: first, a new role for Israel in the Western alliance system; second, security arrangements in the West Bank for the post-withdrawal era; third, an international economic effort to maximize both West Bank economic development and its interdependence with the economies of Israel and the more pro-Western Arab States; fourth, an explicit nuclear deterrence posture. Within such a national security package, the significance of the West Bank would decline. This would allow Israel to recognize Arab sovereignty over the entire West Bank and to withdraw from almost all its territory.

The first element in Israel's proposed national security package is an enhanced role

in the Western alliance system. More precisely, Israel should be made an integral part of the alliance's efforts to secure Western interests in the Persian Gulf. This would increase Israel's deterrent profile: potential adversaries would be made aware that the Western alliance system has important stakes in Israel and that an attack on her could lead to a direct clash with the alliance.

* * * * *

By virtue of its geographic location, domestic stability, utter reliability, highly skilled manpower, and extremely potent air, naval, and ground forces, Israel has much to offer to the Western alliance.

Israel could make a number of contributions to the Western alliance. First, Israel's air bases, including the two new bases now being built in the Negev, could be adjusted to make them interoperable with the U.S. Air Force. This would allow their use for the staging of operations such as those envisaged above for the Rapid Reaction Force, and later for the Rapid Deployment Force. In addition, Israeli bases could be used for the staging of bombing operations. For example, if the Soviets were to begin an invasion of the Persian Gulf, operations could be staged from Israel to hit chokepoints in the Soviet advance. Second, munitions, fuel, food supplies, drinking water, communications equipment, and medical gear could all be pre-positioned in Israel. Such pre-positioning would have the advantage of proximity to critical areas where the deployment of the RRF and the RDF might be required. The critical importance of large quantities of drinking water became apparent during the latest exercise held by elements of the U.S. 101st Airborne Division in Egypt (Operation Bright Star). The pre-positioning of jet-engine fuel would allow for air-refueling operations by KC-135 tankers to be launched from Israeli bases, thus extending the ranges of such tactical aircraft as the FB-111.

Third, Israel could provide "real time" intelligence on domestic developments in the region. Such intelligence would be required for the timely employment of the Rapid Reaction Force. In addition, Israel could help in providing some air and naval cover for such a force. Fourth, should a military clash require the deployment of America's airpower in the farther corners of the region, Israel's land-based airpower could be employed to defend U.S. aircraft carriers. If these carriers were stationed in Israel's proximity, Israel's Navy could also be used for that purpose. Finally, in a grave crisis, Israel's air and naval forces could defend strategic chokepoints, such as the Straits of Bab el Mandeb.

In planning and preparing for such contingencies, Israel would be able to share with the Western alliance its rich combat experience in the region. Such sharing could take the form of employing Israeli advisers in desert warfare exercises held in the United States; the presence of U.S. training staffs in similar exercises held in Israel; joint planning for contingencies requiring U.S.-Israeli cooperation; and the joint conduct of war games.

Finally, Israel may have a number of contributions to make in the event that the alliance became involved in a prolonged, high-attrition military conflict in the Gulf. Israel could fulfill a wide variety of supportive and back-up roles for the combatting forces; for example, high-quality maintenance as well as excellent medical services could be provided. The surge capability of Israel's armament industry could play an important role as well, particularly since ammunition shortages are expected to be a critical problem in a battlefield characterized by the extensive use of modern armor and precision-guided munitions.

An enhanced role for Israel in the Western alliance system would differ markedly from past suggestions that Israel should trade its control of the West Bank for an American security guarantee. Whereas a guarantee would institutionalize dependence—with a debilitating effect on the nation's morale—the concept advanced here would establish interdependence. Israel would be dependent on the Western alliance, but the alliance would also become more dependent upon Israel. Thus, relations would be characterized by a far greater degree of symmetry than is the case with unilateral security guarantees, increasing the likelihood that the concept would be acceptable to Israel's body politic. In addition, since it would rest on enduring mutual interests, the commitment would enjoy far greater credibility.

The second component of the package involves security arrangements in the West Bank following Israel's withdrawal. These should include prohibiting the introduction of heavy armaments into the West Bank for Arab forces, and, conversely, permitting the stationing of Israeli early-warning systems, surface-to-air missiles, and pre-positioned stocks in very limited areas. The limited real estate required for these purposes should be leased, without prejudice to Arab sovereignty over the entire West Bank. Also emphasis should be placed on avoiding friction with the area's residents. Therefore, the large-scale stationing of Israeli ground forces in the West Bank should be strictly avoided.

* * * * *

Many fear that terrorism directed from the West Bank against Israel will grow once Israel withdraws from the area. * * *

A measured assessment of the risks of terrorism, however, must take account of the problem's relative importance. Yearly, Israel's casualties from terrorism amount to from one-tenth to one-fifth the number of casualties caused by traffic accidents. Terrorism has resulted in many personal tragedies, but for the nation it does not constitute a major strategic threat. In Israel's case, a national strategy which is otherwise sound should not be rejected simply because it does not provide an answer to terrorism. One may also argue that with Israel's withdrawal from the West Bank—allowing for a resolution of the Palestinian problem—the incentives for terrorism would diminish. In addition, the future Arab sovereign of the West Bank would have a strong vested interest in arresting terrorism.

* * * * *

A major potential threat for Israel is that following her withdrawal, the West Bank will drift toward radicalism and its new rulers will initiate either terrorist or more organized forms of violence. The third component of the proposed security package addresses this threat. Its basic premise is that the ability to deter terrorism should be augmented by a network of incentives barring the West Bank's possible radicalization. These incentives should include a dramatic development of the West Bank economy, as well as making it interdependent with the economies of Israel and pro-Western Arab states.

* * * * *

To be sure, economic interdependence by itself cannot provide peace and stability. If anything, the causal relationship between interdependence and peace tends to be in the reverse direction—without a strategic and political framework providing general stability, economic relations do not reach a level allowing the creation of interdependence. Clearly, there is a feedback relationship: once interdependence is established, the costs of dissociation increase, thereby enhancing stability and peace. However, an appreciation that interdependence can only cement the blocks arranged by a proper strategic and political framework is required, so that unwarranted expectations—and, later, unnecessary disappointments—could be avoided.

* * * * *

Israel's withdrawal from the West Bank and the Gaza Strip might well reduce the Arabs' motivation to wage war against Israel, but it would not eliminate this motivation entirely. Arab challenges to Israel's survival might yet recur. Since the aforementioned components of the proposed security package do not fully meet the dangers entailed in such recurring challenges, an additional deterrent is needed. Therefore, Israel should develop the capability and adopt an appropriate strategy and doctrine for overt nuclear deterrence. This comprises the fourth element in the proposed national security package.

In terms of capability, Israel should develop nuclear weapons in a quantity and of a yield sufficient to demolish salient targets in each of the Arab states. The suggested doctrine is countervalue—that is, threatening the destruction of cities and resources. It should consist of a simple but intentionally vague declaration that any attempt to cross Israel's borders by a significant military force would be countered with extremely high levels of punishment. The strategy's purpose would be to deter the Arab states from pursuing most forms of violence against Israel by letting them know that she possesses the means for devastating punishment.

The central thrust of this essay is the creation of a new Israeli national security package, providing a new strategic context in which the West Bank's current pivotal role in Israel's security is altered, thus allowing Israel's withdrawal from the area. The willingness to carry out such a withdrawal is a prerequisite to the implementation of either a "real autonomy" or the "Jordanian option." Given a willingness to withdraw, both are feasible avenues to a comprehensive Arab-Israeli accommodation. And, on balance, they involve a similar mix of risks and opportunities. Essentially, both constitute "Palestinian" options: the "real autonomy" would quickly lead to a "small" independent Palestinian state in the West Bank and the Gaza Strip; the Jordanian option would over time lead to a large Palestinian

state, encompassing the Gaza Strip and both banks of the Jordan River.

* * * * *

Only after Israel has gained the support of her staunchest ally, the United States * * * will she be able to initiate the difficult steps toward a comprehensive Middle East settlement.●

DEANO C. CERRI: A GREAT UNION MAN

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. MILLER of California. Mr. Speaker, I rise today to honor Deano C. Cerri, senior business representative of the United Brotherhood of Carpenters & Joiners Local 2046 in Martinez, Calif. who will be retiring on June 30 after 33 years as a member of the union.

Deano joined local 2046 in 1948, and has served as a business representative for 12 years, the last 4 as senior business representative. In addition, Deano has been active in the Bay Counties District Council of Carpenters, and as a member of the board of trustees of the carpenters apprenticeship and training fund for all of northern California.

Beyond his union activities, Deano has exemplified the best qualities of the union movement with his active role in community affairs. He has long been involved with the Boys Clubs of America, serving on its board of directors and as its president.

It is with some sadness that I wish Deano a fruitful and enjoyable retirement, for his contribution to local 2046 will surely be missed. His dedication to the betterment of his fellow workers is a tribute to the best that the labor movement has to offer, and I hope that we will continue to have such dedicated union members as Deano Cerri.●

USICA INTERVIEWS MIKE BARNES

HON. SAM GEJDENSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. GEJDENSON. Mr. Speaker, our colleague MIKE BARNES, chairman of the Subcommittee on Inter-American Affairs, on which I am privileged to serve, was interviewed in March by Judy Hurley, staff correspondent of the U.S. International Communications Agency. Ms. Hurley's article, which was sent to all USICA posts in Latin America, describes Chairman BARNES hopes and plans for the subcommittee during the 97th Congress, and sets forth some of his views on Latin American policy. Because of the interest we all have in Latin America, and the importance we attach to the work of the subcommittee, I wish to include the article in the RECORD at this point.

CONGRESSMAN PLANS TO HIGHLIGHT UNITED STATES-LATIN AMERICA POLICY

(By Judy Hurley)

WASHINGTON.—The crowd in the stately corridor of the Rayburn House Office Building of the U.S. House of Representatives grew as lobbyists, students, churchmen and women, government officials, and journalists waited for the doors of the Foreign Affairs Committee room to open. Not everyone was able to get into the room, but those left out and millions of other Americans across the United States did find out what transpired through news programs and newspapers. The subject of that hearing, March 11, and of two other equally crowded previous hearings was U.S. policy toward El Salvador.

Michael D. Barnes (D-Md.), Chairman of the Inter-American Affairs Subcommittee, was probably very pleased with what happened that afternoon. For just as the Reagan Administration has focused its primary foreign policy attention in its first two months in office on Latin America, so too has there been a renewed focus on the area in Congress. Rep. Barnes has revitalized the subcommittee, both legislatively and in the public eye, saying that for too long, except when there is a crisis, too little attention has been paid to Latin America.

"I hope that the subcommittee can be a forum responsible for a long-range look at Latin America and at how conditions in Latin America can be impoved," he said, during a recent interview. "With the change of administration and the change in the Senate, there is some feeling in the House that there ought to be a forum for responsible discussion of administration policy by supporters and critics, and in a responsible way the subcommittee can supply that kind of forum."

Not since the 1978 Panama Canal Treaty hearings on the other side of Capitol Hill in the Senate has there been such public interest in the U.S. policy toward its hemispheric neighbors. With the Reagan Administration emphasis on Latin America, especially events in El Salvador and Nicaragua and terrorism throughout the area, so too has the legislature become more concerned with the importance of activities in the hemisphere. The legislators are in a position to approve or reject President Reagan's requests for appropriations, and as in the case of Barnes' hearings, to force issues into public debate. Through meetings of his subcommittee, Barnes has presented to his colleagues in the House a variety of opinions and viewpoints providing background on Latin American affairs.

Barnes' role is especially important in the 97th Congress, because for the first time in 25 years, the Democratic-controlled House of Representatives finds itself confronted with a Republican-controlled Senate and a Republican administration.

But while Barnes and the Foreign Affairs subcommittee are focusing on the current problem in El Salvador, it is Barnes' intention to take a long-range look at relations and to also sort out U.S.-Latin American problems.

Except during a crisis, "far too little attention has been paid to Latin America," Barnes said. "We have also tended to see Latin America as one entity and . . . tried to package one policy for all of Latin America.

"There is such a divergence of cultures and nations that it takes a much more sophisticated approach, and I would hope that our subcommittee can contribute to that kind of sophistication," he said.

In the last month, Barnes has begun turning his ideas into action. The Committee has heard from scholars on Latin America and reviewed U.S. sanctions against Chile, in addition to carrying out the lengthy examination of the U.S. role in El Salvador.

"Economic deprivation and political repression" are the major concerns in the region that have to be addressed "pretty directly," Barnes said.

"Economic deprivation foments unrest and political repression foments unrest. People are not able to live with any kind of dignity if they are in fear of their own governments," he explained. "You will constantly have the danger of instability; so it is in the United States' interest and in the interest of the people of Latin America to have as rapid as possible economic development and increased political freedom and human rights.

"The desire of outsiders to take advantage of the economic and political problems—as clearly the Cubans will" is another reason for the United States to give economic help and to push for political reforms, Barnes said, pointing to the Reagan Administration's proof of outside intervention in El Salvador.

But Barnes also feels that the administration is putting too much emphasis on Soviet activities in the hemisphere. "Our policies with respect to Latin America," he said, "need to be sufficiently sophisticated to recognize that not everthing that happens is part of the East-West problem."

While economic, political, and human rights problems vary markedly from country to country throughout Central and South America and the Caribbean, Barnes feels "it is important that the people have the perception of the United States as a country that cares whether their lives are improving, and whether or not their freedoms are increasing."

While there has always been what he calls an "arrogance of power" in the way the United States has traditionally dealt with Latin America, Barnes said, the United States has been such a factor of life there that "we can't deny some ultimate responsibility for what is going on there . . . If we just sat back today, we will have changed our policy of the last 50 to 100 years . . . If we were to say it is not our role now, and not at least encourage reform, it seems to me we would be taking a pretty unrealistic approach."

One of the concerns some Members of Congress have now, he said, is that the Reagan Administration may be giving the perception that all the United States is concerned about is its own self-interest, particularly security interests.

It must be generally understood throughout the world, he said, that the United States cares about other things. "We are not worried about freedom of the press, for example, just for the people in the United States. We also care whether people in all of Latin America, including Cuba, and places like Poland, Afghanistan, and the Soviet Union have freedom of the press. It should not be a one-sided policy."

The United States needs to have a combination of continued public statements and private discussions to encourage human

rights, he said. "It is important that we, in a public way, on a regular basis, restate our commitment to basic human rights as an element of our relationship with other countries. If we don't stand for that, we don't stand for much of anything."

"I think there are instances where the public posture of the United States in respect to human rights is important," he explained. "I also think that there are many specific instances where more can be achieved by privately—quietly—making a case."

Immigration will be another major issue of the next few years, Barnes pointed out, adding that he would like to hold joint hearings on the question with the Judiciary's Subcommittee on Immigration, Refugees, and International Law.

Immigration, especially with respect to Mexican workers, could raise a "lot of interesting questions about how our economy works, how these people are being exploited, what the impact of an open door policy would have on our inflation rate . . . A lot of questions that are not simple to answer," he said.

Barnes also would like his subcommittee to investigate international narcotics control.

The biggest legislative responsibility of the subcommittee is determining appropriate military and economic assistance for countries in the Western Hemisphere. That is expected to take up a lot of the committee's time.

Barnes said that the committee will be looking at the Reagan Administration's request for aid and hopes "there will be some consultation with Members of Congress as that develops."

The 37-year-old Congressman represents a legislative district close to the nation's capital and comes to the chairmanship this year after only one term in Congress, but with several years of experience in American politics. A lawyer, Barnes did postgraduate work in international economics in Geneva. He was a special assistant to then-Senator Edmund Muskie during Muskie's 1970-1972 campaign for the presidency and was executive director of the National Democratic Platform Committee for the 1976 Democratic National Convention.●

HUMANE TRANSPORTATION OF HORSES INTENDED FOR SLAUGHTER ACT OF 1981

HON. TOM HAGEDORN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. HAGEDORN. Mr. Speaker, I am today introducing a bill entitled "the Humane Transportation of Horses Intended for Slaughter Act of 1981." This bill is prompted by growing reports of serious shortcomings in the manner in which some horses are transported to slaughter. This legislation is intended to halt these abuses by filling in one of the few gaps in our laws governing the humane handling of animals.

The high cost of food, and particularly for meat, in Europe and Asia combined with the foreign taste for horsemeat has created a strong demand in America for slaughter horses. This demand has led to a dramatic increase in the price paid for horses as slaughter animals and a concomitant increase in the number of horses trucked to slaughter plants. These increases in the slaughter horse traffic have attracted some truckers who lack the knowledge or concern to handle these animals in a humane manner during shipment.

In these instances, horses are placed in overcrowded trucks, denied proper watering and food, not unloaded to relax cramped muscles, and handled callously. There are all too frequent reports of horses tied head and tail to the trucks, vehicles without enough headroom, with sharp protruding edges which cause serious wounds. Often young foals are mixed with adult horses resulting in the young animals being trampled to death.

In the last 10 years, the number of horses slaughtered at USDA-inspected plants has increased from fewer than 60,000 to more than 320,000. The prices paid for these horses has increased from 20 cents per pound to 50 or 60 cents per pound. The volume and dollars involved has resulted in an equal increase in cases of severe abuse of the animals.

A Federal solution is required to meet these problems for two reasons. First, the abuses take place in interstate commerce and fall within the traditional jurisdiction of Congress. Slaughter horses are generally shipped through several States, and some are destined for shipment directly to foreign nations. Unfortunately, there are no Federal laws governing the shipment of these animals. While a few States have enacted laws and regulations dealing specifically with horse transportation, these requirements apply only to the shipment while it is in that State. A Federal law is necessary because the abuse transcends State lines.

Second, the State laws dealing with humane treatment of animals, particularly slaughter horses, are rarely effective and lack uniformity in the few States which have enacted rules to govern these shipments. Most States do not even have rules governing slaughter horses, and rely on antiquated and inadequate cruelty statutes.

Another side effect of the growing horse meat trade has been an increase in the number of horse thefts. Slaughter plants provide a ready market for stolen horses since they are not interested in the breeding or confirmation of the animal involved. While this bill does not deal directly with the theft problem, I welcome suggestions from interested parties how this can be handled.

This legislation intends to provide for humane treatment of these horses. It directs the Secretary of Agriculture to establish regulations governing the humane handling, care, treatment, and transportation of slaughter horses. These standards must include minimum provisions for feeding, watering, loading, sanitation, ventilation, shelter from the weather, and vehicle specifications. The legislation authorizes the Secretary to investigate and inspect the vehicles and horses in transport as he deems necessary and provides civil and criminal penalties for violators.

We have Federal legislation regulating the ways animals are slaughtered once they arrive at the plant, yet these laws seem inconsequential if the horses are mistreated in shipment to be slaughtered. Many of the slaughter plants agree with the intent of this bill not only because they have no wish to see the horses suffer, but because horses transported in a humane manner have greater value for their business.

The time is long past for the protective legislation. We have an obligation to halt these unnecessary abuses and I hope my colleagues will join in cosponsoring and supporting this bill.●

CIVIL SERVICE RETIREMENT CREDIT

HON. BOB SHAMANSKY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. SHAMANSKY. Mr. Speaker, today I am introducing a private bill to secure civil service retirement credit for certain present and former employees of the Defense Construction Supply Center in Columbus, Ohio. This legislation, proposed by my predecessor, Mr. Sam Devine, in the 96th Congress—H.R. 8165—concerns 51 employees who, from the late 1940's until the mid-1960's, worked as supply catalogers, performing Federal cataloging services for private companies under contract with the Department of Defense. During this time, these individuals worked side by side with civil servants and their work was supervised and controlled by Federal civil service personnel. In the early 1960's, when the Government decided to undertake this cataloging function itself and established the Defense Construction Supply Center in Columbus, these employees were automatically assumed into the Federal civil service where they performed the same job duties previously performed as private employees at the same Government site.

The purpose of this private bill is to grant each of the 51 affected employees a measure of retirement security by increasing the number of years for which they would receive credit in the computation of their civil service retirement annuities. While inequities of

this sort are not often resolved via private legislation, precedent does exist for unique situations similar to that presented here, see, for example, Private Law 93-123. Further, in these times of fiscal restraint, it is important to note that this bill would not impose any direct costs on the Federal Treasury, since it provides for a transfer of retirement credit from the social security system, into which the employees have already contributed, to the civil service retirement system. By no means would the affected employees receive duplicative benefits.

I urge my colleagues to support this bill which would grant these 51 employees an equitable and fair measure of retirement security within the civil service retirement system, based upon their services which directly benefited the Federal Government. These individuals, now civil servants nearing retirement, deserve this credit for the period they worked in civil service-type jobs and were employees in the "private" sector in name only.●

U.S. FLAGSHIP FAIR COMPETITION TAX ACT

HON. JOHN B. BREAUX

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. BREAUX. Mr. Speaker, today I have introduced legislation, cosponsored by my colleague, Congressman JACK KEMP and other Members who are all vitally concerned about the present state of the U.S. merchant vessel fleet. Our bill, similar to H.R. 2456 which was earlier introduced by Congressman KEMP and cosponsored by myself and several supporters of the new bill, attempts to put U.S. vessel owners on an equal tax footing with many of their foreign competitors.

Mr. Speaker, the sad plight of our merchant fleet is no surprise to those of us who have witnessed the erosion of U.S. superiority in merchant affairs. For example:

In 1950, our fleet ranked first in total capacity, with over 3,500 U.S.-flag oceangoing vessels. In 1980, that ranking had slipped to seventh and our fleet had declined to only 578 active vessels;

The number of seafaring jobs in U.S. oceangoing commercial vessels has dropped from a high of 54,000 as late as 1966 to just 19,385 in 1980;

The U.S. merchant fleet now carries less than 5 percent of our total import-export trade and less than 2 percent of our dry-bulk trade; and

As late as 1970, the number of U.S. liner companies totaled 19. In 1981, we only have nine such companies headquartered in the United States.

These are just a few of the sad statistics that readily demonstrate the depressed nature of both the U.S. merchant vessel fleet and the equally vital shipbuilding industry. The key question becomes why this state of affairs has come to exist and what can we in the Congress do about it?

Mr. Speaker, my colleagues and I who have cosponsored this legislation believe that the answer to these questions is evident from an examination and comparison of the vessel depreciation rules of our major foreign trading partners with those currently existing in the United States. In the United Kingdom, for example, the total first year's depreciation writeoff is 100 percent; in Japan, 59.3 percent; in Sweden and Denmark, 51 percent; and in West Germany, 45 percent. Several other nations allow over one-third of the vessel cost to be depreciated in the first year. By comparison, the United States allows only 13.8 percent of the vessel cost to be depreciated during the first year it is in service.

Our new legislation is intended to remedy this inequity and to provide clear incentives not only for the construction of U.S.-flag merchant vessels, but incentives for the construction of such vessels in U.S. shipyards as well. The principal features of the new legislation will:

First, allow a 1-year writeoff for American-built, U.S.-flag vessels and a 5-year writeoff for foreign-built, U.S.-flag vessels. Our original bill, H.R. 2456, did not provide a 1-year writeoff for American-built vessels. We felt that this did not provide adequate incentives to construct our vessels in U.S. shipyards;

Second, in a manner similar to the administration's H.R. 2400 and our H.R. 2456—provides flexibility as to the timing of the deduction. In recognition of the cyclical nature of the international maritime industry, the bill provides a more flexible method for the carryover of depreciation benefits to later years;

Third, permit the benefit of the new, competitive depreciation rules to take effect sooner than proposed by the administration in H.R. 2400. Without the phasein period, the new schedules would come into effect in 1981 and extend to the entire U.S.-flag fleet. Owners of existing vessels would not recompute taxes already paid, but could apply the new schedules to remaining basis and the value of additions to basis subsequent to the effective date of the provisions; and

Fourth, discourage the abuse of these provisions by imposing a recapture penalty on any taxpayer that transfers a U.S.-flag vessel that has used the new depreciation rules to a foreign registry.

Mr. Speaker, in conclusion I believe that this bill is necessary, effective and consistent with the new tax policies emerging from this Congress. I hope that many more of our colleagues will join us in sponsoring and working for the enactment of this legislation.●

U.S. FLAGSHIP FAIR COMPETITION ACT

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. KEMP. Mr. Speaker, today, I have joined with Congressman JOHN B. BREAUX and 28 of our colleagues to reintroduce the U.S. Flagship Fair Competition Act. Our bill is very similar to H.R. 2456—which I introduced earlier this year—but with some important differences. The new bill will provide an additional incentive for ship construction in the United States. Specifically, it will allow a 1-year writeoff for American-built, U.S. flagships and a 5-year writeoff for foreign-built, U.S. flagships. Our intent is still the same—to encourage the construction of U.S. flagships and to provide an impetus to build those ships in the United States.

Three decades ago, the United States was the most powerful nation in the history of the world. Today, the 500-odd oceangoing vessels flying our flag carry less than 5 percent of our commerce. That means 95 percent of U.S. trade is carried by ships of other countries, whose availability in time of crisis is uncertain at best.

Though many factors have contributed to this dangerous decline in our maritime industry, U.S. Federal tax policy certainly played a major role. The governments of most maritime nations provide substantial incentives for shipping, and one of the most effective they receive is rapidly accelerated depreciation. Great Britain allows a 1-year writeoff, Sweden allows a 5-year writeoff, and Germany allows its shipbuilders to write off almost half in the first year alone. But in the United States the current depreciation rate for U.S. ships is 14½ years. Without the capital to put into new ships, U.S. shipbuilding is caught in a severe slide.

This decline in U.S. shipbuilding capacity and in the number of U.S. flagships has cost us thousands of jobs as well as the security—both military and economic—that a sound merchant marine insures. Over one-half of the members of the International Longshcremen's Association in Buffalo today are either unemployed or working part time at jobs that are not maritime related. In New York State, 1962 was the last year the ILA accepted new union members. For 18 years, no new longshoremen jobs have been created in New York.

If the United States is to survive as a secure and prosperous nation, we must develop and underake a maritime

policy that will reestablish the U.S.-flag commercial fleet as an effective economic instrument capable of supporting U.S. interests abroad. A sound merchant marine is essential for world security, for our domestic economy, and for the future of thousands of American workers nationwide. The U.S. Flagship Fair Competition Act is an important step in our program of recovery for the U.S. shipping industry.●

BENEFITS OF PRIVATE EDUCATION

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. RUDD. Mr. Speaker, I have on previous occasions expressed my support for tuition tax credits for parents who choose to send their children to nonpublic schools. A related matter that is of increasing concern to me is the inability of our public educational institutions to provide the needed discipline and basic curriculum that is of paramount value in our society's desire to achieve optimum educational standards. Study after study have indicated that nonpublic schools are doing a far better job of accomplishing this goal than the public institutions, which received billions of dollars of our tax support.

The following article suggests ways in which the public school system can learn from the successes of the private institutions, which spend about $1,000 less per student than our tax-supported schools. The article, written by Phoenix Gazette columnist Marcia Sielaff, quotes data figures run by the National Center of Education Statistics on high school sophomores and seniors, and accomplished studies by James Coleman and Andrew Greeley. These two distinguished educators and authors both laud the success of the private schools' academic achievements.

I insert the May 19, 1981, editorial written by Marcia Sielaff at this point in the RECORD:

CATHOLIC SCHOOLS ADD TO SUPERIORITY OF PRIVATE EDUCATION

(By Marcia Sielaff)

Public school officials are unhappy about a study by James Coleman that shows the academic superiority of private and parochial high schools. They would be more unhappy if a study of Catholic High Schools were as widely publicized as the Coleman report.

Both reports analyzed data from a National Center of Education Statistics' study of high school sophomores and seniors. Andrew Greeley, author of "Minority Students in Catholic Secondary Schools," concentrated on identifying the factors that contribute to superior achievement among minority students.

Coleman was not as concerned with what makes some schools better than others as he was with finding ways to foster desegregation. Coleman believes that tuition tax credits and voucher plans will bring more minority students into private education. That private school students learn more was important to Coleman because it makes nonpublic education attractive to minority parents.

Coleman concludes that private schools are most successful with students of low socio-economic background, exactly the group that does so poorly in public schools. Among Coleman's other findings: Private schools have superior discipline; have higher academic standards, and require more homework.

He also notes that private schools accomplish their success with almost no federal funding and few special programs. Educators say the Coleman report is invalid because private schools enroll students of higher socio-economic status, can select their students and have fewer minorities.

Coleman verifies these differences though he points out that private school students come from a wide range of socio-economic groups. More public school students come from the lower end of the socio-economic scale while private schools have more students from higher income brackets.

He denies, however, that these differences fully account for the superior academic achievement of private school students. Greeley also concludes that differences in student background are not sufficient to explain the differences in academic achievement.

Minority students from the same socio-economic groups achieved significantly more in Catholic schools than in public schools. Most significant of all: Differences in academic performance between high and low socio-economic groups are virtually eliminated by the senior year of Catholic school. Greeley attributes this unusual research finding to superior academic instruction in Catholic high schools.

Greeley compared Catholic with public schools and concentrated on the achievement of minority students. He found that regardless of racial and ethnic differences all Catholic school students are expected to do the same amount of homework, write the same number of papers and complete the same course work.

Coleman compared both Catholic and other private schools with public schools. Both researchers verify that private and parochial school students take more academic course work and have fewer electives from which to choose.

Despite greater discipline in Catholic schools, more than three-quarters of Catholic school students said that disciplinary policies were excellent or good as compared to less than half the students in public schools. Non-public school students also indicated greater self-esteem and felt more in control of their lives. Coleman suggests that academic achievement fosters the growth of self-esteem and leadership qualities.

Greeley recommends more research into what kinds of teaching correlate with superior academic achievement. He has little hope that it will occur, suggesting that research that casts doubt on public education is unlikley to find favor with public school educators.

A study of elementary schools would appear to have even more merit than Greeley's recommendation for more research at the high school level. The similarity of elementary school curriculum would make it easier to compare teaching methods and instructional programs in public and private schools.

High school students come from both public and private elementary schools and their achievement is influenced by their elementary school experience. The variation in courses in high school also complicates comparisons.

Even Albert Shanker, president of the American Federation of Teachers and one of Coleman's most outspoken critics, admits that public schools should emulate private schools. Shanker said, "I believe that there are three major areas in which public schools need change, and if these changes were made, the attraction of private school education would be greatly diminished. The areas are: (1) safety and order in the school and in the classroom, (2) increased pressure for achievement and maintenance of high academic standards, and (3) the teaching of commonly held values."

Public school educators might discover that some expenditures don't contribute to improved educational outcomes. Public schools cost approximately $1,000 more per pupil than do Catholic schools but only about $200 of that can be attributed to the fact that Catholic school teachers (and other private school teachers) are paid less than public school teachers.

There are one and a half times as many students per staff member in Catholic schools than in public schools and Catholic school class sizes are larger. Catholic school teachers are also less likely to hold advanced degrees and they have an absentee rate of half that of public school teachers.

With all the millions of taxpayers' dollars spent on public schools it is perhaps embarrassing to admit that public education would be improved by studying the methods of other schools that do so well with so much less.

Embarrassing or not, if such research will help, public school officials should be the first to recommend it. Their present posture of defensive anger will do nothing to improve education.●

LAFALCE DISTRICT GROWS BY ONE

HON. HENRY J. NOWAK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. NOWAK. Mr. Speaker, a page 1 headline in the Buffalo Evening News in my hometown of Buffalo, N.Y., Wednesday, June 3, read: "LaFalce District Grows by 1."

The News' report stated:

Rep. John J. LaFalce's constituency increased by one early this morning and the Congressman couldn't be happier about it.

Patricia LaFalce gave birth to the couple's first child, a son, at Children's Hospital at 2:31 a.m. Martin John LaFalce measured in at 21 inches, weighed 7 pounds 15 ounces at birth and has curly dark hair. Both mother and son, the hospital says, are doing fine—and dad, according to his local staff, isn't feeling so badly either.

Mr. Speaker, it is a pleasure for me to bring such a good news item to the attention of my colleagues, who I am

sure join in congratulating the LaFalce family and extending our best wishes.●

SMALL BUSINESS BILL OF RIGHTS

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. ANDERSON. Mr. Speaker, much has been said in this Chamber about what action needs to be taken to get our country back on sound economic footing. Much has been said about big labor and big business. And certainly a day does not go by when someone does not rise to speak to the evil of big government. The forgotten one in this wrangle has been the individual entrepreneur who is by far the most important element of our free enterprise system.

I commend to my colleagues Jack Anderson's column in the Washington Post of May 29, 1981:

NEEDED: A SMALL BUSINESS BILL OF RIGHTS

(By Jack Anderson)

Before the first asphalt went down on Wall Street, a love affair began to blossom between Big Government and Big Business. Yet the nation would be better served if the government would listen to the entreaties of a worthier suitor: the individual entrepreneur who has historically been the backbone of the free enterprise system.

In the best American tradition of worshiping financial success, many officials of the Reagan administration have made it their first priority to attend to the needs of the corporate giants.

The American small businessman, meanwhile, could become an endangered species. He is reeling from the after-blast of skyrocketing inflation and interest rates while being battered by abusive tax laws and government regulations.

What small businessmen need is a Bill of Rights that will give them a fighting chance to coexist with the big guys. Here, then, is my own suggestion for a Small Business Bill of Rights:

Right to Compete: Individual initiative and enterprise must be encouraged, not discouraged. Anti-trust laws may need to be tightened to keep the big boys from selling below cost to drive smaller competitors out of business. Given half a chance, the pioneer traits of risk-taking and Yankee ingenuity will rise again.

Right to Be Heard: There are 14 million small and independent businesses in the United States, which employ 58 percent of all private-sector jobs and support 100 million people. Yet their voices are a barely audible whisper in the halls of Congress, compared to the cacophony of Big Business and Big Labor lobbyists.

Right to Inherit: One of the strongest motivations for starting a business is the hope that it can be passed on from one generation to the next. But estate and gift taxes have reached a confiscatory level that threatens the survival of family businesses and promotes sellouts to conglomerates.

Right to Reasonable Regulation: Many a beleaguered small business man spends most of his time filling out government forms and complying with government regulations. The thousands of regulatory laws are written with Big Business in mind; it's unreasonable to expect General Motors and Mike's Garage to meet the same government standards and reporting requirements.

Right to Fair Taxation: The tax laws are full of loopholes that favor the big corporations. The small businessman who files as an individual or partnership is socked with double taxation of dividends and inadequate investment tax credits. If he manages to show a profit or break even in spite of these handicaps, inflation alone will push him into a higher tax bracket.

Right to Affordable Wage Scales: Though organized labor will raise howls of protest, it makes sense to give small businesses relief from minimum wage regulations. Workers will be better off if small firms are free to create new jobs.

Right to Equal Interest Rates: Discrimination against small business borrowers must stop. Bankers justify charging small businesses two or more points above the so-called prime rate, while giving big borrowers rates three or four points below the prime. The argument is that the little guys are bigger risks. But small businesses have no monopoly on failure—as Lockheed and Chrysler have demonstrated.

Right to Government Contracts: The record shows that small businesses are 24 times more efficient in creating new products and technologies. Yet only a paltry 3.4 percent of the federal government's contracts for research and development go to small companies. All told, they manage to get only about 20 percent of government contracts.

Small can be beautiful. But if America's small businesses aren't given a chance to survive, future generations may never be able to see just how beautiful they were.●

COMMEMORATION OF DANISH CONSTITUTION DAY, JUNE 5

HON. JAMES L. NELLIGAN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. NELLIGAN. Mr. Speaker, I rise to commemorate one of the most important days in Danish political history, Constitution Day, which is celebrated each year on June 5.

For those who may not be familiar with Danish history, let me briefly recount what Constitution Day means to the Danish people. Until 1849, the Danish monarchy was autocratic in form. On June 5, 1849, the national assembly ratified the first national constitution which incorporated the principles of separation of powers, and representative government. The powers of the monarch were greatly reduced. Whereas previously all power had emanated from the King or Queen, under the June Constitution, all power rested in the Danish people.

June 5 has subsequently become an important symbolic date in Denmark. On June 5, 1915, the Constitution was amended to allow women and servants to vote, and to lower the voting age in Denmark to 25. Further constitutional amendments on June 5, 1953, extended the authority of the democratically elected Parliament.

In short, June 5 has come to symbolize the extension of democratic principles in Denmark. I salute the Danes, and their descendants in Pennsylvania's 11th District and across our Nation, on this, their national holiday.●

HANDGUN LEGISLATION

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. EDWARDS of California. Mr. Speaker, on May 29, 1981, the Washington Post published an editorial that advocated a movement toward compromise on the divisive issue of handgun legislation. It followed a statement by Mr. RODINO in the May 21, 1981, CONGRESSIONAL RECORD that expressed similar sentiments, and the editorial quoted quite extensively from that statement. The editorial "High Noon vs. Middle Ground," follows:

HIGH NOON VS. MIDDLE GROUND

Maybe—just maybe—reason and accommodation could creep into the debate over what, if anything, this country should do about the gunning down of its citizens. If legitimate gun owners could believe that this effort is not the start of total disarmament of every household in America, and if the larger number of people who support stronger legislative protections against handgun abuses could acknowledge the concerns of sportsmen, hunters and gun collectors, there is room for some reason—and for a moderate legislative attempt to curb criminal handgun violence.

Such movement toward compromise is not likely to begin with any of the groups whose high-noon showdowns tend to send politically jittery members of Congress ducking under the window sills and tables. But just in the last few days, some serious rethinking about the issue, and about possible compromise measures, has been coming from interesting corners. Bob Hope, longtime friend of President Reagan and hardly a gun control zealot, says the shooting of Mr. Reagan points up the desirability of some firearms registration that might assist in tracing weapons used in such shootings. Columnist James Kilpatrick also has suggested that some compromise legislation could be shaped and enacted this year.

Last week in the House, Rep. Peter W. Rodino Jr. (D-N.J.) also made a significant plea for a reasoned approach to make Americans safer on their streets and in their homes. Citing a moderate measure that he and 50 co-sponsors have introduced, Mr. Rodino noted that it would cost little in dollars "and nothing in terms of liberties." The legislation he seeks, like a companion bill introduced in the Senate by Edward M. Kennedy (D-Mass.), would not outlaw handguns; it would not even require registration or licensing; and it would not disarm citizens who "believe they have a right and a necessity to have a handgun for protection."

What the bill would do is "tell handgun owners that, if they commit a crime with a handgun, they will lose their freedom. And it would make it more difficult and expensive for a criminal to get a handgun." The bill would 1) provide mandatory minimum sentences for anyone using or carrying a gun in the commission of a felony; 2) totally ban Saturday night specials, those cheap, concealable guns that no serious hunters or collectors care for, and that account for about 10 percent of the 2 million handguns assembled in the United States each year; 3) require a 21-day waiting period before the purchase of any other kind of handgun; and 4) ban the sale of handguns by pawnbrokers, control multiple purchases and require better record-keeping of sales, thefts and losses.

Don't these steps make sense? As Mr. Rodino says, "I do not believe that sportsmen, hunters and gun collectors are unyielding foes of handgun legislation. They are good and reasonable citizens. I understand the culture and heritage that make their guns their most prized possessions. I would join in opposing any effort to separate them from their guns. But can any of us oppose a law that would make it harder for the criminal, the sick, the would-be assassin to get a handgun?"●

MARINE MAMMAL PROTECTION ACT AUTHORIZATION

HON. EDWIN B. FORSYTHE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. FORSYTHE. Mr. Speaker, on May 13, 1981, the Committee on Merchant Marine and Fisheries ordered reported H.R. 2948 which extended the authorization for the Marine Mammal Protection Act for 1 year. Although the hearing record of April 7 established that there are several problems involving the implementation of the act which may necessitate substantive amendments, the existing authorization expires on September 31, 1981, and under the House rules, it is necessary to report all fiscal year 1982 authorization bills by May 15, 1981. Consequently, the committee did not have the time necessary to bring all the interested parties together to reach agreement as to what amendments to the act are necessary and appropriate.

Two of the many issues which need to be addressed concern tuna/porpoise conflicts and the cumbersome procedures by which marine mammal management is transferred to the States. As a result of informal meetings between the interested parties, a great deal of progress has been made on tuna-porpoise issues, but there is still nothing concrete. Unfortunately, less progress has been made on the issues involving the return of managment to the several interested States. This problem area needs resolution because of situations like that in Alaska where management of such species as walrus and polar bears is virtually ignored since neither the Federal Government nor the State is managing marine mammals. The additional pressure of a 1-year authorization should help to bring about an agreement between the parties which can be formalized through amendments to the act. When legislative language is agreed to, then would be the time to seek a longer authorization.

Erroneously, some individuals have contended that anyone who supports a 1-year versus a 3-year authorization of the Marine Mammal Protection Act is indicating their support for doing away with all protection for marine mammals. This is simply not true. I have been a longtime supporter of the Marine Mammal Protection Act and any measures which will insure healthy marine mammal populations. However, if the act designed to protect these populations cannot be implemented as Congress intended, then it is time to hold hearings to address these problems in a responsible manner and to attain agreement from all concerned parties.

I am committed to the continuation of the Marine Mammal Protection Act but believe that we should investigate proposals which may make the act a more effective means of conserving marine mammals.●

THANKSGIVING FOR THE PROVIDENCE OF GOD

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. YATRON. Mr. Speaker, I rise today to pay tribute to Msgr. John E. Boyle, who on Sunday, May 31, celebrated his 50th anniversary in the priesthood.

It is indeed fitting that Monsignor Boyle's achievements should be noted and honored in the U.S. Congress. I wish to echo the sentiments of all those from St. Patrick's Church in Pottsville, Pa., who joined together to pay tribute to this outstanding clergyman. I know that all my colleagues will join me in wishing Monsignor Boyle the very best success in the future. The Sixth District of Pennsylvania is indeed most fortunate to count Monsignor Boyle as one of its most distinguished spiritual leaders.

I offer the following article which appeared in the Pottsville Republican on May 30, 1981, for my colleagues' attention on the many achievements of Monsignor Boyle:

THANKSGIVING FOR THE PROVIDENCE OF GOD AS MONSIGNOR BOYLE MARKS "FASTER THAN FAST" 50 YEARS SERVING CHURCH

(By Stephanie Waite)

"Dominus Providebit," or, "The Lord Will Provide," is more than the theme of this weekend's jubilee at St. Patrick Church, celebrating Monsignor John E. Boyle's 50th year in the priesthood.

The motto also has a special meaning for Monsignor Boyle on his anniversary. "The Lord has done a beautiful job providing for me in these 50 years," he says. "The theme is thanksgiving for 50 years of the providence of God."

The 50 years have sped by "faster than fast," Monsignor Boyle says. "I can't believe it's actually happening."

Before coming pastor of St. Patrick, Monsignor Boyle worked in various positions within the church. He was an assistant pastor at St. Mary Parish, Saint Clair, and St. Margaret Parish, Narberth, and taught at the Roman Catholic High School, Philadephia, for four years.

From 1939-53, Monsignor Boyle served as archdiocesan director of the Society for the Propagation of the Faith, in Philadelphia. There, he raised funds for mission work traveling to different parishes to talk about missions.

In March 1953, he became pastor of St. Patrick. Of all his years in the priesthood, Monsignor Boyle says, "those 28 years (as pastor of St. Patrick) have been the reward."

He says he has been especially gratified by the cooperation he has received from people in the parish and in the community. "The cooperation we have had is physically evident here in Pottsville," he said, citing the renovation and remodeling of St. Patrick and the construction of Nativity BVM High School, both of which took place under his direction.

"The ecumenical spirit in the community as beautifully demonstrated when we had permission to use the former Presbyterian Church on Fifth Street while our church was being renovated," he says. The triple Gothic chair now at St. Patrick was donated by the Presbyterian Church. "I would pay very special tribute to the Rev. Elmer Davis, who encouraged the trustees of his church to give the chair to us."

He proudly remarks that his parish is the mother parish of Schuylkill and Carbon counties and ranks third, in order of foundation, among the Allentown Diocese churches. Founded in 1827, St. Patrick is preceded in that respect only by St. Peter's Church in Reading and Blessed Sacrament Church in Bally.

In his 28 years at St. Patrick, the biggest change Monsignor Boyle has seen is a decrease in the number of parishioners. "When I came in 1953, there were 1,800 families in our parish; now there are 1,625."

"It's been particularly noticeable in the past few years." He cites the death of older people and departure of young people to other areas of the country as reasons for the decline.

"The young people are sentimental, they come back to be married, but other than that they don't stay," he says.

In the Catholic Church as a whole, probably the biggest changes Monsignor Boyle has seen during his 50-year tenure were those wrought by the Second Vatican Council.

"This did not come easy, but it has been accepted," he says. "Even older people very set in their traditions have bowed to the will of the church. It's a tribute to the older people that they were obedient despite their traditions."

Among the changes were that Mass was no longer said in Latin, methods of administering rites were updated, and participation by the congregation in Mass was increased.

Looking at his church from before Vatican II to now, Monsignor Boyle says, "It doesn't seem like the same place."

Along with all the rewards of his 50 years, there have been "momentary disappointments," he says, "but they always seemed to be surmountable. You look at things and say, 'this is the way the Lord wants it, and I'm sure he'll bring the best out of it. We're doing the work of the Lord and have to work through him.'"

Looking towards the future, Monsignor Boyle says again that the Lord has provided for him. "The Lord has given me excellent health and I will go on as long as the bishop allows."

He adds, "I see a great future for the church (as a whole). We've reached what people might call a low ebb, but it's on its way back now, demonstrated by the return to faith by young people."

All in all, his 50 years in the priesthood "have given me a great deal of pleasure," Monsignor Boyle said. "I would be delighted to do it over again."●

WATER MANAGEMENT MEANS BETTER PROFITS

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. MILLER of California. Mr. Speaker, I have introduced H.R. 2606, the Water Pricing Reform Act, which would increase the efficient use of Federal water resources by eliminating archaic price subsidies. Past studies have found that pricing based on the actual cost of delivery encourage conservation and more efficient water usage, while dramatically cutting billions of dollars in subsidies which are paid by taxpayers, utility users, and municipal and industrial water customers.

I want to bring to the attention of the House another study which concludes that the improved management which would result from water pricing reform would also produce higher profits for irrigators. This study, by Department of Agriculture economists Harry Ayer and Paul Hoyt, concluded that substantial amounts of water could be saved through better management, and that less water and a lower yield often means a higher profit.

The conclusions of this study should be of great interest to all members concerned about the adequacy of our water supplies, the future of agriculture, and the enormous and indefensible public subsidy enjoyed by a small number of irrigators at the expense of millions of taxpayers.

The article follows:

[From the Irrigation Age, March 1981]

WATER MANAGEMENT LEADS TO LARGER PROFITS

Many farmers in water-short areas may be able to make more money by pumping less water onto their crops.

The reason, said USDA economists Harry Ayer and Paul Hoyt, is that they're draining away potential profits along with groundwater supplies when they irrigate their crops to get the highest possible yield.

According to the researchers, less water and a lower yield often mean a higher profit. After a certain amount of water is applied to any crop, a point is reached where any additional water results in an increasingly smaller improvement in yield per acre. That's the law of diminishing returns.

To maximize profits, a producer should apply water only until the costs associated with adding the last increment of water match the value of the extra yield gained through the added water application. Any irrigation beyond that level starts cutting into profits, even though it may result in a further improvement in yield.

Of course, the amount of irrigation offering maximum profits varies for different crops, soil types, climates, lift depths and prices of water, energy and crops.

The traditional practice of applying enough water to ensure maximum plant growth and yield developed when the farm price of water was very low. Under those circumstances, profits were at or near their maximum when yields were at their highest.

The custom has been encouraged by both private and public irrigation management services. However, the rapid rise in energy prices in recent years and evidence that certain groundwater aquifers are being depleted are changing the basic economics of water management in parts of the West.

Arizona, where the economists conducted much of their research, illustrates the possibility of cutting water use per acre while increasing farm profits. Like several of its neighbors, the state is using groundwater much faster than the water tables are being replenished.

Agriculture consumes more than 85% of the total water used in Arizona, but growing competition from industrial and residential use is putting increasing pressure on water supplies.

About half of the state's cropland is irrigated with groundwater, and nearly 60% of this acreage is pump irrigated from depths of 300 feet or more. As energy rates rise, the water is becoming more and more expensive to pump.

Irrigation costs typically account for almost a third of all farm operating expenses in pump areas. Annual electricity bills runs $25,000 or more for medium size (500-acre) farms in many parts of the state.

In their study of several counties, Ayer and Hoyt found that at relatively low water prices of about 50 cents per acre inch (a typical cost for surface water), there was virtually no difference between the profit and yield maximizing levels of irrigation for Arizona cotton, wheat or sorghum. Much of Arizona farmland is irrigated with inexpensive surface water.

However, at water prices of $2.50 per acre inch (the estimated cost for water pumped from Arizona depths), the maximum profit for all three crops at 1979 crop prices was reached with at least 4 fewer acre inches of water than the maximum yield level. Profits were also improved—many cotton farmers, for example, could have reaped an additional $5 per acre.

At high water prices of $5 per acre inch (for water pumped from a 600-foot depth), water savings were 8 or more acre inches. Profits were higher, too. In general, the researchers concluded that wherever water prices were medium to high, water applications could frequently be cut 6 acre inches (one normal irrigation) or more on cotton, wheat and sorghum grown in a variety of soils under a wide range of crop prices.

The result: More than 144,000 acre feet of water a year could be saved in Arizona by reducing applications on the three crops to the maximum profit—rather than maximum yield—level. This represents only about 3% of total farm use of water in the state and it probably wouldn't be enough to avoid other conservation measures, but it's still a large amount relative to urban needs.

For example, that much water could satisfy all the municipal-industrial needs of Tucson—a city of nearly a half million—for about two years. At the same time, the 144,000 acre feet of water savings could add about 1 to 2% to producers' profits, even after accounting for about a 2% drop in crop yields.

The profit-maximizing approach to irrigation applies not only to Arizona, but also to other areas where farmers are drawing water from sources with high pump lifts (200 feet or more), where sprinkler systems rather than gravity flow systems are used to deliver water to the fields, or anywhere else where water costs are a major part of farm expenses. This includes parts of California, Texas, New Mexico, Idaho, Washington, Nevada, Colorado, Nebraska, Oklahoma and Kansas.

While the profit-maximizing approach alone can't meet all the needs for conservation, it has one big advantage: no major investment. Although greater management time and skill are necessary to adopt more efficient irrigation scheduling, it's one approach that doesn't require capital outlays—unlike lining irrigation canals or buying a more efficient irrigation system. So, why isn't this low-cost, profit-boosting approach to irrigation in wide use?

Along with resistance to change, a major reason is the risk associated with reducing water applications because so little is known about how crop yields respond when water is withheld at different stages of plant development in different areas. Ayer and Hoyt said.

Sometimes, farmers intentionally overirrigate in order to keep ahead of the plants' water requirements. This provides a margin of safety in case of an irrigation system breakdown or in case severe weather causes the crop to need more water than can be quickly provided. However, even with these risks, many farmers might be able to take advantage of the opportunity to both increase profits and conserve water if more information were available.

Most agronomic research has concentrated on the amount of water needed to obtain the highest yield. Ayer and Hoyt argue that the perspective should change from one of engineering efficiency where output is maximized to one of economic efficiency where profit is the priority.

They recommend that future experiments focus on how crop yields respond to stress so that public and private irrigation management specialists can advise producers on the levels and scheduling of irrigation that will provide the most profit.●

PERSONAL EXPLANATION

HON. W. HENSON MOORE

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. MOORE. Mr. Speaker, I was unavoidably absent earlier today when the gentleman from Massachusetts (Mr. CONTE) offered a motion to the conference report to accompany H.R. 3512 making supplemental appropriations for the current fiscal year. His motion would impose regular reduction in force standards upon the National Oceanic and Atmospheric Administration. At the time of this vote on rollcall No. 61 I had been called to the White House to confer with the President on the direction of ongoing tax cut actions within the House Committee on Ways and Means on which I serve. Had I been present for the vote on the gentleman's motion, I would have voted for it.●

THE U.S. ARMY RESERVE

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. SKELTON. Mr. Speaker, it is virtually impossible for this country to maintain a strong defense posture without a firm commitment to the precepts of the total force concept. This is particularly true in the case of the Army because, as you know, our total force concept places a very heavy reliance on the wholesale integration of combat and support elements of the U.S. Army Reserve into the Active Army. In fact, in a wartime environment, did you know that the U.S. Army Reserve would provide 24 percent of all combat engineer battalions; 33 percent of all special forces units, 44 percent of all medical units; 68 percent of all light equipment maintenance companies; 100 percent of all training divisions and brigades; and 54 percent of all conventional ammunition companies?

I have not listed all the contributions that the Army Reserve would make to our war fighting effort; however, the examples convincingly demonstrate how much the American people are dependent on the Army Reserve as both a strong and visible component of our peacetime defense force and as a powerful and responsive element of our wartime defense machinery.

Today the U.S. Army Reserve consists of over 400,000 troops, with over 200,000 being provided by the Selected Reserve, and approximately 200,000 provided by the Individual Ready Reserve (IRR). The Selected Reserve component consists of troop units such as infantry battalions, tank battalions, engineer bridge companies, artillery battalions, transportation battalions, maintenance battalions, and others. The IRR represents a pool of pretrained military manpower which could be utilized to fill out Active and Reserve units and as replacements for battlefield casualties.

In my judgment, reservists represent a clear reflection of the spirit and patriotism which are part of this great country's heritage. These young men and women are both citizens and soldiers, and they are frequently required to make personal sacrifices in order to support the difficult missions they have been assigned. In the words of Winston Churchill, the reservist is truly "twice the citizen."

In assessing the readiness of our U.S. Army Reserve, there are two pressing problems. The first of which is a critical shortage of about 250,000 personnel in the IRR. This shortage means that the required troops would not be available 90 days into a major conflict, and this fact calls into question the sustainability of our forces. In order to assist with this problem, last year the Congress authorized a $600 reenlistment bonus for the IRR, and the fiscal year 1982 defense authorization bill would extend this authority until 1985.

An almost equally pressing problem, however, is the lack of sufficient and modern equipment. In the U.S. Army Reserve, only about 37 percent of the wartime dollar value of equipment is on hand, and much of the equipment on hand is deteriorating or obsolete. A recent study concluded that most units could maintain acceptable levels of training with 70 percent of their authorized equipment; however, 37 percent is clearly inadequate. Readiness has suffered and will continue to suffer, as long as insufficient equipment is provided to Selected Reserve units for the purpose of training. In order to modernize the force in fiscal year 1981, the Congress authorized $25 million and this year the House Armed Services Committee is recommending authorizing additional funds to continue this much needed modernization program.

I strongly urge that the Congress support those Army Reserve requirements which are reflected in the fiscal year 1982 defense authorization bill; and I ask my colleagues to join me in supporting this important piece of legislation. Again, it has been an honor.●

PERSONAL EXPLANATION

HON. BILL NELSON

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. NELSON. Mr. Speaker, I was absent on June 2 due to official business in my district and was not recorded on rollcalls 54 through 60. Had I been present I would have voted "yes" on each of these seven recorded votes.●

DEAF SEEK BETTER TV PROGRAMS

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. BARNES. Mr. Speaker, one of the most frustrating problems facing the deaf community in the United States today is a lack of access to television programing, despite recent advances which make TV more easily accessible to deaf viewers. During the recent coverage of the shooting of the President, for example, and in time of other major news events, the deaf are excluded from this vital form of communication.

Mr. Speaker, I include in the RECORD a recent Washington Star article by Boris Weintraub which provides insight into the problems facing the deaf population in their use of television.

[From the Washington Star, Apr. 4, 1981]

DEAF BATTLE TO "HEAR" TV, TOO

(By Boris Weintraub)

A few weeks ago, one of the highlights of the CBS prime-time television schedule was a recent movie called "Voices," which centered around the love story of a young deaf woman.

There was one problem with the film as it was shown on television: because the film was neither subtitled not "signed," its dialogue was unintelligible to deaf viewers.

When President Reagan was shot outside the Washington Hilton Hotel, deaf students at Gallaudet College gathered around their television sets in the same way as millions of hearing Americans did. But, until the college's TV studio was able to superimpose an inset of an interpreter signing the dispatches of TV reporters, the students were unable to understand what was going on.

Spokesmen for the deaf point to things like that as examples of their difficulties with TV. Since the medium has so much influence on modern American life, they say, they want a part in it. But, despite some exceptions and despite some technological innovations that can make TV more easily accessible to the deaf, the hearing-impaired population is largely excluded from using television.

But some of the deaf are speaking out, expressing their frustration with their inability to follow television as does the rest of American society. For their part, local TV stations point to the programming they do carry, either signed or captioned, and say that expansion of such programming is too expensive and unwarranted by the size of the deaf population.

"This is a point of real frustration," says Dr. Edward C. Merrill Jr., president of Gallaudet. "The deaf are told, on the one hand, that they should become part of the mainstream. But yet, they are denied access to

television, which would help put them there."

It is because of such attitudes that representatives of a number of organizations serving the deaf formed a new committee last month to work for better TV service for the hearing-impaired. The committee, called the Working Committee on TV Services, has become an official section of the National Association of the Deaf, said to be the nation's largest organization representing the deaf.

David Rosenbaum, a deaf television consultant at Gallaudet and one of the prime movers behind the new committee, has been politely battling with local stations for the last several months, attempting to get them to expand and improve their services to deaf viewers.

According to Rosenbaum, who conducted a nationwide survey, 22 stations in all parts of the nation offered some form of signed programming as of two months ago. But, he says, the situation changes rapidly; already, two of those stations have dropped their deaf-oriented programs.

Rosenbaum began his campaign last fall. At that time, WDVM-9 dropped its five-minute, early-morning "News Sign" program, eliminating a newscast in which Cynthia Saltzman, using the full screen, signed the news while an off-camera announcer read the same items for hearing viewers.

Meanwhile, WTTG-5, which previously included a five-minute midday "total communications news" segment on which deaf newsman Tim Medina spoke and signed the news simultaneously with the aid of slides and yellow captions, dropped that show. In its place, the station substituted a more typical newscast, placing Medina in an inset in the corner of the picture, which Rosenbaum contends is harder for deaf viewers to comprehend.

Rosenbaum and other deaf spokesmen complain that the new WTTG format is much more difficult for deaf viewers to follow, and that WDVM is not properly serving the deaf community now that it has canceled "News Sign."

Betty Endicott, news director at WDVM, says that her station now captions the last five minutes of its midday news, and also provides captions during a brief news update just before 10 a.m. She said that the station was providing its service for the deaf at a more convenient time than the earlier show, and that it had discussed its captioning efforts with representatives of the deaf community.

Rosenbaum and other deaf persons say that captioning is not as useful to the deaf as full signing because it uses conventional reading English, which, to the deaf, is a second language. Generally, they say, captions are written in a simple language that does not contain the complexities of signing. Endicott agrees that WDVM's captions are in simple language, and that this is because of the guidance from deaf consultants.

A WTTG spokesman points to the continuation of Medina's signing as an example of a "valuable service" his station was providing "We've gotten many expressions of gratitude," he says, but adds that the station has no plans to expand its services to its hour-long 10 p.m. news show.

Rosenbaum says that many of the programs that are designed to serve the deaf come at inconvenient hours. He notes that the captioned ABC Evening News, which appears on public TV stations, is shown at 11:30 p.m.

A spokesman for WRC-4, asked to provide examples of programs accessible to non-hearing viewers, came up with a list of several public affairs shows, almost all of which were scheduled to be shown at either 6 or 6:30 a.m. on Sundays. One exception is a program about health information, including information for the deaf, which is to be seen at 8:30 a.m. today.

Some special programs are made accessible to the deaf. Endicott says that WDVM provided a signed inset during Mayor Marion Barry's major address on the District's financial problems last year, for example.

The other Major commercial station in Washington, WJLA-7, carries no programs which are made available for deaf viewers. A spokesman quotes a station official as saying that TV is a medium designed for the mass audience, and that the time and cost needed to make programming accessible for this specialized audience is "prohibitive" for a local station.

Ironically, the complaints come at a time when technology, in the form of so-called closed captioning, has made it possible for more programs than ever to be enjoyed by the deaf—provided that the deaf viewer has the necessary equipment.

Closed captioning utilizes a normally unseen portion of the TV screen that viewers can see if they have a decoder marketed by Sears Roebuck and Co. The decoder sells for $250 separately, $100 when purchased as part of a TV set, and has been available for the last year. An estimated 32,000 decoders had been sold as of the beginning of 1981, a figure deaf spokesmen call disappointing.

Since the decoders sent on the market, the Northern Virginia-based National Captioning Institute has provided captions for 25 hours a week of programming shown on ABC, NBC and the Public Broadcasting Service. CBS programming is not captioned because that network believes that imminent technological breakthroughs in the delivery of textual information—teletext—will make the decoders obsolete.

Rosenbaum and others complain that CBS, which is developing its own teletext system, is waging a campaign against closed captioning. They wish that the network would, at the very least, stop fighting a technology which already is developed and valuable, following what Donna Chitwood, a Gallaudet College spokesman, calls "the bird-in-the-hand principle."

Other captioned programs have been provided for the last several years by the Captioning Center at public TV station WGBH in Boston, which has done the open captioning—visible on all sets—for the ABC Evening News and now is conducting closed-captioning experiments with a new public TV tennis instructional series hosted by Vic Braden.

But none of the captioning experiments has any bearing on news programs because captioning must be done well in advance of the broadcast. Nor do they have any bearing on the insensitivity involved on the part of television programmers who don't often take the needs of the deaf into account.

To those who don't understand the frustrations of deaf viewers, a TV technician at Gallaudet offers this two-pronged suggestion:

Turn down the sound on your television set.

Now try to follow what's going on.●

A TRIBUTE TO VERNE L. DAVIS

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. COELHO. Mr. Speaker, at this time, it gives me much pleasure to honor Mr. Verne L. Davis. Verne has served Merced County for 20 years and is being honored at a luncheon given by the Merced County Engineers.

In 1968 the Merced County Board of Supervisors created the Department of Public Works. Since its creation the Department has increased the efficiency and service to the people of Merced County tremendously. These accomplishments are a direct result of the leadership and guidance Verne has given as director of the department, a position he has held since its creation.

Verne has lived in California for over 50 years. He served in the Army in Alaska during World War II. Following the war he settled in Merced. He has worked his way up through many levels of service to the county. Employed first as a truckdriver, he moved to construction then to engineering where he was promoted rapidly to the position of road commissioner. This position he held until his selection as director of public works in 1968.

It is indeed a great pleasure to recognize my good friend and constituent, Verne Davis, for the outstanding leadership and service that he has given to the people of Merced County for the last 20 years.●

FATHER ROBERT J. CREGAN, S.J., A SUPER MAN, A SUPER JESUIT

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. KEMP. Mr. Speaker, I would like to call your attention to a piece written about a man whose love of God and dedication to helping young people have been an inspiration not only to the people of western New York, but to all those who meet this man.

For the past 7 years the reins of leadership at Canisius High School in Buffalo have been in the hands of Father Robert J. Cregan, S.J., as the rector-president of the school. During this time, through Father's many efforts and tireless work the school has had a renaissance of alumni involvement, a large growth in financial contributions, and a rise in student enrollment. Today, because of this rebirth and growth, Canisius is operating in

the black, and promising to continue providing western New Yorkers the opportunity to have their sons educated in the Jesuit tradition. In the 108-year history of Canisius High School, the role of rector-president has been filled by many outstanding men. Father Cregan would be the first to admit that following in the footsteps of past administrators like the late Father Vincent P. Mooney and others was quite an assignment. Yet, Father Cregan has done a spectacular job. Now, as he prepares to turn the reins of the rector-president over to his successor and move on to his new assignment, Father Cregan can be proud that, because of his work and leadership, the tradition of a Jesuit education at Canisius High School will be carried on in western New York.

It is indeed a fitting tribute to Father Cregan that the Canisius High School of today and tomorrow will serve as a living testament to the great gift of himself that Father has given to all of those who are a part of the Canisius family.

I therefore commend this article of May 10, 1981, to your attention.

[From the Buffalo News, May 10, 1981]

THE MAN BEHIND THE TURNAROUND AT CANISIUS HIGH

(By Dave Ernst)

With its muscular gray stone work and 100 years of venerable tradition, Canisius High School a decade ago looked indestructible. Inside, though, many wondered if one of the area's oldest Catholic high schools could survive even another year, to say nothing of another 100. Disillusionment drove a few to question if the school was even worth trying to save.

Faculty morale was deteriorating as fast as the physical plant. Deficits became a yearly feature of the school's financial report. Attempts to modernize school policies had alumni shaking their heads in exasperation. Enrollment plummeted from 926 in 1967 to 681 just seven years later.

It was hardly the most congenial situation for the new rector-president to step into.

First impressions of the Rev. Robert J. Cregan, SJ, were of an ascetic-looking man, quiet—almost shy. He had never headed his own school before, and he didn't seem the type who would invigorate a student body, galvanize the faculty and wring big bucks from skeptical alumni through sheer force of personality.

But the new man had a way about him. He kept a neatly lettered note on his desk listing the birth dates of all of faculty and staff, a reminder to send cards. The death or illness of a member of the Canisius family always brought a visit from him. Relatives couldn't remember anything in particular he said, just that his appearance and manner were a powerful consolation.

The students, coaches and players began to notice him, wearing his black beret, at practically every athletic event. The teachers became used to the doughnuts he brought to the faculty room each Monday morning. The door to his imposing, wood-paneled office was literally and figuratively kept always open to them. Whenever it came time for a teacher to sign a new contract, Father Cregan invited him in for a talk.

This Father Cregan had more than a pleasing style, though. He had ideas and a firm belief that while the lilies of the field might flourish unattended under the gaze of a protective God, institutions like Canisius needed substantial nurturing from men.

Under his leadership, Gambit, the annual dinner and auction, became a mainstay of the fund-raising effort. Father-son work parties tackled Saturday maintenance projects. The alumni became more active. The student recruitment effort was reorganized, and a student walkathon began to produce a dependable $25,000 annual addition to the school's income.

At the same time, external factors that had contributed to Canisius' plight a few years earlier were also changing. The social ferment that seemed to unsettle every institution faded. Some of the initiatives of Father Cregan's predecessors bore fruit. And the trend-setters in education decreed that rigorous disciplinary, academic and moral training were now in style.

Nonetheless, it's Father Cregan who's usually mentioned when friends of Canisius marvel at the school's turnaround in recent years. Father Cregan will leave Canisius next month after seven years as rector-president, one year longer than the usual term. The nearly unanimous judgment on his stewardship is that he is leaving the school immensely stronger than it was when he arrived.

Father Cregan had a good idea of what he was getting into when the Canisius trustees voted to bring him to Buffalo in 1974. He had been coordinator—a superintendent of sorts—of the eight Jesuit high schools in the New York Province for two years. He had a clear vision of what he wanted to do at Canisius. "I felt I had a talent for bringing people together, for making them feel appreciated and understood," he says.

"I saw the school as having suffered a lot from the tensions and alienations of the Vietnam War period. Financial problems were very much on people's minds. People were constantly wondering, 'Am I going to have a job?' or 'Do we want to send our kids here?'

"I wanted to create a sense of shared responsibility—that if everyone does his part, we could succeed. I wanted to be around, listen, be open—and if not solve people's problems, at least be sympathetic. I think a lot of these things have worked. By getting a financial foothold, a lot of tensions have been eased. A lot was demanded of the faculty, but they've helped out quite willingly. And I think that's good for the students to see."

And, after all, it's what the students see practiced, more than the theology texts they study or the sermons they hear, that will mold character. No one involved in Catholic education can afford to lose sight of that, Father Cregan believes. Education researchers have toiled mightily in recent years to reaffirm the obvious—that the climate and tone of a school are set by the leader. And it seems no one has a bad word to say about Canisius' leadership over the past seven years.

Students and colleagues sometimes grope for words of describe Father Cregan. A private person, he's like a finely polished steel ball, perfectly symmetrical, without the idiosyncrasies, rough edges or quirks of personality biographers depend on to "humanize" their subjects. He's of medium height and build with a gentle voice and a mild manner. His only distinguishing physical features are a high forehead and black, bushy eyebrows that contrast with his thinning white hair. Written testimonials gathered from the Canisius community by his secretary tend to read like excerpts from "Lives of the Saints." But while cynics may persist in believing they'll uncover a major personal flaw in anyone if only they look a little harder, Father Cregan's admirers are satisfied they've seen enough. One veteran teacher comments, "I don't know of any miracles he's performed, but I think he's as saintly as any Jesuit I've seen, and I've seen a lot of them."

A student's judgment is somewhat more mundane, but just as telling. "Come to think of it," he muses, "I guess Father Cregan's the only priest here we don't even have a nickname for."

Descriptions like "saintly" make Father Cregan understandably uncomfortable.

"I really don't see that as appropriate at all," he says. "If people like what you've done, they tend to overlook your failings. I have a short temper, for instance. I tend to blow up when things go wrong." But he admits he is very conscious of the image and example he and the other faculty members set for students. It was the example of one of Father Cregan's own teachers at the Jesuit high school he attended in his native New Jersey that made him decide to join the order.

"His name was York, and he taught us Latin and Greek. He was very funny, dynamic and loud—I'm certainly a different kind of person—but he dedicated himself to young people, and I wanted to be like him." After fifteen years of study and training, Father Cregan was ordained in 1967. He earned a master's degree in English at New York University to go along with his master's in divinity and then began teaching at Xavier High School in New York in 1969.

"I was drawn to work with high school-aged kids because of the experience I'd had," Father Cregan says. "And I think religious education is most important in the high-school years. There's a great deal of physical, mental and emotional growth going on. I think it's important then to have values against which kids can measure themselves. We can teach values, but it's the example we give that they remember.

"The big need boys have is to know they're respected, loved and cared for. When they lack respect and self confidence, that's when they get in trouble. But you can't just say it. You have to show it. I believe the way to keep people in the faith is through education. But you can't ram religion down people's throats. Here we try to create a situation in which kids see the faith in the best possible light, but the choice is their own."

Those were the goals Father Cregan brought to his new job, but necessity dictated that he give first priority to restoring Canisius to a sound financial position. Father Cregan believes closing Canisius was never seriously considered by the leadership of the Jesuit province. But the school's cumulative debt had topped a half-million dollars in 1974, and the spate of rumors about the school's future were debilitating by themselves.

He was inexperienced as a fund-raiser and somewhat ill-at-ease initially, friends recall. He would never be a glib salesman. But he came across as something better: a sincere and compelling apostle for the school and its mission, and a down-to-earth administrator who knew a school can't exist on novenas and old traditions.

Gambits I-VII have raised $450,000. Project '80s is well on its way to achieving its goal of $2.1 million. The tuition-aid fund for needy students was increased from $85,000 last year to $108,000 this year. In the school's own version of "workfare," each recipient now works on school maintenance or other projects one hour for every $10 of aid.

Faculty salaries have risen to the point where they now compare well with those of all but a few of the public and private schools in the area. Despite an operating budget that has swelled from $800,000 to $1.4 million in just six years, the school is consistently ending up in the black.

"Fund-raising was not my preference in work," Father Cregan says. "But believing as I do in the good things the school does, I don't feel ashamed or guilty asking for money. Besides, I've had a lot of support. Father [Ronald] Sams, the development director, does all the legwork.

"He comes across as a very good priest who is doing this because it is God's work. You have to show you're working for youth as a whole. The risk is when a priest identified with an institution loses sight of the dimension of his priesthood and becomes just an administrator. That, I think, is what turns people off."

So Father Cregan watches to ensure the daily demands of running a school don't rob him of all time for visiting the sick, consoling families of the dead and involving himself in improving the spiritual life of the student body.

To make sure he doesn't lose contact with the classroom, where the real action is in a school, he teaches a senior English class. He is a meticulous instructor, translating with the trace of a Jersey accent each word of "Macbeth" into teenage-ese. "'Hie thee hither,' we would say, 'Get yourself over here,' or other more vulgar terms." And of Lady Macbeth and her husband, he says, "She has guts. He doesn't. She's saying, 'Come to me, baby, and I'll give you all the strength you need.'" At the end of every other phrase, he murmurs an unconscious "All right?" or "OK?"

Back in his office after class, he sinks into his chair and rummages through a surprising amount of desk-top clutter for pipe and matches. Piles of reports and files are flanked by small framed pictures of a Jesuit friend assigned to a mission in India and another Jesuit faculty member who recently died. Every knickknack and memento he has ever received seems to be displayed. Among the volumes in his bookshelf are "Designs for Fund Raising," "Father Culligan—Selfless Shepherd" and de Chardin's "Phenomenon of Man." He likes to read the Elizabethan and Romantic poets, especially John Donne, Keats and Wordsworth, as well as Dylan Thomas. He judges his own attempts at poetry "too stiff," though. He finds time for occasional dinners with friends, a walking tour of Toronto or a summer camping trip.

In his desk drawer are the beginnings of a short story. In eight years, he has churned out five pages. Hardly an Isaac Asimov. "There's a lot of problems with a job like this. I just don't find the time to do things I like to do," he says. "I wish we could have improved the school's financial position more than we did. I also think there's more to be done in promoting the spiritual growth of the students, in making them more aware of Christian social values."

At least in his new assignment studying at the Jesuit School of Theology in Cambridge, Massachusetts, the demands on his time won't come from so many different directions. But he takes satisfaction in the results he sees from thousands of hours of raising money, recruiting students, counseling, pleading, explaining and listening. At a time when school enrollments generally are plunging, the Canisius freshman class—226 students—and the overall enrollment—713 students—are the largest in ten years.

"Catholic education is wanted and appreciated strongly in this area," Father Cregan says. "We try to hold up a torch that gives a light to people, shows them there's more to life than making money. So long as we do the job we claim we do and practice sound financial management, I think there is a real future for Catholic schools."●

INTERNATIONAL TERRORISM

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. PHILIP M. CRANE. Mr. Speaker, the subject of international terrorism is as much a tragic reality as it is a recent object of growing concern both here and abroad. The Reagan administration has taken some positive steps to identify and combat the source of this worldwide scourge. In this regard, I would like to share with you some informative reflections on this subject which were brought to my attention by our former colleague from Michigan, Jack McDonald.

It is interesting to note the links between the Soviet Union and various terrorist organizations around the world. The Armenian terrorist organizations have claimed responsibility for the murder of 17 Turkish diplomats. They have also claimed responsibility for various bombings in Europe. They have now spread their activities to the United States. On October 12, bombs were exploded at the Turkish diplomatic missions in New York and Los Angeles.

I quote some excerpts from the Los Angeles Times of January 25, 1981, which illustrate the Marxists connections of these organizations:

BEIRUT.—It is one of the world's newest terrorist movements, and it may be the most efficient. Its members have murdered at least a dozen diplomats, or relatives of diplomats, in the last 6 years, and none of the assassins has ever been captured.

It operates in a dozen countries, including the United States, but the location of its headquarters is unknown, as are the names of its leaders.

It is the Secret Army for the Liberation of Armenia.

Led by hardened Marxists, its troops are mostly well-brought-up children from middle-class Armenian families in Lebanon, France and the United States. Their goal, shared with three smaller terrorist groups, is to force Turkey to surrender the eastern fifth of its territory to the descendants of the Armenians who once lived there—or, failing that, to the Soviet Union. Their method is killing Turkish diplomats.

In December alone, Armenian gunmen assassinated Sarik Ariyak, the Turkish Consul General in Sydney, Australia, and his bodyguard, ambushed a Turkish diplomat in Rome who was saved by newly installed bulletproof glass in his car, and set off bombs in Madrid and Beirut.

Earlier this month, a Swiss court released Suzy Mahseredjian, 24, a Syrian-born Canoga Park woman accused of being affiliated with the Secret Army. She was arrested after an explosion in her Geneva hotel room last October. The Secret Army said Mahseredjian and a companion had been assembling a bomb, and it threatened to attack Swiss embassies around the world if the two were not set free.

There is an echo of the Palestinian terrorism of the early 1970's in the Armenians' methods and their rhetoric, and it is no coincidence. Palestinian and Armenian sources say the Secret Army has close relations with the Popular Front for the Liberation of Palestine, the Marxist group that pioneered the uses of international terror.

The PFLP trains them, supplies their guns and prints their posters', an Armenian scholar charges. The PFLP itself is bankrolled largely by Libya and the Soviet Union.

The Secret Army has borrowed more than its Soviet-model AK-47 rifles from the PFLP. "They have adopted the logic of Black September." The Palestinian terrorist offensive that culminated in the seizure and slaying of Israeli athletes at the Munich Olympics in 1972, said the scholar, who has met with Secret Army members several times.

Only once has the organization held a press conference, last year. Reporters were told to assemble in Beirut—and then were taken on a careening, circuitous ride to Sidon, 35 miles to the south. There, in a dank, nearly ruined building in the old city, they found five members of the Secret Army—all completely masked in black.

The organization has its critics in the Armenian community. Many Armenians have objected to its use of violence, but others admit they respect the terrorists for putting their beliefs in action. The Dashnak Party, recognizing that it is losing prestige and followers to the new leftists, has started its own terrorist group, the Justice Commandos of the Armenian Genocide, Armenian sources say. On occasion, in grisly competition, both have claimed responsibility for the same attack.

The Secret Army's pro-Soviet ideology also is controversial. The group regards Soviet Armenia as its legitimate homeland and favors enlarging the Soviet province with land "liberated" from Turkey.

The cases of terrorism mentioned in the Los Angeles Times article tend to put virtually all organized international terrorism under the same umbrella. International terrorism is an indivisible whole, drawing its resources from the Eastern bloc.●

TRIBUTE TO ELIZABETH MAY DAVY, OF BIRMINGHAM, ALA.

HON. ALBERT LEE SMITH, JR.

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. SMITH of Alabama. Mr. Speaker, "Be aristocratic of mind and demo-

cratic of heart." These words guided the life of one of Birmingham, Ala.'s most beloved women: Elizabeth May Davey. Miss May dedicated her mind and her talents, in fact her entire being, to helping her community.

Her whole life, up until her recent demise, was rich with achievements. She was a successful businesswoman, working with one of Alabama's largest department stores. She served as chairman or president of some of Alabama's most respected organizations. Her proudest achievement, however, was the founding of Spastic Aid of Alabama; later to become known as United Cerebral Palsy of Greater Birmingham, Inc.

Elizabeth May began her work as director of Spastic Aid of Alabama in 1948 aided by only one secretary and using borrowed office equipment. In subsequent years she worked to provide therapeutic and special educational services for handicapped children and adults. Through these classes and the establishment of the permanent Cerebral Palsy Center in 1951, Miss May created an inspired organization which still serves to meet the unmet needs of members of the Birmingham community.

Miss May's dedication to serving humanity has been recognized by many. She was the recipient of the National Humanitarian Award of the United Cerebral Palsy Association, she was named Birmingham's Woman of the Year, and the city dedicated a day in her honor in 1975. Her numerous awards and participation in many varied civic and volunteer organizations are evidence of Elizabeth May's immense love for mankind and her greatness as an individual. It is in this way that the memory of this fine woman will live in the memory of the citizens of Birmingham forever.●

TRIBUTE TO DALE McOMBER

HON. RALPH REGULA

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. REGULA. Mr. Speaker, no one can claim to have had real experience with the Federal budget without encountering Dale McOmber or his name. For 30 years, Dale McOmber not only toiled to put budgets together, he made significant and long-lasting improvements in the budget process of the executive branch. These, in turn, have spilled over to the congressional budget process. Dale McOmber understood that budgeting is synonymous with planning, hence, good budgeting and good planning cannot be separated.

As a member of the Budget and Appropriations Committees, it was my good fortune to be familiar with Mr. McOmber's dedicated public service. As a public servant, he set a standard of excellence that should be the goal of all Federal employees. As a tribute to his recent retirement, I am inserting the following article which appeared in the Wall Street Journal on Friday, May 22:

DALE McOMBER LOOKS BACKWARD AT THE BUDGET

(By Suzanne Garment)

"Dale McOmber? He's the George Smiley of domestic politics," said an official who had worked with him. "How nice," his wife laughed pleasantly on hearing such sentiments over the phone. "Right now he's a retired man out in his back yard planting petunias."

Mr. McOmber is indeed just retired after having spent 30 years making federal budgets, the last seven of those years as the Office of Management and Budget's highest civil servant. He reminisced in his suburban Virginia home this week about the history and prospects of the budget process, and did so with that knowledgeable, equable dispassion for which OMB professionals have become famous.

Mr. McOmber received his Ph.D. in history and political science. He began budgetmaking in the Navy Department in 1951 and in 1957 moved over to the then-Bureau of the Budget, as a technician in the budget review division. This budget review division that Mr. McOmber eventually came to head is the place where most of the OMB staff's marching orders are actually prepared as each annual budget cycle rolls around.

Not surprisingly, he emerged from his career knowing better than anyone else what is changeless about the budget process. Most changeless of all is "the business of deadlines" that forms not only the budget document but the nature of all government operations. Most surprisingly changeless are the tradition of neutrality and "the culture in support of the presidency" that the organization has been able to maintain in tandem.

And most fascinating are the semi-permanent quirks of the various parts of the budget organization. "The defense examiners," Mr. McOmber said, as he laid out the organizational map, "were often the most frustrated. They can produce lots of objective data to show that big battleships—or aircraft carriers or subs—aren't worth it strategically." But all this rational knowledge would simply run up against a "stone wall of politics."

With social programs, "the politics of the matter were not so crass" but caused almost as much grief because of "their utter complication." In, say, the Carter administration, "Carter was always torn between the two wings of the party," between the conservatism the President himself favored and a "Mondale or Eizenstat saying, 'you absolutely need those supporters.'" Examiners did not feel wholly ignored; they were just mired in the quicksand like everyone else.

Foreign policy analysts had another problem: They were up against the politics of perception. "You could say 'Israel isn't really going to be helped by more money from us.'" But the argument would come right back at you that any economies in these areas would be seen as slights and provocations. And "these people in the international area," Mr. McOmber remarked drily, "in order to survive, have long had to have techniques to get to the President."

Over the years Mr. McOmber also got used to another semipermanent feature of the process: periodic alterations in the budgeting technique, changes usually billed as revolutionary, from the "program budgeting" concept of the early 1950s to zero-base budgeting in the late 1970s. Most of those revolutionary techniques did not wreak all that much change. "After a while," he put it delicately, "you tend to get skeptical."

Some things, though, had in fact been changing: "I like to think we capture," from the succession of new techniques, "those things that are helpful." "On the whole," Mr. McOmber judged, "the process probably has become more rational."

The changes of the past year or so had been even more marked. Mr. McOmber was not one to take all the Reagan administration's budget declarations at face value: "They're not going to be able to balance the budget in '84," he predicted, "unless they not only cut back hard on the entitlement programs but cut back on their commitments to defense." But the Stockman regime was something new: "I don't remember an administration that came in with a particular agenda such as Mr. Stockman's." This newly explicit direction, Mr. McOmber thought, plus the new teeth Congress has put into its budget resolution process, meant that we might actually see some more centralized control.

To this prospect Mr. McOmber reacted like a true OMB neutral, "Why do you think 'control' is so good?" he asked. "The budget is a democratic document in the broadest sense. People vote in multiple ways; if the people want control, they'll get it. This time it looks as if they want it. But we get what we ask for," he said.

In fact—he only just alluded to it—there was a certain danger to the organization in this new business of being at the very center of things. It was a danger "not of politicization in the abstract but a danger to the quality of work in the time available. For the moment, Stockman is using OMB as a large legislative staff. But we have to have the time to build intellectual capital."

When I left his house Mr. McOmber was going upstairs to pack for a trip out West to visit his offspring. It was raining benignly on his flower garden. He had left behind a budget organization whose neutral competence remains one of the signal achievements of modern American government. But he also left behind him the thought that this moment of OMB's greatest power may also turn out to be the time of greatest threat to its existing character.●

SUGAR INDUSTRY'S IMPORTANCE TO HAWAII

HON. DANIEL K. AKAKA

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. AKAKA. Mr. Speaker, a recent New York Times editorial called into question the proposal to provide Government price supports for sugar and suggested that the industry would be able to get along very well without them.

The Honolulu Star Bulletin has responded in editorial form to these charges, and I would like to include

this editorial for the information of my colleagues in the House. The sugar industry has long been the victim of many misconceptions. Primary among these is the belief that the sugar industry enjoys a huge profit margin. The truth is that although sugar producers were enjoying a profit earlier this year, that profit has decreased now to the point where the price farmers are receiving is below the cost of production. In fact, profits from the last year and one-half have hardly served to erase the losses producers had to bear during the years 1977-79.

If there is one world that characterizes the sugar market, that word is "volatile." The wild price swings in this market since 1974 have caused great uncertainty both among producers and consumers. I know that the sugar producer of this Nation would much prefer a stable market, one that guarantees a fair return to producers and a consistent and fair price to consumers.

The 19.6 cents loan level in the farm bill merely provides a floor under the sugar industry. This level is not meant to assure a profit for these producers, only to assure that the industry will not fall to the levels of the late 1970's. I commend this article to my colleagues and ask unanimous consent that it be included in the RECORD at this point.

SUGAR INDUSTRY'S IMPORTANCE TO HAWAII

A New York Times editorial reprinted yesterday on this page opposed government price supports for sugar producers as a favor to "a select few."

In Hawaii, the sugar industry is not "a select few." It is about 7,000 workers in what is by far our largest agricultural industry, with about 220,000 acres under cultivation. Once the dominant factor in Hawaii's economy, sugar is still very important.

It is also important to the environment, because it provides an economically sustainable way to keep large areas in agricultural production. If the sugar industry should collapse, there are no alternative crops in sight to take its place and keep that land in cultivation. The pressure to take the land out of agricultural use to build houses or factories might become irresistible.

The Times' confidence that the sugar producers can get along very well without supports has a hollow ring in Hawaii, where we have seen a whole series of once-profitable plantations close their doors forever. No one can be sure that more will not follow. The sugar workers aren't.

The future of the sugar industry in Hawaii is understandably of little concern in New York. But to us the fate of Hawaii sugar makes a great deal of difference.●

TRIBUTE TO PRESTON LOVE

HON. HAL DAUB

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. DAUB. Mr. Speaker, if there is one art form that is truly American, it is jazz, and if there is one American who is truly devoted to this art form, it is Preston Love.

From the time he played lead alto saxophone in Count Basie's band to his current efforts to bring an understanding of jazz to his readers and students, Preston Love had dedicated himself to this American art form.

It was a pleasure to recently join him in celebrating his 60th birthday, and I would like to take this opportunity to share with my colleagues the comments about this respected gentleman made by Stanley Dance, jazz historian and author of "The World of Duke Ellington":

LOVE SIXTY

It is hard to believe that Preston Love will be 60 in April. I certainly don't choose to believe that anyone so perennially young in spirit can be anywhere near that age. But then I have to reflect, in my capacity as a would-be jazz historian, that nearly forty years ago he was touring the country as lead alto saxophone in Count Basie's band. Never having been to Omaha, I do not know whether the air or water there possesses miraculous properties, but something evidently invigorates or rejuvenates saxophone players.

I am, however, not much concerned really with the fact that Love continues to be an astonishingly fine musician, as esteemed in Europe as in his own land, and one whose standards may be considered all to exacting. What constantly impresses and surprises me is how he retains his enthusiasm and his sense of outrage. The latter, as the years pass, tends to give way to weary cynicism in so many writers and critics. We all know that standards in art, manufactured goods, and old-fashioned morality have declined—and continue to decline—since World War II. Nowhere has this been more apparent than in the decadent world of jazz, where the name of the game is HYPE, in capitals.

Preston Love is one of those who sees through the hype and resents its effects. He is not a politician. He is not cunning or devious. His sense of outrage compels him to speak out in the frankest terms, as when recently he was critical of the hysteria following the murder of John Lennon. Tragic though that was, the media seized upon it as an event to be magnified out of all proportion, far beyond, for example, the murder of a world figure like Lord Mountbatten. Had the President been murdered, more newsprint and television and radio could scarcely have been devoted to the subject. Lennon's murder, of course, occurred very conveniently for a record industry worried about impending Christmas sales. Some of the entrepreneurial class seemed to undergo a spiritual reaction, even seeing visions of Lennon in the sky during the prayer meeting in New York's Central Park.

The irony in all this was particularly apparent to Preston Love, who had seen highly talented jazz musicians, whom he knew and admired, die without any recognition remotely comparable to Lennon's, and without leaving as many dollars as the singer left millions. This was not entirely a matter of black versus white, but hype means money and more of it is nearly always spent promoting white than black. As one watched the old newsclips on TV, it was surely impossible not to wonder who decided to pour out the gold in support of such a corny group as the Beatles always were.

Today, Preston Love is an educator both in his writing and on his saxophone. He tries to bring an understanding of the American art known as jazz to his readers and students. He doesn't play down to them, doesn't pander to adolescent tastes, but seeks to lift their musical appreciation to an adult level while maintaining a sense of humor and unswerving loyalty to first principles. A renaissance is always possible, and Preston Love is just the kind of man who can help bring it about in jazz.

PATRIOTIC SONGS

HON. ALLEN E. ERTEL

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. ERTEL. Mr. Speaker, the fifth and sixth graders of the Paxtang Elementary School in Harrisburg, Pa., have just completed a lesson on patriotism. The students learned the importance of patriotism to our country and its meaning to every citizen. In order to express their collective thoughts, the students have written the following words sung to the tune of "My Country Tis of Thee." I am pleased to share these words with you and point to the fact that patriotism is still alive within our youth:

PATRIOTIC SONGS

ROOM 201

Our country is so great,
That we should celebrate,
Our free country.
We hang our flag to thee,
We should sing liberty,
At last our 52 are free,
Let our flag fly free.

ROOM 202

Freedom and liberty,
Is what we want to see
In our country!
We fought to keep our land,
Now we will take our stand
That's why we sing of this,
This great country!

ROOM 203

Our flag flying so free,
This is our own country.
We fought for it.
Independent and free,
Quite a variety
It takes all kinds, like you and me,
To build our land.

ROOM 204

This land is liberty,
This land is good for me,
This land I love.
This land is beautiful,
This land is always free,
This land is kind to me,
This land I love.●

AMENDMENTS TO THE FISHERMEN'S CONTINGENCY FUND ESTABLISHED BY TITLE IV OF THE 1978 OCS LANDS ACT AMENDMENTS

HON. JOHN B. BREAUX

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. BREAUX. Mr. Speaker, today I have reintroduced, with the cosponsorship of my good friend and colleague from Louisiana, Mr. TAUZIN, the ranking minority member of the Subcommittee on Fisheries and Wildlife Conservation and the Environment which I chair, Mr. FORSYTHE, and several other members dedicated to the promotion of the American fishing industry, amendments that I hope will insure the smooth operation of the existing Fishermen's Contingency Fund. While the legislation does not represent a new direction in congressional policy, it is a necessary bill, a bill intended to further the basic policy embodied in title IV of the 1978 Outer Continental Shelf Lands Act Amendments (OCSLA).

Mr. Speaker, in 1978 Congress considered and passed major amendments to the original OCSLA. One of the primary purposes of those amendments was to lay the groundwork for an aggressive, accelerated schedule of OCS leasing. I support that goal today as I did in 1978. At the same time, however, we recognized that the expansion of oil and gas activities would lead, inevitably, to conflicts between the offshore oil and gas industry and the commercial fishermen operating in various OCS regions. This is not to say that we expected insurmountable conflicts over the right of each industry to use coexistent shelf resources, but rather a realization that the relatively long-term presence of equipment necessary to the vital search for, and development of, OCS hydrocarbon resources could result in the damaging of fishing gear. We therefore created a general fund and several area accounts, fully established and funded by fees assessed against OCS oil and gas permits, right-of-way and lease holders. The moneys in such funds were to be available for the prompt payment of compensation to U.S. commercial fishermen for damage to fishing gear and associated economic losses resulting from an OCS related activity.

Unfortunately, Mr. Speaker, the scheme we established in 1978 has not performed as expected. Scores of claims have been filed, few reviewed, and even fewer actually paid. To date, many times the funds paid out have gone to pay administrative expenses incurred by the Department of Commerce in its implementation of the program. The process of filing a claim has been overly burdensome, duplicative and, in most cases, proves to be a disincentive to the commercial fishermen to file a claim in the first instance. For example, testimony received by the Fisheries Subcommittee last year revealed a case where a claim was filed, a year passed, a Federal Government claims inspector appeared and demanded the production of the very same evidence earlier submitted. Several more months passed and still no claim paid out. Finally, after testimony before the subcommittee, in the presence of administration witnesses, the fishermen received the compensation so long overdue. I should point out that commercial fishermen are not the only parties seeking relief from the law now on the books. Department of Commerce personnel testified as recently as this past March that corrective actions were needed to smooth claim's procedures.

Mr. Speaker, it is my hope that the bill introduced today will provide the necessary relief. It is especially important that we correct the current situation given this administration's determination to fully utilize the authority we have granted them to aggressively pursue the exploration, development, and production of our OCS resources. The principal purposes of the new legislation are to:

First, insure that sufficient funds are available in the Fund and its selected area accounts to cover fishing gear damage and related claims made by commercial fishermen; and

Second, streamline the administrative process by which the validity of claims made are determined.

To accomplish these objectives, the bill makes the following major changes to existing law:

First, raises the maximum amount of funds that may be maintained in the general fund from $1 million to $2 million and in each individual area account from $100,000 to $200,000;

Second, stipulates that sums maintained in the fund not currently needed for the payment of claims shall be invested in interest bearing accounts. To the extent such interest is able to maintain the level of the fund and each area account, assessments against OCS lease and right-of-way holders shall be reduced;

Third, establishes a two-tier procedure for determining the validity of claims received. For claims of less than $25,000, the Secretary of Commerce or his designee shall establish a simplified, informal claims review procedure. Secretarial decisions or claims must be made final not later than 120 days after they are filed.

For claims over $25,000, the validation procedure remains the same as current law; and

Fourth, replaces the current administratively unwieldy formula for determining consequential damages with a formula that parallels section 10 of the Fishermen's Protective Act (FPA, 22 U.S.C. 1980). That section provides gear compensation to U.S. fishermen for damages attributable to foreign fishing vessels operating in a fishery subject to U.S. jurisdiction under the FCMA. This provision has proven reliable and easy to administer. It also results in all U.S. fishermen being treated equally for the same type of harm.

Mr. Speaker, I believe this bill is both necessary and timely. I certainly believe that it will be noncontroversial. I plan to hold hearings on this legislation next week and mark it up soon thereafter. I hope that other colleagues in the House will cosponsor this legislation and help insure its speedy enactment.●

UNITED STATES DENIED SEAT ON UNITED NATIONS STATISTICAL COMMISSION

HON. MICKEY EDWARDS

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. EDWARDS of Oklahoma. Mr. Speaker, recently the foreign operations subcommittee had the honor and privilege of welcoming the U.S. Ambassador to the United Nations, Dr. Jeane Kirkpatrick, for a discussion of U.S. participation in the United Nations. In the course of the discussion, a recent and disturbing event in the United Nations came to light. Ambassador Kirkpatrick confirmed that for the first time the United States was denied a seat on the United Nations Statistical Commission, a body which formulates guidelines for gathering statistical data used by other United Nations agencies.

By a longstanding tradition, permanent members of the Security Council are always represented on this Commission. In fact, the United States has always been routinely elected to all constituent bodies of the United Nations. But this year, by a secret vote in the Economic and Social Council, which was the voting body in this case, the United States was removed from membership on the Commission. As a result, the opportunity for the United States to contribute to and influence the work and policies of the Commission has been dramatically diminished.

Mr. Speaker, I am concerned that this may not be an isolated event, but may instead signify the beginning of a trend whereby some nations, which do not like our policies or share our democratic values, attempt to exclude the United States from other United Nations organizations. It should be noted that among the other commissions under the aegis of the Economic and Social Council is the Human Rights Commission.

In the course of expressing her own concern about this unprecedented event, Ambassador Kirkpatrick noted that the United States has become too inclined to defer automatically to the complaints and political-ideological agenda of other nations. In practice, such a tendency on the part of the United States results in our not calling sufficient attention to departures from traditionally accepted practices, breaches of rules, and unfounded attacks on America and its allies.

Ambassador Kirkpatrick has pledged vigilence in monitoring such behavior. She has stressed the need to articulate and vigorously defend this country's values in the United Nations. I am heartened by her energetic commitment to the promotion of American values and interests in the United Nations, but I also share Ambassador Kirkpatrick's concern about the episode with the Statistical Commission. I think it is important for my colleagues to be aware of this event and what it might portend. It is essential that the United States signal its awareness of the unprecendented nature of this event and its desire that it not be repeated.●

IT'S TIME FOR A SECRETARY OF INTERIOR FOR ALL THE PEOPLE

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. BROWN of California. Mr. Speaker, it is time to speak out against the attitudes and actions of James G. Watt, the Secretary of Interior. For those who earnestly wanted to give him the benefit of the doubt in his new job as chief steward of the Nation's conservation ethic and natural resource treasures, the past few months come as a bitter disappointment. For those who warned of the incompatibility of this man with this job, there is no vindication, only sorrow. For all who truly care about the land, the air, the water, the wildlife, and the future—there is an obligation to fight the destructive and irresponsible proposals of Secretary Watt and his associates.

This is not a partisan issue, unless one considers himself a partisan of the Earth, or the laws of the land designed to protect our natural heritage. Nor is this unusually strong opposition, which I and others now express, a result of a particular policy difference, although there have been many of those as well. I, for one, have had bitter policy disputes on particular issues with many Interior Secretaries, including Steward Udall, Wally Hickel, Rogers C. B. Morton, and Cecil Andrus. The difference, in this case, is that I never doubted that these men supported the basic thrust of the body of laws they administered. Instead, our policy disputes were over interpretation of the law in particular instances, and where, although I knew my position to be unassailable, reasonable men differed.

The Los Angeles Times, truly a newspaper of the West, spoke out in an editorial this week for the removal of James Watt as Secretary of Interior. In describing his actions and motives, the Los Angeles Times admits there is some mystery, but added:

What emerges is a profile of a lawyer impatient with detail, having deep religious and economic convictions, who grew up among small-town Westerners who detest the decadent East and its control over so much of their land. There also emerges touches of the common hustler and high-prairies pirate.

Mr. Speaker, as one who has always considered the conservation ethic to be an important reason for this Nation's greatness, I have admired the Republican and Democratic leaders who have translated this ethic into effective legislation. Beginning with Theodore Roosevelt, the modern body of law has been created. It would be a travesty if, beginning with James Watt, 80 years of good work were destroyed.

I am encouraged that public support continues for these traditional values, and bipartisan support against the policies of James Watt is growing. As this necessary struggle continues, until a Secretary of Interior for all the people is appointed, we must not lose sight of our fundamental purpose—which is sound stewardship.

At this time, I insert the Los Angeles Times editorial:

[From the Los Angeles Times, June 3, 1981]

TOO MUCH WATTAGE

Interior Secretary James G. Watt runs his department as if there were no tomorrow. He is in the wrong place, The department's only missions are to manage public resources and protect fragile wilderness areas so that there will be some left for tomorrow's children.

Try as he may to force the locks on so much of America's protected lands, Watt is not likley to break the conservation ethic that put those areas under lock in the first place. But he could do a lot of damage and spoil vast reaches of the face of America in that time. He must be stopped.

Watt insists on leasing offshore oil tracts of dubious value. He tried recently to open the last 1.5 million acres of wilderness in the Rocky Mountain overthrust belt to oil companies that already have access to the other 10 million acres. Congress stopped that. Watt explains that he wants to look for oil and strategic minerals now so that the job can be done carefully and the West will not be trampled in a crisis. That is specious.

He has stopped buying new parkland, ignoring the prospect of a doubling of the U.S. population in 50 years and a predictable need for more space for recreation and leisure.

At the same time, he searches for ways to give away federal land and its minerals to states just for the asking—something that he wants to do but cannot because of a Supreme Court decision.

Why Watt acts as he does is a mystery. Some very good writers have tried recently to unravel the mystery, including Elizabeth Drew of the New Yorker magazine and Robert A. Jones of The Times.

What emerges is a profile of a lawyer impatient with detail, having deep religious and economic convictions, who grew up among small-town Westerners who detest the decadent East and its control over so much of their land. There also emerge touches of the common hustler and high-prairies pirate. Considering how little wilderness is left for tomorrow, the combination is devastating.

Before going to Washington, Watt directed the Mountain States Legal Foundation, a law firm supported by mining and energy companies, big ranchers and land speculators whose interest lay in challenging federal control over the exploitation of public lands.

Those clients are the backbone of the so-called Sagebrush Rebellion. they want federal lands in the West turned back to the states to decide whether wilderness should be sacrificed to development. Those are the clients whose cases Watt now pleads from inside the government rather than outside. They are the people he had in mind when he told a recent Washington roundtable that he is focusing on "freedom and liberty for the individual who has been handcuffed in recent years by economic conditions and political constraints." The description cannot be bent enough to fit the average park visitor.

Watt promised Congress that he would not campaign for changes in conservation law, and he has kept the promise. He goes around the law.

He opposed strip-mining controls. So he fired or transferred more than 200 employees of the office controlling strip-mining. There are barely enough left to count strip mines, let alone regulate them.

He moved 50 lawyers from the department's legal office whose primary job was monitoring reported violations of environmental law. In California, he called for bids from oil companies on 32 offshore tracts, despite objections from the state government that the area is environmentally fragile and that there is not enough oil in those tracts to warrant a risk of coastal damage.

Watt permitted himself a friendly gesture toward environmentalists on Tuesday by agreeing with an Administration decision not to lift a Wild River designation that his predecessor gave to five scenic Northern California rivers. But the gesture was not consistent with his basic agenda.

The Sagebrush Rebels obviously are pleased at the way Watt is forcing open the gates to public land for them, but he is not doing either the Rebels or the President any favors.

The United States lives with deep regional animosities and grievances, many of them justified. Some regions have ample water, and others go dry. Some fairly ooze oil, and others import energy at a scalper's price.

By indulging his fellow Westerners in their lust for the riches on public land, Watt not only breaks faith with the conservation ethic, he also fans the flames of regional grievance.

Watt should be sent back to his legal foundation to plead the case for his clients from the outside again, where he belongs.●

CONGRATULATIONS TO JOSEPH PARIS

HON. HENRY J. NOWAK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. NOWAK. Mr. Speaker, this week marks the 40th year of Federal service for Joseph Paris, the director of the Veterans' Administration medical center in Buffalo, N.Y. It is with understandable pride that the VA is honoring him with its meritorious service award, and I join with this distinguished institution—and the many persons whose lives Joe Paris has enriched—in congratulating a truly exceptional senior executive on his record of service and devotion to the care of others.

Joe began his four decades of Federal service in the U.S. Army during World War II, serving more than 4 years in the 4th and 7th Armored divisions, attaining the rank of first lieutenant. He was awarded two Purple Hearts with Oak Leaf Clusters and the Silver Star.

His association with the Veterans' Administration began in 1945 as a contact officer in Rochester, N.Y. He later served in the positions of administrative assistant, Assistant Director, and Director of VA medical centers. He currently serves in a dual capacity as Director of the VAMC in Buffalo and as the District Director of Veterans' Administration Medical District 2.

As a chief executive, he has been characterized by his peers as outstanding in his utilization of systems orientation. As a medical district director, he has piloted a diversified array of health care facilities, ranging from primary care site to specialty hospitals, as well as university-affiliated health care complexes offering the full spectrum of educational research and clinical services.

Based on my dealings on veterans' matters with him for more than 6 years, I can attest to Joe Paris' compassionate and responsive efforts to provide the best possible service to thousands of veterans and their dependents in western New York.

Joe Paris is a fellow of the American College of Hospital Administrators, member of the Western New York Hospital Association, and member of the American Military Surgeons of the United States. He was a member of the board of directors, Council of Teaching Hospitals of the Association of American Medical Colleges, and frequently requested to chair and participate in executive policy sessions. His input at that level is also sought out by the New York Statewide Health Coordinating Council of the State health planning commission. Similarly, he has participated in such executive policy planning activities for the National Forum on Hospitals and Health Affairs at Duke University.

In the entire health care system of the Veterans' Administration, only a few medical center directors have been recognized nationally for their accomplishment in the field of health care administration. Joe Paris was one of the first directors to achieve this recognition when he was awarded the status of fellow in the American College of Hospital Administrators.

Mr. Speaker, as his accomplishments clearly indicate, Joe Paris has demonstrated the highest quality of Government service, not only doing his job exceptionally well but serving as a tremendous source of inspiration for others.

I know I echo the sentiments of the citizens of western New York in commending Joe Paris for a job well done and wishing him well in his future endeavors.●

ADMINISTRATION PLAN ENCOURAGES SWEATSHOPS

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. MILLER of California. Mr. Speaker, Secretary of Labor Ray Donovan, in an action overwhelmingly opposed by the business and labor communities, has inexlicably announced his intention to revoke the 40-year-old prohibition against industrial homework in the garment industry and several other regulated industries.

Business and labor agreed, at a hearing on this subject held by the Labor Standards Subcommittee of which I am chairman, that revocation of the rule will undermine legitimate, law-abiding businesses, stimulate the proliferation of sweatshops, make enforcement of the Fair Labor Standards Act—a stated goal of Secretary Donovan—a practical impossibility, and encourage the employment of illegal alien workers.

There is a virtually no support for this proposal, as described in a recent article in the New Republic which I want to share with my colleagues. The overwhelming opposition to the Secretary's unwise action, which is described in the article, has only become even more magnified in the intervening weeks. Secretary Donovan should acknowledge that his proposed abolition of the regulation is unnecessary and counterproductive, and instead proceed with his other, better developed plans for enforcing decent working conditions in the needle trades.

The article follows:

[From the Women's Wear Daily, May 16, 1981]

SUPPLY-SIDE SWEATSHOPS

(By Mark Hosenball)

The Reagan administration, groping for prosperity through deregulation, is well on its way to embracing some of the nastiest byproducts of laissez-faire economics. One of its latest enthusiasms is the sweatshop, that good old-fashioned dungeon where children and illegal aliens perforate their fingers with sewing needles for $40 a week and are kicked down the stairs if they complain. Such Dickensian establishments still inhabit the undergrowth of the American garment industry. Like weeds, they always shoot up again despite all efforts to eradicate them. Sweatshops contravene local building codes (not long ago a young girl was killed in a sweatshop building in New York's Chinatown when she fell down a shaft because the elevator was broken), state labor laws, and long-established federal laws. The most frequently flouted of the latter are the federal child labor, minimum wage, and 40-hour week laws—all of which can be evaded through "industrial homework," the practice by which employers send work home with their employees. Industrial homework is banned by certain federal (hated word) regulations. Last week—shortly after Secretary of Labor Raymond Donovan's well-publicized "raid" on a Chinatown sweatshop—the administration announced its intention to take those regulations off.

Some modern conservative economists have always had a love affair with the sweatshop. In his "Free to Choose" television series Milton Friedman stood outside a Chinatown garment factory, pointed out that the conditions inside probably were dreadful and violated several laws, and proceeded to recall wistfully that his immigrant parents got their start in such an establishment. Friedman thinks today's immigrants should get an equal opportunity to experience the Victorian age. He said of the sweatshops' current occupants: "A place like this gives them a chance to get started. . . . If it were closed down who would benefit? Certainly not the people here. Their life may seem pretty tough compared to our own. But that's only because our parents or grandparents went through that stage for us. We're able to start at a higher point."

If Friedman sounded apologetic, the accession of Reaganism to the White House may have emboldened some of his theoretical conferees. An editorial in the March 16 issue of Barrons National Business & Financial Weekly was headlined: "In Praise of Sweatshops: Everyone Should Have the Right to Work." Barrons acknowledges that sweatshops flout a dozen laws, and proposes a solution: "Repeal some of the laws thus flouted, notably the minimum wage act and the . . . anti-homework rule of the Department of Labor." To justify these recommendations, Barrons cites its favorite economic authority, Walter Block. The Young Americans for Freedom recently described this Vancouver, British Columbia, economist as Canada's answer to Professor Friedman. Barrons quotes from a Block treatise entitled Defending the Undefendable: "The liberals who oppose sweatshops understand the importance of activities between consenting adults in sex and drugs but not when it comes to commercial behavior. To me, a sweatshop is just that, a capitalist act between two consenting adults."

It was a well-intended but misdirected Carter administration move to enforce the anti-homework rules that made it possible for Reaganites to seize on them as early candidates for extermination. Sweatshops are most highly concentrated in such advanced communities as New York, Los Angeles, and San Francisco, and industrial homework abuses are most serious among sweatshop operators who sew women's clothing in inner-city areas. But in December 1979 the Carter Labor Department chose to throw the book at C. B. Sports of Burlington, Vermont. This small business employed housewives to knit ski hats at home in their spare time. The housewives didn't maintain proper time cards, which meant, prima facie, the company was breaking the homework regulations. On the other hand, the knitters claimed they average $200 per week for 35 hours and they couldn't work if they had to drive 40 miles from their farmhouse to a factory every day.

The Carter administration forged ahead anyway with a major lawsuit against C. B. Sports, charging gross exploitation of the home knitters. And much as Naderites used to swarm around a good product liability lawsuit against the auto industry, three right-wing legal groups soon signed up to represent the industrious rural seamstresses and small-business men against the unfeeling bureaucrats in Washington. An organization called the New England Legal Foundation of Boston became attorney for C. B. Sports. A Washington group, the Capital Legal Foundation, signed up to represent the proprietor of Stowe Woolens, another Vermont factory threatened with a Labor Department homework lawsuit. Dan Burt, the foundation's president, raised the company's case with a Reagan transition team before the inauguration. A Springfield, Virginia, union-baiting legal group, the Center on National Labor Policy, represented a group of Stowe Woolen knitters. Center attorney Michael Avakian claimed no special influence, but the center's board of advisers includes Jesse Helms and Orrin Hatch. The center's director, Baker Armstrong Smith, headed Reagan's transition team for the National Labor Relations Board. Within a month of taking office, the Reagan Labor Department held hearings, in Washington and Vermont, on whether the industrial homework regulations should be changed.

Before the hearings, representatives of two of the conservative legal groups—the Capital and New England Legal Foundations—told me they only wanted the homework regulations tinkered with so rural workers like the Vermont knitters might be exempted from time-card controls. They were content to see controls continue on city industry like ladies' apparel. Only the Center on National Labor Policy (which takes a strident "unions are thugs" line in its publications) adopted Barrons, position on the homework regulations. Attorney Avakian suggested that perhaps all homework rules, including those directed primarily at the inner city, should be eliminated. In the event, Donovan decided to do just that.

Not surprisingly, the needle trades unions produced strong arguments that the homework regulations should remain intact. Some state government officials—particularly a delegation from California, which has strong state laws against both sweatshops and homework—also testified at the Labor Department hearings in favor of even tighter homework and sweatshops enforcement. According to Labor Department spokeswoman Deborah Rubin, even employers' groups expressed support for the homework regulations. Representatives of various clothing manufacturers' organizations told the department that if the homework regulations were eliminated, sweatshop operators would be able to make garments at even lower costs, thus driving law-abiding manufacturers and those with union contracts out of the country or out of business. The largest and most powerful clothing manufacturers' trade association, the American Apparel Manufacturers Association, seems to have played no part in encouraging Donovan to eliminate the homework regulations. Indeed, the association recently condemned sweatshops and proposed an industry code of conduct. Donovan's move to eliminate all the homework regulations may spring as much from a conservative and anti-union economic fetish as from a conviction that the move will provide a deregulatory boon to US industry.

It was while this decision was in the works that Donovan chose to appear in New York's Chinatown as part of a carefully orchestrated media event. He was accompanied by a Labor Department "strike force" that proceeded to "raid" a couple of garment factories.

"In 25 minutes we found $15,000 in wage violations and three youth violations," Donovan reported afterward. They also found a 90-year-old woman working for one dollar an hour. Donovan told assembled reporters he would lobby Congress for an anti-sweatshop law "with more teeth" in it than the current law. "We're going to keep coming back until they offer people a decent wage," Donovan also promised. Time will tell whether the administration is genuinely schizophrenic on this issue or simply two-faced.●

HOUSE DEMOCRATIC LEADERSHIP'S POSITION ON TAXES

HON. JACK F. KEMP
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. KEMP. Mr. Speaker, for several weeks now, I have held my peace while efforts were made to achieve a consensus on tax policy. And there did seem to be progress, especially when the House majority leader agreed to a 25-percent cut in income tax rates. Now, however, it is clear that the leadership of the Democratic Party is abusing the patience of the American people, who elected us and the President to straighten out our Nation's mismanaged economy. Before we can cut tax rates for all working and saving Americans, we are obliged to cut through the baloney coming from the Democratic leadership.

There are three issues in the tax debate. The first is simple honesty. President Reagan's original 30-percent cut in marginal income tax rates would barely offset the tax increases which are expected over the next several years. The President has frankly declared this to the Nation. The Democratic leadership, on the other hand, has refused to admit that it is holding out for a $100 billion tax increase over the next 3 years, disguised as tax relief.

The second issue is fairness. When you cut all marginal tax rates by an equal percentage, the distribution of the tax burden does not change. For example, compared with a family earning $10,000, another family earning 5 times as much pays 25 times as much in taxes; a family earning 20 times as much pays 200 times as much tax. This is true both before and after cutting everyone's tax rates by the same percentage. All along, President Reagan has stood by this principle of treating all taxpayers alike and refusing to pit one class of taxpayers against another.

Congressman JIM WRIGHT and Speaker TIP O'NEILL say they want to "do more for the middle class," and that President Reagan's plan is somehow a "windfall for the rich." It is interesting to remember that cutting the tax rate on the wealthiest taxpayers from 70 percent to 50 percent was a Democratic proposal; it was President Reagan's to extend the same 30-percent cut to everyone's tax rates. And it does not take a genius to figure out that the Democratic leadership's paltry 15-percent tax cut, however distributed, does not do more for the middle class than a 25-percent or 30-percent cut for everyone. The Democratic leadership seems inveterately wedded to the principle of playing Americans off against each other instead of increasing the take-home pay and savings incentives of everyone.

Finally, there is the question of effectiveness. Only cutting marginal tax rates—the tax on additional income—can result in increased work, saving, investment, or the revenue which results. The historical evidence for this fact is overwhelming, and so far the Democratic leadership has made no attempt to refute it directly. The Democratic Party, liberal and conservative, now embraces the necessity of cutting the top rate from 70 percent to 50 percent. And in October 1978, both Houses of Congress approved a 25-percent cut in marginal tax rates over 4 years. It was cut in conference committee when President Carter threatened to veto the bill. The Democratic leadership's current posturing therefore is mere politics.

It will not work. Since the election, Americans have a simple criterion for judging the tax bill which emerges from Congress. If it is not the President's bill, it is a fraud and it undercuts his economic recovery plan.●

SOCIAL SECURITY: A NEW ALTERNATIVE

HON. WILLIS D. GRADISON, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. GRADISON. Mr. Speaker, the administration's recommendations have advanced the cause of putting social security on a sound basis by leveling with the public about the seriousness of the problem, and making it clear to all who will listen that there are no easy answers. The basic problem with them is the abruptness of the recommended changes—in minimum benefits, student benefits, and now early retirement. The Social Security Subcommittee and the full Ways and Means Committee have already acted on minimum benefits and student benefits, providing a gradual phase-in of the cuts, but saving far less money than the President's plan. I am convinced that the subcommittee and the full committee will not accept the sudden drop in benefits for early retirement.

This leaves three basic choices:

First, borrowing up to $100 billion over the next 5 years to maintain present social security benefits—this would, in my judgment, be devastating to the social security system and damaging to the economic recovery of the Nation as a whole. For social security it could well undermine the earned-right concept of benefits and remove restraint on benefit increases. For the economy it would mean higher interest rates, higher unemployment and higher inflation.

Second, increasing social security taxes above the levels provided in present law—I am convinced that we are reaching the limit of the public's willingness to pay taxes of all kinds—including social security taxes. We cannot balance our responsibilities to those who benefit from social security and those who pay for it by asking the taxpayers to carry the full burden.

Third, gradual, rather than abrupt, changes in the system, including a possible one-time-only reduction in the COLA. This is the course I suggest.

We must seek to provide, as the President's proposal does, adequate changes to deal with worst-case assumptions with respect to trust fund balances over the critical, short-run crisis period—1982-86. Furthermore, we must provide the the long-run alterations necessary to assure the survival of this system into the 21st century.

I believe the following elements of my proposal fit these specifications:

First, extend social security coverage to all Federal employees hired after January 1, 1982. This provision would also require mandatory coverage for Members of the U.S. House of Representatives and the U.S. Senate beginning on January 1, 1982;

Second, starting after 1986, gradually reduce age at which retirement test no longer applies to 68;

Third, eliminate the lump-sum death benefit;

Fourth, reduce dropout years to 3; add 3 for child care;

Fifth, cover sick pay in first 6 months;

Sixth, change computation points for average indexed monthly earnings from age 62 to 65;

Seventh, increase bend points in primary benefit formula by 50 percent—instead of 100 percent—of wage increases, 1982-87;

Eighth, eliminate benefits for children of retired workers aged 62 to 64;

Ninth, disability maximum family benefit applicable to survivor and retirement cases;

Tenth, eliminate windfall portion of benefits for persons with pensions from noncovered employment;

Eleventh, require medical-only determination of disability; that is, exclude vocational factors;

Twelfth, increase disability waiting period from 5 months to 6 months;

Thirteenth, require disability prognosis of 24-plus months duration, instead of 12-plus months;

Fourteenth, require 30 quarters covered out of last 40 quarters for disability benefits, instead of 20/40;

Fifteenth, move date for automatic benefit increase from June to September and use 12-month average;

Sixteenth, a megacap on disability benefits;

Seventeenth, elimination of trust fund rehabilitation program;

Eighteenth, improve the own-motion review program; and

Nineteenth, improve timing of State and local government social security tax deposits.

If the economy performs as we all hope, these 19 changes should suffice to bring the system safely through the critical 5-year period without abrupt benefit cuts, tax increases beyond present law, borrowing or change in the COLA.

If the worst case assumptions come to pass the systems' needs could be met with a one-time reduction in the COLA effective September 1983. This midcourse correction would reduce no one's benefits. For example, assuming a $500 monthly benefit, a 10-percent inflation rate, and an 80-percent one-time adjustment in the COLA, monthly benefits would increase from $500 to $540 instead of from $500 to $550 as under present law.

I hope that this specific alternative will be helpful in the committee's deliberations. I do not expect it to be universally acclaimed. I do urge those who disagree to come up as I have tried to do, with specific alternatives so that needed action can be taken—and taken promptly to save the social security system.

Cost Analysis—Short Range Effect, Calendar Years 1982–86

[In billions]

	Administration's budget assumptions	Worst case assumptions
Status of present system, deficit	−$11.0	−$110.8
Effect of administration's budget proposals	35.5	36.8
Status assuming enactment of administration's Mar. 10 budget proposals	+24.5	−74.0
Effect of administration's May 12 proposals	46.4	75.0
Status after administration's May 12 proposals	+70.9	+1.0
Modifications		
Status of present system, deficit	−11.0	−110.8
(1) Effect of Ways and Means fiscal year 1982 budget actions [1]	11.8	13.3
(2) Extend social security coverage to new Federal hires, January 1, 1982	8.3	8.7
(3) Eliminate lump-sum death benefit	1.8	1.8
(4) Reduce drop-out years to 3; add 3 for child care	1.3	1.3
(5) Social Security Subcommittee DI changes in H.R. 3207	1.1	1.1
(6) Section 304 of H.R. 3207, deposits of State and local government social security taxes	2.1	2.1
(7) 80 percent COLA effective September 1983	8.0	15.9
Effect of 1 to 7	34.4	44.2
Effect of administration's May 12 proposals absent items No. 4 (early retirement benefit reductions) and No. 13 (elimination of the retirement test)	[2] 41.7	[2] 67.8
Effect of modifications (1 to 7) plus revised May 12 proposal of the administration	76.1	112.0
Status after modifications plus revised May 12 proposal of the administration	+65.1	+1.2

[1] To avoid double counting, savings incurred from section 108 of H.R. 3207 as adopted by the full Ways and Means Committee in its budget actions are not included.

[2] Interacting effects have not been taken into account. ●

OCEAN MINING, AMERICA'S MARITIME CHALLENGE FOR THE 1980'S

HON. JOHN B. BREAUX

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. BREAUX. Mr. Speaker, May 22 marked this year's celebration of National Maritime Day. I would hope that those Members who were unaware of this event will take a moment now to contemplate the important role the maritime industry performs in our Nation's economic and national security. Today, I wish to pay tribute to this vital industry and I urge my colleagues to join with me in making a serious commitment to restore America's leadership role on the high seas.

Only a short time ago, the United States stood No. 1 in both fleet size and carrying capacity. Somehow that lead has been allowed to dwindle so that today the United States ranks 11th in number among the world fleets and is 8th in capacity. The downward trend faced by this industry must be reversed now lest we find our sealanes dominated by potentially unfriendly nations on which we would be entirely dependent for the carriage of our trade. Surely a concerted effort on

the part of industry and Government could stymie the deterioration of this fundamental sector of our economy. As Members of the House of Representatives, we must do our best to establish imaginative Government policies providing proper incentives for a competitive merchant marine. These policies will serve as a first step in regaining our place as a strong maritime nation.

While we have lost our first place in number of ships and tonnage, we have never lost the lead in new ship design and other innovations that have led to shipping efficiency and cost effectiveness. From the development of the fast clipper ships in the 1800's to the emergence of the LNG vessel in the late 1970's, the United States has been responsible for initial construction and technical expertise. We are continuing this lead in two other areas. American companies are now in the incipient stage of designing and building floating plantships for the purpose of converting ocean thermal energy into practical electrical generating capacity. Equally important is U.S. participation in the development of ocean mining technology which the maritime industry sees as one means by which it can grow and contribute to the development of an independent source of strategic minerals.

As you know, Mr. Speaker, for some time, I have viewed the ocean mining industry as essential to our freedom from dependence on sometimes unreliable sources for such important minerals as cobalt, copper, manganese, and nickle. Today, I would like to point out that the successful development of this industry could also mean that our own merchant fleet, rather than ships of other nations, will carry our strategic minerals.

Statistics gathered by our maritime industry point out the fact that not only are we dependent on foreign sources for the supplies of strategic minerals, but 90 percent of those supplies are carried on foreign-flag vessels. A recent maritime industry newsletter also indicates that the United States has less than 20 dry bulk carriers even capable of transporting critical minerals. This fact merely underscores the need for a successful deep seabed mining industry which would foster the construction and participation of U.S.-manned and documented ships in the carriage and mining of minerals essential to both military and business.

The importance of an independent supply as well as an independent means of carriage cannot be overemphasized. The insecurity of foreign-flag carriage was brought home dramatically in 1973 during the so-called Yom Kippur war, when Liberia issued an edict forbidding any Liberian-registered vessel from entering the war zone. Short of military confrontation, there is little we could do to object to any action similar to that of Liberia: The country of registry has the right, in case of national emergency, to appropriate for its own purposes those ships registered under its flag.

It is my hope that an international environment conducive to profitable ocean mining can be established in a very short time. Otherwise, we could very possibly lose our technological and competitive edge. Indeed, some consortia have already slashed their budgets for ocean mining due to the uncertainty of the outcome of the Law of the Sea Treaty currently being negotiated.

Without elaborating on the specific details and problems of that treaty, let it, suffice to say, that unless the final draft recognizes that the mining industry is motivated by profit incentives—as are all successful industries—no ocean mining company will invest any more money into the business. If no investments are made, we will have lost the opportunity for independence in essential nonfuel minerals as well as the opportunity to enhance an industry desperate for new life.●

TWO FACES OF WAR

HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. HARKIN. Mr. Speaker, yesterday the House of Representatives passed H.R. 3499, the Veterans' Health Care Act of 1981.

It is evident that the millions of veterans who returned from Vietnam fall into two distinct classes. They have all been to war; they all bear some scars from that war and they all survived that war. But while a few returned home heroes, many thousands returned home victims.

The provisions of the Veterans' Health Care Act of 1981 can go a long way in assisting those victims. It is possible that they would not go far enough, but at last we can say that we have begun to assume our societal resposibility to these veterans.

Mr. Speaker, I would like to take this opportunity to insert into the RECORD an article by Myra MacPherson entitled, "Two Faces of War: POW Power and the Agony of Agent Orange," from the Washington Post, May 26, 1981. Ms. MacPherson's article vividly illustrates the necessity for providing additional services to those who served in Vietnam and returned home victims.

[From the Washington Post, May 26, 1981]

TWO FACES OF WAR—POW POWER AND THE AGONY OF AGENT ORANGE

(By Myra MacPherson)

Cheers burst forth and seats clattered as a roomful of military men and their wives moved as one in a standing ovation. The cheers were louder than when the name of their adored president, Ronald Reagan was evoked. Richer even than the hosannas for "the man we all know and love—Richard Milhous Nixon" as their former commander in chief was described when his telegram greeting was read.

For here at the Shoreham last Sunday, in front of them, was H. Ross Perot the pintsize Texas millionaire and longtime friend of these men—250 former Vietnam POW's.

The world first heard of H. Ross Perot in 1970 when he loaded two jets with Christmas presents for the POW's and zapped around the world in vain, trying first to get Hanoi and then the Russians to let him in. There is a slight flush of anger as Perot—as tough as he is generous—recalls the press reaction at the time. "As far as the press was concerned I was just a funny little guy doing odd things. But the facts are that Henry Kissinger asked me to do it and Al Haig was my contact. We got millions of dollars worth of press and it was all carefully planned to embarrass the North Vietnamese into changing their treatment of the POW's. And they did."

The former POW's in starched white jackets filled with campaign ribbons, and their wives formed a long line as they filed by Perot paying their respects to the man who barely reached their shoulders. "I just wanted to tell my children I met the greatest American in our time," gushed one wife. One ex-Air Force pilot asked Perot if he knew anyone with a Texas airline, "I'm looking for a flying job." "Use my name," shoots back Perot. "I probably know 'em." A little laugh. "I hope I don't cost you the job."

There were lots of laughs. The former POWs and pilots are into "right stuff" talk these days. Jokes, macho, friendly congenial banter, "Hey, you ole sonofabitch, how are you?" One pilot to three women talking together. "Now there aren't enough pretty ladies to go around. This is no time for a hen party."

They were crowned heroes in a war that had few heroes. "Our psychological problems just drifted away," said Allen Stafford, commander, U.S. Navy, "Hell, we were professionals, I fly my plane and do what the boss says to do." He speaks of the men who fought the war on the ground. "I don't relate to their problems but I'm in sympathy with the poor guy that was on the ground. But our life just gets better. I just about had a coronary I was so glad Reagan got in. El Salvador? I'm not up to speed on that. But I have absolute faith the President will do what is right. I'd go again and fight it all the way. If he wants to send me in a cockpit, I'd go."

At American University this Memorial Day weekend, Stafford's gung-ho view was lost on another group of veterans—the drafted and enlisted men; the grunts and ground-pounders who slogged through the jungles of Vietnam. There were no White House parties for them as they returned from that same war. But the ex-POWs got a liberal discount on their Washington hotel rooms and eight airlines offered free rides to the Washington reunion. The 200 other vets and their families across town at the Agent Orange conference stayed in friends' houses, cheap hotels. They came from California and Boston and Florida. The Wisconsin group had bake sales to pay for their trip. And they had to sell T-shirts and fatigues at $5 and $7 to help meet expenses. They were doing a brisk business in shirts

with such slogans as "No Draft, No Way," and a T-shirt with the slogan "Dow Shalt Not Kill" (for Dow Chemical Company, manufacturers of the chemical Agent Orange).

For they were here for a National Vietnam Veterans Conference on Agent Orange. There were professors, scientists and lawyers in three-piece suits and veterans in faded fatigues as well as coats and ties. They tried in vain to get a representative of the government, of the Veterans Administration, to attend.

These are the men who were thankful they made it back whole but now feel they are victims of a sinister legacy—Agent Orange. The defoliant that rained on Vietnam for years contains dioxin, one of the world's most deadly chemicals. A single drop, if it could be divided equally among 1,000 people, would kill them all. It can topple a 150-foot hardwood tree in two days. The amount of Agent Orange sprayed in Vietnam totaled about 96 million pounds. The veterans are asking for testing, treatment and compensation for what they feel are Agent Orange-caused illnesses—everything from cancer to birth defects in their children.

"This is the first war that reached into our maternity wards," said Tom Vallely, a Boston state representative and Vietnam veteran who received the silver star for bravery. Eighteen months ago, his daughter was born with a serious birth defect. "The Vietnam experience does not belong to the past," Vallely said. The warfare we saw in Vietnam is the warfare of the future. Vietnam was a laboratory, our own men were the guinea pigs. Our men got caught in a crossfire of bullets and chemicals."

Their cause is not popular with the government or chemical companies who could have to pay billions in medical benefits and lawsuits if the list of diseases were ever linked to Agent Orange.

And so Ronald DeBoer, a tall, slim, handsome ex-veteran and director of Agent Orange Victims of New York, was speaking mostly to the converted as the keynote speaker.

Life was fine for DeBoer. He returned from Vietnam, went to college, started his own business. Then, he got cancer. "My wife read about Agent Orange—a herbicide that causes cancer in laboratory animals. I began to read and I still couldn't believe that my government would send me into an area that would be contaminated with what turns out to be the most toxic substance known to man." Laboriously, DeBoer began trying to find out "what happened to the other men in A Troop, Seventh Squadron, 17th Air Cav." He called Kevin, a New York City cop whose first child was born dead and his second deformed. He got him in touch with another from his troop who told DeBoer, "My first child was born with a deformed leg and my second child was born mentally retarded." Like many of the other veterans and wives with deformed children, the man had no history of genetic problems. Next was Alan, a California mailman. He had developed hypertension, severe headaches, skin problems and "never felt well a day since I returned." DeBoer contends that "five out of six of the troop that I contacted had hard-core Agent Orange problems." He is loaded with statistics: "A new study found 43 percent higher incidence of soft tissue carcinoma among people who have been exposed to dioxin," and was greeted with sustained applause when he shouted, "We don't have to hear about rabbits and mice and monkeys. We have the people—2.48 million who served their country. They should be compared in a controlled study with 2.4 million men who did not go to Vietnam but were in the Army."

DeBoer finished with, "This Memorial Day, thousands of Vietnam vets aren't going to home-town parades because they're in cancer wards, thousands of Vietnam veterans' wives are going to be at cemeteries putting flowers on the graves of those who survived the war. That is our Memorial Day. But who in the VA stands up and speaks for us? As the people in Washington and the war contractors sit around the pools and go to parties and dip their manicured fingers in the caviar, you can be sure they are not thinking of us."

At the Shoreham, H. Ross Perot finally ducks out of the endless stream of praise from the former POWs. Perot was hiring Vietnam veterans for his Electronic Data Systems Corp. back when "you were thought a militaristic lunatic to do that. We've hired'em by the thousands and not had a psychological problem with a one. I feel sorry for the ones who have trouble but it's a gross distortion to say they're the average Vietnam vet." He is, however, interested in Agent Orange. "You know that fella that shot up the VA hospital in California? His wife sent me a letter. So I called her and asked if there was something I could do. She said, 'Nothing. He's dead.' She's got a very famous coroner doing a detailed autopsy to see if anything can be linked to Agent Orange."

The former POWs glisten with prosperity, look so healthy that it is hard to imagine that most spent seven years in prison. Seven of them line up and a wife snaps a picture as all grin. There are occasional, brief clouds. Asked about his children, one stops smiling. "I lost them when I was over there. They don't know me. But I'm remarried . . ." and the smile is back.

Ron Bliss, now a Texas lawyer, looks at another former POW and says, "He was my first roommate." He was not referring to a military academy. They were together for nearly a year in the prison dubbed The Hanoi Hilton. "He was tortured so badly he couldn't move his arms for months." As Bliss drifts off, Jack Fellows says, "He saved my life. When I couldn't move my arms he fed me, bathed me, clothed me . . ."

Now, all these years later, Ross Perot has a thought on the way America treated veterans. "We've got ourselves in a strange box in this country. Making heroes out of hostages and prisoners and not the others. Think about it."

At the Agent Orange conference, no one was talking about wanting to be heroes. Many there were forged in the Vietnam Veterans Against the War (VVAW) movement. They were there, among the several hundreds of war heroes who pelted ribbons and medals at the Capitol terrace in 1971. They are leery of right-wing revisionism of Vietnam and feel the war was wrong.

Their concerns are personal. Margaret and Larry Driscoll wear their bright orange "Agent Orange Victims of New Jersey" T-shirts as their 4-year-old redhead, Erin, plays on the lawn outside the conference. Driscoll was a medic. He began getting severe headaches in Vietnam (one of the symptoms mentioned by alleged Agent Orange victims) and "they continue to this date. Nothing helps. All I can do is lie down and wait." He was in the computer field but took a laborer's job, unloading trucks, "just in case my headaches were caused by the mental stress of the job." In 1969, Margaret had a stillborn baby that was badly deformed. "A very rare defect. She was born with only half a brain. They couldn't give me any reason." Her husband's problems grew. Headaches, severe skin rash, "and now my joints kill me. I was on the swimming team before. Now I can't throw a ball 10 feet."

They held off on children and then, in 1977, Erin was born healthy. The next year, a baby was born with a cleft palate. "You look down at your newborn and you see this. She had only two chambers to her heart, a displaced spleen. She died three days later," says Margaret. Scientists refer to such personal information as "anecdotal data" that contain no hard-core facts. However, veterans and their families feel there are insidious and peculiar patterns to these stories. Margaret Driscoll was the third woman at the conference to mention that she had had amniocentesis; that no birth defects were detected and yet she gave birth to abnormal babies. "We went all through the genetics and the doctors still haven't given us an answer."

Today, they are still paying for the medical bills—"and the funeral bills."

The wives of former POWs are dressed in flowing chiffon and lace. They, like their husbands, are professionals. Little of those seven years of wondering, of raising children alone, shows on their faces today. "The children were all scarred," says Louise Mulligan, whose oldest of six was 15 and the youngest 3 when her husband was captured. "But most of us have found our children have come out very well." It was hard on teen-ageers, whose peers were vociferously anti-draft. "I told my oldest, when he went off to college, not to mention where his father was. He was having enough trouble without that."

Nearby sits a younger wife, Mary Jane McManus. She had been married four days when her husband left for Vietnam. He was captured June 14, 1967. She was in her early 20s. "I was in college in the nonviolent period." She and other POW wives tried to appeal to all political persuasions. "No matter how you felt about the war, they were political prisoners." Her pretty face grows hard when she remembers those in the peace movement "who wanted to try our husbands as political prisoners." They survived because, said McManus, "they followed a chain of command within the POW system."

McManus now has five children—ages 7, 5, 4, 3, 2—"and one coming."

There is talk of Agent Orange. "I don't know what we can do about that," she says. "My brother has had it, has had the acne and skin conditions for eight years." She is told of the women at the conference who feel that birth defects were caused by Agent Orange.

"Oh really," she said, sympathetically. "I didn't know about that." There is a moment's sigh.

At the Agent Orange conference, a lawyer says, more sadly than disparagingly, "The POWs are an accident of history—a bunch of right-wing officers turned into heroes."

Meanwhile, in the Shoreham banquet room, where every military man turned in precision as the color guard filed past, there is a heady feeling that their time is now. Approving nods as Reagan's emissary, Lyn Nofziger, assures that "no longer is the United States backing off in places like El Salvador."

And yet, even here, there is still an edge of ambivalence, a remembrance of bad times past.

McManus says softly, "Who would want to send a child or her husband to any war?"●

UNITED STATES SHOULD REDUCE ITS SUPPORT FOR INTERNATIONAL DEVELOPMENT ASSOCIATION

HON. MICKEY EDWARDS

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. EDWARDS of Oklahoma. Mr. Speaker, although I recently supported passage of the supplemental appropriations bill for the 1981 fiscal year, I did so with some reservations, which I think must be put on record, concerning the committee's recommendation to grant the supplemental request of $540 million for the sixth replenishment of the International Development Association, the so-called soft loan window of the World Bank. I make these concerns public now in the hope that the administration will reconsider its support for IDA in future appropriations.

Mr. Speaker, I am concerned that at a time when we are cutting back on domestic programs, and asking those served by these programs to sacrifice for the good of the country, we are going forward with a commitment of half a billion dollars for foreign aid.

The argument is frequently made that extending these loans to the world's underdeveloped countries helps promote a Western orientation in the recipient countries. I would like to believe that this argument is sound. But I find it less than compelling when I note that in fiscal year 1980, India—which is certainly not noted for any pronounced pro-Western stance—ranked first in the amount of IDA loans, receiving 40 percent of the total, more than the next nine countries received combined. Countries such as Egypt, Kenya, and Pakistan, which have been cited as being important to the United States because of security and defense arrangements, received far less than did India. I seriously question whether this kind of lending truly supports U.S. security interests.

A second argument in support of the IDA VI replenishment is that failure to appropriate the full U.S. share would abrogate an internationally negotiated commitment which the United States must honor. However, as former Treasury Secretary Michael Blumenthal has stated clearly, in testimony before the foreign operations subcommittee, the United States made it known in the replenishment negotiations on IDA VI that U.S. acceptance of the agreement was to be understood as preliminary and provisional. To quote Secretary Blumenthal on this point:

When we indicate a particular level of support we make it clear to the institution that this is not a commitment and that it will not be forthcoming unless the funds are not only authorized but also approved through the appropriations process of the Congress.

Mr. Speaker, I am not arguing against continued U.S. participation in IDA. But I do believe very strongly that a reduction in the level of U.S. support is warranted, particularly when we are asking our fellow Americans to tighten their belts in the interest of restoring fiscal health to our economy.●

INDUSTRY DOUBTS ACCELERATION OF OCS LEASING

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. MILLER of California. Mr. Speaker, for several years I have been warning that merely accelerating the leasing of offshore lands will not assure expedited production of oil and gas reserves from the Outer Continental Shelf (OCS). During consideration of the OCS Lands Act Amendments of 1978, when I served as a member of the Ad Hoc Select Committee on the Outer Continental Shelf, I frequently warned that excessively rapid leasing would deprive taxpayers of a fair return from the sale of these publicly owned resources. Moreover, I noted at that time, the oil industry admitted that it lacked the capacity to explore or develop substantial new areas of the OCS.

Several provisions of the 1978 law attempted to require an orderly leasing schedule, developed in consultation with affected State and local representatives, which would assure safe development, a fair return to the Treasury, adequate competition among oil company bidders, and diligent production on leases already sold. These provisions, which are in the law, were developed in response to several studies which showed that the proposed 10 million acre lease sale under the Nixon-Ford administration would have serious economic ramifications, all negative.

A 1974 report of the House Banking Committee noted:

The Department of the Interior has been unable to properly manage the current OCS leasing program, and will undoubtedly commit even greater disservices to the public interest under the accelerated leasing schedule * * *. A glut on the market of lease offerings will reduce competition because of a limited amount of capital available for bidding purposes * * *. Offering more tracts will decrease the average number of bids per tract. A positive correlation exists between the number of bids per tract and the level of the winning bid.

A 1975 report of the national ocean policy study staff concluded that:

Evidence from 1973 and 1974 lease sales shows that competition has declined as acreage offered has increased and suggests that the proposed accelerated leasing program may lead to a significant reduction the public receives for its resources.

The General Accounting Office made similar observations in 1975 and 1977:

Increases in shelf sales size and frequency in 1974 have caused workload problems resulting in an abbreviated valuation program and which have also lessened the Government's ability to insure a fair market return on lease offers—

GAO reported in 1975.

Because of large lease offers, competition is weakened.

In commenting on proposed lease sale 40 in 1977, GAO noted:

Much of area that is considered for lease is not even examined and tracts are included in sales *despite their apparent low promise of resources. We believe this policy encourages speculation in bidding, can result in tying up limited industry capital in lands with little or no minimal resources, and bring into question the public's right to receive a fair market value.* [Emphasis added].

I want to note to the Congress that this situation—the leasing of vast amounts of unknown and low value lands, with the resultant loss of fair market value returns for taxpayers—is precisely the situation in the controversial California lease sale which was held earlier this week despite legal actions to prevent its occurrence. The Interior Department was either unaware of these past studies, and the long legislative history behind the 1978 OCS Act, or is simply choosing to ignore the facts. Either way, the taxpayers are going to be severely injured.

Perhaps Secretary Watt believes that these past studies were biased against industry. I suggest he allow industry to speak for itself in that case. In questioning before the Commerce Committee in 1974, the president of Gulf Global Exploration acknowledged that tying up industry capital in front end bonuses, as the Interior Department wants to do, could actually delay exploration and development:

It would be a drain on the financial capability of the oil industry to develop that many leases if we continue to put a lot of this money into lease bonuses * * *. *Most likely, the price of the leases will go down as more leases become available.* [Emphasis added].

We have heard industry again raise concerns about the unavailability of drilling equipment, capital, and manpower among exploration and production companies. The Reagan administration's proposed accelerated leasing program, which dwarfs that of Presi-

dent Nixon, is apparently causing more consternation than glee among some companies who recognize that the overextended sale of land will not expedite oil and gas production.

I would like to submit an article on this subject, "No Bonanza in Offshore Oil," which appeared in the June 8, 1981, edition of Business Week:

[From Business Week, June 8, 1981]

ENERGY—NO BONANZA IN OFFSHORE OIL

A major element of President Reagan's energy policy—a speedup in the leasing of federal offshore areas for oil and gas exploration—is running into opposition from an unlikely quarter. Some of the nation's largest oil companies are questioning whether they have the manpower, equipment, and money to cope with an accelerated pace of lease sales.

"Drastic changes [in leasing schedules] can upset the capital, equipment, and manpower planning efforts of many firms, including our own," says E. F. Livaudais, Washington representative for Atlantic Richfield Co. ARCO and a handful of other major oil companies have told the Administration that they are quite content with the old leasing schedule set out by the Carter Administration. "Our resources would be used more efficiently if the previous schedule were left intact," says Michael J. Savage, president of Sohio Petroleum Co., a subsidiary of Standard Oil Co. (Ohio), Alaska's No. 1 oil producer. "We may not have the manpower to cope," he adds.

The leases in question involve tracts on the Outer Continental Shelf (OCS), an area of some 900 million acres off the coasts of the U.S. (including Alaska) said by the U.S. Geological Survey to contain 17 billion to 44 billion bbl. of oil and 117 trillion to 231 trillion cu. ft. of natural gas. To date, 96 percent of all the oil and gas produced from the OCS has come from the Gulf of Mexico, a region the industry terms "mature," or unlikely to contain major new reservoirs. And for seven years, offshore oil production from federal lands has been falling.

Despite the doubts raised by these factors, oil and gas producers have been protesting bitterly for several years that so-called frontier areas, principally off the coast of Alaska, have been withheld from leasing for exploration and production. The producers have also been frustrated by frequent delays in lease sales in other areas through the 1970s, as environmentalists mounted challenge after challenge to government leasing plans.

FASTER SCHEDULE

This year, as in the past, the government will select OCS tracts, determine their fair market value, and then put them up for bids at auctions. In 1980 the process resulted in the sale of about 1.1 million acres of the 2.6 million acres offered. Now, Interior Secretary James G. Watt has proposed a five-year plan that, beginning in 1982, would allow producers themselves to evaluate and make bids on tracts selected from as much as 200 million acres annually.

Most significantly, the proposed Administration schedule includes six more offshore Alaska sales than were included in the 1980 schedule proposed by Carter's Interior Secretary, Cecil D. Andrus. Two Alaska sales, one each in the Bering and Beaufort seas, have been moved ahead a full year under Watt's plan in response to industry claims that the areas hold more potential for the discovery of large hydrocarbon deposits than do any other offshore regions.

Watt also is proposing a cut in the time set for lease-sale preparations, mainly by requiring basin-wide environmental studies, rather than the tract-by-tract evaluations that have been performed in the past. And oil executives generally applaud the presale changes, noting that sales outside the Gulf of Mexico in the 1970s were delayed an average of 12 to 15 months while environmental information was gathered. Says Douglas G. Garrott, operations manager for Exxon Co. USA's exploration department: "The sooner we know what's up there [in the frontier areas], the better off we are."

EXPERTISE IN SHORT SUPPLY

But the glee is not universal, and the oil companies that question the wisdom of the speedup are not the only ones concerned that Watt's leasing goals may be unattainable. Analysts predict a shortage of tubular steel products used in drilling could develop by the end of this year, even before the Reagan Administration's leasing program could begin. And all but the largest oil companies are faced with critical shortages of experienced geologists who determine where exploratory wells should be drilled. That expertise is crucial; drilling costs in the frontier areas of Alaska can run up to $25 million for a 15,000-ft.-deep well.

The oil industry already has paid $1.1 billion for the right to drill in the Baltimore Canyon off New Jersey, and has yet to fine enough oil or gas to warrant commercial development. Thus, it is no wonder that "there are those who are panic-stricken" by the prospect of an even faster drilling pace, says Henry A. Hill, Conoco Inc.'s marine region operations manager and an advocate of Watt's plan.

There also are those who say the oil industry has been slow to develop properties it has purchased. Energy Action, a consumer group based in Washington, claims the nation's top 20 oil companies increased their undeveloped land holdings by 48 million acres, or 43 percent, between 1976 and 1980, while the amount of developed lands they hold rose by only 682,000 acres, or 2.5 percent, in the period. "The findings clearly demonstrate that the major oil companies, not the federal government, have been locking up lands in order to cash in on higher oil and gas prices in the future," says Energy Action Director Edwin Rothschild. The oil companies, he adds, "simply can't handle the land they've got now." And he asks: "Should we expect more production from [the oil companies] simply because the federal government is willing to put up 200 million acres a year of offshore property for lease?"

But the complaints about accelerated leasing so far have carried little weight at the Interior Dept. Watt says he is committed to "using the market mechanism rather than arbitrary government decisions" to determine the number of sales and the amount of acreage put up for bids, and to further define the nation's offshore oil and gas resources. Observers say that that approach may preclude all but the six or seven largest oil companies from operating alone in the most costly offshore areas, principally the basins off Alaska. Watt himself has said he does not think "the best interests of the nation would be served" by allowing smaller producers to enter the offshore sweepstakes by using bidding methods other than the straight, up-front bonus system that traditionally has favored major companies.

"It's beyond my belief that anyone in the industry would argue against an acceleration after all the delays of the past five years," says R. H. Nanz, exploration vice-president in Shell Oil Co.'s western operations. Adds Exxon's Garrott: "If you can't compete, get off the track."

A LITTLE SIMPLISTIC

But some oil executives do concede privately that the Reagan Administration's statements that added oil and gas production may result from stepped-up leasing has caused them to worry. "Some of the 'production, production, production' talk is a little simplistic," says one executive. Indeed, despite a frantic drilling pace both on and offshore since 1973, reserves of domestic oil have been falling, dropping to 27.1 billion bbl. in 1979, the most recent year for which figures are available, from 35.3 billion bbl. in 1973.

In federal offshore tracts, production of oil fell to 389.4 million bbl. in 1979 from 589.6 million bbl. in 1973. U.S. Geological Survey spokesmen say 1980 figures now being compiled will show another drop. Industry representatives note that even if substantial deposits of hydrocarbons are found in promising offshore areas, production probably could not begin before the mid-1990s.

Other, more pessimistic, forecasters say opening more territory for drilling may only demonstrate the need to develop nonoil energy sources. Says one consultant: "The myth that we can produce our way out of the supply crunch by freeing federal lands will be destroyed." But others say drilling is necessary, if only to find out exactly what the OCS has to offer. Says Richard Nehring, an analyst at Rand Corp.: "It seems prudent from the nation's viewpoint to find out what the extent of our hydrocarbon base is as quickly as possible."

Mr. Speaker, if Secretary Watt's accelerated leasing of the OCS will not simultaneously accelerate the exploration of production of domestic oil and gas, and if it will result in less than fair market value for the taxpayers who own this oil and gas, we must ask why the Secretary insists on proceeding in such a capricious and counterproductive manner. Neither the industry nor the taxpayers will truly benefit from this unrealistic program. The reason, if there is a sound one, escapes not only me, but the experts in the industry.

The decision to proceed with the highly controversial sale off California this week illustrated another serious shortcoming in Mr. Watt's approach to management of the OCS. He chided Governor Brown for parochialism in opposing the lease sale.

Yet Mr. Watt failed to note that virtually every elected official in California, from both parties, in Federal and State office, opposed this lease sale. The legislature approved AJR 19, which memorialized the Secretary to follow Secretary Andrus' pledge with withhold leasing from the four environmentally sensitive tracts, and to focus attention upon those offshore areas with the highest reserve potential.

Mr. Watt's intransigence might be understandable if it were only a choice between the environment and energy

needs. But it is not. The California tracts will produce a miniscule amount of oil and gas.

Mr. Watt's intransigence might be supportable if we had run out of produceable lands already under lease. But we have not. In fact, only 6 percent of the already leased OCS lands are in production.

Mr. Watt's intransigence might be understandable if accelerated leasing would expedite offshore oil development. But given capital, manpower, and equipment limitations, most of the newly leased land will lay idle, like 96 percent of the currently leased land.

And let us not forget that the acres which are leased but not produced do have a significant financial impact on the taxpayer, because they drive down the peracre bid, and result in a tremendous loss to the Treasury and the taxpayer.

Mr. Watt's decisions are based on the fiction that more leasing means more oil; it does not. It means more concentration in the oil industry, losses to taxpayers, long years of litigation, and in general, irresponsible management of the Nation's resources. The Congress has spoken out forcefully on the appropriate way to manage offshore lands. The Secretary has the obligation to follow that mandate.●

POLETOWN MOVE SUPPORTED

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. FORD of Michigan. Mr. Speaker, on Monday, June 1 the Washington Post printed a front page story about General Motors' efforts to locate a new assembly plant in Detroit. Unfortunately, the story provided a badly distorted view of GM's social responsibility and sensitivity, the attitude of Detroiters toward the new plant, and the effect of the plant on the community in which it will be located.

The story portrays GM as an invader, heartlessly destroying a small ethnic community and driving families from their homes and churches. In fact, General Motors' decision to build its new plant in the heart of Detroit's inner city was eagerly sought after by the city of Detroit, was applauded by the Catholic Church and the UAW, and is supported by the vast majority of Detroit's citizens. Far from being an invader, General Motors has had its world headquarters here for decades, and its new plant will house operations currently performed at another Detroit plant. The area chosen for the plantsite was not a thriving community; city officials selected the area precisely because it was sparsely populated, economically distressed, and formerly supported Chrysler's Dodge main plant, the closing of which last year cost the city 5,000 jobs.

Most residents of Poletown have supported the city's actions: 90 percent of the affected property owners sold their properties voluntarily. As the Post story related, most Poletowners had been anxious to leave the area for some time and were delighted with the city's compensation packages, which have been quite generous. I sympathize with those few residents who have resisted relocation, but to focus on their situation to the exclusion of the enormous good the GM project will do for Detroit and its people does everyone a disservice.

Two hundred and sixty-seven thousand people in the Detroit metropolitan area are currently unemployed. The city has seen a steady erosion of its tax base for more than a decade as hundreds of manufacturing plants have shutdown or relocated to the suburbs, other cities and other States. The ripple effect of plant closing has been well-documented. Depending on the industry, each manufacturing job lost in a community leads to the loss of one to three jobs in the retail and service sectors. The effects of this outmigration on the city's finances and services—and ultimately, on the quality of life of all of its citizens—have been harsh and obvious.

General Motors' decision to locate its new plant in the city is, thus, an extremely important reversal of a disastrous trend. It is no exaggeration to say that the new plant, which will employ between 3,000 and 6,000 people, is the most positive economic development for Detroit in 30 years. Coming in the wake of the Dodge Main closing and the recent Uniroyal tire plant shutdown, the new GM plant could hardly be more welcome or more desperately needed.

I personally feel compelled to correct the Post story's misimpressions and its implicit criticism of General Motors because for many years I have criticized GM and other corporations for their irresponsibility in dealing with the problems of economic dislocation. All too often when faced with the prospect of replacing aging facilities, American corporations have cavalierly abandoned the communities and the workers that have contributed to the business' success and profits in favor of rural areas where land is cheap and unencumbered by the restrictions of an urban environment or in favor of lower wage, lower tax areas and union-free environments. As a result, cities such as Detroit, New York, Cleveland, Buffalo, and St. Louis have seen their manufacturing base bleed away as their major manufacturers have expanded elsewhere and have gradually phased out their urban operations. Nearly all of the transportation industry plant closings in the past decade have occurred in Northern cities, while nearly all of the plant openings and expansions have occurred in the South, predominantly in rural areas.

Faced with the prospect of squeezing a modern manufacturing facility onto the site of an ancient seven-story factory located in a blighted inner-city neighborhood in a city whose finances are shaky, and in a State whose business climate has been unfavorably rated by the self-appointed experts on such matters, GM might have been expected to follow Nissan Motors to Tennessee or to choose a great empty tract of land near Houston. Instead, GM's management factored in their corporate responsibility for the future of their headquarters city and its people and made a decision that should be lauded by the media and emulated by the rest of corporate America.●

THE HAMILTON-VINTON METHOD OF REAPPORTIONMENT

HON. FLOYD J. FITHIAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. FITHIAN. Mr. Speaker, I rise to speak to H.R. 1990, a bill to reform the equal proportion method of apportionment presently in use to the more impartial Hamilton-Vinton method. Of the several methods of apportionment, I favor the Hamilton-Vinton method because of its impartiality, simplicity, and equity.

The method of equal proportion has denied several larger States equal representation, has ignored the ideal of one man, one vote, and has proved to be unduly complicated. Of the several alternative methods, the Hamilton-Vinton system is the most desirable.

I am pleased to submit for your examination a report explaining the importance and virtues of the Hamilton-Vinton method and the resulting necessity of the passage of H.R. 1990. This well researched and analytical report is entitled "Changing the House of Representatives Apportionment Formula from the Method of Equal Proportions to the Method of Hamilton-Vinton: A Justification." The report explains the Hamilton-Vinton method, as well as comparing it to the alternative methods of equal proportions, major fractions, and harmonic mean.

I am pleased to bring this excellent report to the attention of my colleagues and reprint the study in the CONGRESSIONAL RECORD:

CHANGING THE HOUSE OF REPRESENTATIVES APPORTIONMENT FORMULA FROM THE METHOD OF EQUAL PROPORTIONS TO THE METHOD OF HAMILTON AND VINTON: A JUSTIFICATION

For nearly forty years the assumptions of "fairness" justifying the current method of apportioning the House of Representatives have not been seriously challenged. In 1980, however, two mathematicians, M. L. Balinski and H. P. Young wrote in a Washington Post article that the method of equal proportion has "cheated the larger States, given undue representation to the smaller ones, and violated both the Supreme Court's one-man, one vote rule and the intent of the founding fathers."[1]

In addition to the charges of Messrs. Balinski and Young, an additional charge has been made against the method of equal proportions. It is unnecessarily complicated. The Congress does not need a formula that assigns seats in Congress on the basis of the geometric means of successive numbers.[2]

H.R. 1990 proposes a method of apportionment that was first proposed by Alexander Hamilton and whose chief sponsor in Congress was Samual F. Vinton (Whig, Ohio). This method, known today as Hamilton-Vinton, was used in various forms from 1850 to 1900. It is a method that is intuitively understandable, honors the concept of "quota" better than any other, is neutral in its impact on any group of States, and as much as any other imperfect apportionment method, meets the goal of "one person, one vote." Hamilton-Vinton better meets the needs of the Congress than any of its more modern competitors.

THE METHOD OF HAMILTON AND VINTON IS INTUITIVELY UNDERSTANDABLE

Reapportionment by Hamilton-Vinton is based on simple long division. Specifically in 1981, the U.S. apportionment population (U.S. population minus the District of Columbia) is divided by 435. The resulting quotient, 519,234 persons, is the "ideal" size congressional district in 1981. States with fewer than 519,234 persons receive a seat because the Constitution requires each State to have at least one House seat. Each State's population is then divided by 519,234. In most cases this results in a whole number and a fraction (such as 2.628). Each State receives the whole number of seats to which it is entitled and those States with the longer fractions get seats until the fixed House size (435) is reached.

The method of Hamilton-Vinton could be described as the method of largest fractions because it does not, as some people believe, give only those States over one half an additional seat. For example, if every State in 1981 is given a seat for a fraction larger than one half, the House will have 438 Members. In order to adjust the House size downward, the States with the smallest fractions over one half will lose seats until 435 seats are assigned. In some apportionment fewer than 435 seats are assigned if only fractions above a half are given seats. In these cases, the States with the largest fractions below a half will get seats until 435 is reached.

THE METHOD OF HAMILTON AND VINTON HONORS "QUOTA" MORE THAN ANY OTHER

Quota is important because it is a measure of fairness that is generally accepted. Should the States of California and Indiana with "quotas" of 45.584 and 10.574 respectively, receive the lower number of 45 and 10 seats, when the States of New Mexico and Montana get the higher number of 3 and 2 seats with "quotas" of 2.504 and 1.516? Simple logic would say no, but this is what happened in 1981.

The proponents of the method of equal proportions believe that it is acceptable for States with smaller quotas to take seats from States with larger quotas if it can be shown that proportionally the States with the smaller absolute quotas will be underrepresented in relation to the States with the larger absolute quotas.

In 1981 it works in this way. If New Mexico gets three seats, the average size congressional district in the State will be 433,323. Indiana's average with 10 seats will be 549,018. Expressed as a proportion, Indiana's average size district is 27 percent larger than New Mexico's average district. If, however, New Mexico's third seat is given to Indiana to make the assignment 11 and 2, then New Mexico's average size district becomes 649,984 and Indiana's 499,107. New Mexico's average size district then would be 30 percent larger than Indiana's.

Based on this comparison, the method of equal porportions gives New Mexico 3 seats and Indiana 10 because the proportional difference is greater (30 percent v. 27 percent) than if New Mexico gets 2 and Indiana 11. A similar relationship can be shown between California and Montana.

Proponents of Hamilton-Vinton contend that honoring true quota is more important than proportional differences. No other method (including other methods such as the method of harmonic mean, greatest divisors, and smallest divisors) better honors the concept of quota than Hamilton-Vinton.

THE METHOD OF HAMILTON AND VINTON IS NEUTRAL IN IMPACT ON VARIOUS GROUPS OF STATES

Officials at the Census Bureau and H.P. Young agree the Hamilton-Vinton is neutral in its impact on various groups of States.

Balinkski and Young contend that equal proportions is biased in favor of small States at the expense of large States. On an average, they say, small States are favored at a rate of 3.4 percent over time. Their measure of bias for 1980 shows that small States were favored at a rate of 7 percent.[3]

Their conclusions contradict a study conducted by the National Academy of Sciences in 1929, that concluded that equal proportions "occupies mathematically a neutral position with respect to emphasis on larger or smaller States."[4]

A comparison between assignments of seats by the method of equal proportions and the method of Hamilton-Vinton for the years 1960, 1970, and 1980, shows that States receiving seats under Hamilton-Vinton apportionments are larger than the States receiving seats under apportionments using the method of equal proportions.

TABLE 1.—COMPARISON OF ASSIGNMENTS OF SEATS TO STATES USING APPORTIONMENT METHODS OF EQUAL PROPORTIONS AND HAMILTON-VINTON 1960–1981[1]

State	Assignment by method of—		State "quota" of Representatives
	Equal proportions	Hamilton-Vinton	
1960:			
Illinois	24	25	24.559
Pennsylvania	27	28	27.576
Hawaii	2	1	1.542
New Hampshire	2	1	1.470
1970:			
Connecticut	6	7	6.51
Oregon	4	5	4.501
Montana	2	1	1.496
South Dakota	2	1	1.44
1980:			
California	45	46	45.584
Indiana	10	11	10.574
Montana	2	1	1.516
New Mexico	3	2	2.504

[1] The table shows only the States where there was a difference in assignment between the two formulas. A prospective analysis, based on population projections prepared by the Census Bureau in 1978, shows that Michigan with a quota of 17.62 would lose a seat to Nevada with a quota of 1.44 in 1990, and Ohio with a quota of 18.54 would lose a seat to Arkansas with a quota of 4.51 in 2000. These Census Bureau projections, Illustrate Projections of State Populations by Age, Race, and Sex: 1975 to 2000, Current Population Reports Series P–25. No 796, series II-c, should be considered illustrative not "actual." Similar Census projections have proven inaccurate in the past.

AS MUCH AS ANY OTHER IMPERFECT APPORTIONMENT METHOD, THE METHOD OF HAMILTON AND VINTON MEETS THE SUPREME COURT GOAL OF ONE PERSON, ONE VOTE

Since the"reapportionment revolution" of the 1960's congressional districts have been nearly equal in population within States. If congressional district boundaries could cross State lines, there would be no apportionment problem. All districts would be approximately equal (519,234 persons in 1981). Since this solution is not possible under the Constitution, any apportionment method will result in unequal district populations among the States.

Recognizing the practical impossibility of equalizing districts among the States, which method best meets the "spirit" of one person, one vote?

Proponents of equal proportions argue that "proportional differences" in the average district sizes among the States should be the primary criteria for judgment.

It is argued that a smaller State is "hurt" much more by taking a seat and giving it to a larger State than the other way around. A greater proportion of that State's population will be underrepresented in the House than if the larger State loses a seat to the smaller one.

The method of Hamilton-Vinton compares the absolute number of people who are "missrepresented" rather than the proportion of a State's population "misrepresented." For example, in 1981, the total number of persons who would be "underrepresented" or "remainders" if the whole number is assigned and the fractions are rejected is

[1] Balinski, M. L. and H. P. Young. When House Seats Shift, Fractions Count. Washington Post, November 30, 1980. p. D5. Balinski and Young have also published articles in mathematical and political journals advocating a change in the apportionment formula.

[2] The method of equal proportions assigns seats in the House by the following comparison. "State A deserves an additional representative when its population divided by the geometric mean of its present assignment of representatives and of its next higher assignment, is greater than the population of any other State divided by the geometric mean of the assignment to such other State and its next higher assignment." Lawrence F. Schmeckebier. Congressional Apportionment. Washington, The Brookings Institution, 1941. p. 5.

[3] Described in a meeting with Congressional Staff by H.P. Young held at the Library of Congress January 9, 1981.

[4] U.S. Congress. Committee on Post Office and Civil Service. Subcommittee on Census and Statistics. The Decennial Population Census and Congressional Apportionment. Appendix C. Report of the National Academy of Sciences Committee on Apportionment. Report No. 91-1314., 91st Cong., 1st Sess., July 20, 1970. Washington, U.S. Govt. Print. Off., 1970. p. 21.

This study was conducted before modern computing machines were invented. The National Academy Committee apparently was unable to test its conclusions about "neutrality" of equal proportions apportionments.

shown in Table II for California, Indiana, Montana, and New Mexico.

TABLE II.—NUMBER OF PERSONS "UNDERREPRESENTED" OR "REMAINDERS" RESULTING FROM REJECTING THE "FRACTIONS" OF QUOTA AND ASSIGNING THE LOWER WHOLE NUMBER OF REPRESENTATIVES IN 1981

State	Quota	Persons included in the "fractions" or "remainders" if the fractions are rejected in the apportionment
California	45.584	If 45 seats are assigned 303,233 are in the "remainder."
Indiana	10.574	If 10 seats are assigned 298,040 are in the "remainder."
Montana	1.516	If 1 seat is assigned 267,925 are in the "remainder."
New Mexico	2.504	If 2 seats are assigned 261,694 are in the "remainder."

The absolute number of people who are underrepresented is reduced if the larger fractions are rounded up and the smaller fractions are rounded down.

As described above, rounding Montana's and New Mexico's fractions up and California and Indiana's down means a smaller proportion of those State's populations will be underrepresented than the reversal.

Members of Congress represent people, not proportions of State populations. The method of Hamilton-Vinton comes closer to the ideal of "one person, one vote," than equal proportions.[5]

THE METHOD OF HAMILTON AND VINTON BETTER MEETS THE NEEDS OF CONGRESS THAN ANY OF ITS MODERN COMPETITORS

The fundamental argument against the Hamilton-Vinton method of apportionment is that it is subject to the "Alabama" and "population" paradoxes.

The Alabama paradox was discovered in 1880 when Alabama lost a seat when the House was increased in size from 299 to 300. This paradox, in which a State may lose representation for no other reason than the House size is increased, is not an issue in 1980. The size of the House is not increasing.

In fact, the House size has remained fixed at 435 since 1911 (except for the years 1959 to 1962 when the House was temporarily increased in size to 437 to accommodate the admission of Alaska and Hawaii). As long as the House size remains fixed, there will be no Alabama paradox.

The "population paradox" has been variously described, but in its modern form (with a fixed size house) it works in this way: It is theoretically possible that if two States are gaining population from one census to the next, State "A" which is gaining population at a rate faster than State "B" may lose a seat to State "B." This paradox happens very rarely in actual apportionments, but data can be "cooked" by statisticians to demonstrate it.

The major apportionment formula alternatives to Hamilton-Vinton, equal proportions, major fractions, and harmonic mean, were developed to eliminate the possibility of the Alabama paradox. They also are not subject to the population paradox.

Each of the methods other than Hamilton-Vinton have flaws. Equal proportions and harmonic mean are unnecessarily difficult to understand. Equal proportions is biased toward small States. Harmonic mean and major fractions are biased toward small States, but to a lesser degree than equal proportions. All these "modern" methods violate "quota" more often than Hamilton-Vinton.

The major fairness argument against Hamilton-Vinton, the Alabama paradox, will never be an issue so long as the House size remains fixed. The population paradox will occur very rarely, and may never happen. The virtues of easy understandability, honoring quota, unbiased impact on groups of States, and meeting the goal of "one person, one vote," are compelling fairness arguments for changing the apportionment formula from equal proportions to the method Hamilton and Vinton.●

[5] Another method, the method of harmonic mean, equalizes the average size of congressional districts among the States. In 1981, there would be no difference in the apportionment between equal proportions and harmonic mean.

DAN ROSTENKOWSKI

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. MOAKLEY. Mr. Speaker, this morning's New York Times has an excellent article on DAN ROSTENKOWSKI's contributions to the tax legislation which I want to share with my colleagues. DANNY has been working feverishly to put together a tax package that can pass the House and which will bolster the economy. Those of us who feel that the Kemp-Roth plan will lead us down the road to ruin are waiting for an alternative which we can support. DANNY is one of the most skillful negotiators in this body and I am confident that the tax plan which is reported out of his committee will be the best package offered to us. As he says, "I never start a fight that I don't fight to win."

The article follows:

ROSTENKOWSKI: TAX PRAGMATIST

(By Hedrick Smith)

WASHINGTON.—Representative Dan Rostenkowski is a big, broad-shouldered, gregarious politician from the school of Chicago's late Mayor Richard J. Daley. In his youth, he had a chance to play big league baseball but chose politics instead. Like most athletes and politicians, he is often fired by the will to win, but never more than now.

With the special pride of a new chairman of the House Ways and Means Committee who has long had an eye on becoming Speaker of the House of Representatives and with Democrats still smarting from the humbling defeat they suffered on the 1982 budget, Mr. Rostenkowski has turned every effort to finding a formula for victory on tax legislation.

Characteristically direct, he told the Democrats on the Ways and Means Committee yesterday, "I never start a fight that I don't fight to win." Shrewdly, he has taken his time gauging friends and foes before putting his personal stake today on a composite two-year tax bill.

For weeks he has cast himself as the man in the middle on tax legislation, tugged one way by President Reagan and conservative Democrats, tugged the other way by his good friend, House Speaker Thomas P. O'Neill Jr. and the liberal Democrats. When Mr. O'Neill complained on Monday that the three-year, 25 percent individual income tax cut discussed by President Reagan was "a lemon" and "a windfall for the rich," Mr. Rostenkowski kept open the door to compromise with the Administration.

For his political predicament personifies the dilemma of the House Democrats today. How could he strike a deal with a popular conservative Republican President without going too far in giving up Democratic principles and the traditional Democratic constituency or, if no deal could be made, how could he fashion an alternative attractive enough to prevent such major defections to the President that the Democrats would look like a shattered party in their last major stronghold, the House of Representatives?

From the outset, the political arithmetic has been difficult for Mr. Rostenkowski and the House Democratic leadership. For more than two weeks, knowledgeable Democrats have said that if President Reagan could hold the 190 House Republicans in line for his original proposal for a 30 percent, three-year-cut—or for a 25 percent fallback plan put forward by conservative Democrats, the President could pick up 30 Democratic votes enough to win a tax vote.

"Danny's problem," said another senior House Democrat, "has been—do you want to join a winning combination with the President or is the price the Administration is asked too high and you'd rather offer a Democratic alternative that you probably don't have the votes to pass."

Some liberal Democrats like Mr. O'Neill, Representative Richard Bolling of Missouri, House Rules Committee chairman, and Representative Thomas J. Downey of Long Island, urged a Democratic alternative that drew a sharp distinction with President Reagan by sticking to a one-year tax cut aimed at stimulating business investment and tilted to favor low-to-middle-income brackets.

OPPOSED DEMOCRATIC ALAMO

But Mr. Rostenkowski's aides said he was opposed to staging "a Democratic Alamo" and suffering another shattering defeat. He preferred to mold a consensus package to lure back some of the conservative Democrats being so ardently wooed by the White House. As a veteran of 11 terms in the House, he met early yesterday with 11 members of the conservative Democratic faction before going to work with his committee and the whole House Democratic caucus today for a two-year bill.

"He wants a bill he can take from the committee and take to the floor and win," said one Rostenkowski aide.

"He's met the White House exactly halfway," commented Jim Wright of Texas, the House Majority leader. "Not a one-year bill or a three-year bill, but a two-year bill. The 15 percent rate cut he's announced is half of what the President originally wanted," he said, and it will save $60 or $70 billion in budget deficits by leaving off the third-year tax cut."

To some Democrats like Richard A. Gephardt of Missouri and James R. Jones of Oklahoma, the Democratic tax package helps Democrats advance a fresh political argument on economic policy, namely that they are no longer the party of big spending but the party of fiscal prudence intent on reducing Federal deficits, while Mr. Reagan's economic policies threaten big inflationary deficits.

Although Mr. Rostenkowski has occasionally touched on such themes, he seems to think more in terms of forging a winning

consensus with pragmatic appeals to all segments of the faction-splintered 242 House Democrats. "This is a pretty pragmatic piece of legislation," said a Rostenkowski aide. "There's less tax philosophy to it than political realism."

Winning and losing, or at least making a strong showing, has personal as well as party implications for Mr. Rostenkowski. Although he shies away from any discussion of long-term ambitions to become Speaker, other Democrats say privately that his handling of this tax bill is being watched by others and will undoubtedly have a bearing on any hopes for leadership positions.

Had he not had a tiff with former Speaker Carl B. Albert, at the Democratic convention in 1968, Mr. Rostenkowski might be Speaker today. Last December, he passed up a chance to become House whip, and put himself on the ladder to the Speaker's post, to take his current job as Ways and Means Committee chairman.

According to friends, he did that primarily at the urging of Mr. O'Neill and Mr. Wright. "He and Tip are two of a kind—experienced, Catholic, ethnic politicians from big cities," said an aide to Mr. O'Neill. "They play golf together. They vacation together with their wives. They're good friends."

REAGAN'S STYLE PRAISED

Ideologically, Mr. Rostenkowski is more conservative than Mr. O'Neill, an old-fashioned New Deal liberal. He has a reputation for liking and getting along with political adversaries like Barber B. Conable Jr., the upstate New York Republican, or Treasury Secretary Donald T. Regan. Publicly, he has praised President Reagan's style in the White House.

Pragmatism, realism and consensus are hallmarks of the 53-year-old Chicago veteran. A Democrat who has watched him closely calls him "an old wolf among the French poodles," meaning that he practices the give-and-take reward and punishment style of traditional big-city machine politics among the newer breed of young, independent and publicity minded suburban Democrats.

"Rosty's a behind-the-scenes guy," observed Representative Morris K. Udall, the Arizona liberal. "He's practical. He's not flashy publicly, but he'll work hard to find a way through the thicket. You don't see him on TV shows or making speeches. He's a worker."

"He's a very tactile politician," said another. "He moves in close, uses his hands—to gesture, to put a hand on a shoulder. He makes it very personal."

Others, across the spectrum, praise his patience in drawing them into consensus. "He gets everyone involved—in shirtsleeves," observed Mr. Gephardt. "He makes it very collegial. He's strong on saying, let's talk it out. Let's communicate and let's not have any surprises," he added. "He's very strong on keeping your word."●

FALLACIES OF THE SUPPLY-SIDE SOLUTION

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. BARNES. Mr. Speaker, President Reagan's tax proposals have started a national debate on what kind of tax cuts and savings incentives the country really needs. We need to work to insure public understanding of the choices which confront Congress and the administration, so that decisions can be made with public support that goes beyond simply requests to "support the President all the way."

One of my constituents, Dr. Roy Lindgren, of Rockville, Md., has made a constructive effort to contribute to debate on the tax cut issue. He has analyzed some of the arguments behind the drive for massive across-the-board tax cuts and pointed out quite clearly what the fallacies are.

I submit his excellent analysis, "Supply-Side Solution," for the information of my colleagues as we begin the difficult task of finding some intelligent consensus on tax legislation this year.

SUPPLY-SIDE SOLUTION

The supply siders don't seem to have turned many people into believers during the first round of discussions. Admittedly, the theory that upper and middle income taxpayers will channel their proposed tax savings into the kinds of investments which will create jobs and produce goods and services does seem to fly in the face of logic and reality.

For starters, most wealthy taxpayers have their incomes well shielded in the myriad of tax shelters established by a benevolent Congress over the years. I once suggested to a wealthy friend that he donate some land to carry out a worthy project since he could then take the donation as a tax deduction. He patiently explained to me that this would not be something he could really consider doing because he paid no income taxes at all. Just suppose, however, that this "taxpayer" did decide to invest his tax cut money in something other than some more tax shelters. When the prime rate was rising he would probably be into money market. When the prime topped out he would shift to T bill futures. Et cetera. It is possible, then, that he might pay more income taxes after the tax rate is cut but let's not automatically assume that his investments would be the kinds that create jobs or produce more goods.

It's all academic, in any event, because there aren't enough wealthy people in the country to prime the economy pump even if they were all inclined to pitch in and help. Our only hope is to somehow induce middle income taxpayers by the tens of millions to provide the billions in capital needed to put the economy into high gear and keep it there. But, again, a tax cut by itself will not make it happen. For example, take someone earning $40,000 a year and in the 37% tax bracket. Paid about $7800 in Federal income taxes last year. Gets a tax cut of $780 a year—fifteen dollars a week if this taxpayer is on a payroll deduction plan. Hardly enough to rush out and buy a new car and help put a laid-off autoworker back on the job. The only way this trickle of money from an individual taxpayer can ever help the economy is if it goes into a savings account where it can be pooled with the savings of others and then loaned to people who want to buy houses or cars and to entrepreneurs who create jobs and produce goods and services. And what are the chances of this happening? We already know the answer. Americans are just not oriented toward saving anymore. Why would it be otherwise when Congress has (1) hiked the inflation rate by decades of fiscal tomfoolery, (2) held down the interest rates on pass-book savings accounts, and then (3) taxed that interest as income. As a result of all this, the old faithful savings accounts of the 40's and 50's have become the "losing accounts" of the 70's and 80's. You deposit $1000 in a pass-book account for a year, collect the interest, pay taxes on the interest, and at the end of the year what you have left is worth maybe $930. Talk about inflation being caused by too many dollars chasing too few goods; if you are going to lose money by "saving" it, what else is there to do with your money except to go out and buy something—anything. This is not a form of inflation psychology as some economists would have you believe. It is simple, straightforward logic. Turn the situation around so it makes more sense to save than to spend and people will follow that logic.

The one tax change which would restore real incentives to our system and make supply side economics work would be to scrap the present counterproductive income tax laws and go to a simple gross income tax. Since this will be a long time coming, our best hope is to get from Congress right now a massive spending cut package, an accelerated depreciation package, and tax changes which will transform "losing accounts" back into savings accounts. Specifically, we need to eliminate all taxes on the first $2,000 in interest paid on pass-book savings accounts ($4,000 for married couples). Then, and only then, should any other tax cut even be considered.

We need to reestablish in this country a way to save that makes sense to the masses of people for whom certificates of deposit are either impractical or impossible. If we can get people by the tens of millions to start lining up at pass-book savings windows again, the results will be electrifying. Nothing could do more to stimulate the lagging auto and housing industries, which are stimulants, in turn, to so many other elements of the economy. Let's give it a try. We have nothing to lose but our stagflation.●

RESOLUTIONS OF THE AF ABN CONGRESS

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. GREEN. Mr. Speaker, I would like to submit for the RECORD the resolutions of the Congress of the American Friends of Anti-Bolshevik Bloc of Nations, Inc. (AF ABN).

The Congress was held at the Roosevelt Hotel in my district in New York City on May 2 and 3, 1981; 156 delegates from 23 national groups representing nations currently under Soviet domination participated. I was happy to attend a portion of this event last month, and hope my colleagues will find the AF ABN's thoughts on foreign policy objectives to be of interest.

AF ABN CONGRESS RESOLUTIONS

Whereas the Soviet Russian imperialism and colonialism—following in the footsteps and even exceeding tsarist Russia in brutality and ruthlessness—has subjugated a

whole range of countries—in Europe, Asia, Africa, and even in Latin America—and most recently—after Angola, Ethiopia, Southern Yemen, Mozambique, Vietnam, Cambodia, Laos—has invaded Afghanistan, thus demonstrating once again that it unchangeably strives for world domination:

Whereas the policy of co-existence, detente, and the NATO's efforts of keeping the balance of power in the world, have in fact been detrimental to the military balance and beneficial to the Bolshevist Russian empire and her further conquests in the Free World;

Whereas the continuation of detente policy would soon lead to the conquest of the oil-producting countries of the Near and Middle East and to the seizure of natural resources of Africa, thus denying them to the West and to the Far East, and thereby forcing the Free World to capitulate to the Bolshevik aggressors:

Whereas the military superiority in various aspects of the Communist Russian empire over NATO and the Free World seems to have been achieved, thus creating a real threat of thermonuclear annihilation;

Whereas the Communist Russian aggressors, taking advantage of this superiority, of new conquests, and the present geopolitical and strategic situation disadvantageous to the West, are brutally trying to destroy by Stalinist methods, the national liberation movements of the nations subjugated within the USSR, by mass arrests of patriots and human rights activists sentencing them to long and harsh terms of imprisonment in jails, concentration camps, phychiatric wards, and banishment to the Arctic regions, by pursuing a cruel policy of all-pervasive Russification, subversion, uprooting and destruction of national cultures of the subjugated nations, resorting also to murders of national liberation fighters and religious leaders;

Whereas the Russian Communist economic system after 60 years of harsh experimentation has proven to be a complete failure and produced man-made famine and starvation of the masses in the enslaved nations.

The Conference of the AF ABN resolves:

1. to appeal to the Governments of the USA and NATO member countries to end the unrealistic policy of detente and balance of power which has brought disastrous results for the interests of the West and the entire Free World, and instead to initiate a policy of liberation of the nations subjugated by Russian imperialism and Communism.

AF ABN expresses its firm conviction that the US Government under President Ronald Reagan will recognize the importance of the national liberation struggle of the nations subjugated by Russian imperialism and Communism for the survival of America and the Free World and will make every effort to implement the US Congress (86-90) Captive Nations Resolution of 1959, signed by President Eisenhower, and consequently will support the national liberation fight of Ukraine, Byelorussia, Lithuania, Latvia, Estonia, Georgia, Turkestan, Czechia, Slovakia, Albania, Armenia, Azerbaidjan, North Caucasus, Idel-Ural, Rumania, Hungary, Bulgaria, Croatia, Poland, Vietnam, Cambodia, Laos, Cuba and other nations subjugated by Russian imperialism and Communism for their national independence and human rights.

2. to appeal to the US Government to render every possible assistance to the heroic people of Afghanistan in their war of liberation against Moscow's aggression so as to bring about the expulsion of Russian occupation troops from Afghanistan, thus strengthening the national liberation struggle not only of the Islamic nations incarcerated in the USSR but also of all the nations subjugated by Bolshevism within the Soviet Union and in the so-called satellite countries who yearn for the downfall of the atheist Bolshevist empire and its dissolution into national independent democratic sovereign states, within their ethnographic boundaries.

3. AF ABN appeals for support to the forcefully divided nations, such as Germany and Korea, in their efforts at reunification in freedom and justice.

4. AF ABN supports the rightful demands of Japan to its territories seized by Russian imperialists in the aftermath of World War II.

5. AF ABN forcefully voices the opinion that the Helsinki Accords of 1975, being the only act passed after World War II recognizing the status quo of the Russian conquests, the integrity of the Russian empire and the inviolability of its frontiers, barring any intervention of the Free World on behalf of the nations subjugated by Russia, should be declared null and void, the more so as even the human rights provisions have not been honored by Moscow.

6. AF ABN commemorates the sad 40th anniversary of deportations of thousands of innocent people from the Baltic States and other territories occupied by Russia as a consequence of the Infamous Nazi-Soviet Pact.

7. AF ABN condemns the new Soviet Constitution which, under the terminology of a "sovereign Soviet people" posits the Russian nation as a super nation, where Russians are the masters who collectively support the chauvinist policies of unlimited Russian supremacy and pull down the subjugated nations to the level of slaves. AF ABN notes that the Soviet Constitution includes as a constitutional obligation, aggressive wars of the Russian empire under the mask of "an active all-round support of national liberation revolutionary movements and social revolutions" in the name of "proletarian internationalism."

8. AF ABN commemorates the 25th anniversary of the Hungarian Revolution and simultaneously condemns the bloody Russian suppression of the struggle for national independence of the Hungarian nation.

9. AF ABN condemns forced Russification and other forms of national oppression, which in effect amount to the destruction of the languages, cultures and traditions and finally to the genocide and annihilation of entire nations subjugated by Russia, carried out by the intermixing and resettling of national groups on a vast scale, forcible deportation of millions of people from their native countries, colonization by Russians of the territories of the enslaved nations; Russification is a crime against the universal culture of mankind, its barbarization because it is aimed at the destruction of the rich mosaic of national cultures which guarantees the progress and development of world culture.

10. AF ABN calls on the US government to demand the implementation of the UN resolution on decolonization, in view of the fact that the last remaining empire, the Russian empire under the form of the USSR, continue to maintain its imperio-colonial system trampling over the Resolution "on the granting of independence" to the nations subjugated by it.

11. AF ABN calls upon the US Government and all free nations to develop a wide psychological and political campaign in favor of the freedom and independence aspirations of the Captive Nations against Russian Bolshevist imperialism and Communist tyranny, to stop all economic and technical aid to the Communist states, and instead to support national liberation movements of the subjugated nations, potential allies of the West, who are trying to break up the Russian empire from within, thus presenting a possible alternative to the nuclear war.

12. The AF ABN appeals to the US Government and the Free World public opinion to exert a constant and concerted pressure on the Communist regimes for the liquidation of concentration camps and psychiatric prisons, for the release of national, political and religious prisoners of the subjugated nations and, in particular, for the discontinuance of the Communist Russian practice of murdering political, cultural and religious activists and particularly fighters for national and human rights. Among others, an action for the release of the Ukrainian patriot Yuriy Shukhevych, son of the late Commander-in-Chief of the Ukrainian Insurgent Army (UPA)—General Roman Shukhevych, and Victoras Petkus of Lithuania—is strongly urged.

13. AF ABN condemns Moscow's intrigues in Latin America, its attempts by the hands of its Cuban and other puppets to subvert this continent and expresses its support to the US Government policy in defense of the friendly government in El Salvador which is under a vicious attack of Marxist-Leninist bands supported by Moscow and its Cuban underlings.

14. AF ABN notes with satisfaction the present US Government's firm resolve to counter the unrelenting arms build-up and the spread of the military threat of Communist Moscow throughout the world by strengthening the military might of the USA and of the Western Alliance and by extending moral and material support to the non-Communist governments friendly to the West.

15. AF ABN expresses its support to the US Government's efforts to combat terrorist activities frequently encouraged, assisted and abetted by Moscow or its client States.

16. AF ABN greets the Ukrainian nation on its 40th anniversary of the proclamation of the re-establishment of Ukrainian sovereignty on June 30, 1941, which presented a challenge to the two biggest military powers of that time—Nazi Germany and Bolshevik Russia, thus initiating a prolonged two-front war of liberation against both imperialist totalitarian invaders, and also greets the Ukrainian national liberation movement with the Organization of Ukrainian Nationalists (OUN) at the head, which was the initiator and organizer of Ukraine's fight against Nazism and Bolshevism. With profound respect we greet Hon. Yaroslav Stetsko, the Prime Minister of Ukraine of 1941.

17. Considering the very tense situation in Poland which draws much attention of the international public, the AF ABN expresses its solidarity with the Polish people's aspirations for freedom and democracy.

18. AF ABN condemns the totalitarian regime in Rumania as Moscow's stooges who do not represent the striving for freedom and national independence of the Rumanian people.

19. AF ABN demands that the problem of Russian Communist colonialism be officially made a concern of the United Nations as were the problems of colonialism of the Western powers, and that the liberation or-

ganizations of the nations enslaved by Moscow be granted similar status as is enjoyed by the PLO.

20. Commemorating the 70th anniversary of the founding of the Republic of China as the first republic in Asia, we underline the urgent need for the new defense weapons system for the Republic of China in order to secure the safety of the Western Pacific. We should like to mention that the US Government is obliged to supply a new weapons system to the Republic of China in accordance with the Taiwan Relations Act passed by the US Congress.

21. AF ABN welcomes President Reagan's view that human rights belong on the agenda every time America negotiates and hopes that the Administration will fully support the cause of the nations under Communist oppression for human rights and national independence. In this context, the AF ABN is encouraged by the appointment of Secretary of State Gen. Alexander Haig and Assistant Secretary of State Dr. Ernest Lefever for Human Rights and Humanitarian Affairs.

22. AF ABN appeals to the American information media—the press, radio and television—not to ignore the struggle of the nations enslaved by Russian Bolshevist imperialism for their national and human rights, for freedom and independence. Also, it urges the mass media not to ignore the holocaust of oppressed nations for tens of millions have been murdered in Gulag Archipelago or starved to death through man-made famines, but continuously and conscientiously to inform and educate the public about these problems, considering also the fact that many millions of US citizens have close ties with countries of origin presently behind the Iron Curtain.●

ST. FRANCIS COMMUNITY HEALTH CENTER

HON. FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. GUARINI. Mr. Speaker, for anyone born in Jersey City, N.J., as I was, it is impossible to talk of health care and healing without thinking immediately of St. Francis Community Health Center. For more than a century this friendly, efficient hospital has touched the lives of the entire Jersey City community.

St. Francis Community Health Center of Jersey City will be dedicating a magnificent new wing to its medical care complex on Sunday, June 7, 1981. This is a very significant event in our community. Historically, because this modern 10-story structure will stand on the sight of the original hospital which began its full-time service to the community in 1889. Socially, it is important because this new wing continues the tradition of compassionate public service and dedicated health care that has become synonymous with the Franciscan Sisters of the Poor who began their service to our city in 1864 and who will be honored by having the new wing known as the Franciscan Pavilion.

Mr. Speaker, the dedicatory ceremonies for the Franciscan Pavilion will not only be a moment to honor the physical structure of this building—the glass and concrete and steel—but it will also be an opportunity to join in rejoicing with the people whose spirit and selflessness epitomize the community leadership this medical facility so admirably represents. Among the honored guests and dignitaries will be Bishop Jerome A. Pachillo, who will deliver the dedicatory address; Thomas A. Schember, president of the St. Francis Community Health Center; Sister Rose Margaret Delaney, the past president of the community service board; James F. Boylan, chairman of the board of trustees; Frank Rienzo, M.D., president of the hospital medical staff; Sister Marylin Fischer, president of the community service board; Hon. Paul Cuprowski, president of the city council who represents Jersey City Mayor Thomas F. X. Smith; and Kalman J. Fortoloczki, executive vice president of the St. Francis Community Health Center. The health center leadership have also extended to me the honor of participating in these ceremonies, an opportunity to which I look forward with the greatest of personal pleasure.

Mr. Speaker, for 117 years the Franciscan Sisters of the Poor and the St. Francis Community Health Center have meant hope and healing to the people of Jersey City. It has always been a place of deep emotion engraved in the memories of so many of us. It is a place where babies were born and loved ones have departed this life, a place where a young child in the emergency room received a warm smile along with a bandage and immediately began thinking of growing up to be a surgeon, a place where a whispered prayer in the chapel gave you the blessing of good news or the grace to accept bad news, a place where bodies were healed and spirits renewed.

Mr. Speaker, as it was in the past, so it is today.

St. Francis has always been a place of pride and progress. From its small beginning with 12 beds in a two-story frame house to its presence today as a modern five-building medical complex, St. Francis has always been vital to the neighborhood and to the overall economic growth of downtown Jersey City.

St. Francis was a cornerstone in the early development of our city. And 20 years ago when this area teetered on the brink of terminal urban blight, St. Francis—against all the odds—began construction of its new school of nursing and sparked the rebirth of the surrounding neighborhood. New housing soon followed—new industries moved in—and the downtown area is again on its way to becoming a great place to live and work and do business.

Mr. Speaker, the St. Francis Community Health Center is a good neighbor. This magnificent new wing has the very latest in equipment and services and yet it has been designed to blend beautifully into the historic district in which it stands thus preserving the character of the neighborhood.

St. Francis has been a good neighbor to the business community, too, bringing jobs into the area with a corresponding boost to local shopping and providing employee and executive health services to nearby business and industry.

In the future, with its modern facilities and progressive programs, St. Francis will undoubtedly continue to bring good health to the city and all its residents. The people of Jersey City admire and respect St. Francis—its sisters, trustees, administrators, doctors, nurses, and dedicated employees—and cherish all that they have meant to all of us over the years.

The dedication ceremonies for the new Franciscan pavilion of the St. Francis Community Medical Center will give all of Jersey City an opportunity to celebrate the continued vigor of a beloved part of our community, and an opportunity to say a public "thank you" for the years of faithful service.●

ENERGY CONSERVATION PAYS

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. MILLER of California. Mr. Speaker, an article in the June 2, 1981, Washington Post has dramatically illustrated the present and future potential of energy conservation in the United States. For years, many of us in the Congress have argued that conservation is the fastest and least expensive way to reduce our consumption of foreign oil, and an important step in reducing the inflationary effect of oil prices on the economy. For years, we in the Congress have insisted that an investment in conservation would have a shorter payoff period than a traditional investment in large energy-generating facilities. Numerous studies from influential organizations have recommended conservation as an essential part of our national energy picture.

Despite our pleas for strong conservation action, most utilities across the Nation continued to insist that the demand for electricity was going to grow every year, and new nuclear or coal plants were the only way to meet that demand.

Now utilities are beginning to see the light, and are finding out that conservation can pay for them, and for their customers. A reduction in energy

use can prevent unnecessary costly investments in billion-dollar energy plants, and can slow down the growth in customers' energy bills. I am greatly encouraged by the aggressive actions of a few utilities in this area, particularly Pacific Gas & Electric Co., and hope that other utilities across the country will realize that a barrel of oil saved is as good, if not better, than a barrel of oil produced.

[From the Washington Post, June 2, 1981]

NEW POWER PLANTS POSTPONED OR CANCELED

A NEW ENERGY STRATEGY—CONSERVATION

(By Jay Mathews)

LOS ANGELES.—Sunset Ford's 13 acres of glistening automobiles used to gleam like a Hollywood movie premiere under arclights at midnight, a publicity and security device that helped make brightly lit car lots a symbol of Southern California.

In the last few months, however, Sunset Ford, with the encouragement of its local electric utility, has gone pitch dark at closing time. It has cut its use of electricity by 38 percent and installed radio-controlled switches on its showroom air conditioners, all symbolizing an unprecedented enthusiasm for conservation that is spreading to utilities and their customers all over the country.

Some West Coast utilities estimate that conservation has saved from 5 to 10 percent of their total electrical output. Others say they have been able to cancel or postpone plans to build new power plants because they were no longer considered essential—because of conservation.

West Coast utilities, hardest hit by oil price increases and new constraints on nuclear power, have been the quickest to embrace new ways of saving energy. Portland General Electric Co. in Oregon has insulated nearly 16,000 electrically heated homes in the last three years, charging the owners nothing until they eventually sell the houses.

Pacific Gas and Electric Co. in Northern California has arranged low interest insulation loans for more than 23,000 homes. Southern California Edison has adjusted pumps on 100,000 swimming pools to reduce their drain on the system during peak daylight hours, a crucial matter in the conservation movement.

Eastern utilities have also begun to experiment. The New England Electric system has produced a plan to reduce its use of foreign oil from 73 percent to 10 percent in 15 years. The company proposes to conserve energy through such measures as remote control, switch-offs on some consumers, burning trash to generate electricity and distributing 500,000 steel discs to cut hot water use in showers in half.

The Tennessee Valley Authority has eagerly offered no-interest loans for home insulation to its customers. The Dallas Power and Light Co. began last month to offer large electric bill credit to customers who replaced boken down air conditioners with more efficient models.

The New England system found the decline in demand so great it decided it could scrap plans to build a huge nuclear plant at Charlestown, R.I., where they had been stymied in acquiring land anyway.

Pacific Gas and Electric ceased attempts to reopen a small nuclear plant near Humboldt, Calif., when it saw how successful the conservation effort seemed to be. The company also delayed by five years plans for a huge coal-fired plant in Solano County that would have provided enough energy to serve a city of 1.5 million people.

Although it is difficult to estimate how much conservation measures have saved nationwide, companies with the most aggressive programs put the amount at about 5 to 10 percent of their total output.

Pacific Gas and Electric Co. said it utilized the equivalent of 14.6 million barrels of oil in what would have been wasted energy in 1980, enough to provide 49,000 homes with electricity for 10 years.

Well-organized environmental groups on the West Coast have something to do with the surge here towards conservation, but several utility executives and economists say the principal motive is money. While America's consumers have been turning off lights and adjusting thermostats because of rising electric and fuel bills, utilities have seen the potential profits from building new power plants evaporate because of high interest rates and new environmental restriction.

Conserving power, in many areas, has become cheaper them building new plants.

"The utilities look at it as dollars and cents," said Paul Greiner, a vice president of the Edison Electric Institute which represents investor-owned electric utilities. "If they can see a pay-back in one or two years, they'll do it."

Higher prices to consumers, said University of Wisconsin's economist Charles Cicchetti, have caused per capita use of natural gas to decline in recent years and per capita use of electric power to hold steady.

But in many areas, particularly California and the Pacific Northwest, Cicchetti said, "the utility cost is more than the price they can charge under regulations, so they are losing money on marginal sales, and conservation makes a lot of sense."

Some utility executives say the change has influenced what kinds of people seek jobs with them. Few top engineering graduates interested in construction work seek out utilities, because utilities can no longer afford to build new power plants. But applications from college and university graduates with interest and some training in conservation planning have multiplied rapidly. "We got 500 applications for one position," said Jim Mitchell, a spokesman for Southern California Edison.

Contractors are also adjusting rapidly to the changes. Prices have gone up for insulation in the Palm Springs area, where Southern California Edison has begun to offer no-interest loans.

The Tennessee Valley Authority had to alter its rules for no-interest insulation loans after home builders began to sell customers new houses at a discount without insulation and suggest new owners seek a TVA loan to finish the job.

In the Washington area, utilities say they have not been hit by an energy crunch quite as hard as on the West Coast and have not found the potential savings from conservation great enough yet to justify expenses such as subsidized loans for insulation.

The Virginia Electric and Power Co., however, has already reduced its projected peak demand for 1987 by 3,600 megawatts—the equivalent of four large generating plants that would have cost $7 billion.

Everard Munsey, a former Arlington County Board member now working for Vepco, said the company was encouraging conservation through higher rates in summertime, free inspections of homes to determine where insulation is necessary, guidance to builders on producing more energy-efficient housing and a program to encourage some industrial customers to generate their own power through use of steam and combustible by-products that are now wasted.

The company is also experimenting with remote-control water heaters, which could be turned off briefly during peak demand daylight hours by a radio signal or a signal sent over the electric power line itself.

Marcia Schnedler, a spokesman for Potomac Electric Power Co., said the utility does not plan to build a new power plant for at least 10 years. Pepco also is experimenting with radio-controlled water heaters and air conditioners and has begun to charge its largest customers a premium for power used in peak hours.

Cutting demand at peak hours reduces the need to build new plants at high interest rates, a principal stimulus for many of the utilities' conservation efforts.

"We're not as innovative as the West Coast utilities," Schnedler said, "but we are in a different position than they are." Pepco grew rapidly in the 1950s and 1960s; the growth in customers has slowed now. The company also initiated several conservation measures during the 1974 oil crunch that appear to have reduced the necessity for more conservation now.●

SUPPORT FOR THE PRESIDENT'S TAX CUTS

HON. TOM RAILSBACK

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. RAILSBACK. Mr. Speaker, while this country is currently focusing on the ongoing discussion between the administration and the members of the Ways and Means Committee regarding what kind of a tax cut Congress will offer the people of this country, I would like to take this opportunity to express my strong support for our President's tax cut proposal.

I have been convinced of the need for a substantial tax rate reduction to ease the tax burden on this Nation's people, and to reinvigorate the economy for a number of years now. Now a tax cut is needed more than ever, especially since it is a major component of the President's program for economic recovery.

Federal personal taxes on each family have nearly quadrupled over the past 15 years—growing from $1,500 for an average family in 1965 to $5,500 in 1980. This increase has been the result of the interaction of high inflation with our present tax system, which pushes individuals into higher and higher marginal tax rates.

The time has come for Congress to act to substantially reduce these tax burdens, and to try something different in our fight against inflation. I have heard from thousands of concerned constituents who support the President's program, and while they are pleased with Congress action on

the budget, they are stressing the need to also enact his tax reduction proposals.

Mr. Speaker, I commend the President for his efforts to bring down inflation and to revitalize the economy, and I urge the majority Members of the House to give his proposals a chance, and to join me in supporting his tax cut proposals.●

SUPPORT PUBLIC BROADCASTING

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. MARKEY. Mr. Speaker, shortly the House will vote on the public broadcasting authorization for fiscal years 1984 through 1986. I strongly feel that public broadcasting is one of America's most important and unduplicated cultural resources. I urge my colleagues to share in my commitment to public broadcasting by supporting H.R. 3238, offered by Mr. Wirth, when it reaches the floor. The following editorial which appeared in the Boston Globe on Sunday, May 31, articulately and convincingly explains why public broadcasting must be supported:

[From the Boston Globe, May 31, 1981]

PUBLIC TV'S PROMISE: I

Public television has been in a state of crisis since its inception as educational television 30 years ago. It has never had enough money. It has never had enough support. It has never had enough political clout. For years critics have damned it as an elitist institution that spends tax dollars frivolously on programming that fails its public.

Now prophets and doomsayers are predicting the beginning of the end. They maintain that public television can't survive the accountants in Ronald Reagan's Washington or the new technology—cable, cassettes and videodiscs—on the horizon.

The truth is public television is good at what it does. It is no more elitist than the public library. It has evolved and grown over the years, but it is hardly a medium still in search of its mission. For all its failings, for all its weaknesses, it comes close to E. B. White's prescription. "TV should be providing the visual counterpart of the literary essay, should arouse our dreams, satisfy our hunger for beauty, take us on journeys, enable us to participate in events, present great drama and music, explore the sea and the sky and the woods and the hills," White wrote in 1966. "It should be our Lyceum, our Chautauqua, our Minsky's and our Camelot. It should restate and clarify the social dilemma and the political pickle."

Commercial television, with its emphasis on ratings and lowest common denominator programming, occasionally fulfills its public responsibility, but more often fails with a nightly menu of the lascivious and the inane. In E. B. White's dispensation, commercial television presents a rare moment of Lyceum-like distinction amid hours upon hours of jiggling from Minsky's, with or without machinegun fire.

Public television has aroused our dreams. It has carried viewers to ancient Rome, showed them life behind the Iron Curtain, presented a stunning dramatization of "Pride and Prejudice," to name a few examples. It introduced some to the mores of Edwardian England, reintroduced others to Fred Astair's genius and enabled all to bear witness to worlds of Jacques Cousteau, Pablo Picasso and that brave young man who suffered the tragic effects of thalidomide poisoning.

Public television informs, entertains and enlightens. In keeping with its original name, it also educates. And irritates. It can be inefficient, uneven, stubborn, whimsical but it basically serves the country the same way public libraries do—by making its resources available to all Americans.

This week Boston's Channel 2, one of 286 stations that are part of the larger system, is holding its annual auction in our livingrooms. This ritual gives its viewers a chance to imagine what television would be like in this city without the relief provided by WGBH. This week is an appropriate time to make a national commitment to public television. The country can not afford to let it fail anymore than it can afford to watch libraries, schools and parks squandered by those who believe the private sector is the only source of America's inspiration and its amenities.

Channel 2 began as a modest offering of the Lowell Institute along with the area's museums and universities. These institutions have been generous and imaginative, but they too must face the distractions brought about by inflation and the changing demographics of their clientele. That is why WGBH as a Boston cultural landmark and public television as an American institution faces a chancy future in an age of rigid lais-sez-faire politics.

The strongest economic case against public television has been made by those who argue that the private sector in the form of cable television will kill it. The wake began last winter after one of the cable systems purchased the rights to all BBC programming. BBC programming has been important, even critical, to PBS's ability to attract audiences. BBC offerings represented quality and saved production costs, but they made up only three to four percent of public television's programming schedule. They were available free to any viewer who tuned in.

Many doubt that cable can deliver diversity and quality as promised. Radio was praised as the technical innovation that would bring Mozart to the masses. Then television was the technical innovation that would enrich lives and lift civilization. Lawrence Lichty, a communications professor at the University of Maryland, and others believe that the new technology will be dragged down by its commercial nature in the same way radio and television have been.

"The new video media, for their part, will be subject to the very same market forces that shaped radio and television broadcasting." Lichty wrote in the winter edition of the Wilson Quarterly. "While the audience may have more choices, the proportion of quality programming appearing on the home screen will not be much different than it is now."

If that's the case, the future looks grim.

In January the Reagan Administration recommended in a transition team report that the federal government withdraw all financial support from public television: "There is no more basis for the federal government to play a leading role (in supporting public television) than there is for the government to play a similar role in the publication of novels or textbooks or in theatrical productions."

That declaration brought public broadcasting's public out to fight. Since then, the Administration modified its position and called for budget cuts instead. Congress held off its efforts to rescind funding already appropriated for public television under the forward funding scheme that was initiated in 1975 after Nixon Administration attempts to dictate program content. Still, drastic slashes are proposed for the future.

There can be no doubt that public television is truly public. Its audience is not a monolithic, affluent, college-educated group that can afford $28 tickets for orchestra seats that many believe it to be. Voters in Rep. Brian Donnelly's nonelitist district in Dorchester, Brockton and Quincy opposed cutting public television's budget in a survey taken last winter. "Sesame Street" lives in every neighborhood.

According to a 1980 Nielsen report, more than 46 percent of all American households tune into public television once a week. Households with incomes of less than $10,000 and homes headed by individuals with less than high school education have increased by almost third in the past five years, and minority viewers are represented in numbers that parallel their percentage of the population.

Without public television, these viewers and others might not have had the chance this past week to see an anguished documentary about a Vietnam veteran who believes his life was ruined by the war, a balanchine ballet, Nova's exploration of the sense of touch, the Philadelphia Symphony, McNeil-Lehrer's unraveling of the Italian political situation and what is without doubt the best children's programming available.

Public television can not survive without some economic security. During this year's nationally coordinated fundraising campaign in March, viewers pledged nearly $27 million to participating stations, a 29 percent increase over 1980. Although viewer support is crucial, it can't make up the difference between what public television needs and what the government is currently willing to provide.

Right now PBS administrators, politicians, policy makers and regulators are investigating proposals that would streamline public television's structure and make it possible to raise revenues in new ways. They must succeed.

The 1979 Carnegie Commission declared that "public broadcasting tried to invent a truly radical idea, an instrument of mass communication that simultaneously respects the artistry of the individuals who create programs, the needs of the public that forms the audience and the forces of political power that supply the resources." That it has come close is an exceptional accomplishment that has served the country well.●

EXIMBANK CUTS ARE FALSE ECONOMY

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. BONKER. Mr. Speaker, as we wrestle with the choices that are the result of the administration's economic program, it is a good exercise to separate those parts of the program that will truly help the economy from those facets that are mere public relations.

I believe the cuts in the Eximbank fall into the latter category; if we are really concerned with economic recovery, we cannot ignore our export potential. As a country we are in an extremely competitive credit war with our foreign competitors who subsidize the export of goods, particularly the big ticket items. For us to slash Eximbank authority amounts to unilateral disarmament.

Mr. C. W. Borklund, the publisher of Government Executive magazine has an excellent commentary in the upcoming issue that separates some of the myths from the realities of Eximbank funding. I recommend it to the attention of my colleagues.

EXIMBANK: ADMINISTRATION ECHOES OF OLD IGNORANCE

The distinct impression was left, at least in this corner, that when a majority of the voters booted Jimmy Carter and a batch of left-leaning "Liberals" out of Government, one result was supposed to be a new Administration that wanted to work with U.S. industry to grow the economy. Indeed, it said as much when it moved into the White House.

However, on one subject—funding for the Export-Import Bank—the new leadership has demonstrated, to date, that it is at least as anti-Business, anti-export expansion as the "Carter Kids" were. And, just as they did, bragging about its ignorance in the bargain.

The central theme on which the Reagan Administration has based its recommendations for cuts in EximBank funding (cuts averaging about $1 billion per year over the next three years) is that the Bank "devotes too much of its direct-loan funds to assist just a few fat cats" of U.S. industry in making sales overseas. That thesis bleats out of the White House and is echoed by an array of alley cats on Capitol Hill.

Specifically named as the "fat cats" have been seven of the larger exporters for 1980, viz. Boeing Airplane Company, Westinghouse, McDonnell Douglas, Combustion Engineering, Lockheed, AT&T's Western Electric and General Electric. What is there in the mental makeup of these elected and appointed bureaucrats that inspires them seemingly always to want to penalize industrial, free-enterprise success and reward failures?

These Administration indictments of the "fat cats" are, in fact, simple minded. True, the seven named companies were leaders in export activity, that part of it which included EximBank loan and/or loan guarantee participation. True, also, that they signed their names to the contracts, assuming responsibility for making sure that what was bought by the overseas customer worked.

What is also true—and ignored by this Administration as it was by the last one—is that those seven companies are not just seven companies. When Boeing makes an airplane, for example, more than half the parts and components which go into that aircraft are bought by Boeing from a supplier/subcontractor network of 1,306 major and 2,247 small and minority business firms located in a total of 44 States.

Westinghouse used more than 1300 subcontractor-suppliers in furnishing components for a nuclear power project where it is prime contractor (and for all practical purposes, today it is the only U.S. contractor in that international market.) On a typical 500 megawatt, coal-fired boiler project, Combustion Engineering will use more than 3,000 subcontractor-suppliers.

Point is, while these large firms do make the commitment to a foreign buyer, about half the total sales really benefit not them but literally thousands of suppliers all over the country. Those, mostly small, firms would not be involved in exports at all if the "big boys" weren't willing to take the full risks, including pulling together the "big bucks" necessary to finance large capital-goods export items and/or projects.

Some other hard-nosed facts about the EximBank, per Bank Director Don Stingel:

"The concentration of EximBank use by a relatively few large exporters is consistent with the U.S. exporters, themselves. Only about 100 firms, roughly 1.5 percent of all U.S. exporters, account for 50 percent of all U.S. manufactured exports and only 10 percent of all exporter firms account for 75 percent of such exports."

"EximBank is not (his emphasis) a taxpayer-supported subsidy. It has made a profit in every year of its 47-year existence—has disbursed some $35 billion in direct loans during that time and written off only $8.3 million (.02 percent) in loan losses."

"In the past two years, through EximBank, the United States has provided only about 47 percent average officially-supported cover in aircraft-sales cases and 65 percent cover in non-aircraft cases; loaned at 9.25 percent and 8.75 percent respectively for the two categories."

By contrast, "Other OECD (Organization of Economic Cooperation and Development) nations typically offer 85 percent cover on export financing after a 15 percent cash payment with interest rates of 7.75 percent to developing countries, 8.5 percent to intermediates and 8.75 percent to so-called 'rich' countries."

Why don't Vice President George Bush's and Budget Director Dave Stockman's "fat cats" finance the sales, themselves? First off, because none of them are in the banking business. Secondly, as a part of that, if Dave Stockman has learned to add and subtract by now, he knows you can't borrow money at 18 percent and then loan it out to a customer at 8 percent without pretty quickly going bankrupt. (The Federal Government has been doing this routinely for years—and that's why Reagan was elected.)

Indeed, thanks to the frontal attack on EximBank by present Administration leaders—all the while claiming "it is the policy of this Administration to encourage domestic economic growth and expand exports"—some $1.069 billion in potential exports, 34 cases put on EximBank's credit docket just between mid-February and mid-May, are wiped out if the Administration's proposed "cut" in EximBank's budget is approved by Congress.

For that matter, the possible sales, in some cases, are already in jeopardy because the customers are getting tired of waiting for an EximBank answer. The sales potential ranges from aircraft to locomotives to power plants to electronic switching systems to teleprinters, even to tugboats.

The new Administration proposed this EximBank "expenditure" cut in order to help "sell" its other cuts to Capitol Hill. It was a dumb choice to support the thesis of, "See, Big Business is getting cut, too." It was dumb for lots of reasons, not the least of which is that money put into EximBank is an investment, not a cost.

The Administration ought to do what it said it was going to do, i.e. concentrate on helping U.S. industry regain it share of the capital-goods export market. As long as other countries, notably Japan, Germany and France, continue to subsidize their exports with loans at extremely favorable interest rates, terms and cover—and even blend aid and financing—we must have a strong, well-funded, stable, reliable Export-Import Bank if we're to compete.

Repeatedly, over the years, Congress has mandated that EximBank "aid in financing and facilitating exports" and "foster expansion of exports—thereby contributing to the promotion and maintenance of high levels of employment . . . and to the increased development of the productive resources of the United States."

The present White House occupants have echoed those sentiments—then acted the opposite. The destruction of the EximBank is nothing more than a public relations program designed to impress political novices.●

NEW CHALLENGES TO THE FINANCIAL INDUSTRY: COMMENTS OF ANTHONY M. SOLOMON, PRESIDENT, NEW YORK FEDERAL RESERVE BANK

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. FAUNTROY. Mr. Speaker, a few weeks ago, the president of the New York Federal Reserve Bank, Anthony M. Solomon, commented in a speech before the Investment Association of New York on the changes that are confronting the banking system and the difficulties that these changes portend for the central banking authority of the United States. I'd like to share those comments with my colleagues because I believe that they are among some of the most concise statements of the issues which are facing us in the economy today.

THE TIME HAS COME TO REEXAMINE GLASS-STEAGALL

My experience as an observer and participant in the formulation and execution of public policy suggests to me that a policy issue passes through four identifiable stages during its life cycle. These stages are logically distinct, although they tend to overlap in practice.

In the first stage some set of forces in the real world acts to upset the status quo. In

economic and financial matters these forces usually originate in the market, although technological, social, and political forces often play a part. These forces build to such an extent that some market participants have an incentive to act in a way which disturbs the status quo. When enough market participants have incentives to act in this way the very viability of the status quo is called into question.

This inaugurates the debate stage in the life cycle of a policy issue, in which various parties study the issue, advance possible courses of action, and discuss their ramifications. Gradually, some degree of consensus on a desirable or acceptable course of action emerges, and the issue moves on to the third stage, that of decision.

In the decision stage some accepted source of authority, for example, the Congress or the financial regulation agencies, adopts new rules which reflect the course of action developed in the debate. Finally, the issue reaches the stage of implementation, in which a new status quo is developed, which will remain in place until a new set of market or other forces sets the cycle in motion again by requiring changes in the new status quo.

I believe that there is persuasive evidence that with regard to the Glass-Steagall policy issues of the structure of the American financial system we are now substantially into the first stage. The status quo appears to have been disturbed, and we are entering the stage of debate.

The Glass-Steagall Act, now almost fifty years old, sought to create institutional barriers between specific classes of activities in U.S. financial markets. The Glass-Steagall legislation addressed the allegation that the combination of investment and commercial banking within a single firm led to unsound banking practices and contributed to the financial collapse of the Great Depression. In particular, it was argued that a bank may be tempted to underwrite long-term securities of a firm and foist them on an unsuspecting public in order to take itself out of a short-term lending relationship with that firm. Hence, the prohibition on commercial bank underwriting or distribution of most securities. Correspondingly, no firm principally engaged in these activities was permitted to accept deposits. Moreover, the two types of business—commercial and investment banking—could not be combined under the family umbrella of affiliated companies. Indeed, some of the most notable financial houses of the era were forced to split off their commercial and investment banking wings.

The Glass-Steagall Act created a status quo which endured relatively intact until fairly recently. Investment and commercial banking in the United States, separated by Glass-Steagall restraints, developed distinct product lines and modes and traditions of conducting business.

Economic, financial, and technological pressures in recent years have begun to combine as a force for change of that familiar status quo. Examples of investment bankers' incursions into activities traditionally associated with commercial banking abound, as do examples of commercial banks' engaging in activities traditionally the province of investment banking firms. Of course, each merger or acquisition or new undertaking has its individual motivations, related to businessmen's calculations of profit potential, stock market conditions, current regulatory attitudes, and other factors. But the number of examples suggests that they may also share some motivations in common.

Money market mutual funds are the most commented-upon examples of the erosion of traditional distinctions between commercial and investment banking. Money market funds originated largely because of the regulatory restraints on depository institutions, particularly the rate of interest they may pay on savings and transaction accounts, currently limited to 5¼ percent, for example, on NOW accounts. Since short-term assets currently yield substantially higher rates, depository institutions could, in principle, pay higher rates to their depositors than regulations currently permit. And those institutions such as money market funds which are not subject to deposit interest rate ceilings do currently offer substantially higher rates.

Brokerage houses are having phenomenal success offering this financial product, which provides the household with a market rate of return and a high degree of liquidity. From the customer's point of view, many of the services of the money market fund are perfectly substitutable for the services provided by a demand deposit at a commercial bank. Apparently the freedom from reserve requirements and deposit interest rate limitations which permits the high yields more than compensates many customers for the absence of FDIC deposit insurance and some of the flexibility of the traditional checking account. Money market fund assets currently stand at over $115 billion, up more than $60 billion in one year, and over $40 billion just since January. The largest money market fund, with $17 billion in assets, would rank among the 15 largest banks in the country if it were a commercial bank.

Several other instruments are also being developed in the marketplace which, from the consumer's point of view, are similar to those traditionally available only at commercial banks but which yield market rates of return. Merrill Lynch, for example, offers a cash management account which permits the household to write checks against a marginable brokerage account. In addition to checking access, the account holder is issued a VISA card which draws on the liquid assets in the account or the borrowing power of the securities in the account.

Merrill Lynch provides a wide range of financial services to its customers, including brokerage and real estate services. Thus, the firm is in a position to contact customers from one of several markets and use that relationship to introduce them to a wide variety of other services. It can service its 2.5 million customers' accounts through a worldwide network of over 750 offices.

The proposed acquisition of Bache by Prudential will permit the cross-selling of Prudential's insurance services and Bache's brokerage services, including money market funds. Prudential currently provides insurance services to many millions of people.

The proposed acquisition of Shearson Loeb Rhoades by American Express would provide the same kind of opportunity to permit customers to obtain a wide range of financial services from a single source. Press reports on the proposed merger indicate that Shearson and American Express share this vision of what the market will demand. And the potential is remarkable, considering that American Express as a travel and consumer credit company already has a network of 1,000 offices in 26 countries and 11.9 million cardholders worldwide while Shearson has 275 offices in the United States and 18 abroad. Together they will be able to offer financial services which are not limited by product or geography, as commercial banks are, to millions of existing and potential new customers.

In a further incursion of financial firms into the commercial banking business, the Fidelity Group is seeking a trust company in Boston which would offer cash and investment management, computerized record-keeping and internal control systems. To satisfy the legal technicalities of Glass-Steagall, it would not offer checking services or take deposits unrelated to its trust business. Shearson has also announced its interest in a trust company in Massachusetts.

There are advantages to both the customer and the brokerage house in providing all financial services through a single firm. The broker is able to demonstrate how his entire array of financial services can be useful to his customers, thus selling services of which the customer would not have been aware had he dealt with a single product firm. The customer, in turn, can avail himself of all his options while incurring minimal costs of searching out new service providers and maintaining multiple relationships.

Commercial banks, of course, have also been seeking to expand their product lines. The Supreme Court has recently upheld the Federal Reserve Board's determination that serving as an investment advisor to a registered open-end investment company is a permissible activity for a bank holding company. Commercial banks began pushing into the private placement market in the early 1970's and have been seeking Congressional authorization to expand their municipal bond underwriting powers to include revenue bonds. VISA is investigating the possibility of establishing a money market mutual fund using its relationship with the holders of 64 million VISA cards in this country to reduce the cost of its selling job. The VISA card could potentially be used to access funds from a customer's account.

It is enlightening to view this as an effort by a commercial bank-related organization to offer non-deposit liabilities to the household sector. These instruments would not be subject to reserve requirements, deposit interest rate limitations, or FDIC deposit insurance—factors which have been closely linked to the definition of deposits for many years.

The pressures we are experiencing on the boundaries between commercial and investment banking have arisen out of the stresses caused by the change in market environment from that which supported the status quo created by Glass-Steagall.

The fact that high inflation, high nominal interest rates, and variability in both played havoc with the traditional regulatory structure in the 1970s is well known. Investors have come to perceive an incentive to act quickly upon their judgments that interest rates have reached temporary high or low points, and borrowers have learned to structure the type and maturity of their flotations to reflect market conditions. Consumers and businesses have learned that remaining liquid has strong advantages in this kind of market environment. As a result, there has been an increased demand for one-stop financial services on the part of both providers and users of funds to facilitate rapid switches in financial strategy.

In an environment in which there is a premium for proper timing, both households and firms are demanding integrated financial firms. This demand has the potential to

be satisfied because technology is now available to execute transactions nearly instantaneously. Improvements in computer and telecommunications technology have reduced the cost of supplying precisely the kind of flexibility customers are demanding.

The developments in the financial services sector and the forces which are impelling them have, I believe, profound implications for commercial banks, investment banking firms, and the regulatory authorities, including the Federal Reserve.

Inflation, inflation-consciousness, and technological changes have provided the impetus for the development of financial service conglomerates which appear to be meeting the market's test of efficiency in fulfilling household and business needs for a broad range of financial services. Experience and evidence indicate that households and businesses are not waiting for regulatory changes. They are developing institutions that meet their needs, cleverly circumventing regulatory impediments when they can, bypassing over-regulated industries when they must. But, Government regulation can mold and guide markets. Thus, the benefits of Government regulation can be preserved through regulatory flexibility and periodic overhaul of the regulatory apparatus to conform to over-riding market realities and the needs of the times. I believe the evidence warrants our contemplating the need for such an overhaul in the permissible powers of commercial and investment banking contained in statutes such as the Glass-Steagall Act.

If this assessment is correct, then what topics should be covered in the debate about possible changes in Glass-Steagall?

One topic that must surely be included in the debate is the potential for conflict of interest and abuse. As I mentioned, this feature weighed heavily in the original design of the Glass-Steagall restraints in the 1930s, and concerns along these lines must be dealt with in any reform measure today. Additionally, there is a concern that the multiproduct financial firm will be able to force customers into unfair tie-in sale arrangements.

It may be that these concerns remain sufficiently valid to reaffirm the separation of commercial and investment banking functions. Alternatively, it may be that developments in disclosure requirements and other aspects of securities laws since the early 1930s will be found to have allayed our concerns when we examine the matter.

A further concern is whether relaxation of the Glass-Steagall restraints would result in an offensive concentration of economic and financial power. The supermarket approach to financial services creates a mental image of a few large financial conglomerates dominating the financial markets. However, I believe that at the present time it is difficult to determine whether a relaxation of Glass-Steagall would increase the number of suppliers of financial services or increase market concentration. Relaxation would increase the number of potential entrants into both the banking and brokerage industries but whether all entrants or existing participants would survive is an open question. Experience with statewide banking and other innovations in recent years suggests that smaller well-managed banks that are truly involved in their communities can do very well even against direct competition from much larger organizations. The related questions of industry structure and the options of local customers constitute an important topic for consideration in the Glass-Steagall context.

In the complex society in which we live, the very size and breadth of a universal financial services firm may be a source of some concern. If such an institution experienced financial distress it might be necessary to provide public sector support to avoid significant risks to financial market stability. If so, there may be merit in giving explicit consideration to what support mechanisms are warranted, under what circumstances they should be invoked, and how they should relate to traditional mechanisms such as deposit insurance, the provision of liquidity through the Federal Reserve discount window, and so forth.

At the very least, the debate about reform of Glass-Steagall will have to consider appropriate antitrust standards. Competitive analysis of commercial banking markets has for many years concentrated on bank deposits. In a world in which nonbank competitors and even banks themselves offer increasing amounts of the functional equivalents of deposits, new measures and new doctrines will be needed.

It is important to recognize that the pressures I have been describing on the Glass-Steagall prohibitions need to be related to our attitudes toward the geographic restrictions placed on commercial banking by various state laws, the McFadden Act, and the Douglas Amendment to the Bank Holding Company Act. Without reducing the need to consider liberalization on the geographic front, I think we must consider to what extent the viability and prosperity of commercial banks depends upon their ability to compete across a wider range of financial products.

Another topic which must be covered in the debate about Glass-Steagall is the assessment of economic costs and benefits of financial market integration. The evidence is quite strong that market participants see cost savings in one-stop financial shopping. Surely the basis for this perception is that information is expensive, and the investor who can reduce this cost is in a better position to deal with the uncertainty of the economic environment. However, we have not yet quantified the benefit that society would obtain in the form of lower capital costs from any relaxation of Glass-Steagall. Careful analysis needs to be undertaken of the relationship of the financial structure to economic growth; savings, investment, and productivity; and the ability to start and expand new businesses. Additionally, to make intelligent choices we should refine our sense of the potential costs in terms of institutional transition, increasing financial risk, and possible conflicts of interest and other abuses.

In the course of the debate, studies on these matters need to be conducted to facilitate intelligent choices. We have seen the beginnings of such analyses, related primarily to municipal revenue bond underwriting, but much more remains to be done. It is important to recognize that there are likely to be many qualitative dimensions which will need to be factored into the analyses to refine the conclusions which may be drawn from the more quantifiable elements.

The debate about Glass-Steagall will also have to consider the question of how to assure prudential supervision of universal financial product firms. In the case of commercial banks, those investment banking activities deemed unsuitable have historically been prohibited. Thus prudential supervision of the banking system could focus on the traditional problems in commercial banking—credit and liquidity risk. If banks' powers were extended, we would have to develop methods of detecting conflicts of interest and other imprudent practices which might be associated with relaxation of the Glass-Steagall prohibitions. I am confident that examination procedures could be revised and extended to meet these demands.

The more difficult matter, I believe, would be devising and applying level playing field concepts of supervision to bank and nonbank participants in the financial services sector. Such an exercise appears necessary to prevent disparities in requirements from arbitrarily affecting the competitive balance among firms and industries. But it would not be easy. The attempt to bring all firms which offer third-party payment services, for example, under a common set of rules would probably stir up analytical and political battles even more heated than the ones we have just been through in trying to level the playing field among member and nonmember commercial banks and thrift institutions. Yet our concern for the integrity of the financial system requires that we address this matter.

This effort would be made even more difficult because the Glass-Steagall separation between investment and commercial banking has been paralleled by structural separation between the relevant federal financial agencies, including the SEC and the bank regulators. As the powers and activities of investment and commercial banking organizations overlap, the need for harmonization of the approaches of the different government agencies grows. Such harmonization can be difficult to achieve, but it is not impossible, as the record of the Federal Financial Institutions Examination Council shows. Some attention should be given in a debate on Glass-Steagall as to how best to organize the financial regulatory agencies to provide equitable and effective prudential supervision of financial service providers.

Finally, I believe it is essential that the analysis of Glass-Steagall reform include discussion of the implications for the efficient and successful pursuit of monetary policy goals. The policy priority on inflation control is, properly, so great in the current environment that the Federal Reserve and others must consider carefully the implications of the development of new financial instruments and organizational forms. The monetary policy techniques in use in the United States are tailored to a specific institutional structure. Rapid changes in this structure could compound the problems of implementing monetary policy. In a review of Glass-Steagall, therefore, prudence requires that we consider what effect possible further changes in financial institutions would have on our ability to monitor and control the relevant monetary quantities in the effort to assure a stable and prosperous financial and economic climate. The discussion should also consider whether possible modifications in monetary policy techniques might be necessary to assure our continued ability to do our job if the financial structure is to be significantly changed.

The marketplace is proceeding to restructure itself, so the commencement of our efforts to study what actions government should take should not be long delayed. I am not trying to prejudice the outcome of the debate about Glass-Steagall, nor do I have a specific decision or plan of implementation to recommend at this time. I do, however, believe that it would be desirable to commence a comprehensive, dispassionate review of this issue expeditiously. I believe this would benefit the various compo-

nents of the financial sector and the public they serve. Otherwise, a new financial structure may develop which does not satisfy our goals with regard to avoiding conflicts of interest and undue concentration of economic power and achieving maximum economic efficiency, prudential supervision, and effective conduct of monetary policy.●

NASHVILLE'S POSITIVE RESPONSE TO ATTEMPTED DESTRUCTIVE ACT

HON. WILLIAM HILL BONER

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 4, 1981

● Mr. BONER of Tennessee. Mr. Speaker, the attempted bombing of the Temple, a Jewish house of worship in Nashville, Tenn., and the WSM television tower on May 25 shocks the sensibilities of all decent people in the society. When the criminal element of a community is allowed to prevail the rights and freedoms of all its citizens are endangered. I wish my colleagues to know that the residents of Nashville will not accept racial bigotry and religious discrimination. The actions of the agents of the Treasury Department and the work of the Nashville media prevented what would have been a disaster of great magnitude.

Our Nation is based on the principle of freedom of religion. This basic first amendment right must be protected at all costs. We must make the society safe from factions which seek to undermine this freedom. Morris Werthan II, president of the Jewish Federation of Nashville & Middle Tennessee, and Ernest Freudenthal, vice chairman of the community relations committee of the Jewish Federation, eloquently expressed the outrage at this assault on their personal freedoms and beliefs.

I herewith submit this statement and urge my colleagues to take a moment to review this commentary on the events that transpired and the swift reaction and response by the Nashville community to this travesty.

We find the threat of violence against any citizens of our community deplorable. The attempted attack on a Jewish house of worship is contrary to all traditions of our country. The manufacture, transport, and placement of an explosive device posed a threat not only to the temple, but to the safety of all Nashvillians. The Jewish Federation appreciates the actions of law enforcement officials and is fully behind their continued efforts to find and prosecute any who may be involved in these acts of hatred and violence. The rapid and effective response of Federal agents and Metro and Belle Meade police demonstrates that a climate exists in Nashville which condemns hate groups and their lawless activities. The public statements, particularly of Gov. Lamar Alexander, Mayor Richard Fulton, Police Chief Joe Casey, and the editorial policy of the Nashville Tennessean, have served to help shape this climate. The concern public officials have shown for the safety of all Nashville citizens is to be commended. The attempted bombing of the temple was not planned to be a single act, which is reprehensible in itself, but a prelude to a concerted attack which subverts every principle of American democracy. It is a criminal act which threatens all people. It is ironic that the attempted bombing was planned for Memorial Day, a day dedicated to the memory of those who died to protect America's freedom.●

MEDICARE REFORM PACKAGE

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. PEPPER. Mr. Speaker, I introduce for appropriate reference four bills to amend, reform, improve, and extend certain aspects of the health insurance program for older Americans, popularly known as medicare. These bills carry out the recommendations of the House Select Committee on Aging in its Report No. 96-245 released on November 17 of last year entitled "Medicare After 15 Years: Has It Become a Broken Promise to the Elderly?"

The first bill that I am introducing would delete the so-called part A hospital coinsurance payment which requires senior citizens, who are hospitalized consecutively for 60 days to begin paying $51 a day toward their hospital stay beginning with the 61st day of such stay.

The second bill would amend the Internal Revenue Code to create a tax deduction for physicians who agree to accept assignment of claims from medicare on behalf of each and every senior citizen they treat in their offices.

The third bill would create a new part C of medicare which would cover eye care, hearing care, dental care, out-of-hospital prescription drugs, and routine physical checkups every 2 years. This program would be voluntary and essentially self-financing.

The fourth bill would provide a financial incentive in the form of an income tax deduction to help preserve the extended family concept and encourage families to care for their elderly relatives in their own homes.

Our report, upon which these four legislative measures are based, is the result of numerous hearings held by our committee on the subject of health care needs of the elderly since it became operational in 1975. The report was an attempt on our part to analyze medicare; to learn what were its successes and what were its failures and what we might do to improve the program. One major component of the report is the summary of a hearing by the committee on July 30, 1980, the 15th anniversary of the enactment of the medicare program. Among those testifying on that date were former HEW Secretary Wilbur Cohen and former House Ways and Means Committee chairman, Wilbur Mills. These two men were among the principal architects of the medicare program.

In addition to analyzing hearing testimony, our report reflects excerpts from correspondence which our committee received concerning medicare from senior citizens in virtually every part of the Nation. Our committee asked all congressional offices to save their complaints about medicare and forward them to us for a period of 1 month. We solicited the views of experts in the academic community and sent thousands of questionnaires to hospitals, nursing homes and other health care providers. Our report reached a number of conclusions as enumerated below.

First, the overwhelming conclusion of our report is that medicare has been a great success. Senior citizens are comfortable with the program and grateful for its benefits. They are comfortable with the notion of paying taxes in their younger years so that they might benefit in their old age when they need it most. Another strong contributing factor to the program's success is the fact that its benefits are universally available to all—it is not a means-tested program available only to the poor. It is this notion of vested interest—the right to health care coverage and universal entitlement—which are medicare's strongest points. The committee could find no support for the idea that medicare has been a dismal failure and no one could be found who advocated that the program be abolished.

Second, the overwhelming acceptance of the medicare program by the elderly has been eroded somewhat by the perception that medicare's benefits have been rapidly shrinking. The committee evaluated this question and found that there is some misunderstanding among senior citizens who mistakenly assume that medicare will pay for 80 percent of their health care costs. This misconception aside, medicare is paying for less of the average senior citizen's bill then it did a few years ago. Medicare had been paying about 50 percent of the per capita health care cost of the elderly shortly after enactment whereas it is paying for about 40 percent of their bills today. In looking at the data our committee concluded that much of these cutbacks involved shifting costs to the medicaid program and thus to the

shoulders of the States. Our committee found that medicaid, the Federal-State grant-in-aid program suffers from a negative image among older Americans who look at it as a handout for indigents rather than a program of entitlement.

What this really means is that every year it costs the elderly more and more to participate in the medicare program through increased premiums, deductibles and coinsurance, while medicare pays less and less of their medical bills. While their medicare coverage decreases, health costs have continued to skyrocket. Caught between these twin buzz saws, elderly persons are finding that their golden years have become years of anxiety. They live in desperate fear of getting sick, of going broke, of going into a nursing home, going on welfare or becoming dependent on their loved ones. All of us have received letters from older Americans who have asked us for some redress to this problem.

Third, our committee was able to pinpoint the principal problems with medicare. Senior citizens reported being fairly satisfied with part A of medicare which pays for the expenses of a stay in a hospital. Part A is available to all seniors and is funded by a payroll tax paid by employers and employees. Senior citizens reported a significant number of problems with part B of medicare. Part B is a voluntary program. The elderly elect whether they want to participate in it or not. The program pays for 80 percent of the reasonable charges for services rendered by physicians. Some 97 percent of the aged who are covered under medicare part A also sign up for part B. To do so, they must agree to pay a monthly premium of $9.60 a month—$11 as of July 1, 1981. The principal problem with part B relates to whether physicians agree to "accept assignment" due to medicare's less than generous fee structure.

The law gives physicians the option, under part B, to either: (1) not accept assignment, and thus place the burden of filling out medicare's claim forms and seeking indemnification from medicare to the elderly beneficiary; or (2) accept assignment. In essence, by accepting assignment, the physician agrees to accept whatever medicare is willing to pay as complete payment for medical services. Accepting assignment puts the physician to the trouble of doing the paperwork and trying to collect payment from medicare. There is a complicated formula for determining what medicare will pay which has also caused confusion. The law says medicare will pay 80 percent of the reasonable charges. Reasonable charges have been defined in legislation as the lowest of the following: (a) what your doctor charges; (b) his customary charges; that is, his median charge in the previous years, and (c) the prevailing charge in the doctor's area; that is, the charges of all doctors are averaged and the 75th percentile becomes the prevailing rate in the area.

Perhaps it is understandable that the number of physicians who are willing to accept assignment has dwindled tremendously. Whereas two out of three were willing to do so in 1966, slightly less than one out of two will do so today. From the point of view of the elderly, the physician's failure to accept assignment means not only that they will have to (a) find the money to make payments to the doctor "up front," and (b) that they must go to the trouble of filling out claim forms and collecting from medicare, but also that (c) they may wind up paying a greater percentage of the total bill out of their own pockets. In short, the No. 1 problem with respect to medicare is the need to find some way to encourage physicians to accept assignment.

From the point of view of the Congress, part B presents problems of a different kind. Unlike part A, which relies on a payroll tax for it's funding, part B is funded 30 percent by the premiums paid by the elderly which increase each year in line with increased costs, and the remaining 70 percent comes from general revenues, thus requiring an ever-increasing appropriation by the Congress each year. There have been a number of proposals in the Congress to change the funding base of part B. In fairness, it should be pointed out that there are those who have suggested that part A, with its reliance on increasing payroll taxes creates more of a burden and that part A should be funded through general revenues generated by what is thought as the more progressive Federal income tax.

Fourth, aside from the need to increase the number of physicians who accept assignment, senior citizens listed as their greatest concern the fact that medicare provides no coverage for important areas of health care. For example, it does not cover eyeglasses, dental care, out-of-hospital prescription drugs, hearing aids, or any kind of preventive medical care. Literally thousands of senior citizens have written to the Members of the House each month asking that we provide some coverage in those areas through medicare.

Fifth, senior citizens have asked us to do something about helping them with the burden of long-term care. Long-term care includes nursing home and home health care and present the most troublesome aspect of the entire health care problem. In the first place, medicare has provided only marginal coverage in both areas although we were successful in the last Congress in enacting an amendment which broadened the scope of home health care benefits available under medicare. Nursing home benefits remain very tightly restricted under medicare despite our report's finding that we are retaining senior citizens in the hospitals of this country longer than necessary at a cost of perhaps $1.5 billion a year because of the unavailability of medicare nursing home coverage. On the other hand, it is true that the greatest portion of the medicaid program—some 40 percent—goes to provide nursing home care and many States have reported struggling with this burden.

In evaluating this data, the committee learned that to make up for the perceived large and growing gaps in medicare, senior citizens are turning more and more to private health insurance coverage. Our committee learned that there were significant abuses in the sale of the so-called medigap policies to the elderly. Oftentimes, these policies are sold with the representation that they will pay for all that medicare will not pay for. In truth, there is no policy that we could find that will provide this kind or comprehensive protection. At an average cost of $200 or more, these so-called medigap policies basically provide coverage for the first $204 of a senior citizen's hospital bill and the first $60 of his doctor's bill—the so-called deductibles in medicare. They also provide coverage for coinsurance payments which the elderly must assume beginning with their 61st day in a hospital. Rarely do these policies pay for what is not covered by medicare such as dental care, out-of-hospital prescription drugs, eyeglasses, hearing aids, or physical exams. What we learned to our chagrin is that senior citizens are being sold multiple policies which individually, or taken together, do not provide them with the comprehensive protection that they desire or anticipate. We found that 2 out of 3 senior citizens has at least one of these policies and in the extreme some seniors have purchased 30 or more policies. The sad part is that these policies often contain a clause which says that in case of duplication, only one policy will pay.

As a result of our investigation, the Congress enacted legislation which makes it illegal for agents to sell this kind of duplicate and therefore worthless insurance and provides senior citizens with some guidance as to what is and is not an acceptable policy by means of a Federal seal of approval which will be given to companies and policies which meet certain Federal minimum standards.

From our insurance investigation we learned that the elderly are apparently willing to spend $200, $500 or more each year in addition to their part B medicare premiums if they are guaranteed comprehensive coverage. In discussing this point with the General

Accounting Office personnel, the committee was led to the recommendations in its Noverber 1980 report and to this bill that I am introducing today.

REFORMS

The General Accounting Office (GAO) has suggested that a great source of confusion and unnecessary administrative costs in part A are the hospital coinsurance payments. The GAO pointed out that far less than 1 percent of the elderly are ever hospitalized 61 days consecutively which is the date they must begin to contribute $51 a day toward their hospital bill. The GAO said that many insurance companies use the hospital coinsurance payment as a means of suggesting to the elderly that their medicare coverage is far from complete, necessitating the purchase of a medigap policy. Once purchased, the policy does little but make money for the company since its liability under this provision is extremely remote. For this reason, we have concurred in the GAO's recommendation to repeal the part A hospital deductible, and I am hereby introducing legislation to accomplish that objective.

With respect to part B, the committee analyzed all of the means advanced to encourage physicians to "accept assignment" under medicare. Each legislative approach had advantages and disadvantages. Each fell into the category of "carrot" or "stick." One approach involved advising physicians that they would have a choice of participating in the medicare program or not. If they chose to do so, they then would be required to "accept medicare assignment." It is my feeling that this would simply encourage physicians to desert the program in droves. The committee decided that we must do the opposite. We must provide incentives to encourage physicians to participate in medicare and to accept assignment. The proposal which was recommended in the committee's report, and which I am introducing as the second bill in today's package, would amend the Internal Revenue Code to allow physicians who agree to accept assignment from all of their patients and who have received at least $10,000 from medicare in assignment claims, to deduct from their taxes such sums as they receive from medicare thereafter up to a total of $25,000 in any single year. I believe this kind of a tax incentive idea is absolutely essential to the continuing success of the program. For those who think there is no justification for such a bill, I would suggest comparing the fees we are paying to physicians under medicare not with rates which doctors charge their paying customers but with payments made by Blue Cross/Blue Shield and other private insurance carriers. The rates are low and the payment is slow. Many physicians have severe cash flow problems as a consequence. Something must be done and the idea of a tax break for participating doctors is, I think, much preferable to a general increase in medicare fees paid to physicians. The last time we raised such fees 5 percent was early in 1978, it cost the taxpayers $1.5 billion, and it hardly made a dent in the problem.

The third bill that I am introducing as part of this package would create a new part C of medicare. Part C would be voluntary like part B. Seniors could elect whether or not they wish to participate in part C as they now do with part B. Part C would carry a premium which would be equal to the part B premium and it would increase at the same rate as the part B premium. Part C would offer senior citizens appropriate coverage for out-of-hospital prescription drugs, dental care and dentures, eye exams and eyeglasses, hearing exams and aids, and biannual physical examinations. Like part B, part C will carry a $60 initial deductible. However, unlike part B, part C will not require the 20-percent coinsurance payment—100 percent of the reasonable costs will be reimbursable under this new part.

As I noted earlier, if seniors are willing to spend several hundred dollars a year on insurance policies which purportedly close the gaps in medicare, might they not be willing to pay a portion of this amount for expansion of the medicare program which will actually provide them with more comprehensive coverage? The answer among the senior citizens that we have talked to is a resounding yes. I am sure virtually all my colleagues in this Chamber would like to see us doing more for older Americans. I think all of us are sensitive to the fact that we are dealing in a time of tight budgets and high inflation. Some say that this should be a time of retrenchment and that we have no alternative but to accept cuts across the board in all programs and that the senior citizens of this Nation must accept their share of the burden of these cuts. My view is a different one. During these times of high inflation it is the elderly who are living on fixed incomes who are being hurt the most. Many of our seniors have severe health care problems which require prompt medical attention. Retrenchment and cutbacks can actually be counterproductive in the sense that if seniors do not get the limited services they need on a timely basis, medical problems may be exacerbated to the point where major surgery is indicated resulting in higher costs overall to the Government.

Since it is obvious that the new premium cannot support the entire cost of these new proposed benefits, the question is: Where will the remainder of the money come from? Our committee chose to borrow an idea from members of the Senate Finance Committee who in the debate on catastrophic national health insurance last Congress suggested an excise tax on alcohol and tobacco might provide the means for generating new sources of funding for such additional benefits. I think that this might well be an excellent means of financing part C. We have learned that for a few pennies tax on distilled spirits and cigarettes, we could fund part C in perpetuity. The combination of the premium which will rise with health cost and the excise tax will make part C essentially self-financing.

My assumption is that the consumption of alcohol and tobacco will continue to increase in the future and that the revenues and associated excise taxes will increase as well. In short, the financing for the health care program would increase just as we can anticipate that health care costs will continue to increase. Moreover, it makes a certain amount of sense to me that people who are greater health risks should pay a greater share of health care costs. Those who smoke and drink must already pay greater health insurance premiums in order to obtain private health insurance. I am simply suggesting the application of this principle to Government insurance.

All of us in Congress are concerned with the potential for fraud and abuse in the delivery and administration of our health care services. I know the administration shares our concern. For this reason, we have incorporated in this new part C proposal, mechanisms designed to avoid possible opportunities for fraud and abuse. We have also proposed methods for the provision of medical appliances under this new part in a manner which assures cost control as well as quality of care.

I think this bill is a needed and important step which we must take to improve the quality of health care for older Americans. Since the program will not involve tremendous outlays from the Federal Treasury and essentially is self-financing, I hold out a reasonable hope that we can persuade others in the Congress beyond our committee that this bill must receive the appropriate consideration and be enacted immediately.

The fourth bill would permit families to allow as a deduction from their Federal income tax the cost of providing home health care or nursing home care for their relatives irrespective of whether such individuals meet the tests of dependency in the current Internal Revenue Code. The idea incorporated in this bill is that we should encourage families to take care of their own rather than to place them on medicaid and in nursing homes where they become in essence long-term wards of the Government. It should be pointed out that it is per-

missible under present law to deduct the costs of providing health care to a relative provided that the person meets the test of dependency. This generally means the relative must prove they provide at least 50 percent of the support and the parent must not receive more than $1,000 in income before any tax deductions can be realized. Our bill would allow the deduction irrespective of whether the relative met this test of dependency. I believe that if this proposal were enacted, that there would be tremendous offsetting savings to the medicaid program which now pays for about 40 percent of the Nation's entire $20 billion nursing home bill annually. I think it makes more sense to keep people at home with their loved ones than to place them in institutions.

Mr. Speaker, I would like to acknowledge that Congresswoman MARY ROSE OAKAR, a valuable member of our committee has been a moving force behind this legislation. I am pleased to acknowledge her support and to list her as a prime cosponsor.

I would also commend the Members of the House to our report and to our earlier July 30, 1980, hearing in which Wilbur Mills and Wilbur Cohen both endorsed the concept of part C of medicare as described above and suggested ways of encouraging physicians to accept assignment. Wilbur Mills noted that the greatest mistake the Congress made with medicare was to essentially limit its coverage to hospital care. He suggested this has created an overutilization of this most expensive element in the health care spectrum and that the Congress should be looking more to preventive medicine and making greater use of outpatient care. "I commend you for the thought you have advanced in part C of medicare," he said. Wilbur Cohen said, in part, "I would like to see a medicare program which eventually covered practically all the medical costs of older people and the disabled. I approve your idea of developing some kind of part C in which a person can get almost complete coverage for the major items that we have been talking about."

Mr. Speaker, I believe this package of bills that I am introducing today is an important and responsible package. It contains the financing necessary to make it work. I think that the volume of mail that all of us have been receiving tells us that senior citizens continue to have very serious health care problems. Because of inflation, many senior citizens neglect to obtain the health care they need. I think that this Congress has a unique opportunity to recognize those needs and to enact the first major expansion of the medicare program since it was enacted in 1965. I expect that my proposal will be refined and developed as it moves through the legislative process. I welcome thoughts and suggestions from all interested parties. I hope we can enact this reform package during this Congress.

Thank you.●

KENNEDY RESPITE CENTER

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. FORD of Michigan. Mr. Speaker, the State of Michigan has distinguished itself in its interest, commitment and support of programs for the handicapped. I am now proud to acknowledge one of my local school districts—the Wayne-Westland Community Schools—for its outstanding leadership in providing a very special service and facility for its handicapped citizens. I am speaking of the Rose Fitzgerald Kennedy Respite Center, which was dedicated on May 17 in Westland, Mich.

The school districts in Wayne County have offered exemplary programs for the handicapped since the early 1970's, and have established a cost-efficient, cooperative system of programing. I was extremely pleased to participate in the opening of the Kennedy Respite Center. What we have here is an innovative and much-needed facility for our handicapped citizens and their families. The center offers temporary residential placement for developmentally disabled persons for up to 30 days in times of emergency, vacation, stress, and needed physical and/or emotional relief.

It is particularly appropriate that such a facility would be named in honor of one of our most outstanding American women, Rose Fitzgerald Kennedy. I can think of no better way to honor a person who has been so dedicated as a wife, public-spirited citizen, and mother of a handicapped child. I wanted to share with you the dedication remarks of Marjorie Mitchell, the respite care supervisor:

I would like to express our pleasure at being associated with the name of Rose Fitzgerald Kennedy. The candor with which the Kennedy family, in the early 1960's discussed the issues and problems related to having a developmentally-disabled family member and the energy with which the entire family dedicated their efforts to solving these issues and problems, has contributed greatly to the volume and quality of special education and mental health legislation. We trust the Kennedy family is equally pleased to be associated with such a unique, inter-agency service as the Respite Center.

Like many of the other very worthwhile programs serving special populations, the respite center might not have come into being without the influx of Federal funds. Clearly today the planning and fruition of the Rose Fitzgerald Kennedy Respite Center would not be possible. Construction funds of $997,063 were provided through the Federal local public works program, and currently operating program funds are available through the Detroit-Wayne County Mental Health Board and a combination of local, State, and Federal education funds. Those of us who have worked so hard to put together the construction and operating funds for the center sincerely hope it will continue to receive sufficient support to operate.●

QUESTIONS ABOUT THE POPULATION EXPLOSION?

HON. VIN WEBER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. WEBER of Minnesota. Mr. Speaker, I would like to bring to my colleagues' attention an article which appeared in the Washington Post, written by Mr. Ben Wattenberg, a senior fellow at the American Enterprise Institute. He has highlighted some statistical trends in world population, arguing that, contrary to popular belief, world population is not "exploding."

Mr. Wattenberg, in my opinion, has justly criticized the inaccurate analysis which is contained within the Global 2000 Report. The so-called population explosion need not, and probably will not, become a self-fulfilling prophecy.

[From the Washington Post, May 18, 1981]

WHAT "POPULATION EXPLOSION"?

(By Ben Wattenberg)

All around the world, birthrates have gone down. The so-called "population explosion" is receding—and quite rapidly in most places.

Now, this does not mean that our planet won't ultimately house more people than its population today. Even a lower growth rate still yields some growth until and unless it reaches zero. But what is also apparent is that those nightmare scenarios of ever more nonstop billions of starving people packed like sardines will not come to pass.

A brief look at data from the 20 most populous countries—containing 75 percent of the world's population—provides a flavor of what's going on. (The numbers were compiled by the U.S. Census Bureau's International Demographic Data Center.)

Seven of the 20 biggest nations are categorized by the United Nations as "more developed." They are the United States, the Soviet Union, Japan, Great Britain, West Germany, France and Italy. In six of these seven nations, fertility levels have already sunk so low that, if continued, such rates would lead to actual declines in population in years to come. The Soviets are only a smidgen away from such a rate.

But the biggest demographic question marks in recent years have concerned the major nations of the "less developed" world. A quick tour of these poor nations shows de-

clines in birthrates everywhere, although at very different speeds.

Begin at mainland China. In the early 1950s, the mainland Chinese had an annual birthrate of 40 children per thousand people. By the late 1970s, just a quarter of a century later, that rate had fallen to 22.

India is No. 2 in the world in population. It has been thought of as a demographic basket case. India has had a much more moderate drop in birthrate than has China. In the late 1950s, India recorded 43 births per thousand; today the rate is about 35. But that drop is more significant than it may seem. A nation only has to achieve rates in the mid-teens to get to population stability over time. That means that in the past 20 years India got about a third of the way to rates that will produce zero population growth.

Even greater declines in birthrates are apparent in the two next-largest poor countries, Indonesia and Brazil. Indonesia's birthrate was 46; now it's about 36. Brazil's was 44; today it's about 30.

On the other hand, Bangladesh, Pakistan and Nigeria have all shown much smaller declines. Each had birthrates of around 50 in the 1950s and are only down to the mid-to-upper 40s today.

The remaining six big nations in the less developed world break down this way: the birthrates of Thailand, Turkey and Mexico have dropped about 10 per thousand; that's a bigger decline than India's, but not as sharp as China's. The Philippines and Egypt have lost about five per thousand. Data for Vietnam do not exist. (For good measure, South Korea, the world's 21st largest nation, has seen a stunning drop in its birthrate, from 45 to 22, in only the past 20 years.)

The leverage of these sorts of declining rates is incredible. Thus, the often-bizarre "Global 2000 Study" cites a harum-scarum projection dealing with a world population of almost 30 billion in the next 120 years. But today, looking at the most recent birthrates, mainstream projections come in at about 10 billion to 12 billion, while the low-ball demographers are talking about a maximum of 8 billion before we level off and perhaps go to a global decline.

Lessons. First is this: there are no immutable projections. When some big out-of-town jasper with a pocket calculator comes up to you and says, "If present trends continue . . ."—hold onto your wallet.

"Present trends" involving people typically don't continue, particularly if the trends are unfavorable. They change—because, unlike pocket calculators, people have some control of their own destiny.

Second, what is seen as bad news drives out what is seen as good news. The alleged "population explosion" dominated our consciousness for a quarter of a century. Its recessional march now attracts little attention.

Third, what's seen as bad news may not be. The "population explosion" was regarded as "bad news" because the fellow with the calculator said that if you split a pie among more people, each person has less. That's an argument that may never be settled. A famous demographer has noted that every baby comes equipped not only with a mouth but also with hands. People not only consume but also produce. That makes the pie grow. Isn't it odd that just about every nation in the world raised its standard of living while the "population explosion" was going on?

Finally, science and statistics have become ideological handmaidens. Thus, the (distorted) perception of the population explosion yields corollaries: we're running out of resources, it's an era of limits, the rich are unfair to the poor, we need a new world economic order. Not surprisingly, the fellows with the hot calculators will also be happy to tell you how to fix things. All you have to do is follow a handy little 17-point government program that happens to be already typeset and at the printers.

What we see, then, is a pattern that is observable elsewhere in our society: we trumpet and politicize bad trends that may not be bad and may not be trends.

That's bad. As for me, a political man, I trumpet only the idea that the projections of doom will not survive. Certainly not if present trends continue.●

U.S. VOTE ON INFANT FORMULA CODE DESERVES A SECOND LOOK

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. FRANK. Mr. Speaker, when Dr. Stephen Joseph and Mr. Eugene N Babb resigned their posts at the Agency for International Development last month, they did so because of their conviction that the U.S. vote at the World Health Organization meeting on infant formula was unconscionable. In fact, Dr. Joseph and Mr. Babb estimate that roughly 1,000 children's lives are lost each year as a direct result of the misuse of infant formula in less developed countries. For the United States to vote against a voluntary code to set standards for use of infant formula in member nations is an abrogation of the principle of corporate responsibility and signals the world that we are more concerned with corporate profits than human lives.

The resignations of Dr. Joseph and Mr. Babb stand out as a refreshing example of the conviction of Government employees who have examined the impact of our actions on poor children in poor nations. I commend these gentlemen for their stand. Their resignations serve as a symbol to all of us of our responsibility to examine the ramifications of our decisions on the people they are intended to affect.

I would hope that in the coming months, prior to the next opportunity for the United States to vote on this issue at the World Health Organization, the administration will reconsider its position on an infant formula code.

I recently received a copy of a resolution adopted by the Massachusetts House of Representatives from Iris K. Holland, chairperson of the Massachusetts Caucus of Women Legislators and assistant Republican house leader on the infant formula issue. The resolution is a firm expression of support for the WHO infant formula code. The resolution follows:

RESOLUTIONS MEMORIALIZING THE PRESIDENT AND CONGRESS OF THE UNITED STATES TO DIRECT THE UNITED STATES REPRESENTATIVE TO THE UNITED NATIONS WORLD HEALTH ASSEMBLY TO VOTE IN SUPPORT OF THE RESOLUTION THAT WOULD OUTLAW THE PROMOTION OF INFANT FORMULA AROUND THE WORLD

Whereas, ten million infants and young children annually suffer from sometimes fatal malnutrition and other diseases associated with inadequate breast-feeding and the use of milk substitutes; and

Whereas, breast-feeding is free and nutritionally superior as compared to infant formulas that can be and often are contaminated by bad water, dilution and lack of refrigeration which is common in undeveloped countries, and

Whereas, said resolution would prohibit consumer advertising, free samples, premiums and commissions on the sale of infant formula and would prevent manufacturer's agents from selling to mothers directly and ban labels that present infant formula as a healthful alternative: Therefore be it

Resolved, that the Massachusetts House of Representatives hereby urges the President and Congress of the United States to direct the United States Representative to the United Nations World Health Assembly to support the resolution outlawing the promotion of infant formula around the world; and be it further

Resolved, that a copy of these resolutions be forwarded by the Clerk of the House of Representatives, to the President of the United States and to the Presiding Officer of each branch of the Congress and the Members thereof from this Commonwealth.●

IRRELEVANT WEEK

HON. ROBERT E. BADHAM

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. BADHAM. Mr. Speaker, each year at this time it is my pleasure to call to the attention of this honorable body an event in the 40th Congressional District of California which is fast becoming one of national interest.

It is known as Irrelevant Week, during which a number of citizens of the district which I represent bring to Newport Beach, Calif., the last man drafted each year by the National Football League to be honored as one who is symbolic of everything that is great in the United States of America.

This year the honor has befallen Phil Nelson, a little-known underplayed tight end at the University of Delaware, whom the Super Bowl champion Oakland Raiders thought had sufficient potential to draft 332d in this year's player lottery.

Phil Nelson joins five previous NFL draftees to be so honored and while I am not in a position to declare that being the Irrelevant Week honoree is a kiss of death for an aspiring pro football player, I am able to say that the record clearly speaks for itself.

Since Paul Salata and his zany friends in Newport Beach initiated Irrelevant Week in 1976, there has been a parade of players from Dayton, Colorado, Montana State, Northwest Louisiana, and Arkansas who have been honored as the final draftee in their senior year and so far none has made it out of summer training camp.

One player, a wide receiver, was inserted into two preseason games by the Pittsburgh Steelers in 1979 but, fortunately, he didn't catch a pass—because none was thrown to him—and he was soon released to join the other Irrelevant Week honorees in pro football oblivion.

Now comes Phil Nelson of the University of Delaware. This lad, who was schooled in Washington, D.C., virtually under the shadow of the U.S. Capitol, has had a rather undistinguished career in Delaware. Though 6 feet, 6 inches and a beefy 238 pounds, Phil caught only 14 passes in his 3 varsity seasons at the university.

But the pro scouts from a number of NFL teams came around several times to view game films, the best way to see Phil Nelson because he was academically ineligible for 7 games of his senior year, when he caught 7 of those 14 passes.

Yet the scouts liked what they saw. Phil has potential they decided. At least enough to be drafted 332d out of 332. And so now he will be off to summer camp with the Oakland Raiders, bidding for a seat on the bench along with the other 44 final members of the team squad.

After all, however, Phil Nelson did catch those seven passes last year in the four games he played. One of them was for a touchdown. In his junior year he caught six passes, one of which was for a touchdown as Delaware defeated Youngstown State 38-21 for the NCAA division II championship. In all there were four touchdown receptions in 1979.

The jump from division II play with the Delaware Blue Hens to the Oakland Raiders may be more than can be expected of 22-year-old Phil Nelson but the NFL is stocked with star players who made similar jumps. However, if Nelson does make the grade he will be the first Irrelevant Week player to have done so.

Which brings me to the point of this message to my colleagues and to all America.

The world is peopled with those who are drafted last, if at all, and it really isn't relevant whether or not they make it to the top, starting from the bottom, as it were.

What is relevant is that Phil Nelson and the other Phil Nelsons of the world gave it their best shot, which is all that any of us can ask of our fellow citizen.●

FORT CARSON ARMY PROJECT

HON. RAY KOGOVSEK

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. KOGOVSEK. Mr. Speaker, I am entering the testimony I made regarding the Fort Carson Army project.

Mr. Chairman, I would like to thank you and members of the committee for allowing me to testify today. The topic is the expansion of Fort Carson—a project the Army has labeled its number one acquisition priority, and a project which is the number one concern of my constituents in southeastern Colorado.

You will hear testimony this afternoon from various Coloradans who will tell you their organizations wholeheartedly support the Army's proposed acquisition of 244,000 acres in my congressional district. I want you to know that my opposition to the expansion represents the views of the majority in southeastern Colorado who will be directly and adversely impacted by this land grab.

I do not oppose the expansion because I disagree that Fort Carson needs more training area. They do. Fort Carson troops need to be trained at battalion levels in order to upgrade the readiness of this nation, according to the Army. I accept their description of need, and that is not the question. The question is where we train Fort Carson's troops.

While the Army argues the criticality of this project in terms of readiness, they often forget to explain that troops will not be able to train on the Pinon Canyon parcel until 1986. The Army does not appear to be in any great haste to meet the training needs when they discourage each and every alternative site or method which would allow the troops to begin maneuvers within one or two years. The Army has its heart set on the Pinon Canyon parcel.

I believe the reason for this is explained in documents I will submit for the record. These documents provided to me by the former chief of the Fort Carson land acquisition team indicate the Army has considered training more than just the 4th Mechanized Division on its newly acquired land. By its own admission, the Fort Carson maneuvers will only require 82,000 acres. Yet, the Army's proposal asks Congress to pay millions more for three times as much land as Fort Carson needs. The Army lists environmental concerns as its reason for such a request. I believe the true reason is future ability to train more than just the 4th Mechanized Division.

But let me address the environmental concerns, because I share them with the Army—although I don't feel the Army is concerned enough. The Pinon Canyon parcel is fragile. The area receives a scant 9 to 12 inches of rain a year. The ground has very little vegetative cover—in fact it takes 50 acres to graze one animal unit.

I would like the members of this committee to see the frail land the Army wants to roll hundreds of tanks on. Between the training of three battalions per year, reserve training and a biennial division level maneuver, I am convinced we in southern Colorado will have a dust bowl on our hands and 244,000 acres of scarred prairie—land where old wagon trails are still visible after decades.

The environmental question is two pronged . . . it goes beyond my concern for the looks of the land. It goes to the economic future of my district.

Once the training activity begins, dust will blow into communities which have long been striving for economic development. Pueblo, Colorado, the metropolitan area nearest the proposed training site, already has non-attainment status from the EPA which has prevented it from attracting new industry. But the Army says the dust won't blow into Pueblo, almost 100 miles removed from the training site. So let's talk about the rural communities adjacent to the parcel—Walsenburg, Trinidad, La Junta, Lamar, Rocky Ford. These are towns whose past economy has been based solely on agriculture. The residents have felt the impact of a sagging agricultural economy and so they search for new industry to provide jobs and an economic boost. Lamar was recently chosen as the site for two new manufacturing plants. The potential for attracting any more industry will decline dramatically in Lamar and Trinidad and La Junta when—not if—dust pollution increases because of training.

In addition to the potential for air pollution is the certainty of increased salinity in the Arkansas River. The Purgatoire River runs right through the Pinon Canyon parcel and feeds into the Arkansas—a river with the nation's highest salinity level now. Erosion caused by tank maneuvers will increase the salinity drastically, causing problems for Colorado users as well as those downstream who depend on the Arkansas water for agricultural production.

The Army has not totally ignored these potential environmental impacts. Within their estimated cost of operating the new training site is a less than adequate $5 per acre cost for mitigation. And remember, the Army is taking three times the land it actually needs in order to minimize environmental problems. They will rotate training activity from site to site to "rest" certain areas for a two-year period. The Army believes two years is enough time for the fragile land to revegetate.

Mr. Chairman, rotating the training of hundreds of tracked vehicles will not mitigate the impacts. The Bureau of Land Management says so. The State Department of Agriculture says so. The EPA says so and the U.S. Forest Service does too. The Soil Conservation District says the Army plan is unsupportable. I say it is irresponsible. The Army will not be able to achieve in a two-year rest period what the Soil Conservation District has been unable to achieve on the neighboring Comanche National Grasslands with a 40-year rest and the expenditure of thousands of dollars per acre.

Let me move from the environmental issues to the fiscal ones, since your job is to determine proper expenditures of federal dollars. The mood of the country makes arguing against an item on the military wish list difficult. The people—including my constituents in southeastern Colorado—believe we must improve our national strength. The Army would have you believe that this $30 million expenditure for the Pinon Canyon parcel is the sole way of doing so.

But the mood of the country is also one calling for careful expenditure of taxpayers' dollars. I submit to you that the purchase of a quarter of a million acres of private land is not the most fiscally responsible alternative available to you.

I do not come to you in opposition of the expansion proposal to be an obstructionist. I

have proposed several alternatives to the Army, and they have chosen to discount all of them. They have used the excuses Lt. General Arthur S. Collins Jr. said they would in his book "Common Sense Training." "A common excuse is the training area is inadequate. The training areas are either too small, too far away, too wooded, too open or too something," Collins said. He could have been quoting any number of Army officials I have talked with about alternatives.

The Army has looked at other sites before setting its eyes on the Pinon Canyon parcel. In 1978, the Army looked at land to the west of the existing Fort Carson reservation, to the south of it, east of it and in Wyoming. Several of these sites were acceptable to the Army then, but are not now. Only the Pinon Canyon parcel seems to meet the Army's needs.

I would suggest that we look further into these sites and determine if they are feasible and why they were abandoned from further consideration.

But the most preferable alternative to me—a member of Congress who represents a state where more than one third of the land is owned by the federal government—is to train Fort Carson's troops on an existing military reservation.

We are presently establishing the National Training Center at Fort Irwin in California. Why can't the 4th Mechanized Division train there? It is too flat and transportation costs are too high. Fort Bliss in El Paso, Texas has 1.1 million acres, 300,000 of which is specifically labeled maneuver land. Why can't Fort Carson's troops train there? It is too flat, transportation costs are too high and scheduling will be impossible once three new weapons systems are assigned there.

The Army has an argument against every alternative to the Pinon Canyon site. As one general testified before the Armed Services Subcommittee on Installations and Facilities—"we want that land."

Mr. Chairman, I question the Army's contention that travel costs to Fort Bliss or Fort Irwin are not responsible spending when the cost of the Army's speculation at the Pinon Canyon site will be upwards of $100 million, and that is a conservative estimate. The Army has not adequately considered the costs of their mitigation efforts, like a scheme to build holding ponds in order to combat the salinity problem. In addition, by 1986, when troops will finally train on the site, the cost will be higher. A recent Congressional Budget Office report said the administration's five-year defense plan will cost $136 billion more than estimated because the predicted annual inflation rate was lower than is realistic.

Mr Chairman, I am certain we all agree on the criticality of the need for better training of our troops. But is is also critical that we look at the real expense of the Army's plan and determine whether purchase of the Pinon Canyon site is sound or if it is a boondoggle.

Because the Army does not feel it is necessary to fulfill this number one priority need until 1986, I think we should take a little more time to examine the alternatives. I would like to request that this committee call for an independent investigation of the alternatives—particularly the use of existing military training land.

Certainly if the Army believes this is its number one priority in terms of readiness, they would welcome an investigation of training sites which would allow training to begin within one or two years and not five years down the road.

And just as certainly, the taxpayers will welcome the saving of $30 million or more because we were frugal enough to use what land we have to the fullest extent, rather than buying more and more and more.

I most sincerely urge you not to confuse the criticality of the Army's requirements with the real criticality of the necessity to meet those requirements in only the exact manner which the Army has proposed.

Thank you, Mr. Chairman and members of the Committee, for hearing my testimony on an issue which is far more than just consequential to southeastern Colorado.●

ALEXANDER YAKOVLEVICH LERNER—REFUSENIK

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. WOLF. Mr. Speaker, I would like to bring to the attention of my colleagues the plight of Alexander Yakovlevich Lerner, a refusenik in the Soviet Union. A refusenik is a Soviet Jew who has been denied an exit visa and is many times the subject of harassment and may suffer the loss of his/her job or imprisonment. Recognition of the refusenik's independent commitment to freedom should be part of our country's support of human rights.

Alexander Lerner was once among the most respected and honored scientists in the Soviet Union. Alexander Lerner is now reduced to arranging furtive meetings with other Jewish refuseniks, in his small apartment, where they exchange scientific views and dream of their future work in Israel.

Alexander Lerner was born in the Ukraine, in Vinnitsa. When the Germans occupied Vinnitsa, Lerner and his wife Judith saw their two daughters, aged 3 and 5, murdered by the Nazis. The Lerners began life anew in Moscow where their children Vladimir and Sonia were born. In 1939, Lerner was awarded the academic degree of Candidate; in 1954, that of Doctor of Science; and in 1955, the academic title of Professor. He became a member of the prestigious Academy of Sciences of the U.S.S.R., and was the author of 168 scientific works, 12 books among them, many of which have been translated into several languages.

Professor Lerner held a prominent position in Soviet society until 1971—the year he applied for an exit visa. After submitting a petition concerning his decision to leave for Israel, Professor Lerner was dismissed from all his duties. His daughter was discharged from her position as mathematics researcher, and his son, an engineer in systems analysis, was fired and has been forced to work at odd, unskilled jobs.

In a statement transmitted from Moscow on March 30, 1976, Professor Lerner emphasizes that there is no basis to the "knowing State secrets" as a reason for refusing him a visa. Any participation in projects of a confidential nature have long been discontinued and made public in the West. Lerner had also been allowed to travel abroad—a privilege denied to those privy to State secrets. Lerner concludes:

> And so the pretext of secrecy on which is based the refusal to release me is patently absurd. Even more absurd is this excuse for detaining my son who in his entire life has not had the slightest glimpse of secret documents or participation in secret activities.

Justice demands that Mr. Lerner be released from the Soviet Union so that he may fulfill his dreams and complete his work in Israel.●

LOUIS RANDOM HONORED FOR SERVICE

HON. HAROLD C. HOLLENBECK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. HOLLENBECK. Mr. Speaker, on June 12, the community of Dumont, N.J., and the Dumont Education Association are paying tribute to the accomplishments of a very special educator. Mr. Louis Random has taught Dumont High School students U.S. history and government for 33 years. He has instilled in thousands of young men and women a sound understanding and firm appreciation of our government and our heritage during these more than three decades in public education.

Upon his retirement, Mr. Random is recognized by his colleagues and his community, not only for the longevity of his service, but for his steadfast dedication to quality education for our youth. I am proud to offer Mr. Random my congratulations on the honors bestowed upon him, my commendation for his fine career in education, and my very best wishes for happiness and good health in his retirement.●

EQUAL EMPLOYMENT OPPORTUNITY AT GRUMMAN AEROSPACE CORP.

HON. PARREN J. MITCHELL

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. MITCHELL of Maryland. Mr. Speaker, many of my colleagues oppose affirmative action in employment, housing, and minority business. They mistakenly assume that our society is free from racism, prejudice, and

discrimination—how badly mistaken they are.

I have often stated that if indeed the private sector really tried to implement affirmative action programs on its own, there would be no need for Federal efforts. Very few corporations in America really push affirmative action hard, and that is bad. A few exceptions can be noted. Grumman Aerospace Corp., with whom I have worked since I came to the Congress, has, in my opinion, attempted to implement equal opportunity initiatives.

It should prove interesting to review a 10-year record of progress at Grumman. During the decade of the seventies the following increases were achieved:

Increase in total population, women from 10.0 to 12.9 percent, minorities from 5.8 to 8.3 percent; white-collar positions, women from 13.5 to 15.3 percent, minorities from 3.1 to 5.9 percent; officials and managers and professionals, women from 1.7 to 7.1 percent, minorities from 2.2 to 5.1 percent; technicians and craftsworkers, women from 3.2 to 4.6 percent, minorities from 6.6 to 9.1 percent; and blue-collar positions, women from 4.4 to 7.4 percent, minorities from 10.2 to 13.5 percent.

TYPES OF OFFICIALS AND MANAGERS JOBS HELD BY WOMEN AND MINORITIES

Women: assistant to corporate officer, 2; assistant to director, 3; manager, 6; assistant manager, 9; section head and group head, 7; supervisors and assistant supervisors, 11; and foreperson and assistant foreperson, 3.

Minorities: assistant to corporation officer and board member, 1; director, 4; deputy director, 1; deputy general manager, 1; manager, 13; assistant manager, 4; section head and group head, 5; supervisor and assistant supervisor, 18; and foreperson and assistant foreperson, 20.

PROFESSIONAL JOBS

Women: administrative assistant, staff assistant, administrator, analyst, engineer—84, auditor, attorney, buyer, chemist, and editor.

Minorities: staff assistant, accountant, analyst, administrative assistant, engineer—156, buyer, chemist, and field representative.

Over $5,820,000 was paid to minority subcontractors during 1979, and a total of 160 minority firms are on our seller's list.●

THE SUGARMAN CASE—A CLEAR EXAMPLE OF BUREAUCRATIC EXCESS

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. PORTER. Mr. Speaker, last fall, I came before this body to protest the excessive burden placed upon a small businessman from my district by the Federal Trade Commission.

That regulatory body had imposed an excessive fine upon Joe Sugarman of J.S. & A. Corp. for a delay in responding to orders placed during the great Chicago blizzard of January 1979. The company's problem in meeting its orders was confounded by computer difficulties, but Mr. Sugarman worked gamely to fill those orders as best he could. The staff gave willingly of its time to try to get its products out in accordance with both good business practices and the FTC rule requiring 30-day shipment.

Despite the good faith efforts of the corporation to fulfill its commitments to its customers, the FTC saw fit to impose a $100,000 fine upon it for its technical violation of the 30-day rule.

This House has never sanctioned such a 30-day rule with the force of law, nor would it ever do so without requiring clear due process of law which took into account mitigating circumstances. Yet, the FTC has seen fit to confound its first outrageous act with two more: it subsequently raised the fine to $275,000 and then "magnanimously" reduced it to $75,000.

Enough is enough. Last fall, the people of this Nation spoke with one will to say that Government harassment is excessive. Surely this is a clear case of bureaucratic excess which is designed to prove the agency "right" and the businessman "wrong" without the least attempt to achieve justice.

This Nation is founded upon a rule of law created through a complex set of checks and balances. The establishment of regulatory agencies with power to act as prosecutor, judge, and jury with the accused's only recourse to extremely costly court procedures is a clear threat to the will of law if the agency acts capriciously and without due regard to mitigating circumstances.

Clearly, the J.S. & A. matter appears to be one of bureaucratic harassment, with the intent to leave Mr. Sugarman the only option of spending $500,000 to avoid the $75,000 fine. If the case does go to court and Mr. Sugarman is exonerated, this may be a classic case for the court to assess costs and legal fees against the FTC in accordance with the law passed by the Congress last year, Public Law 96-481, which I strongly supported and on the conference committee for which I served.●

AN ABUSE OF FRANKING

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. RUDD. Mr. Speaker, one of my constituents has brought to my attention a matter that disturbs me very much and ought to disturb every Member of this House.

I am speaking about what I consider to be an abuse of the franking privilege. We all have encountered similar situations, I am sure, and too often we ignore them. But I do not think we can ignore them, if we are truly here to transact the people's business.

The facts here are clear. The Congressional Arts caucus made an appeal to the arts and humanities constituency, trying to mobilize opposition to President Reagan's budget cut plans. That appeal was sent through the mail on letterhead stationery captioned Congress of the United States, House of Representatives, Congressional Arts Caucus, Washington, D.C. 20515; signed by the chairman of the caucus, and mailed in the chairman's franked envelope.

Mr. Speaker, I feel that is wrong, anyone can express opposition to anything they want, but they ought not to ask the taxpayers to pay for such a propaganda effort. And that is exactly what happens when such a letter is sent out under the frank of a Member of the House.

I ask unanimous consent to place in the RECORD the letter, the franked envelope, and the response I received from my constituent, Mr. George Getz of Phoenix, Ariz., who received the letter, and my letter to the chairman of the Congressional Arts Caucus.

HALL OF FLAME,
ANTIQUE FIRE ENGINE MUSEUM,
Phoenix, Ariz., May 8, 1981.

CONGRESSMAN FRED RICHMOND,
Chairman, House Congressional Arts Caucus, Washington, D.C.

DEAR CONGRESSMAN RICHMOND: I have your letter of March 30th reference to writing President Reagan regarding cutting back on funds for various Arts and Humanities programs in line with his trying to balance the budget and eliminate various unnecessary government operations.

I am in the museum field, but have never received a penny of federal help in the form of subsidies, grants, etc. I am a firm believer in living within ones budget, which our Federal Government does not seem to be in favor of, nor have they practiced it for many years. No business could exist if it is run the way our Federal Government is run. When ones income does not keep up with outgo, you have to readjust your thinking and priorities. President Reagan is a firm believer in this philosophy and I support him 100%. He is not singling out any one individual project or projects, he is going across the board with cutbacks affecting everyone. I think that we should all stand up like men and accept our proportionate share of these cutbacks.

Sure, it is going to hurt, but everyone is going to be hurt to some extent. If this country expects to carry on as it has being a leader in international affairs, it must be strong and no country can be strong with the deficits we have been running up. Therefore, it is time we all cutback and adjusted to a lesser degree of depending upon government to do things for us. We need to

get out and find our own way of making our pet projects operate. Washington should not be expected to subsidize projects for us. We should be able to stand on our own feet.

I am not in favor of your proposal as outlined in your letter of March 30th and I believe that there are too many self-interests groups trying to say "don't cut me, cut the other fellow." Everyone has to take their share of the cuts!

Very sincerely,

GEORGE F. GETZ, JR.,
President.

HOUSE OF REPRESENTATIVES,
CONGRESSIONAL ARTS CAUCUS,
Washington, D.C., March 30, 1981.

DEAR FRIEND: If you are concerned about the federal government's continued support of the arts, then we need your help now.

President Reagan has recommended eliminating the Institute for Museum Services and the subsidies for non-profit bulk mail. In addition, the Administration has asked for a 50 percent reduction in the appropriation to both the National Endowment for the Arts and National Endowment for the Humanities and a 25 percent reduction in the appropriation to the Corporation for Public Broadcasting.

Few, if any arts organizations, large or small, will be unaffected if these cuts are approved by Congress. The Congressional Arts Caucus already has 135 Members of Congress, representing 34 states and five territories, who are most supportive of the arts community.

Your assistance is urgently needed to insure the continued existence of federal arts agencies. I suggest that you explain the potential financial crisis to your Board members and urge them to launch a massive letter writing campaign.

I hope every member of your Board, your organization and your patrons will write their Representative in Congress urging him or her to join our Arts Caucus. Your letter should also state your views concerning the need for continued funding for the Corporation for Public Broadcasting, the National Endowment for the Arts, the National Endowment for the Humanities, the Institute for Museum Services, and the National Trust for Historic Preservation.

Form letters and petitions won't be effective. We need personalized, individual letters from constituents to their own Member of Congress. If you need any assistance in mounting this most critical campaign, please do not hesitate to contact me.

We cannot win this fight alone but together we will be successful.

Yours sincerely,

FRED RICHMOND,
Chairman.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., June 4, 1981.

HON. FRED RICHMOND,
U.S. House of Representatives,
Washington, D.C.

DEAR FRED: Per our conversation yesterday, I am sending to you the March 30 letter on Congress of the United States, House of Representatives, Congressional Arts Caucus stationery, mailed to one of my constituents, Mr. George Getz, over your signature in one of your Franked envelopes.

I do not regard this as a proper use of the Frank, Fred. Anyone has the right, of course, to try to organize public opinion in favor of an issue, such as the arts and the humanities. However, to use taxpayers money in such a propaganda effort as your Arts Caucus undertook is wrong, in my opinion.

I feel very strongly about this, and I intend to extend my remarks on the subject.

With best personal regards,

Sincerely,

ELDON RUDD,
Member of Congress.

Enclosure.●

TEXAS OPPOSES SPLIT-BASING OF MX

HON. JIM MATTOX

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. MATTOX. Mr. Speaker, as you know, the Townes Committee, which is studying the possible basing modes for the MX missile system, is to complete its review by the end of this month. Several of my colleagues have indicated that they would reserve judgment on this controverisal issue until the committee makes its report.

I would urge them to recall, whatever the committee recommends, that this House is on record in support of basing the MX "on the least productive land available that is suitable for such purpose." If the decision comes down to a choice between the full-basing (Nevada/Utah) mode, which the Air Force prefers, and the split-basing (Nevada/Utah/Texas/New Mexico) mode, also under study, we clearly should not adopt the latter. Basing the MX shelters in the Texas Panhandle would remove from agricultural production many acres of rich farmland. We cannot be consistent with our "sense of the Congress" amendment to the fiscal year 1979 Defense Department authorization if we allow this.

Furthermore, the Air Force estimates that the split-basing mode would cost almost $3.5 billion more than the full-basing mode initially, and that the cost of the additional operations and support requirements would be about $19 million per year.

These issues have recently been addressed by the Texas Legislature, which adopted Senate Concurrent Resolution No. 53. I respectfully request that a copy of that resolution be entered in the CONGRESSIONAL RECORD.

SENATE CONCURRENT RESOLUTION

Whereas, United States Air Force plans call for a sheltered road-mobile basing system for the M-X missile system, and currently under consideration are plans for either full basing in Nevada/Utah or a split basing in Nevada/Utah and Texas/New Mexico; and

Whereas, A decision to adopt the split-basing mode would require the relocation of approximately 500 families and would required United States Air Force acquisition of many acres of highly productive land in Texas which would be unlikely to be reclaimed for agricultural purposes; and

Whereas, an amendment to the Department of Defense Supplemental Appropriations Act, Section 2.02(b), June 27, 1979, states that it is the sense of Congress that the basing mode for the M-X missile should be restricted to location on the least productive land available that is suitable for such purpose; and

Whereas, the January 19, 1981, Department of Defense M-X Split Basing Report to Congress states that there exists a relative balance in the environmental impact between the two alternatives, while also stating that the split-basing mode would require the additional expenditure of $3.475 billion over the cost of the full-basing mode; now, therefore, be it

Resolved by the Senate of the State of Texas, the House of Representatives concurring, That the 67th Legislative respectfully request that the Congress do not adopt the split-basing mode for the deployment of the M-X missile system; and, be it further

Resolved, That the Secretary of State forward copies of this resolution to the President of the United States, the President of the United States Senate, the Speaker of the United States House of Representatives, Senator Lloyd Bentsen, Senator John Tower, and all members of the Texas delegation of the United States House of Representatives with the request that this resolution be officially entered in the Congressional Record as a memorial to the Congress of the United States of America.●

ARE AMERICA'S FARMERS EXPORTING THEIR TOPSOIL

HON. JAMES WEAVER

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. WEAVER. Mr. Speaker, I would like to bring up one of the most serious issues facing our Nation today—that is the conservation of our soils. America's fertile soils are the source of our power. As long as we can feed our people, good years and bad, our Nation will have a unique source of strength in this hungry world.

Unfortunately, we are pushing to the technological and ecological limits of production on our farms. We try to squeeze out every last kernel of corn and wheat, regardless of the devastating effect on our soils. Our crops can be grown year by year; but the soil is a precious geologic resource, like oil, which can and is being depleted.

We are 30 years down the road in a long push to promote American agricultural exports. This drive has gone on regardless of the cost to the natural productivity of our land, regardless of the impact on struggling Third World farmers, regardless of the prices received by our own producers.

One good way to slow this shortsighted raid on posterity is to find a way to increase farmers' incomes from exports without causing further pushes onto marginal soils and into artificially high yields. I think that my National Export Grain Bank bill is one

good solution. It would allow us to set a minimum price on our grain exports. The difference between the export and the domestic price would be collected, stored in the bank, and returned to the growers. The bank funds could also be used to support other programs under the Department of Agriculture if Congress appropriated them.

We are the most powerful agricultural nation on Earth. We should use that power for the benefit of both our people and our land. To make empty blandishments about "letting the market take its course" is to assent to a loss of our heritage. It is an action reminiscent of the ostrich burying his head in the sand—and sand may be all we have left of our soils if we do not act now.

This fine article from the Christian Science Monitor of Wednesday, June 3, 1981, shows the extreme danger in which our drive for exports has placed our soils. I hope that those who read it will be shocked by the seriousness of the predicament. I hope that they will consider supporting H.R. 2901, the National Export Grain Bank, which is my effort to stop exporting our topsoil.

The text of Mr. Lauren Soth's article follows:

[From the Christian Science Monitor, June 3, 1981]

ARE AMERICA'S FARMERS "EXPORTING" THEIR TOP SOIL?

(By Lauren Soth)

"I am sorry to say that I see this ravishment of the soil continuing at a faster and faster pace in the past 25 years throughout the Midwest, because of the cheap food policy and extensive exportation of our farm products that are being advocated by our national leaders."—Jim Sage, Iowa farmer, in testimony before the soil conservation subcommittee of the U.S. Senate Committee on Agriculture, Aug. 15, 1980.

"What many people do not realize is that the bumper crops are coming at the expense of the soil. I am increasingly concerned that the President and Congress do not fully appreciate that Iowa is really "paying" for our reliance on foreign oil, as Iowa farmers help with the balance-of-payments problem through our tremendous exports."—Robert Lounsberry, Iowa secretary of agriculture, in the same Senate hearings.

United States exports of grain are breaking the record again. Allowing for some overstatement by conservationist farmers of the case attributing soil losses to exports, there is such a case. It deserves public attention. This is a good time for it.

John Block, the new U.S. Secretary of Agriculture, helped start a state soil-conservation program in Illinois where he was director of the Department of Agriculture. But his enthusiasm for free markets and exports appears to override his concern about soil losses. As a state official, he pushed for export expansion of corn and soybeans, which he raises on his own farm. When he was named to the Reagan Cabinet, he said he favored lifting "immediately" the partial embargo on grain exports to the Soviet Union. "Expansion of exports," he said, "is a key to a market-oriented agricultural policy." At the American Farm Bureau's annual meeting in New Orleans on Jan. 12, 1981, he let himself go, declaring that "given the incentive, farmers will respond, and people won't believe how we can produce so much." He said he would oppose any budget cuts in agricultural research or in promotion of exports.

Agricultural exports aren't exactly slumping, as one might think from Mr. Block's tone. In the current fiscal year (ending in September) grain exports will increase over the previous year's all-time high from 111 to 119 million tons (7 percent), according to US Department of Agriculture projections.

In all, agricultural exports are projected to reach 170 million tons compared with 164 million in 1979–80. The dollar value will be about $47 billion, a rise of 16 percent and an enormous credit for the US balance of payments. This gain is occurring despite the world economic slowdown, short corn and soybean crops in 1980, and the partial embargo on sales to the Soviet Union. Clearly, the embargo, while it may have handicapped the Soviet Union in its grain import plans and cost it extra foreign exchange, did not slow the American farm-export boom. . . .

Exports of grain and soybeans have been growing rampantly in the last 30 years. . . . In 1950, we exported only 15 million tons of grain, as compared with 119 million this year. The biggest growth has come in corn and soybeans (including processed soybean meal), the ingredients of meat, poultry, egg, and milk production. Rising incomes in developing as well as developed countries have lifted demand for the high-protein foods derived from livestock. Soybean exports more than tripled in the 1960s and 1970s. Feed-grain exports (mostly corn) increased sevenfold!

We now export more than 60 percent of our wheat; more than half of our soybeans, cotton, and rice; nearly a third of our corn. "In terms of competition for land," writes Philip M. Raup, a University of Minnesota economist, "we have reached a degree of agricultural export dependency for which parallels can be found only in the Antebellum cotton South or in our Colonial era. . . ."

The export expansion has called forth an expansion of land devoted to the export crops. All of the 50–60 million acres held out of production under government reward and penalty programs in the 1960s have been brought back into cultivation. In addition, other meadows and pastures have been plowed and planted with grains and soybeans. In 1950, American farmers exported crops grown on 50 million acres, 14.5 percent of the cropland harvested. By 1975, crop acres used for export had doubled to 100 million, and by 1978 had climbed to 133 million. That was a third of crop acres harvested. Since then farmers have further increased grain and soybean plantings. This year the USDA projects an increase of 14.6 million acres of wheat over the 1978 figure. Total feed-grain acreage will be down slightly, because of a switch from grain sorghum to wheat in the Great Plains, but corn plantings are expected to increase by 3.4 million acres over 1978. Soybean plantings are projected to increase by 5.9 million acres.

Part of the increase in grain and soybean land comes from continuous grain crops or, in the Corn Belt, from rotating fields only between corn and soybeans—instead of the old practice of including two years of oats and clover or alfalfa in every five- or six-year rotation. Chemical herbicides and insecticides make feasible these practices by controlling weeds and insects which otherwise would flourish in year-after-year plantings of corn and beans. However, this heavy cropping, especially in the case of intertilled crops such as corn and soybeans, greatly steps up the rate of erosion.

Soil erosion is a far more important problem in maintaining agricultural resources than the loss of land to agriculture for nonagricultural uses, an issue that has aroused popular alarm in recent years. The conversion of farmland to shopping centers, housing developments, highways, and factories stirs the emotions of people worried about the world food shortage.

The government's recent National Agricultural Lands Study found that 3 million acres of farmland are lost to urban development each year. But only about 1 million of the 3 million acres are cropland. . . . Now that the land retired under crop-control programs has been brought back into cultivation, the nation's total area of cropland is about the same as in the 1920s and 1930s, around 400 million acres.

Vast additional areas could be brought into crop production by clearing, drainage and irrigation, but at high cost—and much of the land would be fragile, with thin soil especially vulnerable to water and wind erosion. It would be sounder national investment policy to protect our most productive cropland against deterioration.

Undoubtedly, the nation could continue to expand grain and soybean production, given favorable weather, by developing new cropland, applying better erosion control on all cropland, and by adding more fertilizer and pesticides—though probably not as robustly as Secretary Block suggested in the full exuberance of a freshman Cabinet officer at the Farm Bureau meeting. After all, the new cropland brought in would be much less productive than what farmers are planting now, and nearly all of the most productive land is already being farmed with the latest technology (except for erosion control).

The crux of the food-agriculture problem facing America is soil resource maintenance vs. unrestrained grain exports. At the rate exports are increasing, the danger of overexploitation of the land with permanent damage to productivity is becoming imminent. Yet exports have been the lifeblood of American agriculture, the most productive in the world, and are vital to farm prosperity.

II

Exports of agricultural products have always been important to America—from Colonial tobacco and indigo to cotton; later to wheat, rice, pork, and lard; and then to corn and soybeans.

But the most recent rise in exports of agricultural products is truly phenomenal, even in American history.

Agricultural exports began to expand in the Eisenhower administration, and much of this expansion was initially accomplished through subsidies under Food for Peace. Wheat exports under P.L. 480 averaged 12 million tons a year from 1960–61 to 1965–66, then fell to around 5 million tons in the early 1970s and were surpassed by commercial sales. Feed-grain exports under P.L. 480 have always been small and soybean exports negligible. The increase in exports of these feedstuffs has been almost entirely a commercial proposition, fueled by world prosperity and active promotion by feed-grain and soybean sales organizations.

With technological advance specialization, further increasing export-crop production. The case of corn in instructive. Post-World War II hybrids could use larger amounts of fertilizer effectively, withstand dry weather, and yield more. The availability of cheap chemical fertilizer to replenish nitrogen made it possible to eliminate legume rotations and to cut the hard work of speading manure. Continuous corn became feasible throughout the corn belt, especially on flat land, Fertilizer from factories replaced nutrients (at least all that seemed essential), and chemical insecticides handled the bugs which otherwise thrived in continuous cornfields. Larger machinery permitted planting, cultivating, and harvesting bigger fields with less human work time. Moreover, chemical herbicides enabled farmers to greatly reduce cultivation for weed control. . . .

Specialization increased the vulnerability of large-scale producers to the economic vicissitudes of one commodity or two. . . .

The petroleum crisis also stimulated the drive to expand farm exports in the 1970s. The country's unfavorable balance of payments encouraged the government to push for larger dollar earnings from the sale of farm products overseas. Government spokesmen have often elucidated the value of increasing farm exports at a time of rising oil-import costs, though the main cause of larger grain exports, of course, has been rising income per person abroad.

Two new economic forces could have restraining effects of farm specialization and farm size in the future.

One of these is the energy problem—rising costs of, and dependence on, foreign oil. Big farming and agribusiness no doubt will continue to be able to obtain favorable allocations of scarce energy resources for agricultural power, pesticides, and fertilizer. Nevertheless, farmers may shift to more crop rotations, use of organic fertilizers, and biological controls of pests if oil prices continue to mount, as they certainly will.

The second restraint on farm enlargement and exports may come from the deteriorating condition of farmland, caused by overcropping and excessive use of chemicals.

III

The rapid growth of export demand for American foodstuffs and the inexorable progression of population in the third world have led to Malthusian alarms. America and other developed countries should economize on the use of grain in livestock feeding, it is said, saving more for direct consumption by less developed countries. In addition, America should not allow Japan, Europe, the Soviet Union, and other high-income countries to buy our grain for feeding livestock and enriching their already adequate diets. We should reserve more of our supply for needy countries.

Experience in the 1970s showed the usefulness of large grain reserves in softening the shocks of variations in world production. The United States has made efforts to establish a cooperative grain reserve program with other countries, as proposed by directors general of the UN Food and Agriculture Organization and several national and international food study groups. But that has not panned out; the other rich countries appear to be unwilling to help pay for a reserve program with the United States dominating such a massive share (two-thirds this year) of the world grain trade. But the stake of the United States itself in a more stable grain market could well justify a bigger national reserve program than we have been carrying. Moreover, the United States has always recognized a responsibility to provide relief for famine and emergency food shortages in poor countries. Building an adequate reserve of grain should be high on the new administration's agenda.

President Reagan and his food-policy advisers will have to make farm production and export decisions with such considerations in mind. Much as it goes against the free-trade, free-enterprise doctrines of the new administration, a government policy on the disposition of grain exports will be necessary in the future—sooner rather than later if the world should run into a series of dry years in the major grain-growing areas of North America, India, the Soviet Union, and China at the same time.

The earth's finite supply of petroleum and natural gas, plus the cartel pricing policies of leading world producers outside North America and the Soviet Union, have caused Americans to turn to what are called "renewable" resources for producing energy. Of these, organic materials including crop wastes, garbage, wood, sugar cane (used extensively in Brazil for alcohol fuel), sugar beets, and grain are being studied as sources of alcohol, primarily for transport-vehicle fuel. In the United States, corn has been seen as the principal source, mainly because of the abundant supply. The Carter administration started a large-scale corn-ethanol program, with loans and grants to encourage development of fermentation and distilling factories.

Conceivably, the gasohol market could take as much as a billion bushels of corn (25.4 million tons) a year by the end of the decade, assuming the government subsidies increase with inflation.

The claims of the "feed the world" idealists, the commercial grain exporters, and the gasohol promoters cannot all be met without strain on domestic food consumers; that is, everybody. Choices must be made. These claims all stem, fundamentally, from the long history of American agricultural surpluses, bountiful production, world-leading agricultural research, and the tradition of big exports. The idea of scarcity of food production has never entered the head of the typical American farmer—or the city-dweller once removed from the farm, for that matter.

But the bigger claim, if one looks beyond the near decades, is to consider the state of the nation's agricultural resources. Long-range planning has not been a notable characteristic of this democracy. But our oil is clearly running out, and so is the most precious of our resources—topsoil.

IV

Soil productivity has sometimes been viewed as a renewable resource: You can replace the depleted nutrients with chemical fertilzers. Shortly after World War II, when new fertilzation and weed- and insect-control methods were being adopted rapidly, the soil conservation movements which had bloomed in the 1930s began to fade. I remember a frontrunning farmer telling me in the early 1950s that it was foolish to worry about losing topsoil. He advocated growing corn and soybeans on the hills, saying he could restore the natural soil productivity with chemicals; he scorned growing clover and alfalfa as money losers.

In less extreme form, many farmers followed this policy, and so did the agricultural scientists and educators at the Land Grant agricultural colleges. . . .

Soil scientists who expressed alarm about losses of topsoil didn't get much of a hearing until recently. The chronic tendency to overproduction of farm products and the deliberate removal from production by government policy of 50-60 million acres of cropland made concern over soil resources seem absurd. But the return to full farm production in the 1970s and more evidence of big soil losses have forced a new look.

The National Resources Inventories conducted by the USDA three years ago showed that erosion is taking place on much of the nation's best cropland at a faster rate than the soil can be replaced. Topsoil lost by erosion is slowly rebuilt through weathering of the less productive subsoil, and the process can be speeded to some extent by cultivation and large additions of nutrients and organic matter.

The USDA has assigned soil-loss tolerances for most cultivated lands. These "T-values" never exceed five tons per acre per year (equivalent to about a half-inch in 15 years). For thin soils the tolerable level of soil loss is less than five tons. Losses beyond the T-values signify a deterioration of the resource and a long-term decline in productivity. That is the topsoil is not replacing itself. The T-values are in some dispute among soil scientists, but they give us a rough measure of the state of soil resources. . . . The UDSA inventories indicated that 97 million acres of cropland are eroding at rates exceeding five tons per acre per year. . . . That's about a quarter of the nation's cropland.

In critical areas, soil losses are much greater. Nearly a third of the land in row crops in the Southeast, and in the corn belt about a fifth of the row-crop land, is eroding at the rate of 10 tons per acre per year. "Iowa, " its secretary of agriculture said, "has the dubious honor of having the highest average soil loss of any state in the nation." Western Tennessee is another area with heavy soil losses from water erosion. Heavy cropping of corn and soybeans is the reason in both places.

As export and other demand for food increases, the pressure rises on land susceptible to erosion. Even the relatively flat lands of Iowa are eroding badly, from both water and wind. What is worse, though, is the washing of hilly land brought into row-crop cultivation in response to high prices for corn and beans.

John Timmons and D. C. Cory, of Iowa State University, have estimated that under a "high export scenario" through 1985 soil erosion losses for the corn belt would increase by 72 percent—and their scenario was considerably below the actual exports of 1979-80 and 1980-81. . . .

Nobody knows for sure how long present soil losses can be experienced without a decline in national food-producing capacity. Erosion may not be the only cause of deterioration of soil resources from heavy grain cropping. Compaction of the soil from big machinery on large-scale, one- and two-crop farms already is a problem in some places. Bigger machines with more power may solve this problem for a while, but there must be limits. The relations between soil productivity and rates of erosion and soil compaction are not precisely known. It is evident, however, that there is an analogy between overuse of cropland and the extraction of petroleum or coal. As John Timmons has pointed out, both soil and petroleum are formed by geological processes. Through excessive erosion, soil becomes an exhaustible resource—essentially nonrenewable. Petroleum is des-

tined to have a short lifespan on Earth, but topsoil can be used and reused indefinitely if properly cared for.

In sum, evidence is accumulating that our use of agricultural resources is verging on the reckless, that the soil is being mined to the detriment of productivity for the long run. Agricultural production and foreign trade policies up to now have ignored the long-range resource maintenance factor. It is time for a change.

V

America's food-producing capacity is a powerful asset to the domestic economy and to this country's conduct of world affairs. Despite the wonders of modern agricultural technology, this capacity rests heavily on the nation's primeval soil and water resources. Agricultural and foreign trade policies which result in overexploitation of soil resources and a loss of sustainable capacity to produce would endanger the nation's future.

How then can we preserve the resources that make our food-producing capacity possible? The answer must be threefold: setting priorities among major claimants on agricultural production; a natural resource conservation policy, including both protection for farmers and incentives for their participation; and, finally, intensified technical assistance to developing countries for their food production.

Considering the ominous reports on soil losses from the nation's most competent soil scientists, one possible source of strain on the land could be eliminated with minimum pain—gasohol. Despite the wild projections of some biomass alcohol promoters, the hard fact is that a significant amount of transport fuel from grain would be very costly in terms of food supplies and soil depletion. . . .

It would be disastrous to try to run our cars by using food resources for the job.

The farmer has a legitimate claim to protection against a policy of conserving resources that would limit his markets and lower his prices—even if the land being conserved is his private property. The fact is that soil conservation—including investment in terraces, contour farming, and the withholding of land from cash-crop production—is too costly for most farmers to do on their own. The average farmer does not have a long enough planning horizon to justify the investment. He cannot expect the land to improve enough to pay off for him in the 25 or 30 years he expects to be farming.

So any national agricultural resource conservation policy that will work must include means of paying the farmer to cover his extra costs. The acreage set-aside system provided in the 1977 Agricultural Act is one device for reducing production and holding it more or less in line with a reduced export volume, thus offsetting the effect of lower exports on prices. The act expires this year. It could be modified to assure the adoption of more conservation practices, but that would cost more money, which President Reagan does not want to spend.

After all those 40-odd years of crop acreage limitations, a really fair and effective plan has yet to be devised. Paying farmers subsidies for withholding land and for preventing erosion probably would be fairer and more effective, however, than paying subsidies based on number of pounds or bushels produced. The latter method simply rewards efforts to conserve less and produce more on the eligible land.

If the United States is to maintain its food-producing capacity, it will have to take action to prevent deterioration of the soil base. That very likely means in the next two decades the withholding of production of grain and soybeans to some extent, depending on the ability of new agricultural research and technology to increase output per acre without soil losses. This will be extremely difficult to accomplish politically at a time when world demand from both developed and underdeveloped countries is certain to increase, because of population growth and income improvement.

But America cannot "feed the world"—that is, meet foreseeable food deficits—under any conceivable circumstances, even with all-out production now—to say nothing of the needs in the 21st century, soon to be upon us. Concern over the world's hungry and malnourished must be turned toward development of their local food-producing power. Allowing them to become dependent on the United States for steady supplies of grain, and serving as a ready reserve granary as well, is no service to the hungry—because we can't keep it up.

Plowing money, fertilizer, seed, technical assistance, and, above all, applied research into the agriculture of the developing countries would pay off far better than exhausting the soil productivity of America in order to supply the mounting world demand.●

MAKING PBS INDEPENDENT

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. COLLINS of Texas. Mr. Speaker, soon the Corporation of Public Broadcasting authorization bill will come to the House floor for a final vote. I would like to bring to my colleagues' attention selections of a lucid commentary by R. Emmett Tyrell, Jr., in the June 1 Washington Post. Mr. Tyrell clearly points out the need for reduced taxpayer spending for PBS.

I propose the funding figures be brought in line with the Reagan budget to $110 million for fiscal year 1984, $100 million for fiscal year 1985, and $100 million for fiscal year 1986.

We must keep public broadcasting in proper perspective when budgeting a reduced amount of Federal tax dollars.

The following from the Washington Post is Mr. Emmett Tyrell's sound reasoning in support of moderate budget reductions for PBS.

The mulcting of the middle class for the benefit of the poor and the rich is luminously manifest in the activity of the Public Broadcasting Service. Established as an alternative to commercial television, PBS's special audiences were the poor and the rich. The poor were to get educational programming and local access. The rich were to get culture. In these endeavors PBS has been tolerably successful. It has been particularly successful in cultural programming. Four nights a week it brings splendid productions of the performing arts to the tube.

Unfortunately, it has also been expensive. Federal aid to non-commercial television has swollen from a few million dollars in the late 1960s to more than $200 million in 1980. The Reagan administration wants to decrease this sum over the years ahead until the taxpayers' bill comes to only $100 million. I say this will still be highway robbery.

There are in Washington and elsewhere in the land a growing number of Reagan supporters who judge the Reagan administration's budget cuts moderate. They believe that the growth of government over the past 15 years has been extravagant to the point of seriously debilitating our productive power, and they believe many of the programs that have accumulated ought not to be pruned but rather abolished.

Lewis Lehrman, chairman of the Rite Aid Corporation, says "the Reagan administration's present budget cuts are necessary but not sufficient. The budget program heads in the right direction but only a budget balanced at the current level of tax receipts will restore financial order. Thus the cuts should be deeper." In the case of PBS, the cuts can go $100 million deeper.

But PBS is about to be rendered thoroughly obsolete. Its funding will be merely a waste. Why not phase it out totally?

Advances in television technology are about to give the highbrows their cultural broadcasting and the poor their local access without costing the taxpayers anything at all. Very soon every home will be able to have as many as 60 channels linked to its television. Discs and cassettes are available. Now a half-dozen new commercial programmers are laying their traps for the PBS audience. Already one of these commercial programmers has lured the British Broadcasting Corporation away from PBS. In time, all that will be left will be PBS's 250 local stations and its costly bureaucracy.

ABC and CBS believe that they will be able to lure away PBS's highbrow audience and are making elaborate plans for their own cable networks. Apparently, many at PBS suspect these commercial ventures will succeed. Some are exiting PBS to form their own production companies. Others are letting up a howl. There really is no reason for howls. Rather, let us have some applause. PBS under Lawrence Grossman has shown that there is an audience, admittedly scarcely 5 percent of the whole television audience, eager for cultural fare. Working with such public stations as WNET in New York and WGBH in Boston, Grossman has created many useful programs. But now it is time to get PBS off the taxpayers' backs—and at a savings of $100 million.●

JAMIE WHITTEN: LIVES AND TIMES

HON. LINDY (MRS. HALE) BOGGS

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mrs. BOGGS. Mr. Speaker, a couple of weeks ago my hometown newspaper, the New Orleans Times-Picayune, published an article that provides a very fine profile of our dean and the chairman of the Appropriations Committee, JAMIE WHITTEN. It is rare that we see such a sensitive and thorough treatment of a public figure in a relatively short column.

I would like to share this article with my colleagues. It appeared in Edgar Poe's "Washington Panorama" column of May 16.

JAMIE WHITTEN: LIVES AND TIMES

(By Edgar Poe, Washington Bureau)

WASHINGTON.—The tiny town of Cascilla in Tallahatchie County, Miss., erected a historical marker years ago. It noted that the site was formed in 1833 after the Choctaw Indian cession.

Furthermore, it proudly proclaimed that the community of some 300 people (more or less) was the home of two distinguished sons. Mississippi Attorney General Greek L. Rice, now deceased, and Congressman Jamie L. Whitten.

Jamie Lloyd Whitten, elected to the House of Representatives 21 times, the first in November 1971, is the senior in length of service in the 435-member U.S. House of Representatives. By coincidence, second in tenure in the 97th Congress is a fellow Mississippian, Sen. John C. Stennis.

Chairman of the powerful 54-member House Appropriations Committee, he has never been busier during his 40 years in Congress, as a result of the Reagan administration's far-reaching budget and tax-cutting legislation. As a House Democratic leader, he has been cooperating with the Republican White House in connection with President Reagan's program.

As evidence of this he has been invited to the White House for conferences with President Reagan. He has a color photo of the president, Vice President George Bush and himself hanging in his office in the Rayburn House Office Building. He served in the House with Bush. Other fellow House members included Lyndon B. Johnson, Richard M. Nixon and Gerald R. Ford.

Whitten, after attending the University of Mississippi and the Ole Miss Law School, was principal of the Cowart Consolidated School in Tallahatchie County at the age of 20, long before the Harper Valley PTA and the Tallahatchie River became famous in movie lore.

He has served in Congress under eight presidents. When the 97th Congress convened in January, as dean of the House he administered the oath of office to House Speaker Thomas P. O'Neill Jr., D-Mass.

His long career of public service began when he was elected to the Mississippi House of Representatives when he was 21. His first vote was cast for himself. It was during the depth of the Great Depression of the early 1930s.

As the Mississippi First District congressman, he currently represents 20 of the state's 82 counties. He married the former Rebecca Thompson of Saltillo, Miss. Their children are Jamie L. Whitten, Jr., Washington, D.C. attorney, and Beverly Merritt of Washington.

Martin Sennet "Mike" Conner, one of the foremost governors in the history of the Magnolia State, was a brave man. The state government of Mississippi could not pay its teachers or its telephone bills. There was not enough money in the treasury to buy postage. Gov. Conner, to save the state from bankruptcy, called for a sales tax on everything from the cradle to the grave. Gov. Conner had his life threatened more than once.

Jamie Whitten, a member of the Mississippi House Ways and Means Committee, voted for the sales tax in committee and worked for its passage on the floor. This was perhaps the first blanket-type statewide sales tax in this country's history. The tax changed the history of Mississippi by shifting the tax base. Many other states and municipalities subsequently patterned tax measures after the Mississippi impost.

On March 3, 1932, the Mississippi Sun at Charleston, county seat of Tallahatchie, in a dateline dispatch from Jackson, said Whitten had taken the bar examination in the Capital City, and "out of a group of 39 applicants led the list."

At the age of 22 he became a partner in the Charleston law firm of Denman, Breland and Whitten. When he was 23 he was elected district attorney of a circuit covering Tallahatchie, Yalobusha, Panola, Tate and DeSoto counties.

Rep. Whitten, now 70, was elected to Congress at 31. The seat became vacant when U.S. Sen. Pat. Harrison of Gulfport, chairman of the Senate Finance Committee, died U.S. Rep. Wall Doxey resigned from the House to run for the Senate in the special election and was elected. Whitten ran for the seat vacated by Doxey and was elected.

After 14 months in Congress, Whitten was elected to the House Appropriations Committee and became its chairman in 1979. Thus Mississippi became the 15th state to have a member as chairman of the Appropriations Committee. As a member of that committee he has been a continuous supporter of river and harbor projects and a staunch supporter of the farmer. Twenty-nine times he has spearheaded opposition to efforts of presidents to abolish the soil conservation programs.

Whitten made the successful motion to override President Eisenhower's veto of a public works bill involving the now important Pascagoula, Miss., harbor, legislation that helped make it one of the leading shipbuilding points. It marked the only time an Eisenhower veto was overridden.

The Mississippian said in an interview a few days ago that he had a role in the House Appropriations Committee in getting the Tennessee-Tombigbee Waterway project "off the drawing board and under construction." This $2 billion barge waterway, now about half completed, will link the two rivers, via Columbus, Demopolis and Mobile, with the eastern Gulf of Mexico.

Although a lawmaker in Washington for four decades, Whitten still regards himself by temperament as an attorney. Said he, "I enjoy being right and proving it." As chairman of the Appropriations Committee, he is a member of all appropriations subcommittees. Since coming to Washington, he believes the congressional workload has increased 100 times for members and their staffs.

New that Cascilla's native son is the dean of the 97th Congress, perhaps it is time for the little town, four miles removed from the edge of the eastern border of the Delta, to erect a new marker. Mississippi Gov. William F. Winter, and the mother of Mississippi Lt. Gov. Brad Dye, are also natives of the Cascilla area.●

PRESIDENTIAL AUTHORITY AND RESPONSIBILITY COVERED IN INDEPENDENT AGENCIES' REGULATORY REFORM MEASURE

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. McCLORY. Mr. Speaker, I am today introducing a bill to give the President authority to exercise the same kind of review over proposed regulations by independent agencies that he exercises over executive branch agencies. Senator ROTH is introducing companion legislation in the Senate.

The language of the bill is straightforward and its intent simple. By written directive, the President may require an agency to, one, transmit to the President or his designee any notice of proposed rulemaking and any document relating to such notice at least 60 days prior to publication in the Federal Register; two, delay or refrain from publishing such notice; three, consider, reconsider, or make a decision concerning the adoption of a proposed rule; or, four, take any final action with respect to a proposed rule that is (A) consistent with the enabling statute and other applicable law from which the rule derives; (B) supported or justified by any record of documentation of the rulemaking proceeding, and (C) in the judgment of the President, necessary or appropriate to minimize conflict or interference with the achievement of significant statutory objectives.

Mr. Speaker, the Code of Federal Regulations today is contained in 165 volumes. In 1936, the first issue of the Federal Register was 16 pages long. Today's average daily Federal Register has grown to 200 pages. In 1970, the yearly number of pages was around 20,000; in 1980, the yearly number of pages had increased to something on the order of 74,000, nearly a quadrupling in a single decade. Clearly, the time has come to do everything we can to begin to cut back the regulatory maze by eliminating unnecessary and duplicative rules.

The legislation Senator ROTH and I are introducing simply enables the President to conduct a review of independent agency rules similar to that which he conducts of regular executive branch agencies. Because there has been some question as to the President's role in connection with these independent agency regulations, we have drafted legislation clarifying the President's authority. This should bring consistency and organization to the overall process of reviewing proposed rules, and of course the hope is that we will be able to achieve greater coherence in the total body of our regulatory language and perhaps some reduction in the weight of this burden and long overdue relief to the American public and American business.●

EASING THE INHERITANCE TAX FOR MENTALLY AND PHYSICALLY DISABLED CITIZENS

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. EDGAR. Mr. Speaker, last week I introduced H.R. 3709, a bill designed to ease the tax burden on the approximately 42 million physically and mentally disabled people in the United States. The current Tax Code makes no allowance for their special condition and imposes the same rates on them as on other citizens. H.R. 3709 would change that.

One of the cruelest taxes on the disabled or mentally retarded is the inheritance tax. Under current law, a 32-percent tax is levied on any estate over $175,000. This amount comprises such things as savings, home and property value, and any insurance benefits. This tax may be fair to the ordinary citizen who is able to work to support himself/herself, but to mentally and physically disabled people it eliminates a sizable chunk of the money they need to support themselves for the rest of their lives.

There are proposals to ease some of the economic pressures on the disabled and the retarded. In particular, I have cosponsored legislation introduced by Representative TOM DOWNEY which calls for the creation of an I.R.A.-like account which parents can use for the benefit of their disabled child. However, due to limitations on the yearly amount that can be deposited in the accounts, they offer little relief to elderly parents who saved all their lives to provide for their disabled children.

H.R. 3709 would give the disabled or retarded person a $250,000 exemption from the inheritance tax. This exemption is modeled after one for the same amount now extended to estates left to a surviving spouse. In effect, HR. 3709 would simply expand this "spousal exemption" to estates left to disabled or mentally retarded children. To insure against abuse the bill provides that the recipient must be a child of the decedent either by blood or legal adoption and defines "disabled" in the terms already used in other IRS exemptions.

In practical terms, H.R. 3709 will enable the mentally and physically disabled to be self-sufficient. In these days of less government I think it makes sense to help people live on their own rather than rely on government programs. Most importantly, I think H.R. 3709 will give the physically amd mentally disabled a measure of dignity and hope. The text of the bill is as follows:

H.R. 3709

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. ESTATE TAX DEDUCTION FOR PROPERTY PASSING TO A DISABLED INDIVIDUAL WHO IS A CHILD OF THE DECEDENT.

(a) IN GENERAL.—Part IV of subchapter A of chapter 11 of the Internal Revenue Code of 1954 (relating to taxable estates) is amended by adding at the end thereof the following new section:

"SEC. 2058. BEQUESTS, ETC., TO DISABLED INDIVIDUALS WHO ARE CHILDREN OF THE DECEDENT.

"(a) ALLOWANCE OF DEDUCTION.—For purposes of the tax imposed by section 2001, if—

"(1) the decedent does not have a surviving spouse, and

"(2) the decedent is survived by a disabled child who, immediately after the death of the decedent, has no known parent,

then the value of the taxable estate shall be determined by deducting from the value of the gross estate an amount equal to the value of any interest in property which passes or has passed from the decedent to such child, but only to the extent that such interest is included in determining the value of the gross estate.

"(b) LIMITATION.—The aggregate amount of the deductions allowed under this section (computed without regard to this subsection) with respect to interests in property passing from the decedent to any disabled child shall not exceed $250,000.

"(c) DISABLED CHILD DEFINED.—For purposes of this section, the term 'disabled child' means an individual who—

"(1) is a child of the decedent by blood or legal adoption, and

"(2) is physically or mentally incapable of caring for himself (within the meaning of section 44A(c)(1)(B)).

"(d) LIMITATION IN CASE OF LIFE ESTATE OR OTHER TERMINABLE INTEREST.—A deduction shall be allowed under this section with respect to any interest in property passing to a disabled child only to the extent that a deduction would have been allowable under section 2056(b) if such interest had passed to a surviving spouse of the decedent.

"(e) IDENTIFICATION OF PROPERTY PASSING FROM THE DECEDENT.—The determination of whether an interest in property passes from the decedent to any person shall be made in accordance with section 2056(d).

"(f) APPLICATION WITH SECTION 2057.—A deduction under this section shall be in addition to any deduction for which a disabled child may qualify under section 2057."

(b) CLERICAL AMENDMENT.—The table of sections for part IV of subchapter A of chapter 11 of such Code is amended by adding at the end thereof the following new item:

"Sec. 2058. Bequests, etc., to disabled individuals who are children of the decedent."

SEC. 2. EFFECTIVE DATE.

The amendments made by the first section of this Act shall apply to the estates of decedents dying after December 31, 1981.●

SUPPORTING VETERANS' LEGISLATION OF JUNE 1, 1981

HON. THOMAS M. FOGLIETTA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. FOGLIETTA. Mr. Speaker, I commend the gentleman from Mississippi, Mr. MONTGOMERY and his Veterans' Affairs Committee for their fine work, and I also applaud my colleagues in this body for their passage of H.R. 2156, H.R. 3499, H.R. 1714, H.R. 1100, H.R. 3423, and H.R. 2039. I have long been concerned about the plight of our veterans, particularly of the Vietnam era, and I believe that this legislation represents important programs for these brave Americans.

The effects of these resolutions cover a broad range of veterans' issues. For instance, individuals who believe that contact with the chemical defoliant, agent orange, is responsible for their current health problems are now eligible for VA hospital care. This benefit, which becomes available after a VA doctor identifies agent orange as a possible cause of the illness, will ease the burden inflicted by this toxic substance. Also, the scope of the current agent orange study will be expanded to include other chemicals utilized during the Southeast Asian conflict.

Another grave medical problem confronting the Vietnam veteran is the battle trauma many still experience even after having been out of combat for several years. Tuesday's action addresses these difficulties. Previously, the VA's psychological readjustment counseling program had been scheduled to expire at the end of fiscal year 1981. However, because of the Veterans' Health Care Act, this important, highly successful program received an extension to the end of fiscal year 1984. Despite the opposition of the Reagan administration, this body passed a compassionate piece of legislation to ease the suffering of our courageous vets.

Our veterans' financial, as well as physical and emotional, well-being was also greatly improved on Tuesday. The Veterans' Training and Business Loan Act attempts to rectify the unemployment problem rampant among these former soldiers. I believe that the 2-year extension for on-the-job training and vocational education provides for the development of marketable skills. With the veterans' business loan program, $25 million is earmarked for small business loans to help vets create and nurture entrepreneurial activities.

Such diverse groups as the American Legion and the National Association of Home Builders have declared their support for veterans' home loan guarantees. I also strongly endorse this

bill, as it authorizes the VA to insure home mortgage loans which have provisions for graduated payments plans. With prohibitively high interest rates showing no sign of subsiding, this program is essential for veterans to continue in the great American tradition of private homeownership.

For veterans in Philadelphia and elsewhere, I again heartily cheer these instances of compassionate legislation.●

CONGRESSIONAL SALUTE TO THE HONORABLE AGNES BROOKS

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. ROE. Mr. Speaker, on Tuesday June 9, the residents of my congressional district and the State of New Jersey will join with the officers and members of the Lenni-Lenape Girl Scout Council of New Jersey in honor of a most distinguished citizen, community leader, and good friend, the Honorable Agnes Brooks, whose 60 years of outstanding service and exemplary achievements in girl scouting of national and international significance, has truly enriched our community, State, and Nation.

Mr. Speaker, we are all aware of the meaningful investment in the enrichment of the quality of our way of life that girl scouting has made here in America and in testimony to the leadership endeavors and sincerity of purpose that Miss Agnes Brooks has made, generously and unselfishly extending her time and personal efforts over the past three decades to the youth who participate in scouting. I would like to insert at this point in our historic journal of Congress a profile of Miss Agnes dedicated to the girl scout program—the meaning of the promise and laws, service to others, troop management by the girls themselves, citizenship, international friendship, health, and safety—as follows:

MISS AGNES BROOKS

Miss Agnes Brooks, recipient of the prestigious Juliette Low World Friendship Medal, celebrates her sixtieth active year in Girl Scouting this year.

Miss Brooks began Girl Scouting in Paterson in July of 1921, in what was then Troop No. 1. The troop leader was Miss Eva Veneman, a charter member of the original Troop No. 1 which was started in 1917.

In 1924 Miss Brooks joined a newly organized troop at the Lakeview Presbyterian Church, rising in rank from Second to First Lieutenant, and four years later to Captain. The Troop was known as Lakeview No. 2 until 1934, when with the changing of troop numbers by the Council, it became Troop No. 33. (It remains an active troop.) Continuing as a leader through the years, Miss Brooks has seen more than a thousand girls share in the Girl Scout Program. At present Miss Brooks is a registered Girl Scout Adult assisting the Council in promoting international scouting and the Juliette Low World Friendship Fund.

She resigned the chairmanship of the Paterson Neighborhood in June, 1977 and continues to assist her community in promoting international Girl Scouting and Girl Guiding events and programs.

Miss Agnes, as she is fondly called, has a special interest in the International Program. She has visited Our Chalet four times: in 1956, 1959, 1964 and 1967. She stayed at Olave House five times, and a very special memory is having tea with Lady Baden-Powell at Hampton Court in 1956. Miss Brooks tells of five trips to Our Cabana; the warm hospitality of the Hostel Buitenzorg in the Netherlands; and the charm of La Nef, the French Girl Guide Hotel near the Louvre in Paris. Miss Agnes says, "I have many wonderful memories; Girl Scouting is giving and getting a great deal."

With each visit Miss Agnes brought back pictures, brochures, crafts, souvenirs, skills; all of which she shared with troops, leaders and other neighborhoods. She is especially proud to have worked on a community service project with Mexican children while at the Cabana.

Miss Brooks continues her correspondence with Scouts and Guides throughout the world. Each year Miss Agnes sends each a Council calendar and when she receives Girl Scout/Guide material from others, she shares it with girls and leaders. (Example: "Matilda" from Australia).

Miss Brooks, as a leader and community chairman, annually planned international dinners with her troops, having each girl bring a food representing her heritage. She also organized an annual international food day for Leader's meetings.

Miss Brooks, a "Council Fire" subscriber, distributes all copies to interested leaders. She encourages girls to work in the World Trefoil Badge—First! Her other activities include troop tours of ethnic neighborhoods, the United Nations building, and sharing the UNICEF game "Lingo" in three languages available for her troops.

Miss Brooks was a national staff member for 35 years. She was secretary to the fiction editor of American Girl magazine and secretary to the editor of Girl Scout Leader. Miss Brooks retired from G.S.U.S.A. in January 1972 when she was with the membership development unit.

We salute Miss Brooks, who currently resides at Dey Street, Paterson, and congratulate her on 60 years of Girl Scouting, 60 years of love, warmth, understanding and service.

Mr. Speaker, I appreciate the opportunity to seek this national recognition of Miss Agnes Brooks and all of her good deeds on behalf of the youth of America. Her direction, personal commitment, and substantive contribution to our young people throughout her 60 years of active membership in the Lenni-Lenape Council of New Jersey extended in the tradition of the Girl Scouts of America have truly helped to work toward the highest standards of excellence in the quality of life for all people in our Nation and throughout the world. We do indeed salute a great lady, beloved Girl Scout leader and outstanding American—the Honorable Agnes Brooks.●

MEMBERS COMMENDED—H.R. 1714

HON. DANIEL K. AKAKA

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. AKAKA. Mr. Speaker. I want to commend the chairman, Mr. MONTGOMERY, and the members of the committee for taking such quick action on H.R. 1714, a bill to provide memorial headstones or markers for those veterans who chose to donate their bodies to science, were cremated, and whose ashes were scattered without internment, or who were buried at sea.

Once this omission in the law was discovered, the committee was quick to see the need to provide this service historically available to all veterans to the few that had been inadvertantly left out. I am certain that the relatives of veterans and veterans themselves will not fail to be grateful for the committee's work. I am proud to add my support for this measure which was initiated from Hawaii.●

NOW IS THE TIME TO CRACK THE OPEC CARTEL

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. LANTOS. Mr. Speaker, the extortionist international oil monopoly is crumbling, and if we move now—and fast—we have a historic opportunity to crack the OPEC cartel. World oil prices are collapsing in the face of huge inventories and declining demand. If our great Nation acts at once—with decisiveness, intelligence, and courage—we can break the stranglehold of the petroleum colossus.

Although some of his suggestions will undoubtedly be controversial, William Safire, in this morning's New York Times, has presented a thought-provoking agenda which I am inserting into the RECORD to stimulate public discussion and decisive action at this critical moment.

[From the New York Times, June 4, 1981]

ESSAY—GLUTS TO THE GLUTTONS

(By William Safire)

WASHINGTON.—The time is ripe to crack the OPEC cartel.

For nearly a decade, oil producers have combined to force the rest of the world to pay all that the traffic would bear. An international monopoly has helped inflict a raging inflation on the world, stunted the growth of the poorest nations and brushed off all criticism of its price fixing with a cool "business is business."

Now all that is changing. High prices reduced demand for oil more sharply than anyone predicted, and enabled competing sources of energy to grow. Three years ago a "glut" appeared but was quickly absorbed by the economic collapse of Iran; last year another oil glut threatened but was postponed again by the Iran-Iraq war, which took another giant out of production.

Today the world is awash in oil. ("Awash in oil" is a mandatory phrase in all writing on this subject.) Refineries are refusing shipments; twice as much oil as normal is floating in tankers and storage; this week Mexico, not an OPEC member but tied to its pricing, lowered the price of crude oil by $4 a barrel; Britain and Norway are likely to follow. Nigeria, an oil-rich but cash-poor member of OPEC, is under pressure to lower its price.

Why the turnabout from shortage to oversupply? Not, as State Department Arabists fondly believe, because Saudi Arabia is producing 10 million barrels a day instead of its usual 8 million; that "favor" picks up less than one quarter of the production lost by the disappearance from the market of Iran and Iraq. Within a year, some Iraqi production may be back and the Saudis would cut production without sopping up the glut.

The reason for glutsmanship is plain: The high price is being artificially maintained by the monopolists; in a normal market, the unfixed price would drop. Thus the moment is propitious to smash the cartel. Not to weaken it, or induce it to be more reasonable, but to break it once and for all. Nothing personal, not for revenge; simply in our own economic self-interest.

The United States is the world's largest oil importer. Here is how we, acting alone, could bring the cartel to its knees:

1. Impose a $5-per-barrel import fee. What? Raise prices about a dime a gallon of gas? Are you crazy? Like a fox: the present high price of oil has reduced demand, encouraged conservation and brought in new sources of energy. A higher price would make oil even less attractive, ultimately forcing the producer's price downward. Meanwhile, the top $5 will stop flowing out to the sheiks and start flowing into the U.S. Treasury to the tune of $10 billion a year.

This idea was hooted at when proposed, in an extreme form, by John Anderson last year. But if repackaged as part of the plan to flex American economic muscle—with the proceeds to be refunded via tax credits used to lower income taxes—it ceases to be laughable.

2. Set import quotas for oil. This is a device to get monopolists fighting among themselves. Require oil companies to buy tickets, at auction, from the U.S. Government for the right to import oil. (Such allocations were given away in the 1950's; in the future, they should be sold.)

The companies would then go to foreign suppliers and pass on the cost of the tickets. Because oil is in oversupply and we are the biggest buyer, some oil producers would secretly go along—effectively discounting their prices without losing face. Whatever the posted monopoly price, the fluctuating deduction of the ticket price would enforce a true market price.

3. Play favorites among producers. Exempt Mexico from all oil import fees in return for a long-term, below-market contract for oil to fill our strategic reserve. Exempt Venezuela if it will resign from OPEC and join an all-American production alliance. Switch half our Libyan purchases to Nigeria, and the remainder if this does not affect Colonel Qaddafi's support of terrorism.

4. Put on the commercial squeeze. Tell the companies to slow down acceptance of foreign oil; run 15-knot tankers at 8 knots; stall on payments and go to court on contracts. Let the vulnerable suppliers feel a cash pinch, miss a few payrolls, endure a few strikes. Replace the arrogance of the seller with the arrogance of the buyer.

This is not ordinary business practice. But in kowtowing to a monopoly, or in seeking to break it, long-term business relationships mean nothing. To a cartel, only economic power counts.

Only if we force the monopolists to undercut each other will we discover if the Saudis are really the moderates they claim to be. Only when we take the lead will the other major importers, Japan and West Germany, see their self-interest in following.

The glut is a black-golden opportunity; with daring and imagination, we can seize this moment to turn back the assault on the American economy.●

DEFENSE PRIORITIES MUST BE REVIEWED

HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. VENTO. Mr. Speaker, in considering the supplemental appropriations bill as it relates to the Department of Defense, I am most concerned that the conference committee did not adequately address pressing needs while being overly generous with a program, the F/A-18 naval aircraft, which has serious cost and technical problems.

The Navy has documented a need for crucial spare parts, particularly naval missiles. However, instead of using our limited Federal dollars to meet these immediate needs, Congress has chosen to sink another $95.5 million into the F/A-18. This policy is unsound. Originally promoted as the low-cost, high-performance aircraft of the future, the F/A-18 is now the most costly program we have. The functions of this aircraft have been reduced to Navy light attack and Marine fighter roles. The Marine light attack function has been transferred to the AV-8B and the Navy fighter force is to be equipped totally with F-14's.

The Navy's initial operational test and evaluation of the F/A-18 found the aircraft unsuitable for this attack mission. Even if these difficulties were solved, the F/A-18 would still be a disaster for the Navy attack mission. The A-7, which the F/A-18 is supposed to replace, can carry the same bomb load twice as far while the A-6 can quadruple the F/A-18's bomb load over the same range as the A-7. Defenders of the F/A-18 note its supersonic capability but it cannot attain supersonic speed until after it has dropped its weapons and then only at a great reduction of range.

With regards to the Marine Corps fighter function, the question centers around the need to commit billions of taxpayers' dollars for this limited function. The F-14 has been shown in Navy comparisons with the F/A-18 to be three times as effective a fighter and twice as effective as an escort of strike aircraft. A second alternative would be the AV-8B. The Marine Corps has praised this aircraft's dogfighting capability and the addition of enhanced fighter avionics would provide the AV-8B with a logistics advantage.

In this time of a limited Federal budget, we must reorder our priorities. We cannot squander millions and billions in an inefficient program while facing severe material shortages in the field. For example, during the recent Lebanese crisis, five of our Harpoon-equipped ships in the Mediterranean had no missiles. I believe that Congress must reassess our defense priorities with a view to maximizing our defense capabilities.●

WILLIAM RASPBERRY COMMENTS ON CONGRESSMAN HYDE'S VOTING RIGHTS PROPOSAL

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. McCLORY. Mr. Speaker, the Voting Rights Act of 1964, which expires next year, is the subject of proposed extension or modification before the Civil and Constitutional Rights Subcommittee of the House Judiciary Committee. My colleague from Illinois (Mr. HYDE) is proposing a modification or substitute measure which has aroused substantial comment.

A most illuminating column in the Wednesday edition of the Washington Post by the distinguished black columnist, William Raspberry, discusses provisions of the Hyde proposal and Mr. HYDE's explanation of it in a manner which seems to me to be objective, fair, and enlightening.

Mr. Speaker, without further comment, I would like to include herewith Mr. Raspberry's column, entitled: "New Ways in the Old South," as follows:

[From the Washington Post, June 3, 1981]

NEW WAYS IN THE OLD SOUTH

(By William Raspberry)

"Some members of Congress," I wrote in a recent column, "have proposed to junk the 'pre-clearance' provision [of the Voting Rights Act] altogether. Rep. Henry Hyde (R-Ill.) argued last week that the states of the Old Confederacy affected by the act 'have been in the penalty box for nearly 17 years. They have improved their record.'"

The quote, Hyde now tells me, is accurate enough. The implication that be is among those members of Congress who would

"junk the 'pre-clearance' provision" is not, he says.

What his compromise proposal would do, he told me, is to remove the burden of proof from jurisdictions seeking to change their voting rules and place it on the complaining parties.

Hyde admits that his proposal would make it tougher for minorities to prove discrimination. "I'm not offering an eight-course banquet, but this is no cold cheese sandwich, either," he insists. His only interest, he says, is to come up with a piece of legislation that is passable. Otherwise, the crucial provisions of the act will die next year.

Under the present provisions of the act, which will expire in August 1982, unless extended by Congress, governments in the Old South cannot change their voting or election rules without first checking with the Justice Department to be sure that the proposed changes do not discriminate against black and Hispanic minorities. The requirement was based on the notion that state and local officials who had conspired to deny the vote to their black, and brown constituents could be expected to enact changes to circumvent the Voting Rights Act.

Under the Hyde "compromise," the jurisdictions would no longer have to prove that the proposed changes were not discriminatory; the complaining parties would have to prove that they were. "This is admittedly a significant change from the existing practice, and one on which reasonable men can differ," Hyde says of his proposal. "It is, though, my considered opinion that such an alteration may satisfy the many members of Congress who philosophically dislike administrative procedures, generally. These same members find them particularly distasteful when they are used to enforce civil rights laws and are therefore subject to political manipulation. I need only cite last year's congressional debate on the Fair Housing Act as an example of the problem an administrative remedy can cause when it is used to adjudicate civil rights issues."

As Hyde points out, the bulk of the 1965 Voting Rights Act remains intact. The crucial problem is "pre-clearance," whose "special requirements, not applied to other sovereign states, carries with it a stigma; furthermore, many members of Congress believe the inability to escape coverage regardless of performance generates resentment and serves as an incentive for improvement."

That is an interesting point, legally and psychologically. What Hyde is arguing for is some method by which a state in the Old Confederacy could demonstrate that it has joined the Union, that is no longer practices—or wishes to practice—voter discrimination. That could be a strong incentive to change.

He would offer a carrot. If a state could demonstrate that it has changed its pattern and practice—by showing that it has not had more than one objection to voting rule changes sustained against it for a certain period of years—the state would be exempted from the "pre-clearance" provisions of the Voting Rights Act. On the other hand, if any state—north or south—had two or more objections sustained against it, it would automatically be subjected to "pre-clearance."

The important point—philosophically in terms of fairness, and politically in terms of getting the act extended—is to remove the automatic and odious distinctions between sections of the country, Hyde contends.

He is aware of the fears among blacks that "pre-clearance" might go by the boards, but he insists the fears are not well founded. In addition, he says, his proposal would permit reimbursement of lawyers' fees for successful plaintiffs north and south.

Hyde says he is doing his "level best to fashion a compromise proposal which will, contrary to the claim you made in your article, mandate retention of the traditional pre-clearance remedy which many believe has helped achieve much of the success which minorities have had under the act. I also suggest that southern attitudes have changed, are changing and will continue to change in a constructive way."

In addition to burden-shift proposal, Hyde says he is also working on a bail-out provision by which states could escape the provisions of the act and that he would be willing to have the courts retain jurisdiction after bail-out "so that anyone who fears a return to 'business as usual' has a forum for immediate relief."

He insists that he is sincere in his effort to work out an acceptable compromise and "would appreciate it if I were not automatically lumped into a category with those, on either side, who are inflexible and unwilling to even consider some sort of middle position."●

NATIONAL WILD TURKEY WEEK AND DAY

HON. BUTLER DERRICK

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. DERRICK. Mr. Speaker, I am today introducing legislation, which would establish the American wild turkey, our only native big game bird, as an integral part of our country's heritage. By joint resolution, Mr. Speaker, I am requesting the President to proclaim the third week of November of each year as National Wild Turkey Week with the National Wild Turkey Day to fall on Thanksgiving Day.

Mr. Speaker, in colonial time, the wild turkey was an abundant source of food and saved many struggling settlers from starvation. It is traditionally thought that turkey was served at the first Thanksgiving. Benjamin Franklin believed the wild turkey was so important to the economy that he asked the Continental Congress to make it our national game bird. Though it was rejected in favor of the bald eagle, the wild turkey continue to be a valuable natural wildlife resource.

Most people take our wildlife for granted. However, the wild turkey and other wildlife can only be preserved through the cooperation of conservationists, sportsman, wildlife managers, environmentalists, and every American citizen using our outdoor resources.

Originally the wild turkey existed in untold millions in the Eastern two-thirds of the United States. Little thought was given to the perpetuation of the wild turkey, as our natural resources were thought to be limitless. As a result, wild turkey populations have declined rapidly. The turkey disappeared from Connecticut in 1813, Massachusetts by 1851, Indiana by 1900, and by 1920, it no longer existed in 18 of the 36 states in which it was native.

During the 1920–45 period, most observers were pessimistic about the bird's future. Meanwhile, forests that had been rendered unsuitable for the wild turkey by widespread logging and wildfire began to mature into suitable habitat, setting the stage for the wild turkey's recovery.

Highly trained biologists entered wildlife management in the 1940's and 1950's. Sophisticated techniques in live-trapping and transplanting of wild native stock rapidly evolved. Over 20,000 live-trapped, native turkeys have been transplanted in the last three decades.

The annual wild turkey harvest increased nearly threefold in the United States during the 1952–58 period. Today, wild turkeys have been reintroduced into eight States in the East and two States west of the Mississippi from which they were extirpated.

Despite recent successes, the turkey's future is not necessarily bright. Economic progress in the form of industrial and housing developments, construction of highways and dams, increasing human populations and unfavorable forestry practices such as large-scale clear cutting and conversion to monocultural systems, is destroying habitat on a tremendous scale.

I am pleased to note, Mr. Speaker, that there is an organization dedicated to restoring and managing rather than exploiting, the wild turkey and other valuable wildlife resources. The National Wild Turkey Federation, founded in 1973, is dedicated to the wise conservation and management of the American wild turkey and to strengthen the spirit of cooperation between landowners and users. And I am also pleased to note, Mr. Speaker, that presently under construction in my district and home county is the Wild Turkey Research Center.

Mr. Speaker, I am confident that the efforts alluded to above will be greatly facilitated by the passage of this measure, and I solicit my colleague's cosponsorship and support for this legislation.

INTEREST RATES—THE U.S. ECONOMY FOR THE NEXT FEW YEARS—THE EASTERN ESTABLISHMENT

HON. LARRY McDONALD
OF GEORGIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mr. McDONALD. Mr. Speaker, in this time of conflicting economic signals and promised solutions, it is most fitting to read what Prof. Antony Sutton perceives is our Nation's true course and direction. In an interview by Neland D. Noble, published in a June advisory letter by North American Coin & Currency., Ltd., Professor Sutton untangles many of the confusing signals we are receiving. I commend it to the attention of my colleagues.

SPECIAL INTERVIEW

With a new administration in Washington, it is appropriate to once again interview Professor Antony Sutton the author of such books as National Suicide, The War On Gold, Wall Street and the Bolshevik Revolution, Wall Street and the Rise of Hitler, Wall Street and FDR, and Western Technology and Soviet Development, 1917-1930. Professor Sutton was born in London, but became a U.S. citizen in 1962. He has been a professor of economics at California State University and a research fellow at the Hoover Institution on War, Revolution and Peace at Stanford University. Neland D. Nobel conducted the following interview on May 13th.

NAC. The theme of several of your books traces the operation of a non-elected elite in this country that has had great influence in both government and industry. For the benefit of our readers, could you briefly explain this elite's origins and how they've operated in this country?

SUTTON. First of all, there is most definitely an establishment elite. This is very difficult for many Americans to appreciate because of the Constitutional tradition of the U.S.; it's much easier for Europeans to understand it. In effect, it dominates foreign and (to a great extent) domestic policy. It's origin is within from what we might call international banking circles. This is rather an elusive phrase, because it certainly doesn't include all banks. What we are talking about is a very few multi-nationals. And the people who run these banks consider themselves to be international citizens rather than just American citizens. So, we're not talking about the average American banker around the corner. We're talking about a few gentlemen who view the world in global terms and who have in effect abandoned their U.S. citizenship.

NAC. Could you give us some examples where you find this elite in operation?

SUTTON. Yes. The most important by far was founded in 1919 and called the Council on Foreign Relations. It sprung out of some meetings in Paris just after WW-I and links back to the Royal Institute for International Affairs. The CFR has been dominant in US foreign policy since the 1930's, but reached its peak in the 1950's. In the 1960's, however, it was becoming too large with over 2,000 members, and so in 1973 the Trilateral Commission was founded by David Rockefeller of Chase Manhattan Bank. Zbigniew Brzezinski was the first National Director. The Carter administration had about 20 CFR/TC members in high government positions. That should give you some idea.

NAC. In your two volumes, Trilaterals Over Washington you demonstrate the linkage between members of the Carter administration and industry groups and how they work together. How does the Reagan administration stack up in terms of this international elite?

SUTTON. First, let's get back to the elections and the powers behind the scenes. The Carter administration was dominated by the Trilateral Commission. But almost unknown to most people was that the John Anderson campaign was also a Trilateral front. I looked at the financing of Anderson in the Federal Election Commission reports, and I found out that the CFR had heavily financed Anderson. Getting to Reagan, who is himself NOT a Trilateralist, I honestly believe that he represents traditional American values and that's why he got elected. But the Trilaterals needed such a man at that point because, over the last decade or two, a vast underground has developed in the US—through the newsletters, through the gold and silver markets and even the anti-establishment culture of the left, etc. So, what was needed at the time of the election was a Presidential candidate who would reflect "grass roots" values, and Reagan was the ideal man, so the Trilaterals got behind Reagan.

The makeup of his administration is very interesting. You can superficially only spy a few Trilaterals—Caspar Weinberger, George Bush—but that's not all. For example, William Casey (CIA), Malcolm Baldridge and General Haig are CFR and Regan indirectly reflects the elite through his Wall Street background. At the moment what you've got is a struggle within the administration (regarding the making of appointments) between two groups. On one side you've got the grass roots people, and on the other side you've got those international globalist thinkers who want to take us into a new world order.

NAC. What is the elite's attitude toward money?

SUTTON. If you want to, you can go all the way back to the Constitutional debates between the Jeffersonians and the Hamiltonians. Basically, to control society politically, you've got to have a fiat money. You see this today in the Federal Reserve System, which is a private company—not government—established in 1913 with the power of the banks behind it. Essentially the FED is a control mechanism for this elite, so they must have a fiat money system. The last thing they want is gold and silver, because they give citizens individual sovereignty. You can't just create gold and silver at will as the FED can fiat paper money. In other words, there's no way to control the monetary system if you have gold or silver in the system. This is the basis of their monetary ideas and they fully understand it and use it to their advantage.

NAC. Edwin Meese made a statement recently that the administration had no intention of bringing back the gold standard. Do you think gold's chances are doomed?

SUTTON. I think conservatives have been much too optimistic about what's going to come out of the Reagan administration. In my view, you can dismiss any idea that we're going to back to the gold standard. First, the elite is currently both panicky and insecure. It knows that it is under attack, where the attack is coming from, and they're afraid of those behind it. Second, the elite has tremendous resources and they are going to start to bring these resources to bear. So, in the long run the only way we're going to get back to a gold standard is through Congress and the electoral process.

NAC. Can the Reagan administration manage a controlled deflation of the U.S. economy?

SUTTON. Very definitely not. There are very few signs, when you look at the numbers, that we're heading into a controlled deflation. And even if we were, it's a process that is extremely hard to control. Mass psychology plays an important part, so, if we get into a deflationary spiral there's no telling where it will stop. I think Franklin Roosevelt found this our in 1933-34 when he tried to inflate the economy and saw how difficult its was. And of course the FED finds out how hard it is today on a daily basis. It's very difficult to control with any degree of fine-tuning what happens in either a financial or economic system.

NAC. If not a controlled deflation, what's Reagan going to bring us? And what about his budget cut rhetoric?

SUTTON. I'm glad you said "rhetoric", because Reagan's cuts are not cuts at all. Let me give you the numbers from America's New Beginning—A Program for Economic Recovery. First of all, Reagan's proposed cuts are only reductions in what Carter proposed. In other words, we aren't cutting at all, but just reducing the increase. Carter's proposed expenditures for 1981 is $657 billion. Reagan proposed 1986 budget is $912 billion. It is obvious that we are not talking about real budget cuts, but rather a 50 percent increase over the next five years. So, like you said, we're getting rhetoric.

You see, the elite needed a man like Reagan, because the whole financial situation was getting out of control, yet, even the elite saw the need for re-armament. If they were to impose re-armament PLUS the Carter budget, the situation would have gotten out of control very quickly. So, what they needed was the rhetoric Reagan was preaching which was supposed to dampen inflation. But you have got to look beyond the rhetoric to the numbers, and you find that what the Reagan camp is doing is making minor adjustments, on top of which they will put re-armament costs. So, we are going to get a 50 percent increase, not a reduction.

NAC. In your book, National Suicide, and in your three volumes on the transfer of U.S. technology to the USSR, you documented massive transfers of military technology to the Soviets which was financed in fact by this elite. Why do you think the elite is suddenly interested in re-armament? Isn't this a contradiction to their previous policy?

SUTTON. No. Because you make money out of conflict. Over $400 billion in contracts came out of the Vietnamese War. That's one aspect. Another aspect is that even the elite, which frankly is far more stupid than is generally believed, can see the massive expansion of the USSR—Angola, Mozambique, Central America, Cambodia, Iran, Afghanistan and South Africa—even the elite has finally had its eyes opened. The USSR means what they say; they are going to expand. And this is why I said earlier that the elite has become panicky and why they have to have re-armament.

NAC. When it becomes clear that Reagan's cuts are NOT cuts, what will be the re-

sults in the financial markets by the mid-1980's?

SUTTON. You know, 5 years ago, I predicted 20 percent interest rates and I hit it right on the nose. I think you're going to see in the mid-1980's interest rates which have been unknown in this country since probably the mid-nineteenth century—you are going to see them at about 30 percent. And you're going to see rates of inflation of the same order. It's just a matter of time once the current "deflationary bubble" is burst. And events over the next eighteen months will slowly impress this upon people. But you cannot time it exactly. Gradually, inflationary expectations will re-emerge, and of course, when the majority begins to expect inflation and we get a resumption of anticipatory spending—then you are going to see inflation like you've never seen it before. I see no way it can be avoided.

NAC. The elite's past connection to gold is evidenced by Rhodes Trust's underwriting of the CFR in 1919. But what is this connection today?

SUTTON. I'm speculating here. But if you were to look at the Rothschild Investment Trust in Paris and London, I bet you'd find they've got about 30 percent in gold assets. In other words, there are two elites at least. The elite based on the Rothschild empire has a somewhat different view—more European and African—than the elite in the U.S.

NAC. Is there a connection between the gold mining industry today and the operation of these elites? Is the attack on gold from the IMF and the U.S. Treasury simply a cover for them to accumulate gold assets?

SUTTON. It may be, but I've no proof of that. I think what you've got is one of the elites in the world, based in Europe, has always been gold oriented. They of course are the ones who control Anglo America. I think this European elite is heavily tied to gold and has different objectives than the American elite. Interestingly enough, you've got representatives sitting in with the Trilaterals. So, while they may compete on one level, they are cooperating on others.

Whether the Rockefeller elite owns gold, I do not know. It obviously can get more political power by manipulating a fiat money system.

NAC. We've had statements from Reagan that he'd like to see gold at $250, and Volcker has said the same thing. And of course Volcker made his public attack on Mr. Hunt during the time of negotiations for the special loans to Hunt.

SUTTON. You've made a very important point there. That attack on Bunker Hunt was obviously a concerted and deliberate effort—but who gained? The man who gained the most—a $100 million profit according to his own statement—was Armand Hammer of Occidental Petroleum, the son of Julius Hammer, Secretary General of the Communist Party, U.S.A., and whose brother is still a Soviet citizen.

Hammer has always maintained close ties with the U.S.S.R. Another interesting fact is that when Reagan lifted the grain embargo, he also lifted the phosphate fertilizer embargo. Occidental Petroleum is one of the largest phosphate fertilizer producers in the U.S. and clearly stood to gain from the lifting of the grain embargo. And this under the Reagan administration.

NAC. It doesn't appear that much has changed.

SUTTON. I don't think they've changed. I think that in two or three years when you look back, you'll see it was just another facade. I don't think Reagan is part of it—I think he's an honestly conservative American—but he is dealing with powers beyond his control.

NAC. Would you like to make a summary statement about the topic we've covered here?

SUTTON. Yes. Recently, there was a dinner given in honor of Robert McNamara. The host and main speaker, David Rockefeller, had intended the meeting to be a closed one and the speeches confidential, but it appears as if there were significant leaks.

I heard of it through my European contacts. Although there were two versions which differed slightly due to translation, they essentially told the same tale. I found it extraordinary how Rockefeller admits that they have in fact built a new world order. And he also mentions a conflict within the elite between the old and the new which involves more than just budget cuts. I quote: ". . . because it's going to endanger the new world order which we have based on an alliance between Wall Street and Washington." In other words David is now coming out and saying exactly what I've been saying in my books. Another quote: "Now radical conservatives are attempting to destroy all that and seeking first and foremost to serve the national interests of the U.S." In other words, David is now admitting that he is no longer an American, but an international.

NAC. Thank you Professor Sutton.●

SENATE—*Monday, June 8, 1981*

(Legislative day of Monday, June 1, 1981)

The Senate met at 12 noon, on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., offered the following prayer:

Let us pray.

O give thanks to the Lord, for He is good, for His steadfast love endures forever.

O give thanks to the God of gods, for His steadfast love endures forever.—Psalms 136 : 1, 2.

Almighty God, sovereign Lord of the universe, limitless, timeless, in whom resides all wisdom and all power. We worship Thee. We praise Thee for Thy justice, that Thou art impartial in Thy love, long suffering in Thy mercy, enduring in Thy grace, and infinite in Thy faithfulness. Great God our Father, we thank Thee for Thy matchless favor, Thy gracious love that enfolds, secures, and sustains us. We thank Thee for Thy infinite grace which covers all our transgressions, forgives and cleanses us from all our sins. We praise Thee. We adore Thee. We worship Thee.

"Our God, our Help in ages past,
Our Hope for years to come,
Our Shelter from the stormy blast,
And our eternal Home.

"Before the hills in order stood,
Or Earth received her frame,
From everlasting, Thou art God,
To endless years the same."
—ISAAC WATTS, 1719.

Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. Under the previous order, the majority leader is recognized.

THE JOURNAL

Mr. BAKER. Mr. President, I thank the Chair.

I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF PROCEDURE ON NOMINATIONS

Mr. BAKER. Mr. President, I believe there is an order to proceed to the consideration of certain nominations on the Executive Calendar beginning at 12:30 p.m. today, including the nomination of Charles Z. Wick on which there is a time limitation of 1 hour to be equally divided.

It is my expectation that we will dispose of the Wick nomination today, unless a rollcall vote is ordered, and in that event, according to the final provision of the order that was agreed to on this past Thursday, the vote, if it is ordered, will be postponed until 2 o'clock on Tuesday.

There is also an order to proceed to the consideration of the nomination of Chester A. Crocker and Myer Rashish. There is no time limitation on those two nominations. I will try to have a further report to the Senate later.

ORDER FOR ROUTINE MORNING BUSINESS TODAY

Mr. BAKER. Is there a special order for the recognition of any Senator today?

The PRESIDENT pro tempore. There are none.

Mr. BAKER. I thank the Chair.

After the expiration of time allocated to the two leaders under the standing order, I ask unanimous consent that there be a period for the transaction of routine morning business not to extend beyond the hour of 12:30 p.m. in which Senators may speak for not more than 5 minutes each.

The PRESIDENT pro tempore. Without objection, it is so ordered.

TENTATIVE LEGISLATIVE PROGRAM

Mr. BAKER. Mr. President, the situation for the remainder of this week I will try to report on a little later in the day. It had been hoped we would be in position to proceed to the food stamp bill tomorrow, but I understand the report to accompany that bill was not filed in time to comply with the 3-day rule to bring up that bill on Tuesday.

I observe the distinguished minority leader is in the Chamber, and although he may not be in a position to answer me at this moment, I hope that, notwithstanding it would require 1 day to be waived on the 3-day rule, we might still go to the food stamp bill on Tuesday if we can. That would be very helpful. If we cannot, then, of course, we will take it up as soon as possible, which will be on Wednesday.

I also hope we will be able to proceed to the consideration of the Federal Election Commission authorization bill on Tuesday. That may or may not be possible, but that I will also discuss with the minority leader.

The Fur Seal Treaty I had announced might be disposed of on Tuesday, but I am advised now that certain Senators who are involved deeply in that controversy may not be available to participate in the debate on Tuesday, so it may be necessary for the leadership to reschedule that.

I will say to those who are listening that it is the intention of the leadership to proceed to the consideration of the Fur Seal Treaty as soon as possible, in any event sometime this week. It has been on the calendar for a long time, and we have gone to great lengths to accommodate the convenience of a number of Senators more than once and, frankly, I would like to see it disposed of. So sometime this week I hope we can agree on the time. If we cannot agree on the time, it may be necessary to move to go into executive session for the purpose of considering that item.

Mr. President, there may be other items we may be able to deal with this week and, of course, the main one is the reconciliation package. It is the hope of the leadership that all of the reconciliation bills can be reported from the several jurisdictional committees to the Budget Committee not later than the 10th of June, which is the day after tomorrow, and that by the 12th of June, the statutory date for receiving those reports, the Budget Committee will be in position to package those reconciliation bills in several bills they have received, and have them ready to report to the floor for consideration during the following week, that is, during the week of the 15th of June.

We simply must do those bills as promptly as possible, and I expect by the middle of that week, say, by the 17th of June, that we should be in position to move to their consideration.

There is, of course, a 20-hour time limitation by statute, which can be reduced on a nondebatable motion. I would not plan to move to reduce the time unless that became actually necessary, but all Members should be on notice that the reconciliation bill as packaged and presented by the Budget Committee will have priority over virtually everything else we may consider.

Mr. President, after that somewhat rambling and more lengthy prognostication than planned, I renew my request of the minority leader as to whether or not we might be able to waive 1 day from the 3-day rule on the food stamp bill in order to permit us to take it up on Tuesday.

Mr. ROBERT C. BYRD. Mr. President, speaking personally I would have no objection. But I understand there is an

objection or objections on this side to proceeding before the 3-day rule has elapsed on this particular bill.

Mr. BAKER. Mr. President, I thank the Senator. I wonder if there is any possibility of reexamining that question? I do not wish to press unduly, but the minority leader knows better than anybody else in this Chamber the urgency of trying to move the schedule of the Senate as promptly as possible.

Mr. ROBERT C. BYRD. I will be glad to review the prospects.

Mr. BAKER. I thank the minority leader.

Mr. President, I have no further requirement for my time under the standing order, and I will be glad to yield now a minute of that time to the distinguished President pro tempore, the Senator from South Carolina.

(Mr. SIMPSON assumed the chair.)

ORDER FOR STAR PRINT ON S. 1297

Mr. THURMOND. Mr. President, I wish to thank the distinguished majority leader.

Mr. President, I ask unanimous consent that a star print be made of S. 1297 to correct its title. This correction will indicate that S. 1297 will amend title 38, United States Code, and not title 18, United States Code, as originally printed.

I send to the desk a corrected copy of S. 1297 and ask unanimous consent that the Clerk make the necessary correction.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, if there is no request by any other Senator for time under the standing order, I would be happy to yield that time remaining to the distinguished minority leader if he has any need for it.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished majority leader. I have no need for the time. As a matter of fact, I am prepared to yield my own time back, also.

Mr. BAKER. Mr. President, I yield back the time remaining allocated to me under the standing order.

Mr. ROBERT C. BYRD. Mr. President, I yield back the time on this side.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business not to extend beyond the hour of 12:30, during which time Senators may speak for not to exceed 5 minutes each.

ORDER FOR RECOGNITION OF SENATOR NUNN ON THURSDAY, JUNE 11, 1981

Mr. BAKER. Mr. President, is there a special order for the recognition of the Senator from Georgia (Mr. NUNN) on Tuesday, June 9?

The PRESIDING OFFICER. The Senator is correct; there is.

Mr. BAKER. I thank the Chair.

Mr. President, I ask unanimous consent that that order be vitiated and that, instead, the special order for the recognition of the distinguished Senator from Georgia be entered on the same basis for Thursday, June 11, 1981.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR HARRY F. BYRD, JR., ON WEDNESDAY, JUNE 10, 1981

Mr. BAKER. Mr. President, I ask unanimous consent that there be a special order for the recognition of the distinguished senior Senator from Virginia (Mr. HARRY F. BYRD, JR.) for a period not to exceed 15 minutes after the period for the recognition of the two leaders under the standing order on Wednesday, June 10.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECEIPT OF THE SIXTH ANNUAL REPORT OF THE NATIONAL COMMISSION FOR EMPLOYMENT POLICY

Mr. THURMOND. Mr. President, as the President pro tempore of this body, I have received the sixth annual report of the National Commission for Employment Policy for the calendar year 1980. This report is available for review by my colleagues in my office.

NOMINATIONS OF CHESTER A. CROCKER AND MYER RASHISH

Mr. BAKER. Mr. President, I observe that the distinguished Senator from North Carolina is on the floor. In view of the fact that we do not have time agreements on the Crocker and Rashish nominations, and I know of his considerable interest in these matters, I wonder if he would give us any further idea on how we might proceed on those nominations?

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. I thank the distinguished majority leader. I want to assure him now, as I have assured him in the past, that I have no wish to hold up any nominations beyond the constraints, perhaps self-imposed, that I find in the Constitution, the advice and consent requirement of Senators.

I frequently said that I have nothing personal against any of these nominees but have questions, as I have had and as I still do, for a couple of them. I know that the majority leader understands that I wish to pursue what I perceive to be my responsibility.

Let us first address Mr. Rashish's nomination. I am today sending a letter to the distinguished chairman of the Foreign Relations Committee, Mr. PERCY. For the record, I might as well read it in its entirety. It is not all that long.

DEAR MR. CHAIRMAN: You have been most gracious to members of the Committee on Foreign Relations, be they Republican or Democratic members, in their requests that nominees be called back before the Committee for further questioning where such additional inquiry is requested.

I need point only to the case of Dr. Lefever as one example of this. And, certainly, you were most accommodating to minority members of the Committee in the cases of Messrs. Pauken and Malone.

It is in this spirit of cooperation that I request that the Committee on Foreign Relations ask Mr. Myer Rashish, nominated for Undersecretary of State for Economic Affairs, be called again before the Committee, so that Senators might question him concerning his recommendation that 100 Caterpillar pipelayers be sold to the Soviet Union.

Then I continue in my letter to Senator PERCY:

While you and I both wish that U.S. industry prosper in its sales to foreign nations, this proposed sale is highly inappropriate, given the continuing Soviet aggression in many parts of the world, directly challenging U S. interests on a broad front. I need only note continued Soviet military action in Afghanistan, and Soviet threats in Poland.

I am particularly concerned that these pipelayers might have military application. For example, I am told that they might be used to further Soviet military action in Afghanistan, building a pipeline there to supply the Soviet military with badly-needed petroleum products. More ominous is their potential use in constructing an underground command, control and communications network for the Soviets. Such a network could render ineffective our satellite and other intercepts of Soviet military communications and thereby make more unstable the already delicate ability of the United States to monitor and verify Soviet military activities.

Therefore, I urge that the Committee on Foreign Relations recall the Rashish nomination, and that hearings on the pipelayer matter and Mr. Rashish's role in it be held at the earliest possible date.

I think the public, the American people, Mr. President, deserve to have some answers on that.

Mr. President, I ask unanimous consent that there be printed in the RECORD at this point a letter dated May 20, 1981, addressed to the President and signed by me which deals with the proposed sale of some 100 pipelayers to the Soviet Union. I am still awaiting a reply.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., May 20, 1981.

The PRESIDENT,
The White House
Washington, D.C.

DEAR MR. PRESIDENT: I urge that the proposed sale of some 100 pipelayers to the Soviet Union not be approved by your Administration. I have learned that the Department of State is in the process of recommending such a sale, which could have serious national security implications.

While all of us desire that U.S. industry prosper in its sales to foreign nations, this sale is inappropriate, given the continuing Soviet aggression in many parts of the world, directly challenging U.S. and Western interests on a broad front; and because of national security considerations.

I have an especial concern that these pipelayers—made, I am told, by the Caterpillar Company—may be used by the Soviets to build additional pipelines into Afghanistan in support of the Soviet invasion of that country; or, more ominously, to construct an underground command, control and communications network for Soviet military use. Such a network could render ineffective our satellite and other intercepts of Soviet military communications, and thus make more unstable the already delicate ability of the United States to monitor and verify Soviet military activities.

I urge your personal consideration of this matter and its obvious implications.

Sincerely,

JESSE HELMS.

Mr. HELMS. Mr. President, this is exactly the sort of issue I had in mind when I questioned whether establishment holdovers would be able to come up with new directives in foreign policy.

Mr. President, now with reference to the Crocker nomination, Mr. President, there was a little bit of confusion here on Thursday. I mentioned to a very capable and dedicated member of the Senate staff that I hoped it would be possible to lift my hold on the nomination of Mr. Crocker and perhaps approve it that afternoon. But the conversation that I had with Mr. Crocker left some questions unanswered and I decided that it would not be possible to lift the hold. Later on it was cleared up, but by that time the majority leader, as I understand it, had been informed that I had in fact lifted the hold and I had not.

But I say to my friend from Tennessee that, reluctantly, it is my desire to retain the hold, on behalf of myself and a number of other Senators, on Mr. Crocker pending the investigation of some leaks which have occurred in his area of the State Department and which may well have been the work, in the judgment of press reports, of Mr. Crocker himself. It is my understanding that the Secretary of State is actively investigating this problem.

There was a quite revealing report this past Thursday, June 4, in the Wall Street Journal about the leaks emanating from the State Department. It is headlined "Haig Is Probing News Leaks From Office of Nominee for U.S. African Affairs Post." I ask unanimous consent that that article from the Wall Street Journal be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HAIG IS PROBING NEWS LEAKS FROM OFFICE OF NOMINEE FOR U.S. AFRICAN AFFAIRS POST

(By Karen Elliott House)

Chester Crocker's confirmation as Assistant Secretary of State for African Affairs now faces trouble in the State Department as well as in the Senate.

Secretary of State Alexander Haig has started investigating recent leaks of confidential documents from Mr. Crocker's bureau to newspapers, and high-level State Department officials are making it clear that they hold Mr. Crocker responsible. Mr. Crocker has been running the bureau since January, although he hasn't been confirmed by the Senate.

"Let me suggest that the leaks are atrocious and appalling to me," Mr. Haig told newspaper editors and broadcasters at a State Department forum.

Whether Mr. Crocker's nomination will be withdrawn won't be clear until the investigation is completed, probably late this week or early next week. But State Department officials say that is possible.

If the nomination is withdrawn, it will be a blow to national security adviser Richard Allen, who pushed Mr. Crocker for the job. And it will be a victory for Sen. Jesse Helms (R., N.C.) who long has opposed Mr. Crocker as too close to the Carter administration in his policy ideas. Mr. Helms has said that the Carter administration put close ties with black Africa ahead of friendly relations with white-dominated South Africa and that this administration mustn't follow that line.

State Department officials insist that they aren't bowing to Sen. Helms and using the leaks as a rationale for dropping a nominee who has become too controversial. Spokesman Dean Fischer went out of his way yesterday to say Mr. Haig hasn't made any personnel deals with Sen. Helms to win his cooperation. Sen. Helms has offered to drop his opposition to Mr. Crocker if the Secretary names Clifford A. Kiracofe, Jr., a 32-year-old researcher at the Fletcher School of Law and Diplomacy in Medford, Mass., to Mr. Crocker's staff with responsibility for southern Africa policy.

Mr. Crocker says that he is willing to consider Mr. Kiracofe along with anyone else who applies for a job but that Secretary Haig doesn't want Sen. Helms selecting the State Department staff. Mr. Crocker adds that he hasn't been told that the administration may be reconsidering his nomination.

Regardless, Mr. Crocker, an African expert who served in the Nixon administration, suddenly has few defenders. The White House now says the State Department must push his confirmation in the Senate. And State Department officials, noting he was Mr. Allen's choice rather than Mr. Haig's, says the White House must fight the battle with Mr. Helms for Senate confirmation. Mr. Helms has blocked a full Senate vote on Mr. Crocker's confirmation since the Senate Foreign Relations Committee recommended approval by a 16-to-0 vote last month.

At a minimum, Mr. Crocker appears in danger of becoming an example of this administration's determination to stop news leaks. Publication by The Washington Post and The New York Times of documents Mr. Crocker drafted to outline administration African policy has compounded his troubles. "We don't know who did it, but as head of the bureau he must bear responsibility," says a State Department official.

Just last week, John Shaw, a consultant on personnel to Richard Kennedy, Under Secretary of State for Management, was dismissed, State Department officials say. The reason, they say, is that he disclosed to the press that the administration is considering nominating Joseph Reed, an aide to Chase Manhattan Bank's former chairman, David Rockefeller, as Ambassador to Morocco.

As for Mr. Crocker, State Department officials now say that Mr. Haig has long had doubts about the nominee's managerial abilities. And they suggest that Mr. Crocker's African trip earlier this year when South Africa's leaders refused to meet with him was "ill-timed." Explains one official, "Our concerns aren't ideological but managerial."

But Mr. Crocker's problems appear to have taken a turn for the worse after a meeting late last month between Secretary Haig and Sen. Helms, whose concerns are ideological.

Mr. Crocker, who has written extensively on Africa, has said publicly that he favors strong ties with South Africa but that he believes it is possible for the U.S. to remain friends with important black African states as well.

Mr. HELMS. Mr. President, in order that it may become obvious to my colleagues of the extent and nature of the leaks from Mr. Crocker's office, I ask unanimous consent that the article "U.S. Details Terms for Closer South African Ties," from the Washington Post of May 29, 1981, be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

U.S. DETAILS TERMS FOR CLOSER SOUTH AFRICAN TIES

(By Joe Ritchie)

The United States has indicated to South Africa in clear terms that it is willing to "open a new chapter" in bilateral ties in exchange for cooperation on combating Soviet influence in southern Africa and on attaining an "internationally acceptable" solution in Namibia, according to State Department working papers.

U.S. officials confirmed basic information contained in several of the briefing papers which were drafted by high-level U.S. officials in preparation for the recent visit by South African Foreign Minister Roelof (Pik) Botha. The documents were made available to the Washington Post by Randall Robinson, the executive director of TransAfrica, a black-oriented lobbying group on African affairs that consistently has opposed South African racial policies.

One of the papers suggested that if the South Africans cooperate on an "internationally acceptable settlement" of the problem of Namibian independence, the United States can "work to end South Africa's polecat status in the world and seek to restore its place at a legitimate and important regional actor with whom we can cooperate pragmatically."

Secretary of State Alexander M. Haig, Jr., was advised by his top aid on Africa that the administration should respond to South African cooperation on Namibia—a territory South Africa continues to control under an expired League of Nations mandate—with "small but concrete steps such as the normalization of our military attache relationship."

The two countries have greatly reduced their military representations—to one attache each—since Pretoria accused three American attaches of taking aerial photographs of secret installations in April 1979.

A recurring theme in the documents is the role South Africa can play in helping the

United States counter Soviet influence in such places as Namibia and Angola. The new chance for improved relations, as one of Haig's advisers put it, "represents an opportunity to counter the Soviet threat in Africa."

State Department officials reflected awareness that their talks with the South Africans had potential pitfalls. Assistant Secretary of State-designate for African Affairs Chester A. Crocker advised Haig that "South African truculence (which can be coated with great charm) is compounded with the fact that, as an international pariah, the country has 'had no meaningful, balanced bilateral relations in recent memory.' "

"Thus," Crocker continued "the South Africans deeply resent being treated as an embarrassment and are not used to the give-and-take of pragmatic relations. If the South Africans still want to vent their frustrations, I fear you will be subjected to Pik's rhetoric. Thus, it is in your interests to take control of the meeting from the beginning."

Although there have been broad hints of a shift in the Reagan administration's public posture toward South Africa—particularly compared with the Carter administration's approach of cooperating more with black Africa and confronting South Africa on its racial policies—the background papers provide some of the clearest documentation to date of how far the United States is willing to go to help the internationally isolated Pretoria government attain some degree of respectability in the world.

In a background briefing for reporters on May 16 after Botha's talks here, the Reagan administration announced that it was pursuing a policy of "constructive engagement" with the South Africans, rather than the previous policy of "confrontation."

Reporters were not given details of impending changes in the U.S.-South African relationship.

By aligning itself, however marginally, with South Africa, the United States is taking a calculated risk that it will not completely alienate many Third World countries, particularly in black Africa, where Pretoria is viewed as a pariah because of its official policy of apartheid, or institutionalized separation of the races.

Nigerian President Shehu Shagari, on a recent state visit to Britain, warned the United States against tilting its policy on Africa toward Pretoria or helping the South Africans back the rebel forces of Jonas Savimbi in Angola. Shagari said it would be "very unwise" for Washington to back rebels in a sovereign African nation. Nigeria is the second-largest supplier of foreign oil to the United States, supplying 1.2 million barrels per day.

An American shift toward South Africa also confronts head-on key issues such as Namibia, military cooperation and exports of strategic minerals, such as enriched uranium.

The State Department papers reflected the thinking of senior officials on the U.S.-South African relationship, officials said. Robinson said he obtained the papers from a State Department employe, and U.S. officials confirmed their authenticity. Robinson would not reveal his source.

Robinson said he passed on the documents because he felt that the United States is "moving into a de facto alliance with South Africa in exchange for no clear commitments on South Africa's part" and that there should be a wider public debate on the issue.

The U.S. view of the new developing relationship is that it is a more pragmatic approach to dealing with the South Africans, that the United States will be in a better position to pressure the South Africans for change if it shows willingness to support positive movement for change.

According to the paper prepared by Crocker for Haig's talks with Botha, the United States sees its new relationship as being "based upon our shared hopes for the future prosperity, security and stability of southern Africa, constructive changes within South Africa and our shared perception of the role of the Soviet Union and its surrogates in thwarting those goals."

The U.S. position was that although Washington and Pretoria "may continue to differ on apartheid," the U.S. "can cooperate with a society undergoing constructive change."

African diplomats interviewed here stressed that as long as South Africa continues its policies of apartheid, they cannot cooperate with Pretoria, and they said they were watching closely the formulation of the new administration's policy on southern Africa. The Africans are also concerned that the United States would abandon its support of U.N. Security Council Resolution 435, which it and the Africans currently accept as the basis for Namibian independence.

According to the May 16 briefing, the United States and South Africa did not fully achieve a meeting of minds on Namibia.

Nevertheless, at a news conference upon his return to South Africa, Botha hailed what he called a new American realism on the Namibian question.

"All around I found a much greater grasp and understanding, the ability to look at South Africa in a different light, to see the importance of the Cape [of Good Hope] route in a clear way, our strategic minerals and other things."

Another document left behind by the South Africans said they would be prepared to secure U.S. access to critical minerals and naval facilities, and generally protect U.S. financial and trade interests in the region, if Washington recognized that there are "no shortcut solutions to the question of the exercise of political power in South Africa."

In another paper, a secret South African summary of the sticky nuclear relationship between the two countries, Pretoria asked Washington to review its policy, established under the Carter administration, of forbidding export licenses for enriched nuclear fuel to South Africa as long as South Africa does not adhere to the Nuclear international safeguards at its research facilities.

State Department officials said the United States has not changed its position, although discussions are continuing on the problem. There has been a four-year impasse over U.S. refusal to ship fuel under terms of a South African contract with the Department of Energy.

Overall, U.S. officials emphasized that the South Africans did not obtain all that they thought they might from the U.S. side during Botha's visit, but, as one source put it, "They haven't gotten beaten over the head repeatedly with posturing, either."

Mr. HELMS. Mr. President, just yesterday, the Johannesburg Sunday newspapers were busily publishing further information which has all the appearances in the world that it too came from Mr. Crocker's office. Indeed could it have come from Mr. Crocker himself.

Moreover, whoever leaked this material attempts to deflect the blame for the leaks by implying that it may have come from the office of Senator HELMS of North Carolina.

Well, the interesting part of that, Mr. President, is that the Senator from North Carolina never had the information that was leaked. And I do not want to appear to be in the state of high dudgeon about this thing, but Mr. Crocker had better sweep around his own door instead of referring to this Senator or any other Senator, particularly when this Senator has never had in his possession nor has any member of my staff had in his possession the information that was leaked.

I wish to say very emphatically that neither this Senator nor anybody associated with me was responsible in any way for leaking the material in question.

This material appeared in the Sunday Times and the Sunday Express in Johannesburg. They are both sister newspapers of the same publisher. And I think the Senators reading these stories, when they become available, will agree that they were published in an obvious attempt to boost Mr. Crocker's reputation in South Africa immediately previous to his planned visit there this week.

Now both of these newspapers, it needs to be said, Mr. President, have been very, very close to Mr. Crocker. They praise him fairly constantly and very highly, which is their right. They have published many of Mr. Crocker's own articles under his byline. At the time of the visit of South African Foreign Minister Pik Botha to this country, these newspapers published intimate and confidential details of that visit.

Mr. President, I, of course, do not yet have yeterday's newspapers from Johannesburg, but the articles in question have been read to me over the telephone and I ask unanimous consent that excerpts from one of them be printed at this point in the RECORD.

There being no obection, the excerpts were ordered to be printed in the RECORD, as follows:

[From the Johannesburg Sunday Express, June 7, 1981]

THE BIG DAY FOR CROCKER

Meanwhile the U.S. State Department and according to some sources, the CIA, are conducting a witch hunt to discover who leaked confidential American government documents to Transafrica. . . . There has been speculation that the documents were leaked by a source close to Senator Helms to help block Dr. Crocker's appointment. But Transafrica director Randall Robinson vehemently denies this.

* * * * *

The right wing Helms disagrees violently with what he perceives as Dr. Crocker's softness regarding closer ties with South Africa. The vote was put on hold at the request of Senator Jesse Helms who has been attempting to block the appointment. However, Senator Howard Baker told Senator Helms this week that the vote could not be delayed any longer. Senator Helms has apparently admitted to Senator Baker that he is unable to rustle up enough Senate votes to defeat Dr. Crocker's appointment.

Mr. HELMS. Mr. President, now where did the newspapers get this information? I think Alexander Haig knows where the newspapers got that information. And that is the reason I am continuing a hold on Mr. Crocker.

But the newspapers said "based upon State Department sources." Now I think that the State Department had better get its act straight in terms of this leaking business.

I intend to have more information than I now have, Mr. President, before I will consent to the consideration of the Crocker nomination.

Mr. President, I went into this at some length because I wanted my distinguished majority leader and other Senators to know that this is not a frivolous thing on my part. I take the advise and consent responsibility seriously. I can assure the majority leader and other Senators that until I can reach the conclusion that I have fulfilled my obligation under that constitutional requirement I will gladly and quickly resist the nomination to confirm. I do hope the majority leader understands my position.

Mr. BAKER. Mr. President, I thank the Senator from North Carolina. It leaves us however, with a major dilemma. I have not the slightest doubt that what the Senator from North Carolina says is correct. He knows that. But by the same token when I was informed on Thursday that the holds had been lifted, I proceeded to seek to obtain unanimous consent to proceed to the consideration of these two nominations today. As I pointed out earlier, there is no time limit for debate on these two nominations, unlike the Wick nomination on which there is an hour to be equally divided. I was not aware that the Senator from North Carolina wished to interpose his objections to these nominations again until this morning.

I would make this proposal, Mr. President: I think that under the order just entered we are going to be out of morning business not later than 12:30. At 12:30, we are to go to the consideration of the Wick nomination. I propose to leave that effective.

By the way, I do not know of any particular reason to have a rollcall vote on Mr. Wick. I would hope we might be able to confirm him this afternoon by voice vote. If a rollcall is ordered, it will go over until tomorrow.

On the Rashish and Crocker nominations, which are to follow under the order just entered, I ask unanimous consent, Mr. President, that we postpone consideration for 1 hour while the Senator from North Carolina and I have the opportunity to discuss this matter further.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, as I understand the distinguished majority leader he is not seeking to waive the order which has already been entered in any way, but he merely seeks to postpone the operation of that order for 1 hour with respect to the nominations of Mr. Rashish and Mr. Crocker.

Mr. BAKER. The minority leader is correct, Mr. President. The reason for that is obvious. The way the order stands now as soon as we finish the Wick nomination, we would be on the Rashish and Crocker nominations. I have not had the opportunity to discuss this thoroughly with the Senator from North Carolina. I believe an hour would give us an opportunity to do that.

Mr. EXON. Mr. President, reserving the right to object and I will not object, I want to pay tribute to my distinguished colleague from North Carolina. I have watched him operate in the Senate for a long, long time. Certainly, I think that the advise and consent procedure of the U.S. Senate should not be taken lightly. I was interested in his comments this morning. I do hope, though, that we can move along on some of these nominations.

I could not help but think during the discussion of the almost innumerable members who are supposed to be at work now in the new administration who are not working because, for a variety of reasons, which some of us do not understand, there have been great delays in sending over nominees for Under Secretary posts and a whole series of areas that I happen to be involved in because of my committee assignments. I would like to plead once again with the majority that communication be made to the White House to please move along their appointees much more rapidly so that we can carry out the advise and consent procedures that have been referred to this morning by the Senator from North Carolina.

It seems to me that here we are in June, and certainly this has been the slowest administration on record for getting the nominees over here to us so that we can work our constitutional responsibilities that have been ably described by the Senator from North Carolina.

I would just like to insert these comments at this time with the hope that the Reagan administration can get on track a little faster than they have thus far, and criticize, if I might, the rather slow procedure in getting key people in key jobs, with the idea of making this administration a success.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, I renew my request.

The PRESIDING OFFICER. Is there objection?

Mr. HELMS. Will the Senator restate the request?

ONE-HOUR POSTPONEMENT OF RASHISH AND CROCKER NOMINATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that we modify the existing unanimous-consent order so that instead of proceeding immediately to the consideration of the Rashish and Crocker nomination after we dispose of the Wick nomination, that the consideration of the Rashish and Crocker nominations be postponed for the period of time of 1 hour to give us the opportunity to consult.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. Mr. President, nobody is trying to take advantage of anybody. I know the Senator from North Carolina well and I know his concerns are genuinely well founded. I do not doubt for one moment the statements and representations that he has made. It leaves us, though, with a dilemma. That is the reason for the 1 hour, so that we can confer and see if we can find a way out of this problem. At 12:30, 3 minutes from now, we will go to the Wick nomination.

May I say one final word on the comments of the distinguished Senator from Nebraska about the slowness of the administration in submitting nominations. That is true. If he thinks he should complain about it, he should sit in on some of the meetings I have with Republican Members of the Senate. It would make his concern pale into insignificance because there are so many concerns.

Mr. President, there are some problems that should be taken account of to at least explain if not justify the problem.

One is we have a whole array of new statutes, rules and requirements for disclosure, for background checks, for the statutes and laws that have been put into force in the last few years which make it more difficult, first, to obtain good men and women to serve in Government, and, two, to comply with all the requirements that we in most cases have enacted. That is not a justification but it is at least, in part, an explanation.

I have used the same argument that I used with my colleagues on the Republican side of the aisle. Judging by the look of amusement of my two friends on the other side of the aisle, I do not think I have had any more luck in convincing them than I have the Members on this side.

Mrs. KASSEBAUM. Mr. President——

The PRESIDING OFFICER. The Senator from Kansas.

Mrs. KASSEBAUM. As chairman of the African Affairs Committee, Mr. President, I have greatly respected the interests and concerns of the Senator from North Carolina in the appointment of the Assistant Secretary for African Affairs. It is a very important appointment. I have been very impressed with the background that Dr. Crocker brings in consideration of this appointment.

Given the sensitivity of the area and the great interest in the formulation of our African policy, I think it is important, and we all recognize that, that we move along and get an Assistant Secretary in place so that there can be someone to look to for guidance in explaining the formulation of this policy.

I would certainly like to be prepared, as Senator HELMS has been, to move forward together so that we might be able to resolve this question. Thank you, Mr. President.

The PRESIDING OFFICER. The Senator from North Carolina is recognized.

Mr. HELMS. I ask unanimous consent that I may be permitted to proceed for not more than 2 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I appreciate the comments of the distinguished Senator from Kansas.

Mr. President, let me point out that it is my wish to expedite all appointments whenever possible. This very af-

ternoon I am presiding over hearings on two State Department nominees, and I intend to expedite these nominations because I think these nominees are good men. The two nominations in question are those of Ambassador Thomas O. Enders to be Assistant Secretary of State for Inter-American Affairs and of Ambassador J. William Middendorf II, to be Ambassador to the Organization of American States.

I just want the record to be clear that there has been no untoward holdup of any nomination with which I have been associated.

I do think that the Senate has the duty to examine all nominees, particularly those in regard to the tenuous state of our foreign policy and our foreign relations.

Mr. President, I thank the distinguished majority leader. I must say that I did not know an agreement had been reached earlier this morning with respect to these nominations, but he and I can discuss that privately.

EXECUTIVE SESSION

The PRESIDING OFFICER. Under the previous order, the Senate will now go into executive session to proceed to the consideration of the nomination of Charles Z. Wick, of California, to be a Director of the International Communications Agency. The clerk will state the nomination.

INTERNATIONAL COMMUNICATIONS AGENCY

The assistant legislative clerk read the nomination of Charles Z. Wick, of California, to be Director.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. BAKER. Mr. President, is the control under the order allocated to the majority and minority leaders?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. I yield myself 1 minute.

Mr. President, I am advised that we have no requests for time to speak on this nomination and no requirement for a rollcall vote on this side. The nomination has been reported and we have no further requirement, I believe, for debate, since it came out of the Committee on Foreign Relations and has been on the calendar for a while. I am prepared to go now to a voice vote if that is desirable.

Mr. EXON. Mr. President, likewise, on this side, we have no known requests for speeches for or against this nomination that has been reported out of the Committee on Foreign Relations. We are prepared to cooperate with the majority leader to the extent of yielding back any time that we have remaining and would agree to a voice vote of approval.

Mr. BAKER. Mr. President, I thank the distinguished acting minority leader. I yield back my time remaining under the standing order.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. EXON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of the nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

TIME AGREEMENT ON FUR SEALS TREATY

Mr. BAKER. Mr. President, I ask unanimous consent that, on Thursday, June 11, no later than 10 a.m., the Senate go into executive session to consider Executive Calendar No. 2, "1980 Protocol Amending the Interim Convention on Conservation of North Pacific Fur Seals," and that the treaty be taken through all its parliamentary stages up to and including the resolution of ratification and that the resolution be under the following time agreement:

Two hours on the resolution of ratification under the control of the chairman of the Committee on Foreign Relations (Mr. PERCY);

Two hours on the resolution of ratification under the control of the Senator from Michigan (Mr. LEVIN);

Four hours equally divided between Senators PERCY and LEVIN on a Levin reservation;

One hour equally divided between Senators PERCY and LEVIN on a second Levin reservation;

And that no other reservations, amendments, understandings, points of order, declarations, and statements to the treaty be in order.

Mr. President, I believe this has been cleared on the other side of the aisle. I inquire of the distinguished acting minority leader if that is his understanding as well.

Mr. EXON. Mr. President, the majority leader is correct. The outline of the agreement that he has just made is accurate and we concur on this side.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. Mr. President, I thank all Senators.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, we are still in executive session, are we not?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. Mr. President, under the order previously entered, the time for the consideration of the Crocker and Rashish nominations is held in abeyance for 1 hour. Is that correct?

The PRESIDING OFFICER. That is correct.

ORDER FOR ROUTINE MORNING BUSINESS

Mr. BAKER. I ask unanimous consent that, during that period, there be a period for the transaction of routine morning business not to extend beyond 1 hour from this moment, in which Senators may speak for not more than 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 1 P.M.

Mr. BAKER. Mr. President, I am told by our respective staffs that there are no requests to speak between now and 1 o'clock. In order to spare the legislative clerk the responsibility of calling the roll to establish the absence of a quorum, I ask unanimous consent that the Senate stand in recess from now until 1 p.m. today.

There being no objection, the Senate, at 12:39 p.m., recessed until 1 p.m.; whereupon, the Senate reconvened when called to order by the Presiding Officer (Mr. GORTON).

A REPLACEMENT MANNED BOMBER FOR THE B-52

Mr. HEFLIN. Mr. President, the issue on which I shall speak today is not a new one; indeed, many Senators, far more eloquent than I, have spoken out passionately on this very floor on the same subject. This familiarity, however, does not diminish the urgent need for my forthcoming remarks. The issue, of course, is America's dire need for an effective manned strategic aircraft system to modernize and round out the "air-breathing" leg of our military triad. The Senate defense authorization bill provides $2.1 billion for procurement and $302 million for research, development, testing and evaluation for a long-range combat aircraft (LRCA). I strongly concur in the committee's finding that a new manned strategic bomber is needed not only to replace the aging B-52 bomber as penetrating bomber for the strategic triad, but also in conventional roles. I hope that when this measure goes to conference this money will be retained and I will urge my colleagues on the House side to help in this effort.

Based on previous announcements by the Department of Defense of a major breakthrough in radar deception technology—that is, the so-called stealth technology—it would appear that the action by the Senate is both timely and appropriate.

Mr. President, please grant me one small concession before I continue with my comments on this matter. We need to take one short moment to reflect upon this situation in the proper perspective. We—all of us—are here in Washington for a purpose. We have been elected to safeguard, to the best of our ability, the composite interests of over 200 million human beings. This primarily entails the charge upon this body to maintain and refine the freedom which our citizens can proudly display to all the peoples of the world. Many threats incessantly gnaw at the foundations of our freedom, some more effectively than others. We must actively defend against these incursions by maintaining the strength to keep them at bay.

One of the most ominous and ubiquitous forces at work against us is the vast Soviet machine. While the United States thrives on the freedom which is its lifeblood, the Soviet Union daily grows stronger by virtue of its burgeoning military strength.

Let us not deceive ourselves, my friends, by believing that we can teach the Soviets peace by disarming ourselves and providing this gesture as an example for them to follow. The powers in the Kremlin only watched with a growing mixture of boldness and relief as we allowed our defenses to wither and decay over the last 10 to 15 years.

In my judgment, their goal is not peace. It is not freedom. The ultimate goal of the Soviet ideology is world domination. Already the Soviet empire spans more territory than the Roman Empire did at its peak. Areas such as the Persian Gulf might soon follow Afghanistan and become subservient satellites without the strong support of a formidable ally, and thus further augment the expanding Soviet stronghold.

America has always been a leader. We have suffered the ingratitude of the people of the world (as well as their thanks) for our efforts as peacemaker. Many, many people have followed us in good faith—resisting the threats of communism and struggling to imitate our democracy so that they too could one day enjoy the freedom taken for granted within the bounds of our great land. Shall we let them, and ourselves, down by acquiescing to the domination-minded Soviets? I believe that we must regain and maintain military superiority over the Soviet Union and any other nation which might challenge us in the difficult years ahead. Only through a position of unassailable strength can we nurture the peace and freedom which sustains us and our ideals.

In 1977, when, for various reasons, President Carter mistakenly stopped the production of the B–1 bomber, America may have been at a position of rough equality with the Soviets. There is no doubt but that we would be in a more secure position today if the decision had been to go ahead with the production of the B–1. Since that fateful date, however, we have slipped at an alarming rate into a position of subordinance to the Soviet war force. By both underestimating the Soviet ability and technology and overestimating our own capabilities, we have allowed ourselves to be backed into the very tight and very foreboding corner which is currently our position. It is now up to the Congress to recognize the warning signals and make this Nation strong enough once again to reassume our position as guardian of peace.

This can be accomplished only by making the results of war absolutely devastating for the Soviets.

Each day brings news of fresh Soviet boldness. Yet not only the Soviets grow bold. The Iranian tragedy, the growing impunity of the Castro regime, with its crucial bond with the Soviets, and the general loss of respect for American property and individual safety all over the world are vivid examples of this. We must rebuild our forces and show, through quiet might, that the muscles of the free world have not begun to atrophy and grow lax and ineffective.

Mr. President, I could quote facts and figures, which I am sure you all have heard before, such as:

Each month, over three new Soviet Tupelov 26, "Backfire," bombers are being produced. By the end of the 1980's, the Soviets will have acquired and perfected the "look-down, shoot-down" radar capability which will make penetration missions all the more difficult. The B–52 is a product of 1940's technology, and no matter how we modify and update it, by the end of the 1980's, it will be useless except as a standoff launcher for air-launched cruise missiles.

Even now, its subsonic speed and aging frame make it too big, too "dumb," too slow, and too unreliable by our modern standards. The B–52 was designed to fly high above the radar systems of its day; yet, unfortunately, the need today is for an aircraft which can fly low—as low as 200-feet above the surface—and subsequently below the modern radar systems. I ask you, which one of you would like to pilot this grand old lady of flight with a full nuclear payload, close to maximum speed at such an altitude under hostile conditions. Indeed, the idea is absurd. By complementing our cruise missile systems with an aircraft system which can effectively penetrate, we force the Soviets to strain their defenses and not concentrate on a single system. Thus, both the cruise missile and the bomber are more apt to be successful. By the 1990's, the technological limits now imposed upon our aircraft will be pushed further back, thus opening up new and currently unimaginable avenues for improvement.

At such a time when the know-how for a more advanced manned aircraft is reality, the system which we call for now could be quickly and easily converted to fit whatever void will be created by the ultimate retirement of the B–52's to the Smithsonian—which I might add is where many of them belong now. This would prevent another time lapse like the one we are presently experiencing, during which we have no modern, effective long-range heavy aircraft capability.

I could quote men who have dedicated their lives and energies—indeed their hearts and souls—to the defense of our country, like Gen. Richard Ellis, Commander in Chief of the Strategic Air Command (SAC), who states that—

> SAC believes the procurement of a new advanced strategic manned bomber should rank toward the top of our national priorities;

Or Lt. Gen. Kelley H. Burke, Deputy Chief of Staff for Research, Development and Acquisition, who contends that—

> It's incredible at a time when global interests have never been more demanding that we should abandon the development of a long-range combat aircraft. If we do, we would be the only super-power to do so.

We cannot allow that wonderful phrase "superpower" to become a nostalgic reminder of days gone by.

The need is imperative for an aircraft which functions as a manned, penetrating weapon system which could effectively and consistently in a wartime atmosphere enter hostile airspace, be it the Soviet Union, Eastern Europe, or the Near East, debilitate its target, and return safely. To borrow again from Lt. General Burke—

> The penetration mission requires an aircraft that can fly long distances; that can carry large, diversified payloads; that can provide self-contained target acquisition and weapons delivery; that can defend itself reasonably well against sophisticated air defenses; that can be reused; and most importantly, that can provide on-scene human judgment throughout the mission.

Our options are basically threefold, and I am not today advocating a specific aircraft, as do some of my colleagues. The Armed Services Committee in the committee report accompanying this bill makes it clear that the President should make the decision, and that his decision should be given close scrutiny by the Congress.

I know my distinguished and knowledgeable colleagues of the Armed Services Committee will make a wise recommendation when all of the pertinent information is forthcoming from the Defense Department and the Reagan administration. Perhaps the "stretched" FB–111, the FB–111 B/C, or a version of the B–1, a so-called "son of B–1," would be appropriate. The possibility of the emergence of an "advanced technology" aircraft which incorporates many systems still in their planning stages is very real. Each of these aircraft has its relative merits.

Programs which endeavor to enhance the capabilities of whatever aircraft system does indeed finally go into production have already come up with bold advances. The strategic bomber enhancement program was working to perfect radar absorbing materials to reduce radar cross sections, thus improving survivability against both surface-to-air missiles and look-down, shoot-down interceptors until it was killed by funding shortages. The innovative strategic aircraft design study (ISADS) was modified after the B–1 cancellation to study near-term technology which might be applied to a B–52 successor and has recently submitted reports of its findings.

From the information released so far, it appears that a major technological advance of great military significance has been made with respect to the ability to conceal our aircraft from enemy radar. According to some source, this technology—the so-called stealth technology—could be applied to any military vehicle which can be attacked by radar-directed fire. Moreover, former Secretary Harold Brown stated in a news conference last summer that we are in the process of vigorously applying this technology to develop a number of military aircraft, and these programs are showing great promise. Whether or not this new technology can be applied to existing aircraft or whether it would only be applicable to a "advanced technology" aircraft, is not yet clear from the nonclassified information that is available.

Nevertheless, I am greatly excited by the prospects of these developments, and I certainly hope that any reluctance of the administration or the Department of Defense to go forward with a new aircraft development will be largely overcome by this technological breakthrough.

Proponents of the FB–111 in SAC state that by 1985, the FB–111, or an improved stretched version of the bomber will be the only aircraft capable of penetrating Soviet air defenses to attack targets there in response to an attack on the United States. The program to modify the FB–111 would take approximately 70 months from production approval to delivery of the last aircraft. This would place the availability of the FB–111 B/C much sooner than a B–1 derivative. Furthermore, as pointed out by General Ellis, "The FB–111 B/C can become the night/all-weather aircraft for force projection, contingency and tactical nuclear forces. The added contribution that aircraft could offer would be as significant in the 1990's as it would be today."

Yet, Mr. President, we must not rule out the possibility of reviving the B–1 program which, had it been continued on its planned schedule 3 years ago, would soon be taking its place in our defense arsenal. As I mentioned earlier, it was a tremendous mistake not to go forward with the program to develop the B–1 bomber. The B–1 bomber was designed to carry 40 percent of the U.S. nuclear weapons warhead megatonnage against targets in the U.S.S.R. It was designed to carry cruise missiles, short-range attack missiles, as well as conventional armament. The B–1 or a more advanced version of the one cancelled 3 years ago would probably be the most effective aircraft available at this time. General Ellis himself has stated that he would prefer the B–1 over the "stretched" FB–111 because of its superior qualities, but for certain cost and time constraints. Thus, Mr. President, I hope the planners at the Department of Defense and the members of the Senate Armed Services Committee will review very carefully the possibilities of revising and accelerating the B–1 program before settling on a final choice. When all the data is in and all the facts weighed, the B–1 may still be the plane which will be the most effective on a dollar basis.

In conclusion, Mr. President, besides nuclear capability, our new aircraft must be able to perform the conventional tasks which hopefully would allow us to avoid a nuclear confrontation. It must be able to cover expansive distances in abbreviated times in order to reach theater conflicts. It must be able to utilize airstrips the world over, unlike the albatross B–52 which requires a 300-foot wide runway. Most importantly, it must be an aircraft that we, the Members of Congress, the spokesmen ultimately responsible for the lives of all Americans in a wartime environment, can confidently and proudly send our own sons to battle in. I advocate action. We must replace the B–52 in its current role with an aircraft system worthy of its job—the defense of the United States of America, its people, and its institutions. We must, my friends, do it—before it is too late; I sincerely hope that it is not too late already.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 1:30 P.M.

Mr. BAKER. Mr. President, there are other matters that must be attended to away from the Chamber which will require the attendance of a number of Senators. I therefore ask unanimous consent that the Senate stand in recess until the hour of 1:30 p.m.

There being no objection, the Senate, at 1:04 p.m. recessed until 1:30; whereupon the Senate reassembled when called to order by the Presiding Officer (Mr. McCLURE).

RECESS UNTIL 2 P.M.

Mr. McCLURE. Mr. President, I ask unanimous consent that the Senate stand in recess until the hour of 2 p.m. today.

There being no objection, the Senate, at 1:36 p.m., recessed until 2 p.m.; whereupon, it reconvened when called to order by the Presiding Officer (Mrs. KASSEBAUM).

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

UNANIMOUS-CONSENT AGREEMENT—NOMINATION OF CHESTER A. CROCKER

Mr. BAKER. Madam President, I ask unanimous consent that the order with respect to the consideration of certain matters in executive session be amended in the following manner, but before I state the request may I say I have discussed this with the distinguished minority leader, with the distinguished Senator from North Carolina, and other Senators as well.

Madam President, I ask unanimous consent that following on after the action of the Senate on the request I am about to make that the order of consideration of the Rashish and Crocker nominations be reversed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Madam President, before I make the unanimous-consent request let me offer this explanation.

Madam President, on Thursday in the closing moments of the session the distinguished minority leader and I were conducting a colloquy about the desirability of clearing the calendars, both the calendar of general orders and Executive Calendar, and the minority leader put the question to me of when we could expect to have clearance on the three nominations, that is to say, Rashish, Crocker, and Wick, which have been on the calendar for some time.

I was in position to advise the minority leader at that moment that we could clear, and indeed if it was possible for his side to clear, the Wick nomination for consideration today, I hoped we would be able to clear the other two soon, and I indicated to the minority leader that at some point it was my intention to move the consideration of those items because they had been on the calendar for a long time, and I understood his concern, but that I had had expressed to me a great concern by certain Senators, more than one Senator I might add, and that I would continue to work on that with the expectation that we would have an answer for him on that question very soon.

At that moment, Madam President, one of our staff members handed me a note indicating, as I thought, that the holds on the Rashish and Crocker nominations had been lifted, and I proceeded then to ask for and the Senate gave unanimous consent to add the consideration of Rashish and Crocker to the list of nominees to be considered in executive session today.

Madam President, as it turns out, there was a misunderstanding on at least one of those and, perhaps, both of those nominations. It is not hard to understand why that would be so. We deal in literally hundreds of requests on calendar items, and it may be more remarkable that more misunderstandings do not occur than actually do.

In any event, those have been worked out now, and I have just stated one-half of the request, that is to say, that we proceed this afternoon to the consideration of the Crocker nomination, which we will do shortly. By the way, there is no requirement for a rollcall vote on this side of the aisle on the Crocker nomination, and I hope it might be possible for us to conclude the consideration of that nomination promptly and, perhaps, dispose of it by voice vote this afternoon.

If a vote is ordered, if a rollcall vote is ordered, on the Crocker nomination, then, in accordance with the terms of the order previously entered, it would go over until tomorrow.

UNANIMOUS-CONSENT AGREEMENT—NOMINATION OF MYER RASHISH

Mr. BAKER. In the case of the Rashish nomination, Madam President, I have a different proposal to make.

I now ask unanimous consent that consideration of the Rashish nomination be postponed until a time to be determined as follows: Not more than 2 days after the conclusion of a hearing to be conducted by the Committee on Foreign Relations on the questions put in the letter by the Senator from North Carolina today, that the Rashish nomination be made the pending business in executive session before the Senate; that there

be a time limitation of 1½ hours to be equally divided on that nomination.

Madam President, the distinguished chairman of the Committee on Foreign Relations is not present. I have cleared this with the ranking Democratic member, Senator PELL, and I am the next ranking member, and we have jointly agreed that such a request by the Senator from North Carolina is in order and, therefore, I make the request I have just stated.

Madam President, the distinguished minority leader has requested that I forbear making that request in a formal manner for the moment and, therefore, for the time being I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. GRASSLEY). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, could the distinguished majority leader indicate when or how soon he would expect the committee to conduct a hearing?

Mr. BAKER. Yes. It would be my expectation, Mr. President, that the committee would have a hearing on the questions at hand, that is, the questions put by the Senator from North Carolina, within the next day or two. Unfortunately, the chairman of the committee is not in the city at the moment, and it is not possible to give a more precise answer of the question, but I fully expect it would be held during the middle of this week, and we should be able to proceed within the 2 days provided for in the order if the order is granted to the consideration of the nomination of Rashish this week.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished majority leader. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, does the order provide for the consideration of the Crocker nomination at this point?

The PRESIDING OFFICER. It does.

NOMINATION OF CHESTER A. CROCKER TO BE AN ASSISTANT SECRETARY OF STATE

The PRESIDING OFFICER. The clerk will report the nomination.

The assistant legislative clerk read the nomination of Chester A. Crocker, of the District of Columbia, to be an Assistant Secretary of State.

The PRESIDING OFFICER. The question is on the nomination.

The Senate proceeded to consider the nomination.

Mrs. KASSEBAUM. Mr. President, Chester Crocker brings to the office of Assistant Secretary of State for African Affairs an impressive background and the personal skills that will enable him to successfully meet the challenges of our new Africa policy. Africa is a region of increasing importance to the United States, as we have become more aware of our geographic, economic, military, and political interests on the continent.

President Reagan is to be congratulated on his nomination of Dr. Crocker to this position. He has nominated a man who is professionally trained in African affairs and who has almost 20 years' experience in the field. I believe the President's nomination of Dr. Crocker reflects his understanding of the importance of Africa to America's national interests and his desire to place African policy in the hands of a true professional in the field.

Over the past two decades, Dr. Crocker has been professionally involved in all regions of the continent. As a young man, he was a journalist covering Francophone Africa, and later was a news editor covering all the states and territories of Africa. As a staff member of the National Security Council and as a professor of political science at Georgetown University, Dr. Crocker specialized in African and Indian Ocean matters, and in the role of military power in foreign policy.

This combination of an understanding of the internal and regional complexities of Africa and an understanding of the strategic issues surrounding Africa has been reflected in the policy recommendations Dr. Crocker has successfully made to the new administration. He is committed to addressing the legitimate security concerns of those states threatened by Soviet and Cuban military involvement on the continent and by the expansionist aspirations of Colonel Qadhafi. At the same time, he is fully committed to increasing America's role in the economic development of the continent, both through the private and public sectors.

Most importantly perhaps, Dr. Crocker brings to this position a solid understanding of the most intractable challenge facing American policy in Africa—South Africa. His excellent article in Foreign Affairs magazine has received praise from black and white, liberal and conservative, American and non-American experts. America has important interests in South Africa and needs to dedicate itself to effective action that will protect those interests through the development of a truly democratic government that provides for effective political participation by all South Africans. I am confident that Dr. Crocker will work diligently and effectively to promote the evolution of South Africa toward a true democracy with which we can have close economic and political relationships.

Mr. President, I urge the Senate to confirm this nomination.

(At the request of Mr. BAKER, the following statement was ordered to be printed in the RECORD:)

● Mr. PERCY. Mr. President, I urge the Senate to confirm the nomination of Chester A. Crocker to be Assistant Secretary of State for African Affairs.

Dr. Crocker is one of the most well-qualified nominees to come before the Foreign Relations Committee this year. Having served most recently as the director of African studies at Georgetown University's Center for Strategic and International Studies, his extensive background in African affairs spans the fields of academia, journalism, and government policymaking.

His teaching specialties have included the role of military power in foreign policy, international security affairs, African politics, and international relations of Africa.

He has been a prolific writer on Africa and has numerous published articles, books and monographs to his credit. He has testified several times before Congress as an expert witness on African affairs.

He has served as a consultant to the Department of State, the Central Intelligence Agency, the Army War College, and the Republican National Committee. He chaired the Reagan Presidential campaign's Africa Working Group. From July 1970 to June 1972 he served as a staff officer on the National Security Council.

Dr. Crocker testified twice before the Foreign Relations Committee in connection with his nomination. In his opening statement, he endorsed the three principles for our foreign policy advocated by Secretary of State Haig: Consistency in the pursuit of U.S. interests, reliability as a force for peace and stability, and balance in our approach to individual issues and in the orchestration of policy. He further pledged:

> If confirmed I want to assure this committee that I will consult both Houses of Congress in the development and implementation of our policy toward Africa. Together, I believe we can make considerable progress in projecting to the people of the United States and the people of Africa a foreign policy that is clear, comprehensible, and consistent.

Under thorough questioning, he impressed committee members with his knowledge and ability.

During the first session of his hearing, on April 6, Dr. Crocker was questioned extensively by several Senators on a variety of issues and questions of policy. While some Members expressed differing views about the best course for our Africa policy, none questioned his qualifications.

Immediately after the April 6 session, at the President's request, Dr. Crocker led a mission to Africa and Europe to consult with key leaders on southern African issues as part of the administration's policy formulation process. I believe the trip showed the good-faith desire of this administration to listen to the concerns of African nations. Furthermore, the trip also served to lay to rest some of the unjustified concerns of foreign leaders about the direction this administration's policies might take.

On April 27, following his trip, Dr. Crocker again appeared before the committee. Because a concern had been expressed by one committee member that Dr. Crocker's mission had produced unfavorable results, I questioned him about this. I asked whether he had received any indication from high-level officials at the State Department, or from members of the White House staff, or from the Vice President, or from the President himself, of disappointment in the results

of his trip or in his performance on the trip. Dr. Crocker's reply was "None whatsoever."

On April 28, the committee recommended by a vote of 16 to zero that Dr. Crocker's nomination be confirmed. To quote from the committee report:

The position of Assistant Secretary for African Affairs requires a sound knowledge of the internal, regional and global forces at work in the region, which will enable him to assist the President in influencing those forces so as to protect American and Western interests. The desire of the United States to maintain effective working relationships with all countries in the region, including those who view themselves as adversaries of other nations in the region, will challenge the personal skills and political judgment of the Assistant Secretary to the utmost.

It is the Committee's judgment that Dr. Crocker brings to this office the background and personal skills that will enable him to meet the challenges of this position successfully.

Mr. President, Dr. Crocker enjoys President Reagan's complete confidence as he plays a key role in the development of the administration's Africa policy. I commend President Reagan for making such an excellent choice and I urge my colleagues to support his nominee.●

Mr. MELCHER. Mr. President, I ask for the yeas and nays on the nomination.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, under the order previously entered, is it not so that this vote as just ordered will go over until 2 o'clock tomorrow?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. I thank the Chair.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business of not to exceed 5 minutes in length in which Senators may speak for not more than 1 minute.

The PRESIDING OFFICER. Without objection, it is so ordered.

TRANSPORTATION AND SUPPORT SERVICES TO THE HANDICAPPED

Mr. THURMOND. Mr. President, I ask unanimous consent to have printed in the RECORD a resolution that was passed by the New York State Legislature that memorializes Congress to approve a program of developing alternate sources of transportation and support services to the handicapped.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

LEGISLATIVE RESOLUTION

Whereas, A safe and efficient transportation system is crucial to the proper functioning of our society; and

Whereas, The needs of handicapped people for specialized services can only be met if such services are readily available to them; and

Whereas, The transportation needs of the handicapped are at once critical and unique; and

Whereas, The cost of providing such transportation to handicapped persons is alarmingly high due to the practice of modifying existing services to meet their needs; now, therefore, be it

Resolved, That this Legislative Body memorializes the Congress of the United States to approve a program of developing alternate sources of transportation and support services to the handicapped; and be it further

Resolved, That the cost of providing such services be borne by the federal government; and be it further

Resolved, That copies of this resolution be transmitted to each member of the Congress elected from the State of New York, the Temporary President of the Senate and the Speaker of the House of Representatives.

CONGRESS URGED TO ORDER EXTERNAL AUDIT OF FEDERAL RESERVE

Mr. THURMOND. Mr. President, I ask unanimous consent to have printed in the RECORD a concurrent resolution adopted by the Indiana State Legislature, which memorializes Congress to order an external audit of the Federal Reserve.

There being no objection, the concurrent resolution was ordered to be printed in the RECORD, as follows:

HOUSE CONCURRENT RESOLUTION No. 148

Whereas, The Federal Reserve System has a pervasive effect on our national economy through its manipulation of interest rates and the money supply; and

Whereas, The Federal Reserve System operates without any supervision or direct responsibility to the citizens of this nation; and

Whereas, The Federal Reserve System has never undergone an external audit of its function; Therefore,

Be it resolved by the House of Representatives of the General Assembly of the State of Indiana, the Senate concurring:

Section 1. The General Assembly memorializes the Congress of the United States to authorize and implement an external audit of the Federal Reserve.

Section 2. The Principal Clerk of the House of Representatives shall forward a copy of this resolution to the President of the United States, to the Speaker of the House of Representatives, the President of the Senate in Washington, D.C., and to each member of Congress elected from the State of Indiana.

BLOOD QUANTUM REQUIREMENTS FOR LESSEES OF HAWAIIAN HOMELANDS

Mr. THURMOND. Mr. President, I ask unanimous consent to have printed in the RECORD a resolution which was adopted by the Hawaii State Legislature concerning changes in the blood quantum requirement for lessees of Hawaiian homelands.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

HOUSE RESOLUTION No. 377

Whereas, section 4 of the Admission Act of the State of Hawaii (Act of March 18, 1959, Pub. L. 863, 73 Stat. 4) provides that the qualifications of lessees of Hawaiian home land shall not be changed except with the consent of the United States; and

Whereas, sections 207 to 209 of the Hawaiian Homes Commission Act limit leases under section 207 of the Hawaiian Homes Commission Act to "native Hawaiians" who are defined by section 201 of the Hawaiian Homes Commission Act as "any descendent of not less than one-half part of the blood of the races inhabiting the Hawaiian Islands previous to 1778"; and

Whereas, section 209 of the Hawaiian Homes Commission Act in most cases limits the transfer of Hawaiian homes leases upon the death of the lessee to relatives of the lessee who are "native Hawaiians"; and

Whereas, Article XII, sections 1 and 2, of the Constitution of the State of Hawaii provides:

HAWAIIAN AFFAIRS

HAWAIIAN HOMES COMMISSION ACT

Section 1. Anything in this constitution to the contrary notwithstanding, the Hawaiian Homes Commission Act, 1920, enacted by the Congress, as the same has been or may be amended prior to the admission of the State, is hereby adopted as a law of the State, subject to amendment or repeal by the legislature; provided that if and to the extent that the United States shall so require, such law shall be subject to amendment or repeal only with the consent of the United States and in no other manner; provided further that if the United States shall have been provided or shall provide that particular provisions or types of provisions of such Act may be amended in the manner required for ordinary state legislation, such provisions or types of provisions may be so amended. The proceeds and income from Hawaiian home lands shall be used only in accordance with the terms and spirit of such Act. The legislature shall make sufficient sums available for the following purposes: (1) development of home, agriculture, farm and ranch lots; (2) home, agriculture, aquaculture, farm and ranch loans; (3) rehabilitation projects to include, but not limited to, educational, economic, political, social and cultural processes by which the general welfare and conditions of native Hawaiians are thereby improved; (4) the administration and operating budget of the department of Hawaiian home lands; in furtherance of (1), (2), (3) and (4) herein, by appropriating the same in the manner provided by law.

Thirty percent of the state receipts derived from the leasing of cultivated sugarcane lands under any provision of law or from water licenses shall be transferred to the native Hawaiian rehabilitation fund, section 213 of the Hawaiian Homes Commission Act, 1920, for the purposes enumerated in that section. Thirty percent of the state receipts derived from the leasing of lands cultivated as sugarcane lands on the effective date of this section shall continue to be so transferred to the native Hawaiian rehabilitation fund whenever such lands are sold, developed, leased, utilized, transferred, set aside or otherwise disposed of for purposes other than the cultivation of sugarcane. There shall be no ceiling established for the aggregate amount transferred into the native Hawaiian rehabilitation fund.

ACCEPTANCE OF COMPACT

Section 2. The State and its people do hereby accept, as a compact with the United States, or as conditions or trust provisions

imposed by the United States, relating to the management and disposition of the Hawaiian home lands, the requirement that section 1 hereof be included in this constitution, in whole or in part, it being intended that the Act or acts of the Congress pertaining thereto shall be definitive of the extent and nature of such compact, conditions or trust provisions, as the case may be. The State and its people do further agree and declare that the spirit of the Hawaiian Homes Commission Act looking to the continuance of the Hawaiian homes projects for the further rehabilitation of the Hawaiian race shall be faithfully carried out; and

Whereas, the Legislature of the State of Hawaii is deeply concerned with, and in close proximity to the problems and needs of the native Hawaiians and seeks to be able to respond effectively to these problems and needs; now, therefore,

Be it resolved by the House of Representatives of the Eleventh Legislature of the State of Hawaii, Regular Session of 1981, that the House of Representatives and the Senate of the United States are requested to delegate to the Legislature of the State of Hawaii the power to alter the blood quantum requirement for one to be a "native Hawaiian" for the purposes of the Hawaiian Homes Commission Act; and

Be it further resolved That certified copies of this Resolution be transmitted to the Speaker of the House of Representatives of the United States, the President Pro Tempore of the Senate of the United States, and the members of Hawaii's Congressional Delegation.

CONGRESS URGED TO EXEMPT HAWAII'S PREPAID HEALTH CARE ACT FROM THE PREEMPTION PROVISION OF THE EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974

Mr. THURMOND. Mr. President, I ask unanimous consent to have printed in the RECORD a resolution which was passed by the Hawaii State Legislature requesting the Congress to exempt Hawaii's Prepaid Health Care Act from the preemption provision of the Employee Retirement Income Security Act of 1974.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

HOUSE RESOLUTION No. 616

Whereas, the Hawaii Prepaid Health Care Act (Chapter 393, Hawaii Revised Statutes), enacted in 1974, requires all employees in the State working at least twenty hours per week to be covered by a comprehensive prepaid health care plan provided through their employers; and

Whereas, the Legislature found that the spiraling cost of comprehensive medical care "may consume all or an excessive part of a person's resources" (Section 393–2, Hawaii Revised Statutes), especially when the person is unable to earn his regular wages; and

Whereas, the Legislature enacted this comprehensive Hawaii Act to insure against all nonoccupational illness and injury in the same manner as the Worker's Compensation law insures against work-related illness and injury; and

Whereas, Hawaii's employees are guaranteed health care protection by the State of Hawaii through its enforcement of the law and its maintenance of a special premium supplementation fund established in the treasury of the State, separate and apart from all public moneys or funds of the State, to pay the required one-half of premium costs for employees whose employers have neglected to do so (Section 393–45, Hawaii Revised Statutes and Regulation XLIII Relating to the Hawaii Prepaid Health Care Act, Section 73); and

Whereas, as the result of the Prepaid Health Care Act, Hawaii enjoys an estimated 98.2 percent group health insurance coverage of its civilian population as of the end of 1977 at a cost which experience has shown to be affordable for both employees and employers and which involves only minimal administrative costs on the part of government. (see "Evaluation of Impact of Hawaii's Mandatory Health Insurance Law: A Report of the Hawaii Prepaid Health Care Act," U.S. Department of Health, Education, and Welfare (by Martin E. Segal Co. October 1978)); and

Whereas, the Hawaii Prepaid Health Care Act "shall terminate upon the effective date of federal legislation that provides for voluntary prepaid health care for the people of Hawaii in a manner at least as favorable as the health care provided by said Hawaii Act, or upon the effective date of federal legislation that provides for mandatory prepaid health care for the people of Hawaii" (Section 393–51, Hawaii Revised Statutes); and

Whereas, the Employee Retirement Income Security Act of 1974 (ERISA—29 U.S.C. 1001 et seq.), primarily a pension reform Act, was enacted to protect employees who elected to participate in a benefit plan, from potential abuses and mismanagement of funds through disclosure, reporting and fiduciary requirements; and

Whereas, the Employee Retirement Income Security Act of 1974 (ERISA—29 U.S.C. 1001 et seq.), does not mandate health care coverage to all regular employees; and

Whereas, an exemption for Hawaii's Prepaid Health Care Act from ERISA's preemption provision is not breaking new ground since said federal Act exempted all known governmental insurance programs, that is, Worker's Compensation, Unemployment insurance and Disability insurance laws, at the time of its enactment in 1974; and

Whereas, despite the exemplary and highly regarded nature of the Hawaii Act and the comprehensive health care coverage it provides, the Hawaii Prepaid Health Care Act has been held by the federal courts, in essence to be preempted by the federal Employee Retirement Income Security Act of 1974 (ERISA—29 U.S.C. 1001 et seq.), which regulates the administration of private employee benefit and pension plans and which provides in pertinent part that ERISA supersedes "any and all State laws insofar as they may now or hereafter relate to any employee benefit plan" (See *Standard Oil Company of California* v. *Joshua C. Agsalud*, 442 F. Supp. 695 (N.D. Cal. 1977), affirmed, 633 F. 2d 760 (9th cir. 1980)); and however, the decision of the Ninth Circuit Court of Appeals will be appealed to the United States Supreme Courts and

Whereas, the above federal court decision was rendered with reluctance, the Court stating: "It troubles the Court, as it troubles defendants, that Congress preempted state health insurance laws apparently without specific discussion of the need for such a step. The workers whom ERISA was primarily intended to protect may be better off with state health insurance laws than without them, and the efforts of states like Hawaii to ensure that their citizens have low-cost comprehensive health insurance may be significantly impaired by ERISA's preemption of health insurance laws. Federal Legislation should heed the admonition that Justice Brandeis addressed to the federal courts:

" 'To stay experimentation in things social and economic is a grave responsibility. Denial of the right to experiment may be fraught with serious consequences to the nation. It is one of the happy incidents of the federal system that a single courageous State may, if its citizens choose, serve as a laboratory; and try novel social and economic experiments without risk to the rest of the country.' *New State Ice Co.* v. *Liebmann*, 285 U.S. 262, 311 (1932) (Brandeis, J., dissenting)."

Whereas, the Hawaii Prepaid Health Care Act has been held up as a model for a national health insurance plan which the federal government should study (see "Evaluation of Impact of Hawaii's Mandatory Health Insurance Law: A Report of the Hawaii Prepaid Health Care Act," U.S. Department of Health, Education and Welfare (by Martin E. Segal Co.), October 1978); and

Whereas, it would indeed be a bitter irony if ERISA, a landmark in the struggle to protect the continued well-being and security of millions of employees and their dependents," were to be used to blunt another milestone in the same struggle; and

Be it resolved by the House of Representatives of the Eleventh Legislature of the State of Hawaii, Regular Session of 1981, that the U.S. Congress is requested to exempt Hawaii's Prepaid Health Care Act from the preemption provision of the Employee Retirement Income Security Act of 1974; and

Be it further resolved, that the Hawaii Congressional delegation be commended for and requested to continue their efforts in obtaining the exemption; and

Be it further resolved, that duly certified copies of this Resolution be transmitted to the President pro tem of the U.S. Senate, the Speaker of the U.S. House of Representatives and to members of the Hawaii Congressional delegation.

REQUEST FOR CONTINUATION OF THE COMPREHENSIVE EMPLOYMENT AND TRAINING ACT (CETA) YOUTH PROGRAMS

Mr. THURMOND. Mr. President, I ask unanimous consent to have printed in the RECORD a resolution which was adopted by the Hawaiian State Legislature requesting the continuation of the Comprehensive Employment and Training Act youth programs.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

HOUSE RESOLUTION No. 646

Whereas, unemployment is a barrier to social and economic improvement for individuals as well as for the community as a whole, affecting the standard of living of many people and underlying many social and economic problems; and

Whereas, the Comprehensive Employment and Training Act (CETA) enacted in 1973 seeks to provide job training and employment opportunities for economically disadvantaged, unemployed, or underemployed persons and transitional public service employment and temporary public service employment; and

Whereas, in addition, CETA also provides employment and training opportunities for youth under Title IV (Youth Programs) and Title VIII (Young Adult Conservation Corps); and

Whereas, the purpose of the Title VIII program is to establish a Youth Conservation Corps to provide employment and other benefits to youths through a period of service during which they engage in useful conservation work and assist in completing other projects of a public nature on federal and non-federal public lands and water; and

Whereas, the purpose of the Title IV youth programs is to provide a broad range of coordinated employment and training programs for eligible youths in order to provide effectively for comprehensive employment and training services to improve their employability and to explore and experiment with alternate methods for accomplishing such an effort; and

Whereas, the Title IV programs currently being provided to Hawaii youths include the Youth Employment and Demonstration Program (YEDPA), the Youth Employment and Training Program (YETP), Job Corps Program, and the Summer Youth Programs; and

Whereas, in view of Hawaii's limited job market for youths and Hawaii's high overall unemployment rates in recent years, the CETA youth programs have been effective and instrumental in providing productive employment to many of the State's younger citizens; and

Whereas, in addition to employment opportunities, the CETA youth program participants have also received invaluable work experience, skill training, and other values to assist them to become more responsible, employable, and productive citizens; and

Whereas, in recent months, however, the federal government has announced its intention to phase out the funding for the CETA youth program by September 30, 1981; and

Whereas, the curtailment of the program will affect almost 6,000 youths throughout the State of Hawaii; and

Whereas, with the likelihood of a recession in late 1981, the already tight job market here in Hawaii, and the expected first time entry of a large number of young people into the labor force, the local youths will have a difficult time finding jobs in the coming years; and

Whereas, by continuing the CETA youth programs, thousands of youths who are quite willing to work but are unable to find jobs can be provided with gainful employment and be contributing members of society; now, therefore,

Be it resolved by the House of Representatives of the Eleventh Legislature of the State of Hawaii, Regular Session of 1981, that the President of the United States and the United States Congress are respectfully requested to reconsider the decision to phase out the CETA youth programs and to support the extension of the programs; and

Be it further resolved, That certified copies of this Resolution be transmitted to the President of the United States, the President Pro Tempore of the United States Senate, the Speaker of the United States House of Representatives, and to each member of the Hawaii Delegation to the United States Congress.

MESSAGES FROM THE PRESIDENT RECEIVED DURING THE RECESS

Under the authority of the order of the Senate of June 4, 1981, the Secretary of the Senate, on June 5, 1981, received messages from the President of the United States submitting sundry nominations; which were referred to the appropriate committees.

(The nominations received on June 5, 1981, are printed at the end of the Senate proceedings.)

CALENDAR YEAR 1976 REPORT ON OCCUPATIONAL SAFETY AND HEALTH ACTIVITIES—MESSAGE FROM THE PRESIDENT RECEIVED DURING THE RECESS—PM 58

Under the authority of the order of the Senate of June 4, 1981, the Secretary of the Senate, on June 5, 1981, received the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Labor and Human Resources:

To the Congress of the United States:

In accordance with Section 26 of the Occupational Safety and Health Act of 1970, I am transmitting today the 1976 calendar year annual report on occupational safety and health activities as prepared by the Secretary of Labor of the previous administration.

RONALD REAGAN.

THE WHITE HOUSE, *June 5, 1981.*

MESSAGE FROM THE HOUSE

At 12:31 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 3455. An act to authorize certain construction at military installations for fiscal year 1982, and for other purposes.

HOUSE BILL REFERRED

The following bill was read the first and second time by unanimous consent, and referred as indicated:

H.R. 3455. An act to authorize certain construction at military installations for fiscal year 1982, and for other purposes; to the Committee on Armed Services.

REPORTS OF COMMITTEES SUBMITTED DURING THE RECESS

Under the authority of the order of the Senate of June 4, 1981, the following reports of committees were submitted on June 5, 1981, during the recess of the Senate:

By Mr. DOMENICI, from the Committee on the Budget, without amendment:

S. Res. 136. Resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 508.

S. Res. 149. Resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1007.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. BAKER (for Mr. ROTH), from the Committee on Governmental Affairs, with amendments:

S. 893. A bill to extend and amend the authority of the President to reorganize the executive branch of Government under chapter 9 of title 5, United States Code (with additional views) (Rept. No. 97-132).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. BAKER (for Mr. ROTH), from the Committee on Governmental Affairs:

Fred Joseph Villella, of California, to be Associate Director of the Federal Emergency Management Agency.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. McCLURE:

S. 1338. A bill to amend the Strategic and Critical Materials Stock Piling Revision Act of 1979 in order to prescribe the method for determining the quantity of any material to be stockpiled under such Act, and for other purposes; to the Committee on Armed Services.

By Mr. HEFLIN:

S. 1339. A bill to amend title 18 of the United States Code to prohibit the robbery of a controlled substance from a pharmacy; to the Committee on the Judiciary.

By Mr. GORTON (for himself and Mr. JACKSON) (by request):

S. 1340. A bill to provide for the use and distribution of Callam judgment funds in Docket No. 134 before the Indian Claims Commission, and for other purposes; to the Select Committee on Indian Affairs.

By Mr. STENNIS:

S. 1341. A bill to make applicable to the Tennessee-Tombigbee Waterway certain provisions of law relating to taxation on fuel used in commercial transportation on inland waterways; to the Committee on Finance.

By Mr. MELCHER:

S. 1342. A bill to define the circumstances under which construction workers may deduct travel and transportation expenses in computing their taxable incomes for purposes of the Federal income tax; to the Committee on Finance.

By Mr. DOMENICI:

S. 1343. A bill to amend the Energy Policy and Conservation Act to modify the oil acquisition program of the Strategic Petroleum Reserve in order to decrease the cost of acquisition to the Government for oil to be stored in the Reserve, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. BENTSEN:

S. 1344. A bill to amend the Federal Aviation Act of 1958 to establish additional criminal penalties applicable to persons who pilot aircraft in connection with drug smuggling operations, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. HEINZ:

S. 1345. A bill entitled, the "Veterans' Health Care Act of 1981"; to the Committee on Veterans' Affairs.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. McCLURE:

S. 1338. A bill to amend the Strategic and Critical Materials Stock Piling Revision Act of 1979 in order to prescribe the method for determining the quantity of any material to be stockpiled under such Act, and for other purposes; to the Committee on Armed Services.

STRATEGIC AND CRITICAL MATERIALS STOCK PILING REVISION ACT OF 1981

● Mr. McCLURE. Mr. President, today I am introducing legislation to prescribe a new method for determining the quantity of any material to be stockpiled under the Strategic and Critical Materials Stock Piling Act. It is vital to our national security that a stockpile realistically and adequately provide us with the proper amount of resources needed in times of national emergency.

Since the inception of the Strategic and Critical Materials Stock Piling Act,

the quantity of resources (known as stockpile goals), needed in times of emergencies has fluctuated. Previous Administrations have established zero stockpile goals for numerous commodities, only later to reappraise defense requirements and set new goals for these same commodities. Those types of frequent and violent shifts in stockpile goals are costly to the American taxpayer and extremely disruptive to industry where planning for expansion has been frequently deferred when the stockpile became an active seller. Over the years, the fluctuations have been inexcusable. Neither our country's need nor our foreign dependence for these commodities have been truly considered. Notable critical commodities which have been put on this roller coaster are aluminum, copper, lead, nickel and zinc. All holdings of aluminum, copper, and nickel, most of the zinc, and about half of the lead held by the government were sold during the period 1963–1975.

Documenting the up and down goals of these commodities exhibits the dramatic trends of the roller coaster the Strategic and Critical Materials Stock Piling Act is on. To dramatize this trend I am providing two tables presenting the stockpile goals from 1944 to 1976 for nickel and copper. Both of these tables represent frequent and violent shifts in stockpile goals and I would like to point out, that these are representations of only two commodities out of 93 covered by the Critical and Strategic Materials Stock Piling Act.

TABLE 1.—STOCKPILE GOALS FOR NICKEL FROM 1944 TO 1976

[In thousands of short tons]

1944	1950	1954	1955	1958	1963	1967	1969	1971	1976
118	290	450	337.5	161.5	50	20	55	0	204

TABLE 2.—STOCKPILE GOALS FOR COPPER FROM 1944 TO 1976

[In thousands of short tons]

1944	1950	1952	1954	1958	1959	1963	1973	1976
1,250	2,100	1,100	3,500	1,900	1,000	775	0	1,299

Many of my colleagues will recall these trends and also, congressional efforts in the late 1970's to put an end to them. After years of debate and the introduction of numerous bills, the Congress amended the Strategic and Critical Materials Stock Piling Act in 1979. I participated in this endeavor and the legislation I am introducing today is a modified version of legislation I introduced in 1977. Portions of the 1977 legislation were incorporated in the final 1979 amendments, but it is still necessary for additional congressional action on this issue.

We have not solved the problem of violent fluctuations and this is evident in the 1976 stockpile goals and 1981 stockpile disposal legislation introduced. I refer specifically to the zero stockpile goal for silver identified in the 1980 stockpile report to the Congress by the Federal Emergency Management Agency. This report also shows huge deficiencies in the inventories of aluminum, copper, nickel, zinc and lead, the commodities which I noted have been a part of the violent fluctuation trends in the past. Before Congress accepts a zero stockpile goal for silver it must carefully consider whether the experience in other commodities may not be repeated with silver.

The National Stockpile was originally established by the Strategic Materials Stock Piling Act of June 7, 1939, as subsequently amended by the Act of July 23, 1946, (50 U.S.C. 98–98h). Following World War II the stockpile policy was to provide sufficient strategic and critical materials to sustain the Nation through a 5-year emergency.

This requirement was reduced to a 3-year emergency during the 1960s. In 1973 the administration reduced the stockpile requirement to a 1-year emergency basis and sought legislation to dispose of large quantities of excess materials to balance the budget. However, much of this legislation was not passed by Congress. In 1976, the stockpile planning basis was returned to the first three years of an emergency of indefinite duration. A minimum planning base of a 3-year emergency has now been established legislatively in the Strategic and Critical Materials Stock Piling Revision Act of 1979.

Other important provisions of the Strategic and Critical Materials Stock Piling Revision Act of 1979 include:

First, clarification that the purpose of the stockpile is to provide for national defense and not for economic or budgetary purposes;

Second, authorizing the President to determine stockpile requirements and providing, for the first time congressional guidance as to how these determinations are to be made; and

Third, creation of a National Defense Stockpile Transaction Fund, as a separate entity within the Treasury, to handle all funds generated by the disposal of stockpiled materials, and from which funding of purchases for the stockpile can be obtained.

These amendments are not enough. The congressional guidance has not affected the continuing, and somewhat questionable subjective nature of developing stockpile goals. Presently, the Federal Emergency Management Agency periodically reviews the goals and takes into consideration the recomendations of the Departments of Defense, Commerce, Interior, State, Treasury, and the Central Intelligence Agency.

There is no simple formula used to set criteria and no consistency. It is still possible to use the National Stockpile for economic or budgetary purposes with this type of subjective development. The proposed silver stockpile goal of zero leads me to conclude that the National Stockpile is still being used for the purpose of generating revenue. It should not be used to provide each administration with a slush fund of valuable minerals and materials. It must be used for its true purpose, to provide this country with the strategic and critical materials needed in a national emergency.

Mr. President, my bill today will take us one step closer in achieving this purpose. It will bring a more direct involvement of Congress in the setting of stockpile goals and to more closely tie these goals to our import dependence. The bill provides that the executive branch should continue to designate the materials that are needed for the stockpile. But, the bill recognizes that an order of priority exists with respect to the quantity of each material stockpiled and that fundamental to that priority is the dependency this Nation has on imports to meet raw material needs.

The United States is obviously most vulnerable to supply difficulties with respect to commodities which it does not produce in any significant quantities. In the bill these materials are designated as class A. Those commodities which represent materials of which the United States has some production but is unlikely to achieve self-sufficiency even with severe rationing or substitution, are designated as Class B. Finally, those commodities which the United States produces in substantial quantities but for which it has some import dependence are designated as class C.

The importance of these designations is that the goals would rely on our foreign dependency. For commodities in class A, the goal would be equal to a 3-year supply of a 5-year average of net imports. For class B, the goal would be a 2-year supply and for class C, the goal would be a 1-year supply.

The executive branch is authorized to designate the classification of the individual commodities under the terms of the bill and in so doing will be expected to calculate average annual U.S. net imports of each. These calculations will be based on the 5 calendar years immediately preceding and the calculations will be made at least once in each Presidential term.

When stockpile acquisitions are taking place, imports will tend to rise and subsequently, when stockpile liquidations are taking place, imports will tend to fall. Therefore, in calculating net imports, the bill requires that stockpile acquisitions be deducted and that stockpile liquidations be added to arrive at figures not influenced by stockpile activities.

The bill further recognizes that in some special cases the formula outlined may not yield a result in line with the 1979 amendment requiring the stockpiling of sufficient quantities to sustain the United States for a period of not less than 3 years in the event of a national emergency.

It is not the intention of this bill to change the not less than 3-year requirement in event of a national emergency. There is a provision in the bill which allows the executive branch to propose a different goal. However, the administration must come to the Congress and explain the proposed departure. Congress would have 90 days to consider the administration's reasons, and would therefore, become more directly involved in the setting of the stockpile goals. Due to the subjective nature of determining the needs in a national emergency and thus, stockpile goals, explanations will help to eliminate the use of the national stockpile for budgetary purposes.

The following tabulation compares the quantities for certain key materials which are involved in the stockpile program under two alternatives. The first alternative is the program announced in 1980 by the Federal Emergency Management Agency (FEMA) and the second alternative is embodied in the legislative proposal I am introducing today.

To explain the rights of the executive branch previously mentioned I would like to concentrate for a moment on the commodity, cobalt. Under the 1980 FEMA alternative the stockpile goal for cobalt is 85,400,000 pounds. Under my alternative, the goal is 54 million pounds. If the executive branch determines that the 54 million pounds is not a sufficient quantity for the United States in a national emergency it must justify its reasons to Congress. It would be the responsibility of the administration to present its reasons for why the goal derived from the import formula does not yield a proper result. It will then be the responsibility of the Congress to review the goal and the administration's reasons for proposing a change.

STRATEGIC STOCKPILES—PRESENT STOCKPILE GOALS, HOLDINGS, AND McCLURE ACT OBJECTIVES

[Figures in thousands]

Commodity	Class	FEMA 1980 goal	Sept. 30, 1980, holdings	McClure Act 1981 goal	McClure Act deficiency or surplus
Alumina and bauxite (long dry tons)	A	27,600	14,158	19,720	−5,562
Aluminum (short tons)	C	700	2	265	−263
Antimony (short tons)	B	36	41	37	+4
Cobalt (pounds)	A	85,400	40,802	54,000	−13,198
Copper (short tons)	C	1,000	29	263	−234
Lead (short tons)	C	1,100	601	66	+525
Nickel (short tons)	B	200	0	360	−360
Palladium (troy ounces)	A	3,000	1,255	2,688	−1,433
Platinum (troy ounces)	A	1,310	453	2,976	−2,523
Silver (troy ounces)	B	0	139,500	81,520	+57,980
Tin (long dry tons)	A	42	200	150	+50
Zinc (short tons)	B	1,425	376	1,396	−1,020

In 1977, when I first introduced the concept of relating stockpile goals to import dependence, I believed this simple procedure would provide stability to the stockpile goals and provide the Nation with the means to realistically and adequately meet the demands required in the times of emergencies. This is essential. In a time of war we must be able to meet our demands. We are a nation dangerously and expensively dependent on foreign nations for raw materials. Presently, of the 32 mineralsa nd materials identified as strategic and critical to the United States in terms of national security we are dependent on foreign sources in excess of 50 percent for 25 of these minerals.

We simply cannot afford to overlook this and expect the current stockpile to realistically meet our needs. What will we do? Will we turn to our allies who have no stockpiles to speak of? Will we depend on continued imports across the sea lanes which would be subject to unsafe passage? Will we depend on imports from countries close by whose own demands may infringe upon the quantity of exports it will allow? Excessive dependence is dangerous.

In 1973, during the Arab oil embargo, the Canadian National Energy Board realized its oil supplies were limited. In 1974, the Canadian National Energy Board declared that Canadian oil supplies would not be adequate to serve traditional Canadian markets. The Canadian Government therefore imposed export restriction, with the goal of reducing exports to zero by 1983. In addition, an export tax was levied on oil shipments to the United States. The U.S. Senate passed Senate Resolution 249 on January 24, 1974, condemning Canada, along with Venezuela and the Arab oil producing countries for actions which raised the price of oil.

In subsequent months, however, most American observers came to accept the fact that Canada's energy supplies were not limitless, and that Canada was within its rights to exercise reasonable prudence in their exploitation. Mineral supplies are also not limitless and we must look at the possibility of such an activity occurring again in the area of mineral import-exports with Canada as well as with other friendly countries. These are issues and questions we must address now—not in a time of national emergency.

In a time of war, our own national economy and foreign relations are a very different proposition than in a peacetime. In war, all countries turn their efforts to military needs and what once might have been exported will remain within existing borders. A country cuts back sharply on the production of automobiles, household goods, residential construction, and may even prohibit entirely the output of certain items. All of this for the sake of meeting one's own demands.

Mr. President, I believe this bill will assist the Nation in being able to meet its own demands in time of a national emergency and I ask that each of my colleagues join me in making sure this will occur.

I ask unanimous consent that the text of my bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1338

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Strategic and Critical Materials Stock Piling Revision Act of 1981".

SEC. 2. (a) Section 2(a) of the Strategic and Critical Materials Stock Piling Revision Act of 1979 (50 U.S.C. 98a(a)) is amended by adding at the end thereof the following:

"To effectuate this policy determinations shall be made from time to time, as provided in this section, regarding which materials are strategic and critical to the United States and the quantities of such materials that should be stockpiled under this Act."

(b) Section 2 of such Act is further amended by redesignating subsection (b) as subsection (c) and adding after subsection (a), as amended by subsection (a) of this section, a new subsection (b) to read as follows:

"(b)(1) The President shal appoint an interagency advisory committee composed of representatives from appropriate departments and agencies of the Government to determine which materials are to be acquired under this Act and what classification such materials shall be assigned under paragraph (2).

"(2) Materials selected to be stockpiled under this Act shall be classified by the interagency advisory committee provided for in paragraph (1) as being one of the three classes prescribed below, as appropriate:

"(A) Class A materials are those materials not produced in the United States or produced in the United States in limited quantities, that are necessary for the security of the United States, are essential to the economy of the United States, and are primarily obtained from foreign sources.

"(B) Class B materials are those materials produced in the United States but are not available in sufficient quantities in the United States to offer the potential for meeting total domestic needs, are necessary to the security of the United States, are essential to the economy of the United States, and are obtained to a substantial extent from foreign sources.

"(C) Class C materials are those materials produced in substantial quantities in the United States, are available in sufficient quantities to meet total domestic requirements, are necessary to the security of the United States, are essential to the economy of the United States, and are obtained to a lesser extent from foreign sources.

"(3) The quantity of any material to be acquired under this Act (stockpile goal) shall be determined as follows:

"(A) The stockpile goal for any material designated as a class A material shall be a quantity equal to three years' domestic net imports of such material.

"(B) The stockpile goal for any material designated as a class B material shall be a quantity equal to two years' domestic net imports of such material.

"(C) The stockpile goal for any material designated as a class C material shall be a quantity equal to one year's net import of such material.

"(4) Subject to appropriate adjustments under paragraph (5), a year's domestic net imports of any material for purposes of clause (A), (B), or (C) of paragraph (3) shall be a quantity of the material equal to the average annual imports of such material during the five calendar years immediately preceding the calendar year in which the determination for the stockpile goal is being made (base period), plus the average annual sales or minus the average annual purchases of such material made from the stockpile during such five-year base period, reduced by the average annual exports of such material during such five-year base period.

"(5) In determining the quantity under paragraph (4) of any material to be acquired for the stockpile appropriate adjustment shall be made in the computations made under such paragraph in the case of any material which is acquired in both its crude form and in its refined or processed form so as to avoid duplicate calculations with respect to the same material.

"(6) The stockpile goal for any material acquired for the stock pile under this Act shall be reviewed once every four years by the interagency advisory committee referred to in paragraph (1). A revised objective for such material shall be established only if the average annual quantity of imports of such material during the five calendar years immediately preceding the current calendar year increased or decreased by more than 10 per centum of the average annual quantity of such material at the time of the preceding mandatory review under this paragraph.

"(7) Nothing in paragraph (6) shall be construed to prohibit the head of the agency and the interagency advisory committee referred to in paragraph (2) from conducting a review of the stockpile goal for any material at any time other than that prescribed by paragraph (6); but in any case in which such committee determines that the stockpile goal for any material should be computed in a manner other than that prescribed in paragraph (3), the head of the agency shall notify the Congress in writting of that determination and set forth the proposed new formula for computing the stockpile goal for such material. The new formula shall become effective with respect to such material unless within a period of ninety days after the day on which the Congress was notified by the head of the agency, either House of the Congress agrees to a resolution disapproving such formula.".●

By Mr. HEFLIN:

S. 1339. A bill to amend title 18 of the United States Code to prohibit the robbery of a controlled substance from a pharmacy; to the Committee on the Judiciary.

ROBBERY OF A CONTROLLED SUBSTANCE FROM A PHARMACY

Mr. HEFLIN. Mr. President, today I would like to introduce legislation I believe will help arm our law enforcement officials in their continuing war on crime in America. This bill will amend title 18 of the United States Code to make the robbery of controlled substances from drug stores a Federal crime.

For many years now, our Federal agents from the Drug Enforcement Administration and the Federal Bureau of Investigation have waged an increasingly effective campaign to halt the flow of illegal drugs in our Nation's cities and suburbs.

However, because our Federal agents have made such progress in disrupting the illegal drug trade on our streets, the drug pushers have now begun to turn to our local retail drug stores to fill their supplies. These drug traffickers have found an outpost to continue their illegal dealings where our Federal agents are not legally authorized to tread.

And, the endangered victims of this new assault are the men and women who own, manage and work in our Nation's pharmacies. The drug-related robbery of a pharmacist is neither an isolated nor a unique crime in our country today—it is, rather, a serious, widespread and ever-growing phenomenon.

Without our action on this bill, I fear this phenomenon will flourish, and the cost to our society will not only be in the continued marketing of illegal drugs, but also in the death and injury of our Nation's pharmacists.

Our pharmacists, their employees and their customers need the able protection of our Federal crime fighters. It is up to us in Congress to see that these increasingly victimized citizens receive that protection.

This measure is not the first attempt at passing legislation to extend Federal jurisdiction to this area; but efforts in previous Congresses have been bogged down in our legislative process.

Nor is my bill the only such measure introduced in this, the 97th Congress. Several of my distinguished colleagues have introduced legislation that would also make the drugstore thefts of controlled substances a Federal crime.

The bill I am introducing today differs in that my legislation establishes Federal jurisdiction when the value of the drugs stolen exceeds $100. I believe the strict standards of my bill will more clearly warn the drugpushers that we fully intend to pursue and prosecute them for their criminal activities.

For the sake of our pharmacists who literally live in daily fear of these "drug merchants" roaming our streets, I believe it is imperative that we move this bill through as quickly as possible.

Fellow Senators, on November 20 of last year, I called on Congress to declare an all-out war on crime in this country. If you will permit me, today I would like to reiterate a portion of that November 20 statement.

Recent surveys indicate that fear of crime is causing a majority of Americans to drastically alter their lifestyle. This research reveals that four out of ten Americans are highly fearful of becoming victims of a violent crime such as murder, rape, robbery and assault. One person in four has stopped going places he or she used to go at night because of fear of becoming a victim of a violent crime.

Mr. President, I believe it is time that Congress declare an all-out war on crime in this country. Everyone agrees that something must be done about crime, but too many times it has been treated as a secondary issue by the Federal Government. Strong talk and wishful thinking will do nothing toward reducing crime. It is incumbent upon Congress to act forcefully and deal dramatically with this crisis that now confronts us.

I urge each of you to study this measure. This bill will make the theft from a pharmacy of any substance listed in schedules I through IV of the Controlled Substance Act a Federal crime subject to a prison term of 10 years, a fine of $5,000, or both.

Federal jurisdiction would be established when the value of the goods robbed exceeds $100, or when an individual robbery is part of a pattern of robberies. It will close the weak point in our battle against drug crimes, and it will help save the lives of our Nation's retail druggists.

I think all of us in this body are concerned about the high crime rate in this country. It is paramount that we act now to return our streets and neighborhoods to the decent, hardworking people of this Nation. I believe this bill is an important step in that direction.

Mr. President, I ask unanimous consent that the text of the bill and an article entitled the "NARD Crime Bill" from the National Association of Retail Druggist Journal of April 1981, be printed in the RECORD at the conclusion of my remarks.

Fellow Senators, I ask each of you to take a look at this legislation, and to examine the alarming trend of drug thefts from our Nation's pharmacies. I hope that many of you will join in cosponsoring this measure, and that all of you will add your support to this crime-fighting legislation.

Thank you, Mr. President.

There being no objection, the bill and article were ordered to be printed in the RECORD, as follows:

S. 1339

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) chapter 103 of title 18, United States Code, is amended by adding immediately after section 2117 the following new section:

"§ 2118. Robbery of a pharmacy.

"(a) Any person who takes property of another from a licensed pharmacy regularly engaged in the retail dispensing in interstate commerce of prescription drugs or devices, by force and violence, or by intimidation, and such robbery is part of a pattern of such robberies in the locality, shall be fined not more than $5,000, or imprisoned not more than ten years, or both.

"(b) For purposes of this section, the term 'property' means a controlled substance consisting of a narcotic, amphetamine, or barbiturate that is listed in Schedule I, II, III or IV established by section 202 of the Controlled Substances Act (21 U.S.C. 812), the value of which is in excess of $100.".

(b) The table of sections for chapter 103 of title 18, United States Code, is amended by adding at the end thereof the following:

"2118. Robbery of a pharmacy.".

[From NARD Journal, Apr. 1981]

NARD CRIME BILL

In the summer of 1969 President Richard Nixon called upon the nation to aggressively combat the national problems of illicit drug traffic, the diversion of legitimate drugs and drug abuse. He said in part:

"Within the past decade, the abuse of drugs has gone from essentially a local police problem into a serious national threat, to . . . millions of Americans . . . A new urgency and concentrated national policy is needed at the Federal level to begin to cope with this growing menace to the general welfare of the United States."

NARD enthusiastically supported the President on all points, especially before Congress. This was twelve years ago.

While other pharmacy organizations stood silent, William E. Woods, NARD Executive Vice President, cited the growing incidence of pharmacy crime by criminals seeking dangerous drugs: "Too many retail pharma-

cists have been murdered, blinded or assaulted as a result."

Woods then cautioned Congress that with the enactment of the new legislation, and the predicted reduction in illicit drug traffic, the pharmacies of America would become the favored target of squeezed traffickers. The NARD Chief Executive told the Senate Judiciary Committee, in its opening series of hearings, September 1969: "We are concerned, however, that the robberies, assaults and senseless murders in retail pharmacies may increase."

In forum after forum NARD raised these concerns. In the following spring, before the Subcommittee on Public Health and Welfare (today the Waxman Health Subcommittee), Woods reiterated NARD's concern to then Chairman Paul Rogers (D-Florida):

"Many retail pharmacies have been robbed or burglarized by criminals searching for narcotics and dangerous drugs. It is our feeling that such criminal acts would be lessened if the Justice Department could take a greater interest in pursuing such cases. The deterrent would be accelerated. If only local authorities pursue these cases, the impact may not be great enough. Since the reason for the proposed legislation is the great national interest and social harm involved, the NARD recommends that consideration be given to ways for the Justice Department to become involved in cases where robberies of retail pharmacies are aimed at drugs and products which are the subject of these bills."

Later in 1970 Woods, armed with the first of many NARD crimes-against-pharmacy surveys, presented the NARD case to the prestigious Ways and Means Committee. He concluded:

"The NARD urges, therefore, that the Department of Justice be authorized to enter any case of theft of narcotics or dangerous drugs from registrants under this Bill, cooperating with local law enforcement officials. FBI jurisdiction would have greater deterrent effect on criminals than the current law enforcement system dependent on local authorities, who are often underequipped and under-trained for this work. Moreover, combating this national problem requires a coordinated effort."

The campaign for a law in which the robbery of a federally controlled substance would become a Federal crime had been born.

The 91st Congress did act in 1970. It enacted, in fact, the single most important statute relating to drug law enforcement since the passage of the Harrison Act. It was entitled the comprehensive Drug Abuse Prevention and Control Act of 1970 (Title II is the Controlled Substances Act). The legislature had responded to the Presidentially declared "war on drugs".

Pharmacists, their staff and customers, however, were left unprotected. They would have to wait. It appeared that Congress wanted or needed a pharmacist body-count similar to that of narcotic overdose deaths which had stimulated their action on the 1970 Act.

During the next several years, NARD-supported bills were introduced in both Houses of Congress. Sen. Frank Church, with a bipartisan group of co-sponsors, including Humphrey, Bayh, Hollings, Taft, Fannin and Schweiker, carried the banner in the Senate. In the House, Robert Nix lead the NARD charge with a diverse list of co-sponsors, exceeding 50 in number.

From the outset, however, the very agency within the Department of Justice which had been given responsibility for the 1970 law—the BNDD (now DEA)—adamantly opposed the NARD legislation.

In April, 1970, NARD had sought the support of BNDD Counsel Sonenreich, who, along with John Dean, had designed the Nixon drug law. NARD 'expressed great fear that, after enactment of the pending legislation, the crimes against the pharmacy profession will be accelerated because many present sources of illicit drugs will be dried up." Again, after the NARD legislation was introduced, NARD appealed to DEA head Bartels to support the law making pharmacy robbery a crime.

Woods stressed: "This is no panacea, we recognize, but there is a parallel here with bank robberies, where the federal "rap" is a considerably greater deterrent than is the penalty for larceny, robbery, or burglary under local state laws. Furthermore, the knowledge that federal agents are better equipped and more experienced investigators of such crime adds a further deterrent to those who would obtain drugs unlawfully from retail pharmacies. Even without extensive use, federal jurisdiction is well known for its curtailment of criminal activity. We would emphasize that our members throughout the United States are being murdered, assaulted, robbed and burglarized because they are dispensing drugs, controlled by a federal enactment, and these pharmacies are licensed under this federal act."

These and other NARD appeals to DEA went unheeded. In fact, DEA opposition to the legislation became the single most important obstacle to passage of the pharmacy crime bill. Friend and foe alike cited DEA's expressed opposition as the major stumbling block to progress.

Unrelentingly, NARD took its case again to Congress in 1974. During Senate Judiciary oversight hearings on the Controlled Substances Act we testified:

"NARD and its members are greatly concerned over the increased risk of crimes of violence in pharmacies. Crimes of violence in pharmacies related to controlled substances are increasing at an alarming pace. We have provided the committee with many, many new stories concerning similar crimes throughout the country.

Beginning with the hearings on the proposals which became the Controlled Substances Act, NARD has consistently urged that Congress provide Federal jurisdiction to enforce crime related to controlled substances in pharmacies. Not uncharacteristically, DEA has opposed our pleas for relief and assistance.

As the CSA is effectively implemented to dry up the illicit source of controlled substances for pushers and users, there is a correspondingly increased pressure and threat upon legitimate outlets possessing quantities of these substances. Pharmacies are a primary target for those in need of drugs for a number of reasons, not the least of which is that pharmacies are open and accessible to just about every segment of the population and are found in inner city areas when most other businesses have fled.

We do not suggest that ordinary crimes in pharmacies, like robbery and burglary, be blanketed into Federal jurisdiction. However, we do request that crimes of violence—assault, robbery, burglary, murder and the like—involving controlled substances be subject to Federal jurisdiction. If a pharmacy were robbed and only money taken, that crime would rightly be a matter of local jurisprudence. However, if the felons clearly were motivated by the presence of, or a need to obtain, controlled drugs, evidenced by drugs being part of the booty, then we believe that Federal jurisdiction and prosecution ought to be authorized.

Congress has specifically provided that a person who manufactures, distributes, dispenses or possesses a controlled substance, with intent to distribute, is subject to Federal criminal prosecution and penalties. Similarly, if a person knowingly or intentionally acquires or obtains possession of a controlled substance by misrepresentation, fraud, forgery, deception or subterfuge, Federal jurisdiction and penalties are available. However, if the person obtains the drugs by violence in a pharmacy, the act implies that this is of no Federal concern.

The increased threat of violence and crimes in pharmacies is a direct result of the stringent controls imposed by the CSA. It is only fitting that the resources and facilities of the Federal Government be made available to protect pharmacies and apprehend those bent on circumventing the controls of the law.

Federal criminal jurisdiction over crimes of violence and other unlawful conduct relating to controlled substances would provide for more uniform law enforcement action and punishment of violators. As it is now, punishment of drug-related crimes in pharmacies rests upon the varying provisions of State criminal laws. A Federal law could provide a sanction universally applicable in this country that would be more readily understood and heeded and more uniformly applied.

Our members are health care professionals, not policemen. Nor are they experts in the art of self-defense. Through no fault of their own, pharmacists have been placed in a situation where their lives and property are continually at risk.

NARD believes that pharmacists ought to be supported as they make the sacrifices which necessarily accompany this national push to reduce drug misuse and abuse.

Unless some method is devised assuring pharmacists both greater protection from this type of crime and deeper involvement of Federal law enforcement machinery and personnel, NARD believes that pharmacists will begin to refuse to stock or handle controlled substances altogether. Such action would have serious detrimental effects on health care which none of us would welcome. But there is a limit which society, just in humanistic terms, cannot expect pharmacists to exceed.

The overwhelming percentage of pharmacists in this country practice independent community pharmacy. Too often our members feel that their needs, suggestions and requests are ignored or viewed with hostility by those administering the law. The Federal Government has shown little sensitivity to, or understanding of, the very real problems or risks our members face. The Federal effort is apparently paying good dividends in the area of illicit and clandestine operations involving criminal elements, but appears ill-equipped to deal with law-abiding citizens.

While DEA did not change its obstructive tactics, it was somewhat encouraging that, five years after NARD's initial demand for federal pharmacy crime legislation, several other pharmacy organizations began to echo the call.

Each subsequent year NARD legislation was introduced, with predictable DEA opposition. For example, in 1975, at NARD's request, pharmacy crime became a title of the Violent Crime and Repeat Offender Act introduced by Birch Bayh in the Senate. Each year, as NARD confronted the Congress and the DEA—through its Legislative Conference, testimony, lobbying, letters and other actions—some progress was made.

By 1977, the reform of the criminal code had become a dominant factor in the debate. Church and others who had originally supported the NARD bill now added it as an amendment to the Code bill, which passed the Senate in 1978. DEA still claimed that the provision had unrealistic limitations as to value of drugs stolen and the number of incidents involved. Nevertheless, after nearly ten years it had progressed from an NARD proposal to actual passage in the U.S. Senate.

The House of Representatives, however, was denied the opportunity to vote on this measure. Despite the tremendous efforts by NARD and a small but growing group of enthusiasts, the chairman of the key House Judiciary Code Subcommittee, citing DEA objections to passage, killed the pharmacy crime amendment in both 1978 and 1980 Congresses.

NARD continued to build a legislative record before the Congress. While stifled for the moment with the House Judiciary Committee, NARD worked closely with the Senate Small Business Committee and its hearings on Crime and its Impact on Small Business.

The Chairman of NARD's Legislative and Government Affairs Committee, Charles West of Arkansas, stressed the urgency of the situation: "Pharmacists, as owners of small businesses, are in a unique position—robbers want the merchandise in the store, not the money." NARD's pleas for help tersely pinpointed the dilemma: "The choice is not pleasant. Either carry the narcotics to serve your patients and be subjected to robbers who want the drugs or don't carry them, thereby protecting your life. But then you deny help to customers, lose their patronage and possibly your entire business."

NARD's 1969 prediction—that as illicit drug supplies were cut off, retail pharmacists would become targets for an increasing number of criminals seeking other sources of drugs—has regrettably become a reality. And the plague is spreading. Daytime robberies for Controlled Substances Act drugs are now victimizing hospital pharmacies, too.

In cautioning that the failure to act in 1970 would return to haunt in the future, NARD accurately forecasted the grim, growing epidemic of terror and violence which today is engulfing our nation's retail pharmacies, from owners and staff to families, patients and customers.

In fact, since 1973, when NARD legislation was first introduced, armed robberies to obtain Federally-controlled drugs from pharmacies have mushroomed by 150 percent (far in excess of the national robbery rate), including an increase of 33 percent for 1979, the most recent year for which statistics are available. This, of course, is but an increase of those reported—only the tip of the iceberg. The street value of the drugs stolen by these robberies is estimated in the hundreds of millions of dollars. Yet monetary value is only one element of the havoc caused by pharmacy robbery. One in five robberies results in death or some injury to victims. Merchandise can be replaced, but what value do we ring up for human carnage and terror?

This terrorism (no other description is quite strong enough, if even this is) of an entire class of health care professionals—retail pharmacies—continues unabated. As William W. Woods, NARD Executive Vice President, has tirelessly stressed for more than a decade, "They are sitting ducks".

Understandably, independent retail pharmacists are concerned about all robberies. But we are especially sensitive to those involving controlled substances. Robberies with a unique Federal character have been a top priority on each of our legislative agendas since Congress considered and enacted the Controlled Substances Act of 1970. As NARD predicted in 1970, in testimony before the House Interstate and Foreign Commerce Committee, robberies to obtain Federally-regulated, controlled drugs have increased dramatically in the last decade.

Unlike the robberies of gasoline stations or liquor stores, we are concerned about crimes where the objective is to obtain the Federally-regulated substance: controlled drugs. In fact, enforcement of provisions of the 1970 Federal Act designed to reduce forms of division other than robbery have increased both the street value of the drugs sought and the likelihood of robbery as a preferred method for obtaining the drugs. Yet such crimes are not subject to prosecution by the Federal government.

It is a serious violation of Federal law, though, if identical Federally-controlled drugs are diverted from a pharmacy by fraud, by improper prescribing or dispensing, or by outright diversion by registrant employees. In such cases the extensive investigative resources of the U.S. Department of Justice are brought to bear.

These cases are pursued in hundreds of Drug Enforcement Administration and U.S. Attorneys' offices throughout the United States. The statutory authority in such matters is not limited by the value of the controlled drugs involved, by whether violence has accompanied the crime or by other criteria.

The reality is that pharmacists are on the front line in this effort to prevent diversion and abuse of legitimate drugs.

It has been this cooperative effort which has yielded success since 1970. Pharmacists don't seek combat pay (to which they are arguably entitled) for participating in this risky joint venture as the key health providers of these highly dangerous, Federally-controlled substances. What we want is an amount of Federal involvement in the protection of pharmacists, their families, employees and customers comparable to the contribution we make.

The 96th Congress gave us reason for encouragement with the movement in both House and Senate. Now, in the 97th Congress, we have more reason than ever to expect a victory.

The new year and the 97th Congress hold great promise for passage of pharmacy crime legislation. The enthusiastic response to the new comprehensive NARD pharmacy crime bill (See p. 4, Feb. NARD Journal) is very encouraging. The NARD bill has been reviewed by the Legislative Counsels of both Houses of Congress and is available to any member of Congress who wishes to introduce it. Already the key aspects of NARD's Pharmacy Protection and Violent Offender Act of 1981 have been introduced. These include:

Mandatory minimum penalties for the robbery of pharmacies to obtain Federally-controlled substances;

Additional mandatory penalties for repeat offenders;

Mandatory penalties for those who conspire to commit such robberies;

Denial of probation and suspended sentences to those convicted of such robberies; and

A requirement that the FBI include pharmacy crime, including robberies, in its annual Uniform Crime Report.

The NARD pharmacy crime bill has the added and vital support of the Joint Commission of Pharmacy Practitioners, comprised of: American College of Apothecaries, American Society of Consultant Pharmacists, American Society of Hospital Pharmacists, National Association of Chain Drug Stores and the National Association of Retail Druggists. Also supporting this NARD legislative effort is the National Drug Trade Conference, comprised of: American Association of Colleges of Pharmacy, Drug Wholesalers Association, Inc., National Association of Chain Drug Stores, Inc., National Wholesale Druggists Association, Pharmaceutical Manufacturers Association, the Proprietary Association, and the National Association of Retail Druggists.

We recognize that enactment of the NARD bill would be no panacea; pharmacy crime is unlikely to magically disappear. It would, however, establish Federal law enforcement as an essential aspect of any comprehensive pharmacy crime prevention effort.

The change in Executive Branch leadership, the now apparent willingness of the DEA to support national scope pharmacy crime legislation, and the development of a new agenda for the 97th Congress present an ideal opportunity to achieve this long-denied NARD objective.

NARD expects that hearings on pharmacy crime legislation will be held by the House Judiciary Committee and Health Subcommittee as well as in the Senate. With the thaw in DEA opposition to national pharmacy crime legislation and the welcome activity of other pharmacy associations and pharmaceutical opinion molders who have now joined the fight, NARD's twelfth year pursuing this vital issue may finally produce a victory.

By Mr. GORTON (for himself and Mr. JACKSON) (by request):

S. 1340. A bill to provide for the use and distribution of Clallam judgment funds in Docket No. 134 before the Indian Claims Commission, and for other purposes; to the Select Committee on Indian Affairs.

USE AND DISTRIBUTION OF CERTAIN JUDGMENT FUNDS

Mr. GORTON. Mr. President, today I am introducing legislation, at the request of the Department of the Interior to provide for the use and distribution of judgment funds awarded to the Clallam Tribe of Indians by the Indian Claims Commission in 1976. I ask unanimous consent that the Department's letter of transmittal and the text of the bill be printed in the RECORD.

There being no objection, the bill and letter were ordered to be printed in the RECORD, as follows:

S. 1340

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That notwithstanding any other provision of law, the funds appropriated by the Act of May 4, 1977 (91 Stat. 61) in satisfaction of a judgment awarded in favor of the Clallam Tribe of Indians of the State of Washington in Indian Claims Commission Docket No. 134, less attorney fees and litigation expenses, and including all interest and investment income accrued, shall be divided by the Secretary of the Interior (hereinafter referred to as the "Secretary"), in shares of one-third to each, as agreed to by the adoption of tribal resolutions cited in sections 2, 3, and 4 of this Act, among the Port Gamble Indian Community, the Lower Elwha Tribal Community, and the Jamestown Band of Clallam Indians.

SEC. 2. The share of the funds apportioned to the Port Gamble Indian Community under the first section of this Act shall be used as provided by Tribal Resolution No. 79–A1, dated January 9, 1979, requiring that 80 percent of such share be used in an investment program and 20 percent in a revenue supplement fund for community projects.

SEC. 3. The share of the funds apportioned to the Lower Elwha Tribal Community under the first section of this Act shall be used as provided by Tribal Resolution No. 8B–78, dated August 27, 1978, requiring that 80 percent of such share be used in a land acquisition program that includes the payment of an outstanding loan on land purchased by the community and 20 percent in economic development projects for the benefit of all tribal members.

SEC. 4. The share of the funds apportioned to the Jamestown Band of Clallam Indians under the first section of this Act shall be used as provided by Resolution No. 78–1, dated October 1, 1978, requiring that 50 percent of such share be used in a land acquisition program and 50 percent in a business development program.

SEC. 5. The shares of the funds apportioned under the first section of this Act shall be credited to the respective groups, shall be placed in separate program accounts in the percentages set forth in sections 2, 3, and 4 of this Act, and shall be held and invested by the Secretary under section 1 of the Act of June 24, 1938 (52 Stat. 1037; 25 U.S.C. 162a) until, in the case of each group, specific plans and tribal budgets for the use of its share have been approved by the Secretary and, in the case of the Jamestown Band, a formal organization has been approved by the Secretary. Upon such approval, the share involved, including the interest and investment income accrued, shall be advanced to the respective tribal governing body to administer.

U.S. DEPARTMENT OF THE INTERIOR,
Washington, D.C., May 22, 1981.

Hon. GEORGE BUSH,
President of the U.S. Senate,
Washington, D.C.

DEAR MR. PRESIDENT: There is enclosed a draft bill, "To provide for the use and distribution of Clallam judgment funds in Docket No. 134 before the Indian Claims Commission, and for other purposes."

We recommend that the draft bill be introduced and referred to the appropriate committee, and that it be enacted.

The draft bill would provide for the use and distribution of judgment funds awarded to the S'Klallam, now known as the Calallam, Tribe of Indians in Docket No. 134 by the Indian Claims Commission. The judgment funds would be equally divided among three Federally recognized Clallam bands—the Port Gamble Band of Clallam Indians, the Lower Elwha Tribal Community, and the Jamestown Band of Clallam Indians. Finally, the draft bill would require the funds to be used in accordance with specified tribal resolutions.

On November 5, 1976, the Indian Claims Commission issued a final award in Docket No. 134 in the net sum of $385,820 in favor of the Clallam Tribe of Indians of the State of Washington. Funds to cover the award were appropriated by the Act of May 4, 1977 (91 Stat. 61).

The award represents additional compensation for 438,430 acres of land ceded by the Clallam Tribe to the United States by the Treaty of Point-No-Point of January 25, 1855 (12 Stat. 933). The fair market value of the land was $440,000 as of March 8, 1859, the effective date of the treaty. The Commission determined that $39,180 in treaty payments had been made to the Clallam Tribe. This determination was based, in the absence of a treaty apportionment, on the approximate tribal population of the four tribes participating in the 1855 treaty. The Commission also allowed an offset of $15,000 for the purchase of the Port Gamble tract, which was outside the ceded area.

Under section 2 of the Indian Judgment Funds Act of October 19, 1973 (87 Stat. 466; 25 U.S.C. 1401 et seq.), the Secretary of the Interior is required to submit a proposed plan for the distribution of a judgment fund award within a specified period after the date on which the funds to pay the award are appropriated (180 days, plus an extension not to exceed 90 days). On July 9, 1979, the U.S. District Court for the District of Columbia ruled, in *Seminole Indian Tribe of Florida* v. *Andrus*, Civil No. 78-994, that plans submitted to the Congress after the statutory deadline cannot take effect under the 1973 Act.

In accordance with the 1973 Act, proposals for the use of the Clallam judgment funds have been developed and hearings of record held. However, a plan respecting the funds was not submitted to the Congress within the prescribed period after the May 1977 appropriation of the funds for the award. Therefore, the use and distribution of the funds can now be accomplished only through legislation such as the draft bill.

The Clallam bands prepared draft overall and individual tribal proposals for the use of the funds and the proposals were, on October 1, 1977, referred to the leadership of the bands for consideration. The bands agreed to a one-third division of the funds among themselves, and this allocation is reflected in tribal resolutions respecting the use of the funds. We have no objection to the tribal proposals and have therefore incorporated them in the draft bill.

The Port Gamble Indian Community is organized on a band basis under the Indian Reorganization Act of 1934 (IRA) (48 Stat. 984), with a constitution and bylaws approved on September 7, 1939. By Resolution No. 79-A1, dated January 8, 1979, the Port Gamble Business Committee affirmed that, based on the results of a voting survey of tribal members, the band proposes to use 80 percent of its share of the judgment funds in an investment program and 20 percent as a revenue supplement for community projects.

Following the establishment of a reservation in 1968, the Lower Elwha Tribal Community organized on a residence basis under the IRA, with a constitution and bylaws approved on April 29, 1968. By Resolution No. 8B-78, dated August 27, 1978, the Community Council proposes to use 80 percent of the band's share of the funds in a land acquisition program that includes the payment of an outstanding loan on land purchased by the band and 20 percent in economic development projects for the benefit of all members.

The Jamestown Band, federally acknowledged as an Indian tribe as of February 10, 1981, is expected to adopt a formal organization. The adoption of such an organization will be subject to Secretarial approval. Under the draft bill, the band's share of the funds would be advanced only to such an approved organization. The Jamestown Band, by Resolution No. 78-1, dated October 1, 1978, proposes to use 50 percent of its share of the funds in a land acquisition program and 50 percent in a business development program.

Under the draft bill, the judgment funds would be credited to the appropriate bands and invested by the Secretary under section 1 of the Act of June 24, 1938 (52 Stat. 1037; 25 U.S.C. 162a) until the bands prepare, and the Secretary approves, specific program plans and tribal budgets for the use of the funds in accordance with the tribal resolutions discussed above. Investments made under the 1938 Act are limited to those in which both principal and interest are guaranteed by the United States and the investments are made to obtain the highest rate of interest available, subject to the requirements of the Act. Interest or investment earnings on the principal fund, which retains its trust status, are nontaxable.

Upon Secretarial approval of the bands' plans and budgets for the use of the funds, and in the case of the Jamestown Band, upon Secretarial approval of its formal organization, the full amount of the judgment funds would be paid to the respective tribal governing bodies. As in all cases in which funds are paid out to tribes, the funds would cease to be trust funds and their expenditure under the plans and budgets would be a tribal responsibility.

The Office of Management and Budget has advised that there is no objection to the submission of this proposed legislation from the standpoint of the Administration's program.

Sincerely,

DONALD PAUL HODEL,
Under Secretary.

Mr. STENNIS:

S. 1341. A bill to make applicable to the Tennessee-Tombigbee Waterway certain provisions of law relating to taxation on fuel used in commercial transportation on inland waterways; to the Committee on Finance.

TAX ON FUEL USED IN COMMERCIAL TRANSPORTATION ON INLAND WATERWAYS

Mr. STENNIS. Mr. President, I send to the desk a bill and ask for its appropriate referral. The purpose of this bill is to amend section 206 of the Inland Waterways Revenue Act of 1978 to make the user tax established by that act applicable to the Tennessee-Tombigbee Waterway.

The application of the users tax to the Tennessee-Tombigbee was discussed during the hearings conducted last year by my good friend and distinguished colleague from New York (Mr. MOYNIHAN). At that time, I knew nothing about it being exempt, but said at the hearing that it was certainly my position that the waterway should be included as a waterway subject to user charges, as are all other waterways, when it goes into real operation. The law levying user taxes listed only the waterways that were in operation at the time the user tax was enacted. At that time, the Tennessee-Tombigbee Waterway was not one that was in operation and was not listed solely for that reason.

My statement before the Subcommittee on Water Resources on July 25, 1980, was as follows:

As one of the delegation, one of the Senators from Mississippi, I know nothing about it being exempt. I made no effort to get it such. It will have to ride with the law, whatever it is.

But as I recall, the law listed the ones that were subject to the tax, and at that time the Tennessee-Tombigbee was not one that was in operation. So it is not named.

But it is certainly my position that it shall be included when it goes into real operation, yes.

The Inland Waterways Revenue Act of 1978 established a tax on fuel used in commercial transportation on inland waterways. The tax is 4 cents a gallon until October 1 of this year, and then it increases to 6 cents a gallon to October 1, 1983, and from that date to October 1, 1985, it is increased to 8 cents a gallon, and finally, after September 30, 1985, to 10 cents a gallon. This tax is to be applied to the fuel used by any commercial vessel on the inland or intracoastal waterways of the United States which have been designated in the act.

The proceeds of this tax are deposited in the Treasury of the United States in a trust fund for inland waterways. This fund, which was named the "Inland Waterways Trust Fund," is available for appropriation by the Congress for construction and improvements to the inland and intracoastal waterways of the United States as described in section 206 of the act.

Mr. President, these are simple statements of existing law, and I put these in the RECORD because there was some misunderstanding about the original action of this law. But there is really no basis because it just pertained to a waterway

and the Tennessee-Tombigbee as such was not in being and not in operation, I really thought that there was a provision there saying that all waterways, when they came into being, would automatically become subject to the tax. That is a provision that I would have approved of, even though I did not approve of the bill as a whole.

When the Inland Waterways Revenue Act of 1978 was passed, the Tennessee-Tombigbee Waterway project was under construction and was not open to commercial navigation. That is the real and the only reason it was not named in the act. Since that time, the Tennessee-Tombigbee Waterway has been partially open, for a limited mileage, to commercial traffic from the mouth of the Luxapalila River just south of Columbus, Miss., to Demopolis, Ala., a distance of 115 miles. It is, of course, only proper that the same user tax applied to other waterways be applied to the Tennessee-Tombigbee Waterway. Therefore, I offer this bill to amend section 206 of the Inland Waterways Revenue Act by adding a new subsection (27) as follows:

(27) Tennessee-Tombigbee Waterway: From the Pickwick Pool on the Tennessee River at RM 215 to Demopolis on the Tombigbee River at RM 215.4.

The effect of this amendment will be to apply the presently applicable user tax from the date of enactment of this legislation to the portion of the Tennessee-Tombigbee Waterway now open to commercial traffic and to the remainder of the waterway when it opens to traffic, as I have just described. By offering this amendment, I am merely acting to insure equality in application of the waterway user's tax.

This does not constitute an endorsement of the waterway user tax, which I opposed when it was considered by the Senate in 1978.

I reserve judgment, of course, Mr. President, as to my position in the future as to any proposed increase in the present user tax.

I ask unanimous consent that for the information of the membership, this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1341

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 206 of the Inland Waterways Revenue Act of 1978 is amended by adding at the end thereof the following:

"(27) Tennessee-Tombigbee Waterway: From the Pickwick Pool on the Tennessee River at RM 215 to Demopolis, Alabama, on the Tombigbee River at RM 215.4.".

By Mr. MELCHER:

S. 1342. A bill to define the circumstances under which construction workers may deduct travel and transportation expenses in computing their taxable incomes for purposes of the Federal income tax; to the Committee on Finance.

TRAVEL AND TRANSPORTATION EXPENSES OF CONSTRUCTION WORKERS

● Mr. MELCHER. Mr. President, today I am introducing legislation to amend the Internal Revenue Code of 1954 to clarify the tax law concerning deductibility of travel expenses at temporary job sites.

Section 162 of the Internal Revenue Code authorizes taxpayers to deduct the ordinary and necessary expenses they incur in carrying on a trade or business, including their "traveling expenses—while away from home in the pursuit of a trade or business."

At the same time, a taxpayer normally may not deduct the costs he incurs going to or from work, since those costs normally result from the taxpayer's decision to live away from his job for reasons of personal convenience, not business necessity. For example, a taxpayer who has a job in an office in Washington, D.C., can choose to live in the District of Columbia, in the nearby suburbs, or in the distant suburbs. Since his choice to live in the distant suburbs reflects his personal preference, not the requirement of his trade, any additional travel costs he incurs are not deductible.

From the beginning of the tax laws, however, the courts and the Commissioner of Internal Revenue have allowed the deduction of travel and transportation expenses—including meals and lodging if the taxpayer is away from home overnight—in situations where the travel results from business necessity rather than personal choice. This exception has come to be known as the temporary job rule.

The Internal Revenue Service has applied these principles—and particularly the temporary job rule—in ways that have imposed substantial and unjustified burdens on construction workers.

To take a typical example: A construction worker has lived and worked in a particular community for many years. He has a home in that community; his children go to school there; he and his wife vote and pay taxes there. Solely because of the nature of the construction industry, construction work becomes temporarily unavailable in the local area. The worker has two choices—he can look for work at distant jobs until work becomes available closer to home, or he can remain unemployed. If he takes work at a distant job, he must either move his family to that job or he can drive to the job each day—often 50 or 60 miles each way—or he can rent a room near the job.

The first option—moving his family to the job—is simply not a realistic option. In many cases the job is in a remote area where housing is simply not available—or the job is on a Government defense project where no one is permitted to live near the job. In any event, the job is of such a nature that the worker may be laid off at any time. In those circumstances, the worker has only two choices: remain unemployed or incur travel costs.

Accordingly, the travel expenses are clearly necessary to the conduct of the taxpayer's business—since the worker must incur those expenses if he is to practice his trade. Nevertheless, the IRS has been automatically disallowing these expenses as deductions. The IRS has, in fact, been conducting mass audits of workers at large construction projects for the purpose of automatically disallowing their travel expenses.

The Service has been disallowing these expenses on the basis of the so-called "one-year rule," which was adopted by administrative fiat. Under that "rule," a job which has lasted for more than 1 year automatically is not temporary. This "hindsight" test simply ignores the crucial fact that throughout the year the worker could have been laid off at any time and may be laid off at any time in the future. The 1-year rule has been expressly rejected by the U.S. Court of Appeals for the Eighth Circuit in the case of Frederick against United States, decided in 1979. The IRS, however, has chosen simply to ignore the Frederick decision.

The Service has also disallowed travel deductions on the grounds that a construction worker's job is indefinite, not "temporary," since he is unable to predict exactly when it will end. This argument, though, supports deductibility, since it is the worker's uncertainty over the length of the distant job that makes it necessary for him to incur travel expenses.

My proposed bill eliminates both of these arbitrary tests, and substitutes an easily-administered rule which will eliminate the need for litigation in the vast majority of cases. Construction workers will be deemed to be temporarily away from home for their first 2 years of employment at any job site more than 15 miles from their home. Thereafter, the deductibility of their travel expenses will be determined, case by case, on the basis of whether the expenses were incurred because of business necessity rather than personal convenience. In making that determination, the Internal Revenue Service and the courts will be prohibited from using either the 1-year rule or the "indefinite employment" rationale.

Mr. President, this is not a new proposal. It has been before the Senate in the past, and the time has come to act on it.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1342

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. AMENDMENT OF INTERNAL REVENUE CODE OF 1954.

(a) TRAVEL AND TRANSPORTATION EXPENSES OF CONSTRUCTION WORKERS.—Section 162 of the Internal Revenue Code of 1954 (relating to deductions for ordinary and necessary business expenses) is amended by inserting therein the following new subsection:

"(h) SPECIAL RULE FOR CONSTRUCTION WORKERS—

"(1) DEFINITION OF TEMPORARY JOB SITE.—For purposes of applying subsections (a)(1) and (a)(2) to travel and transportation expenses incurred by construction workers, a job at a site located more than fifteen miles from a construction worker's principal place of residence—

(A) shall be deemed to be temporary for the first two years that the worker is employed at that job, and

(B) shall be determined to be temporary or not temporary with respect to periods following the first two years of employment based on an examination of all the facts and circumstances, subject to the rules set forth in subparagraphs (2), (3), and (4).

"(2) EFFECT OF FIRST TWO YEARS ON SUBSEQUENT DETERMINATION.—In determining whether or not a job is temporary under subparagraph (1)(B), the worker's employment at the job during the period specified in subparagraph (1)(A) shall not be taken into account.

"(3) INDEFINITE EMPLOYMENT.—No deduction shall be disallowed, by reason of section 262 or any other provision of law, solely because of a construction worker's employment at a job site is of indefinite duration.

"(4) PROHIBITION ON APPLICATION OF ONE-YEAR RULE.—In making the determination specified in subparagraph (1)(B), no length of time shall be deemed, either automatically or presumptively, to make the job other than temporary. The 'one-year' rule set forth is Revenue Ruling 59-371, or in any similar ruling or regulation, is expressly disapproved as a grounds for disallowing deductions.

"(5) DEFINITION.—For purposes of this subsection, the term 'construction worker' means any individual employed, whether as a skilled, semi-skilled, or unskilled laborer, in the building or construction industry, but does not include clerical or management employees."

(b) TECHNICAL AMENDMENT.—Subsection 162(h) of the Internal Revenue Code of 1954 is amended by striking out "(h)" and inserting therefor "(j)".

SEC. 3. EFFECTIVE DATE.

This section shall apply to all judicial or administrative determinations that are made subsequent to Dececmber 31, 1980, with respect to the deductibility of travel or transportation expenses.●

By Mr. DOMENICI:

S. 1343. A bill to amend the Energy Policy and Conservation Act to modify the oil acquisition program of the strategic petroleum reserve in order to decrease the cost of acquisition to the Government for oil to be stored in the reserve, and for other purposes; to the Committee on Energy and Natural Resources.

STRATEGIC PETROLEUM RESERVE SUPPLEMENTARY PRIVATE FINANCING ACT OF 1981

● Mr. DOMENICI. Mr. President, in the reconciliation proposal debated and voted on by the Senate in March, the Senate expressed the view that $3 billion should be cut from the budget for filling the strategic petroleum reserve (SPR); and at the same time, an alternative financing mechanism should be found that would provide for a fill rate equal to the level proposed by the President.

I have drafted a bill which I am introducing today, that I believe meets the intent of the Senate. This bill provides for the sale of strategic petroleum reserve fixed maturity certificates, that would be auctioned by the Secretary of the Treasury, would be freely transferable, and would be redeemed at maturity at the average weighted price of crude oil imported into the United States 1 month preceding the date of redemption.

Transitional money would be appropriated, and would be used as long as the number of certificates sold were not sufficient to maintain a fill rate of at least 230,000 barrels per day.

It is my firm belief, that enough certificates will be sold by the second year following implementation of this program to completely fund filling the reserve.

I have asked the Committee on Energy and Natural Resources to schedule hearings at the earliest possible date, to begin consideration of this bill.●

By Mr. BENTSEN:

S. 1344. A bill to amend the Federal Aviation Act of 1958 to establish additional criminal penalties applicable to persons who pilot aircraft in connection with drug smuggling operations, and for other purposes; to the Committee on Commerce, Science, and Transportation.

AVIATION DRUG SMUGGLING DETERRENT ACT OF 1981

● Mr. BENTSEN. Mr. President, the United States continues to be inundated with waves of illicit drugs coming across our borders by land, sea, and air. I am today introducing a measure which would put a stop to the ever-increasing flow by putting some teeth into the Federal law that covers smuggling by air.

We all know that drug smuggling is big business and involves millions of dollars a year, if not millions of dollars per transaction. Under current law, a person who pilots an aircraft involved in drug smuggling can only be fined a maximum of $1,000 and have his pilots license suspended for no more than 1 year. There is absolutely no provisions for a jail sentence in the FAA regulations. Since we are dealing with people who stand to make thousands or hundreds of thousands of dollars with a plane load of illegal drugs, and who would not even go to jail, this penalty is little or no deterrent to the professional criminal.

Is it any wonder that we face this ever-increasing onslaught of drugs from across our border? Is it any wonder that these pilots return again and again into the air to carry load after load of drugs into America? Is it any wonder that with these kinds of penalties we cannot stop the ever-increasing menace of illegal narcotics? I propose that we do something and do something now to put some real bite into our FAA regulations.

The bill which I am today introducing and which has been introduced by Mr. BENNETT of Florida and 39 cosponsors in the House as H.R. 3485, will multiply the current fine by a factor of 25 by raising the $1,000 maximum to $25,000. In addition this bill will allow the FAA to immediately suspend the license of a pilot indicted for drug smuggling by aircraft. In the past the pilot could get right back into the air without missing his next illegal rendezvous and without much worry about stronger penalties. We cannot let that continue.

Upon conviction the pilots license is permanently revoked. This bill also establishes, for the first time, a prison term of up to 5 years upon conviction. This should deter a professional criminal as well as give second thoughts to the more casual criminal who otherwise makes a legitimate living as a pilot. Further, if a person does choose to take to the air to smuggle more drugs after having been convicted and having his license revoked under this act, he will face a double sentence. The doubling will include a fine of up to $50,000 as well as an increased prison term of 10 years. The original $25,000 fine and 5-year prison term will also apply to the owner of any aircraft who knowingly allows their plane to be used for this type of criminal activity.

The Drug Enforcement Administration estimates that more than 3,000 airplanes are involved in illegal drug trafficking each year. The pilots of these aircraft, however, need not fear the force of the law so much as the possibility that their often overloaded planes will crash before they can reach some isolated airstrip in west Texas or in Florida. If each of those planes carried a thousand pounds of illegal drugs that would equal 3-million pounds of illegal drugs imported into the country by air every year. If we can get these drug-smuggling pilots out of the air and into our jails we will be making some real headway in our efforts to combat this enormous problem.

The bill I am introducing today will make some badly needed changes in our FAA regulations and will accomplish that objective. I am hopeful that the committee will be able to give quick review to this proposal.●

By Mr. HEINZ:

S. 1345. A bill entitled "Veterans' Health Care Act of 1981"; to the Committee on Veterans' Affairs.

VETERANS' HEALTH CARE ACT OF 1981

● Mr. HEINZ. Mr. President, I am pleased to introduce in the Senate today legislation whose primary purpose is to assure that our Vietnam veterans are able to receive prompt and adequate attention for their claims with respect to the harmful effects of agent orange on their health.

This legislation, which in key respects tracks legislation, H.R. 3499, recently approved by the House by a 388 to 0 vote, provides authority for hospital care for Vietnam veterans who served in the Republic of Vietnam if a physician employed by the Veterans' Administration, or a physician carrying out such functions on a contract or fee basis arrangement in area where a VA physician is not available, determines that such care is necessary for the treatment of a condition that may be associated with exposure to phenoxy herbicides and chemicals used as defoliants, including the herbicide commonly known as agent orange.

Mr. President, this legislation addresses one of the most serious problems still confronting Vietnam veterans and their families—the apparent toxic effects of the herbicide agent orange. In the past few years, over 10,000 veterans have gone to the VA to seek treatment of agent orange-related problems ranging

from skin and nervous disorders to malfunctions of internal organs and cancer. Unfortunately, the problem may not be restricted to veterans themselves. Many veterans exposed to agent orange have become concerned that agent orange may be related to birth defects in their children.

Mr. President, it has already been 13 years since agent orange was identified as a hazard to humans, and considerable scientific evidence exists indicating its harmful effects. Yet of the 5,025 claims which the VA had received as of November 30, 1980, for in-service exposure to herbicides, only 23 claims have been allowed. It is understandable, therefore, when many Vietnam veterans express frustration and hostility toward the efforts of their Government to respond to their pleas for help.

In light of the length of time which has gone by, I do not find it at all unreasonable to require, as this legislation would do, that, until the scientific community has been able to make a determination as to the possible cause and effect relationship between the toxic herbicides and the problems of our veterans, the VA should do everything possible to provide the appropriate care to such veterans.

Given the strong circumstantial evidence amassed thus far, it is my belief that where any doubt exists, that doubt should be resolved in favor of the veteran. Thus, I stress that the intent of this legislation is that whenever a veteran presents himself to a VA hospital with a complaint relating to the possible adverse health effects of the herbicides used in Vietnam, and when a VA physician determines that such a veteran needs inpatient care and treatment, he must receive such care and treatment. Further, should it appear that other medical attention would eliminate the need for hospital care, such attention shall be given by the VA medical system.

Mr. President, I think this is a necessary and reasonable approach at this time. It does not in any way prejudge the outcome of the studies currently mandated by law about the effects of agent orange which resulted from legislation which I and others sponsored. Rather, it provides an interim period of attention for our veterans until such studies are completed, at which time the Congress should and will review the entire matter in detail.

I should note briefly that this bill also has other provisions relating to Vietnam veterans. First, it would extend the Vietnam-era veterans' readjustment counseling programs until 1984. I believe this program has proven to be very effective and cost-effective, and its retention is, therefore, fully justified.

Second, the legislation would expand the scope of the agent orange studies, which I mentioned earlier, that have already been underway in response to congressional direction. Basically, this provision would merely reemphasize to the VA the extreme importance of studying all relevant sources of information which could assist in the development of a complete understanding of the adverse effects of herbicides on members of our Armed Forces who were exposed to such herbicides used to defoliate vegetation and destroy food crops in Vietnam.

Mr. President, I am heartened by a growing awareness, both by the American public and in the Congress of the need to as last give full recognition to the sacrifices made by those who served in Vietnam. The public comments of the President are one indication of this; the proposed Vietnam veterans memorial is another. I suggest that this legislation is perhaps the most tangible way in which we can acknowledge the service and sacrifice of those Vietnam veterans who are still paying the price for their service. I therefore, submit this legislation with the hope that it will be acted upon promptly and favorably.●

ADDITIONAL COSPONSORS

S. 46

At the request of Mr. THURMOND, the Senator from Alabama (Mr. HEFLIN) was added as a cosponsor of S. 46, a bill to amend title 5 of the United States Code to permit present and former civilian employees of the Government to receive civil service annuity credit for retirement purposes for periods of military service to the United States as was covered by social security, regardless of eligibility for social security benefits.

S. 141

At the request of Mr. BENTSEN, the Senator from Idaho (Mr. SYMMS) was added as a cosponsor of S. 141, a bill relating to tax treatment of qualified dividend reinvestment plans.

S. 170

At the request of Mr. MOYNIHAN, the Senator from Indiana (Mr. QUAYLE), the Senator from Florida (Mr. CHILES), and the Senator from New Hampshire (Mr. HUMPHREY) were added as cosponsors of S. 170, a bill to amend the Internal Revenue code of 1954 to allow the charitable deduction to taxpayers whether or not they itemize their personal deductions.

S. 398

At the request of Mr. ARMSTRONG, the Senator from North Carolina (Mr. HELMS) was added as a cosponsor of S. 398, a bill to amend the Walsh-Healey Act and the Contract Work Hours Standards Act to permit certain employees to work a 10-hour day in the case of a 4-day workweek, and for other purposes.

S. 638

At the request of Mr. BENTSEN, the Senator from Iowa (Mr. GRASSLEY) was added as a cosponsor of S. 638, a bill to amend the Internal Revenue Code of 1954 to allow individuals to compute the amount of the deduction for payments into retirement savings on the basis of the compensation of their spouses, and for other purposes.

S. 862

At the request of Mr. ARMSTRONG, the Senator from Maine (Mr. COHEN) was added as a cosponsor of S. 862, a bill to amend the Potato Research and Promotion Act.

S. 894

At the request of Mr. CANNON, the Senator from New Mexico (Mr. DOMENICI) was added as a cosponsor of S. 894, a bill to exempt rural electrical cooperatives from fees under the Federal Land Policy and Management Act of 1976.

S. 1030

At the request of Mr. ROBERT C. BYRD, his name was added as a cosponsor of S. 1030, a bill to protect firearms owners' constitutional rights, civil liberties, and rights to privacy.

S. 1043

At the request of Mr. PRYOR, the Senator from Pennsylvania (Mr. HEINZ) was added as a cosponsor of S. 1043, a bill to prohibit the drugging or numbing of racehorses and related practices, and to amend title 18, United States Code, to prohibit certain activities conducted in interstate or foreign commerce relating to such practices.

S. 1096

At the request of Mr. BAKER, the Senator from North Carolina (Mr. EAST) was added as a cosponsor of S. 1096, a bill to facilitate the ability of product sellers to establish product liability risk retention groups, to facilitate the ability of such sellers to purchase product liability insurance on a group basis, and for other purposes.

S. 1131

At the request of Mr. DANFORTH, the Senator from Indiana (Mr. LUGAR) was added as a cosponsor of S. 1131, a bill to require the Federal Government to pay interest on overdue payments and to take early payment discounts only when payment is timely made, and for other purposes.

S. 1175

At the request of Mr. BOSCHWITZ, the Senator from Oklahoma (Mr. NICKLES) was added as a cosponsor of S. 1175, a bill to amend the Internal Revenue Code of 1954 to exclude fringe benefits from the definition of gross income.

S. 1214

At the request of Mr. BOSCHWITZ, the Senator from Indiana (Mr. LUGAR) was added as a cosponsor of S. 1214, a bill to amend the Internal Revenue Code of 1954 to eliminate the limitation on the interest deduction for interest paid or accrued on investment indebtedness.

S. 1229

At the request of Mr. MOYNIHAN, the Senator from Alabama (Mr. HEFLIN), and the Senator from Georgia (Mr. NUNN) were added as cosponsors of S. 1229, a bill to continue through December 31, 1982, the existing prohibition on the issuance of fringe benefit resolutions.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON FOREIGN RELATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Monday, June 8, to hold nomination hearings on Thomas Enders to be Assistant Secretary of State for Inter-American Affairs and J. William Middendorf to be U.S. Representative to OAS.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Environment and Public Works be authorized to meet during the session of the Senate on Monday, June 8, to hold hearings with Secretary Watt on Water Resources.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

SUPPLEMENTAL AND RESCISSION BILL—H.R. 3512

● Mr. GARN. Mr. President, on page 54 of the conference report which accompanied the supplemental and rescission bill passed by Congress last Thursday, there appears language with respect to funding cuts for the EPA wastewater treatment construction grant program. During the House-Senate conference on this legislation, the Senator from Wisconsin (Mr. KASTEN) offered an amendment to include in the conference report the Senate language on EPA construction grants, and his amendment was accepted without dissent. This Senate language states, in part, that:

> The highest priority in the use of remaining construction grant funding is given to communities that are faced with court orders.

When the report was written, however, it stated that priority should be given to projects under Federal court order. I ask that the record correctly reflect the intention of the conferees that the Senate language on EPA construction grants should apply, and that all projects under court order should be given priority when EPA funding decisions are made.

I assume, Mr. President, that the final record will include this statement as legislative history.●

CONGRESS URGED TO REJECT SPLIT BASING MODE FOR DEPLOYMENT OF MX MISSILE

● Mr. BENTSEN. Mr. President, I have long been a supporter of a national defense which is second to none and that provides us with the capability to preserve, protect, and defend the freedoms that make America great. I recognize that freedom does not come cheap and that each of us, in our own way, must be prepared to sacrifice to protect our democracy. Mr. President, I said sacrifice, not waste. In reviewing the draft environmental impact statement on the split basing of the MX missile, I note that it is projected to cost some $3½ billion more than the consolidated approach. I do not believe that we can afford to spend extra billions in wasted effort.

I have recently received a copy of a Texas Senate resolution which likewise urges Congress to reject the split basing mode for the deployment of the MX missile.

Mr. President, I request that a copy of the resolution be printed in the RECORD.

The resolution follows:

TEXAS SENATE CONCURRENT RESOLUTION No. 53

Whereas, United States Air Force plans call for a sheltered road-mobile basing system for the MX missile system, and currently under consideration are plans for either full basing in Nevada/Utah or a split basing in Nevada/Utah and Texas/New Mexico; and

Whereas, A decision to adopt the split-basing mode would require the relocation of approximately 500 families and would require United States Air Force acquisition of many acres of highly productive land in Texas which would be unlikely to be reclaimed for agricultural purposes; and

Whereas, An amendment to the Department of Defense Supplemental Appropriations Act, Section 2.02(b), June 27, 1979, states that it is the sense of Congress that the basing mode for the MX missile should be restricted to location on the least productive land available that is suitable for such purposes; and

Whereas, The January 19, 1981 Department of Defense MX Split Basing Report to Congress states that there exists a relative balance in the environmental impact between the two alternatives, while also stating that the split-basing mode would require the additional expenditure of $3.475 billion over the cost of the full-basing mode; now, therefore, be it

Resolved by the Senate of the State of Texas, the House of Representatives concurring, That the 67th Legislature respectfully request that the Congress do not adopt the split-basing mode for the deployment of the MX missile system; and, be it further

Resolved, That the Secretary of State forward copies of this resolution to the President of the United States, the President of the United States Senate, the Speaker of the United States House of Representatives, Senator Lloyd Bentsen, Senator John Tower, and all members of the Texas delegation of the United States House of Representatives with the request that this resolution be officially entered in the CONGRESSIONAL RECORD as a memorial to the Congress of the United States of America.●

RECLAMATION DAMS

● Mr. DECONCINI. Mr. President, 5 years ago Friday, this Nation's magnificent bicentennial celebration was marred by an event of catastrophic proportion. For on the morning of June 5, 1976, the Teton Dam, located in a steep-walled canyon some 40 minutes northeast of Idaho Falls, Idaho, failed.

News accounts at the time riveted national attention on the resulting destruction of thousands of homes and farms, damages in the hundreds of millions of dollars, and the tragic loss of nine lives.

No amount of aid or comment can truly compensate for the devastation that occurred in southwestern Idaho then. But from the many lessons learned from that disaster emerged the basis for enactment of the Reclamation Safety of Dams Act of 1978.

Among other things, Public Law 95–578 provided a major mandate to the Secretary of the Interior to review and revise procedures for the construction, restoration, operation and maintenance of Federal reclamation dams.

Public Law 95–578 authorized for appropriation $100 million to facilitate new and needed repairs at a number of such structures. The Department of the Interior, particularly the Bureau of Reclamation, should be commended for the expeditious manner in which that mandate is being met.

To date, no less than 29 reclamation dams have been identified as in need of modification due to changes in the state-of-the-art of dam safety. Two are in Arizona, Theodore Roosevelt Dam and Stewart Fountain Dam, both located in the Salt River just upstream from the Metropolitan Phoenix area.

Appended to this statement is a summary of the location, modification and projected costs, which presently exceed $430 million.

On April 9, 1981, I along with my colleagues Senator GOLDWATER, Senator WALLOP, and Senator CRANSTON introduced legislation (S. 956) to increase Federal funding for reclamation dam safety purposes from the present ceiling of $100 million to $450 million.

Mr. President, the Teton Dam disaster set into motion an accelerated process for protecting against the occurrence of similar situations. It is our hope that this process will soon be scrutinized through public hearings on the legislation and advanced even further by providing the necessary funding.

At a time when much of the West is bone dry and the fear of flood forgotten, it may indeed be difficult to focus national attention on reclamation dam safety.

But, even though fiscal austerity may be the watchword in these Chambers, the reality of the past nonetheless exists, in Idaho and in the several States in which these 29 Federal reclamation dams are located.●

PROTECTING WORKERS FROM HAZARDOUS AND TOXIC MATERIALS

● Mr. PELL. Mr. President, I take this opportunity to discuss the Federal Government's role in protecting workers' safety and health on the job. This is a pressing concern in the State of Rhode Island where manufacturing constitutes a major portion of employment and thousands of workers are engaged in shipbuilding, jewelry, textiles, and metal-working trades.

Since its creation more than 10 years ago, the Occupational Safety and Health Administration (OSHA) has been the subject of controversy. It has been accused by workers of being too lenient and accused by industry of being too heavy-handed. During recent years, however, this agency has come a long way. Small business has received special assistance in meeting OSHA standards and paperwork requirements have been reduced. OSHA has stepped up its efforts to target enforcement on the highest hazard industries and approximately 1,000 regulations, determined to be "less significant" in preventing work place injury, were dropped. In addition, the agency has increased the amount of training and technical assistance available to assist both workers and employers in complying with OSHA standards.

I consider these developments a good faith internal effort to respond to criti-

cism by making the agency more effective and reducing the excessive burdens on business. In recent months, however, I have heard from many of my constituents who have expressed concern about the direction that OSHA appears to be taking under its new leadership.

Within the past several months many standards developed with great effort and expense have been targeted for administrative review. Included in this list are basic measures designed to protect workers who are exposed to dangerous substances on the job. On February 10, the preliminary standard for chemical labeling and hazard notification, issued in January, was withdrawn. The publication of this standard was the result of years of work by OSHA officials, workers, and independent professionals. The withdrawal of this proposal means that the public hearings scheduled to follow the issuance of this standard will not take place.

Mr. President, in my view workers who handle hazardous substances have the right to know the risks they face. In creating the Occupational Safety and Health Administration, Congress directed the Secretary to prescribe the use of labels or other appropriate forms of warning to insure that employees are apprised of all hazards to which they are exposed. The reasoning behind such a provision is clear. Literally millions of workers handle toxic chemicals every day.

In many cases, neither they nor their employers know the immediate or long-term effect that this exposure will have on their health. We do know, however, that there is a strong correlation between exposure to certain chemicals and the incidence of occupational disease. In fact a report prepared jointly by the National Cancer Institute and the National Institute for Environmental Health Sciences in 1978 estimated that between 20 and 38 percent of all cancer deaths in the United States are related to job exposure to toxic substances.

The total cost of workplace exposure to hazardous chemicals is impossible to determine. In terms of lost income alone, the Labor Department estimates that the expense exceeds $10 billion annually. This, of course, does not include medical treatment, loss of productivity or the pain and suffering experienced by disabled workers and their families.

The Occupational Safety and Health Administration was established to assure every worker, to the greatest extent possible, a safe and healthful work environment. And early on it was judged impossible to compare the cost of compliance to the benefit of worker health. For example, we still do not know the true extent of occupational disease and, therefore, cannot predict the true benefit of workplace standards nor can we assign a price tag to reduced pain and suffering. OSHA has been working for 7 years to develop a standard for the proper labeling of workplace chemicals. I am disappointed at the precipitous withdrawal of this proposal and I am concerned that this action will indefinitely postpone the public discussion of the merits of the labeling proposal and the issuance of a final regulation.

In view of the seriousness of the risk associated with exposure to toxic chemicals, Mr. President, our workers deserve an open debate on this issue. I hope that the administration will reconsider its action and reissue the preliminary standard on chemical labeling and hazard notification that was withdrawn on February 10.●

THE FORD FOUNDATION

● Mr. MOYNIHAN. Mr. President, the Ford Foundation is the Nation's largest private foundation. It was founded in 1936 and for many years gave money mainly to hospitals, schools and other institutions in Michigan.

Edsel and Henry Ford died during the 1940's. In 1950, after their estates had been settled, the foundation began to branch out and to support activities across the United States and in foreign countries.

It has distributed $5.5 billion in grants since 1936. In recent years, its efforts have been directed primarily at helping to lift the urban poor out of poverty, at promoting human and civil rights, and at supporting higher education. The foundation has also paid for research into plant strains and crop yields, with the hope that this might help the rural poor in developing countries.

On June 1, 1979, a new man took over as chief operating officer, replacing McGeorge Bundy. That new man is Franklin A. Thomas.

Mr. Thomas is a distinguished lawyer. He has been an assistant U.S. attorney, a deputy police commissioner and, for 10 years during the 1960's and 1970's, head of the Bedford-Stuyvesant Restoration Corp., a community development agency in Brooklyn.

Mr. Thomas spoke recently to the editorial board at U.S. News & World Report. A summary of that conversation was printed in the magazine in March. I think it is well worth reading. I ask that it be printed at this point in the RECORD.

The material follows:

CONVERSATION WITH FRANKLIN A. THOMAS: THE NEEDY WANT "LESS RHETORIC," MORE ACTION

"A GREAT VISION" MUST BE VIABLE

There is a terrible fear in the foundation world—and in society—of admitting that most change is incremental. Somehow you gain your greatest credibility when you talk in terms of a great vision. You get quoted more often; you're more likely to be respected; you're less likely to be found wrong, and your mistakes are more easily explained away.

Certainly it is important for foundations to have a vision. In my view, that vision ought to include better opportunity for more people to realize their potential—and less conflict that's destructive. But while keeping that vision alive, foundations have to deal with the reality as people perceive and experience it—not simply as we would like it to be.

TAKING THE LONG VIEW

The role of a foundation is different from that of both government and business. We should have a longer view than government, which has a tendency to play it safe and focus on short-term efforts because of its frequent accountability to the public through the election process. We should have a different standard of accountability than business, whose measurement of success is profit before taxes.

Our goal is to take a longer perspective than government on important issues and to keep social purposes as our primary objective—while utilizing the best of business methods in trying to achieve these purposes. We need to make this role clear in the public mind so we don't get gun-shy because we make a few grants that get us into trouble.

AS AN APPEAL, GUILT IS PASSÉ

The more conservative mood of the society means that it is necessary to make a different kind of case than used to be required to get public support for social needs.

It is no longer enough to simply state that there is a particular need: the time when part of the system's response was based largely on guilt has passed. Today, a greater level of understanding of a problem and ways of addressing it are required, along with greater sophistication in presenting it, so that you end up being inclusive of more of the values and interests in society.

Another change: Those who have problems are less interested in rhetoric than in action. They are interested in performance, not the grand phrase or the great idea put forth without the apparent capacity to implement it. Foundations have begun to perceive this and respond to it.

CONNECTIVE ROLE IN SOCIETY

There is a growing need for foundations to play a connective role in society—to link private sector resources with the energies of people in a community who are trying to address problems, whether these people are in community groups or social agencies that work for the public's benefit.

Foundations are making explicit efforts to link these sectors and to focus attention on particular social issues. To achieve this, more than good will and intelligence are needed; you have to bring dollar resources with you. The more you have, the greater your ability to act as a catalyst.●

IDA NUDEL—GUARDIAN ANGEL

Mr. DECONCINI. Mr. President, no amount of Soviet Government double talk or phony judicial processes can justify the imprisoning of any individual for expressing his or her religious or political beliefs. And yet, like so many other Soviet citizens, Ida Nudel lives behind bars for her purely humanitarian actions.

Ida's plight began when she first applied for an emigration visa in May 1971, along with her sister, Elena Fridman, and Elena's family. In 1972, Elena and her family were allowed to leave the Soviet Union, but Ida's exist visa was refused. Since that time, her deep-rooted desire to live in her cultural homeland, Israel, has been consistently denied for no legitimate reason.

As a result of this experience, Ida became increasingly aware of the injustices evident in the totalitarian Soviet society. She soon became known as the Guardian Angel of Soviet Jewish prisoners of conscience for her selfless devotion to helping those who were in even more difficult situations than her own. Nevertheless, as she became more outspoken about the inequitable treatment endured by many of her fellow citizens, Soviet authorities responded with irrational and

severe pressure—eventually leading to her arrest in 1978. Ida was allegedly charged with "malicious hooliganism" for displaying a banner on the balcony of her Moscow apartment which read, "KGB Give Me My Visa." At her trial, Ida delivered the following statement which gives eloquent testimony to the ordeal she had endured for so many years:

I am standing trial for all the past 7 years during which I have learned to walk proudly with my head held high as a human being and as a Jewish woman, and every time I was able to help another victim my heart filled with an extraordinary feeling unlike any other. Perhaps the closest such feeling is that which a woman feels when giving new life. If the remaining years of my life will be grey and monotonous, these 7 years will warm my heart with the knowledge that my life was not without purpose. Not one of you, my judges, is capable of finding a punishment that will take revenge and deny the victory and triumph of these 7 years.

Despite Ida's assertion of innocence to the obviously trumped up charge, she was sentenced to 4 years of exile in Siberia where she remains today. Her health is rapidly deteriorating; yet, she has not given up hope. She knows that many throughout the world have kept her cause alive. I am proud to read the following short note that Ida received from one of my constituents, Ellen Adelstein, while in exile:

Dear Ida: Don't give up hope. Like the Roadrunner which is an extremely persistent bird, you will be returned to those you love. The Roadrunner keeps moving along until it reaches its goal. Good luck.

This simple message touched Ida so deeply that she adopted the Roadrunner as the symbol of her own struggle. Ida's willingness to fight for social justice must not be ignored. Her message to the world rings loud and clear. We must never lose sight of our principles and beliefs about the dignity and supremacy of the free individual. Until all women and men in the Soviet Union and the world have been granted their basic human rights our consciences cannot rest.

Ida's deep compassion for the suffering of others is exemplified by a letter she wrote from exile:

Through our suffering we have been able to push the gates of the U.S.S.R. just slightly ajar. Through the tiny opening we have made in the Iron Curtain, Jews manage to get out of the U.S.S.R. This in fact is our one solace through our ordeal. But the opening is small and vulnerable, and we implore all of you in the free world to keep a close watch on the opening and not allow the gates to be slammed shut again.

We must fight as all free peoples must fight, to keep that door open—to open it irrevocably and forever to the whole world.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, may I inquire of the distinguished acting minority leader if his side might be in a position to consider one more item on the Executive Calendar? I am referring to Calendar No. 205, the nomination of Frederick Morris Bush to be Assistant Secretary of Commerce for Tourism.

Mr. FORD. Mr. President, I am pleased to inform the majority leader that the minority is ready to accept this nomination and has no objection to it.

Mr. BAKER. Mr. President, I thank the acting minority leader.

In view of that, Mr. President, I ask unanimous consent that the Senate now go into executive session for the purpose of considering the nomination of Frederick Morris Bush of Texas.

There being no objection. the Senate proceeded to the consideration of executive business.

DEPARTMENT OF COMMERCE

The PRESIDING OFFICER. The clerk will state the nomination.

The assistant legislative clerk read the nomination of Frederick Morris Bush, of Texas, to be Assistant Secretary of Commerce for Tourism.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. BAKER. I move to reconsider the vote by which the nomination was confirmed.

Mr. FORD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to this nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS UNTIL 11 A.M. TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until the hour of 11 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECORD TO REMAIN OPEN UNTIL 4 P.M. TODAY

Mr. BAKER. Mr. President, I ask unanimous consent that the RECORD remain open until 4 p.m. today for the introduction of bills, resolutions, and statements.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 11 A.M. TOMORROW

Mr. BAKER. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until the hour of 11 a.m. tomorrow.

There being no objection, the Senate, at 2:31 p.m., recessed until tomorrow, Tuesday, June 9, 1981, at 11 a.m.

NOMINATIONS

Executive nominations received by the Secretary of the Senate June 5, 1981, under authority of the order of the Senate of June 4, 1981:

DEPARTMENT OF THE TREASURY

Donna Pope, of Ohio, to be Director of the Mint for a term of 5 years, vice Stella B. Hackel.

DEPARTMENT OF EDUCATION

Thomas Patrick Melady, of Connecticut, to be Assistant Secretary for Postsecondary Education, Department of Education, vice Albert H. Bowker.

John H. Rodriguez, of Virginia, to be Deputy Under Secretary for Intergovernmental and Interagency Affairs, Department of Education, vice Elizabeth S. Carpenter, resigned.

CONFIRMATIONS

Executive nominations confirmed by the Senate June 8, 1981:

DEPARTMENT OF COMMERCE

Frederick Morris Bush, of Texas, to be Assistant Secretary of Commerce for Tourism, vice Fabian Chavez, Jr., resigned.

INTERNATIONAL COMMUNICATION AGENCY

Charles Z. Wick, of California, to be Director of the International Communication Agency, vice John E. Reinhardt, resigned.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

HOUSE OF REPRESENTATIVES—*Monday, June 8, 1981*

The House met at 12 o'clock noon and was called to order by the Speaker pro tempore (Mr. WRIGHT).

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker.

WASHINGTON, D.C.,
June 5, 1981.

I hereby designate the Honorable JIM WRIGHT to act as Speaker pro tempore on Monday, June 8, 1981.

THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives.

PRAYER

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Help us to be aware, O God, that all occupations and tasks have the potential for righteousness and for usefulness and for being called honorable in the sight of all. As individuals may we know the dignity of our vocations and whether we work with ideas or words or with our hands, we may see more clearly that we are all part of the human family and dependent one upon the other. May we dedicate our abilities and talents that they be used in willing service to others and thus serve the common good and the glory of Your holy name. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill and a joint resolution of the House of the following titles:

H.R. 1100. An act to amend title 38, United States Code, to expand eligibility of former prisoners of war for certain benefits and health-care services provided by the Veterans' Administration, and for other purposes; and

H.J. Res. 238. Joint resolution to approve a constitution for the U.S. Virgin Islands.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 640. An act to amend the District of Columbia Self-Government and Governmental Reorganization Act with respect to the borrowing authority of the District of Columbia; and

S. 1197. An act to amend and extend certain Federal laws relating to housing, community, and economic development, and related programs, to provide an improved and expedited multifamily mortgage foreclosure procedure, and for other purposes.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair desires to announce that pursuant to clause 4 of rule I, the Speaker signed the following enrolled bills on Friday, June 5, 1981:

H.R. 2156. An act to amend title 38, United States Code, to extend by 12 months the period during which funds appropriated for grants by the Veterans' Administration for the establishment and support of new State medical schools may be expended; and

H.R. 3512. An act making supplemental and further continuing appropriations for the fiscal year ending September 30, 1981, rescinding certain budget authority, and for other purposes.

SOCIAL SECURITY NEEDS SOME CHANGES, BUT NOT WHAT THE PRESIDENT HAS PROPOSED

(Mr. GLICKMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GLICKMAN. Mr. Speaker, we all realize that there is a rather urgent need to make some changes in the social security system so the trust funds do not go broke, but what the President has proposed is unacceptable as it was relayed to us. The major proposal by the President, to penalize those who decide to retire early by cutting their benefits to 55 percent of what they would otherwise be, goes much too far, particularly when you consider that working to age 62 amounts to working well over 90 percent of the typical work life. The fact that the President has proposed that changes be implemented without any kind of phase-in is also a terrible mistake. People plan their retirements for years, and that planning is based on an expected level of benefits. To think that people approaching retirement age can revamp their plans overnight is very naive. Any major changes in the social security retirement and survivors programs will need to be carefully and sensibly phased in.

The fact that the social security system needs some changes is no secret to any of us. We knew when we enacted the most recent Social Security Amendments in 1977 that that legislation would only serve as a stop-gap answer, and I am glad to say that the House Social Security Subcommittee has been working on coming up with some possible solutions to this problem over the last several months. I want to see us get together and come up with a plan that will realistically respond to the problems which the social security system is facing without breaking faith with those who have contributed into the system in good faith for years. It can be done in a much fairer way than the administration has proposed.

METRIC SHADOW HANGS HEAVY

(Mr. RUDD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RUDD. Mr. Speaker, metric measurement casts a shadow across this land, intruding daily into our lives.

My bill, H.R. 1660, will repeal the Metric Conversion Act of 1975, and thus assure that any conversion to metric would be voluntary. I have introduced this bill each year since I have been in Congress and many have given me indication of their support.

I myself had an experience recently that indicates the frustration level that people reach when they are faced with this monster metric.

I pulled into a gas station, the price was posted per gallon, however, the pump was clicking off the amount in liters. Wanting to know how many miles per gallon I was getting, I asked the attendant how many gallons I had purchased. He replied that he didn't know and had now way to find out and a price was presented to me. I had to dust off my mathematics skills to transpose gallons into liters and the total into a price-per-gallon and finally to the amount due for the purchase.

Millions of Americans unfortunately face the same problem.

There is absolutely no reason—either in law or logic—that a Government agency should cram down the throats of a free people the metric system, which creates confusion, resentment and contributes nothing to the advancement of our Nation's economy or welfare, but does add to the

79-059 O-84-40 (Pt. 9)

growth of government, bureaucracy, taxes and Government spending.

I welcome support for H.R. 1660.

LET US NOT GET PERSONAL, MR. SPEAKER

(Mr. BLILEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BLILEY. Mr. Speaker, In an appearance on ABC's "Issues and Answers" yesterday, the Speaker stated that President Ronald Reagan "doesn't understand the working class of middle America, what it's all about, what they go through, because of the fact he doesn't associate himself with those types of people."

Although the Speaker quickly stated that he did not mean to suggest the President is "Callous," his words certainly had that effect.

The Speaker obviously has no better argument than personal—and untrue—remarks about the most popular President this country has seen in years.

I understand the Speaker's position. He is a spokesman for a failed philosophy of Government. He knows that President Reagan has the trust and the admiration of working Americans. It must be frustrating for him to know that the vast majority of the American people trust and believe in President Reagan.

But this does not excuse the personal attack; as a colleague, may I suggest to the Speaker that instead of making unfounded attacks on the President's character he sticks to the issues? We Republicans will provide the answers.

LEGISLATION INTRODUCED TO ENSURE THAT A U.S. NAVY COMMODORE WILL BE A U.S. NAVY COMMODORE

(Mr. SKELTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SKELTON. Mr. Speaker, We all know that the U.S. Navy has a great tradition and that a bill we passed last year can change part of its tradition and cause our Navy to be the object of ridicule by members of the military throughout the world. This was done when we created the one-star flag rank and named it with a new and unprecedented term: Commodore-admiral. This flies in the face of the tradition of great one star flag officers of our U.S. Navy who have, in years past, been known by their proper rank, commodore. The last time a one-star flag officer was allowed the Navy, I was known as commodore, as per the naval orientation, June 1945, Bureau of Naval Personnel book. The new name of commodore-admiral not only flies in the face of tradition and has no historical precedence, I feel it is an affront to all great naval leaders who had such rank, including Commodore Perry of the Battle of Lake Erie fame. Mr. Speaker, we all know that a rose by any other name is still a rose, and, it follows that a commodore by any other name is still a commodore. We should corret this mistake before the first naval promotions are made to the one-star flag rank. This week, I am introducing legislation to correct the wording of the law so that a commodore in our great U.S. Navy will be just that—a commodore.

RESIGNATION AS MEMBER OF COMMITTEE ON POST OFFICE AND CIVIL SERVICE

The SPEAKER pro tempore laid before the House the following resignation as a member of the Committee on Post Office and Civil Service:

HOUSE OF REPRESENTATIVES,
Washington, D.C., June 5, 1981.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, Capitol Building, Washington, D.C.

DEAR MR. SPEAKER: I hereby resign my position on the House Post Office and Civil Service Committee.

Sincerely,

PETER A. PEYSER,
Member of Congress.

The SPEAKER pro tempore. Without objection, the resignation is accepted.

There was no objection.

ELECTION OF HON. STENY H. HOYER AS MEMBER OF COMMITTEE ON BANKING, FINANCE AND URBAN AFFAIRS AND COMMITTEE ON POST OFFICE AND CIVIL SERVICE

Mr. ALEXANDER. Mr. Speaker, as acting chairman of the Democratic Caucus and at the direction of that caucus, I offer a privileged resolution (H. Res. 151) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 151

Resolved, That Steny H. Hoyer of Maryland be, and he is hereby, elected to the following standing committees of the House of Representatives: Committee on Banking, Finance and Urban Affairs; and Committee on Post Office and Civil Service, to rank twelfth thereon.

The resolution was agreed to.

A motion to reconsider was laid on the table.

ISRAELI BOMBING OF NUCLEAR REACTOR IN BAGHDAD

(Mr. ZABLOCKI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ZABLOCKI. Mr. Speaker, as a friend and supporter of assistance to Israel, I was alarmed and concerned upon hearing of the Israeli bombing of a nuclear reactor in Iraq. Apparently, planes obtained from the United States were employed. This appears to be in violation of U.S. statutes. Early reports indicate that there were no foreign casualties.

Nevertheless, this highly irresponsible act certainly does not enhance the development of peace and stability in the area. At the very least, it will almost assuredly eliminate any chance of finding a peaceful settlement to the missile crisis in Lebanon, and make the job of special envoy Philip Habib even more difficult.

Mr. Speaker, at this time I submit that all peaceful nations must redouble their efforts in reducing tensions and bringing about a settlement, a negotiated settlement, in order that we may have peace and stability in that area.

□ 1215

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore (Mr. ALEXANDER) laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
June 8, 1981.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the permission granted in the Rules of the House of Representatives, I have the honor to transmit a sealed envelope from The White House, received in the Clerk's Office at 4:35 p.m. on Friday, June 5, 1981 and said to contain a message from the President whereby he transmits the 1976 calendar year annual report on occupational safety and health activities as prepared by the Secretary of Labor.

With kind regards, I am,

Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk, House of Representatives.

THE 1976 CALENDAR YEAR ANNUAL REPORT ON OCCUPATIONAL SAFETY AND HEALTH ACTIVITIES—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Education and Labor:

To the Congress of the United States:

In accordance with Section 26 of the Occupational Safety and Health Act of 1970, I am transmitting today the 1976 calendar year annual report on occupational safety and health activi-

ties as prepared by the Secretary of Labor of the previous administration.

RONALD REAGAN.

THE WHITE HOUSE, *June 5, 1981.*

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall votes, if postponed, shall be taken on Tuesday, June 9, 1981.

NATIONAL TELECOMMUNICATIONS AND INFORMATION ADMINISTRATION AUTHORIZATION

Mr. WIRTH. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3240) to authorize appropriations for fiscal year 1982 for the administration of the National Telecommunications and Information Administration.

The Clerk read as follows:

H.R. 3240

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there is authorized to be appropriated for the administration of the National Telecommunications and Information Administration $16,467,000, together with such sums as may be necessary for increases resulting from adjustments in salary, pay, retirement, other employee benefits required by law, and other nondiscretionary costs, for fiscal year 1982.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Colorado (Mr. WIRTH) will be recognized for 20 minutes, and the gentleman from Texas (Mr. COLLINS) will be recognized for 20 minutes.

The Chair now recognizes the gentleman from Colorado (Mr. WIRTH).

Mr. WIRTH. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 3240 authorizes $16.467 million in fiscal year 1982 for the National Telecommunications and Information Administration. NTIA is an agency within the Department of Commerce responsible for such matters as authorizing Federal radio frequencies; analyzing and assisting in the formulation of domestic telecommunications and information policy; conducting technical research in telecommunications; and working with other executive agencies on international telecommunications and information policy.

H.R. 3240 was unanimously reported by the Committee on Energy and Commerce, and provides the level of funding for NTIA recommended by the administration.

NTIA is not currently subject to periodic authorizations, or to the regular congressional oversight that attends the authorization process. By establishing the precedent of a determinate authorization for NTIA, H.R. 3240 vastly improves the likelihood that Congress will systematically scrutinize agency performance. Such oversight is essential to sound management and policymaking, and will better enable us to review and determine agency priorities.

Mr. COLLINS of Texas. Mr. Speaker, I join with the chairman of our subcommittee, the gentleman from Colorado (Mr. WIRTH) in fully supporting H.R. 3240 which authorizes the budget for the National Telecommunication and Information Agency. It is in keeping with the figure recommended by the administration and can be fairly characterized as no frills. For fiscal year 1982 NTIA is authorized a modest $16.5 million. It was voted unanimously from subcommittee and full committee.

Even at this trim level of funding, I believe that NTIA can fulfill its statutory mandate. Briefly, NTIA is charged with formulating policies to support development and growth of the telecommunications and information industries. Support is also given to a host of other industries that have sprung from telecommunications and information technologies. This is one of the few agencies that does not take an adversarial approach toward business, but actually provides assistance.

NTIA is vital to our technological future, and is a necessary part of maintaining America's leadership in the highly competitive communications field. Throughout the world our competitors have strong backing from their governments, enabling their home industries to make great gains on the United States. NTIA performs this function for U.S. industry in the information and telecommunications field. It is for this reason that I look so favorably on NTIA and urge my colleagues to vote for the bill.

Mr. Speaker, I would like to add one or two important facts about NTIA. It was established in 1978, when the White House Office of Telecommunications Policy was abolished and most of its functions were consolidated with those of the Commerce Department's Office of Telecommunications. NTIA has performed many valuable, essential functions. One of them has been coordinating in the field of facilities.

I was most interested to learn that the Congressional Budget Office has estimated that although it now asks for a budget figure of $16.5 million, year by year in the future they are looking for a decrease. In 1983 they are hoping that this agency will be down to a $3 million budget and in 1984 down to a $1.7 million budget. In other words, they are anticipating that they can cut this agency by 83 percent.

We have made another strong improvement in the manner that we now have an annual review, and as we move forward in the Reagan administration toward budget reductions and reduced costs and Government spending, this will be a material and a constructive move for the entire country.

Mr. Speaker, I reserve the balance of my time.

Mr. Speaker, I have no further requests for time.

Mr. WIRTH. Mr. Speaker, I have no further requests for time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Colorado (Mr. WIRTH) that the House suspend the rules and pass the bill, H.R. 3240.

The question was taken.

Mr. COLLINS of Texas. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

FEDERAL COMMUNICATIONS COMMISSION AUTHORIZATION ACT OF 1981

Mr. WIRTH. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3239) to amend the Communications Act of 1934 to authorize appropriations for the administration of such Act, and for other purposes, as amended.

The Clerk read as follows:

H.R. 3239

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Federal Communications Commission Authorization Act of 1981".

AUTHORIZATION OF APPROPRIATIONS

SEC. 2. (a) The Communications Act of 1934 (47 U.S.C. 151 et seq.) is amended by inserting after section 5 the following new section:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 6. There is authorized to be appropriated for the administration of this Act by the Commission $77,351,000, together with such sums as may be necessary for increases resulting from adjustments in salary, pay, retirement, other employee benefits required by law, and other nondiscretionary costs, for fiscal year 1982.".

(b) Section 4(g) of the Communications Act of 1934 (47 U.S.C. 154(g)) is amended by striking out "from time to time may be appropriated for by Congress" and inserting in lieu thereof "may be appropriated for by the Congress in accordance with the author-

izations of appropriations established in section 6".

IMPOSITION OF FEES

SEC. 3. Title IV of the Communications Act of 1934 (47 U.S.C. 401 et seq.) is amended by adding at the end thereof the following new section:

"IMPOSITION OF FEES

"SEC. 417. (a)(1) The Commission shall impose a fee upon any person regulated by the Commission under this Act. Such fee shall be based upon—

"(A) in the case of a license application, any costs incurred by the Commission in connection with processing such application;

"(B) in the case of a tariff filed by a common carrier, any costs incurred by the Commission as a result of such filing;

"(C) in the case of any application for a construction permit, for an equipment approval or authorization, or for any certification issued by the Commission, and in the case of any petition for the waiver of any rule or for other relief, any costs incurred by the Commission as a result of any such application or petition; and

"(D) any costs incurred by the Commission which are directly or indirectly attributable to the regulation of such person, including the cost of providing any service necessarily rendered by the Commission to a licensed applicant as a result of such application.

"(2) No portion of the fee specified in paragraph (1) may be based upon—

"(A) the value to the person involved of any license issued to such person by the Commission or any service performed for such person by the Commission;

"(B) any public policy assessment made by the Commission with respect to the regulation of such person; or

"(C) any estimate by the Commission of the value to the general public which results from the regulation of such person.

"(3) The total amount of funds which the Commission may receive through the imposition of fees under this subsection for any fiscal year may not exceed 50 percent of the amount appropriated by the Congress under section 6 for such fiscal year.

"(b) The Commission may waive the fee specified in subsection (a), in the case of governmental entities, public telecommunications entities, and noncommercial users of the electromagnetic spectrum, if the Commission determines that any such waiver is in the public interest. The Commission also may waive any such fee which is less than $100.

"(c) The Commission shall develop appropriate fee schedules not later than 90 days after the date of the enactment of the Federal Communications Commission Authorization Act of 1981. The Commission shall use such schedules in assessing fees under subsection (a).

"(d) The Commission may prescribe by regulation an additional charge which may be assessed as a penalty for late payment of any fee assessed under subsection (a). Such penalty shall not exceed 25 percent of the fee involved.

"(e) Moneys received by the Commission as a result of the assessment of fees under subsection (a) shall be deposited by the Commission in the general fund of the Treasury of the United States as reimbursement to the United States for amounts appropriated for use by the Commission in carrying out the provisions of this Act.".

UNIFORM SYSTEM OF ACCOUNTS

SEC. 4. (a)(1) The Federal Communications Commission (hereinafter in this section referred to as the "Commission") shall complete the rulemaking proceeding relating to the revision of the uniform system of accounts used by telephone companies (Common Carrier Docket 78-196; notice of proposed rulemaking adopted June 28, 1978, 43 Federal Register 33560) as soon as practicable after the date of the enactment of this Act.

(2) Such uniform system shall require that each common carrier shall maintain a system of accounting methods, procedures, and techniques (including accounts and supporting records and memoranda) which shall ensure a proper allocation of all costs to and among telecommunications services, facilities, and products (and to and among classes of such services, facilities, and products) which are developed, manufactured, or offered by such common carrier.

(b) The Commission shall submit a report to each House of the Congress not later than one year after the date of the enactment of this Act. Such report shall include a summary of actions taken by the Commission in connection with the rulemaking proceeding specified in subsection (a), together with such other information as the Commission considers appropriate.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Colorado (Mr. WIRTH) will be recognized for 20 minutes, and the gentleman from Texas (Mr. COLLINS) will be recognized for 20 minutes.

The Chair now recognizes the gentleman from Colorado (Mr. WIRTH).

Mr. WIRTH. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 3239 authorizes $77,351 million in fiscal year 1982 for the Federal Communications Commission. The bill was unanimously reported by the Committee on Energy and Commerce as was the previous bill, and provides the level of funding for the FCC recommended by the Reagan administration.

Since its creation in 1934, the FCC has had a permanent or continuing authorization. H.R. 3239 amends the Communications Act of 1934 to replace the FCC's permanent authorization with a periodic authorization. By establishing the precedent of a determinate authorization for the FCC, H.R. 3239, as does the previous legislation, vastly improves the likelihood that agency performance will be subject to regular congressional scrutiny and oversight.

FCC oversight is especially important today—given the telecommunications industry's rapidly developing technology, and the attendant expansion of its products, services, and markets. As chairman of the Subcommittee on Telecommunications, Consumer Protection, and Finance, I have pledged quarterly hearings to review FCC activities and priorities, and in that we have received extraordinarily strong cooperation from the new Chairman of the FCC and his staff.

H.R. 3239 also requires the FCC to recover administrative expenses by imposing fees on those parties it regulates under the Communications Act of 1934. The Congressional Budget Office estimates that the fees will generate $31 million in receipts in fiscal year 1982—a small but firm step toward our concern shared by the gentleman from Texas (Mr. COLLINS) for fiscal responsibility.

The Commission's authority to collect fees is not unlimited, however. Total funds received by the FCC as the result of the imposition of fees may not exceed 50 percent of the FCC's appropriations in any fiscal year. As the result of an amendment to the bill unanimously adopted in the subcommittee, the FCC is directed to waive fees for Government entities, public telecommunications entities, and noncommercial users of the spectrum. The Committee on Energy and Commerce believes that when appropriate the Federal Government should be reimbursed for services rendered.

The fees proposed in H.R. 3239 are nothing more then user fees based upon the costs incurred by the FCC in connection with such activities as processing license applications or tariff filings. H.R. 3239 specifically provides that no portion of any fee imposed under this legislation may be based upon a license's value to a particular user of the spectrum. That is a very important provision, Mr. Speaker.

Finally, H.R. 3239 directs the FCC to complete its rulemaking proceedings to revise the uniform system of accounts used by telephone companies. The committee believes the Commission must give priority to implementing a revised system of accounts—an effort that has been pending at the FCC for almost 5 years. As the telecommunications industry becomes more competitive, it is essential that common carriers maintain an accounting system that properly allocates costs to and among the various services, facilities, and products they offer. Such accounting, Mr. Speaker, is essential as we move into a rewrite of the Communications Act of 1934 and try to understand the flow of funds within the industry.

Mr. Speaker, H.R. 3239 enjoys the full support of the Committee on Energy and Commerce. In bringing this bill from subcommittee, through committee, and now to the floor, I have worked closely with the distinguished ranking minority member of the Subcommittee on Telecommunications, the gentleman from Texas (Mr. COLLINS). I appreciate his valuable assistance and support, as well as that of the gentleman from Ohio (Mr. BROWN) and that of the gentleman from North Carolina (Mr. BROYHILL).

Mr. Speaker, I reserve the remainder of my time.

Mr. COLLINS of Texas. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I join with the chairman of the subcommittee, the gentleman from Colorado (Mr. WIRTH), in recommending and commending this Authorization Act.

The budget figures contained in H.R. 3239 are in keeping with the recommendations made by the President. More specifically, the FCC will achieve a $4.8 million reduction from the estimates of the previous administration.

I would like to repeat that. We are going to provide a $5 million cut on the previous administration's original budget. Government economy is first in the minds of the voters, and the independent agencies will have to learn to live with less money. I am proud that the Committee on Energy and Commerce and the Subcommittee on Telecommunications are setting the pace for the other branches of Government here in Washington.

This bill, however, is more than a straight reauthorization. For good reasons, several fundamental changes in FCC operations have been made, and I would like to talk about them for a moment.

First, and most important, no longer will the FCC have a permanent or a continuing reauthorization. So much has changed in the telecommunications field and its companion industries that FCC policies and priorities are in need of a regular and annual review. Unprecedented expansion of the telecommunication industries, new markets, services and products, vigorous competition, and daily scientific breakthroughs make periodic committee surveillance of FCC activities imperative. Our subcommittee hearings disclosed that the FCC needs direction, needs guidance, needs legislation, and needs leadership from us in helping to establish program priorities. Regular oversight through the reauthorization process, as all of us know in Congress, is necessary, and nothing brings everybody's attention to spending more forthrightly than when we go through the reauthorization process. Markup will serve as a catalyst in this respect.

Another important improvement has to do with the establishment of a fee structure. It is designed so that the FCC can recover regulatory expenses by the imposition of fees. Such fees will be deposited in the general funds of the Treasury, and that will thereby contribute to a reduction in the Federal deficit.

Furthermore, we are compelled to take the legislative route in the formulation of the fee structure because the FCC tried and failed to do so several times under its inherent regulatory authority.

I would like to say that this fee matter goes back to the year 1963 or sometime in the 1960's, but finally in 1976 the Supreme Court ruled that FCC could not assess fees; that they did not have the authority. This is something that has come up for congressional attention and something we commend because it is a step forward. Each time fees have been challenged in court, the FCC lost, and it has been a tremendous waste of the taxpayers' dollars going through all this court litigation. Wisely the FCC has now sought to establish the fee structure through legislation.

□ 1230

In closing, I would like to urge to suspend the rules and vote for this bill. It is something that was passed unanimously out of our subcommittee. It was passed unanimously out of the full committee. It solves several problems. It solves them for the FCC, that can be translated into greater Government efficiency and a reduced cost to taxpayers.

I would like to emphasize two things that are in this bill. The first one, instead of having a permanent authorization, we are having an annual authorization, which means every year Congress will have the responsibility of completely reviewing the FCC operation.

The second thing, which has very definite merit, is to bring in the subject of fees as an administrative expense.

Now, very wisely, these fees have been limited to 50 percent of the FCC expense structure. In other words, we know that about 50 percent, about half of their FCC time, is spent on this type of operation, so it is not to overburden industry, because what this is, this is reimbursement for review. This is not a tax. I want to repeat that with emphasis. This is not a tax, this is not a tax. This is a fee to provide for reimbursement for services that the Government provides at the time that they review the different applications.

It states in here, what we require for a license application in the way of processing costs and no portion of any fee may be based on extraneous material.

This is very important. We are calling on the FCC within 90 days to establish a sound structure, to come up with fair and equitable arrangements for what will be the fee arrangement.

The bill requires that fees be based upon:

For a license application, processing cost;

For a tariff filed by a common carrier, costs incurred as a result of the filing;

For a construction permit, equipment approval or authorization, certification, or any petition for relief, costs incurred as a result of the requested action; and

Any costs incurred by the FCC that are attributable to regulation, including the cost of any services rendered to a license applicant.

No portion of any fee may be based upon:

The value to the person involved of any license issued or any service performed by the FCC;

Any public policy assessment made by the FCC; or

Any estimate by the FCC of the value to the general public which results from the commission's regulation.

I commend this bill. I think it is an excellent piece of legislation.

Mr. WIRTH. Mr. Speaker, I have no further requests for time.

The SPEAKER pro tempore (Mr. DE LA GARZA). The question is on the motion offered by the gentleman from Colorado (Mr. WIRTH) that the House suspended the rules and pass the bill, H.R. 3239, as amended.

The question was taken.

Mr. COLLINS of Texas. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 5 of rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

GENERAL LEAVE

Mr. WIRTH. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 3239 and H.R. 3240.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Colorado?

There was no objection.

EXPORT ADMINISTRATION AMENDMENTS ACT OF 1981

Mr. BINGHAM. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3567) to authorize appropriations for the fiscal years 1982 and 1983 to carry out the purposes of the Export Administration Act of 1979, and for other purposes.

The Clerk read as follows:

H.R. 3567

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Export Administration Amendments Act of 1981".

SEC. 2. (a) Section 18(b)(1) of the Export Administration Act of 1979 (50 U.S.C. App. 2417(b)(1)) is amended to read as follows:

"(1) $9,659,000 for each of the fiscal years 1982 and 1983; and".

(b) The amendment made by subsection (a) shall take effect on October 1, 1981.

SEC. 3. Section 12(c) of the Export Administration Act of 1979 (50 U.S.C. App.

2411(c)) is amended by adding at the end thereof the following:

"(3) Notwithstanding any other provision of law, no department or agency may withhold confidential information from any other department or agency with enforcement responsibilities under this Act which requests that information in any case in which the information is considered by the department or agency requesting the information to be necessary for the enforcement of this Act. Any such department or agency requesting such confidential information shall be subject to the same statutory restrictions on disclosing the information to other persons as is the department or agency from which the information is requested. The provisions of this paragraph shall not apply to information subject to the restrictions set forth in section 9 of title 13, United States Code.".

SEC. 4. (a) Section 11(b)(1) of the Export Administration Act of 1979 (50 U.S.C. App. 2410(b)(1)) is amended by striking out "purposes," and all that follows through the period at the end thereof and inserting in lieu thereof the following: "purposes—

"(A) except in the case of an individual, shall be fined not more than five times the value of the exports involved or $1,000,000, whichever is greater; and

"(B) in the case of an individual, shall be fined not more than $250,000, or imprisoned not more than 10 years, or both.".

(b) Section 11(b)(2) of that Act (50 U.S.C. App. 2410(b)(2)) is amended by striking out "Defense," and all that follows through the period at the end of the first sentence and inserting in lieu thereof the following: "Defense—

"(A) except in the case of an individual, shall be fined not more than five times the value of the exports involved or $1,000,000, whichever is greater; and

"(B) in the case of an individual, shall be fined not more than $250,000, or imprisoned not more than 5 years, or both.".

(c) Section 11(c)(1) of that Act (50 U.S.C. App. 2410(c)(1)) is amended—

(1) by striking out "not to exceed $10,000"; and

(2) by adding at the end thereof the following new sentence: "The civil penalty for each such violation may not exceed $10,000 in the case of an individual and may not exceed $100,000 in the case of any person other than an individual.".

(d) The amendments made by this section apply with respect to violations occurring after the date of the enactment of this Act.

SEC. 5. Section 6(f) of the Export Administration Act of 1979 (50 U.S.C. 2405(f)) is amended—

(1) in the subsection caption by inserting "AND FOR CERTAIN FOOD EXPORTS" immediately after "SUPPLIES";

(2) by inserting the following immediately after the first sentence: "Before export controls on food are imposed, expanded, or extended under this section, the Secretary shall notify the Secretary of State in the case of export controls applicable with respect to any developed country and shall notify the Director of the United States International Development Cooperation Agency in the case of export controls applicable with respect to any developing country. The Secretary of State with respect to developed countries, and the Director with respect to developing countries, shall determine whether the proposed export controls on food would cause measurable malnutrition and shall inform the Secretary of that determination. If the Secretary is informed that the proposed export controls on food would cause measurable malnutrition, then those controls may not be imposed, expanded, or extended, as the case may be, unless the President determines that those controls are necessary to protect the national security interests of the United States, or unless the President determines that arrangements are insufficient to ensure that the food will reach those most in need. Each such determination by the Secretary of State or the Director of the United States International Development Cooperation Agency, and any such determination by the President, shall be reported to the Congress, together with a statement of the reasons for that determination.";

(3) in the next to the last sentence by striking out "supplies," and inserting in lieu thereof "supplies or of food"; and

(4) in the last sentence by inserting immediately before the period "or to any export control on food which is in effect on the date of the enactment of the Export Administration Amendments Act of 1981".

SEC. 6. (a) Section 9 of the International Investment Survey Act of 1976 (22 U.S.C. 3108) is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 9. There are authorized to be appropriated to carry out this Act $3,842,000 for each of the fiscal years 1982 and 1983.".

(b) The amendment made by subsection (a) shall take effect on October 1, 1981.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from New York (Mr. BINGHAM) will be recognized for 20 minutes, and the gentleman from California (Mr. LAGOMARSINO) will be recognized for 20 minutes.

The Chair recognizes the gentleman from New York (Mr. BINGHAM).

Mr. BINGHAM. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, the purpose of H.R. 3567 is to authorize funding of $9,659,000 for each of the fiscal years 1982 and 1983 to carry out the Export Administration Act of 1979, which is the basic authority for restricting exports from the United States for reasons of national security, foreign policy, or short domestic supply.

The bill also contains two provisions to strengthen enforcement of the act. The Subcommittee on International Economic Policy and Trade, which I have the honor to chair, has reviewed extensively the problem of diversion of controlled technology to the Soviet Union and Eastern European countries. In order to assure that the penalties under the act constitute a sufficient deterrent to violations, criminal and civil penalties are increased. The bill also provides for improved sharing of information among Government agencies with respect to enforcement efforts.

H.R. 3567 also restricts the President's authority to impose embargoes on food for foreign policy purposes, where the result of the embargo would be malnutrition. The amendment does not apply to food embargoes for national security reasons or food embargoes pursuant to the International Emergency Economic Powers Act; also, it would not apply in situations where the President determines that the food would not reach hungry people.

This bill also authorizes funding of $3,842,000 for each of the fiscal years 1982 and 1983 to carry out the International Investment Survey Act of 1976, which authorizes collection by the Commerce and Treasury Departments of data on foreign investment.

Mr. Speaker, this legislation makes no substantive changes in policies or procedures for restricting exports for national security and foreign policy reasons. The Members of the House will recall that we had very extensive reexamination of our export control policy and procedures in 1979, and we substantially revised the Export Administration Act at that time. So the legislation now before the House is, I believe, noncontroversial. It simply provides funding authority to carry out our export controls for the 2 years remaining before the Export Administration Act itself expires and will require review and renewal. I urge the House to adopt H.R. 3567.

Mr. Speaker, I yield such time as he may require to the chairman of the full committee, the gentleman from Wisconsin (Mr. ZABLOCKI).

Mr. ZABLOCKI. Mr. Speaker, I thank the gentleman for yielding.

I rise in support of H.R. 3567.

This bill is a simple authorization of funds for the Export Administration Act and for the International Investment Survey Act. In addition, it raises the penalties for violation of the Export Administration Act and facilitates the sharing of information among Government agencies.

The Export Administration Act is the principal source of authority for the imposition of export controls for purposes of national security, foreign policy, and short supply. It therefore is an important source of Executive power in dealing with international and domestic economic problems.

The International Investment Survey Act authorizes and funds the collection and analysis of data on foreign investment in the United States and of U.S. investment overseas. It is the principal source of maintaining current data on these investments and therefore of keeping abreast of developments in this area.

I commend the gentleman from New York (Mr. BINGHAM) for the responsible manner in which his subcommittee has exercised its jurisdiction over these two areas, and also wish to commend the ranking member of the subcommittee, the gentleman from California, Congressman ROBERT LAGOMARSINO for his contribution. I urge the bill be passed.

Mr. LAGOMARSINO. Mr. Speaker, I yield myself such time as I may use.

Mr. Speaker, I rise in support of H.R. 3567, the Export Administration Amendments Act of 1981.

When we took up the Export Administration Act of 1979, it took us 4 days of lengthy and thorough deliberation to reach final passage of the act. That we are now able to consider this same act under suspension of the rules is a tribute, I believe, to the validity of our action 2 years ago. We had to reach some difficult compromises on a number of policies. From our subcommittee's review this year of those issues, I believe the administration and those of us in Congress are satisfied that both for strengthened national security controls and for easing unnecessary export restrictions, we have accomplished our goals. Those two competing policies are not easy to balance, but I am gratified that we have been as successful as we have.

In the bill before us today, we make no changes in the basic authority contained in the Export Administration Act. The changes that are made by this legislation are intended to improve both the administration's ability to enforce this act and its deterrent effect by increasing penalties for violations of the national security controls.

Chairman BINGHAM will clarify the effect of the increased civil penalties in this act.

There are some reservations which the administration has about certain provisions of H.R. 3567, which I believe must be stated for the record.

The adminstration opposes the authorization for fiscal year 1983 above its requested figure. The budget for the Office of Export Administration for fiscal year 1982 required an increase for three specific projects: First, the introduction of a full-scale and systematic capability to assess foreign availability of high technology; second, the comprehensive rewrite of the export administration regulations; and third, the implementation of procedures and improved computer processing of export license applications within statutory deadlines. The administration states it does not intend to abandon or substantially cut back these activities in fiscal year 1983, but it also states that the funding above its request is not needed for carrying out these activities during the second year.

Regarding the increase in civil penalties, the administration believes the existing amounts are adequate and serve as a significant deterrent. It also believes that many small- and medium-sized companies are involved in exporting and a civil penalty of up to $10,000 can be a strong deterrent for a company this size. I do believe, however, that in the case of circumvention of national security controls, the increased civil penalties are appropriate. As the administration acknowledges, additional sanctions under the act also serve as effective deterrents, particularly the denial of export privileges, which can be more costly than any monetary penalty.

With these reservations in mind, I am pleased to support H.R. 3567 and urge my colleagues to join me in voting for this bill.

Mr. Speaker, while we are considering H.R. 3567 I want to bring to the attention of Chairman BINGHAM and my colleagues a serious problem which affects the refining industry in the State of California. This problem is directly related to the procedures followed by the International Trade Administration of the Commerce Department in the issuance of export licenses.

Many refineries in California, especially those owned by independent operators, are suffering financially due to their inability to export freely residual fuel oil. I want to point out that this problem has been growing over the past 2 years as west coast refineries use greater amounts of heavy, sour California crude oil and Alaska North Slope crude oil, with many of the same properties as California crudes, in their refinery operations. These crude feedstocks produce large amounts of residual fuel oil. The residual fuel oil market on the west coast is depressed because the bunker fuel, utility, and industrial markets for this product are saturated and large quantities of residual fuel oil are being sold at a severe loss imperiling the financial viability of the independent refining industry. I should add that this product cannot be economically transported to the east coast because of the prohibitive cost involved in doing so.

There are markets for the west coast's excess residual fuel oil and these exist primarily in Japan, Hong Kong, South Korea, Taiwan, Malaysia, Indonesia, Singapore, and Sri Lanka. All of these nations are important trading partners of the United States and are good friends of our country. Under current Commerce Department regulations, it is possible to obtain an export license for residual fuel oil. But obtaining a validated export license is a lengthy, burdensome process which is not compatible with business requirements related to export markets nor is it in keeping with the President's regulatory reform objectives.

The time, expense, and uncertainly involved with obtaining an export license for residual fuel oil serves no valid public policy rationale since this particular product is not in short supply or in danger of becoming a scarce commodity. As a result, many independent refiners which need to export residual fuel oil since it cannot be marketed on the west coast are prevented from doing so by Government regulations which serve no valid purpose. As a result of this situation, these businesses are threatened. If California's independent refineries are closed, customers of refined petroleum products on the west coast will have to depend only on a limited number of large refineries to supply them with products for agriculture, industry, and general transportation purposes. In addition, if independent refineries go out of business, many producers of California crude oil will be forced to shut in their production. These consequences would adversely affect the energy situation on the west coast.

Mr. Speaker, I believe a solution to this problem can be found within the letter and spirit of the Export Administration Act of 1979. I am confident the Commerce Department can revise its export license procedures for residual fuel oil in order to give more expeditious consideration of applications for such exports.

I have met with Commerce and Energy Department officials to discuss this issue and I understand that they are reviewing the procedures. Secretary of Commerce Baldrige has informed me of the review that the Commerce Department is undertaking to consider the problems of excess supplies of residual fuel oil, and I urge the Department to take prompt action for an improved export policy for residual fuel oil. Such a policy would relieve the damage being done to a significant sector of our domestic economy and would, in no way, harm the energy security of our Nation.

Mr. BINGHAM. Mr. Speaker, will the gentleman yield to me?

Mr. LAGOMARSINO. I yield to the distinguished gentleman.

Mr. BINGHAM. Mr. Speaker, I would like to express my agreement with what the gentleman has been saying about the need for expeditious handling of these applications for licenses for export of residual fuel oil which is in surplus on the west coast and cannot economically be transported to the east coast. I would suggest that this might be a very good case for the use of the qualified general license procedure which we incorporated in the Export Administration Act of 1979. I would emphasize, however, that in doing so the 30-day notification to Congress under the amendment authored by our colleague from Massachusetts (Mr. MOAKLEY) should continue to be observed, and I know that is the intention of the gentleman from California.

Whereas a validated license must be issued for each specific export transaction, a qualified general license could be issued for more than one export over a specified period of time to a specified destination or destinations. If short supply conditions should arise at any time with respect to residual fuel, the license could be immediately terminated. This would expedite the licensing process for surplus residual fuel, keep the Congress informed of

residual fuel exports under the Moakley amendment, and maintain strong controls in case of short supply.

Finally, I would agree with the gentleman from California that the need to restrict exports of oil and refined products was not intended and should not have the result of putting small refineries out of business—refineries that we will badly need should there be another oil crisis. To the extent that small refiners must export residual oil in order to recover their costs and make a reasonable profit in the course of producing refined products that are needed and in short supply, I think it is in our interest to allow them to do so under the expedited controls that we have mentioned.

Mr. LAGOMARSINO. Mr. Speaker, I would like to ask another question, if I might. I understand that nothing in section 3 of the bill is intended to override the national security information classification system established by Executive Order 12065 or the statutory responsibility under 50 U.S.C. 403(d)(3) of the Director of Central Intelligence to protect intelligence sources and methods. Is my understanding correct?

Mr. BINGHAM. Yes; unofficial concern has been expressed by the intelligence agencies—both foreign and domestic—that section 3 of this bill could be construed to override the statutory protections on disclosing their sources and methods. The purpose of section 3 is to facilitate sharing among agencies with a role in enforcing the act information needed for effective enforcement, but not information on the sources and methods used to acquire that information.

Mr. LAGOMARSINO. Is my understanding correct that the increase in civil penalties is intended to apply specifically to circumvention of national security and foreign policy controls under sections 5 and 6 of this act?

Mr. BINGHAM. That is correct. As the committee report states—

These increased penalties are intended by the committee principally to constitute a further deterrent to violations of the national security controls—

To give the administration flexibility and the opportunity to impose higher penalties and thus better deter violations. With respect to other kinds of violations, to which these increased penalties would also apply, such as antiboycott violations, the administration can at its discretion adjust the amount of civil penalties to reflect the seriousness of the violation, and the committee would not expect the administration to impose the maximum civil penalties for minor inadvertent violations

Mr. LAGOMARSINO. Then the increased penalties are not intended to apply to paperwork errors occurring under these or other sections of this act?

Mr. BINGHAM. That is correct.

Mr. LAGOMARSINO. I thank the gentleman for yielding and clarifying this matter to me.

□ 1245

Mr. BINGHAM. Mr. Speaker, I yield 5 minutes to my colleague, the gentleman from New York (Mr. McHUGH).

Mr. GLICKMAN. Mr. Speaker, will the gentleman yield?

Mr. McHUGH. I yield to the gentleman from Kansas.

Mr. GLICKMAN. Mr. Speaker, I rise today to call attention to a situation which would seem to run contrary to the intent of section 5 of the bill before us. On May 1, the Commerce Department, in conjunction with the State Department, denied an export license request from the Mennonite Central Committee, the national relief and assistance agency of the Mennonite Church with regional headquarters in my district, to allow them to donate 250 metric tons of wheat flour to Vietnam in order to relieve the starvation plaguing the population there. The Departments issued this rejection, an action unprecedented since the end of the Vietnam war, on the grounds that the Vietnamese Government had within its power the ability to alleviate its peoples' hunger by diverting resources from military activities to economic development. But to deny the Mennonite Central Committee's export license request ignores the magnitude of the starvation in Vietnam due to adverse weather last fall, as well as this country's tradition to providing humanitarian aid to nations of all political persuasions. Lastly, it overlooks the Mennonite Central Committee's exemplary record of serving such causes around the world, including several efforts in Vietnam during the last several years.

A food and agricultural organization delegation which visited Vietnam last fall estimated that the country faced a food deficit of 2 million tons this year. The most critical shortages are expected this month before new crops are harvested. Given the urgency of the need, I hope the Commerce and State Departments will reconsider their action and allow this compassionate effort by the Mennonites to proceed without delay.

Mr. McHUGH. Mr. Speaker, I rise in support of the bill. I am especially pleased with section 5 of this legislation which prohibits the imposition of export controls on food if those controls would result in measurable malnutrition, unless the President determines that such controls are necessary to protect U.S. national security or finds that the food in question would not reach those most in need.

The gentleman from New York (Mr. BINGHAM) and his colleagues are to be commended for incorporating this provision into the bill. As they know, the United States has tried for many years now to avoid any suggestion that we are prepared to use food as a weapon. I believe that is a sound policy. The United States should not be in the business of refusing to sell or to donate its surplus food to starving and malnourished people simply because we dislike the policies of their governments.

Unfortunately, Mr. Speaker, it would appear that the Reagan administration is rather ambivalent about whether the United States should use food as a weapon in our relations with other nations. As my colleagues will recall, Agriculture Secretary John Block disavowed his earlier support for this position at his confirmation hearings in January. Nonetheless, there have been a number of instances in recent months where it appears that our Government has indeed used food as a weapon.

Most recently, for example, the Department of Commerce has provided strong indications that it will turn down an export licensing request from the Mennonite Central Committee to send 250 tons of wheat flour worth approximately $75,000 to Vietnam. Although Mennonite farmers in Kansas would like to contribute this food to those people most seriously affected by floods and torrential rains that have devastated that country's agriculture and destroyed much of its food production over the last year, the Commerce Department apparently believes that this humanitarian gesture would reinforce the Vietnamese occupation of Cambodia.

Recognizing that normal commercial relations between the United States and Vietnam are prohibited under section 385.1 of the Export Administration regulations, it is my understanding that noncommercial shipments to meet emergency needs are not prohibited. It is also my understanding that the U.S. Government has never denied any private religious organization a license to ship humanitarian food aid to Vietnam since the end of the war, and thus I am concerned that a denial in this case would establish a new policy and set a precedent for using even privately donated humanitarian food aid as a political weapon.

In a letter to the Mennonite Central Committee, dated May 1, 1981, the Commerce Department justified its position as follows:

Although we recognize the severe economic hardships of the Vietnamese people, we believe that the Vietnamese government has within its power the ability to alleviate this hardship by ending its diversion of resources from economic development to military conquest. Although an argument could be made that 250 tons of wheat flour would qualify under humanitarian grounds, the rejection of this application for license underlines the United States Government's view that the Vietnamese government has within

its power the ability to alleviate the severe hardship its policies have brought about.

While I share the administration's opposition to the continued Vietnamese occupation of Cambodia, we should recognize that we are not talking about official U.S. food assistance. What we are talking about is a small amount of privately donated food that is being made because of deeply held religious beliefs.

I find it especially ironic that the administration would expect such an argument to be seriously entertained coming within days of its decision to lift the suspension of grain sales to the Soviet Union. As my colleagues know, that suspension was originally imposed in response to the Soviet occupation of Afghanistan and has since been lifted in spite of the fact that the Soviets continue to occupy that nation. A final decision not to grant a license to the Mennonites would almost inevitably have to be interpreted to mean that the United States is prepared to deny humanitarian food aid to Vietnam sponsored by a private religious organization that has no profit motive, but will forsake the same principle in the case of the U.S.S.R. because a profit stands to be made.

It is also important to recognize that factors other than the Vietnamese occupation of Cambodia are involved in the present food crisis being experienced by its people. Vietnam suffered a serious drought late in 1979, and six major typhoons and floods devastated its central and northern provinces in the latter half of 1980. The U.N. Food and Agriculture Organization has estimated that Vietnam faces a potential food shortage of 2 million tons this year, and has recommended an immediate delivery of 384,000 tons of food. Unfortunately, few of the traditional food donor countries have responded to this international appeal, and thus I find it especially disturbing that our Government would deny a license to ship privately donated wheat flour to Vietnam.

In short, a final negative decision in this case would be inexplicable in terms of related decisions recently taken by the Reagan administration, and would seriously damage a long humanitarian tradition fostered by the Mennonites and other religious organizations. In my judgment, any effort by our Government to undermine this tradition for short-term political advantages will only ultimately damage our standing in the Third World.

Mr. BINGHAM. Mr. Speaker, will the gentleman yield?

Mr. McHUGH. I am happy to yield to the gentleman from New York.

Mr. BINGHAM. I thank the gentleman for yielding.

I would like to associate myself with the gentleman's remarks. I think granting this license would certainly not in any way affect the conflict in Kampuchea or the Vietnamese military activity there. It would be a humanitarian act and I hope the eventual decision will be the granting of the license.

Mr. Speaker, I yield 5 minutes to my colleague, the gentleman from New York (Mr. PEYSER).

Mr. PEYSER. I thank the chairman of the committee (Mr. BINGHAM) for yielding me this time.

I really want to take this time to touch on one of the issues incorporated, but really that was not incorporated in this bill, and that was the reinstatement of the grain embargo. The gentleman from New York handling the bill on the floor (Mr. BINGHAM) had offered an amendment in the committee that was defeated that would have reimposed the grain embargo on the Soviet Union. It seems really incomprehensible to much of the American public that the administration, for all of its toughness on the Soviet Union, somehow saw fit, in spite of the Soviet Union still occupying Afghanistan—the reason the grain embargo was put forth—to lift the grain embargo because a campaign pledge had been made. I think that our international affairs and our foreign relations cannot be built on campaign promises.

It is interesting to note that the administration said at the time it lifted this embargo that this was in some way a recognition of the fact that the Soviet Union had not invaded Poland. What the invasion of Poland has to do with the Soviet Union invading and occupying Afghanistan I do not know. But as a reward for not invading Poland we are lifting the grain embargo. I wonder if next year the Soviet Union does not invade West Berlin what we will give them, because it seems to me that this kind of giveaway and giving in to the Soviet Union is not in harmony with what the administration and the President had said on "We must stand committed to fight communism and to fight the aggressiveness that has been demonstrated by the Soviet Union."

So while I am disappointed that the amendment offered by the gentleman from New York (Mr. BINGHAM) in the committee did not pass, I do appreciate the fact that several of the leading Republican members did support him in this effort. I believe that we have to establish in our operation of foreign policy when we make commitments that we stand by them.

Mr. ROTH. Mr. Speaker, will the gentleman yield?

Mr. PEYSER. I yield to the gentleman from Wisconsin (Mr. ROTH).

Mr. ROTH. I thank the gentleman for yielding. I see the point the gentleman from New York (Mr. PEYSER) is making, but he brings up the word "incomprehensible." Does he not think it would be really incomprehensible now to our allies if we reverted back to the grain embargo after the President has lifted it?

We have to have some consistency in our foreign policy, and I think that is what the President is trying to establish. I know the gentleman's viewpoint, and I think many of the points are well taken.

I think with the consistency of a foreign policy that our allies can understand and can rely upon that we had to vote against the gentleman's amendment.

Mr. PEYSER. I understand the gentleman's point of view and I guess my concern was where the foreign policy gets to be very confusing for our allies was when we lifted the embargo because they could not quite understand on what basis. I talked to a good many of them, particularly in a recent meeting in Europe, and they were quite surprised. They did not understand why this was being done other than it had been stated in a campaign.

Nevertheless, it is done. I understand the gentleman's problem. I regret we have lifted it. I hope, as I say, in the future we will show more consistency in our foreign policy.

I yield back the balance of my time.

Mr. BINGHAM. Mr. Speaker, I yield 2 minutes to the gentleman from Oregon (Mr. WEAVER).

Mr. WEAVER. Mr. Speaker, I thank, the distinguished gentleman from New York, the chairman (Mr. BINGHAM) for yielding 2 minutes to me.

I want to comment on the remarks of my good friend from New York (Mr. PEYSER) on the grain embargo.

Whether or not we have a grain embargo, whether or not it has been taken out or put back on, we are selling now to the Soviet Union grain at below the cost of our farmers to produce it. In other words, we are subsidizing the Soviet Union with these massive shipments of grain. It is costing our Government, our people, and our farmers actually money out of their pockets to sell this grain to the Soviet Union.

Corn is falling in price. Wheat is falling in price. Soybeans are falling in price. And the Soviet Union will come in and scoop it up and use the profits to expand its military capacity. I say this is one of the gravest foreign policy issues we could face today because we are talking about not just millions of dollars but billions of dollars worth of subsidies to the Soviet Union.

I have long promoted in this Congress and to this administration a bill which would allow us to get a fair price for our grain. The Grain Export Bank would allow the Secretary of Agriculture to set minimum prices of our grain for sale to foreign countries such as the Soviet Union and the richest

countries in the world who buy our grain, and this administration has refused to do it. It has condemned the farmers to sell below cost of production and has condemned the American taxpayer to subsidize the Soviet Union. So if we cannot have the embargo, then certainly we should begin selling our grain at the actual cost of production or greater. How long can we tolerate this subsidy to the Soviet Union of our cheap grain that allows them to expand their military potential?

● Mr. DERWINSKI. Mr. Speaker, I support this bill in general, my main objection being to the committee's rejection of an amendment calling for reimposition of the American grain embargo against the Soviet Union.

To date, I have basically agreed with the administration's foreign policy. The decision to lift the grain embargo, however, I believe was a mistake made because of unsound advice the President received from the Agriculture Department.

Sending signals is characteristic of modern diplomacy. The message of the embargo was to register condemnation of the Soviet Union's ruthless invasion of Afghanistan. The United States, setting aside domestic political considerations, demonstrated that as the leader of the free world, it would sacrifice economic gain to protest Soviet imperialism.

The embargo could have been better planned and implemented. Nevertheless, there is no doubt that it seriously hurt the U.S.S.R.'s fragile economy. Two consecutive years of poor harvests, coupled with the embargo, forced the Soviets to spend an extra $1 billion in scarce foreign currencies to satisfy their grain needs. Moreover, it caused them to slaughter much of their livestock because of a lack of feed grains. Leonid Brezhnev himself noted that the country was having grave trouble "supplying the cities and industrial centers with such foodstuffs as milk and meat." The U.S. grain embargo forced the Soviet Union to pay premium prices to make up the grain deficit by purchases in other, often more distant, parts of the world.

Lifting the embargo sends the wrong signals to our allies, particularly in Western Europe. How can we expect the West Germans, for example, to take a tougher stance vis-a-vis the Soviets and refrain from getting more deeply involved with them economically, when we ourselves appear to be putting domestic economic, rather than national security, considerations first? I believe that the embargo was one concrete action that told the Soviets more about U.S. interests and intentions than a spate of anti-Communist rhetoric.

In any case, the fundamental issue is not how effective the embargo was but whether the United States wishes to continue to punish the Soviets for their continuing slaughter of Afghans. Thanks to the counsel of shortsighted agriculture interests, the credibility of our foreign policy with respect to the U.S.S.R. is now being seriously questioned. We saw how credibility problems undermined the effectiveness of the previous administration's foreign policy. We do not want to see this happen again.

The White House Press Office has laboriously explained, lately, that the grain embargo would be reimposed if the U.S.S.R. should invade Poland. Since that would suggest linkage is still a key element in our foreign policy, are the Soviets to assume that Afghanistan is now a fait accompli? I would welcome an answer.●

Mr. LAGOMARSINO. Mr. Speaker, I yield back the balance of my time.

Mr. BINGHAM. Mr. Speaker, I have no further requests fo time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New York (Mr. BINGHAM) that the House suspend the rules and pass the bill, H.R. 3567.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. BINGHAM. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

□ 1300

ARMS CONTROL AND DISARMAMENT AMENDMENTS ACT OF 1981

Mr. ZABLOCKI. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3467) to authorize appropriations under the Arms Control and Disarmament Act, and for other purposes.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Arms Control and Disarmament Amendments Act of 1981".

SEC. 2. (a) Section 49(a) of the Arms Control and Disarmament Act (22 U.S.C. 2589(a)) is amended to read as follows:

"SEC. 49. (a) To carry out the proposes of this Act, there are authorized to be appropriated—

"(1) for the fiscal year 1982, $18,268,000 and such additional amounts as may be necessary for increases in salary, pay, retirement, other employee benefits authorized by law, and other nondiscretionary costs, and to offset adverse fluctuations in foreign currency exchange rates, and

"(2) for the fiscal year 1983, $19,893,852.

Amounts appropriated under this subsection are authorized to remain available until expended.".

(b) The amendment made by subsection (a) shall take effect on October 1, 1981.

SEC. 3. Section 45(a) of the Arms Control and Disarmament Act (22 U.S.C. 2582(a)) is amended by inserting the following new sentence after the second sentence thereof: "In the case of persons detailed from other Government agencies, the Director may accept the results of full-field background security and loyalty investigations conducted by the Department of Defense or the Department of State as the basis for the determination required by this subsection that the person is not a security risk or doubtful loyalty.".

SEC. 4. (a) Section 3(c) of the Arms Control and Disarmament Act is amended by striking out "and Disarmament".

(b) Section 21 of that Act is amended by adding at the end thereof the following new sentence: "Effective on the date of enactment of the Arms Control and Disarmament Amendments Act of 1981, the United States Arms Control and Disarmament Agency shall be known as the United States Arms Control Agency.".

(c) Any reference to the United States Arms Control and Disarmament Agency in any statute, reorganization plan, Executive order, regulation, or other official document or proceeding shall be deemed to refer to the United States Arms Control Agency.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Wisconsin (Mr. ZABLOCKI) will be recognized for 20 minutes, and the gentleman from Michigan (Mr. BROOMFIELD) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Wisconsin (Mr. ZABLOCKI).

Mr. ZABLOCKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 3467, a bill to authorize appropriations for the Arms Control and Disarmament Agency for fiscal years 1982 and 1983.

H.R. 3467 was reported unanimously by voice vote from the Committee on Foreign Affairs on May 12, 1981. It is a modest bill. It provides for a 2-year authorization. It facilitates security clearances of personnel detailed from other Government agencies. It changes the name of the Agency to the Arms Control Agency.

For fiscal year 1982, the committee recommends an authorization of $18,268,000. This figure represents a $1.5 million increase over the administration's request. In authorizing the $1.5 million over the administration's request for fiscal year 1982, the committee intends that the additional funds should be spent in preparation for anticipated resumed arms control negotiations on TNF and SALT, in support of the Agency's verification and monitoring activities, in support

of external research in verification and nuclear nonproliferation areas, and in maintenance of the current personnel ceiling of 175 staff. All of these important activities would be severely restricted without these additional moneys. The House Foreign Affairs Committee believes that adequate funding should be provided to the Agency to continue these vital efforts.

H.R. 3467 also provides an authorization level for fiscal year 1983 of $19,893,852. The committee concluded that the most responsible way to provide for a 2-year authorization for the Agency was to apply the House Budget Committee's inflation estimate of 8.9 percent to the fiscal year 1982 authorization for the second year authorization. This action enabled the subcommittee to grant the 2-year authorization requested by the administration while keeping the second year under proper budgetary control rather than the open-ended authorization requested by the administration.

Section 3 of the bill facilitates security clearances of personnel detailed from other Government agencies to the Arms Control Agency. The amendment enables the Director of the Agency to use the results of security investigations conducted by the Departments of Defense and State. This practice is comparable to that of other national security agencies and should therefore increase the efficient conduct of the Agency while saving the American taxpayer several thousand dollars a year in unnecessary expenditures.

Section 4 of the bill changes the name of the Agency to the Arms Control Agency. The committee concluded that the inclusion of the word "disarmament" in the name of the Agency has led to the inaccurate and unfounded perception that the Agency was in some way involved in unilateral disarmament at the expense of U.S. national security. Such, of course, was never the case. In addition, Members should recall that the original House position in 1961 was to designate it as the "Arms Control Agency." Changing the name of the Agency does not in any way reduce the U.S. commitment to article 6 of the Treaty on the Non-Proliferation of Nuclear Weapons which deals with nuclear disarmament.

Mr. Speaker, the ACDA authorization for fiscal years 1982 and 1983 is a modest amount. It provides authorization for a small agency employing less than 200 people. Its responsibilities, however, are great and include such areas as: arms control negotiations; research; monitoring and verification programs; analyzing arms transfers worldwide; implementing U.S. nuclear nonproliferation policy; and providing both the Congress and the public with valuable arms control information.

As my colleagues will note, the total fiscal year 1982 authorization contained in H.R. 3467, $18,268,000 million, if fully appropriated, would only amount to 0.002 percent of the President's revised 1981 budget authority request. Since the authorizations contained in this and other legislation reported by the Committee on Foreign Affairs would be well below the President's request, the enactment of this legislation would contribute to the total effort to reduce the deficit and the present rate of inflation.

Mr. Speaker, each Member should carefully consider the ACDA authorization in the context of the current environment of heightened international tensions. Over the next 6 fiscal years, this Congress and future Congresses will be considering an unprecedented budget of $1.6 trillion in military spending. Now is the time to reinforce the role and mission of the Arms Control Agency. The bill before us, H.R. 3467, will, if enacted, enable the Arms Control Agency to carry out its responsibilities over the next 2 years in a fiscally responsible and effective manner.

In conclusion, Mr. Speaker, I would like to reemphasize that this bill is indeed a noncontroversial bill. It has enjoyed complete bipartisan support, and was reported out of the House Committee on Foreign Affairs unanimously with the full support of the minority members of the committee.

I would like to also pay tribute to the ranking member of the committee, my colleague and very good personal friend, the gentleman from Michigan (Mr. BROOMFIELD), and would like to express my appreciation to him for his support of this measure.

I urge the adoption of H.R. 3467.

Mr. BROOMFIELD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to express my appreciation to the chairman on the way he has handled this legislation through the subcommittee and the full committee. It was unanimously approved by our committee.

Mr. Speaker, as the chairman has mentioned, the Legislation we have before us today provides the Arms Control Agency with an authorization of appropriations which will allow the Agency to improve nuclear safeguard programs, support verification and monitoring activities, provide research in nuclear nonproliferation and verifiction, as well as sustain certain arms control negotiations while preparing for potential talks on the problems of Theater Nuclear Force (TNF) modernization and strategic arms control.

In particular, the legislation changes the name of the Arms Control and Disarmament Agency to the Arms Control Agency and authorizes $18,268,000 in fiscal year 1982 and $19,893,852 in fiscal year 1983 for the Agency.

The legislation also permits the Director of the Arms Control Agency, in the case of persons detailed to the Agency from other Government agencies, to use the results of security investigations conducted by the Departments of Defense and State as the basis for the Determination that the person is not a security risk. This provision allows for minor budgetary savings and expedites security investigations on personnel detailed to the Agency, since the Arms Control and Disarmament Act presently requires the Director of the Agency to arrange for full background investigations for those persons being detailed to the Agency from other Government agencies.

In conclusion, I believe that the bill contributes to our national and international security, especially in the aras of nuclear nonproliferation and arms control verification, and I urge my colleagues to support the legislation.

● Mr. DERWINSKI. Mr. Speaker, a matter of great concern to me for years has been the ability of the United States to verify Soviet compliance of the arms limitation agreements it negotiated with the Soviet Union. It was this concern over verifiability which caused me in 1977 to seek amendment of the Arms Control and Disarmament Act and firmly establish the principle of verification in our arms limitation agreements.

That amendment passed overwhelmingly and requires, among other things, that the Director of the Arms Control and Disarmament Agency (ACDA), now simply renamed in this bill the Arms Control Agency, to report on a timely basis, or upon a request by an appropriate committee of the Congress, on the number of professional Government personnel assigned on a full-time basis to arms control verification. He is also required by the amendment to report on the amount and percentage of research funds expended by ACDA for the purpose of analyzing issues relating to arms control verification.

Most importantly, the amendment also requires the Director to determine whether arms control proposals can be verified as well as whether there has been any decrease in U.S. capacity to verify an existing arms control agreement or treaty.

The Subcommittee on International Security and Scientific Affairs has thus received from ACDA periodic reports on the numbers of professional Government personnel assigned to arms control verification and the amounts and percentage of research funds spent by ACDA to analyze issues relating to verification.

Meetings with ACDA, CIA and the Department of State concerning strategic arms limitations talks, and in

particular, verification of the SALT II treaty, were also held. One of these was an executive session meeting concerning, in particular, the loss of the KH-11 reconnaisance satellite manual to the Soviets and the impact of that loss upon our ability to verify Soviet activities.

Mr. Speaker, I am pleased to report that this administration realizes the need to focus on the question of the Soviet Union's compliance with strategic arms agreements. In the past, I fear there has been a tendency to give the Soviets the benefit of the doubt or explain away Soviet actions that violated both the spirit and the letter of the SALT accords. Given what is at stake, that is a policy we cannot afford to continue.

One of the reasons I cosponsor H.R. 3467 is its provision that would increase our research on verification. I strongly favor improvement of our means to verify arms control agreements. No arms control agreement with the Soviets would be worth anything without adequate verification. Improved research in the area of verification may, among other things worthwhile, in addition to enhancing our understanding of verification, narrow the meaning of "adequate." It is important that we agree on what adequate verification is.

I support the action of the Committee on Foreign Affairs in changing the name of ACDA to the Arms Control Agency, a name more appropriate to the strategic goals of the United States. I also endorse the committee's authorization to increase the Agency's small budget to permit the possible start of Theater Nuclear Force (TNF) arms talks and SALT negotiations as well as research in the area of nuclear nonproliferation.

I am especially pleased to back the bill's provisions which enhance our efforts at verification.

● Mr. MOFFETT. Mr. Speaker, I would like to lend my strong, unequivocal support to the reauthorization of the Arms Control and Disarmament Amendments Act. The Arms Control and Disarmament Agency, established by this act in 1961, coordinates U.S. arms control policy, negotiates arms control agreements with other nations, and conducts and disseminates research related to arms control and disarmament. As one who loves peace, this simple reauthorization is a first step toward what many of us hope will be a mutual arms reduction with the Soviet Union.

The reauthorization of this act, however, has raised some questions about the administration's intention concerning arms control and national security as no funds were requested by the administration for SALT (Strategic Arms Limitation Talks) or TNF (Theatre Nuclear Forces). Furthermore, the administration requested a $1.6 million reduction for external research programs in nuclear testing and strategic arms areas and a reduction of professional personnel. In the absence of any public discussion of or proclamation on arms control and national security, are we to surmise that these budget changes represent the administration's policy on arms control? If so, I would urge that the Congress take measures so that we can obtain a better understanding of the administration's position on such a crucial matter.●

Mr. BROOMFIELD. I have no further requests for time, and yield back the balance of my time.

Mr. ZABLOCKI. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wisconsin (Mr. ZABLOCKI) that the House suspend the rules and pass the bill, H.R. 3467.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed, H.R. 3467.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

CAN CONGRESS, BY LAW, ESTABLISH WHEN LIFE BEGINS?

(Mr. DANIELSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DANIELSON. Mr. Speaker, a few days ago I received a petition in writing signed by several hundred scientists and supporting a resolution passed on April 28, 1981, by the National Academy of Scientists. The petition opposes and denies the concept that—

Present-day scientific evidence indicates a significant likelihood that actual human life exists from conception.

The petition goes on to say—

Defining the time at which the developing embryo becomes a "person" must remain a matter of moral or religious values.

The petition was signed by scientists from Harvard University, Brandeis University, Tufts University, and the Massachusetts Institute of Technology. I have not taken the time to count the number of scientists who signed the petition, but it is a modest statement to say that they were in the hundreds. A vast majority of them were in the fields of biology and related fields. A number of them were Nobel laureates. The petitions are in my office if anyone wishes to inspect them.

All of the petitions are identical except for the designation of the university with which the signatories are affiliated. I am setting forth only one; namely, the face sheet of the petition from Harvard University.

We, the undersigned scientists at Harvard University, support the resolution passed on April 28, 1981, by the National Academy of Sciences, which states:

"It is the view of the National Academy of Sciences that the statement in Chapter 101, section 1, of U.S. Senate Bill S158, 1981, cannot stand up to the scrutiny of science. This section reads 'the Congress finds that present-day scientific evidence indicates a significant likelihood that actual human life exists from conception'. This statement purports to derive its conclusions from science, but it deals with a question to which science can provide no answer. The proposal in S158 that the term 'person' shall include 'all human life' has no basis within our scientific understanding. Defining the time at which the developing embryo becomes a 'person' must remain a matter of moral or religious values."

As biologists, we agree that science cannot define the moment at which "actual human life" begins and consider that the attempt to reach a scientific resolution of this question represents a misuse and misunderstanding of science. As individuals, we feel that the reproductive rights of women guaranteed by the Supreme Court should be preserved and we deplore the current efforts of Congress to undermine these rights.

Konrad Bloch, Higgins Professor of Biochemistry, Professor of Science (Public Health), Nobel laureate; Walter Gilbert, American Cancer Society, Professor of Moleculear Biology and Chemistry, Nobel laureate; William N. Lipscomb, Abbott and James Lawrence Professor of Chemistry, Nobel laureate; Professor George Wald, Nobel laureate, Biological Laboratories, Harvard University; Mark Ptashne, Professor of Biochemistry and Molecular Biology, Department Chairman.

By coincidence I have noted that this morning's Washington Post, Monday June 8, 1981, carries a report of a Washington Post-ABC News poll reflecting that the American public, by a wide majority, supports legalized abortion and that more than two out of three Americans oppose any law that would make abortion murder. According to the poll, 40 percent approve of abortion on demand and an additional 34 percent approve of abortion in most circumstances, making a total of 74 percent.

As a further coincidence, this morning's newspaper carries a story that the American Medical Association is sending two spokesmen to oppose pending legislation through which Congress would by law establish that human life begins at conception.

ACROSS-THE-BOARD TAX CUT WILL HAVE BENEFICIAL EFFECT ON SMALL BUSINESS

(Mr. LAGOMARSINO asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. LAGOMARSINO. Mr. Speaker, a frequently overlooked aspect of the President's proposal for a 25-percent across-the-board cut in individual tax rates is the effect it will have on small business.

As pointed out in an editorial in the Carpinteria Herald, published in my district, millions of small businesses in America pay their taxes not as corporations but as individual taxpayers. In fact, the U.S. Chamber of Commerce reports that almost 90 percent of U.S. businesses paid taxes at individual rates in 1977, and thus would be directly benefited by the President's plan.

As you know, small businesses employ almost half of our work force, and are the major well-spring of innovation and new jobs in our economy. Can anyone doubt that a reduction in the taxes paid by these firms would result in a burst of new jobs, increased productivity and economic prosperity?

We must not delay any longer. America's workers, businessmen—and individual taxpayers—all need the President's tax cuts. They will spend the money a lot more wisely and productively than the Government will.

Mr. Speaker, the editorial follows:

[From the Carpinteria Herald]

DOES SMALL BUSINESS COUNT?

In the intensifying debate in Washington over President Reagan's antiinflation program, embracing both spending and tax reductions, critics of the tax plan overlook its favorable impact on small business. To these critics, millions of U.S. business proprietors and entrepreneurs are neither fish nor fowl.

To them the question is not whether the tax plan helps the economy but simply another replay of the favorite old Washington political game of using the tax system to redistribute income. All they want to debate is whether the rich will get more than the poor.

Of course, the poor pay little or no taxes under our system of graduated—or progressively higher—income tax rates. But that is beside the point, to those critics, as is the fact that fully three percent of all those interviewed in a scientific nationwide survey, when asked whether they would save or spend most of any tax savings, replied they paid no taxes at all.

Those who claim they would like to tilt tax savings toward the poor also are not interested in the fact that lower-income groups comprising the bottom 46 percent of U.S. taxpayers pay less than four percent of all income taxes.

The reductions—totaling 30 percent in individual income tax rates over three years—are designed to distribute the savings in approximately the same pattern or proportion, as people pay their personal income taxes.

Thus income groups paying the bulk of the tax will receive the largest share of the tax reductions. In turn, their savings will enable them, along with business, to save and invest in the creation of new jobs and improving productivity.

But perhaps more importantly, the poor versus rich diversion ignores the fact that millions of U.S. small businesses, the greatest source of new jobs in our economy, do not pay income taxes as corporations but pay their income taxes as individual taxpayers, and thus will be directly benefitted by the Reagan plan.

This point has been emphasized by the U.S. Chamber of Commerce, which represents more than 112,000 businesses—85 percent of them employing fewer than 100 persons.

The chamber has officially endorsed the full Reagan package, which in many respects is similar to "Let's Rebuild, America," an economic recovery program unveiled by the chamber a year ago.

Dr. Richard L. Lesher, president of the U.S. Chamber, believes that the tax reduction slated for small businesses that pay taxes as individuals, is "one of the compelling arguments" in favor of the Reagan plan for across-the-board cuts in tax rates—"and one that is totally ignored." He adds:

"The overwhelming majority of 14 million firms in America are unincorporated small businesses which are exposed to steeply graduated personal rates.

"Even many incorporated small businesses—more than 350,000—are exposed to these same rates, because they elect to pay taxes through individual shareholders."

He points out that approximately 600,000 small firms failed last year, and that the economic well-being of small enterprises is essential to a national recovery.

"We must allow entrepreneurs to retain a greater share of their earnings to recycle back into their enterprises," he said.

In testimony before the House Ways and Means Committee, Edwin S. Cohen, chairman of the chamber's taxation committee, explained that almost 90 percent of U.S. businesses taxable in 1977 paid taxes at individual rates, and thus should benefit directly from the proposed reduction in rates.

Is there any doubt that small business—particularly those struggling to grow and prosper—would use their extra money left by a cut in tax rates to expand and create jobs? History says they would. According to the House Committee on Small Business, small businesses supply half of the U.S.'s goods and services and an overwhelming majority of all newly created jobs.

THE CONDOMINIUM-COOPERATIVE CONVERSION CRISIS

(Mr. ROSENTHAL asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ROSENTHAL. Mr. Speaker, today I am introducing two bills that would address the growing American problem of condominium-cooperative housing conversions. Hundreds of thousands of Americans have been displaced from their homes by this process. Scarce mortgage dollars are consumed by middlemen and diverted away from new housing construction. Rental housing in our urban centers is fast disappearing.

I encourage my colleagues to study this legislative package.

THE CONDOMINIUM-COOPERATIVE CONVERSION CRISIS

The United States is experiencing a severe housing crisis. Affordable rental housing is fast disappearing. Home prices have escalated beyond the means of the average buyer. Interest rates are at record highs.

A leading cause of the housing crisis is the widespread and rapidly growing practice of converting rental housing to condominiums or cooperatives. The most immediate consequence of this practice is the forced displacement of thousands of elderly, low and moderate-income families from their apartments. Because conversions have severely reduced the supply of rental housing in many metropolitan areas, rents have been pushed to new highs. Housing inflation has been fueled by the prices middlemen-developers are willing to pay to purchase and convert rental buildings and the prices speculators are willing to pay to buy individual units or blocks of units. Scarce mortgage resources are being funneled into conversions instead of new housing.

Federal tax laws encourage owners of rental properties to sell to condominium and cooperative converters. At the same time, the tax laws discourage rental landlords from selling directly to tenants. These laws have the effect of increasing speculation and higher housing prices for consumers.

Legislation is needed to stem the tide of conversions, to remove the speculative fever from the conversion marketplace, to prevent the forced displacement of thousands of tenants, to decrease the loss of rental housing and to limit inflationary increases in housing prices. These goals can be achieved by first imposing a national moratorium on the involuntary conversion of rental properties to condo or co-op status and by amending the tax laws to slow down excessive speculation in rental housing and by using tax incentives to reduce the profits of middlemen converters.

CONVERSION TRENDS

The condominium and cooperative form of ownership is not a new phenomenon, but the recent trend toward conversion (i.e., taking units off the rental market for purposes of sale) shows a startling increase. Since 1970, about 366,000 units have been converted, with 71 percent of the conversions taking place since 1977. In 1970 there were only 85,000 condo units in the entire United States. Today, Chicago and its suburbs alone contain 85,000 condo units. Reliable estimates place the number of conversions in 1980 at 160,000, 10 percent higher than the 145,000 that took place in 1979. The Department of Housing and Urban Development estimates 1.1 million more rental units will be converted by 1985. Conversion filings doubled in 1980 in California, Florida, Michigan, New Jersey, and New York.

In New York City and its suburbs yearly conversions went from 13,000 to 24,000 and are projected to increase at least another 50 percent in 1981. According to HUD projections, half the population will live in condos by the end of the century. Nationwide statistics, however, mask the extent and impact of conversion in specific cities. According to testimony presented to the Commerce, Consumer, and Monetary Affairs Subcommittee, "condomania" is gobbling up

close to 50 percent of the housing market in areas of Southern California, Chicago, Boston, Philadelphia, New York and Washington, D.C. The conversion trend is broadening and becoming significant in new markets. Small towns and suburbs which previously reported virtually no conversion activity have suddenly experienced a dramatic rise in conversions. The following table lists estimates of the number of apartments converted in 18 U.S. cities from 1977 to 1981.

Estimated conversions by city, 1977–81

	Units
Atlanta	5,000
Boston and suburbs	16,000
Chicago	69,000
Dallas-Fort Worth	9,500
Denver	14,800
Detroit	5,500
Houston	24,000
Los Angeles-Orange County	34,500
Miami-Fort Lauderdale	25,000
Minneapolis-St. Paul	9,800
New York-Long Island	103,000
Philadelphia and suburbs	11,500
Phoenix	4,700
San Diego	11,000
San Francisco-Oakland	16,900
Seattle	11,000
Tampa-St. Petersburg	18,000
Washington, D.C. and suburbs	41,500

Sources: U.S. Housing Markets, April 24, 1981. Forbes magazine, Nov. 13, 1978.

According to the June 1980 HUD study, "The Conversion of Rental Housing to Condominiums and Cooperatives," conversions have been most numerous in metropolitan areas characterized by strong and growing market demand for homeownership. Conversions are not, as some believe, associated with distressed rental markets. There is no evidence that conversions are concentrated in metropolitan areas with higher than average rental vacancy rates or depressed rent levels. Furthermore, HUD found that legislated rent controls are not necessary conditions for or leading causes of conversions. Chicago, for example, which never had rent controls, leads the nation in conversion activity.

At present, conversions generally occur in luxury buildings which show a profit as rental properties. However, the trend also shows increasing conversions of moderate- and even low-income buildings and a move away from the large central city to smaller cities and suburbs. As the cream of luxury buildings disappear from the rental market, the condo converters increasingly look to the next level of building to convert.

CONSEQUENCES OF CONVERSION

Most renters simply cannot afford to follow the trend. One-half to three-quarters of tenants are unable to buy their converted apartments. Those who are forced out usually find inferior housing and higher prices awaiting them elsewhere. And once they resettle, there is no guarantee that their new apartments will not be converted out from under them again.

In spite of demonstrated hardships to tenants and growing organized opposition to conversions, developers' profits remain extraordinarily large. It is not uncommon for a converter to purchase a building for $50 million and to put the apartments on the market for $100 million after making only cosmetic improvements. The profits are so large and so immediate that federally regulated banks are eager to finance conversions, often at rates higher than the prime rate. Thrift institutions are also eager to provide financing for individual unit purchases after developers pay large fees to the thrifts for loan commitments. These fees are passed along in the form of higher prices. Large blocks of scarce mortgage resources are utilized for pure speculation. And all this, without creating a single new housing unit.

The immediate effect of a condominium conversion is the displacement of tenants who cannot afford or do not wish to purchase their unit. Many renters, especially the elderly, cannot afford to pay for apartments that often cost the original purchaser more than two to three times their monthly rent. In its 1980 study, HUD found that the monthly cost of owning a condominium unit (including mortgage interest, property tax payments, and maintenance fees) was higher by 36 percent over the previous monthly rent. The median increase, according to HUD, in monthly housing costs for buyers coming from other housing is 62 percent. Other studies in specific communities have found increases of over 50 percent. These cost increases impact most severely on the fixed-income, elderly and on those with low or moderate incomes.

The inflationary impact of condominium and cooperative conversion on housing costs can be readily seen by comparing the rental costs of a unit with the post-conversion cost of the same unit in two converted buildings studied by the Commerce, Consumer, and Monetary Affairs Subcommittee:

"(i) A two bedroom apartment in Plaza 400 (a 628-unit, 40-story luxury building at First Avenue and 56th Street in Manhattan), which rented for $938 per month before conversion, costs $1,657 after the conversion, before tax benefits are calculated.

"(ii) Differences in costs between renting and owning at the Promenade Apartments in Bethesda, Maryland indicate even greater differentials. The building was purchased by American Invsco for approximately $49 million and the projected sellout has been estimated between $95 and $100 million. Prior to conversion, a typical two-bedroom apartment at the Promenade rented for $610 per month. The total monthly cost of owning this same apartment after conversion to cooperative status would be $1,773 on a pre-tax basis, assuming an 85 percent 30-year mortgage at a sale price of $127,000 at current market rates."

The higher costs of converted units adversely affect thousands of Americans who do not wish to or who cannot afford to purchase their apartments and who do not need the tax shelter that condominium ownership brings.

The magnitude of the displacement problem is enormous. HUD found that about two-thirds of prior tenants move out following a conversion. According to HUD:

"Some conversions require people with low or moderate incomes to move because they cannot afford to buy their apartments. About 42 percent of those who moved out of converted buildings had incomes which, according to generally accepted criteria, were too low to have permitted them to buy their converted units; 47 percent of all former residents say they did not purchase because they believed they could not afford to do so."

Statistics, however, do not begin to tell of the stark human tragedy facing elderly people forced into moving by a conversion. The Subcommittee on Commerce, Consumer, and Monetary Affairs heard dramatic and poignant testimony of case after case of physical and psychological trauma, even suicide, brought about by the forced relocation caused by a conversion. One man said it was the worst experience in his life since he was forced from his home by Nazi Germany.

A University of Miami study reported in the New York Times of May 31, 1981, found that elderly residents of rental apartments suffer serious emotional and physical disturbance when their apartment buildings are converted to condos. These findings are similar to a study by the National Council of Senior Citizens of elderly, low- and moderate-income tenants in Washington, D.C. which found that the bulk of the displaced tenants found it harder to see their families, go to church, and visit their doctors after moving. Close to half of the respondents experienced ill health including depression, mental distress, and great anxiety. Perhaps most important, displaced tenants often find it difficult to find new housing, and the apartments they do find usually charge higher rents. HUD found that half of all former residents had difficulty in finding new housing.

The second major consequence of condominium conversion is the depletion of rental housing stock and subsequent rent increases in remaining apartments. Most conversions occur in areas with already low rates of rental vacancy. The national rental vacancy rate is 4.8 percent, but in some areas it is substantially lower. For example, in New York City it is 0.5 percent; in Minneapolis-St. Paul it is 3.9 percent; in Los Angeles-Orange County it is 2.1 percent; in Seattle it is 3.5 percent; in Washington, D.C. it is 2 percent; in Denver it is 2 to 3 percent; in San Francisco it is 2 to 3 percent; and, in Atlanta it is 2.7 percent. These low vacancy rates mean that comparable rental apartments are virtually unobtainable for those forced from their homes by conversions.

Because conversions decrease the supply of rental units without decreasing the demand for them, rents in continuing rental buildings tend to rise. At the same time, today's reduced rate of home building and continued high prices for housing have forced more people into the rental market. The result is that condominium conversions force rental vacancy rates down to critically low levels. Condominium conversions clearly create a vicious cycle in the rental housing market of a city. They occur where a shortage of adequate rental units already exists, thus panicking many people into buying converted units. This reduces the availability of rental housing even further, and drives up the rents in remaining apartments. The combination of lower vacancy rates and higher rents then prompts another round of "condomania." In short, the demand for many converted condominiums is partially artificial—created by shortages that have been created by developers.

FEDERAL CONCERN

In October of 1980, Congress enacted Title VI of the Housing and Community Development Act which expressed the,

"Sense of Congress that lending by federal insured lending institutions for the conversion of rental housing to condominium and cooperative housing should be discouraged where there are adverse impacts on housing opportunities of the low and moderate income and elderly and handicapped tenants involved."

Section 602 of the Act states that:

"There is a federal involvement with the cooperative and condominium housing markets through the operations of federal tax . . . laws, through the operation of fed-

erally chartered and insured financial institutions and through other federal activities; that the creation of many condominiums and cooperatives is undertaken by entities operating on an interstate basis."

During floor debate on the legislation, Congressman Henry Reuss of Wisconsin, then Chairman of the House Banking Committee stated that:

"The Nation's scarce pool of credit for new capital investment, small business, farmers, and particularly new housing, is sufficiently strained so that it makes no sense to encourage its use for the purpose of evicting unwilling tenants, further lowering the Nation's short supply of rental housing, and raising housing costs in the building involved and throughout the area. The federal regulatory agencies . . . aware of the congressional expression, should present that point of view on the same basis that they all discourage and encourage various undesirable and desirable loans in many other areas today."

The Internal Revenue Code also has a remarkable impact in determining the types and availability of housing in this country. In the postwar period, the array of deductions and deferrals favoring housing gave the middle class effective incentives to become homeowners and helped to stimulate the construction of new, moderately priced homes. Today, the tax treatment of housing operates as a hidden regressive subsidy, one that aggravates the displacement of apartment dwellers, often enriching well-to-do converters, landlords and speculators.

Federal tax laws have created a new class of housing middlemen by encouraging owners of rental buildings to sell their properties to condominium and cooperative converters. The profits from such a sale are taxed at relatively low capital gains rates. On the other hand, the profits from maintaining the building as a rental property or from selling the building to tenants, are taxed at a much higher ordinary income rate.

As opposed to the many intractable aspects of the nation's current housing difficulties, counter-productive tax deductions are one problem that Congress can readily redress. A simple remedy for the destructive interaction of current tax deductions with our urban predicament is to alter the circumstances under which mortgage interest and real estate taxes can be deducted and thereby provide disincentives for inflationary conversions.

SPECULATION AND INFLATION

The staff of the Subcommittee on Commerce, Consumer, and Monetary Affairs has conducted an extensive examination of the impact of federal laws and federal agency programs on the conversion trend. Some of its investigative findings concerning speculation and inflation include:

(1) Large numbers of condominium and cooperative units in converted buildings are purchased by investor-speculators at the time of conversion.

The Department of Housing and Urban Development in its condominium study found that a total of 37 percent of all condominium and cooperative units are not owner-occupied with 19 percent in the hands of outside investors and 18 percent in the hands of the converting corporation. Other studies have estimated investor-speculator ownership at 20 to 30 percent in Chicago and at 50 percent in areas such as Florida.

(2) There is substantial evidence that speculator-purchases of condominium housing units (a) contribute materially to housing inflation; (b) undermine the public policy purpose of the Federal Home Loan Bank System, which is designed to finance economical homeownership; and (c) conflict with Section 603 of the Housing and Community Development Act of 1980, which seeks to discourage conversions that raise housing costs to and displace moderate- and low-income families and other tenants.

Speculator purchases of condominium units are a major contributor to inflation because (i) the large pool of speculator dollars available to purchase condominiums upon conversion, creates a demand for units that would otherwise not be available; (ii) the accelerated turnover rate of condos owned by speculators and motivated by a desire for quick profits, bids up the cost of these units; and (iii) speculator loans are made at higher interest rates, often involve fees or points to obtain such financing, and consequently raise the costs of units.

(3) Regulations and Policies of the Federal Home Loan Bank Board, the agencies operating the secondary mortgage markets and the private mortgage insurance companies designed to restrain speculation in the condominium marketplace and assure truthfulness on mortgage loan applications, have been systematically violated in the case of mortgage loan applications for units in many converted buildings.

False statements of intention to occupy a premise and limits on speculator-owned apartments also violate some state laws, the lending policies of many savings and loan associations and the practices of private mortgage insurance companies.

(4) Speculative purchases of converted condominium and cooperative units undermine the public policy purposes of the federal and state thrift banking system by absorbing large amounts of mortgage money during periods of high interest rates and limited mortgage credit.

The basic purpose of the federal and state thrift system (savings and loan associations and similar financial institutions) is to finance the purchase of housing to be used as a principal place of residence for the purchaser. It was not designed to provide mortgage debt for speculator-investors.

LEGISLATION NEEDED

If the nation's housing crisis is to be eased, one of the first steps must be to halt the loss of affordable rental housing resulting from condo and co-op conversion. The Federal Government can take steps to prevent the forced displacement of thousands of tenants, halt the destruction of the rental market, slow down speculation in housing and reduce inflationary increases in housing prices. Legislation is necessary.

A number of cities and states have taken steps to deal locally and temporarily with the problems caused by condominium conversion. Legislation to assure the quality of conversions and protect condominium purchasers from fraud and other abuses has been passed in several states. A few localities have attempted to restrict conversions. In New York City and San Francisco conversions are permitted only when 35 percent or more of the tenants in a project agree to purchase their units. Other localities restrict conversions when the rental vacancy rate falls below a specified percentage. New York State prohibits the eviction of elderly and handicapped tenants who decline to purchase their converted unit if they meet certain eligibility requirements. The building is allowed to convert, but the elderly tenants are allowed to stay on as renters. Other areas also protect elderly tenants from eviction. But even non-eviction plans fail to protect the next generation of renters.

Yet these local regulations are the exception rather than the rule. Although they do provide some protection to tenants and some restrictions on conversions, very few of them adequately deal with the crisis at hand. Vacancy rates for rentals continue to decline, rents continue to soar, and conversions continue unabated. Even though "condomania" is spreading across the country few areas have laws adequate to deal with it. By the time our cities and states are prepared to act, thousands more units will have been converted and thousands of tenants displaced. Once an apartment goes condo it is effectively lost to the rental market forever.

The Federal Government has a responsibility to deal with the conversion crisis because federal laws and practice determine the economics of the housing marketplace. Moreover, our national housing policy commits the Government to insuring a decent home and suitable living environment for every American family. Federal leadership in regulating the conversion process in order to preserve and create new rental opportunities clearly has ample policy precedent. Since local and state action has been minimal and inadequate, national legislation must be passed now to halt displacement and prevent the demise of the rental housing industry.

Two legislative approaches are needed—a national moratorium on conversions and amendments to the tax laws to slow down excessive speculation:

1. The Residential Rental Unit Conversion Moratorium Act of 1981

The 1981 Residential Rental Unit Conversion Moratorium Act of 1981 is an essential first step in protecting displaced tenants and preserving rental housing. The bill, if enacted, would cost the government virtually nothing, yet it would go a long way toward alleviating the conversion crisis:

Title I of the legislation would effectively prohibit forced condominium and cooperative conversion for a 2-year period. By placing restrictions on loans from federally chartered institutions or made with federally insured funds and through other means, this bill would provide the nation with the time necessary to study the crisis in rental housing while preserving the existing rental stock. Without a moratorium, conversions will continue at such a pace that in many communities there will be few, if any, rental buildings to protect. It may already be too late for cities like Chicago and Washington, D.C. Without a moratorium, developers would be encouraged to convert quickly before the administration and Congress could act. (In the months prior to enactment of condominium conversion legislation, many units are normally converted to condominiums).

A moratorium is not without precedent. Over 15 cities including Washington, D.C., Philadelphia, San Francisco, Seattle, Palo Alto, Skokie, and San Jose—have enacted moratoria on conversions while they considered legislation. The moratorium would include cooperative housing—currently popular in a few cities—because restrictions on condominiums alone might cause developers to convert to co-op instead. The construction of new condominiums and cooperatives will in no way be affected by the 2-year ban. Nor would the sale and conversion of a

rental property to a bona fide tenants organization. This exception allows for self-help co-oping, where tenants convert the building and no middlemen are involved.

Title II of the bill establishes a Presidential Commission on Problems Relating to Condominium-Cooperative Conversions. The Commission will have 1 year to study the issue and report its findings and recommendations to the Congress. Congress and the President would then be in a position in which to pass regulations and legislation.

The need for an independent commission becomes apparent when one examines HUD's efforts (or lack thereof) with regard to conversions. Although the 1980 HUD study made clear that serious problems exist, it made no recommendations for remedying them. Clearly, the situation must be studied by an independent group of experts who are prepared to offer remedies for the problems disclosed.

2. The Condominium-Cooperative Conversion Tax Adjustment Act of 1981

This bill would reverse the tax incentives which now encourage landlords to sell their rental buildings to middlemen developers for the purposes of conversion. It would also reverse the present provisions of the tax code which discourage direct sales to tenant co-ops or to individual tenants. If conversions must proceed, there is every reason to eliminate steep increases in price necessarily associated with middlemen. It has been shown that given the appropriate tax incentives, conversions need not be synonymous with steep increases in prices.

Under current law, if the owner of a rental building sells individual units in his building to his tenants, the profits are taxed at ordinary income rates. A sale of the building to others (including converters and developers) is taxed at capital gains rates. Accordingly, the current tax code encourages landlords to sell to middleman converters rather than to tenants directly. Sales to such middlemen converters inevitably increase costs of apartments substantially above the prices of direct sales to tenants.

The "Condominium-Cooperative Conversion Tax Adjustment Act of 1981" would discourage the sale of rental properties to middlemen coverters by changing the law so that the gain from such a sale would be taxed as ordinary income if the building was converted anytime during a 3-year period after the sale. The bill would also tax at ordinary income rates the profits from sales of individual units in buildings which were so converted.

Conversely, this section would reverse current law by providing favorable capital gains rates for sales by a rental landlord to a tenant cooperative or directly to tenants living in the building. At present, landlords normally have to pay ordinary income rates if they convert the property to condo or co-op and sell units to tenants directly.

Because of the present tax law, it is most common for landlords to sell conversion property to a converter, rather than convert it themselves. The landlord often believes he is forced to sell to a converter in order to have his profit taxed as a capital gain, when he would prefer to sell directly to tenants at lower prices and over a longer period of time. For this reason, the tax laws have the practical effect of imposing a middleman—the converter—in the conversion process and thereby further increasing the price of condominium properties.

The Condominium-Cooperative Conversion Tax Adjustment Act of 1981 would also cut down on speculation in converted condo and co-op units by denying individual owners of three or more condo or co-op units the right to take federal tax deductions in excess of income on the units.

The purpose of this part of the bill is to increase revenue and to cut down on speculation in converted condo and co-op units. By denying deductions in excess of gross income for an individual's third or fourth apartment, the tax benefit motives activating many housing speculators would be obviated. This will result in cooling the housing market in converted units and lower prices to make housing more affordable.

The bill contains several other provisions designed to halt speculation in converted apartments. Housing should not be treated as a speculative commodity for persons seeking tax shelters.

The legislation to be introduced will not alone solve the nation's housing crisis. But it is an important first step in that direction.

THE DEFENSE BUDGET: WHAT IS THE OBJECTIVE? IS IT BLOATED OR NOT?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kansas (Mr. GLICKMAN) is recognized for 60 minutes.

GENERAL LEAVE

Mr. GLICKMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. GLICKMAN. Mr. Speaker, I take the floor today in a special order to discuss the defense budget of the United States in a general manner. I am one Member who has voted for all the defense authorization and appropriation bills. I am not on any defense committee, and I, as well as most Members of this House, are generally perceived as people who want a strong defense, who want an effective defense, and who also have been concerned that some very important parts of our defense system have deteriorated that should have been improved over the last several years.

But we are also concerned that increases in defense outlays, while they are long overdue, must be accompanied by an explicit strategy along with these expenditures. We are also concerned that for the American people, since we do not have any effective or waste-free military force structure, the consensus of many for that structure will erode very rapidly.

The budget which we adopted earlier this year calls for a dramatic increase in defense spending. The budget resolution approved by the House calls for $226.3 billion in budget authority and $188 billion in outlays for fiscal year 1982 in the defense function. That compares with about $180 billion in budget authority and $162 billion in outlays during this fiscal year.

While every other function in the Federal budget is being funded less in real terms in 1982 than fiscal 1981, the defense budget will increase by over 10 percent this year in terms of budget authority and over 6 percent in terms of outlays. From fiscal 1980 to fiscal 1982, authority will have increased by 50 percent and outlays by nearly 40 percent.

As our Committee on the Budget noted in its report on the first concurrent budget resolution, this amounts to the most rapid peacetime increase in the defense budget in our history.

Mr. Speaker, I would first yield to the chairman of the House Committee on the Budget, our distinguished colleague from Oklahoma (Mr. JONES).

Mr. JONES of Oklahoma. I thank the gentleman from Kansas (Mr. GLICKMAN) for yielding. At the outset I want to commend the gentleman from Kansas (Mr. GLICKMAN) for taking this special order to bring this very important issue to the American people.

Mr. Speaker, true military strength is as difficult to define as it is essential to maintain. That is the issue we are discussing here today. All of us involved in this debate are dedicated to a U.S. defense force second to none.

But there is an unfortunate tendency to confuse military strength with military spending. We must spend large amounts of money on our military. There is no debate about that.

But money alone is not enough. High quality, well-trained officers, noncommissioned officers, and enlisted men are absolutely essential. Without good men and women with solid morale and motivation, the best of weapons will not be good enough.

History is full of examples of paper strength. Perhaps the French Army of World War II is the best recent example. Military experts confidently predicted that the French, with their impregnable Maginot Line, would be more than a match for the Germans.

But the French were ready for the wrong war and after the initial shock of defeat, officers and men, en masse, simply quit.

Our military must be strong, not fat. It must be innovative, not dependent on infusions of money.

If our military fails to use the record setting increases in defense spending efficiently and effectively, two dangerous developments will follow.

First, we will have the wrong weapons in the hands of the wrong troops with the wrong motivation. We will have an army of clerks, not an army of fighters.

Second, the public and the Congress will rise in anger and cut back spending to levels which are not adequate.

To prevent such disasters, all of us have a duty to do all we can to make sure this money is well spent. We

should listen to one of the finest experts on the elimination of waste, fraud, and abuse the U.S. Government has ever been fortunate enough to have serve. Elmer B. Staats, then Comptroller General, on January 21, 1981, cited to the Secretary of Defense 15 areas in which he estimated that $13 billion could be saved.

Here is Mr. Staats' list of recommendations:

Consolidation of military base support activities.—Almost 550,000 personnel are assigned to the large variety of essential house-keeping and support tasks needed to keep Department of Defense installations in daily operating condition. These services cost an estimated $12 billion in fiscal year 1978. Through consolidation of some of the support activities for those installations in the same geographic area GAO estimated several hundred million dollars could be saved.

Consolidation of supply activities.—By further consolidating supply activities under the Defense Supply Agency, annual savings of up to $100 million could be realized.

Single management of aircraft report maintenance.—The Department of Defense has 15 in-house depots for aircraft maintenance. GAO study showed gross in-house capacity exceeds needs by as much as 130 percent. If through consolidation 10 percent of current costs could be reduced, savings would exceed $200 million annually.

Single manager concept to transportation activities.—Economies could be realized through further consolidation of the three existing transportation agencies into a Unified Traffic Management Command under the Joints Chiefs of Staff.

More effective use of wholesale and retail inventories.—By establishing visibility and interchangeability of stocks held under both wholesale and retail activities better use could be made of costs, and inventories reduced.

Early consideration of life cycle logistics and backup equipment requirements in the weapon planning cycle.—Through early consideration of logistical and backup requirements GAO estimates hundreds of millions of dollars could be saved.

Weapon system funding should be consistent and better managed.—Savings of from 10-30 percent in unit costs could result through better management and consistent funding patterns.

Multiyear contracting.—Through the use of multiyear contracting procedures, savings of over a billion dollars could be saved on six systems.

Lower cost alternatives should be examined prior to approval of new systems.—Significant savings would be possible if the Department of Defense would look at less sophisticated and less costly systems.

Elimination of impediments to reducing costs of weapon system.—Major effects on costs of weapon system have resulted from: low rate of production; absence of price competition; lack of contractor motivation to reduce costs; impact of socioeconomic programs, red tape, and Government controls; reduced research; and lessening productivity.

Military pay reforms.—Implementing military pay reforms would result in more efficient pay, reduced turnover, and improved military morale, and have significant cost impacts.

Military retirement system.—Changes are needed in the military retirement system as concerns actuarial methods and funding provisions that reflect the full cost of accruing retirement benefits, and the 20 year retirement.

Evaluation of the Enlisted Military Force Corporation for the future.—Through evaluation of future enlisted needs, the DOD could avoid the current "band-aid" solutions to long-term problems.

Use of more civilians in morale, welfare and recreation activities and reduction in costs of military exchange system.—Through efforts to use more civilians in lieu of full time military, and to eliminate the exchanges helping to fund other activities savings could be realized.

Reserve Forces Manpower Management.—Savings could be realized by DOD planning more emphasis on obtaining qualified personnel for the reserves and improving reserve training.

Lest this be seen as a partisan issue, I would like also to submit for the RECORD a summary of a special report published by the Republican Study Committee on August 22, 1980, which cited a potential savings of $17 billion in waste in the Defense Department.

REPUBLICAN STUDY COMMITTEE

The Special Report published by the Republican Study Committee on August 22, 1980 cited 107 GAO findings and recommendations that identified $34.5 billion in unnecessary expenditures government-wide.

Those areas applicable to the Department of Defense are:

Savings from Air Force field components repair services: $44,000,000. Source: GAO, "Centralizing Air Force Aircraft Component Repair in the Field Can Provide Significant Savings," March 28, 1979, No. LCD-79-409.

CHAMPUS claims, erroneously paid (FY 1976): $12,000,000. Source: GAO, "Letter to Harold Brown, Secretary of Defense," March 16, 1979. HRD-79-58.

Savings on Department of Defense foreign military sales (reduction in the FY 1978 arms sales ceiling had the correct sales figure been known): $420,000,000. Source: GAO, "The Defense Department's Systems of Accounting for the Value of Foreign Military Sales Need Improvement," March 16, 1979, No. FGMSD-79-21.

Government interest reductions as a result of better management of DOD cash holdings overseas: $1,000,000 annually. Source: GAO, "Weaknesses Persist in Defense Overseas Cash Management Program." January 10, 1979, No. FGMSD-79-6.

Savings in direct labor hours that could be realized by using serviceable long supply or excess available parts in lieu of repairing parts in two Army depots: $18,000,000. Source: GAO, "The Army Should Use Available Serviceable Parts To Avoid Repairs," January 31, 1979, No. LCD-39-205.

Savings through reductions in flying hour programs—flying for training and transportation—of the Army, Navy, and Air Force (accomplished by substituting in-flight simulators in lieu of airtime, etc.): $124,000,000. Source; GAO, "The Services Can Further Refine Management of Flying Hour Programs," March 27, 1979, No. LCD-79-401.

Savings by instituting the GAO alternative to the present method of paying clothing allowances to military personnel: $10,000,000. Source: GAO, "The Department of Defense Should Adopt New Clothing Allowances," April 10, 1979, No. FPCD-79-12.

Increased costs due to the Army's retaining funded personnel spaces after support functions employing them were transferred to other services, which gained new personnel spaces for the increased workloads, in the Pacific: $25,000,000. Source: GAO, "Evaluation of Defense's Comments on a Critical Report: Were Transfers of Army Pacific Support Functions Mismanaged?" April 23, 1979, No. FPCD-79-50.

Savings from the two major service exchange organizations, the Army and Air Force Exchange Services, through consideration of the two systems: $1,488,000 annually. Source: GAO, "Letter to Rep. Jamie L. Whitten," May 22, 1979, No. FPCD-99-60.

Savings from operation of the storage and distribution of bulk petroleum products by the Defense Logistics Agency through better transportation practices with respect to Luke Air Force Base, Castle Air Force Base, and Lemoore Naval Air Station: $202,000. Source: GAO, "Letter to Harold Brown, Secretary of Defense," June 14, 1979, No. LCD-79-218.

Costs to the U.S. Government not recovered, while required by law to be recovered, because the cost of using government-owned assets on sales from inventory has not been assessed for foreign countries: $10,000,000. Source: GAO, "Efforts to Charge for Using Government-Owned Assets for Foreign Military Sales: Marked Improvements But Additional Action Needed," June 1, 1979, No. FGMSD-79-36.

Erroneous payments to reservists and guardsmen for drills they did not attend: $744,000. Source: GAO, "Army Guard and Reserve Pay and Personnel Systems Are Unreliable and Susceptible to Waste and Abuse," January 28, 1980, No. FGMSD-80-6.

Savings from consolidation of undergraduate helicopter pilot training (Army and Navy): $63,000,000. Source: GAO, "Letter Report to the Honorable Bill Chappell, U.S. House of Representatives," January 31, 1980, No. FPCD-80-37.

Additional costs to the taxpayers from guaranteed minimum annuities for disabled Air Force civilian retirees: $54,000,000. Source: GAO, "Minimum Benefit Provision of the Civil Service Disability Retirement Program Should Be Changed," November 30, 1979, No. FPCD-80-26.

Savings that could be realized through the use of housing costs in the United States as a basis for setting station allowances abroad. These allowances often exceed the amount that would actually be due since they are related to rank rather than market price: $150,000,000. Source: GAO, "Military Overseas Housing Allowances Should Be More Realistic," March 5, 1980, NO. FPCD-80-33.

Underused Navy intermediate missile maintenance capacity at Concord Naval Weapons Station and Seal Beach Naval Weapons Station in California: $1,700,000. Source: GAO, "Navy Missile Maintenance Can Be Done Cheaper By Improving Productivity," April 9, 1980, No. LCD-80-43.

Savings that could be realized from the consolidation of the Cincinnati and Dayton Defense Contract Administration Services Management Areas: $2,400,000. source: GAO, "Letter Report to Congressman Gradison," April 14, 1980, No. LCD 80-50.

Additional costs due to delays in definitizing letter contracts by the Army and Navy: $3,210,000. Source: GAO, "Letter Report to Secretary Harold Brown, Department of Defense," November 16, 1979, No. PSAD-80-10.

Savings that could be realized through improving the logistics factor in modernizing

U.S. Air Reserve forces: $278,700,000. Source: GAO, "Modernizing the Air Reserve Forces—More Emphasis on Logistics Support Needed," November 6, 1979, No. LCD-80-11.

Savings that could be realized if the Air Force installed one, rather than two, computer systems at about 105 bases to perform administrative and operating functions: $1,000,000,000. Source: GAO, "The Air Force Should Cancel Plans to Acquire Two Computer Systems at Most Bases," October 26, 1979, No. FGMSD-80-15.

Savings from the discontinuance of a test-related basic allowance for subsistence payments to three military installations since the tests have been completed: $800,000 (annually). Source: GAO, "Letter Report to Secretary Harold Brown, Department of Defense, December 5, 1979, No. FPCD-80-18.

Elimination of unneeded material handling equipment, establishment of reasonable equipment allowances and efficient use of needed equipment by the Navy: $5,300,000. Source: GAO, "Navy Material Handling Equipment Costs Can Be Reduced," January 30, 1980, No. LCD-80-31.

Savings that could be realized through standardization of military aircraft ground service equipment: $300,000,000. Source: GAO, "Increased Standardization Would Reduce Costs of Ground Support Equipment for Military Aircraft," February 7, 1980, No. LCD-80-30.

Monies that have been determined that could have been saved through improved management of Navy shipbuilding contracts (three shipbuilding contracts) cost of constructive changes: $774,000,000. Source: GAO, "Better Navy Management of Shipbuilding Contracts Could Save Millions of Dollars," January 10, 1980, No. PSAD-80-18.

Reduction in strategic airlift crews if only active duty personnel were reduced: $105,000,000 annually. Source: GAO, "The Air Force Can Reduce Its Stated Requirements for Strategic Airlift Crews," September 19, 1979, No. LCD-79-411.

Savings that could be realized through better inventory management at two Air Force air logistics centers: $50,300,000. Source: GAO, "DOD Can Save Millions of Dollars by Improving the Management of Air Force Inventories," October 25, 1979, No. LCD-80-6.

Increased costs of government due to DOD awarding questionable split award contracts and questionable survivor awards in several cases: $2,800,000. Source: GAO, "Letter Report to Secretary Harold Brown, Department of Defense," August 2, 1979, No. PSAD-79-96.

Savings that could be realized through the consolidation of the Finance and Accounting Centers of the Military Traffic Management Command: $322,970 annually. Source: GAO, "Letter Report to Honorable Ron Dellums," August 30, 1979, No. LCD-79-331.

Additional cost to the federal government due to the overstatement of a production contract on the F-15 and TE-15 aircraft: $2,700,000. Source: GAO, "Letter Report to Secretary of Defense Harold Brown," October 24, 1979, No. PSAD-80-4.

Potential savings by streamlining Grumman's computer operations supporting Navy contracts: $335,000 annually. Source: GAO, "Letter Report to Secretary of the Navy," October 5, 1979, No. PSAD-79-111.

Possible cost reductions in the Navy's contract for patrol combatant hydrofoil missile ships: $960,815. Source: GAO, "Letter Report to Secretary of Defense Harold Brown," October 18, 1979, No. PSAD-80-3.

Savings the Army could realize by removing certain limitations on the application of serviceable material returns to past demands: at least $10,000,000. Source: GAO, "Letter Report to Secretary of Defense Harold Brown," May 15, 1980, No. LCD-80-64.

Potential savings in the acquisition of major Air Force weapons systems through increased implementation of the Air Force's Military Standard 1567 work measurement to enhance contractors' productivity and cost control: $1,000,000,000. Source: GAO, "Military Standard on Work Measurement—A Way to Control Cost and Increase Productivity," June 3, 1980, No. PSAD-80-46.

Reduction of the Army's fiscal year 1981 ammunition budget request due to premature procurement (materials not fully tested and refined): $87,500,000. Source: GAO, "Adjustments Recommended in Army's Ammunition Procurement and Modernization Programs," June 12, 1980, No. LCD-80-62.

Savings if military exchange systems did not have to generate profits for morale, welfare and recreation activities other than providing goods and services to military personnel (fiscal year 1978): $33,100,000. Source: GAO, "Military Exchange Systems: How They Can Provide More Benefits for Military Personnel," July 18, 1980, No. FPCD-80-50.

Potential savings that could be realized through faster processing of military discharges for adverse reasons: $41,500,000. Source: GAO, "Letter Report to Secretary of Defense Harold Brown," July 3, 1980, No. FPCD-80-57.

Savings that could be realized through the limitation of the number of noncombat aircraft to those that can be adequately justified: $6,863,000,000. Source: GAO, "The Congress Should Require Better Justifications of Aircraft for Noncombat Missions," July 22, 1980, No. LCD-80-83.

Savings through the standardization of Department of Defense software computer systems: $12,870,000. Source: GAO, "DOD Automated Materials Handling Systems—Need to Standardize and Follow GSA ADPE Approval Process," April 24, 1980, No. LCD-80-49.

Increased government costs due to fraud, inadequate accounting and procedural control in the Army's Military District of Washington's Finance and Accounting Office: $531,258,000. Source: GAO, "Major Deficiencies in Army's Washington, D.C., Finance and Accounting Operation," June 5, 1980, No. FGMSD-80-53.

Army material that could not be accounted for in a review of 118 company sized units: $29,500,000, Source: GAO, "Controls Over Property in Custody of Military Units Can Be Improved," June 6, 1980, No. LCD-80-66.

Savings that could be realized through reductions in overlap of Marine Corps logistics functions and greater reliance on other defense integrated logistics managers: $7,500,000. Source: GAO, "Eliminating Marine Corps Logistics Overlap Saves Millions; Futher Savings Possible," June 30, 1980, No. LCD-80-74.

Savings that could have been realized in the first quarter of fiscal year 1979 through improved inventory management of the Defense Logistics Agency's medical supply system: $10,000,000. Source: GAO, "Better Controls and Data Needed to Distribute Defense Medical Supplies," June 15, 1980, No. LCD-80-77.

Potential savings in the Navy's F/A-18 operational and support costs through the use of multiport avionics test equipment, consolidation of avionics repair facilities, buying of intitial spares concurrently with aircraft installed units, making more effective use of pilot simulators, consolidation of F/A-18 squadrons into larger size units, use of the reliability centered maintenance concept to determine the need for depot maintenance and pipeline aircraft, and elimination of unneeded facilities improvements: $4,050,000,000+. Source: GAO, "Operational and Support Costs of the Navy's F/A-18 Can Be Substantially Reduced," June 6, 1980, LCD-80-65.

Possible reductions in the Navy's ship overhaul costs: $5,700,000+. Source: GAO, "Navy Has Opportunities to Reduce Ship Overhaul Costs," June 17, 1980, No. LCD-80-70.

Savings through subtituting civilians for military personnel assigned to morale, welfare, and recreational activities in the armed services: $57,000,000. Source: GAO, "Military Personnel Cuts Have Not Impaired Most Morale, Welfare and Recreation Activities," July 11, 1979, No. FPCD-79-54.

In closing, let me say that what we seek is not to cut national defense. What we seek to do is to insure that our military is fit, not bloated; firm not flabby; that it be ready to carry out combat missions, not just parade ground displays.

Our military must have the support of Americans, and it must have the caring attention of America.

That is what we seek.

Mr. GLICKMAN. I appreciate my colleague's comments.

□ 1315

Mr. SKELTON. Mr. Speaker, will the gentleman yield?

Mr. GLICKMAN. I yield now to my distinguished colleague, the gentleman from Missouri, and a member of the Armed Services Committee.

Mr. SKELTON. Mr. Speaker, I want to thank my colleague the gentleman from Kansas, for this opportunity to address this subject.

In the next few years, Congress has a golden opportunity to make up for past years of neglect and to take steps that will truly strengthen our national defense. There exists today a broad national bipartisan consensus for a program that will give us an effective national defense. However, this consensus is a fragile one. We in Congress risk seeing it eroded if we adopt a massive defense spending program which fails to significantly improve our Nation's security.

It is true that we must spend more money on defense, but we must spend those additional funds wisely. We need a defense program that can be sustained and supported both economically and politically. A dramatic defense spending binge, without eliminating waste, inefficiency and those items not necessary for legitimate national defense needs, will inevitably lead to a backlash against all defense spending

and ultimately leave us militarily weaker.

To avoid this backlash, we in Congress who support a strong national defense must work with the administration to root out waste and inefficiency in defense programs. We must conduct vigorous oversight of programs with cost overruns, particularly those with a past history of exceeding budgetary estimates. Moreover, we must base our future defense planning on realistic budgetary and inflation estimates so that we can avoid automatic cost overruns and production cutbacks. We must accept the fact that inflation in the defense sector will continue to be high in the immediate future, regardless of what happens to the economy as a whole. Reduced inventories, the shortage of skilled labor and the lack of specialized defense subcontractors are unique inflationary forces which influence the defense sector and are more than a few years away from solution.

We can all cite stories about specific instances of Pentagon waste and inefficiency. I do not have anything new to add to this list. I would like my colleagues to ponder the following list. It comes from Leonard Sullivan, Jr., former Assistant Secretary of Defense for Program Analysis and Evaluation. He calls it 20 easy ways that have been used before to help kill a consensus in favor of increased defense spending. The details of this list can be debated, but those of us who support a national defense program which is sensible and sustainable and which adds to our security would do well to keep them in mind.

Demand only sophisticated weapons (like $3.5-billion carriers and $1.5-billion cruisers) instead of increasing numbers of operational weapons and units as well.

Procure only the latest immature glamour weapons instead of continuing product improvement and life extension of more reliable, operationally mature systems for active and reserve inventories.

Focus on our active forces and neglect our disintegrating reserve structure and industrial mobilization capabilities.

Perpetuate the farce that we can solve warfighting shortfalls with technological magic and mythical force multipliers.

Continue to seek a disproportionate share of the NATO and Northeast Asia security burdens.

Continue to prevent closure of inefficient bases, while artificially propping up civilian Wage Board pay scales.

Keep overruling the Executive Branch by supporting procurements judged unnecessary by Pentagon management.

Continue usurping executive responsibilities by micro-managing Defense programs through outmoded reprograming thresholds and termination clauses; by denying management reserves, and by annually revising previous decisions.

Proliferate impractical and costly procurement and accounting practices unrelated to professional management, while discouraging multiyear procurements and stable outyear planning projections.

Continue to avoid making procurements abroad to protect non-competitive U.S. industries, while also continuing to legislate against essential industrial capital investment.

Start bidding up wages and material costs so that much of the increase in appropriations is consumed in sectoral inflation.

Claim that all those learning curves and unit costs made worse by low production rates do not improve with increased production rates.

Continue to neglect opportunities to utilize commercial technology, components and end-items by fostering needless and unreliable military specialization.

Fail to accept the major responsibility for inadequate reliability and maintainability of most military equipment.

Delay delivery of, and make exorbitant profits on, non-competitive procurements of essential spares, repairables and ground support equipment.

Fail to encourage multiyear procurements or "deregulation" of Defense procurement and reporting practices, while condoning contract "overruns" as acceptable business practices.

Continue to scramble for foreign sales that might better strengthen allied defense industries, while peddling products our less-sophisticated friends cannot operate by themselves.

Fail to plow back new-found profits into plant modernization and productivity improvements.

Fail to initiate needed training programs to provide a new generation of skilled defense industry workers, both blue and white collar.

Ignore community needs to mitigate impact of federal cuts in local social, educational, medical and cultural programs.

I commend the gentleman for bringing this to our attention.

Mr. GLICKMAN. Mr. Speaker, I appreciate the fact that my colleague, the gentleman from Missouri (Mr. SKELTON), came down here to take the time. The gentleman is known throughout this House not only as an expert in defense issues and one who has a keen interest, but also as a man who recognizes the fact that dollars are important, but dollars per se do not necessarily mean we are No. 1 in the world. An effective, quality-oriented defense is one that I believe may mean augmented expenditures but must mean wisely spent expenditures, and I will be talking about a few of these items, raising more questions than anything else, and I appreciate the gentleman's being here today.

Mr. Speaker, we need a strong defense and, quite frankly, I am convinced that we have let some very important parts of our defense system deteriorate that should not have been allowed. I have supported every defense authorization and appropriation that has come before this House since I was first elected, and I do not regret that. I do not regret the fact that I supported the spending levels included in the first budget resolution. But as is the case with spending funds for every single activity in which the Government is involved, we need to be careful; we need to be frugal; we need to remember that these are taxpayers' hard-earned dollars we are spending. They should be spent in a purposeful, effective manner. To do otherwise only weakens our defense capability and wastes scarce financial resources.

First, if we want to see that funds are wisely spent, we need to come to grips with questions which I am convinced have been ignored except for occasional rhetoric. What is our defense objective? What standard are we aiming for? What do we expect from our Defense Department?

Is our goal to maintain strategic equivalence with or superiority vis-a-vis the Soviet Union?

Is our goal to spend more in real dollar terms than do our adversaries on defense?

Is our goal to maintain impenetrable borders?

Is our goal to revitalize the Monroe Doctrine and maintain an exclusive sphere of influence in this hemisphere, or should that sphere include Western Europe, the Mideast, and the Pacific?

Is our goal to be able to independently protect ourselves and our allies, or is it to be able to cooperate with our allies in joint defensive efforts?

Is our goal to have the capability to respond effectively and rapidly to developments which threaten our access to critically important raw materials and locations of strategic geographic importance?

Before we know how to effectively utilize the funds we allocate to meet our defense needs, we need to grapple with just what our defense objectives are. I realize that we will not reach a decision on that today, but I hope we will start the discussion and get people thinking in those terms. Once we have a goal or even several goals, I am convinced that we can achieve them. But we should not be haphazard about this. It makes no sense whatsoever to simply throw money at the problem. That has not worked in addressing the whole range of other problems, and there is no logical reason to assume it will give us the kind of defense capabilities which we need.

In the meantime, there are changes that can be made in operations of the Defense Department—just as can be made elsewhere in the Federal bureaucracy—that will effect savings without waiting. Many of us have seen the report which former Comptroller General Staats issued back in January outlining management improvements which could and should be made within the Pentagon to achieve considerable budgetary economies. That report submitted to Defense Secretary Weinberger was based on a series of reports made by the General Accounting Office over the years that had not been acted upon by the Pentagon. The recommendations covered a whole

range of matters: consolidation of military base support activities, further consolidation of supply activities, elimination of Marine Corps logistics overlap with other services, centralization of ammunition management, consolidation of maintenance activities, improved utilization of parts inventories, planning life-cyle logistics and parts backup in early stages of weapons planning, improved weapon system management, shift to multiyear contracting, the others covering the gamut of DOD functions. In response, Secretary Weinberger assured Comptroller Staats that—

I share your concern about the sound management of available resources and have placed a high priority on the identification and review of potential cost reductions in existing Defense programs.

He went on to promise that the Department would take "a vigorous look" at the recommendations. We in Congress should do the same, and we should not hesitate to prod the Department to make the recommended changes or to tell us clearly why they have decided not to do so.

And while I am talking about what we in Congress can do about unnecessary expenditures that can be trimmed from our defense budget, I think we have to face up to the fact that the Congress itself is responsible for its fair share of the problem. It is not unusual for the Congress to fund weapons systems that the defense experts in the Defense Department do not think are cost effective. And, some of the procedural changes that the GAO has recommended will need congressional action. First, the GAO estimates savings of billions of dollars by converting to multiyear contracting. We will have to give them the authority to do so if we want to see that savings. Second, it has been traditional for weapons procurement to be spread over a number of years. That results in lower annual expenditures, but "stretching out" these weapon systems over a number of years adds 10 to 30 percent to the costs of the systems due to inflation.

In addition to these management changes, there are some highly visible examples of extravagance and waste in Pentagon operations which, though they are admittedly not big ticket items, should be brought into line. I will just mention two examples which come immediately to mind: the $89.7 million in the defense budget for military music programs—an increase of 18 percent over last year's authorization—and the costs associated with plush Pentagon officer's dining rooms.

I think that having a quality military band from each of the services is not a bad idea, but I wonder why they need nearly 20 percent more than they had last year. When these items come to light, particularly at a time when we are cutting back on a whole range of programs from food stamps to legal services to Export-Import Bank credit programs, it cannot help but raise questions about where money is going elsewhere in our defense budget.

And there is another example of some loose accounting procedures which came to light in hearings before the Appropriations Committee as the supplemental appropriations bill for fiscal 1981 was being developed just recently: Fuel mismangement was uncovered involving thousands of gallons of fuel over a very short time. That kind of problem becomes more and more costly as fuel prices escalate. Let me cite just one example that was revealed during those hearings: Part of the reason for the supplemental funding request for fuel was to cover the costs that were incurred when 1,028 gallons of heating fuel were supposedly delivered to two military buildings which had been demolished in 1975. Who knows where else our defense fuel might have gone? Again, reports of that kind of sloppy management cannot help but raise questions, and legitimately so, at a time when we are boosting our military budget so significantly.

Just recently the House overwhelmingly adopted legislation to establish an Office of Inspector General within the Defense Department. Now I hear that there is a lobbying effort to block movement of that legislation in the Senate and that there is talk of giving the Secretary of Defense the authority to veto sending an Inspector General's report to the Congress. When these kinds of mismanagement or fraud exist and when we are making such a dramatic commitment to increased military readiness, it is hard to believe that such a discussion is even necessary. Offices of Inspector General, if that legislation is enacted, will exist in every Fedeal agency. Especially as the percentage of the Federal budget dedicated to the defense sector increases over the next few years, it makes no sense to exclude that sector from the regularized scrutiny which should take place once an Inspector General is in place.

Now, there are many other items in the defense budget which I would bring to my colleagues' attention. Perhaps the best synopsis that I have seen lately, however, is in the June 8, 1981, issue of Newsweek magazine, which contains an analysis in a generalized way of a broad range of spending programs, from compensation to aircraft to ships to tanks to other activities which need our review.

In that article, there are a couple of items which I think need to be brought to the attention of my colleagues today. The M-1 tank, which is ready made for Europe, which I think is going to be an extraordinary quality item, but only one will fit in our C-5A, which is our biggest Air Force plane. So shipping them to a hotspot like the Persian Gulf is almost impossible unless we build several hundred C-5A's, which is not economically feasible. That is a worry. We build a great tank, but we cannot get it anywhere.

I assume that the strategists in the Defense Department have a way out of that problem, but it is the kind of issue which I think needs to be involved in the planning about what is the future, what is the rationale for our defense expenditures.

Another question relates to our big-deck aircraft carriers. I happen to have had spent some time on the U.S.S. *Saratoga* last year. But many experts argue that even the F-14 jet fighter, designed to defend them, will not meet that task.

The gold plating of weapons systems, the tendency for arms companies to want to constantly improve on systems to the point where they are no longer feasible or useful at all and even after they have been outmoded.

And then, of course, we have the problem of whether or not our Military Establishment can meet the demand.

It is at issue, after years of relatively keyed down activities, whether they will be able physically to meet the enormously increasing demand that we are asking to do at this time.

I gather that part of the concern rests with a worry that an Inspector General would become involved in military policy. That just is not what is intended, nor what we in the Congress want. I recall that during World War II Senator Truman of Missouri headed a select committee in the Senate investigating the operation of World War II. That's an example we might want to emulate. That committee was successful in scrutinizing the management of the war and the way tax dollars were spent. Questions of military policy remained with the military departments, of course, in consultation with the Congress. Still, the committee found ways to save millions of dollars by straightening out some spending policies. At this time when we are embarking on a buildup of our defense programs of similar magnitude to what occurred in World War II, I submit that it might be prudent of us to reestablish just such a committee that will responsibly watch to see that tax dollars boost our defense and that they do not improperly line the pockets of contractors.

Mr. PEYSER. Mr. Speaker, will the gentleman yield?

Mr. GLICKMAN. I yield to my colleague, the gentleman from New York.

Mr. PEYSER. I thank the gentleman for yielding, and I wish to congratulate the gentleman for starting the discussion on the defense spending and what we will be doing over the next several months on this issue, be-

cause I think it is obviously an issue of great concern to the American people. I think it will be of a greater concern in the next month or two when the American people begin to have an opportunity of seeing the overall impact of budget cuts in other areas of the programs, the domestic programs, areas such as education and the elderly and the handicapped; so that I think it becomes of particular importance that we look very carefully at defense spending and defense programs to know exactly what is happening.

Like the gentleman in the well, I, too, have supported all of the previous defense legislation, the Defense Department programs, but I, too, feel that we now must look very carefully, we must be assured that the money that is going into defense is truly serving that purpose, and that waste and unreasonable overruns have got to be curtailed and that we should look carefully.

As the gentleman will recall, just a few weeks ago, when the budget question was being discussed on the floor, the Democratic Party's alternative was to curtail a limited amount of money, no more than $4 billion, and yet there was a great outcry at that time that we would be weakening our defense posture.

Well, I do not really think that was the case; but, nevertheless, that battle is over and now I think we have to follow along the road that the gentleman is suggesting and look very carefully at where defense dollars are going and that they are being utilized for the best defense of this country.

Mr. GLICKMAN. I thank my colleague for his remarks, and I think it fits in very interestingly with the poll that was published in Newsweek on arms policy. A very large number of people, 64 percent to 29 percent, substantially support the Reagan administration's increase in defense spending. I think that is reflected here on this House floor. I think most of us feel that there did need to be some increases in defense spending. But at the same time, when it comes to defense spending versus adverse effects, that poll disclosed the following:

If we would be less able to balance the budget with defense spending increases, would you still support the defense spending? By a margin of 48 to 41, the public said yes.

If there would be a smaller reduction in income taxes in the future, would you favor increased defense spending? By a very large margin the public said yes. That is, I think, in an unselfish way, the public saying that even if it meant a smaller tax cut, they would want to have higher defense spending.

□ 1330

But the question is would you favor increased defense spending if it meant inflation would remain at the current level or go higher? The answer was 31 percent "yes." Sixty percent said "no." So there is some concern by the public. The American people want the strongest defense in the world but they do not want a knee-jerk defense that in fact perhaps does not create more effective relations with the Russians and may cause further problems at home.

And the American people, according to the same poll, are worried that indiscriminate defense spending not carefully watched may be harmful to the economy.

The bottom line is we need to ferret out what is wasteful wherever we can, and waste is waste wherever it is found. We cannot afford to ignore it just because it happens to be in the defense budget. If several thousand gallons of fuel had disappeared under one of our emergency fuel assistance programs for the poor, it would have been a scandal; the fact that it happened in the Army should not be conveniently overlooked. If money were being wasted because spare parts were not being properly used in keeping National Park Service vehicles in place, taxpayers would be outraged; the fact that it happens in the military should be no less disturbing. When it comes to waste, the same rules should apply to every agency, military or civilian. And we need to remember that throwing money at a problem will do absolutely no good if it ends up being wasted. More money in the defense budget will not make us one bit more secure if it is not wisely spent. That takes sound management, careful planning and a goals orientation.

It is my hope that our Secretary of Defense, who has publicly indicated his support in trying to root out this problem, will be supported in his efforts, will be serious in his efforts to try to insure to us, the taxpayers of this country, that the defense spending is being done in the most prudent way possible.

● Mr. WINN. Mr. Speaker, I would like to commend my colleague from Kansas for providing this timely opportunity to discuss waste in the Defense Department. This is a time, as we are all aware, for fiscal restraint. The Defense Department is not exempt from this effort. There are numerous ways for DOD to reduce expenses without limiting military muscle. While I have continually fought in Congress for defense appropriations which would secure our Nation as the world leader in military strength without jeopardizing other necessary programs, I strongly believe that we can improve cost effectiveness throughout our armed services. I would like to share the following letter which I, together with 60 Members of the House, sent to Secretary Caspar Weinberger on May 7, calling for a search for savings in our defense expenditures.

HOUSE OF REPRESENTATIVES,
Washington, D.C., May 7, 1981.

Hon. CASPAR W. WEINBERGER,
Secretary of Defense,
Washington, D.C.

DEAR MR. SECRETARY: At home and abroad, our nation is faced with many serious challenges. While our adversaries around the globe have pushed forward in their efforts to expand their power and influence, we have fallen further behind. At the same time, our economic lifeline has come under serious attack by inflation, over-spending and world economic trends beyond our control. The question we now face is not merely a choice of more guns or butter, but how we can address and balance both of these critical interests.

The American people have demonstrated an understanding of our nation's problems and a willingness to share the burden of our necessary reform efforts. It is vital, therefore, that as they make the needed economic sacrifices, we demonstrate a sense of shared responsibility and accountability across the board, including the Department of Defense.

For this reason, we urge you to vigorously pursue all efforts and programs designed to eliminate waste and to improve cost effectiveness throughout our Armed Services. Furthermore, we believe that more public information is needed to demonstrate your commitment to this effort and to help build a consensus that all sectors of our government are full participants in the Administration's economic recovery plan. We also believe that an economic analysis of major programs by an independent body, outside of the Department, would lend credence to such an economization effort.

In your search for ways to bring about savings in our defense expenditures, we call your attention to the recent report by the House Republican Research Committee's Task Force on Defense, entitled "Can The Pentagon Save Money," dated April 7, 1981, which concluded:

". . . there are many ways for the Pentagon to reduce unnecessary disbursements. Limiting these expenses is not an easy matter, but with the utilization of a carefully considered plan, reductions can take place, without affecting military readiness or capabilities. An overall strategy should be developed which considers programmatic reductions; waste, fraud and abuse; and a restructuring of the procurement process. In addition, cooperation with and from the Congress and Administration is necessary for developing a comprehensive spending reduction strategy. If such an effort is successful, the ensuing monetary savings, as much as $25 billion, will benefit the Pentagon and further the Administration's fiscal austerity plan as well."

We share the views of the President concerning the challenges that our Nation faces and the need to increase our defensive capability to address those challenges. We are certain that you also recognize the economic burdens we are asking the American people to share in order to meet these challenges and that these concerns are linked together. A weak economy only increases our vulnerability abroad and decreases our

ability at home to provide for the common defense.●

● Mr. DAN DANIEL. Mr. Speaker, first, let me commend our colleague, the distinguished gentleman from Kansas, DAN GLICKMAN, for taking this special order today.

As one who has long been a foot soldier in the war on Federal Government waste and mismanagement, I feel a special obligation insofar as the military area is concerned. Candor requires that the statement be made; in a budget of this size, and with the multiplicity of spending categories, there will be enormous opportunity for waste and mismanagement. In recent months, the General Accounting Office has performed a valuable service in pointing out areas where savings can be made, although I must confess I do not agree 100 percent with their findings. But today I would like to talk about a somewhat different cure for the problem.

The question before us is: What kind of waste is there in the Defense budget and what can be done to ferret it out?

In my judgment, one of the most persistent areas of waste and one which is most amenable to congressional initiative is that of contracting for major weapons systems. Over the next 4 years, the Department of Defense will obligate billions of dollars for the planes and ships, tanks and guns, and all the other pieces of hardware needed to defend our freedom.

Last year, Chairman MEL PRICE established a special panel to examine our defense industrial base. The panel's findings were not encouraging. However, if there was one constant in the testimony of the witnesses that appeared before that panel, Government and private sector alike, it was that real dollar savings could be made by multiyear procurement. Time and again we were told of the excess costs and unnecessary delay built into our present single-year system.

Now this was not based on ifs and maybes. One witness came before us with supportable data and I offer some of it now for your consideration.

Gen. Alton D. Slay, Commander, Air Force Systems Command, has estimated that selective use of multiyear contracting can result in savings of up to 10 percent per year. Expanded use with controlled scheduling can increase the savings to 20 percent. In just six systems alone, a saving for the Air Force would approach 20 percent or $1.5 billion.

Let me cite several examples. On ammunition for the A-10 aircraft, single year cost is $360 million. Multiyear contracting would result in a cost of $330 million for a saving of 9.3 percent.

Now let us take the case of F-16 aircraft. Assuming the purchase of eight aircraft per month under nine single-year contracts, the total cost would amount to $10.5 billion. Now assume the purchase of the same number of planes—783—over a 9-year period with one 5-year contract and one 4-year contract, and the total cost becomes $9.7 billion or a saving of over 8 percent. This alone would be sufficient saving to make the contracting method attractive. But let us carry this one more step and assume the same number of aircraft will be purchased only at the rate of 10 aircraft per month for 7 years. The total cost then becomes $8.6 billion, a saving of 19 percent or almost $2 billion.

There are, of course, other examples I might use, but these should suffice. Honesty compels me to add as well that this system will not apply across the board and to all contracts. It is enough to say that the system will work and will save money for the American taxpayers.

Somebody—a lot of somebodies—worked hard for the dollars we will be spending on defense, and they deserve to know they are receiving the best possible return on their investment. The overburdened taxpayer will demand the highest possible level of accountability—and they should.

We are not recipients of their bounty—we are instead stewards of their treasure.●

● Mr. RAILSBACK. Mr. Speaker, I support a strong defense system. I believe we must maintain nuclear parity with the Soviet Union and that our conventional force must be built up to equal that of the Soviet Union. Our military personnel should be adequately compensated so that volunteers, especially skilled personnel, cannot be lured into private industry so that quality people will be attracted to the military.

Because quite a bit of money is needed to meet these goals, a large defense budget must be appropriated. However, I am extremely concerned about the way the money will be spent. I think that with careful planning and better monitoring of contracts, we can develop a strong military. The administration has proposed to increase defense outlays so that by 1986, 7 percent of our gross national product (GNP)—up from 5.6 percent in fiscal year 1981—will be spent on defense. The increase will undoubtedly have a profound impact on our economy. I am not an expert on defense. But I am concerned that the money may be used inefficiently without adequate planning.

Several articles and studies on the subject of defense spending have been published recently. Examples include articles in the Washington Post and Newsweek, a General Accounting Office (GAO) report on acquiring weapon systems, a National Conservative Foundation (NCF) plan, and a letter from Senators GOLDWATER and METZENBAUM to Defense Secretary Weinberger. The two articles make the point that an overall strategy is only now being developed. Friction exists between the branches so that a unified effort to develop and at the same time streamline adequate weapon systems is impossible to achieve. The defense industry may not be capable of handling a sudden increase in demand. Some projects may prove obsolete by the time they are complete. The GAO, NCF, and Senators GOLDWATER and METZENBAUM make recommendations geared toward improving efficiency and less waste in defense spending.

I sincerely hope the Department of Defense seriously considers these comments and recommendations. Procurement reform and more effective administration, as recommended by Senators GOLDWATER and METZENBAUM, are especially important since contractor cost overrides and inefficiency often occur and add unnecessarily to the defense budget.

I would like to reiterate that I support a strong defense, and I will vote for the funds necessary to develop it. However, more money is not enough. Careful planning and monitoring is needed if a truly capable military is to be developed at the least cost to taxpayers.●

● Mr. WALGREN. Mr. Speaker, I welcome this opportunity to address the issue of waste, fraud, and abuse in the military budget. Mr. GLICKMAN deserves special credit for arranging this special order to address one of the largest problems we face as a nation—the proper management of military spending.

I believe we should be supportive of those programs that make sense, particularly the effort to improve our overall manpower needs. But the Congress should not be stampeded into expensive, unproven programs that simply add no strength to our country in modern times.

While we all agree that it is most important to maintain a strong national defense, throwing money at the military makes no more sense than throwing money at our social problems. We must apply the same budgetary discipline to the military that we are applying to all other areas of Government spending.

I find it hard to believe that no one is seriously questioning the $226 billion military budget for next year, an increase of $53.5 billion over last year. This is more than twice the amount that all other NATO nations combined spend for military purposes, and more than 10 times the amount the entire developed world spent on foreign aid last year. No one denies that we need to adequately provide for our defenses, but the sheer magnitude of these numbers demands that we carefully

examine just what these dollars buy for us.

This increase also has tremendous economic implications. Many economists now realize, that it was President Johnson's refusal to raise taxes to pay for the Vietnam war which started us on our present inflationary spiral. And the military increase alone proposed by President Reagan will cost us more than three times the price of the Vietnam war.

The great fallacy behind "Reaganomics" is that, despite all the billions we may cut in social programs, the deficit will still be the same size. It's not hard to see that, over the next 3 years, a $138 billion cut in social expenditures will not cover either the administration's $181 billion increase in defense spending or its $196 billion tax cut. We are still left with an incredible inflation-causing 3-year deficit of $239 billion.

I am also concerned about the regional economic impact of this increase, especially on the depressed Northeast and Midwest. This year, California will receive more in military construction funds than the entire Northeast-Midwest region. This imbalance will be increased by the fact that most of the base closings have been in the Northeast. Only 13 percent of the military's personnel are stationed in the Northeast compared to 51 percent in the South and 36 percent in the West. Clearly, massive increases in military spending with this geographic distribution contribute to recessive in the Frost Belt and economic growth in the Sun Belt.

If we are to carry out the dramatic spending increase called for by the Reagan administration, we must go about it efficiently and effectively. According to the Republican Study Committee, there are at least $16 billion in defense that can be categorized as "waste, fraud, and abuse." Even the National Tax Limitation Committee, in a report forwarded by David Stockman, stressed the fact that billions in defense spending could be saved this year and even more in the years ahead. The General Accounting Office and other agencies have issued similar reports.

Some recommendations made by these studies are: Holding the line on civilian employment at the Defense Department; reducing the additional 5.3-percent pay increase for military personnel in 1982 in view of the 24.3-percent increase already scheduled this year; slashing over $1 billion for renovation of the World War II battleships *Oriskany, New Jersey,* and *Iowa*—these ships will only be usable for the next 5 to 7 years and the total cost for renovation and manpower may very well outweigh the benefits—and consolidating military bases which could save billions over the next decade.

The list goes on and on. These few examples show that we have a lot of work to do in this area, and I encourage all my colleagues and the President to carefully study these proposals.●

● Mr. STOKES. Mr. Speaker, I would like to thank the gentleman from Kansas, Mr. GLICKMAN, for sponsoring this special order so that we can discuss this important issue—our military budget.

Mr. Speaker, it is my position that the United States should be strong militarily. However, I do not subscribe to the notion that increased military spending equals increased military strength. The vastly increased military spending that we are about to pursue is based on this notion and as a result, our military budget is one that bears no rational relationship to our country's security needs.

Billions of dollars in Defense fat have been identified in separate reports by the U.S. General Accounting Office, by House and Senate Appropriations Committees, the National Conservative Foundation, and the Center for Defense Information. Even the Republican Study Committee has identified $16 billion in Defense Department fat. Yet, this administration can only identify fat in domestic spending programs and has neglected to address the issue of fat in the Defense Department.

There is no reason for the military budget to be a sacred cow. As with all budget items, tough questions should be asked and answered before military expenditures are approved; for example, has waste and fat been eliminated? Is a given weapon, plane, or ship really necessary; is it too expensive?

Mr. Speaker, rather than being a sacred cow, evidence suggests that our military budget should be strictly and closely scrutinized. Incidences of cost overruns and excess profits by themselves give rise to a need to more closely scrutinize our military budget. For example, Mr. Speaker, Murray Weidenbaum, who is presently Chairman of the Administration's Council of Economic Advisers, in testimony before the Joint Economic Committee in 1968, pointed out that his research showed that profits of defense companies were 75 percent higher than profits by nondefense companies. Today, the situation is unchanged, in fact Mr. Speaker, within the defense industry, contractors are able to make 50 to 75 percent more profit than they make on their nondefense business.

In the case of cost overrun, our decision to build the Trident submarines is a case in point. Nine Tridents have already been authorized, the first of which was to go into service no later than April 1970. Today, June 1981, the first Trident, the *Ohio,* has still not been delivered. As work has fallen behind schedule, the cost of the submarines also has soared. When Electric Boat submitted bids for the first Trident, it estimated that construction would require 14.6 million man-hours. Since then its estimate has risen to 23 million man-hours, an increase of 60 percent. The end result is that the cost of the first vessel rose from $14.7 billion to $2.053 billion and is expected to escalate even more.

These are the kind of excesses that prompted Senators GOLDWATER and METZENBAUM to state in a joint memorandum, "Runaway costs characterize our entire defense procurement program." "These vast expenses," they pointed out, "have nothing to do with maintaining the strength of our military forces, they are pure and simple, the result of a system that permits Department of Defense officials to operate as though the public purse has no limits. It is a system that can and must be changed."

Mr. Speaker, I submit that it is the height of irrationality when irrespective of the existing fat and waste in the Defense Department, the administration now proposes to embark on a military spending spree of over $1.5 trillion in the next 5 years. The irrationality of this increase is underlined when we realize that no military rationale was offered to support the increase and no proof given that war would be better deterred or more easily won by vastly increased spending.

The most explicit rationale for increased U.S. military spending is the need to respond to increased Soviet military spending. On February 18, President Reagan said "Since 1970 the Soviet Union has invested $300 billion more in its military forces, than we have." However, analysis by the respected Stockholm International Peace Research Institute indicates that U.S. spending is more than Soviet spending. Moreover, even granting the accuracy of the President's figures, the large increase in our military budget cannot be justified on the premise of increased Soviet military spending when we consider the following:

The Department of Defense admits that when spending by United States and Soviet allies are included, NATO exceeds the Warsaw pact countries by some $207 billion in the same period the President refers to.

Much of the Soviet spending is oriented toward its long contested border with China and toward security in Eastern Europe, not toward the United States.

Increased military spending will not increase our national security, instead it is likely to decrease real national security by fomenting domestic unrest by making a limited nuclear war more likely and by increasing the likelihood of U.S. military intervention in various

parts of the world. Furthermore, it will increase inflation, damage our economy, and encourage inefficiencies and waste in the defense industry.

Therefore, Mr. Speaker, I call on my colleagues in the House and the Senate and on the administration to put an end to this military madness by eliminating waste in the Defense Department, by requiring detailed justification for military expenditures and by recognizing that meeting the needs of the poor and elderly has as much to do with our national security as anything else.●

TRIBUTE TO THE LATE PRIMATE OF POLAND STEFAN CARDINAL WYSZYNSKI

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. DERWINSKI) is recognized for 60 minutes.

Mr. DERWINSKI. Mr. Speaker, I have reserved time this afternoon to pay a special tribute to a man who has been a crusader for faith and freedom for more than three decades, the late primate of Poland, Stefan Cardinal Wyszynski. Cardinal Wyszynski symbolized Poland's determination to be Polish, Catholic, and free.

Foremost among Catholic leaders of Eastern Europe, Cardinal Wyszynski managed to forge a church that is stronger in 1981 than it was before the Communists dropped the Iron Curtain. The son of a village schoolteacher, Cardinal Wyszynski became a priest at the age of 23 and helped to lead the anti-Nazi underground during World War II. In 1949, Pope Pius XII named him archbishop of Gniezno and Warsaw; at the same time, the Moscow-dominated regime of Bohuslaw Bierut launched its postwar crusade to wipe out Catholicism as the sustaining faith of Polish nationalism. Elevated to cardinal in 1952, he won enormous popular respect as a result of his unbending refusal to be intimidated by the repressive power of a totalitarian state.

Like most of his countrymen, the primate regarded the forced Communist rule on his country as fundamentally alien to Polish feelings and traditions. However, he accepted the responsibility to work within the framework of this new civil order to effectively sustain the special role of the Catholic Church as custodian of Poland's national spirit. This made him the central figure in his church's and people's struggle against the regime for the past 32 years. As Communist leaders came and went, the primate remained in office—a tower of strength of his country's quest for freedom and independence.

After years of battling the Communist regime, the cardinal used his influence over recent months to urge moderation on his fellow countrymen. He acted as a trusted intermediary between the authorities and the independent Solidarity trade union. This was his last, and perhaps most crucial, service to the nation he loved so much.

A generation of Poles, the vast majority of whom are Roman Catholic, have looked to Cardinal Wyszynski as the embodiment of Poland's sovereignty. For many years, particularly during the Stalinist period of the early 1950's, the Roman Catholic Church was the only institution in Poland to preserve its independence and historical traditions, Cardinal Wyszynski paid for his defiance with a 3-year period of forced isolation in a monastery. But in 1956, Poland's new Communist First Secretary, Wladyslaw Gomulka, freed the Cardinal and sought his aid in calming anti-Russian sentiment. In return, Wyszynski won a measure of freedom from Communist persecution for Polish Catholics.

As testimony to Cardinal Wyszynski's stature, the Government of Poland declared a period of national mourning. Millions of Poles mourned the death of a man who kept alive the dream of freedom and the flame of Christian faith in a Communist state. His loss is a grievous one for his country. But he leaves, too, in the institution of his church, a sturdy instrument to continue his work and a noble legacy for his countrymen to follow.

In closing, I wish to insert an editorial tribute to this great churchman and national leader, which appeared in the June 5 edition of the Chicago Catholic, the official newspaper of the Catholic Archdiocese of Chicago. A. E. P. Wall, the editor of that publication, properly speaks of the primate of Poland's political as well as important spiritual role for his country and for the world:

[From the Chicago Catholic, June 5, 1981]

KARDYNAT WYSZYNSKI

Hundreds of millions of Catholics throughout the world have a commitment to Jesus Christ, a commitment to work toward personal sanctity.

The route toward sanctity often turns into a maze. There are dead ends, circles, potholes and one-way streets all along the route to Christian fulfillment.

Nobody knows how many millions make it all the way, how many keep trying despite obstacles and false starts, how many give up or how many make progress for themselves and help others along the way.

Innumerable dedicated women, men and children do their best to follow the Gospel messages. These unheralded exemplars of the Christian way may drive a bus, deliver the mail, feed the baby, give a homily, nurse the sick, teach, preside over a board meeting or write a book.

They inspire others, much of the time, although the world doesn't lack citizens who are turned off by sanctity, who feel threatened by the love of Christ.

Who inspires the spiritually gifted? Who holds up the example of courage, strength and sacrifice to the rest of us?

One who does so is Stefan Cardinal Wyszynski, who in death continues to encourage the best in his Church, in his country and in his people. His life was so remarkable that its message almost coexists with the life of Poland.

Cardinal Wyszynski was a man whose strength was a match for the power of the Soviet Union. His spiritual sense, intellect, personal sacrifices, determination, affection and loyalty made him a heroic figure at home and an admired leader wherever his name was spoken.

He had many friends in Chicagoland. John Cardinal Cody, Bishop Alfred L. Abramowicz and others expressed their respect and friendship by flying at once to Poland for the great Cardinal's funeral.

Here in Chicagoland there were services and prayers, all recalling a man who had borne imprisonment rather than yield to tyranny.

His leadership, ranging from gentle to tough, was based always upon his confidence in the correctness of his cause. That was the cause of Christ and the Church of Christ. His rugged and tenacious strength was rooted in the piety of one who knows where to look for the source of all strength.

It will not be the same without Stefan Cardinal Wyszynski. But the world will be more hopeful because he has played such a vigorous part in it. In Cardinal Wyszynski the world has an authentic hero to admire and emulate.

● Mr. FARY. Mr. Speaker, on Friday May 29, the world lost one of its most respected and dedicated religious leaders. Cardinal Stefan Wyszynski was the keystone of the Polish Church. Subject to constant intimidation by the Communist Party, Cardinal Wyszynski remained steadfast in his commitment to the spiritual history and traditions of the Roman Catholic Church and the sovereignty of the Polish State.

While committed to his spiritual and religious role, it is difficult to separate Cardinal Wyszynski's achievements as a great churchman from his achievements as a national leader. Despite the separation of church from state, the political importance of his office held great prominence during the decades of Communist rule since the end of World War II. From his years of forced isolation during the Stalin era to his role during the recent Solidarity Labor Movement, the cardinal was a political and spiritual inspiration to his countrymen. Communist leaders soon came to understand that they must reach an understanding with the cardinal in order to win any degree of social support.

Although adamantly opposed to "forced atheization" and other embodiments of Marxist-Leninism, the cardinal was a force of moderation during the recent Solidarity movement tensions. He was constantly there to defuse tension between the government and Solidarity. Solidarity leader Lech Walesa said that he would never go against the cardinal's wishes:

He is a great man, his wisdom is immense and his help has been enormous. . . . Without his intervention, I would not have been able to call an end to those strikes.

I join those throughout the world in hoping and praying that Solidarity and the Polish and Soviet Governments can continue to peacefully coexist despite the loss of this charismatic leader.●

● Mr. BOLAND. Mr. Speaker, the death of Stefan Cardinal Wyszynski was a tremendous loss, not only for the people of Poland, but for people throughout the world who seek peace and freedom.

For over three decades, Cardinal Wyszynski was the spiritual leader of Poland's Roman Catholic population. His tenure as head of the nation's church hierarchy coincided with a period of intense political struggle within Poland. He became the primate of Poland shortly after Communist rule was forced on his nation, and the remainder of his life was spent in an attempt to preserve his church, and the Polish spirit, in the face of the government's drive to reduce social and political rights.

'Cardinal Wyszynski's efforts to seek a middle ground between violence and confrontation gave him unparalleled influence among all factions in Poland. He was a voice of reason whose personal intercession may well have prevented Soviet intervention in Poland not only in the autumn of 1980, but also after the 1976 food riots. While freedom for Poland was always his goal, he never favored precipitous actions which would negate the gains he had so carefully accumulated. He was a true Polish patriot and a true shepherd to his people.

Mr. Speaker, Cardinal Wyszynski's moderating influence will be sorely missed in the days ahead. Fortunately he has left a religious institution stronger than any in Europe, and a legacy of achievement for his successor to follow. His success in preserving the traditional love of freedom and deep Christian faith of the Polish people is one of the most significant achievements of the 20th century.●

● Mr. CONTE. Mr. Speaker, the entire world was saddened by the death of the primate of Poland, Stefan Cardinal Wyszynski, on May 8. His passing away especially disturbs me, as a Roman Catholic, yet it should mean something to all of us. This man proved himself to be a consistent champion and defender of human rights in his country, and by his example, throughout the world. He was a mentor to Pope John Paul II, and together they worked that all might attain the fundamental rights of life, liberty, and freedom of worship.

During the Nazi occupation of Poland in World War II, Cardinal Wyszynski led the Catholic people in that country, never abandoning his beliefs in a time when his church and its people were subject to constant persecution. He maintained these same standards when the Soviet Army imposed Communist rule on the nation after World War II.

The cardinal accepted the responsibility of working within the Communist regime to insure that his people could worship as they chose; today, Poland is the only totalitarian nation in the world where freedom of worship is allowed, albeit grudgingly accepted. Throughout the past 32 years, Cardinal Wyszynski has stood as a beacon for upholding the fundamental rights of all people in this world. His death serves as a reminder to all of us how crucial that struggle is, and as an impetus to achieve our goal in spite of the many obstacles that face us. We dare not forget this man, nor must we ever forget that our Nation was founded on the very same beliefs to which Cardinal Wyszynski dedicated his life.●

● Mr. MINISH. Mr. Speaker, it is appropriate for us to pause in tribute to a great man, Stefan Cardinal Wyszynski, primate of Poland. The true leader of the Polish people died at a particularly traumatic time for his nation, after so many months of internal political turmoil—turmoil which he personally prevented from having disastrous results—and just days after the shocking assassination attempt on his revered countryman, Pope John Paul II. In this context, the passing of this wise and holy man leaves a void which will demand all the energy and talents of that great nation to fill.

Many obituaries on Cardinal Wyszynski have naturally emphasized his critical role in managing the crises of recent months, when his leadership may have made all the difference in a dangerous situation. Still, we must not forget his long-term contributions to Poland over the years. The brutal efforts of the Stalinists after World War II to crush Polish religion and national identity, the causes which Cardinal Wyszynski embodied, might have beaten a lesser man. Coming to leadership in that grim time, the primate taught his people to survive and prevail over the campaigns of harassment, threats, and imprisonment. If the pressures of more recent years have been more subtle, they have been no less dangerous, and the Poles continued to look to the cardinal for the strength and judgment which they needed.

To the Polish people, I convey the condolences and prayers of their friends in New Jersey. May Cardinal Wyszynski's prudence, wisdom, and courage continue to guide you in the days ahead.●

● Mr. BROOMFIELD. Mr. Speaker, a nation is indeed fortunate when in times of crises a leader emerges with the capacity to cope effectively with the many crosscurrents that accompany national emergencies. Poland was so blessed in the person of Cardinal Stefan Wyszynski, a courageous, prudent, farseeing and temperate spiritual leader, who adroitly headed the Polish Catholic Church of some 30 million souls for more than a generation.

The reach of this amazing prelate's influence extended well beyond Poland with the advent of the papacy of John Paul II who, at his inauguration, indicated that it was because of his mentor, Wyszynski, that the Roman Catholic Church has its first Polish Pontiff.

Cardinal Wyszynski spent much of his priestly life under the harsh, anticlerical tyrannies of nazism and communism. Yet, thanks to his brilliant leadership, the Polish Catholic Church today is far stronger than it was when he became primate of Poland in 1949. In fact, I believe it is fair to say that of the various current power centers in Poland, only the Catholic Church speaks for the vast majority of the Polish people.

Given what has transpired in post-World War II Poland, that is a remarkable turn of events. On a number of occasions during this period, Poland was rocked by domestic political troubles. In each instance, Cardinal Wyszynzki played a pivotal role in the resolution of those problems, primarily because he possessed the uncanny ability of knowing just when and how much to resist totalitarian rule and when to compromise without repudiating his principles. Adhering to those principles, I might add, cost him time in prison. Throughout that ordeal, his paramount concern was that the church would never reject the will of its people.

For the better part of the last year, the world's attention has been riveted upon Poland. As we all know, there have been moments when it appears Soviet intervention was imminent. Miraculously, that has been avoided to date, and much of the credit for that must go to Cardinal Wyszynski. Always able to keep things in perspective, he skillfully served as a bridge between labor and government in a manner that inspired the confidence and trust of both parties.

Mr. Speaker, I had the distinct honor and privilege of cochairing with our colleague, CLEM ZABLOCKI, the President's delegation to the funeral of Cardinal Wyszynski. The other members of the delegation were His Eminence, John Cardinal Krol, Archbishop of Philadelphia, Aloysius Mazewski, president, Polish-American Congress, the Honorable Francis J. Meehan, Ambassador to Poland, the Honorable William Wilson, the President's personal envoy to the Holy See, and Peter S. Bridges, Director, Eastern European Affairs, Department of State. Also participating in the ceremony, and of special meaning to me, was the delegation from the Archdio-

cese of Detroit, headed by His Excellency, Edmund Szoka, Archbishop of Detroit, who was accompanied by the Reverend Stanley Milewski, chancellor of Orchard Lake Schools, Orchard Lake, Mich., Mrs. Helen Zielinska, president of the Polish Women's Alliance, and Mr. Joseph Drobot, president of the Polish Roman Catholic Union of America.

The outpouring of sympathy we witnessed for this towering religious figure has left me with poignant and lasting memories. It also has caused me to realize what a legacy he leaves behind. The Poland we see today in many ways is the result of his efforts. Therefore, while saluting his memory, I pray that whoever is chosen as the next primate of Poland will be able to build upon the Wyszynski legacy and, in so doing, move Poland toward a permanent solution to its most difficult internal problems.●

● Mr. HORTON. Mr. Speaker, with the death of Stefan Cardinal Wyszynski on May 29, the people of Poland and freedom-loving people throughout Eastern Europe lost one of the most inspiring and towering figures of this century. For more than 30 years, Cardinal Wyszynski guided his spiritual flock through often turbulent and always politically dangerous waters. His ability to work within the framework of a Communist-ruled nation was unmatched anywhere else.

Throughout his life, Cardinal Wyszynski never drew away from confrontation or controversy. Challenged at virtually every turn by a succession of Soviet-dominated Polish political leaders and their instruments of oppression, the primate of Poland stood fast by the long tradition of Roman Catholicism and the principles of justice and morality. His tenacity ultimately won him the begrudging respect of the Polish Communists and the love and respect of the Polish people.

In Poland, as in many countries throughout Europe, religion stands as the common denominator, the unifying force, and transcending influence that determines the shape of things to come. Cardinal Wyszynski brought new meaning to the faith of most Poles who have traditionally seen the church as the historic symbol of Polish nationalism. During his life, his contributions to peace and unity enriched the lives of his countrymen and those beyond Poland's borders. He leaves a legacy that may well prevent Poland from succumbing to increasing pressure from the Soviet Union.●

● Mr. KEMP. Mr. Speaker, the free world has lost one of its most dedicated, uncompromising leaders with the death of Cardinal Stefan Wyszynski, primate of Poland. As a religious leader in a Communist bloc country, Cardinal Wyszynski staunchly resisted all totalitarilan forms of repression: during World War II, he worked in the underground movement against the Nazis; after the war, he fought to maintain the Catholic Church's independence, and spent 3 years in forced exile as a result of his efforts; and in labor strikes and other disputes between Communist authorities and the working class, both parties depended on him to mediate a workable solution.

Cardinal Wyszynski drew his strength from Poland's 1,000-year foundation of Catholicism; this religious tradition blended with his fervent national pride in Poland's cultural heritage and united Poles in their struggle against Communist rule.

Two notable Poles attribute their success to Cardinal Wyszynski's careful guidance: Pope John Paul II and Lech Walesa. Pope John Paul referred to the cardinal as his "spiritual mentor," for Wyszynski's religious conviction proved an unsurmountable force against the Communist government. Without the moderating influence of the cardinal, Lech Walesa said that he could not have settled the labor disputes which erupted in August 1980.

Cardinal Wyszynski's lifetime dedication to establishing religious independence in a Communist country and mobilizing national spirit to resist an authoritarian government will never be forgotten in his homeland, or by other people and nations who struggle against all forms of repression.

I would like to insert in the RECORD, "Wyszynski Fortified Church Under Communist Rule" from the New York Times, Friday, May 29, 1981:

WYSZYNSKI FORTIFIED CHURCH UNDER COMMUNIST RULE

(By Wolfgang Saxon)

Stefan Cardinal Wyszynski, Archbishop of Gniezno and Warsaw and Roman Catholic Primate of Poland, spent three decades in a struggle with secular authority and left the Polish church far more powerful than before.

Treading a thin line between resistance and compromise, he prevailed—through Stalinist incarceration and the persecution of the faithful, through the harassment that followed, through Communist efforts to legislate the church into submission, through the downfall of a succession of discredited party and Government chiefs. In the end, an officially atheist regime had to turn to him and his bishops for rescue from a citizenry enraged by economic hardships as well as by official corruption and ineptitude.

In the labor unrest starting last year, Cardinal Wyszynski became the arbitrator between the leaders of the independent labor movement and the Communist Party leadership.

RIGHT TO BE A CATHOLIC NATION

"After 10 centuries of Catholicism," he had reminded Poland's political leaders long before, in 1966, "we have the right to be a Catholic nation, and we do not resign that right." Responding to cheers from hundreds of thousands of pilgrims in Upper Silesia, he used that show of support to plead for coexistence between the Church and "the authority of Caesar."

He confronted a Government campaign to keep the young out of church in mid-1963, declaring: "If a citizen does not demand his rights, he is no longer a citizen. He becomes a slave." Parents, he said, should insist on the constitutional guarantee of free worship.

His role was bolstered by the faith of most Poles, who saw the church as the historic symbol of Polish nationalism, and by the fears all around of intervention by the Soviet Union. A large majority of Poles continued to identify with Roman Catholicism as a bulwark against Soviet power and the doctrinaire Marxism-Leninism that Moscow's leaders practiced to their own national advantage.

STRENGTHENED BY POPE'S ELECTION

The hand of the Polish church was further strengthened by the election of Karol Cardinal Wojtyla, Archbishop of Cracow, to become Pope John Paul II in 1978 and by his subsequent visit to Poland.

Cardinal Wyszynski's influence and the credibility of his church among the people were strong enough to restrain militants pushing the union leader, Lech Walesa, in one direction and ideological hard-liners pulling the Communist Party leader, Stanislaw Kania, in the other, while Moscow grappled with the problem of what to do about the tumult.

When the economic woes and the workers' dissatisfaction erupted in unrest in 1980, the state found itself unable to cope with them. Thus the astonishing spectacle in the spring of 1981, when Mr. Kania and Mr. Walesa and their aides went to the Cardinal's palace in Warsaw for discussions. And the Cardinal's representatives, the bishops of Poland, openly mediated local disputes over labor grievances or police excesses.

WARNED OF NATIONAL DISASTER

Cautious in his dealings with the state, Cardinal Wyszynski did not leap into the fray when strikes swept Poland to paralyze an ailing economy. Instead, he first told the workers to recognize the dangers of national disaster and outside intervention by going back to work and negotiating. That advice and the Government's unprecedented broadcast of his speech on television in that strike-ridden August of 1980 rankled many workers and Catholic intellectuals.

But Cardinal Wyszynski then followed his longstanding admonition to the church never to go against the will of the people. He met with Mr. Walesa the following month and eventually gave full support to the independent union and its struggling sister group, the farm union. But he also reminded them of the danger to the nation if they pushed the Government too far instead of holding it to hard-won promises.

WAS ORDAINED IN 1924

Stephan Wyszynski, the son of a village teacher and church organist, was born Aug. 3, 1901, near Lomza in the northeastern Poland, then part of the Russian Empire. He was ordained in 1924 and posted as vicar to Wloclawek, where he edited a Catholic daily newspaper and a scientific monthly.

He earned a doctorate in sociology and canon law at the Catholic University in Lublin in 1929 and also studied in Italy, France and Belgium. During nine years as professor at the Higher Seminary of Wloclawek, he became known as a "labor priest" close to the working people, for whom, in 1935, he founded and directed the Catholic Workers University.

The author of several books on labor topics, the priest upset conservative members of the church hierarchy. He was playing a role as counsel in labor disputes when the Germans invaded Poland in 1939.

The Nazis imprisoned much of the Polish clergy, but Father Wyszynski was spared and became a resistance leader and organizer of clandestine church meetings. He was consecrated Bishop of Lublin in 1946.

NAMED ARCHBISHOP BY POPE PIUS

Two years later, on the death of Augustus Cardinal Hlond, Pope Pius XII named him Archbishop of Gniezno and Warsaw and Primate of Poland. By then, the Communists had taken full control of the country under Soviet tutelage and set out to reduce the church to impotence.

Archbishop Wyszynski signed an agreement in 1950 by which the church promised not to meddle in politics and the state promised to respect freedom of worship and to let the church print its publications and give religious instruction to schoolchildren.

That first compromise for the sake of survival did not sit well with many Poles, who saw the regime chipping away at the historical role of their church. In any case, the pact did not withstand the repressions that followed. Priests were jailed, the Catholic press was stilled, and Archbishop Wyszynski had to use all his skill at diplomacy, his courage and sheer stubborness in the ensuing decades to win back the relative freedom the 1950 agreement had granted.

RAISED TO RANK OF CARDINAL IN 1952

Pope Pius announced the Archbishop's elevation to the rank of Cardinal in 1952. But fearful of not being allowed back into Poland, Cardinal Wyszynski kept away from the consistory in Rome the following January. When he refused to denounce a bishop jailed on espionage charges in 1953, he was himself arrested and confined at a monastery for three years.

In one of the ironies that marked Cardinal Wyszynski's life, Wladislaw Gomulka, the Communist leader in the early postwar period, had also been purged and jailed by the Stalinist under Boleslaw Bierut. When Mr. Gomulka returned to power in 1956, he had Cardinal Wyszynski returned to his palace.

Mr. Gomulka's return marked a lessening of Soviet domination. By freeing the Cardinal, he was seeking to gain popular support for his rule. And over the years that followed, both sides continued to grope for a modus vivendi of mostly uneasy coexistence.

The Cardinal often denounced what amounted to repression by the Government and to castigate Mr. Gomulka's assertion that no such thing existed. Railing against Poland's "caesars," he cited 20 organizations trying to turn Poles into a nation of atheists and obstructing their right to worship freely.

SHEEP DRAWN CLOSER TOGETHER

Temporal power could not overcome the Church in Poland, he frequently said.

"Strike the shepherd and the sheep will disperse," he exclaimed in a fiery sermon at Poland's holiest shrine, in Czestochowa, in January 1966 after the regime had denied him a passport for a visit to Rome. "Often this has been tried and proved true. But whenever it was done in Poland, it served only to draw the sheep closer together."

Even in recent years, he spoke out against bureaucrats and policemen interfering with religious observations and processions, and he was constantly attacking measures that curbed the construction of churches, demanded their financial records or hamstrung their publications and ability to teach.

Still, with the comparative peace attained under the Gomulka regime, Cardinal Wyszynski began to travel outside Poland. He met Pope Pius XII in 1957 and returned in 1958 for the election of Pope John XXIII and for Pope John's funeral and the election of Pope Paul VI in 1963.

Leading the church in an intensely nationalistic country, Cardinal Wyszynski had his own quarrels with the Holy See, particularly with Pope Paul, whom he visited repeatedly for discussions.

The chief irritant then was the Vatican's slowness in honoring Poland's sovereignty over the western provinces seized from Germany at the end of World War II. By 1970 Mr. Gomulka and Chancellor Willy Brandt of West Germany had signed an agreement by which Bonn formally accepted the postwar borders.

Cardinal Wyszynski, not wanting to lose the people's trust to the Communists. pressed the Vatican to follow suit. He was annoyed when the Vatican chose to take a legalistic attitude by waiting for formal ratification of the treaty, which was held up for a time by the issue of Germans still in the region who wanted to go west.

In 1970 riots broke out on the Baltic coast of Poland over higher food prices, and Cardinal Wyszynski voiced the country's shock over the severity with which the disturbances were quelled.

A new leadership was installed with Edward Gierek as party chief. He and the new Prime Minister, Piotr Jaroszewicz, promptly made overtures to the Cardinal, who coaxed concessions from them. In return he provided them with a voice of moderation when the gathering storm overtook the nation in 1980 and a discredited leadership again fell.●

● Mr. CORRADA. Mr. Speaker, I am pleased to join my colleagues this afternoon to pay tribute to the late primate of Poland, Stefan Cardinal Wyszynski.

Cardinal Wyszynski, in my opinion, ranks among the giants of this century and as a patriot and a man dedicated to the preservation of his land's historical and cultural heritage is unsurpassed by no one.

The people of Poland, and indeed the free world, owe a debt of gratitude to this great man who, almost single handedly, and using the force of his personality and his convictions, stood up to the Soviet Communist machine when the awesome power of this machine was dedicated to dismantling the civil, social, and economic institution of Poland.

Through his efforts many of the historical institutions of Poland, particularly the Catholic Church, were preserved. The spirit and the legacy of Cardinal Wyszynski will live on and in that sense he will be part of the Polish people forever.●

● Ms. FERRARO. Mr. Speaker, Stefan Cardinal Wyszynski, Archbishop of Gniezno and Warsaw and Roman Catholic Primate of Poland died on May 28. The death of this great churchman and national leader of the Polish people is a loss to all the world.

Cardinal Wyszynski led the people of Poland against the forces of tyranny, nazism, and communism. Cardinal Wyszynski was a man of freedom. His courage to speak against repression by the Government in Poland became a guiding light for all the Polish people to follow.

Cardinal Wyszynski provided for the spiritual needs of the Polish people. He was determined not to let an atheist regime destroy 10 centuries of Catholicism. Cardinal Wyszynski always insisted that the Polish people have the constitutional right of free worship.

Stefan Cardinal Wyszynski was a man of courage, a man of peace, and a man devoted to the love of people and God. I, therefore, join my colleagues in mourning the loss of this noble and great man.●

● Ms. OAKAR. Mr. Speaker, it is with sincere remorse that the world community pays final tribute to Cardinal Stefan Wyszynski, the church of Poland's primate for better than 20 years standing.

Cardinal Wyszynski's voice of reason and strength preserved not only the independence of the Polish Catholic Church from the oppressive grip of communism, but also gave rebirth to a national pride. Cardinal Wyszynski was both the spiritual leader and the cornerstone of stability for the Church of Poland, her people, and in great measure the world. His tutelage was not only confined to spiritual matters. As recently as 1979, the cardinal played an equally significant social-political role in hedging a violent outbreak between strikers and the Government. Cardinal Wyszynski developed and nurtured an unequaled triangle of respect from the Vatican, the Polish citizenry and the Government—a respect that grounded both a delicate peace and built a firm foundation for the potential victory of freedom. The cardinal's brilliant leadership and well-seasoned art of diplomacy has time and again mediated a peace for Poland. While moderation and prudence were the cardinal's tools of negotiation, never did he capitulate on driving home the uncompromising objective of democracy for the Polish society.

Cardinal Wyszynski's clarity of purpose, determination of will and sincerity of spirit distinguish not only his character, but also mirror the resiliency of the Polish nation. He is a 20th century hero of the first rank.

While Cardinal Wyszynski's death silences a voice that preserved a nation, his message is indelibly embedded in the hearts and the minds of the Polish people and his counsel shall endure.

Pope John Paul II has a serious and difficult task before him as he begins the task of choosing a successor for the beloved and capable Cardinal Wyszynski. Our confidence and our prayers are with His Holiness in this endeavor.●

● Mr. ALBOSTA. Mr. Speaker, it is with great sadness that the world notes the passing of Stefan Cardinal Wyszynski of Poland. He was a great man, a true man of God, and a highly respected and beloved leader of his people.

As a Roman Catholic of Polish ancestry, I have had a particular fondness for Cardinal Wyszynski and his heroic efforts on behalf of his people and the church. During his lifetime, Poland has undergone tumultuous times. Cardinal Wyszynski has been a leader and counselor to literally thousands of Poles as they seek in their own consciences to deal with the differences between church teachings and the policies of the government.

Cardinal Wyszynski has, time and again, been an ardent foe of communism whose views were always well known. At the same time, he had the training and intelligence to use his talents and beliefs wisely to assure change in a calm and productive manner. The people of the world can learn many lessons from this skillful and considerate man.

Cardinal Wyszynski is perhaps best known internationally, and perhaps at home also, for his use of the church as a repository and focus for Polish nationalism and pride. It has served as a bright light in dark and bleak times.

His influence on the world will continue to be felt for many years, most specifically through his friend, compatriot, and student, Pope John Paul II. We will miss his presence among us. We can best serve his memory by studying his methods and following his lead. I join with my colleagues in honoring this great Polish churchman.●

● Mr. MARTIN of New York. Mr. Speaker, today we honor a leader whose statesmanship and moral authority, in the face of enormous adversity, were of truly universal dimensions.

Stefan Cardinal Wyszynski was a man who chose to light a candle rather than curse the darkness. His steadfast defense of the right to worship, as a prominent figure in his nation's resistance to the Nazis, through three decades of repressive secular authority in Poland following World War II and, indeed, through 3 years of his own incarceration, served to nurture the flame of the Roman Catholic Church in his homeland. This, in turn, kept alive centuries-old national traditions that fortified the Polish people in their resistance to any domination by the Soviet Union.

One of the political ironies of our time and a sure measure of Cardinal Wyszynski's success was evident only recently when the secular authorities against whom he had struggled for so long turned to him in their hour of crisis, explicitly recognizing his stature and the strength of his church in Poland.

Today, Mr. Speaker, the flame preserved by this great son of Poland burns more brightly than ever in the hearts of his own spiritual sons and daughters.●

● Mr. DWYER. Mr. Speaker, as the world mourns the passing of one of the most courageous religious heroes of our time, Stefan Cardinal Wyszynski, it is most fitting that we in the Congress humbly pay tribute to this very special man.

His quiet fortitude and fearless leadership have left a mark on church and human rights policies not just in Poland, but worldwide. He was moderate but firm in his approach to the religious and social upheaval in his homeland, fair but diligent in his appeals for needed change.

He effected that change through his profound commitment to peace and reason that won for him universal respect. In New Jersey's 15th District, where so many of his compatriots live, work, and now grieve at his passing, that respect is most deeply felt.

Forthright and tireless in his pursuit of religious and human justice, Cardinal Wyszynski will be sorely missed, yet his legacy will be with us always.●

● Mr. WEBER of Ohio. Mr. Speaker, in the past year, the eyes of the world have repeatedly turned to Poland as important events have unfolded. We have been inspired by the solidarity of Polish workers as they work with great diligence and courage to secure basic rights in the face of Communist oppression. We have seen the love and pride of the Polish for one of their sons as Pope John Paul II has spread his message of love and peace throughout the world.

All of the world is now saddened by the news from Poland of the passing of one of her other sons, the primate of Poland, Stefan Cardinal Wyszynski.

Since the Communist takeover of Poland, following World War II, Cardinal Wyszynski represented strength, inspiration, and continuity to the people as the leader of the Polish Catholic Church. Cardinal Wyszynski's enlightened leadership kept alive the faith and spirit of the Polish in spite of a regime which would make every effort to crush such feelings; a rarity indeed among the world's oppressed nations.

The people of the world should mourn the passing of this great leader, but should find inspiration in the belief that the unique spirit he is responsible for will live on in Poland.●

● Mr. DAUB. Mr. Speaker, with the passing of Cardinal Stefan Wyszynski, both Poland and the world have lost a great spiritual leader.

Throughout his battles for a free and independent Poland, the cardinal demonstrated that it is the longer view of history which prevails over political expedience. It was this historical perspective which enabled the primate of Poland to retain his influence while successive Communist leaders rose and fell.

The same perspective prevailed also in 1956 when the cardinal's guidance in a large way prevented a Russian invasion which afflicted Hungary that same year.

Central to his philosophy were powerful, and I think correct, views of man's relationship to God and state. He felt strongly that man ought to be in the service of God but not a slave of the state.

The right of people to self-determine their own destiny was perhaps his most closely held political conviction. His revulsion at the Soviet imposition of a Communist government on the people of Poland was only equaled by his revulsion at the possibility of yet another Soviet violation of Poland's national integrity.

The cardinal was regarded as a living reminder of his homeland's age-old quest for freedom and independence. His death impedes this quest, but the memory of him insures its ultimate success.●

● Mr. GRADISON. Mr. Speaker, I join with my colleagues and freedom-loving people around the world in tribute to the late Stefan Cardinal Wyszynski, archbishop of Gniezno and Warsaw and primate of Poland. His death on May 28 removes not only a great spiritual leader for millions of Catholic Poles but also a courageous and spirited advocate for human rights.

Spared from imprisonment by the Nazis during their occupation of Poland in World War II, then-Father Wyszynski became a resistance leader and organizer of clandestine church meetings. His elevation to primate coincided with the assumption of complete power in Poland by the Communist Party in 1948. Despite an agreement signed in 1950 between church and state in which the church promised not to meddle in politics and the state promised to respect the freedom to worship and propagate the faith, the Communists set out to undermine the church as a force in the lives of the Polish people.

During the 1950's, priests were jailed and the Catholic press was stilled. Cardinal Wyszynski worked tirelessly and skillfully to moderate between church and state. He himself was jailed on espionage charges in 1953 for 3 years. Tension between church and state

lessened during the latter 1950's and the 1960's, but this remarkable man remained vigilant to the intrusions of the government on the church's prerogatives.

His critical role in the recent labor disputes has been well documented. During 9 years as a professor at the Higher Seminary of Wloclawek, he became known as a labor priest, close to the needs and feelings of Poland's working people. In 1935, he founded and directed the Catholic Workers University.

After the strikes of last July and August, Cardinal Wyszynski met with both Stanislaw Kania, Poland's Communist Party leader, and Lech Walesa, the leader of the Solidarity Labor Union, urging both sides to moderate their positions. As a result, Poland averted a serious showdown and almost certain intervention by the Soviet Union.

Pope John Paul II, a protege of the late cardinal and a personal friend through years of service, eulogized Wyszynski as "for more than 30 years * * * the keystone of the unity of the church in Poland." This accomplished leader deserves the honor and respect of all Americans, regardless of religious beliefs.●

GENERAL LEAVE

Mr. DERWINSKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of this special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

ITALIAN-AMERICAN HERITAGE WEEK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, I was glad to join my colleagues in cosponsoring House Resolution 145, which was introduced by my good friend from New Jersey, the Honorable MATTHEW J. RINALDO, expressing the sense of the House of Representatives that the week commencing June 7, 1981, be designated as "National Italian-American Heritage Week."

I am also delighted to join my colleagues in the House in paying tribute to the great contributions that Italo-Americans have made, not only to the discovery of America, but since the discovery of America, to the development of the United States.

In all walks of our country's life, Americans of Italian heritage have made innumerable and lasting contributions. Italians helped to explore the new land and begin new settlements. William Paca was a signer of the Declaration of Independence, and Italians fought heroically in all of America's wars to preserve our freedom. In music, art, business, science, sports, education, politics, and architecture, Italian immigrants rank among America's finest throughout our Nation's history.

The designation of Italian-American Heritage Week is a tribute to the role of Italian immigrants in making our country strong and free, and Americans of Italian descent continue to carry forward the New World tradition of determination, hard work, and courage begun by Christopher Columbus.

A copy of House Resolution 145 follows, which passed in the House of Representatives by voice vote on June 4, 1981:

H. RES. 145

Whereas the House of Representatives full recognizes that it is essential for the people of the United States of America to understand and respect the rich heritage of all American ethnic groups if we are to maintain and foster national unity;

Whereas the many great contributions of Italian-Americans to our country must be recognized and the deep Western roots of Italian-American culture, history, and traditions must be appreciated; and

Whereas Italian-Americans, like Columbus, the famous Italian geographer-navigator-explorer, have had to rise by using individual initiative, imagination, and resourcefulness—traits that have distinguished the American character and made us a Nation of individuals who time after time have pressed forward to victory in situations that seemed to promise certain defeat: Now, therefore, be it

Resolved, That it is the sense of the House of Representatives that the week commencing on June 7, 1981, should be designated as "National Italian-American Heritage Week" and that the people of the United States should observe such week with appropriate ceremonies and activities.●

EXPORT-IMPORT BANK FINANCING NOTIFICATION

The SPEAKER pro tempore. Under previous order of the House, the gentleman from North Carolina (Mr. NEAL) is recognized for 5 minutes.

● Mr. NEAL. Mr. Speaker, I am notifying the House today of a U.S. Export-Import Bank proposal to help finance the sale of $142 million worth of nuclear power generating equipment manufactured by the General Electric Co. to the Government of Romania.

The Eximbank is prepared to authorize a direct credit of $120,742,500 to make possible the sale of two 700-megawatt nuclear steam turbine generators and related spare parts and services for use in Romania's Cernavoda Nuclear Power Station.

General Electric is facing stiff competition for this sale from European manufacturers, particularly the French, whose government export credit agency is prepared to finance the sale on highly favorable terms. If Eximbank support enables General Electric to make the sale, the company will have an opportunity to sell additional equipment for another 12 to 14 nuclear power units planned by Romania.

Because of slack demand in the United States, the export market has become important to the survival of the large steam turbine generator industry in this country.

This Eximbank financing notification was referred to me as chairman of the Banking Committee's Subcommittee on International Trade, Investment and Monetary Policy. Section 2(b)(3)(iii) of the Export-Import Bank Act of 1945, as amended, requires that the Eximbank notify Congress of proposed loans or guarantees involving the export of nuclear technology or equipment. Unless Congress determines otherwise, the Eximbank may give final approval to the transaction after 25 days of continuous session of the Congress after notification.

I am submitting for the RECORD the Eximbank notification, which gives details about the proposed transaction with Romania. I would welcome any comments or questions my colleagues might have on this financing proposal.

The Eximbank material follows:

EXPORT-IMPORT BANK OF THE UNITED STATES,
Washington, D.C., May 26, 1981.

Hon. STEPHEN L. NEAL,
Chairman, Subcommittee on International Trade, Investment and Monetary Policy, House of Representatives, Rayburn House Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: Eximbank has submitted a statement to the Speaker of the House of Representatives and the President of the Senate in accordance with the provisions of Section 2(b)(3)(iii) of the Export-Import Bank Act of 1945. I am taking the liberty of providing you with a copy of this statement.

Sincerely,

NANCY S. PIGMAN,
Congressional Relations Officer.

EXPORT-IMPORT BANK OF THE UNITED STATES,
Washington, D.C., May 26, 1981.

The Speaker, House of Representatives, U.S. Capitol, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to Sections 2(b)(3) (i) and (iii) of the Export-Import Bank Act of 1945, as amended, Eximbank hereby submits a statement to the House of Representatives with respect to the following transaction involving U.S. exports to the Socialist Republic of Romania ("Romania").

A. DESCRIPTION OF TRANSACTION

1. Purpose

Eximbank is prepared to authorize a credit of $120,742,500 to the Government of Romania ("Government") to facilitate the purchase in the United States of two 700 MW nuclear steam turbine generators and related spare parts and services for use in the Cernavoda Nuclear Power Station. The

Government has selected the General Electric Company ("GE") to provide the goods and services. The total U.S. export value of this transaction is $142,050,000.

2. Identity of the parties

Romenergo, a Romanian Foreign Trade Organization responsible for overall implementation of the Government's power projects and related imports, is the borrower. Eximbank has made one prior loan to this organization, and it is current on all its obligations to the Bank.

The Romanian Bank for Foreign Trade, a government-owned bank, will unconditionally guarantee repayment of the Eximbank Credit. The guarantee constitutes a general obligation of Romania for which its full faith and credit is pledged. Eximbank has received the guarantee of the Romanian Bank for Foreign Trade on all loans extended to Romania.

3. Nature and use of goods and services

The goods and services to be exported from the United States consist of two 700 MW nuclear steam turbine generators, spare parts and related services to be used in Unit Nos. 1 and 2 of the Cernavoda Nuclear Power Station. The nuclear portion of the plant is being supplied by Atomic Energy Canada Limited utilizing CANDU technology, and the balance of the plant is being supplied by an Italian Company, Ansaldo Meccanico Nucleare, in association with GE.

4. Presidential determination and executive branch review

Pursuant to Section 2(b)(2) of the Export-Import Bank Act of 1945, as amended, the President on May 20, 1981, determined that it is in the U.S. national interest for Eximbank to extend a loan to Romania for this transaction. The Secretary of State is transmitting this determination to the Congress, and a copy of it is attached to this letter.

In addition, in accordance with established procedures, the Department of Energy, the Department of State and the National Advisory Council on International Monetary and Financial Policies have advised that they have no objection to Eximbank's proceeding with the transaction.

B. EXPLANATION OF EXIMBANK FINANCING

1. Reasons

GE faced intense competition from European suppliers whose bids included financing proposals for 85% of the contract price and were supported by their respective official export credit agencies. In the final stages of negotiations, Alsthom of France emerged as GE's strongest competitor providing financing at a fixed interest rate of 7¾% per annum supported by Compagnie Francaise d'Assurance pour le Commerce Exterieur ("COFACE") France's export credit agency.

The exports financed by Eximbank will have favorable impact on income and employment in the geographic areas where GE facilities are located. Specifically, GE states that the sale will result in a total of two million hours of employment in GE facilities in Schenectady, New York; Charleston, South Carolina; Portland, Maine; and Merrimack, New Hampshire. In addition, GE indicates that approximately 2,000 sub-suppliers in various states, including Indiana, Massachusetts, New Jersey, New York, Ohio, Pennsylvania, South Carolina, Vermont and Wisconsin will participate in this transaction.

Because of slack domestic demand, the export market has become important to the survival of the large steam turbine generator industry. Also, this first sale should result in follow-on sales of GE components for the other 12 to 14 units currently planned in the Romanian nuclear power program.

2. The financing plan

The financing plan for the total U.S. procurement for the turbine generators, spare parts and services supported by the Eximbank Credit is as follows:

	Percent of U.S. costs	Amount
Cash payment	15	$21,307,500
Eximbank direct credit	85	120,742,500
Total	100	142,050,000

(a) Eximbank Charges

The Eximbank Credit will bear interest at the rate of 8 percent per annum, payable semiannually. The interest rate to Romania is 7¾ percent per annum with GE paying the difference of ¼ of 1 percent per annum. Eximbank will charge a commitment fee of ½ of 1 percent per annum on the undisbursed amounts of the Eximbank Credit.

(b) Repayment Terms

Aggregate disbursements under the Eximbank Credit will be repaid by Romania in 20 semiannual installments beginning July 5, 1989, six months after the estimated start-up date of the second turbine generator.

3. Countertrade

GE has entered into a countertrade agreement with the Romanians as a condition of award of this sale because all of the other foreign competitors also offered to accept countertrade arrangements. The countertrade agreement calls for GE to purchase over an eleven year period goods equal to the value of GE exports to Romania. It is expected that a large portion of the Romanian goods will be purchased for sale to third country markets, but some imports into the U.S. will occur. Eximbank has examined the countertrade agreement and has concluded that the agreement is not likely to have a significant adverse impact on the U.S. economy.

In summary, Eximbank believes that the entire transaction should be favorable to the United States.

Also attached is additional information on Eximbank activity in and economic data on the country of Romania.

Sincerely,

MARGARET W. KAHLIFF,
Director.

THE WHITE HOUSE,
Washington, May 20, 1981.

Presidential Determination No. 81-7.

Memorandum for the Secretary of State.

Subject: Determination under Section 2(b)(2) of the Export-Import Bank Act of 1945, as amended—Socialist Republic of Romania.

Pursuant to Section 2(b)(2) of the Export-Import Bank Act of 1945, as amended, I determine that it is in the national interest for the Export-Import Bank of the United States to extend a credit in the amount of $120,742,500 to the Socialist Republic of Romania in connection with its purchase of two nuclear steam turbine generators and related services and spare parts.

On my behalf, please transmit this determination to the Speaker of the House and the President of the Senate.

This determination shall be published in the Federal Register.

RONALD REAGAN.

ROMANIA

Area: 237.5 thousand square kilometers.

Population: 22.1 million (1979).

Population Density: 93.2 per square kilometers.

Population growth rate: 0.8 percent.

REPAYMENT EXPERIENCE

Payment of principal, interest and fees due on Eximbank loans to Romanian borrowers have generally been prompt. Since Eximbank began lending activity in Romania in 1972 there have been no defaults or reschedulings.●

EXPLANATION AS TO VOTE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DANIELSON) is recognized for 5 minutes.

● Mr. DANIELSON. Mr. Speaker, I was unable to be present on the floor of the House of Representatives on May 28, 1981, when the House voted on rollcall No. 52, and voted to approve the Journal of Wednesday, May 27, 1981, and on rollcall No. 53, to suspend the rule and pass H.R. 3520, to amend the Clean Air Act to provide compliance date extensions for steelmaking facilities on a case-by-case basis to facilitate modernization. Had I been present, I would have voted "aye" on rollcall No. 52 and "aye" on rollcall No. 53.●

RIO GRANDE CONFERENCE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 15 minutes.

Mr. GONZALEZ. Mr. Speaker, I certainly wish to allay any fears, I certainly do not intend to take all 15 minutes this afternoon. However, impulsed as I am by the need to go on the record, I wish to report that this past Saturday it was my honor and privilege, and personal satisfaction, to address the annual Rio Grande United Methodist Church Conference which is an historical one, perhaps the most historical of all the meetings in that particular church or Christian denomination in the Southwestern United States.

To give my colleagues an idea of its historicity, all of the transactions in the official proceedings of the conference are in Spanish because there are Spanish-speaking delegates from both the States of New Mexico, as well as Texas, and even some delegates from northeastern Mexico.

The meeting is evocative of a history of the United States that has yet to be written, that particular developmental history in the southwest border country, and particularly the 20-year period known as the Mexican revolutionary period stretching from about 1910 to 1930. This conference is really unique. As a matter of fact, it is a separate and apart annual conference from the main southwest conference of the Methodist Church which was celebrated in my district in San Antonio, Tex., the heart of the city, in fact at a place adjacent to the Alamo, just a few days prior to the Rio Grande conference last Saturday. But, it is nevertheless an integral part of methodism.

The Rio Grande conference took place at Georgetown, Tex., at another historical site, the Southwestern University, which has been in existence 141 years and is a substantial educational institution with a tremendous background of service to methodism and in imparting education to the people of Texas. It is a beautiful campus. It has grown tremendously, just in the last 20 years, since I served in the Texas State Senate and had occasion last to go to the campus.

In any event, I feel it was a real privilege to attend this particular conference last Saturday. The Methodist bishop for the region, Bishop Ernest Dixon, was there. The vice president of the university, William B. Jones, was also there and there were more than 1,000 persons present at this great conference. The discussion that I was asked to develop was the developing eighties, the decade of the eighties, and the role of the ethnic minorities.

Mr. Speaker, I will insert in the RECORD at this point the substance of the address that I gave in pursuance of that request:

I am grateful to have the opportunity to be here with you, and spend a few minutes reflecting on the eternal dilemma: Where do we go from here? There are never any easy answers or sure road signs to guide us in life's conflicts, no matter how great or small those might be. We travel with certainty only when we move on the basis of firm faith; it is so in daily life, it is so in academic life, it is so in political life. Therefore, when you ask me to talk about the role of minorities in the eighties, you are asking me to describe a map that does not really exist, except in faith—the faith that we can, even in the resurgent spirit of a new know-nothing age of politics, still find ways to improve the lot of people who are all too often left behind, left out, and left hurt in the great swirl and hubbub of our society.

We know at the outset, in the words of Herman Melville, that "there is no steady unretracing progress in this life; we do not progress through fixed gradations * * *." There is no way that we can with certainty say what this decade will bring, or what we will be like at the end of it. All we can know is that we have to strive for the best that is within ourselves, and seek to commit this country to do the best that it can for all of its people.

There is in any country, any society, the temptation to be complacent, to shut out the afflictions and problems of the unfortunate. This is no less true of our great country than of any other—but still there is a redeeming optimism that prevails in our country. Most of us believe that there are very few problems of any kind that can't be licked. That is why Americans didn't let the prairie be the end of the westward movement. There might have been less water and little wood in the West—but Americans discovered that you did not have to have wood or stone to build fences, you could use wire. And you did not have to have water in streams, you could drill deep wells and bring the water from the earth by using the power of the wind. And just as we have tended to be inventive and practical, so have we realized that social problems can be licked, too. Sometimes our efforts to help our fellow man have been terrible failures—prohibition was a disaster—but far more often we have found that there are ways and means of helping our fellow human beings overcome the viscissitudes of life. So we have been optimists.

I like to think that our general optimism has also made us idealists. Justice Brandeis, who himself sprang from a class who were subjected to the most odious kind of discrimination, found it in his heart to say this:

"There is in most Americans some spark of idealism, which can be fanned into flame. It takes sometimes a divining rod to find out what it is; but when found * * * the results are extraordinary."

We know from history and the events of our own lives that idealism is a real and present thing in our society. Where else but in America would anyone dream up an idea as outlandish, and as outlandishly successful, as the Peace Corps? Where else but in America would we find a President inviting, as Franklin Roosevelt did, the Daughters of the American Revolution to think of themselves as immigrants? Where else but in America could there have been the great civil rights movement, that mighty and cresting wave of equality and dignity, that expressed itself in words of idealism and faith that no one could ever forget:

"We shall overcome, we shall overcome, I do believe,

"We shall overcome some day."

Nowhere but in America could you find that kind of movement, born in faith, nourished by optimism, and fueled by pure idealism, crystallized in those words.

And now here we stand, the fight for simple access won. Here we stand, knowing that the real fight is only now beginning. For it means nothing if we have the right to walk into the hamburger joint if we lack the money to buy the burger. It means nothing to have the right to apply for a job if we don't have decent schools to equip us for that job. It means nothing to have the right to buy or rent a home if there are no homes to buy or rent.

The fight of the civil rights movement was a fight for access. The fight today is much harder than that: it is the fight for the mainstream, the fight for economic opportunity.

And this is the key: It is not a fight only for the minority people of this country; it is a fight for all the people of this country.

In the State of Texas about a third of the population could be considered a member of one minority or another. About one Texan in five as Hispanic. About one Texan in eight is a black. It is true that when you talk about unemployment, when you talk about low income, and when you talk about poor education, and when you talk about poor nutrition, those are problems that fall first and hardest and most often on the minority population of this state.

But when you talk about absolute numbers, there are twice as many poor Anglos in Texas as there are poor Hispanics. There are four times more poor Anglos in Texas than there are poor blacks.

Therefore, when we talk about the fight for economic opportunity, we are not merely talking about a fight of, by, and for blacks and hispanics. We are talking about a fight for all poor people.

When we talk about how Republican budget cuts hurt poor people, we too often forget that the greatest number of the poor are not minorities at all, but Anglos.

For all poor people, the fight in this decade is to reach the mainstream, the point where most Americans live: a decent job, a decent education, a decent home, and a decent meal on the table.

Because so many in the minority population are poor, this effort to reach the main-

stream is too easily seen as simply a minority struggle. Such an image is wrong—for the problems of all poor and struggling people are different only in degree. And there is no degree of difference in the pain of poverty; a hungry stomach does not differentiate between races.

In the civil rights struggle, the key was to awaken the realization that civil rights was not just a concern of black people; it was a concern of all people.

I remember vividly that when I filibustered against the infamous segregation bills of the fifties, I did not merely arouse the hatred of rednecks and the suspicions of the FBI. My own friends said they were disappointed in me; that I was trying to reduce my own hispanic brothers down to the level of blacks. But what was any different about laws that tried to exclude me from certain housing, right along with blacks? What was any different about me being excluded from a public park, right along with blacks? What harmed blacks, harmed me. And what offended any human being offended all human beings.

There are many keys to the economic mainstream. It takes more to reach that mainstream than to have an opportunity for a job; it is necessary to be equipped for that job. And so for many, the main thing is to stay in school to gain skills.

We have done well in that task in the last decade, and the progress for minorities has been encouraging. And yet even today among adult Hispanics in Texas, only a third have finished high school. Blacks by contrast can count half their adult number as being high school graduates. Meanwhile, two-thirds of the Anglos have completed a high school education.

Therefore, for a third of the Anglo population, half the black population and two-thirds of the Hispanic population, education remains a supreme priority. Without education, and without skill, the door to opportunity may be open but the threshold remains too high to cross.

What that educational attainment means is this: a third of the Anglo population of this state lives on an income of less than $6,000 a year. Close to 60 percent of Hispanics and blacks on that kind of income—$500 a month.

Here in Texas, if you have less than four years of education, it doesn't make much difference what your ethnic background is: black, white, or brown, anybody with less than a fourth grade education is, two-thirds of the time, working at a low wage blue collar job of one kind or another.

There is nothing dishonorable about honorable work—but what I am saying is that staying in school is the first prerequisite to entering America's true mainstream, and that is the upwardly mobile population, the population that moves up the ladder, rather than being forced to stay on the same level, unable to move ahead.

If we have to be concerned about education, we have to doubly concerned about the forces that are threatening our schools today. All across Texas, there is resentment about property tax levels. Our state's teachers are inadequately paid, and they get nothing like the respect their jobs entitle them to. But most alarming of all is the fact that at the same time the Reagan budget programs intends to cut Federal aid to schools by 25 percent. What this means for disadvantaged people is that it will be next to impossible for schools to provide the kind of remedial and special education in the eighties that they did in the seventies—this, at a time when test scores are confirming that those programs have worked and worked well—this, at a time when we know that the investment in human potential has truly paid off. Just this week, the House Education and Labor Committee, driven by the fantastic budget cuts imposed by the Republican budget, voted to kill future funding for the impacted areas assistance program. This can, if the decision sticks, have disastrous effects on schools in San Antonio that have no conceivable way to relay on local taxes to make up the difference.

And we are seeing moves to dismantle Federal aid to the handicapped. Here in Texas, the clients of the Texas Rehabilitation Commission last year reported a total income of $19 million, before rehabilitation training. After that training, their income went up to $120 million. The cost? About $25 million. Vocational rehabilitation produced, in other words, an increase in income of four dollars for every single dollar that was invested in that training.

Yet that program stands in clear danger today.

I think that if we but had the instruments to measure it, we would see that education of every kind produces the same kind or return on investment. For the poor and disadvantaged, there is absolutely no doubt that the chances of getting a job increases with each additional year of school, and the quality and income from that job likewise increase with each additional year spent in school.

And for that reason, I think that ethnic minorities need first to be concerned about maintaining educational opportunities in the eighties—and this is a concern of every citizen, rich or poor, black or white.

I have said much about education, and I underscore the importance of education as the key to economic opportunity.

But I do not want to leave the impression that the struggle ends there.

If there is no job to be had, qualifications and skills make no difference. If there is no food in the house, it does not matter how great the schools are; hunger and learning aren't compatible. If there is no roof to live under, no clothing to wear, it does not matter if the schools are outstanding.

We have to be concerned with overall economic program. We have to be concerned with programs that make it possible to realize human potential.

When an administration creates deliberately an economic program that forces high interest rates upon us—we have to understand that those interest rates force a general economic slowdown, a general rise in unemployment, a general rise in small business bankruptcies. Those are the things that fall hardest on those who have the least to begin with—and most particularly on minority groups. Does the building industry have trouble? Then we have to realize that the small builders and the small subcontractors—a great many of whom are minority persons struggling for a breakthrough—are hit first, hardest and longest of all. Does the auto industry have trouble? It is the assembly-line worker, the car salesman, the mechanics who suffer the first blows, the hardest knocks, and the greatest struggle. Do the banks cut off loans? We have to understand that it is the corner grocer, the neighborhood dry cleaner, the independent merchant, who really suffers the consequences.

In each and every case, it is not just the minority who suffer—it is every struggling person in this country who suffers.

What we have to look for them, is ways and means to make common cause with everyone who shares the concerns and burdens of proverty, or handicaps of one kind or another.

It was making that common cause that allowed the great civil rights breakthrough. Now that we are looking for economic opportunity, the fight is far more complex, far more subtle, far more difficult—but it can only be won in the same way: by making common cause with all who are poor, all who are oppressed, all who need help, and all who care about human decency.

What we cannot afford is to become locked in some sterile self-isolation.

Not long after the Civil War, Walt Whitman wrote a great essay, "Democratic Vistas." We have to understand that Whitman loved this country as few others could; he saw its greatness torn assunder; he worked in military hospitals around Washington, and witnessed the terrible tragedy of war; and he had mourned the death of Lincoln. And yet, despite all that, he looked to the future and saw a nation, which he said, would eventually have "forty or fifty great States." And he saw in America a place where every individual could realize the best in himself. He saw equality for women. He saw the building of a unique, ideal society. And he saw the dangers of injustice and isolation: he might have been thinking of today's demands for blind conformity when he wrote:

"The great word Solidarity has risen. Of all dangers to a nation, as things exist in our day, there can be no greater one than having certain portions of the people set off by a line drawn—they not privileged as others, but degraded, humiliated, made of no account."

What he was saying was this: We can neither allow ourselves to be cast into ethnic stereotypes, nor can we put ourselves into such a mold. Just as we would not have society put us into an isolated box, neither should we, in our own pride, impose rigid conformity on ourselves. In Whitman's vision of America, every man and woman would be unique, would honor their own roots, but be free to reach out in all directions to other people, other citizens. He saw American individualism as "Not that half only * * * which isolates. There is another half, which is adhesiveness or love, that fuses, ties, and aggregates, making the races comrades, and fraternizing all."

Whitman lived and wrote at a time of great national disillusionment. "The din of disputation rages around me," he wrote. "Acrid the temper of the parties; the President sends his message, reconstruction is in abeyance; the nomination and the contest for the twenty-first Presidential draw close, with loudest threat and bustle." But he did not despair:

"Of these, and all the like of these, the eventuations I know not; but well I know that behind them, and whatever their eventuations, the vital things remain safe and certain, and all the needed work goes on."

So are we in an age of disillusionment. The industrial world sees slow growth, and no way to cope with the insidious effects of inflation—and so the rich intend to build their walls higher and surround their wealth with moats, fearing that they might lose everything.

The politics of the Administration today is a new period of Know-Nothing—something that Whitman knew very well. The Administration puts its civil rights litigation on hold; it spends all its energies disman-

tling education, housing, and employment programs, saying that when the economy is right, everyone will be all right. But they ignore and forget the experience of our own past. It was only in the sixties that we had ideal economic conditions like those Stockman promises. Yes, in the sixties we had low unemployment, we had low inflation and we had rapid growth. But we also had millions who were left out of the general prosperity, millions who has no way to latch onto the promise of America—the promise that they too could become the kind of individuals we all want to be—the promise that every man and woman could realize their full potential. We discovered then that general prosperity and stability does not bring with it automatic success for everyone. There are those for whom the door may be open, but the threshold too high to step over. There are those who struggle for food, for the bare necessities of life, for any kind of hope at all.

That is why we had riots: in the midst of plenty, there was despair.

And that is why the new Know-Nothing age is so dangerous. It ignores the reality that even when there is plenty, even when there is economic stability, there are those who need help to survive and to realize their share of the dream.

For us, then, for those of us who are ethnic minorities, and for those who care about people who are in need, this is the task of the eighties:

We must first and foremost defend the basic civil rights that have been so hard won. After all, as Melville warns, the gradations of progress aren't automatic, and retracing our steps is a possibility. It would be tragic to forget that vigilance is not only prudent, but absolutely necessary in an age where the President aims to tear down the structures that protect civil rights from affirmative action right down to the elemental human rights of prisoners.

Secondly, we must concentrate our energies and resources on the fight for economic opportunity—for it means little or nothing to have the right to ride the bus if we can't scrape up the money to buy the ticket, or to enter school where there are no books.

And third, we must make common cause with others. When the civil rights of some are threatened, the civil rights of all are threatened. When poverty afflicts minorities, it also afflicts those who are not in our number.

We cannot let ourselves be isolated, or work in ways that isolate ourselves.

The great strength of this country, as Whitman observed, is in its diversity. He saw in us a great, rolling mass—individual and yet united. No matter how great the concern, how far the vision, "sooner or later we come down to one single, solitary soul."

And so it is with us.

We have to concern ourselves with the greatest good for the greatest number. And yet we can never forget that for people of faith and people of good will, we can never forget the individual dignity and worth of each "single, solitary soul."

That is what our country is about, it is what our faith is about, and it is what our task is about. If we maintain civil rights, if we achieve economic opportunity, we can only do it as part of a great nation that remains dedicated to the achievement of individual potential, a nation that prizes most of all, its own people.

That is why the song reads:

We shall overcome * * * black and white together,

We shall overcome, I do believe.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. GLICKMAN) to revise and extend their remarks and to include extraneous matter:)

Mr. GONZALEZ, for 15 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. WEAVER, for 60 minutes, on June 9.

Mr. NEAL, for 5 minutes, today.

Mr. DANIELSON, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. ROBERTS of Kansas) and to include extraneous matter:)

Mr. RITTER in two instances.

Mr. WILLIAMS of Ohio.

Mr. CORCORAN.

Mr. DORNAN of California.

Mr. GRADISON.

Mr. PORTER.

Mr. FIELDS in two instances.

Mr. CLAUSEN.

Mr. COURTER.

(The following Members (at the request of Mr. GLICKMAN) and to include extraneous matter:)

Mr. LEVITAS.

Mr. ANDERSON in 10 instances.

Mr. GONZALEZ in 10 instances.

Mr. BROWN of California in 10 instances.

Mr. ANNUNZIO in six instances.

Mr. JONES of Tennessee in 10 instances.

Mr. BONER of Tennessee in five instances.

Mr. REUSS.

Mr. FOLEY.

Mr. SKELTON.

Mr. RAHALL.

Mr. NATCHER.

Mr. MAZZOLI.

Mr. HUGHES.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table, and under the rule, referred as follows:

S. 1197. An act to amend and extend certain Federal laws relating to housing, community, and economic development, and related programs, to provide an improved and expedited multifamily mortgage foreclosure procedure, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

ENROLLED BILLS SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee has examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 2156. An act to amend title 38, United States Code, to extend by 12 months the period during which funds appropriated for grants by the Veterans' Administration for the establishment and support of new State medical schools may be expended; and

H.R. 3512. An act making supplemental and further continuing appropriations for the fiscal year ending September 30, 1981, rescinding certain budget authority, and for other purposes.

BILLS PRESENTED TO THE PRESIDENT

Mr. HAWKINS, from the Committee on House Administration, reported that that committee did on June 5, 1981, present to the President, for his approval, bills of the House of the following title:

H.R. 2156. An act to amend title 38, United States Code, to extend by 12 months the period during which funds appropriated for grants by the Veterans' Administration for the establishment and support of new State medical schools may be expended; and

H.R. 3512. An act making supplemental and further continuing appropriations for the fiscal year ending September 30, 1981, rescinding certain budget authority, and for other purposes.

ADJOURNMENT

Mr. GLICKMAN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 1 o'clock and 40 minutes p.m.), the House adjourned until tomorrow, Tuesday, June 9, 1981, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1535. A letter from the Deputy Secretary of Defense, transmitting six reports of violations of the Anti-Deficiency Act, pursuant to section 3679(i)(2) of the Revised Statutes, as amended; to the Committee on Appropriations.

1536. A letter from the Secretary of Agriculture, and the Under Secretary of Interior, transmitting a preliminary report on the Youth Conservation Corps for 1980, pursuant to section 5 of Public Law 93-408; to the Committee on Education and Labor.

1537. A letter from the Secretary of Defense, transmitting the semiannual report on the activities of the audit, inspection and investigative units of the Department of Defense, covering the period ended March 31, 1981, pursuant to section 8(a)(1) of Public Law 95-452; to the Committee on Government Operations.

1538. A letter from the Deputy Assistant Secretary of Defense (Administration), transmitting a report of a new record system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

1539. A letter from the Acting Administrator, General Services Administration, trans-

mitting the annual report for fiscal year 1980 on personal property furnished to non-Federal recipients, pursuant to section 202(e) of the Federal Property and Administrative Services Act of 1949, as amended; to the Committee on Government Operations.

1540. A letter from the General Counsel, U.S. Arms Control and Disarmament Agency, transmitting reports on political contributions by Ambassador-designate Edward L. Rowny, and members of his family, pursuant to section 304(b)(2) of Public Law 96-465; to the Committee on Foreign Affairs.

1541. A letter from the Acting Director, Defense Security Assistance Agency, transmitting notice that the Department of Defense has provided various items of emergency military equipment and certain assistance to El Salvador pursuant to section 506(b)(2) of the Foreign Assistance Act of 1961, as amended; to the Committee on Foreign Affairs.

1542. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b(a); to the Committee on Foreign Affairs.

1543. A letter from the Secretary of the Interior, transmitting the second annual report on public lands management, as of October 31, 1980, pursuant to section 311 of the Federal Land Policy and Management Act of 1976; to the Committee on Interior and Insular Affairs.

1544. A letter from the Secretary of Energy, transmitting a report on results of an investigation of the allegations against Mr. James B. Hammet, administrator, Southwestern Power Administration, Tulsa, Okla., pursuant to 5 U.S.C. 1206(b)(5)(a); to the Committee on Post Office and Civil Service.

1545. A letter from the Vice President for Administration, U.S. Synthetic Fuels Corporation, transmitting the financial report of the Corporation for the quarter ended March 31, 1981, pursuant to section 177(c) of Public Law 96-294; jointly, to the Committees on Banking, Finance and Urban Affairs, and Energy and Commerce.

1546. A letter from the Comptroller General of the United States, transmitting a report on work measurement programs in Department of Defense maintenance depots (PLRD-81-20, June 8, 1981); jointly, to the Committees on Government Operations and Armed Services.

1547. A letter from the Comptroller General of the United States, transmitting a report on the minerals management policymaking process of the Department of the Interior (EMD-81-53, June 5, 1981); jointly, to the Committees on Government Operations and Interior and Insular Affairs.

1548. A letter from the Comptroller General of the United States, transmitting a report on the Department of Energy's procedures for awarding a contract to operate the Argonne National Laboratory and other related matters (EMD-81-66, June 8, 1981); jointly, to the Committees on Government Operations and Science and Technology.

1549. A letter from the Comptroller General of the United States, transmitting a report on changes needed in the Federal assistance system to encourage productivity improvement in State and local governments administering Federal assistance programs (AFMD-81-51, June 5, 1981); jointly, to the Committees on Government Operations, Agriculture, and Ways and Means.

1550. A letter from the Comptroller General of the United States, transmitting a report on assessing the impact of Federal and State taxes on the domestic minerals industry (EMD-81-13, June 8, 1981); jointly, to the Committees on Government Operations, Interior and Insular Affairs, and Ways and Means.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HAWKINS: Committee on House Administration. Report on allocation of budget totals by program (Rept. No. 97-128). Referred to the Committee of the Whole House on the State of the Union.

SUBSEQUENT ACTION ON BILLS INITIALLY REFERRED UNDER TIME LIMITATIONS

Under clause 5 of rule X, the following actions were taken by the Speaker:

The Committee on Science and Technology discharged from further consideration of the bill (H.R. 2330) on June 5, 1981.

The bill (H.R. 3603) referred for a period ending not later than June 19, 1981, to the Committee on Banking, Finance and Urban Affairs only for consideration of subsection 1506(b) of the bill, and to the Committee on Ways and Means only for consideration of subsection 1506(b) and paragraph 2 of section 502 of the bill.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

[*Omitted from the Record of Thursday, June 4, 1981*]

By Mr. DANIEL B. CRANE (for himself and Mr. PAUL):

H.R. 3789. A bill to provide for the minting of U.S. gold coins; to the Committee on Banking, Finance and Urban Affairs.

[*Submitted Monday, June 8, 1981*]

By Mr. DANIELSON (for himself and Mr. MOORHEAD):

H.R. 3837. A bill to recognize the organization known as Former Members of Congress; to the Committee on the Judiciary.

By Mr. DE LA GARZA (for himself, Mr. FOLEY, Mr. BEDELL, Mr. BOWEN, Mr. COELHO, Mr. ROSE, Mr. HARKIN, Mr. HATCHER, Mr. JEFFORDS, Mr. JONES of Tennessee, Mr. JONES of North Carolina, Mr. RICHMOND, and Mr. WEAVER):

H.R. 3838. A bill to provide changes in legislation to meet reconciliation requirements of the first congressional budget resolution—fiscal year 1982—for the House Committee on Agriculture; to the Committee on Agriculture.

By Mr. DYMALLY (for himself and Mr. BROWN of California):

H.R. 3839. A bill to establish a U.S. design council within the Department of Commerce; jointly, to the Committees on Energy and Commerce and Science and Technology.

By Mr. ROSENTHAL:

H.R. 3840. A bill to prohibit for 2 years the conversion of residential rental units to residential units which are to be offered for sale, and to establish a Presidential Commission on Problems Relating to the Conversion of Residential Rental Units; to the Committee on Banking, Finance and Urban Affairs.

H.R. 3841. A bill to amend the Internal Revenue Code of 1954 with respect to the tax treatment of condominiums and cooperative housing corporations; to the Committee on Ways and Means.

By Mr. FIELDS:

H.R. 3842. A bill to amend the Internal Revenue Code of 1954 to allow the credit for production of natural gas from certain nonconventional sources only if such natural gas was sold at a lawful price without regard to section 107 and subtitle B of title I of the Natural Gas Policy Act of 1978; to the Committee on Ways and Means.

By Mr. FORD of Michigan:

H.R. 3843. A bill to amend title 5 of the United States Code to extend from 2 days to 4 days the number of days per 30-calendar days during which crews of vessels may be granted leaves of absence and to remove the restriction that such leaves of absence be applicable only to service on extended voyages; to the Committee on Post Office and Civil Service.

By Mr. FRANK:

H.R. 3844. A bill to amend the copyright law respecting the limitations on exclusive rights to secondary transmission; to amend the Communications Act of 1934 respecting retransmission of programs originated by broadcast stations; and for other purposes; jointly to the Committees on the Judiciary and Energy and Commerce.

By Mr. NEAL:

H.R. 3845. A bill to amend the Internal Revenue Code of 1954 to exempt from the excise tax on fireams small manufacturers and producers; to the Committee on Ways and Means.

Mr. PEPPER:

H.R. 3846. A bill to amend the Internal Revenue Code to allow the deduction of home health care and nursing home expenses paid by families on behalf of their relatives; to the Committee on Ways and Means.

H.R. 3847. A bill to amend titles II, VII, XI, XVI, XVIII and XIX of the Social Security Act to provide for the improved administration of the old-age, survivors, and disability insurance program, the supplemental security income program, and the medicare program by a newly established independent Social Security Administration, to separate social security trust fund items from the general Federal budget, to prohibit the mailing of certain notices with social security and supplemental security income benefit checks, and for other purposes; jointly, to the Committees on Ways and Means and Energy and Commerce.

By Mr. STARK:

H.R. 3848. A bill to establish a service industries development program in the Department of Commerce; jointly, to the Committees on Banking, Finance and Urban Affairs, Foreign Affairs, Energy and Commerce, the Judiciary, and Ways and Means.

By Mr. DERWINSKI:

H. Con. Res. 142. Concurrent resolution expressing the sense of Congress with respect to the complexity of Federal income tax forms; to the Committee on Ways and Means.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

111. By Mr. ARCHER: A memorial of the Legislature of the State of Texas, relative to M-X missile system; to the Committee on Armed Services.

112. By the SPEAKER: A memorial of the Legislature of the State of Texas, relative to M-X missile system; to the Committee on Armed Services.

113. Also, a memorial of the Legislature of the Territory of the Virgin Islands, relative to social programs; to the Committee on Education and Labor.

114. Also, a memorial of the House of Representatives of the State of Missouri, relative to America's Vietnam POW's and MIA's; to the Committee on Foreign Affairs.

115. Also, a memorial of the Legislature of the State of Colorado, relative to water resources; to the Committee on Interior and Insular Affairs.

116. Also, a memorial of the Legislature of the Territory of the Virgin Islands, relative to the Virgin Islands Nonimmigrant Alien Act of 1981; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 1400: Mrs. SCHROEDER and Mr. BEARD.

H.R. 1765: Mr. SAM B. HALL, JR., of Texas and Mr. ROYBAL.

H.R. 2103: Mr. LOTT, Mr. NAPIER, Mr. NEAL, Mr. EDWARDS of Oklahoma, and Mr. DASCHLE.

H.R. 2104: Mr. BARNARD.

H.R. 2234: Mr. MCCURDY, Mr. OTTINGER, Mr. AKAKA, Mr. SWIFT, Mr. LANTOS, and Mr. MARTIN of New York.

H.R. 2235: Mr. MCCURDY, Mr. OTTINGER, Mr. AKAKA, Mr. SWIFT, Mr. LANTOS, and Mr. MARTIN of New York.

H.R. 2788: Mr. GILMAN, Mr. HILER, Mr. NAPIER, and Ms. FERRARO.

H.R. 2794: Mr. MCCURDY, Mr. OTTINGER, Mr. AKAKA, Mr. LANTOS, and Mr. MARTIN of New York.

H.R. 3262: Mr. MAZZOLI, and Mr. MORRISON.

H.R. 3412: Mr. OTTINGER, Mr. ROSENTHAL, Mr. FAUNTROY, Mr. MITCHELL of Maryland, Mr. CROCKETT, Mr. FOLGIETTA, Mr. HARKIN, Mr. WYDEN, Mr. VENTO, Mrs. CHISHOLM, Mr. RANGEL, and Mr. FORD of Tennessee.

H.R. 3465: Mr. WILLIAMS of Ohio, Mr. GIBBONS, Mr. MOTTL, Mr. ROE, Mr. BROWN of Ohio, Mr. FORD of Tennessee, Mr. MOLLOHAN, Mr. FRANK, Mr. SHELBY, Mr. MCHUGH, Mr. WHITEHURST, Mr. BEDELL, Mr. MAVROULES, Mr. LEHMAN, Mr. JONES of Tennessee, Mr. BAFALIS, Mr. BOWEN, Mrs. HECKLER, and Mr. CAMPBELL.

H. Con. Res. 112: Mr. FINDLEY.

H. Res. 93: Mrs. ROUKEMA, Mr. MCCURDY, Mr. AKAKA, and Mr. LANTOS.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

108. By the SPEAKER: Petition of Gold Card Club, International Federation of Professional and Technical Engineers, Merchantville, N.J., relative to Federal Deposit Insurance; to the Committee on Banking, Finance and Urban Affairs.

109. Also, petition of Upper Northeast Coordinating Council, Washington, D.C., relative to Home Rule Charter; to the Committee on the District of Columbia.

110. Also, petition of the Community Services Department, San Bernardino, Calif., relative to support of the reauthorization of the Economic Opportunity Act; to the Committee on Education and Labor.

111. Also, petition of U.S.P.H.S. Outpatient Clinic in Honolulu, Hawaii relative to health care; to the Committee on Energy and Commerce.

EXTENSIONS OF REMARKS

DRINAN DELIVERS GONZAGA ADDRESS

HON. THOMAS S. FOLEY
OF WASHINGTON
IN THE HOUSE OF REPRESENTATIVES

Monday, June 8, 1981

● Mr. FOLEY. Mr. Speaker, I would like to take this opportunity to share with my colleagues in the House the commencement address given recently by a friend and former colleague, the Reverend Robert F. Drinan, S.J., to the graduating class of the Gonzaga University School of Law in Spokane, Wash.

As Members of this body are well aware, throughout his distinguished and multifaceted career as priest, legislator, lawyer, and teacher of the law, Father Drinan has been deeply involved in the problems of the criminal justice system in this country and in the promotion of human rights internationally.

It is with the greatest of pleasure that I share with you our former colleague's thought-provoking speech which not only outlines the challenges facing the legal profession in the decade ahead but serves as an inspiring charge to those of us in the lawmaking profession as well.

CHALLENGES TO THE LEGAL PROFESSION IN THE 1980'S

(By Robert F. Drinan, S.J.)

It is an exciting time to become a member of the bar. There is everywhere a new ferment about professional responsibility and a new awareness of the role and the responsibilities of the legal profession in America.

Law schools have become more vibrant and questioning than ever before. Your own distinguished law school has trained you in an excellent and exemplary way with respect to all of the challenges which are before you as you are, in the lovely English phrase, "called to the bar."

Law students, furthermore, are now better educated than ever before; they are more diversified, and they are looking for new horizons.

It may not be fanciful to think that a new golden age is about to arrive for the legal profession in America. We recall with pride that it was the bar in America from about 1780 to about 1840 that were the moral leaders of America and the individuals who fashioned our most basic institutions.

Several years ago Professor James Willard Hurst wrote a book on American legal history where he stated that after 1890 the bar became the defender of the status quo and the spokesman of the rich and the powerful. That conclusion of Professor Hurst might have been accurate at some time in the past, but now the bar and the legal profession as never before desire to bring complete justice and total equality to the people of America.

I want to discuss with you three challenges that are confronting the legal profession at this time: (1) the preservation of the Legal Services Corporation, (2) the hope that the bar in America can apply the genius of our law to the resolution of world hunger and the arms race and (3) the contribution which the legal profession must make to the struggle for human rights around the world.

THE LEGAL SERVICES CORPORATION MUST SURVIVE

In New Orleans in 1965 at the mid-year meeting of the American Bar Association, then President of the ABA, Lewis Powell, now a member of the United States Supreme Court, led the ABA into a leadership role with regard to the formation of the Legal Services Corporation. That entity now has a budget of $320 million, resolves 1½ million cases each year, and employs 6,000 attorneys throughout the nation.

The very existence of the Legal Services Corporation has been challenged in Washington. The President of the American Bar Association, Mr. William Reece Smith, has stated that the Legal Services Corporation is an ideal example of cooperation between the government and the local bar associations. Mr. Smith, in a strong endorsement for the continued funding at the present level of the Legal Services Corporation, employed these words:

"We enjoy in this country one of the oldest surviving democracies. One thing that has made it work is the belief of our citizenry that wrongs will be redressed and rights protected for all our citizens . . . the Pledge of Allegiance reads 'with liberty and justice for all'."

During the first few months of your life as an attorney a monumental struggle will be going on between the organized bar and those forces within our government which state that the Legal Services Corporation has no right to exist. The outcome of this struggle will say a good deal about the determination of attorneys in this country to protect the most successful program in the history of America to make legal services available to the needy. All of us must remember—especially new attorneys—what Solon, the ancient Athenian lawmaker, said 2500 years ago: "Justice will not come until those who are not hurt feel just as indignant as those who are hurt."

THE LEGAL PROFESSION, WORLD HUNGER AND THE ARMS RACE

Lawyers in America have always come forward as the country confronts new crises. Lawyers wrote the ringing phrases of the Declaration of Independence. Lawyers formulated the Constitution and hammered out the Bill of Rights. It was lawyers also that created that marvelous—almost miraculous—thing which we call the separation of powers. Lawyers crafted the 13th, 14th, and 15th Amendments after the Civil War. Lawyers in the 1930s fashioned the legal institutions of the Securities and Exchange Commission (SEC), the National Labor Relations Board (NLRB), and all those other regulatory agencies which have helped to bring economic prosperity to America by arranging a balancing of the competing interests which exist in this country.

Lawyers devised the structures of the United Nations in 1945, directed the Marshall Plan that saved Europe from collapse, and invented the World Bank and the International Monetary Fund.

America has always relied upon its lawyers to be moral architects and to bring the genius and the greatness of our unique jurisprudence to the agonies of mankind.

Now there is a newly recognized agony—global hunger. Eight hundred million people are chronically malnourished. Of the 80 million infants who will be born in the Third World in 1981, 25 million will die before they are 5 years of age.

There are now 16 million refugees—the largest number since the end of World War II.

Underlining this awful problem is the greatest drain on the resources of mankind—the spending of almost $500 billion each year on arms and armaments.

Lawyers are uniquely equipped to negotiate arms reduction. Now is the time for the legal profession to take a new and intense interest in the effective functioning of the Arms Control and Disarmament Agency. This is particularly important in view of the fact that the very existence of the ACDA seems to be in jeopardy.

One has to state that the escalation in arms and the urgent necessity for arms control constitutes the number one problem afflicting mankind. Lawyers as the servants of justice simply have to be working on the resolution of this terror-producing situation.

AMERICA'S ATTORNEYS AND INTERNATIONAL HUMAN RIGHTS

At the end of World War II mankind looked at the genocide and the holocaust and determined as never before to make a war on war. The Charter of the United Nations was drafted—largely with American help. That charter made the observance of human rights one of the 4 principal objectives of the United Nations. In Articles 55 and 56 the United States, along with all of the other signatories, made a "pledge" to "promote" human rights. Unfortunately, this nation has faltered and failed during the 35 years of the cold war. Unfortunately, the United States has ratified only the 5 least controversial of the 19 legally binding covenants that have emerged from the United Nations.

The U.S. Senate has not even ratified the covenant on genocide now approved by 81 countries. Neither has the Senate ratified the covenant against racial discrimination—a treaty which has been agreed to by over 100 nations of the earth.

The years 1974 to 1980 constituted a golden age in the observance of human rights by the Congress and by the Federal government. During that period the Congress withheld aid from several nations which engaged in the systematic and gross violation of internationally guaranteed human rights. The Congress and the previous Administration brought it about that thousands of political prisoners were released, many countries held elections, new hope sprung up in Africa and Latin America, and the United States appeared to millions everywhere as a nation that truly believed in human rights and their enforcement.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

During that period the United States advanced both its interests and its ideals. Despite some inconsistencies, ambiguities and failures, that period of emphasizing human rights will go down in American history as one of the finest hours in the implementation of America's and the world's ideals.

It is heartening to note that the American Bar Association through its Section on Individual Rights and Responsibilities was one of the architects and the defenders of that program of human rights.

It is distressing, however, to note that the entire program by which America has sought to fulfill its "pledge" to "promote" human rights has now been challenged. Again the legal profession more than any other group in the United States is being challenged to come forward and defend America's policy of insisting that those human rights guaranteed by the United Nations and by international law must be observed in those nations with whom we have friendly relations and to whom we give economic or military assistance.

OTHER CHALLENGES TO AMERICA'S ATTORNEYS

We as lawyers are a profession that is deeply embedded in morality. The canons of professional ethics of the American Bar Association state, for example, that "if a client persists in wrongdoing the lawyer should terminate their relationship." We are expected to represent unpopular causes. It is our right—yes, our duty—to seek to moderate the misguided passions of the moment.

In the 1980s the legal profession will be confronted with more moral dilemmas and more social problems than ever before in our history. We simply have to do something about the constant increase in violent crime. America now has 307,000 persons in prison—a new all-time high for the United States. This nation now has more persons in prison and for longer periods of time than any other nation of the earth. Clearly lawyers have to address their best attention and their finest talents to the resolution of the plague of crime in America. Surely—some form of gun control deserves our support. The presence of 60 million handguns in America represents a phenomenon totally unknown in Japan, England, Canada or any other nation. All of these countries long ago eliminated the easily available handgun.

Clearly also the continuing presence of sex discrimination in our society calls for diligent efforts by members of the legal profession. Similarly, the urgent necessity of bringing real equality to the children in our urban schools and regeneration to the ghettos in our cities merit the top attention of the legally trained people in America.

We have to recognize who we are and the noble calling that we have followed. We as attorneys are ministers of justice, servants to the courts. We are the heirs and trustees of eight centuries of Anglo-American law, a masterpiece of human wisdom. Forty generations of lawyers have preceeded us in the role of striving to bring about a more just and a more compassionate society.

Lawyers are less than one-half of one percent of the population of America, but our moral influence is immensely disproportionate.

We are in the eye of the storm that seems to be challenging America with respect to its role in the universe. We must recognize that the United States constitutes only 5 percent of the total population of mankind, although the United States consumes some 40 percent of mankind's resources. We must also look to the enormous challenges that will come to humanity by reason of the additional 2 billion more human beings who will be among us when the year 2000 arrives.

Lawyers have helped to make America great. Attorneys have fashioned our magnificent legal institutions. They have mediated our differences, have transformed ancient writs into contemporary remedies and have been the people who have fashioned a nation unique in the history of mankind. It is a nation based on a delicate distillation of Judaism, Christianity and humanisms. It is a nation which perhaps more than any other country in the history of mankind looks to law as its unifying element. America is a nation that we love and that we want the whole world to love. We believe in our legal and moral institutions and as lawyers we are proud and honored to be their trustees.

Is this world vision too idealistic? Too utopian? Too much of a dream?

Archibald MacLeish, the poet and the Librarian of Congress, gave a magnificent answer to these questions:

"There are those who will say that the liberation of humanity, the freedom of man and mind, is nothing but a dream. They are right. It is a dream. It is the American dream."●

REDONDO BEACH CHAMBER OF COMMERCE HONORS OUTGOING PRESIDENT WENDY UVANEY

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 8, 1981

● Mr. DORNAN of California. Mr. Speaker, on Thursday, June 11, the Redondo Beach Chamber of Commerce will hold their 60th annual installation and awards banquet at Beachbum Burt's Restaurant to honor chamber president Wendy Uvaney and incoming president Ray Slaney.

During Wendy's term, the chamber has initiated monthly breakfast meetings. She has also overseen the creation of a "master community calendar" which highlights local functions and events.

Wendy supervised important new community service projects initiated by the chamber, including a graffiti watch program, and the distribution of emergency information sheets to local residents.

She also aided in sponsoring "Frontier Day" at Riviera Village, as well as a special benefit premiere of the film "Cannonball," shot in Redondo Beach, aiding the city's historical commission.

In addition, Wendy oversaw a wide range of projects and activities conducted by the chamber, including the annual international surf festival, the Easter sunrise observance, and the Medal of Valor luncheon for outstanding police officers and firefighters.

As you can see, Wendy has had a busy term. She has been an exemplary president of the chamber, just as he is an exemplary citizen and businesswoman.

Wendy attended Mira Costa High School and Los Angeles Harbor College, where she was on the dean's list for 4 years. She worked for Security Pacific National Bank before opening her own retail clothing store, Hall's Fashions, in Redondo Beach.

Wendy is a member of the American Institute of Banking and the National Federation of Independent Business.

She has been active in the Redondo Beach Roundtable, and the Redondo Beach Coordinating Council. She served as treasurer of the Riviera Village Association from 1977 to 1979. From 1979 to 1980, she was president of the Redondo-Marina Business and Professional Women's Club. Wendy and her husband Steve now live in San Pedro.

Mr. Speaker, it is men and women like Wendy Uvaney who are the backbone of our free enterprise system. Proprietors of small businesses, they serve as sources of employment and growth for their communities. Their dedication to civic affairs is admirable, in that these busy individuals give freely their valuable time and intellect as a service to their neighbors and customers. May we as a nation continue to be blessed with good citizens like Wendy Uvaney.●

LET'S NOT BE FOOLED

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 8, 1981

● Mr. RAHALL. Mr. Speaker, recently the American people were told that they could breathe a collective sigh of relief, because the OPEC ministers were not going to raise the price of oil. But such news should not please us. We should not be lulled into a false sense of security. We should not let ourselves be fooled.

We should take OPEC's decision as a signal—a signal that the time is now for the United States to move toward energy independence.

Our's is still a petroleum based economy, and until we take steps to change the present situation, we are just as vulnerable as were to the 1973 oil embargo.

Over the past few months, Americans have been made to believe that Government is the only cause of our economic ills. That once Government spending has been reduced and important social programs eliminated, all will again be prosperous and inflation will magically disappear.

Now we are hearing that the foundation of voodoo economics, the Reagan-Kemp-Roth tax plan will put more money in the pockets of the American people, evidently so they can spend more of it on gasoline and heating oil.

Mr. Speaker, I repeat, let us not be fooled.

This administration has been unwilling to tackle the true cause of inflation—imported energy. They evidently believe that the American people do not have to be told the truth. The Carter administration informed Americans of the situation, and tried to act, but it is obvious that the present one is not only unwilling, but incapable of biting the bullet. It probably has something to do with popularity ratings.

Mr. Speaker, the truth is simple.

The United States is decades behind other nations of the world in the development of synthetic fuels, and likewise, we are wasting our most abundant energy source, coal. We have the know-how and we have the resources, what we lack is the commitment to use both in an effective and efficient manner.

There has not been one single word in any of the administration's economic programs about energy. It is like the word does not even exist. The administration ignores the energy issue just like it ignores the concept of compromise. But two of this Nation's major newspapers, the New York Times and the Wall Street Journal, recently talked about energy, and they talked about coal.

Both papers discussed the efforts of New England electric utilities to convert their oil-burning facilities to coal. These conversions have proven to be environmentally sound and financially beneficial.

I would urge my colleagues to review both of these statements, because they are informative and factual, and mostly because as Mr. Lincoln said: "You can't fool all the people all the time."

[From the Wall Street Journal, May 27, 1981]

CONVERTING TO COAL SENSIBLY

New England Electric System has succeeded, where others have failed, in gaining a sensible agreement with the Environmental Protection Agency for the conversion of oil-burning power plants to coal. After four years of bureaucratic haggling, the utility is proving that coal conversion can be accomplished with an improvement in air quality but without the costly pollution-control equipment that EPA officials relish. It is a lesson that should be remembered during this year's congressional debate on the Clean Air Act.

The utility's four power generators at Brayton Point, Mass., the largest plant in New England, have alternately burned coal and oil since they started up in the early 1960s. In June 1975, EPA officials ordered the plant to convert back to oil on environmental grounds. For the next four years, New England Electric officials asserted that they could meet the air quality standards for coal using less expensive equipment than mandated by the Clean Air Act's rule for the Best Available Control Technology (BACT). Last year, the EPA approved the utility's scaled-down plans. The first burner fired up a month ago and the others will resume operation using coal by the year's end.

The plant is burning "washed" coal from Pennsylvania, Virginia and West Virginia, which contains a lower average sulphur content than previously used foreign oil. As a result, sulphur dioxide emissions are about 21% less than before—and well within EPA standards—even though the scrubbing equipment that the EPA originally sought was never installed.

Similarly, for particulate emissions, the plant is producing less pollution now than it was when it burned oil. Under the agreement, the EPA tightened the particulate standard for coal burning to 0.8 lbs. per million British Thermal Units for 0.12 lbs. per million BTUs for oil. Nonetheless, using electrostatic precipitators to remove ash from the plant's smoke, a New England Electric official says it is meeting the more stringent EPA rules with "a huge margin to spare."

The Brayton Point conversion project, including the new pollution control equipment, cost $180 million (which says much about inflation because the whole plant only cost $160 million to build in the 1960s). Utility officials estimated that the use of BACT and other expensive technology would have added another $300 million to $500 million to the cost of the conversion project, even if the additional equipment could be physically incorporated within the plant's limited space. Moreover, officials calculate that the utility is saving about $169 million per annum by burning lower cost coal than foreign oil.

New England Electric has been both skillful and a bit lucky in achieving a compromise with EPA officials, whose penchant has been to demand the most advanced and costly pollution control equipment regardless of its marginal benefits for the environment. Several bills have already been introduced in Congress to make the EPA's application of the Clean Air Act less stringent for coal conversions. Any legislator who doubts the efficacy of such changes needs only look at New England Electric's example.

[From the New York Times, June 3, 1981]

A SHORT CUT TO COAL POWER

By converting its Salem Harbor, Mass., generating plant to coal, New England Power could save both money and imported oil. But like many other electric utilities, the company is hard pressed to raise the needed capital. Now, thanks to an innovative financing plan, one that could be applied to dozens of other plant conversions, New England Power may get its wish.

Conversion to coal is highly desirable. Not only is domestic coal abundant; it is also considerably cheaper than oil or natural gas, even including the cost of cleaning up the effluent.

But converting a power plant requires a major investment. And with few exceptions, utilities are finding it unprofitable or just plain impossible to finance the change. Last year Congress declined to subsidize the process. More conventional avenues of raising funds are hardly more promising.

The collapse of the bond market has made it difficult for utilities to increase their long-term debt. And Wall Street takes such a dim view of the industry's prospects that new shares usually must be offered below their true value, lowering the return to existing stockholders.

The economics of converting Salem Harbor are typical for oil-burning plants that were originally designed to burn coal. An investment of $100 million would in the first year reduce oil imports by 2 million barrels a year, cutting fuel costs by $36 million. When the conversion is completed, the annual saving would rise to $54 million.

But New England Power's plan for financing the project is not typical at all. The company does not propose new long-term borrowing or stock sales that would put pressure on customers' rates. Rather, it would earmark two-thirds of the savings for paying off the cost of the conversion and one-third for consumer rate relief. That would wipe out the conversion expense in about four years, yet allow customers to enjoy some savings from day one.

New England Power has had no difficulty in getting its plan approved. The Federal Energy Regulatory Commission, which sets the company's rates, sees it as a way of saving oil imports while pleasing both the utility and ratepayers. But the commission has jurisdiction in this case only because New England Power sells its electricity wholesale to local distribution systems. Nationwide, only about 10 percent of electricity demand is met by private wholesalers.

That leaves the future of the so-called "Massachussetts Plan" in the hands of state commissions. Even the most obdurate, one hopes, will find it hard to resist this chance to save everyone money.●

ISRAEL'S 33D ANNIVERSARY

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Monday, June 8, 1981

● Mr. MAZZOLI. Mr. Speaker, I am honored to join my colleagues in taking note of the 33d anniversary of the State of Israel.

Israel is an example for all the world. In the face of tremendous and continuing odds, Israel has been able to establish its independence. It enjoys a democratically elected government, an independent judiciary, and a free press.

Mr. Speaker, the United States allegiance to Israel is steadfast. This is as it should be.

Finally, Mr. Speaker, I wish to take this opportunity to reaffirm our national commitment to this free and democratic ally.●

JAPAN AND UNITED STATES SECURITY INTERESTS ABROAD

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, June 8, 1981

● Mr. PORTER. Mr. Speaker, the popular U.S. Ambassador to Japan, ex-Senator Mike Mansfield, watches over United States-Japanese foreign relations for the Reagan administration. Ambassador Mansfield has had long experience in Asia and certainly knows the U.S. Congress as well as anyone. He recently gave an extensive interview in Tokyo to Takashi Oka of the

Christian Science Monitor summarizing and underscoring the importance to the United States of improved relations with the Japanese. For the Members' information I enclose the interview's highlights in today's RECORD.

[From the Christian Science Monitor, June 1, 1981]

U.S.-JAPAN TIE "MOST IMPORTANT IN WORLD"

(By Takashi Oka)

Friendship between the United States and Japan is "the most important bilateral relationship in the world—bar none," Ambassador Mike Mansfield said emphatically.

In a wide-ranging interview, the tall, craggy-faced former senator from Montana made the following points:

1. The United States and Japan "share a joint responsibility for the Pacific Basin and the nations along its rim," in which Japan's role "is more economic—not so much defense."

2. On defense, "I think they (the Japanese) can and should do more, but not through pressure, demands, or the like. . . . In their own way, in their own time and in line with their own resources they will do, I think, what we want them to do, on their own responsibility."

3. In the Iranian and Afghan situations, the Japanese "have been our best allies and partners, and the only ones who paid a price in the process." Mr. Mansfield cited Iran's cutoff of oil amounting to 13 percent of Japan's imports and Japan's loss of lucrative Soviet pipeline contracts to France and West Germany as examples.

4. On trade, Japan has almost always "made efforts to accommodate itself to our needs, to our criticisms and complaints" through a long succession of disputes from textiles through color television to steel and most recently, automobiles.

Japan's agreement to reduce car exports to the United States from 1.82 million cars last year to 1.68 million cars this year has "prevented a very possible enactment of protectionist legislation beneficial to no one and harmful to all," Mr. Mansfield observed.

Japan is "far and away our No. 1 customer" for agricultural products, the ambassador continued. Last year, Japan imported close to $6.1 billion of grain and other agricultural products from the United States.

Referring to criticism that Japan's security treaty with the United States is one-sided, in that it obligates the United States to defend Japan in case of attack, but not Japan to defend the United States, Mr. Mansfield asked:

"Is it one-sided? We have the use of bases and airfields out here, at no cost to us. We have the Japanese appropriating $1 billion per year for the upkeep of United States forces, cost-sharing, housing, and the like. We have the Japanese willing to increase that figure.

"If we didn't have the security arrangement with Japan, where would our forward bases in our own defense be located? Guam. Hawaii. We're out here to stay!"

Mr. Mansfield would like Americans to view the current furor in Japan over whether American warships visiting their country do or do not carry nuclear weapons against the background of all these factors. Former Ambassador Edwin O. Reischauer precipitated the controversy by stating that for 20 years American warships had entered Japanese ports without divesting themselves of their nuclear weapons, as the Tokyo government claimed they were doing.

The return of the aircraft carrier Midway to Yokosuka, its home port, June 5 will be a major test of Japanese feelings on the nuclear issue. Many Japanese suspect the Midway of carrying nuclear weapons, and opposition parties from the Socialists to the Communists have been trying to whip up demonstrations and other protests against the Midway's return.

Mr. Mansfield refused to be drawn into the nuclear controversy, beyond repeating Washington's longstanding policy of neither confirming nor denying the presence or absence of nuclear weapons anywhere in the world. But he is clearly concerned about the effect this controversy will have on Japanese-American relations as a whole.

It comes on top of a series of unrelated incidents that followed each other in quick succession—a collision between an American nuclear submarine and a Japanese freighter (the freighter sank), domestic controversy over the meaning of the word "alliance" used in a communique after Prime Minister Zenko Suzuki's very successful visit with President Reagan in Washington at the beginning of May, and the cutting of Japanese fishing vessels' nets by American (or perhaps Soviet) warships during a recent exercise in the Sea of Japan.

What lesson is to be drawn from these incidents, the cumulative effect of which could be to cause a dangerous rise in emotional tensions betwen the people of Japan and the United States?

Mr. Mansfield, sitting upright in his office armchair, paused long.

"We'll have to understand each other better," he said softly, then paused again.

"We'll have to quite finding fault with one another. We'll have to act as true equals. We'll have to recognize we share a joint responsibility for the Pacific Basin and the nations along its rim—more economic, not so much defense.

"My one aim, insofar as I can do it, and insofar as this embassy can do it, is to strengthen the bonds of friendship and partnership between our two countries to the point where they become unbreakable."

Mr. Mansfield, who as Democratic majority leader was for many years one of the most powerful figures in the United States Senate, was appointed ambassador to Japan by President Carter in 1977 and asked to stay on by President Reagan early this year.

"We were halfway through our packing," the ambassador recalled, when Mr. Reagan, then still President-elect, called to ask the Mansfields to stay on. "I was delighted to say yes, because there's a job still here to be done."

Mr. and Mrs. Mansfield have been one of the most popular and effective ambassadorial couples to have served in Japan. Analysts of Japanese-American relations are almost unanimous in their opinion that, whatever the ups and downs between the two countries have been during the past four years, tensions would have been far more severe without Mr. Mansfield's firm but nonblustering and fairminded approach, without the influence he has been able to exert behind the scenes, both in Tokyo and in the labyrinthine political corridors of Washington●

CORRECTION IN APRIL 2 ECONOMIC PROJECTIONS

HON. HENRY S. REUSS

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, June 8, 1981

● Mr. REUSS. Mr. Speaker, I include the text of my letter of May 26, 1981, to the gentleman from New Mexico, Senator DOMENICI:

CONGRESS OF THE UNITED STATES,
JOINT ECONOMIC COMMITTEE,
Washington, D.C., May 26, 1981.

Hon. PETE V. DOMENICI,
Chairman, Senate Budget Committee,
U.S. Senate, Washington, D.C.

DEAR PETE: In support of my testimony before the Senate Budget Committee on April 2, I offered projections through 1984 of the effects of the Administration's Economic Recovery Program on growth, employment, inflation, interest rates, and the Federal deficit. Data Resources, Inc., which did the computer analysis underlying the projections, has now informed my staff that those projections were subject to a computer programming error on DRI's part which rendered them invalid.

After repeated efforts by our contractor, I must report that I am unable to offer corrected estimates in which I can place full confidence. It appears, however, that a correctly performed simulation would have shown slightly lower growth, higher inflation and unemployment, slightly lower interest rates and a substantially lower budget deficit in 1984 than I had reported. The reason is that the original projections inadvertently failed to take full account of the spending reductions incorporated in the President's budget.

The corrected figures appear to change the detail but not the fundamental point of my basic conclusion before the Committee: that the Administration's program was based on excessively optimistic economic projections, primarily because the full consequences of the restrictive monetary policy which the Administration advocated had not been taken into account. Nevertheless, since some use was made of the budget deficit estimate for 1984 which turns out to have been in error, I am anxious to set the record straight.

Sincerely,

HENRY S. REUSS,
Chairman.●

A SHORT CUT TO COAL POWER

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, June 8, 1981

● Mr. MARKEY. Mr. Speaker, I would like to bring to my colleagues' attention the lead editorial that appeared in the June 3, 1981, New York Times, "A Short Cut to Coal Power."

New England Electric Systems, the utility cited in the editorial, has launched aggressively into coal conversion and conservation. It is anticipated that New England Electric's fuel supply in 1982 will be comprised of 46

percent coal and only 27 percent oil. This compares with 78 percent oil in 1979.

New England has come a long way in a few short years, and our energy future is looking better every day.

[From the New York Times, June 3, 1981]

A SHORT CUT TO COAL POWER

By converting its Salem Harbor, Mass., generating plant to coal, New England Power could save both money and imported oil. But like many other electric utilities, the company is hard pressed to raise the needed capital. Now, thanks to an innovative financing plan, one that could be applied to dozens of other plant conversions, New England Power may get its wish.

Conversion to coal is highly desirable. Not only is domestic coal abundant; it is also considerably cheaper than oil or natural gas, even including the cost of cleaning up the effluent.

But converting a power plant requires a major investment. And with few exceptions, utilities are finding it unprofitable or just plain impossible to finance the change. Last year Congress declined to subsidize the process. More conventional avenues of raising funds are hardly more promising.

The collapse of the bond market has made it difficult for utilities to increase their long-term debt. And Wall Street takes such a dim view of the industry's prospects that new shares usually must be offered below their true value, lowering the return to existing stockholders.

The economics of converting Salem Harbor are typical for oil-burning plants that were originally designed to burn coal. An investment of $100 million would in the first year reduce oil imports by 2 million barrels a year, cutting fuel costs by $36 million. When the conversion is completed, the annual saving would rise to $54 million.

But New England Power's plan for financing the project is not typical at all. The company does not propose new long-term borrowing or stock sales that would put pressure on customers' rates. Rather, it would earmark two-thirds of the savings for paying off the cost of the conversion and one-third for consumer rate relief. That would wipe out the conversion expense in about four years, yet allow customers to enjoy some savings from day one.

New England Power has had no difficulty in getting its plan approved. The Federal Energy Regulatory Commission, which sets the company's rates, sees it as a way of saving oil imports while pleasing both the utility and ratepayers. But the commission has jurisdiction in this case only because New England Power sells its electricity wholesale to local distribution systems. Nationwide, only about 10 percent of electricity demand is met by private wholesalers.

That leaves the future of the so-called "Massachusetts Plan" in the hands of state commissions. Even the most obdurate, one hopes, will find it hard to resist this chance to save everyone money.●

VIGIL FOR FREEDOM—THE IGOR GUBERMAN FAMILY

HON. WILLIS D. GRADISON, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, June 8, 1981

● Mr. GRADISON. Mr. Speaker, I am pleased to join in the "Vigil for Freedom" sponsored by the Union of Councils for Soviet Jewry on behalf of Soviet Jewish families and individuals who are being detained in the U.S.S.R. as a result of the Soviet Government's repressive emigration policies.

Despite its signature of the Helsinki Accords of 1975, in which the 35 signatory nations committed themselves to pursue policies consistent with basic principles of human rights, the Soviet Government has repeatedly disregarded these principles, including the reunification of divided families whose members live in different countries, religious freedom, minority rights, and free travel between countries.

Today, I bring to my colleagues' attention the plight of Igor Guberman and his family. In December 1978, the Gubermans applied for an exit visa to Israel. On August 13, 1979, Soviet authorities arrested Guberman, a writer, poet, and journalist, on suspicion of involvement in the theft of icons from a church in Dmitrov, outside Moscow. Many Americans believe, however, that Mr. Guberman is being harrassed for his failure to act as an informer in an investigation of an underground journal, "Jews in the U.S.S.R.," being conducted by the KGB.

While Mr. Guberman was in a prison camp, his wife, Tatyana, and his two small children, Tanya and Emil, were left to fend for themselves and to survive only with the assistance of friends. Furthermore, their exit visa applications have been held up indefinitely.

I understand that Mr. Guberman has recently been released from prison camp and is serving the rest of his sentence in internal exile in Siberia. Certainly, this situation is an improvement from that of the prison camp. Yet, we must realize that, the exile as in prison camp, the Guberman's have no human rights.

Clearly, the basic human rights of this family have been violated. It is my hope that another vigil for freedom will not be necessary before Igor Guberman is released and his family is permitted to emigrate to Israel. This would be an appropriate demonstration by the U.S.S.R. that its Government respects the provisions of the 1975 Helsinki Accords.●

OVERSIGHT HEARINGS ON CRIME IN AMERICA

HON. WILLIAM J. HUGHES

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, June 8, 1981

● Mr. HUGHES. Mr. Speaker, Mr. Hughes, I wish to announce that the Subcommittee on Crime, which I chair, of the House Committee on the Judiciary, will hold a series of hearings on the crime problem in America. The first two such hearings will be held on June 10 and 11, beginning at 9:30 a.m. each day in the Rayburn House Office Building. The hearing on the 10th will be in room 2237 and the one on the 11th will be in room 2141. Witnesses will include representatives of the Department of Justice, the U.S. Conference of Mayors, and prominent scholars and researchers in the field of criminal justice.

The third of this series of hearings, to begin at 9:30 a.m., in room 2237, Rayburn House Office Building, will focus on the problem of drug-related crime. Witnesses will include authors of recent studies examining the linkage between drug abuse and crime patterns, the New York State Commissioner for the division of criminal justice services and the State's director of the division of substance abuse services, and the former head of the President's Special Action Office on Drug Abuse and Prevention.

Persons wishing to submit statements for the record should contact the Subcommittee on Crime, House Committee on the Judiciary, 207 Cannon House Office Building, Washington, D.C. 20515, or telephone (202) 225-1695.●

ASSAULTS ON TURKISH DIPLOMATS

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 8, 1981

● Mr. RITTER. Mr. Speaker, international terrorism claims many victims in Europe.

Even His Holiness, Pope John Paul II, has been the target of an assassination attempt.

At this time I would like to dicuss another terrorist campaign that has been ongoing for over 8 years, every time against Turkish diplomats and their families. These are the terrorist assassinations by the so-called Secret Liberation Army of Armenia. To date the campaign of terror has claimed 17 lives and a number of other victims have been severely wounded. The last incidents occurred in Paris on March 4, 1981, and again in Copenhagen in April which resulted in severely wounding two individuals.

In addition to the assassination attempts, a number of bombings have also occurred often injuring innocent bystanders. For example, bombings took place most recently in New York and Los Angeles in October 1980 and each time the Secret Liberation Army of Armenia claimed credit for the bombings.

Who constitutes this Secret Liberation Army of Armenia and what is their aim and purpose? A clue might be gained from the press conference

the group held in Beirut, Lebanon, in April 1980 which was reported by the reputable American Armenian paper, the Armenian Observer. According to the report the group described itself as anti-imperialist, Marxist in ideology and highly critical of the West for not denouncing Turkey for the atrocities against the Armenians during World War I. They also praised the Soviet Union for "having provided a homeland for the Armenians in the U.S.S.R." According to the February 28, 1980, New York Times they are being trained by the PLO.

While the information is sketchy, it shows that we are facing an international terrorist group aiming at the destabilization of our staunch NATO ally, Turkey which guards the straits between the Soviet-dominated Black Sea and the Mediterranean Sea. Certainly, it would be in the interest of the Soviet Union to create the above conditions.

It is interesting that despite the fact that the group is violating for 8 years the most elementary rules of international law, the sanctity of the diplomats, none of their members were caught either by the FBI (two of the murders were committed in Los Angeles) or by the police in Western Europe and Australia. Perhaps the attempt on the Pope's life will induce the police in Western Europe to take more seriously the political terrorist groups attacking Turkish diplomats in their territory.

Condemnation of the killings came from many sources, including U.N. Secretary Waldheim, the State Department and the leaders of the Armenian Catholic Church.

Several of my colleagues have already condemned this violence and terrorism and I am joining them today in denouncing this branch of international terrorism which cannot be justified and which stands condemned by the hard-working and loyal American Armenian community as well.●

A TRIBUTE TO IRENE WARD

HON. LYLE WILLIAMS

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, June 8, 1981

● Mr. WILLIAMS of Ohio. Mr. Speaker, I rise to pay my respects for a woman who has done much to further the cause of education in Youngstown, Ohio, and who will be honored later this week on the occasion of her retirement.

The woman is Miss Irene Ward who has served the field of education for 38 years. A graduate of Chaney High School, where she was valedictorian, Miss Ward earned her bachelor's degree from Ohio University. She earned her master's degree from Westminister College.

Beginning her career as a teacher, Miss Ward later became an administrator and retired as director of personnel for the Youngstown city school system.

Not content to be successful in only her career, Miss Ward was also active in community affairs including the Quota Club, the Youngstown Playhouse, and Delta Kappa Gamma Greek letter society.

Miss Ward has certainly led a full and varied life. I wish her good luck and Godspeed as she begins her richly deserved respite of retirement. The Youngstown school system may soon miss her—but it will not soon forget her.●

THE DELAYING OF MILITARY EQUIPMENT TO SAUDI ARABIA

HON. JAMES A. COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, June 8, 1981

● Mr. COURTER. Mr. Speaker, while the administration's proposed sale of arms and military equipment to Saudi Arabia has not been fully retracted, I am pleased to note that the submission of the formal proposal to Congress has been delayed pending further review of the issues involved. The decision to delay this proposed sale was, in my view, a wise response to the many doubts that were voiced in Congress regarding some potentially harmful ramifications of the sale. As a cosponsor of the resolution which formally disapproves of the sale, I would like to take this opportunity to review some of the issues involved in this arms sale.

First of all, and most importantly, is the question of whether this sale serves America's national interest. I think it does not. Too many people tend to believe that what is good for Saudi Arabian security is automatically good for the United States. To be sure, Saudi oil is very important to us, as is Saudi influence in the Muslim and Arab worlds. However, this proposed sale, which includes a number of highly sophisticated E-3 airborne warning and control system aircraft (AWACS) will not, in my opinion, enhance Saudi security. The United States currently has four AWACS aircraft in Saudi Arabia under our control. It stands to reason that a potential aggressor to Saudi Arabia would be less likely to attack Saudi airfields if American aircraft were parked there. A strong American presence in Saudi Arabia would be a far better deterrent than merely selling these ultrasophisticated aircraft to Saudi Arabia for their maintenance and protection. These aircraft should and must remain under our control.

This leads me to my second point. I am not at all convinced that the security of the aircraft and its vital technical data and electronic systems could be adequately guaranteed by the Saudis.

In late 1979, as many of us remember, the Saudi Armed Forces had a very difficult time putting down a local revolt by insurgents in the holy city of Mecca. Saudi Arabia is a fragile society, with internal weaknesses which could manifest themselves in the compromise or destruction of modern American weapons systems. This threat is real and should be well taken into account.

A third point I would like to raise is that we are not really obtaining a true quid pro quo from the Saudis with regard to several key issues. Saudi Arabia still denies us access to military bases and facilities on its soil as part of our evolving Persian Gulf policy, refuses to back the Camp David peace process, and continues to finance the terrorist PLO. For their part, the Saudis, through Petroleum Minister Sheik Yamani, have proclaimed that Israel, not the Soviet Union, is their principal enemy. If this is the way they truly feel, then it becomes somewhat obvious that the items in this proposed package, which includes advanced sidewinder missiles, long-range fuel tanks for their previously ordered F-15's and KC-135 jet tankers for in-flight refueling, will be targeted against Israel. It certainly makes no sense to arm the Saudis so that they, with other Arab States, can attack Israel. If the Saudis are truly interested in avoiding a confrontation with Israel or attack by external forces, it is in Saudi Arabia's best interest to permit the United States a greater role in protecting the Persian Gulf. Only the United States has the power to keep the Soviets out of the Persian Gulf and protect the Saudi royal kingdom. It is a strong American presence in that area, rather than mere weapons, that is the Saudis best bet for survival. We have and will continue to supply the Saudis with certain conventional armaments that we feel are necessary for their defense.

Mr. Speaker, our strongest and staunchest ally in the Middle East is Israel. Unlike the Saudis, the Israelis seem to have a better understanding and strategic view of Western interests in the Middle East. Their friendship with us is based on strong values. Israel is the one nation I know we can count on if there was a threat to American interests in the Middle East. Therefore, I feel that based on recent Saudi calls for a jihad, or holy war on Israel, we would be aiding and abetting such an action by agreeing to this proposed arms sale. By arming Arab States to wage war on Israel, we are "shooting ourselves in the foot." A threat to Israel's security is a threat to

our security, and therefore, this proposed sale should be withdrawn.

Mr. Speaker, one day, hopefully, the major pro-Western states of the Middle East—Israel, Egypt, Jordan, and Saudi Arabia—could all act in concert as a regional defense force to counter Soviet expansionism and terrorism. Until that day comes, our Nation must continue to bring peace to that troubled region—a peace that guarantees Israel security through defensible borders, and a peace for the Arab nations that gives them dignity, and will turn their efforts to economic and social problems, not war.

Thank you, Mr. Speaker.●

AMID ULSTER'S MADNESS, HUME STICKS TO SANITY

HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, June 8, 1981

● Mr. BINGHAM. Mr. Speaker, a true hero in the midst of the tragic lunacy that besets Northern Ireland is John Hume, the head of the Social Democratic Labor Party there.

In the Washington Star on June 4, Mary McGrory, with her usual clearheaded good sense, writes about John Hume, as follows:

AMID ULSTER'S MADNESS, HUME STICKS TO SANITY

LONDONDERRY.—On the day of the fourth IRA funeral—the last, at least, of the current series—John Hume, leader of Ulster's reasonable Catholics, sat in the lounge of a local hotel taking about "a breathing space for the government."

It would be, he said, about 50 days before the coffins would be coming out of Long Kesh again and he, for one, intended to use the interval for something other than the escalation of violence and invective which almost everyone else seems to have in mind. Hume had no success convincing Margaret Thatcher in a stormy late-night session at 10 Downing Street on May 13 that nothing but rage and riots would ensue. He had, however, more success in persuading his countrymen to keep their heads in the murderous impasse.

The returns from local elections hard on the heels of the funeral of Bobby Sands, had, to be sure, doubled the vote of Rev. Ian Paisley, the Protestant demagogue, and had sent the brother of Francis Hughes, the second hunger striker to die, to a district commission. But Hume's Socialist Democratic Labor Party had held its own, which, under the circumstances, was something of a triumph—or at least an indication that there are pockets of sanity in Ulster's mad, polarized precincts.

"While they were going to the IRA funerals, they were voting for me," said Hume, who is the most modern of Northern Ireland's public figures, and one of the few who discusses the present—and the future—rather than the past.

Hume, a black-haired, heavy-set 44-year-old who escaped from the despair of life in the Bogside—where he still lives with his wife and five children—via the education route (Maynooth, briefly, and then the University College of Dublin), could be pretty down by now. Ten years of struggling to isolate the IRA, of turning off sentimental and financial support in the United States, of coaxing his countrymen into the ways of a political solution—all seem to be foundering on the rock of Thatcher's intransigence.

But Hume fights on. He is not waiting, as some are, for the elections in the Republic to be resolved, for the Anglo-Irish talks to be resumed. He is not counting on the offchance that an American president, proud of his Irish heritage, might attempt to sweet-talk his fellow-ideologue in London into seeing the hunger-strike crisis for what it is—not a chapter in the continuing struggle against international terrorism, but a nasty, parochial situation that is a reflection of the larger divisions and deeper grievances which are unique to England's last colony.

Hume is a member of the European Parliament—as, of course, is the Rev. Paisley—and he proposes to take before it on June 18 a scheme or a joint European-British plan for industrializing the wretched province.

Unless you count hating as a full-time occupation, Ulster has a staggering unemployment rate; in 'Derry, 24 per cent; in Newry, 25 per cent; in West Belfast, Bobby Sands country, 40 per cent.

"That is why," says Hume, "there are plenty of willing hands to throw stones and petrol bombs."

The rational approach to an ancient problem sets Hume apart from his fellow-politicians, who have been brutally instructed in the perils of moderation. Poor Paddy Devlin, a Belfast city counsellor and former member of the SDLP, was lately driven from his home by thugs who tied his sons to lampposts and urinated on them and drove his retarded daughter into a mental hospital. He had not been "green" enough to suit the IRA bullies who ran the street defense committees in his neighborhood.

Devlin, in anguish, tried to warn Mrs. Thatcher of the "1916 syndrome" which has begun to work among a Catholic population that does not endorse the IRA but is racked by the sight of young men dying for a cause.

"Patsy O'Hara," said an old man who attended his funeral, "was a nice, wee young man who wasn't asking for a terrible lot."

Against that powerful pity, Mrs. Thatcher's nanny-like repetition that "a crime is a crime is a crime"—she went to Belfast on a surprise visit last week to say it again—is no antidote.

Hume is hoping that the idea of a European Human Rights Commission investigation, which was tried late in the day of Bobby Sands' fatal fast and rejected by him, will be used as a face-saving device by Mrs. Thatcher.

But Mrs. Thatcher is not wanting to be saved. She is in deep economic difficulties. She is glorying in her image as an "Iron Woman," standing tall against terrorists—actually working-class desperadoes whose stature she has increased throughout the world.

She told Hume at their futile meeting that she resents being called "inflexible" about the prisoners—which only tells you that cement-headedness is not a quality peculiar to Ulster, even though it has often seemed that way.●

THE ENCOURAGEMENT OF HIGH-COST NATURAL GAS PRODUCTION

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, June 8, 1981

● Mr. FIELDS. Mr. Speaker, as Chairman of the Energy and Natural Resource Task Force, I am today introducing legislation to spur the development of high-cost natural gas production. This bill will correct an unintended technical problem resulting from the interaction of a tax credit provision of the Crude Oil Windfall Profit Tax Act of 1980 (COWPTA) and the filing requirement restrictions of the Natural Gas Policy Act of 1978 (NGPA). As a result of this unforeseen effect, many producers of high-cost natural gas are unable to take advantage of the economic incentives which Congress clearly intended for them.

With the enactment of COWPTA, Congress provided a tax credit for certain high-cost gas production, such as geopressured brine, coal seams, tight sands formation, and Devonian shale. In addition, in the NGPA, Congress deregulated the price of gas derived from Devonian shale, geopressured brine, and coal seams, and directed the Federal Energy Regulatory Commission (FERC) to set a special incentive price for tight sands formation gas. The enactment of COWPTA triggered a restriction in the filing requirements of the NGPA, designed to bar any producer from taking advantage of both the special incentive or deregulated price and the tax credit, simultaneously. Under this restriction, any producer wishing to receive the incentive or deregulated price is required to file with FERC on or before May 2, 1980, the 30th day after enactment of COWPTA or the date which the surface drilling of a well began. Hence, those producers who did not file in a timely manner for the incentive or deregulated price are automatically relegated the tax credit under COWPTA.

The tax credit contained within COWPTA, however, has already been phased out for geopressured brine, coal seams, and tight sands formation gas in accord with the original formula. Specifically, this credit is linked to the price of a barrel of oil on the world market and is phased out when the average price reaches $32.14 per barrel. At present, the average price of a barrel of deregulated oil exceeds $34 per barrel. So it is highly unlikely this credit will ever be of any value to these natural gas producers.

Even though this credit is now, for all intents and purposes, worthless, it still triggers the NGPA filing requirements. Many producers did not file an appropriate election to satisfy this re-

quirement and as a consequence, cannot receive either the special price or collect the tax credit.

Mr. Speaker, surely Congress did not intend for these producers to be excluded from both the incentive or deregulated price and the tax credit. In fact, the very enactment of COWPTA and NGPA indicates the commitment of Congress to provide incentives for drillers of high-cost natural gas. Congress indeed acknowledged the added risks and extra costs of this type of production, and clearly intended adequate compensation to these drillers. However, Congress did not anticipate the adverse mechanical interaction of these two statutes, which precludes many producers either the credit or the incentive or deregulated price.

Therefore, today I am introducing legislation which will correct this technical oversight. My bill provides that a producer of high-cost gas will now automatically qualify for the incentive or deregulated price. Furthermore, my bill would enable any producer who is eligible for a tax credit to collect this credit instead of the special deregulated price. The original prohibition of doubledipping from both the tax credit and the incentive or deregulated price is also preserved. More significantly, this legislation will eliminate the unnecessary filing requirements for producers in order to qualify for the incentive or deregulated price. And finally, Mr. Speaker, this bill will maintain the credit option still in existence for Devonian shale natural gas.

Under the tax credit provisions of COWPTA, Congress did not link the credit for Devonian shale to the price of a barrel of oil, as is the case for other high-cost natural gas, until 1983. For 1980, 1981, and 1982, this credit will not start to phase out until the price of Devonian shale reaches $4.05 per MMBtu and will not entirely expire until the average price tops $5.08 per MMBtu. Presently, the price of Devonian shale is less than $3.00 per MMBtu, and is not expected to increase significantly in the next couple of years. My bill would preserve this credit for Devonian shale drillers while qualifying them for the special deregulated price in 1983, following the phaseout of their credit.

Mr. Speaker, this election problem represents a major impediment to small and independent producers of high-cost natural gas. This industry which is already overburdened with high production and drilling costs should not be further penalized by unnecessary filing requirements. My legislation would enact a more workable filing procedure, thereby enabling these drillers and producers to take advantage of the incentive Congress originally intended for them. Due to the importance of domestic natural gas development as a means to diminish our dependence on foreign sources of energy, I urge my colleagues to act expeditiously on this legislation. We must take positive steps to encourage the continued development of high-cost natural gas and not further deter these producers from the intended incentives of production.●

TRUMAN SCHOLARSHIP AWARDS CEREMONY

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, June 8, 1981

● Mr. SKELTON. Mr. Speaker, the Truman scholarship awards ceremony was held at the Truman Library in Independence, Mo., last month. A friend of President Truman's, Charles S. Murphy, spoke to the recipients of the scholarship who are seeking careers in public service. After working in both the private business and government sectors, Mr. Murphy feels that public service offers great opportunities to make the world a better place in which to live. He also provides encouraging words to those who are dedicated to serve their country. I would like to share his address with my colleagues:

REMARKS OF CHARLES S. MURPHY AT THE ANNUAL TRUMAN SCHOLARSHIP AWARDS CEREMONY

It is a great pleasure to welcome you young men and women into the company of people whose lives have been especially blessed by the life of Harry S. Truman.

You have before you this afternoon several most devoted members of that company.

First, you have Chairman John Snyder, who has been presiding over this ceremony with such wit and grace. Chairman Snyder and President Truman were personal friends for years before Mr. Truman became President. Both of them had served in the Army in World War I, though not in the same unit. After the war, they served together as officers in the Army Reserves.

By the time Mr. Truman became President in 1945, Mr. Snyder had acquired a lot of experience in a number of financial positions in the Government, as well as in the field of private banking. The new President quickly brought Mr. Snyder into his Administration, and soon appointed him Secretary of the Treasury, where he served with great distinction for about seven years.

He turned out to be a great Secretary of the Treasury. I've worked in Washington for almost fifty years now, and I've seen Secretaries of the Treasury come and go. During that period of time, Secretary Snyder has been the best. If you doubt what I'm telling you, go and study the record. I think you'll come to the same conclusion.

Then, you have here the new President of the Truman Scholarship Foundation, Elmer Staats. When Mr. Truman became President, Mr. Staats was a young Ph.D. working his way up through the various echelons in the Bureau of the Budget. He kept on climbing; and before the end of President Truman's term, he had become Deputy Director of the Bureau. Later, he served as Deputy Director under three more Presidents—Eisenhower, Kennedy, and Johnson. That is a record that has never been approached by anyone else. He might have extended it, except for the fact that in 1966 President Johnson appointed him to an even bigger job—Comptroller General of the United States—where he continued to serve until about two months ago.

You might wonder what is the difference between the Bureau of the Budget of former years and the present Office of Management and Budget. I have had it explained to me this way. The Bureau of the Budget did not have the word "management" in its title, but it did in fact manage the Government. OMB, on the other hand, does have the word "management" in its title, but in fact it does not manage the Government.

As Comptroller General, Mr. Staats was head of the General Accounting Office. The General Accounting Office is an arm of the Congress. Its principal function is to monitor the performance of the Federal Government, and report to Congress on how it is doing. Having spent some forty years in top positions in the Bureau of the Budget and the General Accounting Office, I think it is fair to say that Mr. Staats probably knows more about the United States Government than any other person in the world.

Then, you also have here Senator Stuart Symington, who had a long and very distinguished career in the United States Senate. But before that he was a key man in the Truman Administration, serving in several top positions, including Secretary of the Air Force. He also gave up a highly successful career in private industry to answer the call to public service.

The next person you have here who benefited so greatly from knowing Harry Truman is me. I knew him during the ten years he was in the United States Senate, where I was a young legislative draftsman in those days. Then, I worked for him for six years in the White House after he became President. It was a tremendously exciting, and rewarding experience. We had to work very hard, but it was worth it.

President Truman was an extremely nice man and very considerate of his staff.

The list of people whose lives have been made better because of Harry Truman is by no means limited to those who worked with him—or even to those knew him personally. The more you think about it, the more remarkable it becomes to think how many people were affected by the life of this one man. He made some great decisions, you know—decisions that determined the shape of the world in the era following World War II, and that have had a great deal to do with the course of history up until this day.

Most of the rest of the world was in a shambles at the end of World War II, and President Truman made the basic decision that the United States should help put the rest of the world back on its feet. Considering the way a lot of other nations act these days, I sometimes wonder if they are showing a proper sense of gratitude—or if we really should have helped them quite so much. But if he were here, he would tell me I should be ashamed of having such thoughts—and to forget it.

The only time he ever gave me a really stern lecture, by the way, was when I asked him if he didn't think it would have been a good thing if the South had won the Civil War. I thought that would get a rise out of him, but I got more than I bargained for.

The real point I want to make here today is that public service offers great opportunities to make the world a better place to live

in. I suppose I am preaching to the already converted, since the reason you are here is because you have already indicated your intention to seek careers in public service. I just want to make you feel good about what you are doing and encourage you to stay on the right track.

I am frequently asked by young people what I think of Government service as a career, compared with private business. I tell them this: If you work for the Government, you won't make as much money, but you'll have a lot more fun. I've tried it both ways, and I know.

I'll tell you the same thing. The private law practice I have these days is interesting. My clients are nice people. I enjoy working with them, and they pay me very well. But it is not near as much fun as I had working for the Government. It's true that I had some extraordinary opportunities in Government service. Very few people can hope to be so lucky. But you can reasonably expect to find a place where you can do a lot of good and enjoy doing it.

Fortunately, public servants are somewhat better paid these days than they used to be. It's still not the road to great wealth, but you can hope to be paid enough to live decently, and support a family in modest comfort.

Frankly, if your chief aim in life is to make money, public service is not the road to travel. If you go the public service route, you are going to have to take a large part of your reward in what I call "psychic income." That's great stuff, even though it won't get you much at the grocery store.

It is hardly necessary for me to tell this group that you need not be apologetic about having public service as your goal. That is true whether you take the route of a career civil servant, or whether you take to the hustings and seek elective office.

President Truman was always proud of being a politician. He had some strong beliefs on the subject, which he put down in writing. Let me tell you some of what he said.

Politics, he said, is "the science and art of government. Under our Constitution the 'art of government' is the art of understanding and working for the interest of the people."

He went on, ". . . A stateman must be an honorable man and he must be a good politician in order to become a statesman under our form of government. If you will study the history of our country—he said—you'll find that our greatest presidents and Congressional leaders have been the ones who have been vilified worst by the current press. But history justifies the honorable politician when he works for the welfare of the country."

President Truman went on to say, "I would risk my reputation and my fortune with a professional politician sooner than I would with the banker or the businessman or the publisher of the daily paper! More young men and young women—he said—should fit themselves for politics and government."[1]

You can tell from that, that President Truman would approve heartily of the direction in which your group is headed.

In fact, I think he would be very proud of this group. You have a lot to be proud of yourselves, so long as you don't let it go to your heads. You were chosen for these scholarships through a pretty rigorous selection process. I guess you know that as well as I do. You had to stand well in your colleges and universities to be nominated. Then you were screened once, then screened again. And you had to get past that personal interview.

All this was done on the basis of merit and without regard to personal influence or partisan politics. President Truman would like that nonpartisan part. He would think that Republicans as well as Democrats ought to be educated. In fact, he might think Republicans need it more.

He would be greatly interested in the goals you have set for yourselves. He would be especially pleased about those who plan to go into state and local governments. He would also tell you to be active in your local political party—to learn how to work a precinct. So far as he was concerned, that is where democracy begins—that's democracy with a small "d".

He was just as proud of being the presiding judge of the Jackson County court as he was of being President of the United States.

There's something else he would tell you. This might sound a little naive, but it's what he would say. He would tell you the best politics is to do the right thing and do the best job you can. Can you imagine Harry Truman taking a public opinion poll to decide what to do? Anyone who ever worked with him would laugh aloud at the idea.

He did not think much of the polls. When he was reelected in 1948, one of the things that really put the frosting on the cake for him was the fact that the polls were so badly wrong. One of the big ones stopped sampling public opinion weeks before the election because they were so sure Truman was going to lose, that it was a waste of time.

So, he would say: Forget about the polls and do the right thing.

That man was so honest, you would not believe it. He was what I think people of your generation might call "squeaky clean."

I expect that many of you have been concerned about the wrongdoing in public office we have seen in recent years, some of it in high places. You should be concerned. But I want to give you some measure of reassurance.

There are some wicked people in Government service, but there are a lot more good people. I worked for the Government a long time, and I know a lot of people. I have known hundreds of United States Senators and hundreds of Congressmen. I have known hundreds of staff people—on Capitol Hill and in the Executive Branch and in the independent agencies. In all these places, I found the average to be pretty high so far as ethical standards were concerned, higher than in the outside business world. I do not mean to be casting aspersions at the outside business world either, because I think the average is pretty high there also.

I must confess that the average in the Government seems to have slipped a little since I left it 12 years ago—not just because of my departure, you understand, but coincidentally.

Still, I am confident that our Government is basically honest. We can deplore the wrongdoing, but part of your mission ought to be to see that your entry into public service raises the ethical standards by that much.

Finally, I urge you to keep on dreaming and planning about what you are going to do with your lives. Not all of you can be Presidents of the United States—although three or four of you might make it if you time it just right.

All of you can be good public servants, and find much pleasure and satisfaction in the process. You will find some frustrations and heartaches, also. But that goes with the job.

For most of you, life will not develop just as you expect it to. Things might be better than you expect, or they might be worse; but they are pretty sure to be different. That is no reason not to plan. Perhaps your plans should have some flexibility. But without a plan, you are likely not to get anywhere. You are likely not to be ready when the opportunities come.

So, I want to leave with you this message from President Truman. This is what he said:

"Keep working on a plan. Make no little plans. Make the biggest one you can think of, and spend the rest of your life carrying it out."[2]

In closing, there is one more quotation from Harry Truman that I would like for you to think about as you spend the rest of your life carrying out that plan. In 1954, when he was looking back at his career, he wrote these words:

"I would much rather be an honorable public servant and known as such than to be the richest man in the world."[3]

Thank you very much.●

TRIBUTE TO WILLIAM BOWMAN SPANN, JR.

HON. ELLIOTT H. LEVITAS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 8, 1981

● Mr. LEVITAS. Mr. Speaker, I would like to take this opportunity to pay tribute to a friend and distinguished attorney.

William Bowman Spann, Jr., had a long and distinguished career before he died at age 68 in Atlanta, Ga., on Sunday May 17.

Mr. Spann was president of the American Bar Association in 1977–78 and chairman of its House of Delegates in 1970–72. As chairman of the Association's Special Committee to Study Federal Law Enforcement Agencies, he was largely instrumental in the enactment of the Ethics in Government Act of 1978. In the course of his illustrious career, Bill Spann was, among other things, president of the Lawyers Club of Atlanta, a director of the Legal Aid Society, a fellow of the American Bar Foundation, a trustee of the Lawyers Committee for Civil Rights Under Law, a member of the American College of Trial Lawyers, and a member of the National Conference of Commissioners on Uniform State Laws. At the time of his death, Bill was serving as executive director of the State Bar of Georgia. The community—professional and lay—will sorely miss him.

The Reverend Robert E. Lee, pastor emeritus of the Lutheran Church of the Redeemer, captured the spirit of this man in the homily read at his funeral service. I ask that it be reprinted here for all to see:

HOMILY FOR WILLIAM BOWMAN SPANN

Let us pray!

O God, by Whose Word we know both Justice and Mercy—look upon us, thy servants, in this hour of thanksgiving for our loved one and friend, William Bowman Spann. Grant us, we beseech Thee—steadfast faith and courage—that we too may come, at last, into Thy Eternal Presence—through Christ, our Lord. Amen.

The text that compellingly commands our attention—as we come to this hour of thanksgiving for William Spann—is written in the 6th chapter of the prophecy of Micah—the 8th verse.

Somehow, it seems to describe the character—and the focus of William Spann's life.

Listen to the words of Micah—

"He hath showed thee, O Man, what is good; and what doth the Lord require of thee but to do justly—to love mercy and to walk humbly with thy God?"

There is instinctive desire in a moment such as this to enumerate the notable achievements of one who has had, across the years, the respect and confidence of his peers in the legal profession, by whom he has been accorded eminent recognition.

William Spann would demur from such a "Brief," such a recital of achievement. But, for us, there is something that must be understood as he so clearly understood it that the ultimate Truth to be served in life is the Truth of God from whom comes both the Law and the Gospel.

Because he understood that essential fact of the Christian Faith, that God is Our Righteous Judge and our Merciful Saviour, he understood the meaning of justice and the meaning of mercy.

To him it was a "given" that we should do justly and love mercy.

The one inherent in the other!

Thus he set for himself—for his profession—high standards and noble ideals!

And they leave their mark—
On each of us;
On family;
On friends; and
On colleagues.

The reason they leave their mark on us is that he lived by that third requirement of which the prophet, Micah, spoke!

Micah said that it is required of us that we walk humbly with God!

When we translate that into life today—it's very simple.

To walk humbly with God is to see one's own worth and to acknowledge one's own frailties.

It is to pursue our sense of purpose with quiet determination and dignity.

It is to use one's intellect to its farthest capacity.

It is to strive to love even as you are loved.

It is to honor the faith of our fathers.

It is to strive to minister to others—not to be ministered unto.

It is to serve without counting the cost.

It is to live in the bold and confident expectation of life eternal through the saving merits of Jesus Christ.

Good and great men are like that. William Bowman Spann walked that way!

And today we honor his memory because we are greatful for the compelling witness of his faith and character, loving husband and father, wise counselor, loyal colleague and friend, a man of justice, a man of human compassion, and a man of unassuming faith in the Just and Merciful God!●

THE PLIGHT OF SOVIET JEWS, PART II

HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, June 8, 1981

● Mr. CORCORAN. Mr. Speaker, following up on a statement I submitted to you last October, when I first learned of the plight of "refusenik" Karl Grinberg, I am now pleased to report that after 5 years of pursuit, Karl Grinberg has finally received permission to emigrate from Moscow. In June 1976, 5 years ago, Mr. Grinberg applied for permission for him and his family to emigrate to Israel. As a result, both he and is wife lost their jobs and the Grinbergs suffered a divorce in order that Mrs. Grinberg and their two sons could apply independently. She and the children did receive visas and emigrated to Israel 2 years later. In a letter dated October 1, 1980, to U.S.S.R. Secretary Brezhnev and Ambassador Dobrynin, I expressed my deep concern about this case; thus I was especially pleased to learn that Karl Grinberg is now a free man.

On March 16, 1981, Mr. Grinberg received official permission to leave Moscow. With his departure Grinberg was reunited with his wife and two children.

Mr. Speaker, the apparent successful conclusion of the Grinberg case has been most gratifying to me. Hopefully, with the continued diligence of such groups as the Chicago Action for Soviet Jewry, which brought this matter to my attention, others like Mr. Grinberg will be allowed to emigrate.

For the benefit of my colleagues, I would like to insert in the RECORD an excerpt from a letter I received from Karl Grinberg last week, written from his new home in Israel. The letter follows:

Dear Mr. Tom Corcoran,

Now it is known, that due to your fine efforts on my behalf I have beautiful possibility to see my family. Take, please, my thanks. I'll be thankful to you all my life.

Best wishes.

KARL.

He ends his letter with a postscript which asks for my help to a friend still in Russia, a vivid reminder that though Karl's emigration is a huge victory, we must all continue to work for the release of thousands of Soviet Jews who are now refused the freedom to emigrate.●

BILL TO ESTABLISH THE NATIONAL PROFESSIONS FOUNDATION

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 8, 1981

● Mr. BROWN of California. Mr. Speaker, I am introducing with Representative MERV DYMALLY, the National Professions Foundation Act, a bill to establish a National Professions Foundation which shall develop coordinated efforts among public professions for the solution of national problems. I have introduced this bill in past Congresses. I am reintroducing it with the intent of stimulating discussion of the problems addressed by the bill and the solution proposed.

In the sense of the bill a "profession" means a body of persons engaged in a calling which requires specialized knowledge and extensive educational preparation, which has a significant relationship with public affairs and the allocation of societal resources, which is accountable to constituencies and to the public, and which includes accounting, architecture, dentistry, education, engineering, journalism, law, management, medicine, nursing, pharmacy, public administration and legislation, public health, social welfare, and urban planning.

The need for this bill is based on three observations:

First, every major domestic issue is intrinsically a professional matter.

Second, essentially all resource allocation and environmental decisionmaking of a modern nation is undertaken by men and women acting in a recognized professional capacity.

Third, the national life quality is a direct function of the effectiveness of the Nation's professions.

The bill establishes a National Professions Foundation as an independent foundation in the executive branch of the Federal Government. The Foundation would have a Director and a 24-member Board consisting of members of the professions. Modest funding authorization is provided by the bill for fiscal year 1982 through 1986.

The functions of the Foundation would be:

First, to develop and encourage the pursuit of broadly conceived public professions policy which supports the national interest.

Second, to develop and maintain suitable social indicators in cooperation with other agencies and the public professions to measure the quality of national life as a composite function of the public environments; that is, the physical, civil, health, education, business, legal, social and so forth. environments.

Third, to establish a coordinated multiprofessional effort by the public professions that would: Develop methods to define and assess national problems and needs, conduct ongoing studies to determine approaches, resources, and priorities to meet such problems and needs, and encourage and facilitate cooperative government, industry, university, and professions programs to resolve important national problems and needs.

Fourth, to assess existing and proposed public professions programs and policies with a view toward: Predicting the impact of such programs and policies upon the national quality of life and suggesting, whenever necessary, alternative programs, policies and resources.

Fifth, to study and evaluate the operation of the public professions including their delivery of services and societal effectiveness.

Sixth, to conduct studies designed to evaluate and improve the public professions curriculums of educational institutions.

Mr. Speaker, this bill provides an approach to the problems of society that is as broad in scope as the problems are. It is not clear that a legislative approach is the best means to accomplish this purpose. Nor is it clear that this legislation should stand alone, rather than be merged with other legislation, such as the National Technology Foundation Act, which I recently introduced. All these matters deserve review.●

FREE VLADIMIR AND MARIA SLEPAK

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 8, 1981

● Mr. RITTER. Mr. Speaker, today I join with many of my colleagues in urging the Soviet Union to grant visas to Vladimir Slepak and his wife. The continued repression and denial of emigration visas to this family is yet another example of the Soviets' disregard for basic human rights and nonadherence to the Helsinki accords.

The Slepak family is but one example of the social injustice committed by the Soviet leadership against citizens whose only desire is to leave the U.S.S.R. After filing for an emigration visa in April 1970, the Slepak's existence has become a living nightmare. Vilified by the press and labeled a traitor by Soviet leaders, the Slepaks were arrested in June 1978 on charges of "hooliganism" for hanging a banner from their apartment proclaiming "Let us go to our son in Israel." Following a closed courtroom trial, the Slepaks were sentenced to 5 years in exile. Today they share an unheated shack in Mongolia but continue to remain optimistic that someday they will live in freedom.

As a nation that holds freedom sacred, we cannot turn our backs on those who are denied basic rights by repressive governments. As Members of Congress, we must continue to remind the Soviets to live up to the agreements they signed at Helsinki in 1975. Jews in the Soviet Union who wish to emigrate must be permitted to do so.

The leadership of the Soviet Union has proven that it is not immune to world opinion. During the height of the Polish crisis, Western pressure may have played an important role in keeping the Soviet Army from militarily intervening in Poland. I believe that continued pressure by all nations will encourage the Soviets to find a less violent solution to their Afghanistan debacle and end their unlawful occupation of that country. But just as important, we must continue to draw attention to the Soviet Government's own domestic repression on the Jews and other nationality groups.

Mr. Speaker, millions of voices within the Soviet Union and Eastern block nations cry out for greater liberty. We cannot and will not forsake brave individuals like the Slepaks, the Shcharanskys, and the Vinniks whose only desire is for freedom and to be reunited with families and loved ones.●

EULOGY TO ELMER KISH

HON. DON H. CLAUSEN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 8, 1981

● Mr. CLAUSEN. Mr. Speaker, one of northern California's most extraordinary citizens recently passed away. Elmer Kish was a man who was not only a special friend to me and my family, but more important a friend to his family—totally dedicated to his wife, Heidi, and their five children. He was also a valuable contributor to the timber and aviation industries which are so vital to that portion of our State. I would like to insert for the RECORD Elmer's funeral eulogy delivered by his close friend and colleague, Don Curry. I ask my fellow Members to join me today in recognizing this truly outstanding individual and also to record his life's experiences permanently in the CONGRESSIONAL RECORD.

ELMER KISH

Who was Elmer Kish? Elmer Kish was many things to many people. Builder of dreams, family man, pilot extraordinare, friend, teacher, and to some a challenge. And yet he enjoyed a common ground with every man.

Elmer's early youth was typical of most families raised in the Northern part of California. He had a very close relationship with his mother and father. Elmer and his dad were real pals and worked on many projects together. One of their great hobbies was gold mining. As early as eight years of age, Elmer was out there looking for that big gold nugget.

While in his teens and living in Crescent City, Elmer's father took a job in Red Bluff. Elmer elected to stay in Crescent City to finish High School and with his folks' approval he moved in with the Clausen family.

Don Clausen is currently the Congressman representing the North Coast of California in Washington, D.C. Don had a very important role in Elmer's development. Through Don Clausen, Elmer learned to fly, and this gave a great deal of direction to his life.

Elmer pursued his interest as a pilot into a career—and as he did everything else he became the best. Flying with Elmer was like flying with a bird. It was as if he were a part of the aircraft.

He became a commercial pilot and worked for a number of companies and individuals who were involved in the timber business. With his perception and intelligence he added a new dimension to his career.

The new dimension did not become a reality until his path crossed Jack Erickson's and a bond was struck which collectively led to the development of many new and innovative uses for heavy lift helicopters. Besides his role as an industry revolutionary he fulfilled the more basic role of father and family.

Elmer has 5 children and in spite of the business pressures and extensive traveling time required by his work, he was very proud of them and was very interested in their lives and futures—they in turn must feel very proud of his accomplishments. As they mature they will continue to gain more knowledge and insight from his teachings.

And Elmer was a teacher. Elmer Kish was the man who was Always Right. What memories that statement must bring to everyone here today. Yes he challenged us all individually with his direct approach to life and pushed us into being better people.

To be "Always Right" one must have great inner strength, determination, and a knowledge of many things. Elmer had all of these qualities. He analyzed a situation, made a decision and went ahead—right or wrong—and never looked back.

It was these same qualities that carried him through his illness. His doctors told him early on that his form of cancer was virtually incurable and that there was No Hope. Those words were completely unacceptable to Elmer. He fought back with all his strength and knowledge in a classic battle. And although he lost the battle—it was a close one—and, that some how with his determination to live and the treatments that he tried, he came very close to winning.

But even more important during this period, was the way he conducted his life. He would not allow this devastating illness to interfere with his Love to create and build new ventures. He accomplished more between operations and treatments than the average man does in a lifetime. As Elmer used to say anything can be done in 20 minutes.

To sum up Elmer Kish—He was a positive person—always looking forward—never back, and he pushed hard for what he considered the right way.

And finally; Congressman Don Clausen is flying a flag over the United States Capitol today—in honor of the special relationship between himself and Elmer and as a final

tribute he will send the flag to be presented to Mrs. Heidi Kish and the family.

Goodby Elmer and Good Flying.●

WILLIAM SAFIRE ON REAGAN'S WRONG MOVES

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, June 8, 1981

● Mr. OTTINGER. Mr. Speaker, I usually find William Safire's writing so blatantly biased and partisan that I discount most of what he says. It is therefore particularly significant that he should blast the Reagan administration for its really outrageous disregard for law and morality in the conduct of its affairs. He is well justified in his criticisms of Reagan for attempting to hold his administration above the law, or alter existing law in the four instances he sites:

First. Disregarding his son Michael's influence-peddling in seeking to gain Government contracts;

Second. Seeking to change the law requiring special prosecutors to be used to investigate allegations of administration wrongdoing;

Third. Seeking to relax our laws against foreign bribery; and

Fourth. Seeking to gut the Freedom of Information Act.

Mr. Safire is correct on all counts, and I trust the appropriate committees will assure that efforts to emasculate or evade these important laws will not be tolerated.

What Mr. Safire criticizes is symptomatic of even larger defects in the Reagan administration—a willingness to tolerate on a broad scale corporate abuses of civil rights and the health and safety of our populace. Equally disturbing is the willingness of the administration to tolerate even the grossest abuses of racial persecution and violations of human rights abroad.

Indeed, as Mr. Safire points out, it is doubtful that those who voted for President Reagan were endorsing such worrisome transgressions of fundamental responsibilities and alteration of laws protecting our liberties. If these attitudes are not changed, I believe they will spell the downfall of the Reagan administration and seriously impair the strength and respect of the United States.

I strongly commend Mr. Safire's article to my colleagues.

ESSAY—REAGAN'S WRONG MOVES

(By William Safire)

WASHINGTON.—Many conservatives voted for Ronald Reagan to cut out the sleazy conflicts of interest of the Carter days, to guard against the power abuses of the 60's and early 70's, to give investors confidence that corporate bribery was not concealed in public statements, and to reverse the Big Government intrusion into private lives that began in the New Deal. Mr. Reagan has shown his first signs of failing on those four counts.

(1) *Conflict of Interest.* Despite last year's revulsion at the lust exhibited by Carter relatives and cronies for trading on the Presidential name, the incumbent President's son, Michael Reagan, saw nothing wrong with taking a job soon after the election selling missile parts to the Government. He remined procurement officers, in solicitation letters, how "my father's leadership" was important to them.

The incredibly blind White House reaction was to deny any impropriety, to echo Jody Powell about family members having to make a living, and—belatedly—to assign a lawyer to advise family members how to stay clean. This left it to Mr. Reagan resentful son to quote his father as suggesting he not write any more letters—as if the only lapse had been to put influence-peddling in writing. The Reagan White House problem is not "media hounding," but its own insensitivity to the same appearance of blatant impropriety about which Reagan supporters joined the media in rightly hounding Carter.

(2) *Abuse of Power.* We have seen how Attorneys General—especially those who consider themselves supremely incorruptible—cannot be trusted to investigate vigorously accusations of wrongdoing by their bosses or colleagues.

William French Smith, the long-time Reagan personal lawyer who now serves as Attorney General, wants to gut that part of the Ethics in Government Act that requires the appointment of special prosecutors in charges against high Federal officials. He thinks the normal Justice Department criminal process is enough.

Certainly the act needs amending to raise the threshold from a misdemeanor to a felony charge, and to enable officials singled out by this act to be able to choose a Special Defender to help fight back without going broke.

But the principle embodied in the act is sound: no Administration should be the prosecutor in its own case. The natural instinct is to cover up; only the fact of, or threat of, independent prosecutors appointed by the court insures influence-free investigation and prosecution.

(3) *Bribery Overseas.* Bill Brock, the Reagan special trade representative, wants the Foreign Corrupt Practices Act relaxed to help U.S. businessmen compete in foreign markets. He suggests that the reporting by accountants to the Securities and Exchange Commission on this matter be narrowed, and that policing be left to the less experienced Justice Department.

Such amendments would have the effect of saying to business: Forget competition on the basis of price, product and service—compete instead on the size of payoffs to corrupt foreign princes or power brokers. That approach is bad business in the long run, and encourages businessmen to conceal payoffs in their reports to the S.E.C. and to stockholders. The only senator actively resisting this is William Proxmire, who is turning out to be the most principled conservative in the Senate.

(4) *Snooping Into Private Lives.* The other day, I received a call from the F.B.I., which was properly and routinely checking into the loyalty of Ambassador-designate Arthur Burns, an esteemed former colleague. At the end of my encomium, the agent said that under the Freedom of Information Act, my comments would be available to the person being checked; the agent asked if I wished to claim anonymity.

Civil liberties were not always so well protected. The Freedom of Information Act is a blessing for those who value a check on Government snooping. Individuals can now find out what the F.B.I. file says about them. Even better, individuals can force the Federal bureaucracy to disgorge rulings made without public scrutiny, and documents more politically embarrassing than secret.

Mr. Reagan's Attorney General evidently finds the Freedom of Information Act an annoyance. He has reversed the policy supporting F.O.I.A. followed by Carter Attorney General Griffin Bell, and now the Justice Department intends to help bureaucrats who wish to hide their dealings from taxpayers. (Mr. Bell is looking better every day.)

Conservatives in office can persuade themselves that they are immune to conflicts and abuses, that being pro-bribery is being pro-business and that stopping access to Government files is in the interests of efficiency. But in so doing, they betray some of the principles that persuaded many of the voters to put them in power.●

MORE ON JACOBO TIMERMAN, "QUIET DIPLOMACY" AND ANTISEMITISM

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Monday, June 8, 1981

● Mr. BONKER. Mr. Speaker, Jacobo Timerman is the author of the acclaimed book "Prisoner Without a Name, Cell Without a Number." He was arrested in 1977, imprisoned and tortured by the Argentine authorities. The book is an account of his imprisonment.

Before his arrest, Mr. Timerman was the editor and publisher of a leading Buenos Aires daily newspaper, La Opinion.

Mr. Timerman has been in the United States for the past several weeks and perhaps more than anyone else he has forced us to pay attention and understand the real meaning and value of our human rights policy.

In the Washington Star of last Thursday, Judy Bachrach wrote a column entitled "Cheap Shots at Timerman." She reported:

Timerman believes he was tortured in large measure because he was a Zionist. In an interview with another journalist he reported an encounter he had after one particular torture session: "I would be taken from the torture machine into another room, and there would be a man * * * a man just like you or me who would carefully explain that he was not a torturer.

Then he would say: We know Brzezinski is a Jew. We know President Carter is a Jew, he changed his name from Braunsweig. We know Brzezinski has a plan to take over Brazil and Argentina and Chile. You must tell us about the details.

She further reports Timerman said:

A quiet diplomacy is a silent diplomacy, nations maintained a silent diplomacy with Hitler, and you see what happened. * * *

What do Alexander Haig and Jean Kirkpatrick do? They do nothing. They don't worry about human rights. For them everything is only communist and allies. They are looking for a war. No matter that the allies may be torturers and Nazis.

I commend the entire article to the attention of my distinguished colleagues.

CHEAP SHOTS AT TIMERMAN

(By Judy Bachrach)

The reaction was inevitable. Only its ferocity comes as a surprise. Amid a lot of publicity the journalist Jacobo Timerman came to this country, after having been arrested, jailed and tortured in Argentina, an experience he recorded in his book, "Prisoner Without a Name, Cell Without a Number."

Timerman believes he was tortured in large measure because he was a Zionist. In an interview with another journalist he reported an encounter he had after one particular torture session: "I would be taken from the torture machine into another room, and there would be a man . . . a man just like you or me who would carefully explain that he was not a torturer.

"Then he would say: "We know Brzezinski is a Jew. We know President Carter is a Jew, he changed his name from Braunsweig. We know Brzezinski has a plan to take over Brazil and Argentina and Chile. You must tell us about the details."

For a brief while Timerman and his story received a sympathetic response in this country. Then the man began addressing something more controversial, something closer to home than Argentinian cruelty. He began discussing human rights.

Well there is no filthier phrase right now in the current administration than human rights. Ronald Reagan and George Bush both during their respective campaigns argued that Jimmy Carter had made far too much of the issue, especially in his dealings with those regimes whose barbarism they dismissed with the interesting suggestion that non-Communist governments were worthy allies of the United States; and worthy allies should not be questioned too closely on internal matters.

In his testimony before a horrified Senate Foreign Relations Committee, Ernest Lefever who is pining to take care of human rights at the State Department by presiding over their dissolution, repeated the Reagan party line on this matter most forcefully. In return for such loyalty Reagan and his men are pushing Lefever's nomination down a hundred gagging throats—or were until yesterday, anyway, when two of Lefever's brothers said Ernie had expressed racist views.

That most members of the Senate committee seem to have been disgusted by the clumsy and insensitive exposition of the witness indicates only they weren't listening very hard when Reagan expounded the same sentiments with a good deal more eloquence: If the Soviet Union persecutes its own citizens, the United States should howl its displeasure. If our allies do the same, we should engage in an extraordinarily ambiguous but very promising ritual called quiet diplomacy.

"A quiet diplomacy is a silent diplomacy," Timerman told a reporter after watching Lefever testify. Reagan's fellow ideologues couldn't have liked that much. They liked the rest of his statements even less:

"What do Alexander Haig and Jeane Kirkpatrick do? They do nothing. They don't worry about human rights. For them everything is only communists and allies. They are looking for a war. No matter that the allies may be torturers and Nazis."

Was this a courteous thing for a visitor to this country to say? Probably not. Noting that Timerman had attended a dinner in his honor organized by none other than U.S. Ambassador Jeane Kirkpatrick, conservative columnist William F. Buckley makes this very point, scolding the journalist for his deplorable lack of manners. But Jacobo Timerman is not a graduate of an exclusive Argentine finishing school. His education in that country was finished in quite another institution.

It took Irving Kristol, writing in the Wall Street Journal, to point out in some detail just what a dreadful character this man Timerman is. Kristol started hesitantly, discussing "Mr. Timerman's reputation for inflated self-centeredness." One has heard this failing remarked upon in other quarters; fortunately there aren't any other journalists around who share it.

Then the writer goes on to allege that Timerman's longtime Argentine partner and friend, David Graiver, "a wheeler-dealer on an international scale, a con man . . . had been, among other things, the money manager for the Montoneros, the left-wing urban terrorists . . ." He writes: "It was after these allegations were made public that Jacobo Timerman was arrested, along with members of the Graiver family."

Heavy stuff, one thinks. For about five seconds. Until one hits the paragraph where Kristol is forced to conclude: "There is no evidence that Mr. Timmerman knew what Mr. Graiver was up to—which makes his silence on the Graiver affair all the more inexplicable." Now that is what is known in the business as a cheap shot. And so the question is: Why the rush on the Saturday night specials?

The fault lies of course with Timerman. Timerman overstepped the bounds of propriety in citicizing our new human rights policy. Timerman, that self-centered fathead, forgot his place. Louder than all the screams of the tortured is this wonderful quiet diplomacy, wiping out terror, repression, and false arrest with its whispers.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, June 9, 1981, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

JUNE 10

9:30 a.m.

Appropriations

*Defense Subcommittee

To resume closed hearings on proposed budget estimates for fiscal year 1982 for the Defense Establishment receiving testimony on special programs of the Air Force.

S-406, Capitol

Banking, Housing and Urban Affairs

To hold hearings on the nomination of John J. Knapp, of New York, to be General Counsel of the Department of Housing and Urban Development.

5302 Dirksen Building

Labor and Human Resources

Business meeting, to continue consideration of proposed reconciliations in relation to proposals which fall within the committee's jurisdiction.

4232 Dirksen Building

10:00 a.m.

Commerce, Science, and Transportation

Business meeting, to consider recommendations which it will make to the Budget Committee on changes in law to achieve cost savings required by the committee's reconciliation instructions pursuant to House Concurrent Resolution 115, the first congressional budget resolution.

235 Russell Building

Environment and Public Works

Environmental Pollution Subcommittee

To resume oversight hearings on the implementation of the municipal wastewater treatement construction grants program of the Clean Water Act, and to hold hearings on S. 975, revising and extending for one year certain provisions of the Federal Water Pollution Control Act, and on other related proposals.

4200 Dirksen Building

Finance

Business meeting, to consider the administration's tax reduction program.

2221 Dirksen Building

Foreign Relations

To hold hearings on international terrorism tactics, and on the proposed Convention on the Physical Protection of Nuclear Material (Exec. H, 96th Cong., 2nd Sess.), and the proposed International Convention Against the Taking of Hostages (Exec. N, 96th Cong., 2nd sess.).

4221 Dirksen Building

Governmental Affairs

To hold hearings on the nomination of Donald E. Sowle, of Virginia, to be Administrator for Federal Procurement Policy, Office of Management and Budget.

3302 Dirksen Building

Judiciary

To hold hearings on monopolization and competition in the telecommunications industry, and on related proposals.

2228 Dirksen Building

Judiciary
Separation of Powers Subcommittee
To resume hearings on S. 158, establishing a congressional finding and declaration that human life begins at conception.
6226 Dirksen Building

Select on Indian Affairs
To hold hearings on the substance of S. 1088, authorizing funds for fiscal years 1982 and 1983 to promote the goal of economic and social self-sufficiency for American Indians, and Hawaiian and Alaskan Natives (pending on Senate calendar).
1318 Dirksen Building

2:00 p.m.
Environment and Public Works
Transportation Subcommittee
To resume hearings on S. 841 and S. 1024, bills authorizing funds through fiscal year 1986 for the construction and safety of Federal highways.
4200 Dirksen Building

JUNE 11

9:00 a.m.
Appropriations
*Defense Subcommittee
To continue closed hearings on proposed budget estimates for fiscal year 1982 for the Defense Establishment, receiving testimony on command, control, and communication programs and intelligence-related activities of the Department of Defense.
S-406, Capitol

Labor and Human Resources
Employment and Productivity Subcommittee
To hold hearings on employment and training programs in the United States, focusing on objectives of employment and training policy and the relationship between Federal, State, and local governments in the funding, design, and administration of employment and training programs.
4232 Dirksen Building

To hold hearings on S. 917, increasing the rates of disability compensation for disabled veterans, and the rates of dependency and indemnity compensation for their survivors; S. 911, authorizing the payment of a special pension to the survivor of persons awarded the Medal of Honor; S. 779 and S. 112, bills providing for memorials to honor the memory of certain deceased members of the Armed Forces, S. 415 and S. 416, bills increasing the maximum amount of specially adaptive equipment assistance to certain service-connected disabled veterans, and on other related proposals.
412 Russell Building

9:15 a.m.
Governmental Affairs
Intergovernmental Relations Subcommittee
To hold hearings on the recent GAO report relating to the community development block grant program.
3302 Dirksen Building

9:30 a.m.
*Commerce, Science, and Transportation
To resume hearings on S. 898, proposed Telecommunications Competition and Deregulation Act.
235 Russell Building

Finance
To hear and consider the nominations of Ann Dore McLaughlin, of the District of Columbia, to be an Assistant Secretary of the Treasury, and Peter J. Wallison, of New York, to be General Counsel for the Department of the Treasury.
2221 Dirksen Building

Judiciary
Constitution Subcommittee
To hold hearings on Senate Joint Resolution 41, proposing an amendment to the Constitution of the United States relating to affirmative action.
6226 Dirksen Building

Judiciary
Security and Terrorism Subcommittee
To resume hearings to explore the origin, direction and support tactics of terrorism, focusing on alleged past Soviet involvement in international terrorism.
2228 Dirksen Building

10:00 a.m.
Appropriations
District of Columbia Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1982 for the government of the District of Columbia.
1114 Dirksen Building

Armed Services
To hold hearings on the nominations of Herman E. Roser, of New Mexico, to be an Assistant Secretary of Energy for Defense Programs, and Russell D. Hale, of Virginia, to be an Assistant Secretary of the Air Force for Financial Management.
212 Russell Building

Budget
Business meeting, to review reconciliation proposals of standing Senate committees as required by House Concurrent Resolution 115, the first congressional budget resolution.
6202 Dirksen Building

10:30 a.m.
Environment and Public Works
To resume oversight hearings on the implementation of the Clean Air Act.
4200 Dirksen Building

2:00 p.m.
*Labor and Human Resources
To hold hearings on the nominations of Vincent E. Reed, of the District of Columbia, to be Assistant Secretary for Elementary and Secondary Education, Department of Education; William C. Clohan, Jr., of West Virginia, to be Under Secretary of Education; Kent Lloyd, of California, to be Deputy Under Secretary of Education for Management; Robert M. Worthington, of Utah, to be Assistant Secretary for Vocational and Adult Education, Department of Education; Winifred A. Pizzano, of Virginia, to be Deputy Director of the ACTION Agency; and Lawrence F. Davenport, of California, to be an Associate Director of the ACTION Agency.
4232 Dirksen Building

2:30 p.m.
Appropriations
District of Columbia Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1982 for the government of the District of Columbia.
1114 Dirksen Building

JUNE 12

9:00 a.m.
*Office of Technology Assessment
The Board, to hold a business meeting on pending business matters.
EF-100, Capitol

9:30 a.m.
Finance
Taxation and Debt Management Subcommittee and Energy and Agricultural Taxation Subcommittee
To hold joint hearings on the taxation of commodity straddle transactions, and on S. 626, proposed Commodity Straddles Tax Act.
2221 Dirksen Building

Judiciary
Security and Terrorism Subcommittee
To continue hearings to explore the origin, direction, and support tactics of terrorism, focusing on alleged past Soviet involvement in international terrorism.
2228 Dirksen Building

10:00 a.m.
Environment and Public Works
Water Resources Subcommittee

4200 Dirksen Building

Judiciary
Separation of Powers Subcommittee
To resume hearings on S. 158, establishing a congressional finding and declaration that human life begins at conception.
6226 Dirksen Building

Joint Economic
Monetary and Fiscal Policy Subcommittee
To hold hearings on U.S. monetary and fiscal policy.
5110 Dirksen Building

1:30 p.m.
Select on Intelligence
To hold a closed briefing on intelligence matters.
Room S-407, Capitol

2:00 p.m.
Environment and Public Works
Water Resources Subcommittee
To continue hearings on proposals to provide for the development of ports and harbors and inland waterways in the United States, including S. 809, S. 68, S. 202, S. 576, S. 828, and S. 1094.
4200 Dirksen Building

JUNE 15

9:00 a.m.
Appropriations
*Defense Subcommittee
To resume closed hearings on proposed budget estimates for fiscal year 1982 for the Defense Establishment, receiving testimony on defense intelligence programs.
S-406, Capitol

Labor and Human Resources
*Employment and Productivity Subcommittee
To continue hearings on employment and training programs in the United States, focusing on objectives of employment and training policy and the relationship between Federal, State and local governments in the funding, design and administration of employment and training programs.
4232 Dirksen Building

9:30 a.m.
Commerce, Science, and Transportation
To resume hearings on S. 898, proposed Telecommunications Competition and Deregulation Act.
235 Russell Building

10:00 a.m.
Environment and Public Works
Environmental Pollution Subcommittee
To resume oversight hearings on the implementation of the municipal wastewater treatment construction grants program of the Clean Water Act, and to hold hearings on S. 975, revising and extending for 1 year certain provisions of the Federal Water Pollution Control Act, and on other related proposals.
4200 Dirksen Building

Judiciary
To resume hearings on monopolization and competition in the telecommunications industry, and on related proposals.
2228 Dirksen Building

1:00 p.m.
Judiciary
Separation of Powers Subcommittee
To resume hearings on S. 158, establishing a congressional finding and declaration that human life begins at conception.
2228 Dirksen Building

4:00 p.m.
Conferees
On section 303 of Senate amendment No. 10, permitting the nomination of a Surgeon General who may be more than 64 years of age, of H.R. 31, proposed Cash Discounts Act.
Room to be announced

JUNE 16

9:00 a.m.
Governmental Affairs
*Civil Services, Post Office, and General Services Subcommittee
To hold hearings on S. 1224, strengthening and clarifying the congressional franking law.
3302 Dirksen Building

9:30 a.m.
Banking, Housing, and Urban Affairs
International Finance and Monetary Policy, and Securities Subcommittees
To resume joint hearings on S. 708, clarifying the intent and modifying certain provisions of the Foreign Corrupt Practices Act of 1977.
5302 Dirksen Building

Commerce, Science, and Transportation
To continue hearings on S. 898, proposed Telecommunications Competition and Deregulation Act.

9:30 a.m.
Veterans' Affairs
To hold hearings on S. 5, S. 7, S. 25, S. 26, S. 48, S. 105, S. 248, S. 417, and S. 742, bills providing educational assistance to members of the Armed Forces.
412 Russell Building

10:00 a.m.
Energy and Natural Resources
Energy Conservation and Supply Subcommittee
To hold hearings on S. 506, reinstating and validating certain numbered U.S. oil and gas leases.
3110 Dirksen Building

JULY 23

9:30 a.m.
*Veterans' Affairs
To continue hearings on S. 5, S. 7, S. 25, S. 26, S. 48, S. 105, S. 248, S. 417, and S. 742, bills providing educational assistance to members of the Armed Forces.
412 Russell Building

JULY 28

9:30 a.m.
Labor and Human Resources
Aging, Family and Human Services Subcommittee
To hold hearings on adoption services in the United States.
4232 Dirksen Building

JULY 29

9:30 a.m.
*Veterans' Affairs
Business meeting, to mark up S. 349, providing for limited judicial review of the administrative action of the Veterans' Administration, and for reasonable fees to attorneys representing legal counsel for veterans.
412 Russell Building

SEPTEMBER 16

9:30 a.m.
Veterans' Affairs
Business meeting to mark up S. 5, S. 7, S. 25, S. 26, S. 48, S. 105, S. 248, S. 417, and S. 742, bills providing educational assistance to members of the Armed Forces.
412 Russell Building

CANCELLATIONS

JUNE 9

9:30 a.m.
Labor and Human Resources
Aging, Family and Human Services Subcommittee
To hold oversight hearings on the implementation of family planning programs.
5110 Dirksen Building
Labor and Human Resources
*Labor Subcommittee
To hold oversight hearings on the implementation of the Longshoremen and Harbor Workers Compensation Act.
4232 Dirksen Building

JUNE 10

9:30 a.m.
Labor and Human Resources
*Labor Subcommittee
To continue oversight hearings on the implementation of the Longshoremen and Harbor Workers Compensation Act.
4232 Dirksen Building

SENATE—*Tuesday, June 9, 1981*

(Legislative day of Monday, June 1, 1981)

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Gracious Father in heaven, to whom all thoughts are revealed, all desires known, we pray for this large Senate family where there are secret needs known only to Thee. Thou knowest those who are hurting among us: The one who is discouraged or frustrated; the one who struggles against a temptation or a habit which is enervating and exhausting—emotionally and physically. Thou knowest the family who has stopped loving, where there is brokenness because of selfishness or misunderstanding or where youth are rebellious. Thou knowest where there is a stubborn sickness that does not respond to medication or treatment. Thou knowest where debilitating guilt is corroding a soul. Thou knowest those who feel they are at the end of the line with nowhere to turn.

Father, we commend to Thee all who need the love and healing, the grace and renewal which Thou alone canst give.

In the name of Him who loved and healed all who came to Him. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. Under the previous order, the majority leader is recognized.

Mr. BAKER. I thank the Chair.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

LEGISLATIVE SCHEDULE

Mr. BAKER. Mr. President, there will be caucuses on both sides of the aisle, of Republican and Democratic Senators, around noon, which in our case—I understand that perhaps this is so on the other side as well—will run until about 2 p.m. I am sure that in both cases, the question of the legislative schedule for the remainder of this week will be discussed.

As I indicated yesterday on the floor to the distinguished minority leader, I hope that as a result of those caucuses, it may be possible to proceed to the consideration of the food stamp bill this afternoon, notwithstanding that that would require the waiver of 1 day of the 3-day rule.

Assuming that that is the case, Mr. President, it would be the intention of the leadership on this side to ask the Senate to proceed to the consideration of the food stamp bill this afternoon, after the Senate has disposed of the vote ordered on yesterday on the Crocker nomination, and to proceed with debate and consideration of that measure, the food stamp bill, and any amendments thereto, for the remainder of this day and perhaps tomorrow as well.

I have not discussed this with the minority leader—I will do so after we have had an opportunity, in a few minutes—but after disposition of the food stamp bill, I hope we might be able to proceed on Wednesday, during the course of the day, or on Thursday if necessary, to the State Department authorization bill, which is here and has qualified.

On Thursday, according to the order previously entered, we will proceed to the consideration of the Fur Seal Treaty, on a unanimous-consent agreement that is printed on the front of today's Executive Calendar.

It is my hope, as well, that on Wednesday or Thursday the Senate can proceed to the debate on the Rashish nomination, which will be limited to 1½ hours, equally divided.

I point out, by the way, that the order entered provides that the Rashish nomination be presented to the Senate, in executive session, not more than 2 days after the Foreign Relations Committee has held a hearing on one particular subject. The Foreign Relations Committee is scheduled to meet for that purpose at 9 o'clock tomorrow.

So, on either Wednesday or Thursday—perhaps on Friday, but preferably on Wednesday or Thursday—I intend to ask the Senate to dispose of the Rashish nomination as well.

Mr. President, if we can do the items I have just listed—that is to say, the food stamp bill, the State Department authorization bill, the Fur Seal Treaty, the Crocker vote, and consideration and confirmation of the nomination of Mr. Rashish, the Senate will be on schedule, at least as I visualize the schedule, and there is a real possibility that we will not be in session on Friday of this week. That is a matter we will address later and more especially after the caucuses of the two sides, to be held around noon today.

ORDER FOR RECESS UNTIL 2 P.M. TODAY

Mr. BAKER. Mr. President, are there any special orders for the recognition of Senators today?

The PRESIDENT pro tempore. There are no special orders.

Mr. BAKER. Mr. President, I ask unanimous consent that after the execution of the time allocated to the two leaders under the standing order and after a period for the transaction of routine morning business, which I shall provide for shortly, the Senate stand in recess until 2 p.m.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that after the discharge of the time allocated to the two leaders under the standing order, there be a period for the transaction of routine morning business, to extend from that point not beyond 12:30 p.m., in which Senators may speak for not more than 10 minutes each.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. I have no further need for my time under the standing order, and I am prepared to yield it to any Senator or to the minority leader.

Mr. ROBERT C. BYRD. I would be happy if the Senator would yield that time to me.

Mr. BAKER. Mr. President, I yield any time remaining to me under the standing order to the distinguished minority leader.

Mr. ROBERT C. BYRD. Mr. President, how much time do I now control?

RECOGNITION OF THE MINORITY LEADER

The PRESIDENT pro tempore. The minority leader is recognized for 15 minutes and 10 seconds.

Mr. ROBERT C. BYRD. I thank the distinguished President pro tempore.

Mr. President, I say to the distinguished majority leader that progress is being made with respect to lifting the 3-day rule on the food stamp bill for today, but I still have a little distance to cover; and once we have conducted our conference for the day, I will be back in touch.

Mr. BAKER. I thank the minority leader.

Mr. ROBERT C. BYRD. Mr. President, I yield my time to the distinguished ma-

jority whip. I understand that the distinguished Senator from Wisconsin (Mr. PROXMIRE) would like about 3 minutes. But I yield to the distinguished majority whip all the time I have under my order and that time which was yielded to me, and he can dispose of it as he wishes.

Mr. CRANSTON. Mr. President, how much time is that?

The PRESIDING OFFICER. (Mr. D'AMATO). Fourteen minutes and 20 seconds.

Mr. CRANSTON. I thank my leader very much.

The PRESIDING OFFICER. The Senator from California is recognized.

Mr. CRANSTON. Mr. President, I am prepared to yield 3 minutes to the Senator from Wisconsin so he will not have to stay in the Chamber if there are other things he prefers to do providing it is only 3 minutes.

Mr. PROXMIRE. I thank the distinguished Senator from California.

TAMARA JAFFE WALL

Mr. PROXMIRE. Mr. President, on June 1, 1981, the Washington Post began to run a series of articles telling the story of Tamara Jaffe Wall, a young woman of Jewish descent who lived through Hitler's purges. Of all her experiences, it is her childhood that seems the most tragic. After persecution by the Gestapo, her father was forced to flee Germany, carrying with him only a photo album as a reminder of his family. He was never to see them again.

Victims of a government determined to rid itself of Jews and foreigners, Tamara and her remaining family soon heard the Gestapo knocking at their door at dawn. They were deported: First to Turkey, then, as homeless refugees, to a village in Siberia where Tamara's mother and a brother died of exposure and malnutrition before they could be rescued.

It is possible that the family might not have been spared this misery even if the Genocide Convention had existed in the 1930's. Perhaps the Convention would have made no difference, and perhaps the consensus of international opinion which it would have focused would not have made Nazi Germany observe even superficial proprieties. Perhaps.

On the other hand, Germany did make efforts throughout the war to live up to the terms of the Geneva Convention, an agreement enacted with little more enforcement apparatus. Nevertheless, critics have continued to charge that the Genocide Convention is toothless, representing merely ineffectual symbolism that could never play a positive role in world events.

Mr. President, I must disagree. The Geneva Convention could be considered equally toothless, yet over the years it has dramatically improved the living conditions of prisoners of war. The slavery and refugee conventions are precisely that—conventions, enacted without apparent means of enforcement—but they have helped to lay down the formal foundations of an international code of human rights.

Such a code represents a working consensus of mankind, asserting a basic agreement on principles that imbue those principles with the special moral authority of international law. It is to such principles and to such conventions that domestic critics within any country can rally and appeal as a source of legitimacy before their own people and before the world community.

The ratification of the Genocide Convention by the United States would not only mark its acknowledgment as law by every major world power, but might well spur renewed international interest in the treaty—motivating still more countries to ratify, and prompting closer scrutiny of any possible violation of its tenets in the future. Finally, it would reaffirm the agreement's standing as universally accepted international law, with all the moral sanction that that designation provides. It is from this status that the treaty draws its intrinsic authority and its hope of preventing any future campaigns of genocide like that one which brought so much misery to Tamara Wall and her family.

With such hopes in view, I respectfully recommend to my colleagues their prompt approval of the Genocide Convention.

I thank the distinguished Senator from California.

ISRAEL'S STRIKE AGAINST IRAQ'S NUCLEAR PROGRAM

Mr. CRANSTON. Mr. President, I stood on the Senate floor on March 17, 1981, and made a speech warning that the Government of Iraq had launched a Manhattan project-type program to become a nuclear power and had at least the theoretical possibility of fabricating at least one nuclear weapon this year.

I said in the course of that speech:

> I have been informed by more than one authoritative executive branch official that in the absence of any associated power program a weapons capability is clearly the option that the Iraqis are pursuing. According to these authoritative assessments the Iraqis are embarked on "a Manhattan project-type approach." They are pursuing all avenues which could provide them with a capability to produce nuclear explosives.

I said much more in that speech about my concern that nations which employ terrorism could be developing a nuclear weapons capability and about the need for a firm and effective American policy against nuclear proliferation.

Today's New York Times, in an article datelined Paris, June 8, states:

> The latest expression of concern came last month when the London-based International Institute for Strategic Studies called Iraq's nuclear program "worrisome" in its annual survey of military developments in the world. The institute pointed out that Iraq recently signed a nuclear cooperation agreement with Brazil, which is not a party to the Nuclear Non-Proliferation Treaty, and that the Iraqis at first refused to allow international inspectors to check Osirak and its fuel after the outbreak of the Iraqi-Iranian war last year. . . .
>
> France showed signs of wearying of the international protests that its Osirak sale had aroused, and tried to persuade Iraq to accept a different type of reactor that would burn low-enriched uranium fuel unsuitable for use in weapons.
>
> However, the French yielded after the Iraqi President, Saddam Hussein, refused to accept the change. Last summer, France delivered a first consignment of highly enriched uranium, despite protests by the United States and Israel.

Mr. President, in considering what has occurred and the consequences to American security and the cause of peace, it seems to me that we should consider very carefully the many factors involved in the Israeli decision to undertake this action.

Israel's very small size and very great vulnerability has led her historically to look upon the preemptive first strike as essential to her security and survival.

This was well known to our Government. It was well known to others.

It seems to me, therefore, that the Israeli strike against the Iraqi nuclear facilities should not have come as any big surprise.

I believe it was quite likely, perhaps inevitable, that such an action would occur as long as Iraq pursued a nuclear weapons capability and so long as the U.S. Government was unable to persuade France, Italy, and others to halt their transfer of highly sensitive nuclear technology and materials to Iraq.

This is only the latest, though perhaps the most dramatic, and ominous, sign of the dangers that uncontrolled nuclear proliferation present to U.S. security and to world peace.

Another unstable dictatorship, Pakistan, is in the process of developing a nuclear weapon. Pakistan, another Moslem nation hostile to Israel, is in fact preparing a nuclear bomb test site. Libya is reportedly, although these reports are not confirmed, providing aid to Pakistan in their development of a nuclear capability.

Libya, an unstable nation which is perhaps the most terroristic nation of any on the face of the Earth, has made its own efforts to develop a nuclear capacity. These efforts have thus far, fortunately, been unsuccessful.

The invasion by Libya of Chad, where there are very large uranium deposits, may be a part of Libya's nuclear strategy.

June 7th was not the first time that a nation which felt threatened by the Iraqi drive to achieve a nuclear weapons capability undertook an air strike against the Iraqi nuclear facilities.

On September 30, 1980, planes believed to be Iranian attacked the Iraqi reactor, but their bombs missed it.

Some have questioned, nonetheless, the basis for Israel's conclusion that Iraq was on a determined drive toward attaining a nuclear weapons capability. From my discussions with executive branch and

intelligence community officials—and I refer to discussions over the past months and over the past 24 hours—it is absolutely clear to me that Iraq has been embarked on a Manhattan project-type crash drive to attain a nuclear weapons capability. This is also the conclusion of key executive branch and intelligence community officials, as I noted in my March 17 speech on the Senate floor, and I have learned nothing in the past 24 hours to alter my view on that subject.

I was particularly struck by the comment made to me some weeks ago during my research on the Iraqi nuclear program by a senior State Department official that the continued provision of sophisticated nuclear hardware to Iraq by France and Italy was insane. Iraq has no parallel power production program. And it is clearly intent upon developing only the most sensitive weapons-usable facilities. Without a parallel power production program, what other than a weapons capacity could be Iraq's purpose? Thus it is absurd to suggest that their program deserves legitimacy; it is a weapons development program advanced by a radical nation which routinely employs international terrorism as an instrument of statecraft, a nation which has maintained a state of war with Israel since the day Israel was founded and which has been pledged and remains pledged, to Israel's destruction.

The question has arisen in the Arab world and elsewhere, was the United States told in a advance by Israel that it planned this action? I have heard this question addressed to administration officials in the past 24 hours. The administration officials say our Government was not informed, and I believe them. I do not believe that we were warned in advance.

Why would the Israelis not warn us or advise us in advance? First, they would have expected that we would have demanded that they not proceed with their plan. If they then proceeded that would have aggravated even more than with their action the relations between our two countries.

And second, I believe they would have feared a leak of their plans, whether for noble or ignoble reasons, that could have jeopardized the success of the mission and the lives of those Israelis undertaking it.

It has been embarrassing to President Sadat that he met with Prime Minister Begin just 2 days before this strike was launched against Iraq. I would assume, however, that for the same reasons that he did not inform the United States, Prime Minister Begin did not inform President Sadat of the plans for the air strike against the Iraqi reactor.

When I spoke on the Senate floor and in other places of my concerns about nuclear proliferation, I urged that we reexamine our policy and seek a stronger, more effective policy because I have believed that present international nonproliferation efforts are not working. We have seen evidence of them not working in the developments in Iraq, in Pakistan, and in the action by Israel.

Some time has now been added which affords us the opportunity to reassess our policy and to work with key nuclear suppliers to develop a new tougher policy. The Iraq program has been set back from 2 to 5 years. They will not develop a weapons capability this year, and I urge that our country, working with all other countries, think anew on this subject, and seek a more effective, stringent policy to combat nuclear proliferation. Otherwise the human race will face grave dangers.

I believe that without a firm, sound antiproliferation policy it will be very difficult for our country to achieve any other substantive gains in arms control and in efforts to reduce the dangers of nuclear and conventional conflict.

For example, the discussions soon to be undertaken in Europe on theater nuclear force controls will be very difficult to carry forward effectively in the absence of a new strategic arms limitation effort between the United States and the Soviet Union.

The all-important matter is to succeed in discussions between ourselves and the Soviets to contain, reduce and, hopefully, one day to eliminate our nuclear stockpiles. If we are unwilling or unable even to discuss that topic with the Soviet Union, how can we expect others to forgo their opportunity to develop their own nuclear weapons capabilities? So I urge a new and major effort on strategic arms limitations with the Soviet Union and on nonproliferation generally.

I will neither condemn nor condone the action taken by Israel. I am not convinced that it is in violation of any agreement between ourselves and the Israelis. I believe a case can be made that the preemptive strike by the Israelis was defensive not offensive. If that is the case, it would not be ruled out under the present law or under the Export-Import Control Act, section 4.

What about past practice on the subject? When Israel has undertaken preemptive strikes against PLO forces in Lebanon, the Carter administration reported that these "may have been in violation of Arms Export Control Act," and left it at that; no followup action has been taken.

The executive branch of the Reagan administration, while condemning the action by Israel, is presently taking the position that it may be a violation. The administration has not formally stated that it is a violation. Of course, we await a report from the administration to Congress, which probably will come later this week.

In considering the action taken by Israel, I think it is relevant to consider what we contemplated when our own security was threatened in a situation that was in many ways analogous. I refer to the Cuban missile crisis of 1962.

Yesterday I recalled my own presumptions that one of our options during the 1962 crisis had been a surgical strike to take out the Russian missiles planted in Cuba if the blockade failed. I asked a member of my staff, Gerald Warburg, to see if he could verify that that was indeed the case at that time.

Mr. Warburg talked yesterday to Dean Rusk, who was the Secretary of State at that time, and Rusk verified that a surgical strike was an option that we had under consideration, and that we would have resorted to had the blockade and negotiations with the Russians failed to cause the missiles to be withdrawn from Cuba.

Last night and this morning I went to another source "Thirteen Days, a Memoir of the Cuban Missile Crisis," written by Robert F. Kennedy, who participated in all of the U.S. deliberations concerning the missiles in Cuba. He states in the course of his book that Secretary of Defense McNamara was against a surgical strike, a takeout of the missiles, but thought it was, perhaps, inevitable.

At the first meeting held by the President with his top advisers, most felt that a surgical preemptive strike was necessary.

Dean Acheson, former Secretary of State, favored a strike. The Joint Chiefs of Staff favored a strike. Senator Richard Russell and Senator William Fulbright advocated firmer military action than merely a blockade, although Robert Kennedy's book does not specify exactly what they had in mind.

President John F. Kennedy stated that one reason for his reluctance to proceed to a surgical strike was that the missiles were nearly in place and that the response to an attack by us could be a nuclear missile barrage against the United States in which many millions of Americans would be killed.

Much later in the book, Robert Kennedy reports, that in his view had ongoing negotiations failed and if the U.S.S.R. persisted in keeping the missiles in Cuba, "military force would be the only alternative," open to the United States.

Throughout the discussion in the book there is implicit the point that if the blockade did not work, we would strike. The considerations of taking that action were complicated by the fact that a surprise air strike against the missiles, a surgical air strike, would, in the view of the Joint Chiefs, have to include all military installations in Cuba, eventually leading to an invasion.

Contemplating that prospect, John F. Kennedy ordered a crash program on civil government in Cuba to be ready after any invasion and occupation of that country. Fortunately, the superpower negotiations worked and the Russians withdrew the missiles.

Robert Kennedy stated, on page 124 of his book:

> The final lesson of the Cuban missile crisis is the importance of placing ourselves in the other country's shoes.

I suggest that as we consider the wisdom or the folly of Israel's recent action, we place ourselves in their shoes and consider, in the light of what we considered under somewhat analogous circumstances, the factors that they took into account in taking the action they took.

More importantly, I believe we should look forward not backward and seek to develop a sound nonproliferation policy for our country. We should call upon the greatest wisdom at our command in this country and elsewhere to develop a policy that will reduce the danger that further events like this will occur. We need new nonproliferation efforts. We need new theater nuclear force arms control efforts. And we need new strategic arms control initiatives with the Soviet Union if we are to reduce the threat of nuclear holocaust which overhangs the human race.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business not to extend beyond 12:30 p.m., during which time Senators may speak for 10 minutes each.

THE SUPPLEMENTAL APPROPRIATIONS BILL

Mr. BAKER. Mr. President, this past Thursday the Senate agreed to the conference report on H.R. 3512, the supplemental appropriations bill for the balance of fiscal 1981.

As my colleagues know, this $6.648 billion supplemental appropriation is the largest such measure ever enacted by the Congress and it fell upon the Congress at a most difficult time—as we have been attempting to reduce the level of Federal spending increases, to implement those reductions, and in general, to set a new economic course for this Government and this Nation.

Certainly, legislation of this magnitude, on this particular matter, and at this particular moment, is bound to contain numerous areas of controversy and substantial disagreement. Indeed, as the conference committee of the House and Senate convened on this bill, there were more than 400 individual variances in the original bills as initially adopted by the House and Senate. There were instances of minor variance and instances of major and substantive disagreement between the two Houses. Easily, the conference committee could have bogged down on numerous points and the necessary functions and services of the Government could have been interrupted indefinitely.

Of course, such did not take place and the fact that the conference committee could reach agreement in the thoughtful, yet expeditious, manner in which it did reflect enormous credit on each and all of the conferees from both the House and Senate, and particularly on the chairman of the Appropriations Committee, my most distinguished friend from Oregon, Senator HATFIELD, and the equally distinguished ranking Democratic member of the Appropriations Committee, my friend from Wisconsin, Senator PROXMIRE.

As the majority and Republican leader of the Senate, I am personally enormously grateful and proud of the yeoman service Senator HATFIELD rendered in this regard. Many feared and speculated that, because our majority status in the Senate was so new to us, the business of the Federal Government would be slowed and encumbered during these first days of the new Congress.

However, just as other Republican committee chairmen have already proven, Senator HATFIELD again demonstrated in most conclusive fashion that we can indeed reshape the role of the Federal Government and yet do so in a manner as to not jeopardize, but rather enhance and improve, the necessary day-to-day functioning of the Government.

All of us in the Senate and all of us in this Nation owe Senator HATFIELD a debt of enormous gratitude for his most intelligent, tireless, and dedicated stewardship of this supplemental appropriations legislation. I extend to him, and to Senator PROXMIRE and the other conference committee members my congratulations and my appreciation for a work product so skillfully prepared and managed.

NATIONAL SOFTBALL WEEK

Mr. BOREN. Mr. President, I am introducing today a joint resolution which will provide for the celebration of the week commencing June 14, 1981, as "National Softball Week." I am pleased to be joined in this effort by my colleague from Oklahoma, Senator NICKLES, and also 33 other Senators.

Softball has taken the Nation by storm and is participated in by more than 30 million Americans, both young and old, male and female. Organized softball has done much for the physical well-being of many Americans. Its wide support is evidence of its popularity and the need for this joint resolution setting aside a week for appropriate ceremonies commemorating one of America's great pastimes.

Mr. President, I ask unanimous consent that the names of the 33 Senators be added, in addition to Senator NICKLES and myself, as cosponsors of the joint resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

There being no objection, the list of names was ordered to be printed in the RECORD, as follows:

Senators Abdnor, Andrews, Baucus, Boschwitz, Bradley, Bumpers, Burdick, Cannon, Chiles, Cranston, DeConcini, Denton, Dixon, Dodd, Durenberger, Eagleton, Ford, Garn, Heflin, Heinz, Inouye, Johnston, Kennedy, Laxalt, Levin, Long, Lugar, Matsunaga, Leahy, Pryor, Riegle, Sarbanes, Stennis, Thurmond, Williams.

Mr. BAKER. Mr. President, does the Senator wish to proceed to the immediate consideration of his resolution?

Mr. BOREN. That would be my desire.

Mr. BAKER. Mr. President, I would advise my friend and colleague from Oklahoma that there is no objection to the immediate consideration of this joint resolution on this side.

The PRESIDING OFFICER. The joint resolution will be stated by title.

The legislative clerk read as follows:

A joint resolution (S.J. Res. 88) designating the week commencing June 14, 1981, as "National Softball Week."

Mr. BOREN. Mr. President, I would state also that I am informed by the minority staff that the resolution has also been cleared on this side of the aisle. I move the adoption of the resolution.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration and, without objection, the joint resolution will be considered to have been read the second time at length.

The joint resolution (S.J. Res. 88) was ordered to be engrossed for a third reading, was read the third time, and passed.

The preamble was agreed to.

The joint resolution, with its preamble, reads as follows:

S.J. RES. 88

Whereas the sport of softball is a vital means of keeping Americans of all ages in good physical condition, while advancing good sportsmanship as well as family participation; and

Whereas over thirty million Americans of all ages, male and female, participate in playing softball each year: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week commencing June 14, 1981, is designated as "National Softball Week" and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate ceremonies and activities.

Mr. BOREN. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. COCHRAN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BOREN. Mr. President, I thank the Chair and I thank the majority leader.

S. 782, AMENDING SECTION 3104, TITLE 38, OF THE INTERNAL REVENUE CODE

Mr. COCHRAN. Mr. President, I recently reintroduced legislation which provides additional incentives for enlistment and retention in the National Guard and Reserve components of our Armed Forces.

My bill provides an exemption from Federal taxation of the first $5,000 earned by members of the National Guard and Reserve forces when such pay is derived from their military service. I first introduced this bill as a Member of the other body in 1976, and I have reintroduced it in each succeeding Congress.

Mr. President, the incentives provided in this bill can help turn around the personnel shortages we are currently experiencing in our National Guard and Reserves. The Organization of the Joint Chiefs of Staff in its publication, "United States Military Posture for FY 1982," notes the correlation between compensation incentives and recruiting and retention for the military:

Under the All-Volunteer Force policy, the ability of the Services to attract and retain sufficient numbers of qualified people critically depends on measures to maintain and enhance the quality of military life. Goals which must be emphasized are compensation comparable to that in the civil sector, retention of current benefits, and other programs to make Service life more attractive.

Under our total force policy, the National Guard and Reserve play a vital role in our national security effort. They are critical components of our defense system. The National Guard and Reserve Forces will be used for primary and initial augmentation of our Active Forces in the event of mobilization; in many cases, our Active Forces would be unable to accomplish their mission without Reserve assistance.

Today the National Guard and Reserves are expected to provide nearly one-half of the total Army's combat capability and two-thirds of its support capability. For example, 65 percent of the Army medical units are in the Guard and Reserve.

Although our active services have been within 1½ percent of authorized strength each year since 1973, the Reserve Forces are suffering from great shortages. Even with the large increases in Selected Reserve strength this year and with those projected for fiscal year 1982, the Selected Reserve alone remains approximately 100,000 short of required strength. And we cannot overlook the current 200,000 to 600,000 shortfall of trained personnel in the Individual Ready Reserve (IRR). The Department of Defense indicates the IRR shortage will still be in excess of 100,000 5 years from now.

The actual strength of our National Guard and Reserve components on January 1 of this year was 872,000. Even the recommended strength for fiscal year 1982, 941,000, falls short of our wartime requirement of 1,062,100. With these shortages in our Reserves, considering their crucial role in our Defense Establishment, I have serious misgivings about the ability of our All-Volunteer Force to be fully responsive in the event of war.

Our need for well-trained, experienced personnel in the military is great, Mr. President, and it is increasing. As the military-age proportion of the population declines in the next few years, recruiting successes will be even more important than in the past. I believe that the incentives provided in my bill for members of the National Guard and Reserves will help in those recruiting and retention efforts. And I believe that we must provide such incentives now.

I urge my colleagues to join me in supporting the initiative in this legislation.

ST. MARY'S COUNTY URGES SUPPORT FOR COASTAL ZONE MANAGEMENT PROGRAM

Mr. MATHIAS. Mr. President, St. Mary's County is the oldest county in Maryland and one of the oldest settlements in the United States. It was Maryland's colonial capital in the earliest years of the colony and it continues to be a center of historic and cultural interest.

It is also one of the most beautiful areas along the entire Atlantic coast. The broad sweeps of the Chesapeake Bay and the estuary of the Potomac River provide unequaled water vistas.

Many creeks and harbors provide access to the sea for sportsmen, for commercial fishermen, and oystermen, who are famous throughout the world.

It is natural, therefore, that the Board of County Commissioners of St. Mary's County should be concerned about the continued activity of the coastal zone management program. It is entirely proper that the board of county commissioners should have taken formal action by the adoption of a resolution petitioning for the continued Federal support of the coastal zone management program.

I believe, Mr. President, that this expression of the official concern of this important group of local officers is so significant and is so representative of communities up and down the Atlantic seaboard that it should appear in the CONGRESSIONAL RECORD.

Mr. President, I ask unanimous consent that the resolution be printed in the RECORD at this point.

There being no objection. the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION

Whereas, St. Mary's County is bordered by the Potomac River to the south, the Patuxent River to the north; and the great Bay of the Chesapeake to the east; and

Whereas, St. Mary's County is at the mercy of the water quality affected by the inter-State and intra-State development policies proferred by public jurisdictions and private institutions outside the control of local powers; and

Whereas, the Coastal Zone Management Program provides an effective forum through which environmental issues can be addressed and resolved across the State and throughout the nation; and

Whereas, because of St. Mary's County's historical dependency on its surrounding watershed for both economic vitality and for environmental attributes; and

Whereas, the Coastal Zone Management Program in St. Mary's County has provided for the awareness and protection of coastal areas through the growth of economic and residential development; and

Whereas, without funding for the Coastal Zone Management Program, St. Mary's County would suffer the loss of the public education program and the development review process which has been implemented for the Coastal Zone Management Program environment;

Now, therefore, be it resolved, That the Board of County Commissioners of St. Mary's County, Maryland, requests Congress to zealously strive for continued Federal support for the Coastal Zone Management Program for the benefit of St. Mary's County, the State of Maryland, and for the people of these United States.

THE POW/MIA TRAGEDY

Mr. THURMOND. Mr. President, several times in the past year, I have expressed my grave concern to my distinguished colleagues concerning the intransigence of the Communist countries of Southeast Asia in cooperating with America in accounting for POW's and MIA's still held, dead or alive, by these countries. I have urged that our Nation take stronger action in resolving this tragedy. Our effort must be relentless in achieving this goal.

Many recent articles and reports reveal that American prisoners of war are still being held in Vietnam and Laos. A recent article entitled "Our Men Still Being Held by Vietnam," in the Washington Post Parade magazine reports that convincing evidence shows that dozens of Americans are being held by these Communist countries.

Mr. President, I ask unanimous consent that the article in the Parade magazine of the Washington Post, dated May 31, 1981, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

OUR MEN STILL HELD BY VIETNAM—THEY'RE ALIVE AND WE WANT THEM BACK

(By Michael Satchell)

Dozens of American prisoners of war are still being held in Vietnam and Laos, and the U.S. is determined to get them back. That is the conclusion reached by Parade after an exhaustive survey of the POW-MIA (Missing in Action) problem resulting from the Vietnam war, which ended in 1973.

Despite assurance from Hanoi that no more prisoners remain in Indochina, U.S. authorities have turned up convincing evidence that several dozen POWs are in Vietnamese and Laotian hands, with Vietnam also harboring a number of defectors.

When the war ended 566 prisoners returned home from the torture and privation of camps like the "Hanoi Hilton" and "The Zoo." But an additional 113 men, also known to have been held captive in Laos and Vietnam, were not released during "Operation Homecoming." The fate of 1237 men listed as MIAs—some of whom certainly survived—was also unexplained. A further 1178 men were known dead, but their bodies were unrecoverable. Ever since, the fate of these 2528 "Missing Men"—alive and dead—has been largely forgotten.

Now, following intensive study over the past 18 months by the Defense Intelligence Agency (DIA), the U.S. appears ready to try to engineer the release of the men believed held capitive.

Limited diplomatic and military options include:

Demand their release, if we can get indisputable proof of POWs being held.

Stage a military rescue attempt.

Do nothing. The men might be considered expendable, the risks of trying to free them too great.

For months, the DIA has been studying eyewitness reports from Indochinese refugees and boat people that American prisoners have been seen in Laos and Vietnam. More than 300 firsthand sightings of apparent POWs have been analyzed, along with some 200 secondhand reports. Several of the refugees have passed lie detector tests.

In mid-1980, President Carter authorized a stepped-up intelligence gathering operation to obtain independent verification of the refugee reports. The search for new eyewitnesses was pressed around the world. A spy satellite capable of photographing objects as small as a car license plate was maneuvered into orbit over Indochina. Other highly classified, methods were utilized.

Last November, hard information began to trickle in confirming that Caucasian prisoners were being held at various locations. There had been a steady pattern of moving them south and away from the Chinese border—a possible haven in an escape.

The men were working at highway and bridge construction, woodcutting and agriculture—always under guard. They were skinny but not emaciated, healthy enough to work but probably in no shape to try to escape.

They were being held under very tight security. In Vietnam, they were housed in stockade-type facilities; one camp might contain as many as two dozen men. In Laos, it appeared that the men were kept in under-ground bunkers, probably left over from the war.

Whatever timetable of action unfolds, a complete accounting of the fate of the 2528 Missing Men is impossible. Still, Vietnam knows a lot more than it has so far told us. To date, 74 sets of remains have been returned, a few at a time, carried by successive Congressional delegations that have visited Hanoi to seek an accounting.

When the last planeload of POWs returned from Hanoi in March 1973, President Nixon assured the nation that all our fighting men were out of Indochina. That wasn't true, and he had good reason to know it. The Pentagon brass knew it but said nothing. Protests by embittered relatives of the Missing Men fell on deaf ears.

At the time of Operation Home-coming, Hanoi denied having any more live POWs, any knowledge of the 1237 MIAs and any bodies of dead Americans. That, too, was a lie, as events subsequently proved. But the U.S., eager to purge the Vietnam experience from the national psyche, accepted Hanoi's assurances. Until last year, critics charge, our government's record in this affair included a web of lies and deceit toward families of the Missing Men and only token attempts at pressing Hanoi for the truth.

Says Rep. Robert Dornan (R. Cal.), Capitol Hill's most vociferous advocate for pressing the issue: "The U.S. government has failed miserably in pursuing the truth about POWs and MIAs. Nixon screwed up. Ford was a caretaker. And Carter allowed his Administration to systematically slough it off in favor of trying to get normalized relations with Vietnam."

Ann Griffiths, executive director of the National League of Families of American Prisoners and Missing in Southeast Asia, worries that time is running out. "We can wait for the bones," she says. "But there are live Americans being held over there. Some may have been held prisoner for 15 years in God knows what conditions. The danger is, how much will is left when you've been waiting for your government to get you out for all this time? Every day counts now."

The options open to President Reagan are few, and some are fraught with danger. Those close to the issue see these main alternatives:

Armed with incontrovertible proof that Vietnam and Laos are holding prisoners—as opposed to harboring defectors—Washington could approach Hanoi privately and demand the quick return of the men. Various forms of aid might be offered as an inducement. If they still refuse to budge. Washington could display the evidence to the world and hope to embarrass Hanoi and Vientiane sufficiently to secure the men's release.

Economic sanctions, unfortunately, aren't an option. The U.S. hasn't sent Vietnam so much as a Band-Aid or a bowl of rice since the war ended, and there is little trade between Indochina and our allies.

Another alternative is military action. A lightning rescue attempt might force the issue, but it runs a terrible risk. Any remaining POWs might be executed to avoid further potential embarrassment for their captors, leaving them free to declare honestly that no more live Americans are being held against their will.

"Against their will" has been a key phrase in Hanoi's persistent denial. There are strong indications that several American defectors remain, men like Marine Pvt. Robert Garwood, who returned to the U.S. in 1979 after living as a defector in Vietnam. Groups have been spotted in the Cholon section of Ho Chi Minh City—formerly Saigon—and deep in the Mekong Delta.

For political reasons, any raid must succeed. A botched attempt would lay us open to charges of aggression against a peaceful sovereign nation and cost us dearly in international prestige. A successful rescue would stifle any protests.

A large number of Russian military and civilian advisers work in Vietnam, and the country bristles with sophisticated defensive weapons, Laos, by comparison, has limited military capability. A total of 560 U.S. airmen went down in Laos during the war. Apart from nine prisoners sent to Hanoi and later repatriated, no live Americans have ever come out of that country, and the Laotians have only given us two sets of remains.

The President could also decide to keep the issue on the back burner for a while in favor of quiet diplomatic negotiations. But that approach hasn't worked for eight years. Given President Reagan's public statements that Vietnam veterans fought for an honorable cause, inaction isn't likely.

For the families of the Missing Men, the past eight years have been a twilight zone of uncertainty—particularly for the wives of the 113 men known to have been captured alive. Some wives have remarried, but others wait, clinging to hope.

Janis Dodge of San Diego is typical. On May 19, 1967, her husband, Navy Cmdr. Ron Dodge, was part of a planned air attack on the Dao My highway bridge in Quang Binh province, North Vietnam. Before reaching the target, his F-8E suffered mechanical trouble or was hit by flak, and Dodge bailed out and landed safely.

Later that day, Radio Hanoi broadcast news of Dodge's capture. The next day, Hanoi's Nhan Dan newspaper trumpeted the incident with the usual banner headlines. And four months after that, on Sept. 9, 1967, Paris Match magazine printed a photograph of Dodge moments after his capture. An East German propaganda film later featured footage of Dodge being taken into custody by Vietnamese militia.

"Obviously, he was alive," says Dodge's wife. "But when North Vietnam released its list of prisoners, his name wasn't on it. I was very discouraged. I flew to Paris in May 1970 and confronted the Vietnamese delegate to the Paris peace conference. I showed him the picture from Paris Match. He looked flabbergasted but said that if my husband wasn't on the list, they didn't have him. I know one thing. They either have him or his body. And I want to know."

Air Force pilot Charles Shelton was captured by Pathet Lao forces on April 29, 1965, after his plane was shot down on a reconnaissance mission over the Ho Chi Minh Trail in Laos. The Laotian operations were top secret because the U.S. was violating the air space of a supposedly neutral country. Shelton's wife Marian was given only the barest details and told to keep them to herself.

Like Janis Dodge, she and her five children were cruelly disappointed when the official POW lists were released. In 1973, she flew to Indochina to seek clues to her husband's fate.

In Vientiane, the Laotian capital, she met with Soth Petrasy, the Pathet Lao representative. Petrasy listened patiently to her pleas for information. Then he told her. "Mrs. Shelton, the men were probably all eaten by wild beasts and tigers."

In fact, U.S. intelligence knew that Shelton was being held captive with other Americans in the Sam Neua caves in northern Laos. After three years as a prisoner, he was moved perhaps to Hanoi or to China.

Marian Shelton, however, wasn't officially informed of this until 1976—11 years after her husband was shot down. To protect the fiction of noninvolvement in Laos, other wives and families were allowed to believe their men were dead when, in fact, there was good intelligence evidence that they might be alive. They learned the truth only after filing Freedom of Information Act requests.

The years since war's end have been difficult and frustrating for the League of Families. Its persistent campaign for government action when Washington wanted the issue buried resulted in an official smear campaign to discredit the League. High Pentagon officials publicly described League members as "rumormongers, charlatans and profiteers." When families fought against their men being declared dead, they were accused of trying to maintain the POW or MIA status in order to collect their pay.

A series of Congressional missions to Southeast Asia beginning in 1975 all concluded essentially that there was virtually no chance of live prisoners remaining and little chance of many bodies being held.

Critics picked these conclusions apart. They felt the probes were superficial, too eager to accept Vietnam's false assurances and really designed to quiet the League and pave the way for a resumption of relations with Vietnam.

Leading most of these missions has been Rep. Gillespie "Sonny" Montgomery (D., Miss.), chairman of the House Select Committee on Missing Persons. Formed in 1975, it was the first Congressional group to visit Vietnam.

After trips to Indochina and a year's study, the committee concluded there were no American prisoners and little chance of re-

covering many bodies, although several members disagreed and filed a more optimistic, minority report.

Critics felt the committee did a cursory job; it spent, for example, only half of its meager $350,000 budget. Montgomery, it was felt, accepted Vietnam's assurances without fighting hard enough for a full accounting.

Montgomery returned to Southeast Asia in March 1977—with a commission headed by Leonard Woodcock, president of the United Auto Workers—and again in August 1978. His conclusions back then, and today, remain the same: Any live Americans left in Vietnam are defectors.

He repeated his assertion as recently as Jan. 27, in a letter, and March 19, in a speech to the House. And on Feb. 10, he cornered President Reagan at a Kennedy Center dance performance and repeated his beliefs to the Chief Executive, who had never had a thorough briefing on the issue.

"I'm convinced there are no prisoners left alive," Montgomery told PARADE. "I don't want to get these families' hopes up too high. I hope I'm wrong, but I don't think I am.

Montgomery's negative stance infuriates the League of Families. "Nobody deserves more discredit than Sonny for the long delay in solving this problem" is one of the more charitable assessments from Ann Griffiths.

Says Representative Dornan: "The 1978 mission, I was told by a military officer on the trip, was a disgrace. One Congressman fell asleep at the conference table with the Vietnamese. Another went groveling around making abject apologies for our role in the war and collecting autographs and souvenirs."

Dornan described the 1977 Woodcock trip, ordered by President Carter, as "an unmitigated disaster." The group took with it 150 folders, printed in both English and Vietnamese, containing detailed information of locations where missing fliers had crashed. This material would aid Hanoi immeasurably in locating remains but, inexplicably, only a single folder was ever presented to the Vietnamese.

Montgomery dismisses these allegations as "Dornan's crap." He admits, however, that he erred in refusing Dornan's request to accompany him on the 1978 mission.

The raft of reports from refugees that gave new impetus to the Missing Men issue came only after the League of Families took the initiative and advertised for information in Vietnamese- and Laotian-language publications around the world. Since mid-1979, when the reports began flowing in, the DIA has been plagued with false information. Much is known to have been deliberately planted by Vietnamese agents hoping to complicate the search for the truth. Some has come from refugees concoting stories in the hope of receiving U.S. visas or favored treatment—telling us, in other words, what we want to hear.

Excerpts from known reliable reports offer tantalizing clues. "I saw five Caucasian prisoners held in a cave. I was told they were American pilots" is the affidavit of a Laotian who escaped from a detention camp. "They wore light green uniforms . . . with pieces of car tire tied to their feet. All five were quite skinny, however, they appeared to be uninjured."

Last August, a Vietnamese source reported seeing two railroad cars containing American prisoners when the train passed through Da Nang heading south from Hanoi to Ham Tan.

Last June, an ethnic Chinese expelled from Vietnam told of processing the remains of 426 American bodies as late as 1979 in a Hanoi mortuary. He also claims to have seen three live Americans. Skeptical probers put him through a stiff lie detector test, which he passed easily.

If Vietnam and Laos are holding American prisoners and large numbers of remains, what is their motive? There are no clear answers, but there are some strong indications.

After the French withdrew from Indochina in 1954 following their disastrous defeat at Dienbienphu, captives from that war were repatriated for almost two decades. Since 1954, French authorities and citizens have been literally buying back the remains of their dead. Just last March, PARADE learned, the sum of $50,000 was paid for one set of bones.

Is money the motive for Vietnam's intransigence? If so, live prisoners and the remains of our dead may be viewed by Hanoi as a future bargaining chip.

During the Paris peace negotiations that ended the war, President Nixon told Vietnam in a letter that the U.S. would be willing to pay $3.25 billion in aid over five years. Vietnam didn't receive a dime, however, because it broke the terms of the peace accords on hundreds of occasions. Those close to this issue believe Hanoi has kept us twisting slowly on the hook with our POWs and MIAs in the hope of collecting the promised aid or—to use a less polite term—ransom.

THE ONLY POW TO ESCAPE FROM NORTH VIETNAM SAYS . . . "DON'T BREAK FAITH WITH US"

On Oct. 29, 1963, Lt. James Nicholas Rowe was captured by the Viet Cong, who held him prisoner in Vietnam for more than five years before he escaped on Dec. 31, 1968—the only American captive ever to do so. Subsequently, he served in military intelligence and the Army's POW/MIA program. In 1974, this much-decorated officer resigned his commission to write several books. Since preparing this article, he has resumed military duty as lieutenant colonel and chief of SERE (Survival, Evasion, Resistance and Escape) Division, U.S. Army Institute for Military Assistance, Ft. Bragg, N.C.

For five years and two months, I fought to stay alive, and to keep my friends alive, in Viet Cong prison camps deep in the Mekong Delta of South Vietnam. I never gave up hope that one day I would again be free. My parents waited through the long years, relying on their faith in God and their "heart knowledge" that I would return.

During the first four years of my captivity, the only information about my status was pieced together from intelligence reports and sightings of American POWs by Vietnamese civilians. Some of the reports were accurate; others ran the gamut from announcing my execution to stating that I was held in camps from Cambodia to the northern provinces of South Vietnam.

Nothing about me, nor about any of the other Americans in my camp, was reported by my captors. For the Viet Cong, the cloak of anonymity best served their purposes. If a prisoner died, as many did, he would become another statistic among the missing in action. They would shoulder no blame for the death of a man they never admitted holding, nor would there be any challenges to their "lenient and humane policy" toward captured Americans. For those men who simply disappeared, there was never an accounting.

In the fall of 1967, three men were released from my camp. Their confirmation that I was still alive was the first solid evidence that I had survived. After four years, my parents knew that, at least when the three left the camp, I was alive and determined to get home. Fourteen months later, in December 1968, my fourth escape attempt was successful.

I can't recall the faces of the interrogators and political officers who worked on me for those five long years of captivity. I've blocked some of them out because of the pain that remembering would bring, and time has simply eroded the others.

There is a memory that refuses to die, however—one of a single overpowering fear. It wasn't the fear of death. A quick death, at times, was almost welcome, a tantalizing alternative to the constant struggle to remain alive. It wasn't fear of pain, for pain and torment simply became factors in a world measured in those very terms. They were as inevitable as disease, hunger and loneliness. They were my daily companions.

The fear that nagged my every conscious thought, remorseless and unanswerable, was that I would be forgotten, abandoned in that steaming green hell, with slow death my only escape. To exist without hope of returning to those I loved—never again to see my home, read my books or listen to the music I loved—that was what I feared the most.

I suppose I realized that, at some point, considerations of national policies and goals would of necessity take precedence over the lives of prisoners of war. In essence, we were no less expendable as POW's than we were on the battlefield. That was part of the contract when we put on the uniform. Nevertheless, it was difficult to accept the fact that the price required by our Communist captors for our freedom might be too high to pay.

We were faced with several alternatives. We could be released by our captors under their terms and to their advantage; we could be repatriated as part of an agreement negotiated by our government; or we could escape. The remaining choices were to die or to remain in limbo. Since the Communists refused to recognize the provisions of the Geneva Conventions on prisoners of war, we had no hope of an internationally sponsored means of repatriation. Thus, it was realistic to view the last two choices as distinct possibilities.

In late 1967, I was forced to sit through a lecture by an elderly representative of the "National Front for the Liberation of South Vietnam." I was in a swamp camp we had dubbed "No-K Corral," a cluster of huts and POW cages in the infamous U Minh Forest. His tirade covered my "bad attitude" toward the guards and cadre, my "unwillingness to learn the 'truth' of the situation in South Vietnam," and a laundry list of other denunciations. I accepted his remarks with normal trepidation, wondering how much more misery could be inflicted because of my unacceptable behavior. His final admonition, however, struck home.

With absolute calm and assurance, he stared down at me as I sat on the pole floor of the hut. "Do not think," he said, "that merely because the war ends you will go home." He paused as if for emphasis, then added."If your attitude is not correct, you may rest here after the war."

No matter how the political cadre responsible for our indoctrination might distort the truth to create their version of right and wrong, I never knew them to exaggerate about the control they exerted over our fate. The chief interrogator—a determinded, vindictive fellow we nicknamed "Mafia"—said in his first speech to us: "I can kill you; I can torture you; I can do as I wish with you." Initially, we weren't certain about the validity of those threats. Within a week, I was isolated in a punishment camp. Within a year, Capt. Rocky Versace, who had been captured with me, was executed.

The remark about POWs remaining after

the war ended was not an idle threat. It was a statement of fact, of policy, made with full confidence by the Communist political leadership in their ultimate triumph and ability to control the destiny of those in their power.

I was fortunate that I escaped. Nevertheless, while I was imprisoned, I knew that the military and my fellow Green Berets were making every effort to rescue me. With the American presence in South Vietnam, there was always the hope that they would succeed.

Today, however, there is a group of Americans who are "resting in Vietnam after the war." There is no American presence to give them hope, and the natural impatience and forgetfulness in our society has relegated their plight to a bothersome holdover from an unpopular war. Recent reports by refugees from Laos, Cambodia and Vietnam indicate that varying numbers of Americans are still alive there. The "heart knowledge" of the wives and families who have waited these long, torturous years has been rekindled. I only hope that the price for the ultimate freedom of the survivors of the POW camps is not too high for our country to pay.

Perhaps the most appropriate message was given to me by another POW shortly before he died of starvation and disease. "Nick," he said, "when you get back, tell them at home that we didn't break faith with them . . . and ask them, please, please, don't break faith with us."

RESERVE COMPONENTS

Mr. THURMOND. Mr. President, I would like to point out to my colleagues that contained in the budget proposal passed by both the House and the Senate is a provision which potentially could have a disastrous effect on the manning of our Guard and Reserve programs.

This provision would change the current incentive for Federal employees who are members of the Guard and Reserve that allows them to receive both their military and their civil service paychecks when they perform their annual 2 weeks of active duty training each year. The change would essentially permit them to receive only the greater of the two salaries, but not both salaries. Last year the Congress rejected a similar proposal. An editorial in the June issue of the Reserve Officers Association (ROA) magazine, the Officer, clearly points out that the proposal leads in the wrong direction.

Mr. President, such a change would hit especially hard on the many thousands of enlisted Reserve members who find this compensation an important incentive for participating in our Guard and Reserve programs. Further, making the change would be perceived by many guardsmen and reservists as evidence of weakened support by the Federal Government for Reserve service.

It is widely believed by military experts, including those in the Defense Department, that if the proposed policy change is enacted, we will lose many dedicated people from the program. These losses would occur at a time when the Reserves are already facing serious manpower shortages, particularly in the Army Guard and Reserve.

Mr. President, I ask unanimous consent that the editorial in the June issue of the ROA magazine be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows: .

THE WRONG DIRECTION

Last year the Congress wisely defeated an attempt to change the military leave pay policy for Reservists employed by the federal government. These individuals, and many others employed by state and local governments and the private sector, receive their civilian paycheck as well as their military paycheck during their two week active training duty each year. The Defense Department has again introduced a proposal to change the current policy so that these civil servants would receive only the greater of the two salaries, but not both.

While ROA fully recognizes and fervently supports the need to make appropriate budget cuts throughout federal programs, this proposal leads in the wrong direction. Making the proposed change might save money initially, but in so doing, it would seriously hurt our defense readiness. Unfortunately, the Defense Department recognizes that there will be losses caused by its proposed policy shift, but no one in DoD seems to have any idea how serious the losses might be. Furthermore, no one knows exactly how many people would be affected.

It is widely believed by military experts that if this proposal is enacted, we would lose many Reservists from the program. We cannot afford any losses of this kind, especially at a time when the Reserves are already facing serious manpower shortages. It is unconscionable that cutting incentives would even be considered at a time when our Guard and Reserve forces are experiencing serious shortages.

How does the estimated $30 or $40 million savings balance against potentially crippling losses that could result from the proposed change? The readiness cost of an inadequately manned Reserve Force should clearly outweigh the immediate monetary savings that are hoped for. So should the financial costs of finding and training replacements for the many personnel who will leave the Guard and Reserve programs if the proposed policy change is made.

At a time when we are trying to strengthen defense and improve Reserve manning, how can we take steps that would very likely produce immediate and disastrous manpower losses inhibit recruiting of qualified personnel and provoke resentment in those who decide to "stick it out" until they are eligible for retirement? Clearly, the federal government should be promoting legislation and policies that will strengthen and encourage affiliation with Reserve Forces—not legislation to discourage Reserve participation. This proposal leads in the wrong direction.

CONCLUSION OF MORNING BUSINESS

Mr. BAKER. Mr. President, I had previously asked the Senate to enter an order, which it did by unanimous consent, to provide that the Senate would stand in recess from 12:30 until 2 p.m. today. Of course, I asked the Senate to provide time for the transaction of routine morning business, not to extend beyond 12:20. It would appear to me there is no further morning business to transact. I would ask the Chair to put the query if there is further morning business.

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

RECESS UNTIL 2 P.M.

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate stand in recess until 2 p.m. this afternoon.

There being no objection, the Senate, at 11:29 a.m., recessed until 2 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. ABDNOR).

EXECUTIVE SESSION

NOMINATION OF CHESTER A. CROCKER, OF THE DISTRICT OF COLUMBIA, TO BE AN ASSISTANT SECRETARY OF STATE

The PRESIDING OFFICER. Under the previous order, the Senate will now go into executive session to resume consideration of the nomination of Chester A. Crocker, of the District of Columbia, to be an Assistant Secretary of State.

Mr. BAKER. Mr. President, have the yeas and nays been ordered on this nomination?

The PRESIDING OFFICER. The yeas and nays have been ordered.

Mr. HELMS. Mr. President, I am obliged to vote against the nomination of Chester Crocker as Assistant Secretary of State for African Affairs. My views have been set forth in detail in the committee report on Mr. Crocker, and, for the sake of the RECORD. Mr. President, I ask unanimous consent that those additional views be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Briefly, Mr. President, the problem with Mr. Crocker is that he represents the establishmentarian approach to foreign policy, an approach that prefers to deal with elitist planners, whether representing socialists or international finance. This is the kind of arrangement that leaves the interests of the American people and the people of the foreign country in question out in the cold.

Last Thursday, I met with Mr. Crocker to discuss whether he would sincerely attempt to implement the Reagan policies toward Africa, and I received his assurances that he would do so. Indeed, I had sent word to the distinguished majority leader that I thought it might be possible to vote on Mr. Crocker on that day, Thursday, if I received certain assurances in my conversation with him.

Unfortunately, through a misunderstanding, the majority leader, in all good faith, thought that I was releasing the hold immediately, and entered into a unanimous-consent agreement to proceed to bring up the Crocker nomination yesterday, Monday. I suggest that all interested colleagues refer to the colloquy which took place on the floor yesterday **in the RECORD on pages 11690–11696.**

Unfortunately, the question of the leaks from Mr. Crocker's office has not yet been resolved. There has been a pattern of leaks of confidential information, some of it extremely sensitive, to the press both in the United States and in Africa. The thrust of these leaks has been to justify Mr. Crocker's policies, and to attempt to enhance his reputation.

Frankly, Mr. President, I do not see how a policy can be conducted in the glare of publicity. I would like to have seen this matter resolved, but under the circumstances, there is no time. Therefore, I intend to cast my vote against confirmation of Mr. Crocker's nomination.

EXHIBIT 1

ADDITIONAL VIEWS OF SENATOR JESSE HELMS ON THE NOMINATION OF CHESTER A. CROCKER

The nomination of Chester A. Crocker to be Assistant Secretary of State for African Affairs is one of those nominations that raises the question of whether the American people will get the new foreign policy they expected to get on November 4, 1980. Mr. Crocker has impeccable credentials with establishment scholars, and a known track record for his opinions on Africa. Those two circumstances make it doubtful that he will articulate the views on Africa which President Reagan has espoused over the past few years.

Of course, the President is now in the position of having to defend as his own an appointment that was thrown up to him by the impersonal churnings of the nomination process. Yet the views of Mr. Crocker on Africa are barely indistinguishable from those of his predecessor, Mr. Richard Moose, marked only, perhaps, by a greater preference for prudence in attaining the ends which Mr. Moose sought. It is highly significant that Mr. Crocker has chosen to retain as his deputy, and to defend strongly, Mr. Lannon Walker, a career Foreign Service Officer who was principal deputy to Mr. Moose. Those who expected a housecleaning in the Africa bureau will be sorely disappointed.

Briefly, Mr. Crocker's views may be summarized as follows: (1) Unqualified support for the Marxist redistributionist programs of Mr. Robert Mugabe, who came to power in Zimbabwe through terrorism; (2) A coalition government—euphemistically called "a government of national unity"—to bring together the MPLA and Mr. Jonas Savimbi in Angola; (3) the imposition of a SWAPO government on Namibia, after the gimmick of a written "constitution" to protect the rights of the minorities; (4) the implementation of a "strategy of change" in South Africa by working with the "dynamic elites" in South Africa to bring about acquiescence to so-called majority rule.

The common denominator in all of these policies is the classic doctrine of crisis management that disputes are best handled by getting all parties to accept the logic of a dialectical process of change, while at the same time giving up any advantages of power that they might possess. The apparent "reasonableness" of such a process is hard for Western liberals to resist, for whom no principles are, in the long run, worth fighting for. For Marxists, the imposition of dialectical change is merely the implementation of their own philosophy of history; and with the addition of Lenin's doctrines, they feel no compunction about taking advantage of the neutralization of Western interests in the dispute to nudge history in their direction.

The insidiousness of this doctrine is that it convinces the West that it should stop supporting the friends of the West, and support, equally, our friends and enemies. Thus not only is our own leadership neutralized with regard to the outcome, but it actually turns our strength against our friends, forcing them to surrender to the demands of the enemy for the sake of an illusory peace. The Communist and Marxist forces never fall into this trap; for when the United States and the West applies pressure on the friends of the West to surrender, they step up assistance to their own side.

The justification for such a policy is that the United States should remain indifferent to the outcome, so long as the process eliminates the ability of one side or the other to continue the dispute, thus bringing about peace. Wisdom and justice, by this interpretation, lie in the process, rather than the outcome, so long as stability is achieved. Thus we hear much about free and fair elections, democracy, majority rule, and putting an end to racism. If the end result is a one-party, Marxist totalitarian state which is antagonistic to Western interests and unable to feed its people, then we must simply blame the conduct of the colonial powers over the past century, and withdraw from the scene.

The corollary of such a policy is that the ultimate arbiters of the free and fairness of elections, of the quality of the democracy, of the effectiveness of majority rule, and of the extent to which racism has been eliminated are the so-called Front Line States. namely, Tanzania, Mozambique, Botswana, Zambia, and now Zimbabwe, along with Nigeria. None of these states has had the slightest experience with democracy, at least as practiced in the developed nations of the West, and none of them has been able to develop a strong economy capable of supporting its people, much less fulfilling their material aspirations.

In order to impose further failure on their African neighbors, these nations have arrogated to themselves a veto power over the future arrangements chosen by the inhabitants of the territories in question. This is expressed in the formula that the territories must have "international recognition." Not only will the socialist countries withhold diplomatic recognition—even though recognition by other countries is not a pre-requisite under international law for the establishment of independence—but they threaten to continue to play host to guerrilla bases on their own territory for the overthrow of any government of which they do not approve.

Mr. Crocker concedes this right implicity, as did his predecessors. If there is any difference in Mr. Crocker's policy, it is to concede more generously certain undefined rights to the opponents of Marxist terrorism. Mr. Crocker apparently conceives that his duty ends when he has negotiated terms of surrender that permit them to retain their lives, and perhaps their property, but not their power or their culture.

Indeed, Mr. Crocker appears to be insensitive to the nature of the forces which he blandly describes as nationalists and democrats. The Salisbury (Zimbabwe) Herald for April 14, 1981, reported on Mr. Crocker's visit to that country as follows:

The United States draws "an important distinction" between a nationalist party which uses Marxist-Leninist terminology and the Soviet Union and its allies, Assistant Secretary of State-designate for African Affairs, Dr. Chester Crocker, said in Salisbury yesterday.

He was speaking about SWAPO, the Namibian liberation movement, and elaborating on a statement he made that his country had no interest in seeing the expansion of Soviet power anywhere in the world.

Dr. Crocker underscored that policy but explained at a news conference that in pursuing it the United States studies its approach "case-by-case."

In relation to Namibia, he said: "There is no question that SWAPO is supported by the Soviets and their friends at present, but I think it would be an over-simplification to think that that by itself accounts for what SWAPO does or what SWAPO would do if it were to win an election."

Among the questions submitted to Mr. Crocker by the Senator from North Carolina was the following: "Do you consider SWAPO to be a terrorist movement?" Mr. Crocker's response was:

It is clear that SWAPO and South Africa are engaged in a conflict in which the civilian population is often caught in the cross-fire. The Administration does not condone or endorse the tactics of either party, and we cannot favor the escalation of violence.

Mr. Crocker evidently cannot distinguish between the use of terror, the use of violence, and the use of force. Terrorism is the purposeful destruction of innocent life for the purpose of disrupting the stability of a community, often accompanied by atrocities and torture. Its object is to induce fear in the remaining populace, and to secure their acquiescence with the aims of the terrorist organization. It is an inhuman act which is condemned by all civilized communities. The use of violence is the unleashing of purposeless anarchy, as in a riot, with the aim of weakening the ability of the state to govern. Such tactics are also universally condemned. But the use of force by the state in a disciplined manner to respond to guerrilla attacks, to terrorism, or to mob violence is regarded as the legitimate responsibility of government.

To describe the victims of SWAPO terrorism as "the civilian population . . . caught in the cross-fire," is to ignore the purposeful direction of SWAPO's activities against a defenseless population, rather than against military, strategic, or civil-works targets. There is no evidence that the South African forces in Namibia are engaged in random murder and assassination of Namibians. Mr. Crocker falls into the trap of promoting even-handedness against the illegitimate and the legitimate alike.

When President Reagan was putting himself on public record before the election, he fell into one of these traps. He was, for example, a strong supporter of Prime Minister Muzorewa's government in Zimbabwe, accurately characterized Mr. Mugabe as a terrorist, and called for diplomatic recognition. In Angola, he called for U.S. support of Mr. Savimbi, characterizing him as a freedom fighter for his people against Marxist regime propped up by Cuban troops. And, unlike Mr. Crocker, he did not equivocate on the issue of whether or not SWAPO was a terrorist organization. The following excerpts from Mr. Reagan's statements make his position clear:

RONALD REAGAN

Reprint of a Radio Program entitled "Nambia I"

Our government and the United Nations among others are very upset because the terrorist forces of Joshua Nkomo and Robert Mugabe were not allowed to impose their rule on Rhodesia by force of arms. The Rhodesians by free and open election chose another leader and another more democratic course.

Now we find a sequel in another emerging country, South West Africa known as Namibia. This had been a German colony until World War I after which the League of Nations turned it over to South Africa.

In 1978 South Africa accepted a plan drawn up by our country, Britain, France, Canada and West Germany by which Namibia would become an independent nation. This plan was put in effect through the U.N. but, shades of Rhodesia, no sooner had South Africa given in than the U.N. began changing the plan to which South Africa had consented.

Last year the U.N. Security Council by a 15 to 0 vote declared that Walvis Bay must be integrated into Namibia. This was in direct contravention to the agreement with South Africa. The bay is one of South Africa's major sea ports but what is more significant it has been part of South Africa since 1884, Namibia was only mandated to South Africa in 1920.

It now appears that the U.N. and the five western powers changed their minds on Walvis Bay in an effort to persuade Sam Mujoma, leader of a Marxist terrorist band to accept the U.N. plan.

In a situation not unlike Rhodesia's, Namibia has a terrorist force headed by Nujoma who does not want an election to establish a majority rule government in Namibia. His group calls itself the Southwest Africa Peoples Organization, "SWAPO" for short.

As the U.N. sputtered around, unilaterally changing the contract it had signed and postponing an election in Namibia, Nujoma's SWAPO forces—like the bandits of Nkomo and Mugabe in Rhodesia—were busily murdering and pillaging. The government of South Africa decided the only way to settle once and for all who spoke for the people of Namibia would be to hear from the people by way of a free and open election.

SWAPO was enraged, the killing increased and one of the leading black moderates who could have won a free election was murdered. Documents were found proving not only that SWAPO was responsible for the murder but that other leaders were on a "hit" list.

Our government sent observers to Namibia but their bias was showing—they only met SWAPO leaders.

One U.S. Congressman (who, incidentally, has been convicted recently of 29 felony counts) wanted the DTA, the moderate party, to turn the government over to SWAPO—apparently without an election. The U.N. has declared SWAPO is somehow the only legitimate spokesman for the country. Three U.N. bodies, the U.N. Commission for Namibia, the U.N. Council for Namibia and the U.N. Fund for Namibia channel millions of dollars in aid directly to Nujoma, the SWAPO leader. UNICEF and UNESCO do likewise.

Chapter two on the effort to impose a Marxist government without an election on the people of Namibia will follow next broadcast.

RONALD REAGAN

Reprint of a radio program entitled "Namibia II"

Last broadcast I was talking about the newest emerging country in Africa—Namibia—once under mandate to South Africa and soon to become an independent nation.

South Africa agreed to terms submitted by the United States and the U.N. but immediately thereafter the U.N. began unilaterally changing these terms. It is funneling millions of dollars to a terrorist leader Sam Nujoma and wants to recognize his terrorist band called SWAPO as the government of Namibia without benefit of a vote by the people. Our government is going along with this in spite of Nujoma's declaration that he is a revolutionary and that he isn't fighting for majority rule, but is fighting to seize power.

It isn't red-baiting to call Nujoma a Marxist. He has gone to East Germany where he signed a compact of cooperation. He visited Moscow where he was promised sophisticated weapons and journeyed to Cuba where he received promises of "unshakable support."

Violence has increased in Namibia. In May all of the people of that country were incensed by the bayoneting of a grandmother and her two young grandchildren. The U.N. made no comment about that but vehemently protested South Africa's attempt to capture and punish the murderers.

The interim government of Namibia has removed more than 95 percent of apartheid and has worked hard to achieve a non-racial government and complete majority rule.

South Africa attempted in the U.N. to present its side of the story. It was their first appearance in the U.N. in five years. The General Assembly voted 93 to 19 to not accept their ambassador's credentials. Even so, South Africa continues to say it will stand by the U.N. proposal it signed in good faith.

It boggles the mind to think that our government believes it is in our best interest to turn Namibia over to a pro-Communist government when it is obvious that the people of that country prefer a government favorable to the west and certainly non-Communist.

Namibia is rich in minerals and has great room for expansion with a population of less than two inhabitants per square mile. A former mayor of its capital city says, "We believe that the United States has lost sight of what is really happening here. Its support of terrorism is not the policy you would expect from a great power."

No, it isn't. And it's hard to understand our agreeing with a demand that Nujoma's murderous force be allowed to openly establish bases within Namibia. Possibly we think it is inconvenient for them to have to cross the border from their hideouts in Angola whenever they feel a murder coming on.

The Democratic Turnhalle Alliance, a multi-racial political party, representing the 11 black, brown and white population groups of Namibia, continues to strive for free elections, no thanks to the U.N. or the U.S.

ZIMBABWE

By contrast, Mr. Crocker now refuses to say whether or not he would have recommended the recognition of the Muzorewa government, and his position on the Mugabe government is identical with that of the Carter Administration. He strongly recommends support of the Mugabe development plan, praises the Mugabe government as democratic, and is confident that the prospects for Zimbabwe are so good that Zimbabwe is a model for transition in Namibia and perhaps South Africa.

Mr. Crocker has recommended that the U.S. government provide $225 million of the taxpayers' money to support Mr. Mugabe's development plan. The only difference between Mr. Crocker's recommendation and the Carter Administration recommendation is that the Carter Administration proposed $275 million for the same period. This assistance is "justified" by an FY 83 Country Development Strategy Statement prepared by the AID mission in Zimbabwe. In response to my question as to whether or not this 89-page assessment was done before or after January 20, 1981, Mr. Crocker replied that it was "completed in February, 1981."

This document is evidence that Mr. Crocker's recommendations for Zimbabwe are the recommendations of the Carter Administration, and a continuation of the Carter policy. The document is blatantly Marxist in tone and implications, echoing the propaganda statements of the Mugabe/Nkomo Patriotic Front made while conducting its campaign of terrorism. It speaks of redressing "the inequities of the past," noting that "The Mugabe government is dedicated to a restructuring of the economy, to a redistribution of land, to an increase in the opportunities and government services available to the black majority." And while it notes that Mugabe has decided to use the capitalist "sector" as a means of achieving its ends, it in reality lays out a program of support directed exclusively to the socialist sector and to Mugabe's redistributionist schemes. Much of the proposed U.S. assistance would go to restoring the agricultural, health, and educational facilities which were destroyed by Mugabe's terrorists. The aid proposals, therefore, are a subsidy for terrorism.

Moreover, the documents provided by Zimbabwe at the March pledging session for international donors revealed that Mugabe's redistribution and welfare schemes will consume 50% of Zimbabwe's GNP. Even Mr. Crocker's estimates are that this year's deficit will approach $900 million, or 37% of total expenditures.

Despite the optimistic picture of the Zimbabwean economy presented by Mr. Crocker, other factors suggest that Zimbabwe is still riding on the momentum of pre-Mugabe dynamics. Despite the relatively good harvests this year, the crops are over-priced due to price-supports and cannot compete with South African prices in the transport network, both rail and highways, because of the lack of capital to replace equipment worn out with seven years of war, and the rapid erosion of trained management personnel. The deterioration of road beds means that shipments are delayed and undependable. Since Zimbabwe is a communications center connecting Zambia, Zaire, Tanzania, Mozambique, and South Africa, the consequences are serious for the entire southern continent.

Mr. Crocker was also less than forthcoming when questioned about the future of the skilled and professional classes in Zimbabwe. He replied: "We have seen some emigration, but it is not increasing and I do not believe at this point it is as high as it was a year or so ago." When pressed to back up this statement, Mr. Crocker presented figures on *net* emigration, in which the skilled and professional emigration was balanced off against the entry of untrained and unskilled remnants of the guerrilla armies. This showed an emigration of 17,240 for 1980 as compared with 12,951 for 1979, or an increase of nearly 50%.

This figure was higher than at any time during the war. The figures for January and February of this year also produced new records, and were almost twice as high as for the same period last year.

However, a telegram from the U.S. Embassy in Salisbury painted an even grimmer story:

Figures produced by the central statistical office also show that vital skills are being lost through emigration. For the year 1980, Zimbabwe lost 6,445 skilled people and gained 3,017. Administrative, clerical, teaching, and engineering staff are leaving the country . . . Zimbabwe had a net loss of 69 engineers in 1980. Departures of accountants and auditors left a deficit of 70, while production supervisors and general foremen left a gap of 35 in industry. More than 1,500 clerical workers and 431 administrative and managerial staff left the country while 480 new clerks and 279 managers arrived.

These losses have been felt not only in private industry, but in the once-efficient government bureaucracy as well. The Rhodesian/Zimbabwean bureaucracy was once the most efficient in Africa, but now has been flooded with political patronage at the same time that it is losing its experienced managerial talent. This makes even more ominous the recommendation of the Carter/Crocker AID document that "USAID's strategy is to rely heavily on GOZ capabilities for planning and implementation of their own development program."

Mr. Crocker's policy recommendations for Zimbabwe are merely implementations of the policy of his predecessor, Mr. Moose, and the Carter Administration. Indeed, as the AID document summed it up:

The Mugabe government and the people of Zimbabwe believe that the West (especially the U.S. and U.K.) entered certain commitments at Lancaster House, and there will likely be a very strong sense of reneging on promises and betrayal if fairly large levels of assistance are not promised and provided.

In actual fact, the United States was not a participant in the Lancaster House talks, and there was no way that U.S. officials could make commitments to the man Ronald Reagan was characterizing as a terrorist. In any case, since that time the American people voted a new mandate for a change in the

direction of U.S. foreign policy. Yet Mr. Crocker still seems bound by the constraints of the previous Administration's policy.

ANGOLA AND NAMIBIA

The issues of Angola and Namibia are very closely tied together because SWAPO could not conduct its terrorist activities in Namibia without its bases across the border in Angola. Thus the 20,000 Cuban troops in Angola are not only propping up the Marxist MPLA government in Luanda, but they are also propping up the SWAPO challenge to the people of Namibia. The evidence that SWAPO represents a significant portion of the Namibian people is scanty. Its leadership is based upon the Ovambo people, who, in turn make up 46 percent of the Namibian population. Yet when the Ovambos are protected from the terrorist depredations of SWAPO, the evidence is that the Ovambos prefer to participate in the democratic kind of elections that led to the creation of the Democratic Turnhalle government in Windhoek. SWAPO, which declined to forego the use of violence, declined to participate; but 96 percent of the Namibian people participated in the elections.

Nevertheless, SWAPO is the chosen vehicle of the United Nations and the front line states. The U.N. General Assembly has declared that SWAPO is the sole authentic representative of the Namibian people, although it has no evidence to support this claim. The U.N. Security Council voted to listen only to SWAPO in the proposed Namibian debate, and not to the Democratic Turnhalle Alliance, the broadly based, multiracial party representing the government of Namibia. Despite this, the UN feels that it is an impartial body with respect to Namibia, and wants to oversee elections guaranteed by a UN peacekeeping force, according to the provisions of Resolution 435.

Mr. Crocker supports Resolution 435, with the addition of a new proviso for a written constitution before the elections take place, so as to guarantee the rights of the minorities. This plan is based upon the model of Zimbabwe, and the constitution forced upon Prime Minister Muzorewa by the British, a constitution which induced him to renege on the agreement by which he had received the transfer of power from the Ian Smith government. Given the expressed bias of the UN (and the strong financial support which the UN gives to SWAPO), there can be little hope that Mr. Crocker's plan, which is merely an updating of the Carter plan for Zimbabwe, will have a happy result.

The solution to the Namibian impasse lies not in Namibia, but in Angola, where, as President Reagan has pointed out, Mr. Savimbi controls half of that nation's territory. If Mr. Savimbi had control of the government in Luanda, there is little doubt that the SWAPO guerrilla camps would be immediately eliminated. This would eliminate the terrorist and Marxist threat to Namibia, and allow free and fair elections to be conducted in Namibia under the supervision of experienced and functioning major democracies, such as the United States, Canada, France, or Japan.

Although the Luanda government has received wide recognition, its legitimacy rests, at bottom, on the presence of the Cuban troops which keep it in power. It has no claim to democracy, and functions only in the cities, towns, and coastal areas. Mr. Savimbi is an authentic freedom fighter, who has the uncoerced support of the Angolan people, and he has received some assistance not only from South Africa, but from France and Israel too. In every way he deserves the unconditional support of the United States, and indeed, of the Western nations generally. President Reagan has long advocated support for Mr. Savimbi.

The Marxist MPLA government in Luanda has promised that the Cuban troops will leave if a UN election takes place in Namibia. Such a promise anticipates a SWAPO victory under UN supervision, and the isolation of Mr. Savimbi. It is far better that the Cuban troops should leave before there is any Namibian settlement.

If Mr. Crocker had devised a new policy for Angola and Namibia, there are a range of ways to encourage the Cuban troops to leave. Although the Clark amendment presently prevents the provision of military assistance to Mr. Savimbi, it does not prevent other nations from providing the necessary support, nor does it prevent an open and friendly relationship with Mr. Savimbi, and our blessing for his support by other interested nations. Proper support to Mr. Savimbi could isolate the Cuban troops in their garrisons, and destroy their morale.

Instead of taking such a step, Mr. Crocker, in February, dispatched his deputy, Mr. Lannon Walker (formerly the deputy to Mr. Carter's Assistant Secretary, Mr. Moose), to perform a task similar to tasks performed in the Carter administration. Mr. Walker's job was to convince Mr. Savimbi to abandon a proposed trip to the United States, where he would meet with the press, with members of the Senate and the House, with financial backers, and other interested parties. Mr. Savimbi doubtless had even hoped to meet with the President of the United States, who had praised him so highly.

Mr. Crocker declined to testify on what Mr. Walker told Mr. Savimbi at his orders. He did, however, say the following:

Senator, it is my understanding that President Savimbi himself recognized that the active information or disinformation current in the past few months, as we have been reviewing our southern African policies, would have created the kind of climate which, in his own interest, he had no interest in being a part of.

So, after his chat with Mr. Walker, Mr. Savimbi decided, on his own, that he should not come to the United States. This incident is a continuation of the State Department *modus operandi* of preventing anti-Marxist African personalities from having a forum in the United States, particularly with a Congress that might foreclose State's options. Mr. Savimbi is a man of strength and charisma, and his appearance in the United States would have created an overwhelming wave of sympathy that Mr. Crocker could not have overcome.

Instead, now the plan is to force Mr. Savimbi into negotiations with the Marxists. We must be prepared to see Mr. Crocker offer a little aid to Mr. Savimbi, but only enough to increase his bargaining strength with the MPLA, not enough to win. He would then be pushed into a coalition with the Marxists, doubtless in a subordinate position, and without the power to eliminate the SWAPO guerrilla camps.

If Mr. Crocker had wished to change the direction of the Carter policy, he would have given unqualified support to Mr. Savimbi within the purview of U.S. law. At the same time, he would have recognized that the main support of the Luanda government is provided from the earnings of the Cabinda oil fields, under contracts with the Gulf Oil Corporation. Ironically, it is U.S. money that is providing the main support of the Castro troops in Angola.

A policy of change would declare that U.S. paramount interests are affected by the presence of the Cuban troops in Angola, and immediately establish an economic boycott unilaterally. We need have no fear that the oil would go to another country; the oil loading installations in Cabinda are extremely vulnerable to sabotage, and doubtless Mr. Savimbi could see to it that no shipments were made. He has been very effective in bringing the railroads in Angola to a halt.

Such a combined economic and military squeeze could be sufficient to bring Mr. Savimbi to Luanda, send the Cuba troops home, and destroy SWAPO without any U.S. direct involvement at all. This would call the hand of the Front Line states, and challenge the doctrine that U.S. foreign policy for Africa must be approved in Lagos. Moreover, it would guarantee that the U.S. would get a warm welcome in Luanda.

It would, however, also challenge the doctrine that Mr. Carter's Africa policy was essentially correct, and that Mr. Crocker's only job is to do a little fine tuning.

SOUTH AFRICA

Mr. Crocker's policy for South Africa is entitled "Strategy for Change," in an article which he published in the Winter, 1980/81 Foreign Affairs, the publication of the Council on Foreign Relations. It is in this article that he becomes most explicit in his program for managing the transition from the present South Africa to one he euphemistically describes as "a society with which the United States can pursue its varied interests in full and friendly relationship, without constraint, embarrassment or political damage."

President Reagan felt no such constraint, embarrassment, or political damage when he stated a few weeks ago on his Walter Cronkite interview:

"Can we abandon a country that has stood beside us in every war we've ever fought, a country that strategically is essential to the free world in its production of minerals we all must have, and so forth?"

No, we cannot abandon South Africa, nor can we turn it over to the kind of future that has overtaken much of sub-Saharan Africa.

Mr. Crocker is an example of that common paradox, the elitist who feels he knows just what kind of egalitarianism to impose upon his victims. Indeed, despite his pretension to the encouragement of a non-racial society, his prescription of a unitary political structure is, under the circumstances in South Africa, profoundly racist in its implications. It is a prescription which ignores the national structure of the peoples of South Africa, and is, in its way, far more fundamentally flawed than the crippling system of apartheid which now reigns. It is a system under which the black nations of South Africa would suffer more than they now do under the contradictions of apartheid.

The essentially racist concept of Mr. Crocker's thinking is evident in his responses to my questions. In his *Foreign Affairs* article, Mr. Crocker wrote glibly of what he called "the African majority." Yet to make the assumption that "all blacks look alike," is to make one of the most common gaffes of racist thinking. I proposed to him an extensive line of questioning which would have required him to respond to the various political structures and concerns of the indigenous African nations, and their relationship with white national groups. Mr. Crocker refused to respond to these questions, falling back upon South African official statistics of whites, blacks, and coloreds. But in fact there is no African majority.

His insistence upon a racial analysis of the population groups was contrary to the purpose and intent of my questions, and brings into question his understanding of the delicate relationships in a volatile situation. Apparently Mr. Crocker fails to understand the difference between the concept of nations which dwell in a territory and a territory which is arbitrarily defined across the national boundaries. Mr. Crocker's idea of national citizenship is rooted in the simplistic approaches of 19th century rationalism, drawing upon the political and moral philosophy of the so-called Enlightenment. That philosophy reduces all cultural, national, ethical, religious, and political differences to

an artificial common denominator ruled by arithmetical calculation. It is a philosophy which is inherently revolutionary, and which eats away at the foundations of traditional societies.

It is now evident that the concept of apartheid is one which is inadequate to the needs of full economic development, and inequitable in the restrictions that it has placed upon non-white groups in South Africa. But it would be just as wrong to assume that the doctrine of apartheid was conceived in bad faith, or rooted in racial hatred. The history of the Afrikaners, the bitter struggle with British rule (26,000, including women and children, died in British concentration camps), and the deeply religious nature of the Afrikaner spirit, which was untainted by modernist philosophy, brought an approach which was fundamentally in opposition to Anglo-Saxon institutions and concepts of political organization. To condemn apartheid as an inequitable practical failure is one thing, but to demand "purposeful, evolutionary change towards a nonracial system," as Mr. Crocker does is to impose secular values that would destabilize both white communities and the contending black nations.

But what is more disturbing is that Mr. Crocker would rashly push for change by going over the heads of the ordinary people, and seducing the "elites." "Elite" is a favorite word with Mr. Crocker, and appears almost a dozen times in his article. The following is a typical example:

The most accomplished Afrikaners (in business, the professions, higher education, or the public service) have seldom played major roles in a party apparatus based largely on small-town lawyers, failed businessmen, schoolteachers, farmers, clergy, and professional politicians. South Africa's dynamic and competent white elites need to be drawn into the policy process.

The intellectual snobbery inherent in Mr. Crocker's thinking is quite evident in the dichotomy he draws between "small-town lawyers, failed businessmen etc.," and "the most accomplished Afrikaners," who are evidently the "dynamic and competent white elites." Most Afrikaners are fully aware that these dynamic and creative elites control at least three-quarters of their economy, and are fundamentally out of sympathy with their national aspirations. Indeed, the funding of Communist subversion, liberal opposition, and academic research into "change" has come from many of these same dynamic sources who now have the backing of Mr. Crocker. If they trust Mr. Crocker's judgment, they will doubtless find themselves in the same position as the followers in Zimbabwe of Bishop Muzorewa and Mr. Ian Smith.

There is no reason for assuming that the moral and cultural imperatives of special economic interests represented by these dynamic elites are any more to be preferred than the deeply-rooted culture of small-town lawyers, failed businessmen, and farmers. The dynamic elites have the wherewithal to escape the consequences of their actions, but the grass-roots does not.

Mr. Crocker's preference for an elitist policy in Africa is not surprising in view of the fact that African policy has always been determined in that manner since the time of Cecil Rhodes. Although Rhodes was essentially a freebooter, and has retained that image to this day, he was actually a confirmed socialist at heart, having come under the spell of the eccentric John Ruskin at Oxford. Rhodes worked with a small group of fellow Ruskinites—Lord Milner, Sir Ab Bailey, Lord Grey, Lord Rothschild, William Stead, and others—which developed the concept of the British commonwealth as a trust to be turned over to native populations.

Rhodes' fortune went to establish the Rhodes Fellowships to educate native elite in the socialism being taught in England and his own elite group, known as The Round Table, worked on after his death to fulfill those goals. The members of this group controlled administration in South Africa, the Colonial Office in London, the Times of London, the Morgan Bank, and other key spots of influence. Although the members of this group thought of themselves as a private society, it is probably more accurate to describe them as a nexus of powerful decisionmakers with common goals and motivations.

It is ironic that the obstacle to Rhodes' plans were the British and other European settlers who developed South Africa and Rhodesia—an obstacle which has remained down to this day. Not sharing the elitist class pretensions of the Rhodes group, the developers of Africa were interested in hard work and creative development of their own society. The British Foreign Office finally removed the obstacle in Rhodesia last year; now Mr. Crocker is going to work on the obstacle in South Africa.

It is not surprising that the chief organ for the continuation of these policies has been the Round Table and its offshoot, the Institute of Strategic Studies. When the Morgan Bank moved to New York, a similar institute was set up in the United States, funded by the Morgans, Carnegies, Rockefellers, and others interested in international business operations. That institute is known as the Council on Foreign Relations.

Although the Council does not take stands on foreign policy, it is noteworthy that it has been closely identified with U.S. foreign policy for the past 60 years. Twelve out of sixteen Secretaries of State since the time of Charles Evans Hughes have been selected from the Council's membership rolls. The only exceptions have been Cordell Hull, James F. Byrnes, George C. Marshall, and Edmund Muskie. Although the Council disclaims that it sets policy, the fact remains that not only the Secretaries of State, but many lower echelon State Department officials, as well as key financiers and businessmen, have been members. For this reason, the Council has become an object of legitimate public debate when the foreign policy failures of the past few decades are at issue.

Mr. Crocker, of course, is a member of the Council on Foreign Relations. His important article, which is the model for his African policy, was published in the Council's journal. There is every reason to believe, therefore, that the African policies articulated by Mr. Crocker will not be the new policies that the people thought they were getting when they elected President Reagan, but the same old foreign policy run for the benefit of businessmen and socialists. Indeed, when Mr. Crocker was asked whether he would resign from the Council on Foreign Relations as a symbolic gesture of a new beginning, he declined to do so.

I must oppose the nomination of Mr. Crocker. His elevation to the policy-making hierarchy will not mean necessarily that the President will fall into the same trap as our past Presidents. I have confidence in the President's wisdom, and I think that it is obvious that the President, in nominating Mr. Crocker, is giving a pro-forma endorsement. It will mean, however, that Mr. Crocker's actions and policy statements will need to be monitored very, very carefully.

QUESTIONS FOR CHESTER CROCKER FROM SENATOR HELMS

1. The roster of the Council on Foreign Relations lists you as a member of this organization. Are you currently a member?

Yes.

2. How long have you been a member of the CFR?

Since March 4, 1980.

3. What is your understanding of the purposes and goals of the CFR?

As stated in their own annual report, the purposes and goals of the CFR are as follows: "To break new ground in considering international issues; to help shape American foreign policy in a constructive, non-partisan manner and to provide continuing leadership for the conduct of our foreign relations; to inform and stimulate the Council's own membership."

4. In what way does the CFR assist you in your professional career?

It allows access to professional publications and the opportunity to meet and discuss foreign policy matters with persons of differing points of view in the field of foreign relations.

5. Is it fair to say that members of the CFR have played a dominant role in U.S. foreign policy decisions for the past 50 or 60 years?

CFR members have played a prominent role in U.S. foreign policy decisions, but not necessarily because they are members.

6. Despite the fact that the CFR does not officially take positions on issues, does it represent a consistent attitude of professionalism and methodology?

It is my understanding that the Council consists of members representing a wide variety of professional and institutional backgrounds and points of view, and that it makes an effort to do so.

7. How many Secretaries of State have been, or were drawn from, members of the CFR?

Twelve: Charles Evans Hughes, Frank Kellogg, Henry Stimson, E. R. Stettinius, Dean Acheson, John Foster Dulles, Christian Herter, Dean Rusk, William P. Rogers, Henry Kissinger, Cyrus Vance and Alexander Haig.

8. Many citizens of this country feel that the CFR is identified with the failed policies of the past few decades because of the intimate connection of members of that organization with those policies. Do you accept this criticism?

Policies of the U.S. Government are a reflection of the Administration in office, not of any non-governmental organization. Not all of the policies of the past few decades have failed.

9. The CFR, and similar groups, became the object of political controversy during the Reagan campaign. Do you think that the CFR is a proper object of political debate?

I do not believe it is appropriate for me to comment on this question.

10. A key criticism of the CFR is that it perpetuates elitism in policy-making circles, thereby excluding the general interested populace from participating effectively in policy decisions. Do you think that the CFR serves elitist interests, rather than the national interest?

It is not my impression that the Council seeks to serve elitist interests but rather that it seeks to stimulate discussion of various interpretations of how to serve the national interest in foreign policy.

11. Another criticism of the CFR is that its methodology encourages pragmatism in decision-making, thereby undercutting moral consistency, loyalty to allies, and effective intervention on behalf of traditional national interests. Do you see merit in this criticism?

I am not aware of any single methodology in the Council's program or its activities. It is my view that success in politics depends upon a blend of adherence to fundamental principles and pragmatism in their application as best serves the national interest.

12. When the CFR became an object of controversy during the presidential primaries, Vice President Bush promptly resigned as a gesture towards public sentiment. Do you think that the Vice President acted properly?

It is my understanding that the Vice President resigned from the CFR in approximately April 1978, not during the presidential primaries.

13. You have been nominated to a position which requires the advice and consent of the Senate. Do you think that this is an indication that this position requires a special responsiveness to public opinion?

All members of the Administration have a responsibility to the President and his Cabinet at whose pleasure they serve. I believe that they should also be responsive to public opinion in the context of the mandate which the electorate has given them to carry out.

14. President Reagan campaigned on the grounds, among others, that he would pursue a new direction in foreign policy. Do you think that if, like Vice President Bush, you resigned from the CFR, you would be able to project better the image of a new direction?

I think I am fully qualified and able to project the image of the Reagan Administration without severing my previous membership in any non-governmental organization of this kind.

15. Will you resign from the CFR?

No.

QUESTIONS OF SENATOR JESSE HELMS FOR MR. CHESTER CROCKER

The Salisbury Herald for April 14, 1981 reports on your visit to that capital as follows:

The United States draws "an important distinction" between a nationalist party which uses Marxist-Leninist terminology and the Soviet Union and its allies, Assistant Secretary of State-designate for African Affairs, Dr. Chester Crocker, said in Salisbury yesterday.

He was speaking about SWAPO, the Namibian liberation movement, and elaborating on a statement he made that his country had no interest in seeing the expansion of Soviet power anywhere in the world.

Dr. Crocker underscored that policy but explained at a news conference that in pursuing it the United States studied its approach "case-by-case."

In relation to Namibia, he said: "There is no question that SWAPO is supported by the Soviets and their friends at present, but I think it would be an over-simplification to think that that by itself accounts for what SWAPO does or what SWAPO would do if it were to win an election."

Is it your opinion that the only element disqualifying SWAPO from US recognition and diplomatic support is the fact of Soviet support?

Answer. It is not our policy to provide "recognition and diplomatic support" to SWAPO. We recognize SWAPO only in the strictly limited sense as a participant in the negotiations for a Namibia settlement and as a potential participant in free and fair elections in Namibia. We believe that all political parties who will be participating in Namibian elections should be treated equally.

2. Do you consider SWAPO to be a terrorist movement?

Answer. It is clear that SWAPO and South Africa are engaged in a conflict in which the civilian population is often caught in the crossfire. The Administration does not condone or endorse the tactics of either party, and we cannot favor the escalation of violence.

3. If SWAPO dropped its Marxist-Leninist terminology, but not its policies, would SWAPO become acceptable to you?

Answer. One of our major concerns about any eventual government in Namibia, including one with SWAPO participation, would be the policies that it would pursue. As we have seen in Zimbabwe, the idiom of a government is only one aspect of its policies. We are seeking to bring Namibia to genuine independence under conditions that would assure that an eventual independent government would be democratically elected, recognized internationally, and operating within a framework that guaranteed the rights of Namibians of all races and political persuasions. Within such a framework it is up to the people of Namibia to decide on the political parties of their choice.

4. Do you consider SWAPO to be a nationalist movement?

Answer. SWAPO has considerable support among black Namibians and certainly has many nationalist elements in it. I also consider that the Democratic Turnhalle Alliance (DTA), which also has considerable support with Namibians, is a nationalist movement.

5. Is SWAPO primarily an Ovambo-based movement, or does it also represent Hereros, Hottentots, and other national groups in Namibia?

Answer. SWAPO probably has some support among all ethnic groups in Namibia. However, it is generally thought to have its greatest support among the Ovambo people who comprise approximately 46 percent of the population.

6. Is there any evidence that SWAPO represents even the Ovambo?

Answer. Most observers of the Namibian scene would agree that SWAPO has widespread, though not necessarily exclusive, support among the Ovambo.

7. In a one-man-one-vote election, is it fair for one black nation to rule over another black nation simply because the first has the largest number of members?

Answer. If a one-man-one-vote election were to lead to the imposition of an authoritarian regime in Namibia, I would not consider that a fair outcome. It is this potential outcome which the drafters of Namibia's constitution must grapple with in their deliberations.

8. Is the Turnhalle government a legitimate government? Can you provide the election statistics relevant to its election, including the over-all number of eligible voters? In your judgment, was it a free and fair election?

Answer. Neither the United States nor any other country recognizes the "Turnhalle Government". South Africa organized elections in December 1978 which were boycotted by SWAPO and several other political parties representing black Namibians. In those elections the DTA won 80% of the vote. South Africa at one point stated that 412,000 people or 93% of those eligible, voted but others have estimated from 69–70%. There were conflicting views on the freeness and fairness of the elections. I am not in a position to make a judgment on that point.

9. Why should the Front Line States, or others, such as Nigeria, have anything to say about the internal decisions of the Namibian people? Is it fair to characterize their threats to continue to support guerrilla movements blackmail?

Answer. While it is undeniably true that most African governments have supported SWAPO, it is equally important to recognize that they have also attempted to resolve the conflict through negotiations. It is our purpose to reinforce and strengthen the chances of a negotiated settlement which would protect and enhance the right of all Namibians to make their own decisions. That right would not be advanced by the continuation of the current conflict.

10. Can the UN be considered an impartial overseer of elections when the General Assembly has declared SWAPO in advance to be the sole and authentic representative of the Namibian people? Is the UN Security Council impartial when it refuses to allow the Turnhalle government to participate in the debate over its future?

Answer. Neither we nor the other members of the Contact Group accept the UN General Assembly's position that SWAPO is "the sole and authentic representative of the Namibian people." The U.S., U.K., France, Japan, Ireland, and Spain supported the DTA's unsuccessful request to speak in the recent Security Council debate on Namibia. We believe that the Security Council's vote not to hear the DTA was unwise and unfair. Such actions cast doubt on the impartiality of the UN itself and could play into the hands of those who seek to prolong rather than resolve the conflict. At the same time, we continue to believe that a strengthened UN Plan, enhanced by measures aimed at giving greater confidence to all of the parties, can serve as a basis for a transition to independence in Namibia.

11. Do you support the claim of South Africa to Walvis Bay as an enclave distinct from Namibia? Why or why not?

Answer. The United States believes that the question of Walvis Bay might best be addressed after a Namibia settlement by the parties directly concerned.

12. Do you support UN Resolution 435? Why or why not?

Answer. SCR 435 provides a basis for the transition to independence in Namibia, but we believe that it will be necessary to strengthen its provisions in order to reach a settlement. We are committed to the goal of internationally recognized independence for Namibia and we recognize that this goal can only be realized when all parties have the necessary confidence to move forward to implement a settlement.

13. Do you think that a free and fair election can be held in the presence of UN troops?

Answer. In the context of the settlement plan we seek to develop, we believe that the UN is capable of monitoring free and fair elections.

14. Do you think that a Lancaster House-type constitution is a prerequisite to an election?

Answer. We believe that a settlement can be facilitated if all of the parties have greater confidence in the future of Namibia once independence is achieved. We are presently engaged in consultations with our allies and other interested parties on how this objective might best be attained. The Lancaster House model is one possibility but it is not the only way of obtaining a democratic constitutional outcome.

15. Do you think that steps should be taken to prevent the United Nations from providing financial and diplomatic assistance to SWAPO?

Answer. I do not believe that UN General Assembly's financial and diplomatic support to SWAPO advances the negotiating process. I believe that this is one of the points which will need to be addressed as we move toward a settlement.

SOUTH AFRICA

1. In your article in *Foreign Affairs*, you write: "More attention must be focused on those South Africans—the Afrikaners and the African majority—who are shaping and challenging the current order." Who is the African majority?

Answer. The question you have raised goes to the heart of my discussion of South African politics. The term "African majority" used in my article refers to all people of in-

digenous African ethnic origin living in South Africa. South African official data indicate that indigenous Africans account for some 71.8% of the total population. It is by no means clear that Africans in South Africa think of themselves as a cohesive "majority" or a single community. Nor is it clear whether, if given an opportunity to express their political preferences, African voters would in fact coalesce around a single leader, party or platform. In the absence of such an opportunity, each observer is free to draw his own conclusions.

It is not the task of Americans or the U.S. Government to tell South Africans what kinds of political institutions are appropriate to their circumstances or how they should be established. We cannot avoid noting, however, that at present the majority of South Africans are not considered to be citizens of South Africa and are not offered an opportunity to participate in national political institutions through representatives of their choice. Instead, Africans are recognized as citizens of nine ethnically-defined black nations. White, Coloureds (mixed race), and Asians are not similarly broken down into their respective linguistic, religious and cultural components. In these circumstances, it is perhaps natural that Africans perceive themselves increasingly as "the majority" since government policy treats all African groups—whatever their ethnic origin—on a differential basis compared to whites, Coloureds, and Asians.

Questions 2, 3, 4, 5, 6, 7, 8, 9, 10, and 11.

Answers. I do not subscribe to the view that the ethnic origin of any individual in South Africa abridges that individual's right to South African citizenship should that be the decision of a majority of South Africans. That there are recognizably distinct ethnic groups in South Africa is widely recognized. The same is true in the United States. That these should constitute separate sovereign nations in a political sense is the basis and objective of the policy of apartheid, a policy which President Reagan has stated is abhorrent to American principles and values. I fully share the President's views on apartheid.

An attachment provides data on the ethnic composition of the South African population.

CENSUS FIGURES—REPUBLIC OF SOUTH AFRICA

The official Republic of South Africa-wide survey produced the following figures (excluding Bophuthatswana, Transkei, and Venda):

	1980 census	Percent growth from 1970 census
White	4,453,273	18
Black	15,970,019	31
Colored	2,554,039	25
Asian	794,639	26

The so-called independent homelands also conducted censuses to coincide with the SAG effort, but neither the Transkei nor Venda has revealed their results. However, if 1978 extrapolations of resident populations (from the semi-official BENSO) are accepted—2,483,700 for the Transkei and 357,600 for Venda—and added to Bophuthatswana's 1980 census result of 1,310,722, the total population of South Africa rises to approximately 27.9 million of which 15.9% (4,453,273) is white, 9.1% (2,554,039) colored, 2.8% (794,639) Asian, and 72.0% (21,122,041) black. Between the 1970 and 1980 censuses, the groups showed differing growth rates. The average annual growth rate for whites was 1.7%; for coloreds 2.2%; for Asians 2.4%; and for blacks 2.7%. These rates have declined over the last two decades.

POPULATION PROJECTIONS

Group	1990		2000		2020	
	Number	Percent average annual increase	Number	Percent average annual increase	Number	Percent average annual increase
White	5,013,500	1.36	5,631,200	1.17	6,841,800	0.90
Percent of total	(13.8)		(12.1)		(10.0)	
Colored	3,612,800	2.86	4,698,700	2.67	7,299,800	2.09
Percent of total	(9.9)		(10.1)		(10.4)	
Asian	1,045,500	2.35	1,270,100	1.96	1,725,000	1.39
Percent of total	(2.9)		(2.7)		(2.4)	
Black	26,776,400	2.78	34,747,500	2.64	54,589,900	2.14

	Number	Percent of total	Percent of race group	Number	Percent of total	Percent of race group
White	2,249,700	16.4	44.9	2,700,900	15.2	47.9
Colored	1,318,800	9.6	36.5	1,728,900	9.7	36.8
Asian	309,600	2.3	29.6	382,200	2.1	30.1
Black	9,842,900	71.7	36.8	12,968,400	72.9	37.3
Total	13,721,000	100.0		17,780,400	100.0	

Question 12. What is the ethnic base of Nelson Mandela and the Committee of Ten? Can they be said to represent the interests of other black nations, the Zulu, for example? What is the ethnic base of Bishop Tutu? Is he accepted by, say, the Zulus and the Swazis?

Answer. The Committee of Ten is led by black South Africans. Nelson Mandela is not associated with the Committee of Ten. Both Nelson Mandela and the Committee of Ten are widely seen by black and white South Africans alike as expressing the views of a significant number of black South Africans. Bishop Tutu, likewise is a black South African and the head of the South African Council of Churches, an interdenominational religious organization. It is not for the U.S. to say whether and to what extent these individuals "represent" various black communities in South Africa. In the absence of an open test of opinion, we have little basis to do so beyond the reports we receive from South Africans themselves.

Question 13. What is the political orientation of the Inkatha? What would its role be versus the ANC? What would be its legitimacy under a one-man-one-vote constitution?

Answer. Inkatha is a cultural organization led by Kwazulu Chief Minister Gatsha Buthelezi. Inkatha officials have had discussions over a period of time with members of the African National Congress. Inkatha represents the views of its members in attempting to bring about a dialogue among South Africans leading to a non-violent resolution of the issues that divide South Africans today. The question of Inkatha's position under a constitution such as you describe would be determined by Inkatha's platform and the response to it of South African voters.

Question 14. What is the relationship of the Zulus with the Afrikaaners? With the English, with the Indians of Natal?

Answer. The Government of South Africa, in accordance with its policy of apartheid, prescribes separate living areas for Africans, whites and Indians in Natal as in other Provinces. The Zulu population is assigned citizenship in the KwaZulu homeland (in Natal) whose leaders have not accepted the offer of independence granted by the central government. Zulus living outside KwaZulu (in Natal and elsewhere) are subject to the same legal requirements under the Group Areas Act as are all other black South Africans of African origin. That Act and others assign rights and duties on the basis of race not ethnic (e.g., Zulu) origin.

Question 15. Is it realistic, or desirable that the rich and varied historical, political, and cultural interests of the black nations be subsumed under a catch-all phrase such as "the African majority"?

Answer. See answer to Question 1.

Question 16. In your article in *Foreign Affairs*, you advise that we should work with certain "elites." For example, you say: "The most accomplished Afrikaaners (in business, the professions, higher education, or the public service) have seldom played major roles in a party apparatus based largely on small-town lawyers, failed businessmen, schoolteachers, farmers, clergy, and professional politicians. South Africa's dynamic and competent white elites need to be drawn into the policy process." By its very nature, the group which you praise ("dynamic and competent") is a minority, while the group which you deprecate as failures is the apparent majority. Why should we assume that the culture and moral purpose of the majority group—the group which we would call the grass roots in our own country—is any less worthy of support and encouragement than that of privileged minorities representing special economic interests at variance with the interests of the majority? Should our policies be based on inner-circle elitism?

Answer. No. The leading role of various interest groups in South Africa has been recognized and strengthened by Prime Minister Botha. For example, in 1979 he addressed the English-speaking community in an effort to assure closer business-government relations in the search for policies responsive to South Africa's need. I do not believe, as the question suggests, that the Prime Minister's ac-

tions are at variance with what he perceives to be "the interests of the majority."

Question 17. In your article, you state: "nor can we operate on the basis of a Marxist/non-Marxist litmus test in the choice of regional partners because there could be a widening gap between performance and rhetoric." Is not the crucial issue in Africa whether or not African governments can provide an environment where their people can prosper—as opposed to ideologues who insist that race is the prime issue? And if we support, or appear to support, governments based on socialist or Marxist rhetoric, does not that undermine our efforts to support freedom and economic independence? Unless our support is tied to concrete steps to dismantle Marxism in word or deed, are we not working against both our interests and African interests?

Answer. I share your condemnation of those ideologies who insist that race is the price issue. The South African Government's policy of apartheid plays into the hands of the Marxists and such ideologues of race by alienating a majority of the South African population. I fully agree that the question in Africa and elsewhere is the benefits which accrue to the general populace from government policy. In Africa and elsewhere Marxism and socialist policies have failed to provide such benefits. It is important in this connection that the US and our Western allies make every effort to demonstrate the efficacy of free market principles. We intend to do so in our relations with the states of southern Africa, and to urge South Africa—the largest capitalist economy in the region—to extend the benefits of capitalism to all its citizens.

Question 18. In your article, you state: "Adherence to the UN arms embargo and the U.S. refusal to use South African defense facilities are symbolically important ingredients of policy; they should be continued in the absence of major political change, barring a dramatic deterioration in the geopolitical situation facing the West in adjacent, areas." Isn't it playing a dangerous game to refuse reasonable military cooperation with South Africa, while confidently expecting South Africa to cooperate with us when our vital interests are suddenly threatened? Isn't such a strategy likely to drive South Africa towards the much-rumored accommodation with the Soviet Union? Is the present government of South Africa, a legitimate government? As such, doesn't it have the right to provide for its own defense? Shouldn't its allies have the right to assist in that defense to mutual benefit?

Answer. The present government of South Africa is a legitimate government and is recognized as such by the international community including the states of Africa. The government has the right and duty to provide for its own defense. At the same time South Africa's friends including the U.S. have a right and duty to determine the extent of their defense relationship with South Africa, if any, on the basis of their own national interests. We will do so bearing in mind the full range of those interests, our international obligations and our responsibilities as a global power and leader of the West.

Question 19. The British news media have recently reported that the South African mining firm, Anglo-American, has held discussions with Boris Sergea, deputy head of the Soviet platinum and diamond marketing organization, on cooperation with the Soviet Union and strategic minerals issues. Is such a policy in the best interests of South Africa? Is this an example of the pragmatism and flexibility which you admire in the white elites of South Africa?

Answer. Questions with regard to the business practices of Anglo-American might best be addressed to that company and to the government of South Africa under whose laws it operates. The Department of State has no direct information on the matter you raise, but would suggest that the United States has no legal basis to intercede in the discussions referred to.

Question 20. Anglo-American has reportedly moved its base and case reserves to the Bahamas. Can you supply details?

Answer. It is my understanding that Anglo-American, already a major foreign investor in the United States, has made additional investments in this country. We have no information concerning investment in the Bahamas.

1. Unfortunately, since you had to catch a plane on April 6, I was not able to finish my line of questioning about emigration from Zimbabwe. You stated that you did not think that emigration was increasing. However, competent source in Zimbabwe, with access to official data, inform me that emigration is at least 50 percent higher than it ever was during the war, when it never went over 2000 per month at the highest. Can you furnish emigration data on a month-by-month basis since independence?

Immigration data from the Central Statistical Office of the Government of Zimbabwe is attached. As it indicates, net migration for 1980 was 10,833 compared to 9,304 for 1979 and 11,817 for 1978. The highest monthly net migration was 2,407 in December 1978.

TABLE 1.—RECORDED MIGRATION THROUGH OFFICIAL PORTS[1]

Period	Immigrants	Emigrants	Net migration
1964	7,130	13,638	−6,508
1965	11,306	6,837	4,469
1966	6,549	7,561	−1,012
1967	9,819	5,594	4,225
1968	12,013	5,063	6,950
1969	11,075	5,232	5,843
1970	12,345	5,238	7,107
1971	14,881	4,713	10,168
1972	14,085	4,562	9,523
1973	9,511	6,846	2,665
1974	9,764	7,982	1,782
1975	12,552	9,242	3,310
1976	7,941	13,013	−5,072
1977	5,914	14,556	−8,642
1978	4,650	[2] 16,467	−11,817
1979	3,647	12,951	−9,304
1980	6,407	17,240	−10,833
1978:			
January	561	1,137	−576

December	563	1,741	−1,178
January-December:			
1979	3,647	12,951	−9,304
1980	6,407	17,240	−10,833

[1] This table is known to be an incomplete record of all mirgation. In the main this is because of: (a) the omission of cross border movements at points other than the official ports, and (b) evidence that some residents who declare they are leaving for less than 12 months in fact stay away permanently or rather longer than a year.

[2] Records of African emigration through official ports started in April 1978.

[3] Records of African immigration through official ports started in January 1980.

Subj.: Zimbabwe Migration Statistics.
Reg: State 088997.

1. The Zimbabwe Central Statistical Office has released official emigration figures through the end of February, 1981. Figures for March not yet available. The statistics show that 2193 people emigrated in January and 1526 in February this year, compared with 1947 over the same period in 1980. However, the number of immigrants more than doubled over the two month period from 860 in 1980 to 1747 in 1981. The net migration figure of 794 in February was the lowest since the beginning of 1980.

2. Migration figures are not published on a racial basis, but most of the emigrants are believed to be white while a signicant number of immigrants are returning black Zimbabweans.

3. Figures produced by the central statistical office also show that vital skills are being lost through emigration. For the year 1980 Zimbabwe lost 6445 skilled people and gained 3017. Administrative, clerical, teaching and engineering staff are leaving the country while medical and scientific workers are coming in. Zimbabwe had a net loss of 69 engineers in 1980. Departures of accountants and auditors left a deficit of 70, while production supervisors and general foremen left a gap of 35 in industry. More than 1500 clerical workers and 431 administrative and managerial staff left the country while 480 clerks and 279 managers arrived. There was a net gain of 29 doctors in 1980, but the country lost 164 nurses and midwives.

4. The breakdown of economically active immigrants and emigrants during 1980 follows:

Occupations	Immigrants	Emigrants
Professional technical and related workers:		
Physical scientists and related workers	35	32
Engineers	127	169
Draughtsmen	37	43
Engineering technicians	23	58
Physicians and surgeons	75	46

2. I am further informed that the official figures do not reflect the unofficial emigration, which consists of thousands of people who have simply left Zimbabwe without declaring that they are leaving. Can you estimate how many Zimbabweans are now living and working in other countries because they feel the situation is too uncertain?

We have heard reports which we are unable to verify that some white Zimbabweans have left the country as "tourists" with no intention of returning. We are not aware of a reliable estimate of their number.

3. How much capital are emigrants allowed to take with them when they leave Zimbabwe?

A family leaving Zimbabwe is allowed to take out of the country movable personal possessions and to convert Zimbabwe dollars 1000 (approximately US $1500) into foreign exchange. A single person may leave with personal possessions and Zimbabwe dollars 500 (approximately $750).

4. Do you think that these restrictions are a deterrent to emigration?

Yes.

5. What would happen if the restrictions were lifted?

If these restrictions were lifted, we would logically assume that emigration would increase to some extent.

6. Zimbabwe is now seeking foreign investment. Can you supply a list of major projects in Zimbabwe which have actually been funded since independence, with the principal investors?

It is difficult to obtain data on foreign investment in Zimbabwe. It is our impression that American businessmen have been particularly interested in Zimbabwe since the June 1980 US Chamber of Commerce trade mission but they have been cautious about following through on that interest. We estimate total investment at $50 million since independence.

7. What restrictions are there on the withdrawal of foreign capital and of earnings on that investment?

Zimbabwe Government policy on foreign investment is presently being formulated. The guidelines which are being used are contained in the February 1981 White Paper "Growth with Equity". The relevant section of that statement is attached.

2. The National Development Fund

106. Fully consistent with national self-reliance and the need to demonstrate to Zimbabwe's friends abroad the seriousness with which Government views the development task, Government intends to establish a National Development Fund for the purpose of mobilizing, or accounting for, domestic and external resources intended exclusively for development.

3. Money and Finance

107. Until now the private sector has dominated the financial and commercial banking sector. Much of this sector is foreign-owned and controlled. While private (domestic and foreign) institutions have been brought under control of the Reserve Bank of Zimbabwe and while, on the whole, the monetary and financial sectors have served the modern industrial and commercial sectors effectively, past monetary and financial policies have generally ignored or discriminated against black agriculture and the small business sector which is largely black.

108. In future, Government monetary and financial policy will employ a wider range of instruments, including—

(i) more use of bank rate and open market operations to support policy objectives and ensure that the cost of money and credit properly reflects scarcity value;

(ii) firmer influence on credit allocation to ensure equitable distribution of credit to priority areas of economic and social development;

(iii) promotion of greater domestic participation and control in banking and financial institutions in order to ensure the effective implementation of monetary policy; and

(iv) examination, through a Commission, of the whole monetary and financial sector with a view to establishing a suitable policy framework which will assist in the achievement of economic and social objectives.

4. Fiscal Policies

109. The tax structure in Zimbabwe is substantially regressive because of its reliance on indirect taxes for more than a third of tax revenues. In the past, Government expenditures were designed to ensure minimum spillover of benefits to one racial group of tax revenues from another racial group. Because of the wide disparities in incomes between racial groups this made the total fiscal system highly regressive. The level of subsidies and their implications for equity and efficiency are a source of concern to Government.

110. Government views the entire fiscal system as a major instrument for achieving its objectives of growth, equity and full employment. To this end, Government will carry out a fundamental examination of the entire fiscal system, including the system of subsidies, the tax system and the distribution of benefits. Government will consider establishing a Tax Commission to assist in this process.

111. It will be a priority task, in this examination, to identify any ineffective and inequitable features in the fiscal system and to devise effective early measures to remedy such deficiencies.

5. Investment

112. Government policy is to develop to the full the potential of the agricultural, mining and industrial sectors of the economy. To this end, Government will encourage and welcome the participation of private enterprise in productive activities which create employment opportunities for Zimbabweans and which make a net contribution to the economy.

113. The Government regards investment in the rural areas as an absolute priority and a key-point of economic policy. Although it accepts that investment in these areas in the formative year may well yield lower returns to an entrepreneur than are available from the highly developed urban complexes, Government urges investors to take the longer term national view and look to future rewards.

114. Government recognizes the vital role which foreign investment can play in the development of industry, in the very broad sense of the term, and desires the maximum possible Zimbabwean participation in all spheres of economic activity carried on within the country.

115. Government welcomes participation in joint venture projects and stands ready to negotiate appropriate agreements with investors.

116. Government also looks forward to undertaking industrial cooperative agreements as supplementary to joint ventures which could involve supply and leasing of plants, co-production, co-marketing, etc., between Zimbabwean State enterprises and the relevant foreign or domestic enterprises.

117. Government recognizes the need for fair returns from investment having regard to its price control policy and taxation regime.

118. General policy on taxation of income is not to discriminate between the domestic and foreign investor except in relation to withholding taxes on dividends and branch profits.

119. General policy is to encourage domestic participation in productive enterprises within the country. Foreign investors will be expected to provide for domestic equity participation within a reasonable period of time.

120. Foreign investment will be welcomed especially in—

(i) new enterprises in rural areas where socio-economic benefits may be expected to occur;

(ii) new enterprises, particularly those requiring specific technology available to the foreign investor, which will make an additional net contribution to the economy, including the training of Zimbabweans;

(iii) new enterprise on a joint venture basis, where the investor specifically wishes to have either an immediate domestic participation or a State equity participation, and which will make an additional net contribution to the economy;

(iv) existing enterprises where an injection of additional foreign capital or technology will mean an increase in productivity and an improvement in the end product. As a general rule, the absolute amount of existing domestic participation in domestic enterprise should not be diluted, in future, by sale to foreign interests; nor must an existing domestic control level of equity holding be allowed to pass to foreign investors. But there is no objection to new foreign investment being introduced into existing enterprises to improve efficiency, technology, etc.;

(v) undertakings in which more intensive use of local raw materials and processed inputs is promoted;

(vi) areas in which labour-intensive technology and, in addition, technology that is appropriate and easily adaptable is promoted;

(vii) activities in which generation of exports within a reasonable period is possible.

121. No special or preferential taxation, exchange control or import control benefits will be granted as a condition of State participation in any enterprise.

122. Government is fully aware of the need for, and willing to facilitate, profit and capital repatriation, but this will be subject to constraints in the balance-of-payments situation and the country's interest in promoting re-investment of profits. Having regard to the need for a planned and co-ordinated industrial development, Government will institute various measures, including a system of licensing, to ensure that private domestic and foreign investments of a given minimum size are consistent with the Government's industrial development plan. Government will accordingly review present project approval arrangements with a view to determining their adequacy.

123. While Government encourages foreign investment, it is anxious to minimize those practices of the transnational corporations which are inimical to a country's development. In this regard, as in the case of technology, Government will ensure that they comply with the relevant international codes of conduct.

124. In general, Government will seek to participate in strategic industries. However, the level and rate of Government participation will be examined on a case by case basis through mutual agreement and in the light of national objectives and priorities.

6. Institutional Developments

125. It is an unfortunate historical fact of our country that the establishment of institutions has been along racial lines. This not only meant inevitable duplication but also a limitation of their jurisdictional scope.

With the new socio-economic order and the objectives which the nation has set for itself, it will be necessary to carry out an urgent review of all the existing public sector economic institutions with a view to determining their effectiveness, the extent to which their jurisdictions and mandates meet the requirements of the new order, and the extent to which rationalization is necessary and desirable to ensure that these institutions will be able to meet the needs of the economy.

126. In order to sustain and accelerate the pace of economic growth and development within the national objectives outlined in this Statement, Government will establish the following institutions:—

1. The Zimbabwe Development Bank

127. The Zimbabwe Development Bank will help in the mobilization of domestic and external financial resources in order to finance investment projects of high national priority. The Bank will lend to the State and its agencies, to joint-venture projects, whether between the State and foreign investors or between local nationals or enterprises, and to foreign investors. It will be free to lend to the re-organized State financial institutions and rationalized parastatal organizations such as the Agricultural Finance Corporation (A.F.C.) and the Industrial Development Corporation, (I.D.C.).

2. The Zimbabwe Development Corporation

128. This will be a State holding company and a development arm of the nation operating in all sectors of the economy and serving particularly as the Government's channel of participation in the economy either on its own initiative or in collaboration with domestic private or foreign public/private investors. It will also be free to act through any existing development institutions in the public sector.

3. The Mining Development Corporation

129. The Mining Development Corporation, which will be a subsidiary of the Zimbabwe Development Corporation, will be responsible for Government's participation in the mining sector.

4. The Zimbabwe National Tourism Corporation

130. There is a need to develop the natural tourist resources of this country to their full potential, as they represent an invaluable economic asset. The accent on such development must be on conservation, preservation and proper management with proper consideration for the environment, future generations and the Zimbabwe culture, customs and traditions.

131. The Zimbabwe National Tourist Corporation will, *inter alia*, have the overall responsibility for co-ordinating, and undertaking other appropriate activities.

8. Do you think that such restrictions encourage or discourage investment?

The investment policy of the GOZ appears to be reasonably flexible and forthcoming toward foreign investors. We believe that like those of other developing countries, Zimbabwe's leaders are increasingly aware of the advantages of free market investment policies and we make our preference for such policies known to them.

9. What is the current rate of inflation in Zimbabwe?

In the neighborhood of 10% in 1980 according to various estimates. The lowest estimate is 7%, the highest 12–15%.

10. What is the current deficit?

We recognize that the Government of Zimbabwe is at the present time spending well beyond its means. Swollen in previous years by the cost of financing the war, the budget deficit is now due to rise 16% to over US $1.0 billion. Unless the strong economy generates higher revenues than originally forecast or more international aid is forthcoming, borrowing requirements could approach nearly US $900 million, 37% of total expenditures.

Many observers regard the budget deficit and the measures taken to finance it as the single most serious threat to the recovery. The government's financial policies rely very heavily on domestic borrowing and only slightly on international capital markets. On the one hand, the sharp increase in the money supply fed by a reliance on domestic capital sources is expected to generate severe inflationary pressures. Demands by the public sector on domestic credit could starve private investors of the capital needed to finance industrial expansion. On the other, the reluctance to turn to international borrowing when the debt ratio is running at less than 3% could also deny the industry the means of purchasing the capital equipment it needs to meet domestic demand and generate the export earnings required to sustain the recovery.

11. Has the Mugabe government received any foreign assistance or foreign loans? Give details.

The Mugabe government has been the recipient of substantial foreign assistance, practically all of it coming from Western countries. A list of the main contributors is attached.

Commomwealth	2.9	4.5

5. Comment: The Zimbabweans have chosen to put the rosiest interpretation on conferences pledges, lumping grants and loaned, tied credits and in-kind donations (e.g., Jersey Cattle semen from the Isle of Jersey). Liberties are taken with extrapolation, such as counting the U.S. conditional commitment to request "similar levels" in FY83 and FY84 as USDOLS 75 million for each of those years. Nevertheless, the conference produced a lot of money toward Zimbabwe's development programs, meeting the goal of ZDOLS 1.2 billion (U.S. 1.9 billion) and exceeding GOZ officials' private expectations. It will be some time before the implications of the aid and a fuller summary of restrictions are available. For instance, the large French and Swiss figure are predominantly lines of commercial credit, at soft loan rates, in some ways comparable to Exim direct loans (not included in U.S. total) or the near-market-rate HIG housing loan (which is included in U.S. total) than to other forms of economic aid. Other donors, including Greece, Romania, Bulgaria, Libya, Sudan, India, Pakistan and the International Fund for Agricultural Development pledged aid but did not announce any figures.

7. Ref. C (NOTAL) pointed out that depending on what it chose to count the GOZ already had pledges in hand for considerably more than the USDOLS 315 million in aid which Economic Planning Minister Bernard Chidzero calculated when he announced the ZIMCORD appeal. Indeed, Mswaka nearly doubled the pre-conference figure to U.S. 560 million in the 3/26 tally. (Subsequent telegram responding to AID/W request for data (Ref A) will shed additional light on GOZ's sums.)

Keeley.

12. What pledges for foreign assistance were received at the March pledging meeting?

A list of pledges at the March conference is attached with Question 11. It should be noted that the Soviet Union and its allies were invited to participate in the conference and declined to do so.

13. What was the basis for the U.S. pledge of $225 million?

The U.S. pledge was the $75 million in ESF in the FY 82 foreign aid program and a promise to ask Congress to provide "similar levels" in the following two years. This pledge was based upon our assessment that Zimbabwe has the potential to become a focus for stability and development in southern Africa.

14. Can you supply the justifications which were presented by Zimbabwe at the pledging session?

The conference documentation for ZIMCORD is attached.

15. Has the United States government made an independent assessment of Zimbabwe's needs? How extensive was this assessment? Was the staff work on this assessment done before or after January 20, 1981?

The latest U.S. Government assessment of Zimbabwe's needs was completed in February 1981 and is attached. We feel that an infusion of aid will permit Zimbabwe in the near future to launch self-sustaining economic growth, to buttress the private sector, and to retain critically important skills.

16. Is the proposed U.S. contribution intended to support specific economic development projects, or social development projects?

Details on U.S. projects in Zimbabwe are provided in the document responding to Question 15.

17. Should we use the taxpayers' money to provide assistance to foreign countries when the conditions for economic development are not adequate to justify such assistance?

Most informed observers believe that the prospects for economic development in Zimbabwe are quite good. The U.S. Chamber of Commerce believes that Zimbabwe along

with Nigeria is a primary area for investment in Sub-Saharan Africa. In that regard, the Chamber is sponsoring a joint investment advisory task force on Zimbabwe.

18. What specific projects would the U.S. contribution support?

See Question 15.

19. You have said that the constitution of Zimbabwe is a democratic one. Is it also a just one, when the Matabele majority is permanently locked into political submission to the Shona majority? Do the seats reserved for whites permit effective and influential participation in the affairs of the nation?

The justice of the treatment of the Ndebele minority by the Shona majority is a question which should be looked at in the light of the treatment of any minority by a majority in political systems around the world. In that context, the situation in Zimbabwe is not unusual. Ndebeles are represented in the National Assembly and in the Government, both as members of ZAPU and ZANU. Sindebele is a recognized national language taught in the schools and used in the media.

We believe that the 3% white minority in Zimbabwe has a number of avenues to influence and contribute to the affairs of the nation, of which the white reserved seats are but one.

20. Section 720 of the Foreign Aid Authorization passed last year states:

If Zimbabwe receives assistance from funds authorized to be appropriated by this Act, the President shall report to the Committee on Foreign Relations of the Senate and the Committee on Foreign Affairs of the House of Representatives every sixty days after the obligation of such funds on the internal situation in Zimbabwe, particularly upon the implementation of the Declaration of Rights contained in Annex C of the agreement signed at Lancaster House, London, by the participants in the Constitutional Conference on Southern Rhodesia on December 22, 1979.

I have to presume that when the commitment was made, some thought was given as to what kind of a report would be made sixty days after the funds were actually obligated. Can you give us a preview now? There are 12 main criteria in the Declaration rights, which I put into the Congressional Record on June 17, 1980, if you don't have it. I suggest that when you make your report, you enumerate each of those 12 criteria and the status to date.

A copy of the first report dated March 30 is attached.

REPORT TO CONGRESS ON ZIMBABWE

There is considerable evidence to indicate that the transition to majority rule in Zimbabwe, which was consummated at Lancaster House and came into effect on April 18, 1980, is now gathering momentum both economically and politically.

Economically, Zimbabwe has made considerable progress in the eleven months since independence. Real growth for 1980 is estimated to have been 8–10 percent. Inflation averaged between 12 percent and 15 percent for the year. With the announcement of a high per-planting price and a good rainy season, Zimbabwe is expecting a million-ton maize surplus this harvest. The mining sector remains solidly prosperous despite some uncertainty about a possibly increased government rule.

In the July 1980 budget and the February 1981 economic policy statement "Growth with Equity," the government has committed itself to the maintenance of a mixed economy aimed at satisfying black aspirations and assuring white confidence by attracting foreign investment and aid to generate continued economic growth.

Zimbabwe's economic success is partly associated with the fact that more than 90% of the country's white population, about 200,000 people, have chosen to stay in Zimbabwe. We estimate that about 20,000 whites have left, 15,000 of them have gone to South Africa. Nevertheless, white emigration has led to some dislocations in areas of the economy dependent upon mechanical and technical expertise, e.g. railroad maintenance and telecommunications. The country's 5,000 white commercial farmers have almost all stayed in Zimbabwe.

Politically, the dire predictions which were heard at the time of independence have not come to pass. Black-white political conflict has been inconsequential. The expected Ndebele-Shona political conflict has materialized; however, despite two bloody clashes in Bulawayo, the tension has been contained by the existing political and military structures and senior leaders on both sides have responded to the problems which have arisen with a view toward the long-term best interests of the country. On the whole, the political scene has been marked by increasing stability and the enhancement of the authority of Prime Minister Robert Mugabe.

The process of military integration of ZIPRA and ZANLA continues to move forward slowly despite the collapse of three of the eleven integrated battalions in last month's difficulties. Most observers now believe that Zimbabwe will for at least the near term have a larger army than was initially anticipated, due to the fact that most of the remaining 25,000 guerrillas will probably be incorporated into the new national army.

As noted in detail in the 1981 "Country Reports on Human Rights Practices", independent Zimbabwe on the whole has a good record in living up to the guarantees on civil liberties contained in the Lancaster House accords, in particular those contained in Annex C. Zimbabwe continues to be a functioning, multi-party, parliamentary democracy in which the rights of the population as set forth in the constitution are respected.

The basic rights called for in the agreement such as the right to life, personal liberty, freedom from torture and inhuman treatment, freedom from deprivation of property, privacy and freedom of conscience, expression, and assembly are in effect. Thus, for example, at the time of this report, there are no persons under detention in Zimbabwe because of their political views. In order to end South African control of the press, the government purchased controlling interest from the Argus Group and invested it in a national press board which appears so far to operate independently. The electronic media are sometimes criticized for being overly enthusiastic about government policies.

The House of Assembly and the Senate which were set up pursuant to the Lancaster House agreement have proven to be active political bodies in which substantive and frank debate is the order of the day. Regularly scheduled elections continue to be held, most recently at the local level. Nevertheless, disturbances led to the postponement of local government elections in Bulawayo following clashes between partisans of competing political parties.

The court system recognized in the Lancaster House agreement functions as set forth in the agreement. Thus, for example, ZANU–PF Secretary General Edgar Tekere who was charged with the murder of a white farmer was freed by the court under a law passed by the former regime to protect government officials. While many Zimbabweans may have lamented Tekere's release, it was widely noted that, as promised, Prime Minister Mugabe's government did not interject itself in any way into the judicial process. The public service and the police also operate as set forth in the Lancaster House agreement.

21. What is the situation today in Zimbabwe for freedom of the press? Is the press censored? Who owns the major newspapers? What is the news policy of radio and television?

The current press situation in Zimbabwe is complex. The situation as of January 1981, as described in the Country Reports on Human Rights Practices, is noted below:

Sections 19, 20 and 21 of the constitution guarantee freedom of religion, assembly and association. The previous government's censorship of the print media was terminated, though foreign journalists are required to have temporary employment permits. Foreign books, films, and periodicals considered pornographic or excessively violent are prohibited. Grounds for banning or prohibition were narrowed in July 1980, to exclude political censorship.

Joshua Nkomo's ZAPU party has its own newspaper, which is frequently critical of the government. White opinion, often diametrically opposed to government actions, is given prominent coverage in the nation's two daily papers, and speeches or parliamentary statements by opposition politicians are printed regularly. The government radio and television report statements unfavorable to the government, mostly those made in parliamentary debate, but generally base programming on government press releases and official versions of events. The government has appointed officials to broadcast media who can be counted on to promote coverage favorable to its ideology and policy. ZAPU has complained about the predominance of coverage given ZANU–PF on radio and television.

Since that report, the government has purchased a controlling interest in a company known as Zimbabwe Newspapers 1980 Ltd. (formerly known as Rhodesian Printing and Publishing Company) from a South African firm, Argus Printing and Publishing Company Ltd. Authority over this company is now vested in a Zimbabwe Media Trust. It is not yet clear in practice how this system will work; however, in the face of criticism of its action, the government has appointed a distinguished cross section of Zimbabweans to the Media Trust. Zimbabwe Newspapers 1980 Ltd. was the publisher of the major daily newspapers in the country; however it is important to note that other newspapers continue to publish outside the control of the Media Trust.

RESPONSES TO QUESTIONS POSED BY SENATOR JESSE HELMS TO MR. CHESTER A. CROCKER ON MOROCCO AND AFRICA NORTH OF THE SAHARA ON APRIL 27, 1981

1. Morocco has been described as one of the most important allies of the United States in Africa. Would you agree with that characterization? Please elaborate.

Answer. Relations between the United States and Morocco are close and well established.[1] By virtue of the existence of American installations prior to 1978 on Moroccan soil, Morocco's juxtaposition as guardian of the Straits of Gilbraltar an intermediary point between North America and the Middle East, King Hassan's moderate views on the Arab-Israeli problem, and Morocco's steadfast opposition to the expansion of Soviet power in the third world, U.S.-Moroccan relations have frequently proved complementary and mutually supportive. Morocco has therefore rightfully been described as a traditional ally of the United States, and in a continent where U.S. relations to most African countries are less intimate, it is proper to describe Morocco as one of the most important allies of the United States in Africa. Recent evidence that Libya, assisted by the Soviet Union, seeks to undermine the stability of several countries in Africa, further

[1] Responsibility for United States policy toward Morocco is assigned to the Bureau of Near Eastern and South Asian Affairs in the Department of State.

underscores the importance of ties between Morocco and the United States.

2. Morocco has made claims to the former Spanish Sahara, in what appear to be irredentist demands for the return of former property belonging to earlier Moroccan governments. Do you feel that Morocco's claims to the territory are valid? (a) If so, please elaborate. Please give a detailed history of the region and the basis for Morocco's claims. (b) If not, why not? Please elaborate, with supporting detail.

Answer. Morocco's claims to the former Spanish Sahara are based upon two historical factors: economic relationships between the settled urban populations north of the Atlas Mountains and the nomadic peoples of the Sahara, for which Moroccan cities played the role of entrepot; and religious ties which bound the Western Saharan region to Morocco. The spread of Islam from Morocco southward along the coast cast Islam in Morocco as religious leader of Islamic communities to the south. The military superiority and larger population of Morocco also allowed Morocco to extend its governmental control southward after 1450, when the loss of Islamic control in Iberia encouraged Morocco to seek new territories in Africa to compensate for losses in Europe. Military expeditions, such as the celebrated capture of Timbuctu on the Niger in 1591, established Morocco's claims to control south of the Atlas Mountains.

Despite this, Morocco proved unable to maintain control for long periods, and the advent of colonialism in northern Africa at the end of the nineteenth century found the government of the ruling dynasty weakened and distracted. Morocco maintains that Spain and France exploited this weakness to establish control over northwest Africa, in effect dividing one ancient country into two European administrative jurisdictions. France relinquished its protectorate over Morocco in 1956. In the eyes of Morocco, the decision made by Spain in 1975 to withdraw from the Western Sahara signalled the emancipation of the remainder of the ancient Moroccan entity, and not the emergence of a new and separate state.

The legal validity of Morocco's claims, based as they are on one interpretation of history, are open to debate. However, the International Court of Justice, in an advisory option, has held that the evidence did "not establish any tie of territorial sovereignty between the terrority of West Sahara and the Kingdom of Morocco." The Court found no ties "as might affect the application of . . . the principle of self-determination." In the view of the United States a referendum or some other device which would permit the indigenous inhabitants of the region to express their preference for allegiance to Morocco or some other alternative is required. Morocco's claims cannot be declared "valid" in the absence of some such exercise. However, the U.S. Government accepts that Morocco possesses *de facto* administrative control over most of the territory.

3. What is the nature of the Polisario?

Answer. The Polisario is an insurgent movement founded as an anti-colonialist effort to oust Spain from the Western Sahara. After Spain removed itself from the region in 1976 the Polisario, which had received assistance from Morocco, began a movement to resist Morocco's claims, as well as those of Mauritania, with which Morocco divided the former Spanish colony in 1976.

The Polisario receives economic and military assistance from Algeria and to a lesser but still significant extent from Libya.

The extent of direct Soviet bloc assistance is not clear, although weapons provided by the Soviet Union to Libya and Algeria enter the Polisario pipeline. There are Marxist and non-Marxist elements in the Polisario; as in the case of most contemporary independence movements, plans for political independence are closely identified with promises of economic and social equality, a mobilization of national resources under the leadership of a strong central government, and the identification of the movement's friends and enemies on the basis of assistance received and the degrees of recognition granted.

The Western Sahara population is largely nomadic, and thus the cultural characteristics are rich and varied. No single language serves the entire population: Spanish is the language of administration; Arabic, which expanded as Islam expanded, serves as the medium of intellectual and religious needs, and is growing in popularity, as is French.

There are reports that many of the Polisario are drawn not from the indigenous Western Sahara population (which Morocco claims numbered less than 100,000 in the census of 1974) but are recruited from Mauritania, Mali, Algeria and even Niger. These reports are difficult to verify, for the nomadic life style of the Western Sahara is also found in a broad band stretching east to Sudan and no census has been permitted in the Polisario refugee camps in Tindouf, Algeria. The prospect of pay, food, clothing, and adventure may attract recruits from other Saharan countries, which share a strong martial tradition and which, like the Western Sahara, are also desperately poor. On the other hand, Morocco has not provided evidence that the Polisario are not originally from the contested region. Some of the Polisario have received training abroad, in Algeria, Libya, the Soviet Union, Spain and France.

The political orientation of the Polisario also remains a point of debate. Some observers have detected a "pro-Libyan" and a "pro-Algerian" faction within the movement. Algeria appears to be the predominant influence as the Polisario are based on Algerian soil and most arms shipments must transit Algeria to reach the Polisario.

Mauritania proclaimed its neutrality in the war in the Western Sahara in 1978. The government of Mauritania continues to maintain that it is prepared to take every step within its power to reinforce this position of neutrality. In fact, however, a long poorly defined, lightly inhabited, and inadequately patrolled border region between Mauritania and the Western Sahara makes it difficult to monitor the movement of Polisario forces in Mauritania's interior far north, and along the southern border of the Western Sahara. There is no evidence that the Government of Mauritania has given sanctuary to the Polisario, although it is probable that Polisario units have traversed Mauritanian territory and members of the Polisario military have entered Mauritania in a private capacity to visit family and friends now inhabiting portions of Mauritania.

4. Morocco has received military assistance in the past from the U.S. Do you plan to recommend that the United States continue that assistance? If so, at what level?

Answer. The United States should continue providing military assistance to Morocco at a level sufficient to meet Morocco's legitimate defense requirements. Military assistance includes M60 Main Battle Tanks, OV-16s, training, and materiel. The limited sale of tanks and other military items to Morocco in no way poses any threat to neighboring Algeria. Assistance at levels proposed in major arms sales in recent years appears appropriate to assist Morocco with its five-year modernization program. (This question was addressed in some detail in testimony given by Deputy Assistant Secretary for Near Eastern and South Asian Affairs Morris Draper before the African and International Security Affairs Subcommittee of the House Foreign Affairs Committee on March 25, 1981.)

5. Has the King of Morocco requested to visit the United States? If so, when? If he has (or does so in the near future), is it your recommendation that his request for a visit be given a favorable response?

Answer. The King has not transmitted a formal request to visit the United States; however, we would not rule out a future request especially since King Hassan as President of the Jerusalem Committee was authorized at the last Islamic Conference to explain the Conference's resolutions to the European countries and to the American administration. Such a visit would reflect the excellent bilateral relations which exist between our countries. I favor such a visit at an appropriate time.

6. Libya has called for war against Morocco. If Libya were to participate openly in military action against Morocco, would you recommend U.S. military intervention on behalf of Morocco? If so, at what level? If not, what alternative U.S. action would you recommend?

Answer. The United States would regard any attack against Morocco's territorial integrity as a provocative act. The U.S. would act decisively in repelling such aggression, working in concert with other countries in the region and with the OAU. Morocco is a traditional and important ally of the United States.

7. Should the United States put diplomatic and other pressures on Algeria, urging Algeria to cease assisting the Polisario?

Answer. The United States has consistently urged all parties to the conflict in the Western Sahara to participate in negotiations leading to a compromise settlement. The United States does not believe that either side can settle the conflict by force of arms, and that protraction of the conflict adds to regional instability. Algeria has great influence in international forums. It wields influence far beyond what its wealth, its population and its political power ordinarily would warrant because it is consistently well prepared to make its mark on North-South issues. It makes effective use of its revolutionary credentials, and it steers a course which avoids becoming beholden to any single state.

It is important that we nurture an improved relationship with the increasingly pragmatic Algerian leadership. Their policies are in an interesting and evolving stage. It would be shortsighted for the United States not to try to expand the improving and mutually beneficial relationships which have been developing between our two countries in the recent past.

QUESTIONS FOR DR. CHESTER CROCKER: MR. LANNON WALKER

1. Dr. Crocker, in your testimony of April 6, you stated that you did not agree with a statement made late last year by your principal deputy, Mr. Lannon Walker, concerning the role of Cuban troops in Angola. Is that correct?

Answer. Yes. As I said during the hearing before the Senate Foreign Relations Committee on April 6, 1981, it is my belief that the Cuban forces in Angola provide an additional element that helps the MPLA Government in Luanda retain power, pursue its internal conflict with the forces of UNITA, and train the armed forces of the MPLA Government in Luanda. At that time I also indicated that I did not think their primary mission was to serve as a deterrent to the threat of a large-scale South African invasion.

2. Mr. Walker stated that the primary reason why Cuban troops are in Angola is to "fill a deterrent role against the threat of a large-scale South African invasion" and you stated that such is not your understanding of the principal role of Cubans in Angola.

(a) Did this statement made by Mr. Walker to the House Foreign Affairs Committee on September 18, 1980, reflect Mr. Walker's per-

sonal assessment of the principal role of the Cubans in Angola?

Answer. The written statement referred to in this question represented the formal, cleared position of the Carter Administration on this issue. Therefore, Mr. Walker or any other representative of the Carter Administration was delivering the Administration's—and not his or her personal—position.

(b) What is Mr. Walker's current understanding of the role of Cuban troops in Angola?

Answer. Mr. Walker works for and represents the Reagan Administration whose position on this issue is. I believe, accurately reflected in my own answer (see No. 1 above) to your question.

(c) Mr. Walker did not actually deliver the testimony of September 18 to the House Foreign Affairs Committee. His boss, at that time Assistant Secretary Moose, later did give testimony to the same Committee. What did Mr. Moose say about the principal role of the Cubans in Angola?

Answer. To clarify the sequence of events, Mr. Moose was first scheduled to deliver the testimony mentioned; however, because of illness, Mr. Walker was then scheduled to deliver the same testimony. Upon postponement by the Subcommittee of the hearing, the testimony was later actually delivered by Mr. Moose. I believe the section you referred to reads as follows:

We believe that the presence of Cubans in substantial numbers in Angola primarily fills a deterrent role against the threat of a large-scale South African invasion such as that of 1975, which was designed to bring about or contribute to the fall of the MPLA government.

(d) How did what Mr. Moose said contrast with what Mr. Walker submitted to the Committee as his testimony of September 17?

Answer. It was the same, but delivered by Mr. Moose. The transcript of the hearing is a matter of public record.

3. Are there individuals whom you know to reflect the Reagan foreign policy on Africa more accurately than does Mr. Lannon Walker?

Answer. No. Mr. Walker is a whole-hearted and enthusiastic advocate of the Reagan Administration's Africa policies, which he has played an active role in formulating. I have complete confidence in his abilities and commitment to carrying out this Administration's policies.

(a) Who are they?

Answer. Not applicable.

(b) Are any of these individuals now working for you at the Africa Bureau?

Answer. Not applicable.

(c) In your mind, is Mr. Walker the best qualified man for the post that he occupies?

Answer. Yes.

(d) In your view, does Mr. Walker reflect accurately the Reagan view of U.S. policy toward Africa? If so, does he reflect the Reagan view out of personal conviction, or because he has been told to do so?

Answer. Mr. Walker accurately reflects the Reagan view of U.S. policy toward Africa.

(e) Is Mr. Walker's position a policy-making position?

Answer. Like all other officers at his level, Mr. Walker participates in the formulation of policy.

(f) Will Mr. Walker be placed in a position to assist in making U.S. policy toward Africa?

Answer. Yes, like other officers at his level.

(g) Are there other positions where Mr. Walker could serve the U.S. in a nonpolicy-making capacity?

Answer. Mr. Walker is a career foreign service officer and serves anywhere in the world in any position at the pleasure of the President of the United States.

CONSULTATIONS WITH CONGRESS

1. Mr. Crocker, in your testimony of April 6, you state that the Department of State had undertaken a policy review, "the first phase of a policy review" is the way you stated it.

You further stated that this had been going on for about two months inside the Administration and in addition, there were—you put it this way—"some consultations with our allies in Europe."

You went on to say that "We are now anxious to broaden the range of people to whom we are speaking, including South Africa and the African states most directly concerned."

(a) Why were you not anxious to broaden the range of people to whom you were speaking to include the Congress?

There has been a discussion of the basic principles of our policies with a range of people in the Congress during the last three months.

(b) Why were "our allies in Europe" given the benefit of "consultation" prior to the U.S. Congress?

(c) Why were South Africa and other African states given consultation before the U.S. Congress?

Several of my colleagues have had an opportunity to testify before Members of Congress, but prior to my Senate confirmation, I have not been able to do so. However, I have held informal meetings with Members of both the House and the Senate over the last several months. These informal consultations took place prior to and simultaneously with the consultations with our allies in Europe and with South Africa and other African states.

(d) What sort of consultation do you contemplate wtih the Congress? As a member of the African Affairs Subcommittee. I would like to know in detail what the Administration has decided in its "first phase of policy review" of U.S. policy toward Africa.

No foreign policy can survive without the understanding and cooperation of the Congress and the American public. As I said in my statement before the Senate Foreign Relations Committee on April 6, 1981, "if confirmed I want to assure this Committee that I will consult with both Houses of Congress in the development and implementation of our policy toward Africa." I look forward to extensive consultations with Members of Congress and stand ready to meet with any and all of them and the relevant Congressional committees to discuss our evolving Africa policy. The broad outlines of this policy are contained in my statement referred to above (attached).

(e) What policies toward the conflict in Southern Africa have you recommended to the Secretary of State? Please list in detail.

As noted above, we are still engaged in the review of our policies and I believe it would be inappropriate for me to discuss my recommendations to the Secretary of State.

(f) Please provide the Committee with final policy positions of the Administration. Please provide this in unclassified form.

While many aspects of our policy toward Africa are still under review, the broad outlines are contained in my statement of April 6 referred to in (d) above. I stand ready, however, to consult at any time with individual Members of Congress on policy matters.

The PRESIDING OFFICER. The question is, Will the Senate advise and consent to the nomination of Chester A. Crocker, of the District of Columbia, to be an Assistant Secretary of State? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from New Mexico (Mr. DOMENICI), the Senator from California (Mr. HAYAKAWA), the Senator from Nevada (Mr. LAXALT), the Senator from Illinois (Mr. PERCY), and the Senator from New Mexico (Mr. SCHMITT) are necessarily absent.

The Senator from Arizona (Mr. GOLDWATER) is absent on official business.

I further announce that, if present and voting, the Senator from Illinois (Mr. PERCY) would vote "yea."

Mr. CRANSTON. I announce that the Senator from Rhode Island (Mr. PELL), the Senator from Maine (Mr. MITCHELL), and the Senator from Delaware (Mr. BIDEN) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 84, nays 7, as follows:

[Rollcall Vote No. 139 Ex.]

YEAS—84

Abdnor	Ford	Murkowski
Andrews	Garn	Nickles
Armstrong	Glenn	Nunn
Baker	Gorton	Packwood
Baucus	Grassley	Pressler
Bentsen	Hart	Proxmire
Boren	Hatfield	Pryor
Boschwitz	Hawkins	Quayle
Bradley	Heflin	Randolph
Bumpers	Heinz	Riegle
Burdick	Hollings	Roth
Byrd, Harry F., Jr.	Huddleston	Rudman
Byrd, Robert C.	Inouye	Sarbanes
Cannon	Jackson	Sasser
Chafee	Jepsen	Simpson
Chiles	Johnston	Specter
Cochran	Kassebaum	Stafford
Cohen	Kasten	Stennis
Cranston	Kennedy	Stevens
D'Amato	Leahy	Thurmond
Danforth	Levin	Tower
DeConcini	Long	Tsongas
Dixon	Lugar	Wallop
Dodd	Mathias	Warner
Dole	Matsunaga	Weicker
Durenberger	Mattingly	Williams
Eagleton	Melcher	Zorinsky
Exon	Metzenbaum	
	Moynihan	

NAYS—7

Denton	Helms	Symms
East	Humphrey	
Hatch	McClure	

NOT VOTING—9

Biden	Hayakawa	Pell
Domenici	Laxalt	Percy
Goldwater	Mitchell	Schmitt

So the nomination was confirmed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. BUMPERS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of this nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, we are not quite ready to propound the agreement on food stamps yet. I know there is at least one Senator on the floor who wishes to speak.

Mr. President, I ask unanimous consent that there now be a brief period for the transaction of routine morning business not to extend beyond 10 minutes in length in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEATH OF JUDGE WALTER P. GEWIN

Mr. HEFLIN. Mr. President, it is with deep sorrow that I note the death of Walter P. Gewin, senior circuit judge of the U.S. Court of Appeals for the Fifth Circuit, and one of Alabama's most distinguished sons. His passing came in his home in Tuscaloosa, Ala., on Friday, May 15. He was 72 years old.

A native of Nanafalia, Judge Gewin received his A.B. degree cum laude from Birmingham-Southern College in 1930, a bachelor of library science degree from Emory University in 1932, and a law degree from the University of Alabama in 1935. He served as a member of the Alabama House of Representatives from 1939 to 1943 and was a member of the codification commission which prepared the Alabama Code of 1940. He practiced law in Greensboro, Birmingham, and Tuscaloosa and was a U.S. Referee in Bankruptcy when he was appointed to the the Fifth Circuit Court of Appeals by President John F. Kennedy in 1961. In 1976, he became a senior circuit judge and in 1977 he was appointed by Chief Justice Warren Burger to serve on the Temporary Emergency Court of Appeals of the United States.

Judge Gewin was honored during his lifetime by being elected president of the Alabama Bar Association. He was awarded honorary doctor of laws degrees by his alma maters, Birmingham-Southern College and the University of Alabama. In addition, Birmingham-Southern College honored him with its Distinguished Alumnus Award, while the University of Alabama Law School honored him with its Dean's Award.

Walter P. Gewin was a judge's judge: Learned, compassionate, courageous. His legal scholarship reached its apex during his service on the bench. Judge Gewin's imprint is found on many of the landmark civil rights decisions of the sixties, one of which was his order directing the desegregation of the University of Mississippi. Dispassionate in spirit, thorough in detail, his life was the epitome of the proper judicial temperament.

Judge Gewin leaves behind his widow, Anna S. Gewin, of Tuscaloosa; two sons, a daughter, four sisters, and a half-brother. But most of all he leaves behind a rich legacy of justice applied and a void which will be difficult to fill.

ISRAELI ATTACK ON IRAQI NUCLEAR REACTOR

Mr. HATFIELD. Mr. President, there is an enormous and dangerous arrogance which surrounds the unilateral Israeli decision to use U.S.-made weapons to attack an Iraqi nuclear reactor on Sunday, an arrogance which has resulted in one of the most provocative, ill-timed, and internationally illegal actions taken in that nation's history.

The arrogance stems from the fact that the Begin government apparently believes that Israel, and Israel alone among nations, has the inherent right to breach U.S. laws prohibiting the use of our weaponry for offensive purposes. The apparent use of U.S.-supplied F-16 and F-4F Phantom bombers in the preemptive attack against the nuclear reactor is a clear and unambiguous violation of the Foreign Military Sales Act which bars American weapons supplied to other countries for "purposes other than national or regional self-defense."

Mr. President, I ask unanimous consent that certain sections of the Foreign Military Sales Act be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SEC. 3(c)(1)(A) No credits (including participations in credits) may be issued and no guaranties may be extended for any foreign country under this Act as hereinafter provided, if such country uses defense articles or defense services furnished under this Act, or any predecessor Act, in substantial violation (either in terms of quantities or in terms of the gravity of the consequences regardless of the quantities involved) of any agreement entered into pursuant to any such Act (i) by using such articles or services for a purpose not authorized under section 4 or, if such agreement provides that such articles or services may only be used for purposes more limited than those authorized under section 4 for a purpose not authorized under such agreement; (ii) by transferring such articles or services to, or permitting any use of such articles or services by, anyone not an officer, employee, or agent of the recipient country without the consent of the President; or (iii) by failing to maintain the security of such articles or services.

(B) No cash sales or deliveries pursuant to previous sales may be made with respect to any foreign country under this Act as hereinafter provided, if such country uses defense articles or defense services furnished under this Act, or any predecessor Act, in substantial violation (either in terms of quantity or in terms of the gravity of the consequences regardless of the quantities involved) of any agreement entered into pursuant to any such Act by using such articles or services for a purpose not authorized under section 4 or, if such agreement provides that such articles or services may only be used for purposes more limited than those authorized under section 4, for a purpose not authorized under such agreement.

(2) The President shall report to the Congress promptly upon the recipt of information that a violation described in paragraph (1) of this subsection may have occurred.

(3)(A) A country shall be deemed to be ineligible under subparagraph (A) of paragraph (1) of this subsection, or both subparagraphs (A) and (B) of such paragraph in the case of a violation described in both such paragraphs, if the President so determines and so reports in writing to the Congress, or if the Congress so determines by joint resolution.

(B) Notwithstanding a determination by the President of ineligibility under subparagraph (B) of paragraph (1) of this subsection, cash sales and deliveries pursuant to previous sales may be made if the President certifies in writing to the Congress that a termination thereof would have significant adverse impact on United States security, unless the Congress adopts or has adopted a joint resolution pursuant to subparagraph (A) of this paragraph with respect to such ineligibility.

(4) A country shall remain ineligible in accordance with paragraph (1) of this subsection until such time as—

(A) the President determines that the violation has ceased; and

(B) the country concerned has given assurances satisfactory to the President that such violation will not recur.

SEC. 4. PURPOSES FOR WHICH MILITARY SALES BY THE UNITED STATES ARE AUTHORIZED.—Defense articles and defense services shall be sold by the United States Government under this Act to friendly countries solely for internal security, for legitimate self-defense, to permit the recipient country to participate in regional or collective arrangements or measures consistent with the Charter of the United Nations, or otherwise to permit the recipient country to participate in collective measures requested by the United Nations for the purpose of maintaining or restoring international peace and security, or for the purpose of enabling foreign military forces in less developed friendly countries to construct public works and to engage in other activities helpful to the economic and social development of such friendly countries. It is the sense of the Congress that such foreign military forces should not be maintained or established solely for civic action activities and that such civic action activities not significantly detract from the capability of the military forces to perform their military missions and be coordinated with and form part of the total economic and social development effort: *Provided*, That none of the funds contained in this authorization shall be used to guarantee, or extend credit, or participate in an extension of credit in connection with any sale of sophisticated weapons systems, such as missile systems and jet aircraft for military purposes, to any underdeveloped country other than Greece, Turkey, Iran, Israel, the Republic of China, the Philippines, and Korea unless the President determines that such financing is important to the national security of the United States and reports within thirty days each such determination to the Congress.

Mr. HATFIELD. Nor is this the first time that the act has been casually disregarded by the Begin government. Hundreds of Lebanese civilians have died and hundreds of thousands have been made homeless in recent years by the Israeli use of American fighters to attack civilian population centers in southern Lebanon suspected of harboring Palestinian terrorists. The indiscriminate violence of these raids made a mockery of the intent of the act to try and control the enormous destructive power of U.S. weapons sent abroad.

I would remind my colleagues that it is precisely this same Foreign Military Sales Act which was invoked by an apparently outraged Congress against the Government of Turkey for its offensive use of military forces on the island of Cyprus. As a result of their disregard of the act, the Turkish Government was forced to endure an arms embargo from the United States which extended throughout the middle of the last decade.

What price will now be asked of the Begin government for its own violation of United States and international law?

To call this unprovoked military attack

solely defensive in nature is to make a mockery of the fundamentals of international law which insists first on the territorial integrity of each nation. One most certainly does not have to embrace the prospects of a nuclear weapon in the hands of an unstable Iraqi Government—if indeed conflicting reports of the purpose of the Baghdad reactor can be sorted out—to understand that, under the Begin government's definition of a defensive attack, virtually no military action on the part of Israel would fall within the confines of United States or international law.

Nor is Israel the only nation to be confronted with the mortal threat of nuclear annihilation. The United States, the Soviet Union, and indeed all of civilized life has been living for three decades under the shadow of full-scale nuclear war. Indeed, at various moments in the history of the nuclear arms race, the United States has had the theoretical capability of destroying Soviet nuclear forces in a pre-emptive attack. I do not believe anyone in this Chamber needs to be further reminded of the Soviets' stated intention to destroy all vestiges of capitalism.

And yet despite possessing the capability for eliminating Soviet nuclear capability in the early stages of its development, and notwithstanding Soviet threats to overwhelm the United States and its system of government, we chose not to undertake the course of preemptive attack because we understood—as the Begin government apparently does not—that no matter how many times you destroy that nuclear capability, it will be rebuilt.

And that, with each attack across international boundaries, you solidify the anger and the vengeance of your enemy and his allies, and you open yourself to the condemnation of the world community.

Ultimately, as we have come to understand, the elimination of nuclear weapons cannot ever effectively occur through the use of acts of international violence, but through the process of international law.

Through its actions Sunday, Israel has succeeded in eliminating an immediate source of possible danger, but it has done so in blatant disregard of United States and international law and has almost certainly insured that it will be threatened with retaliatory violence of equal measure from its reunited enemies.

TIMING

Serious and troubling questions have also been raised, Mr. President, about the timing of the Israeli attack. It seems somewhat more than curious that the raid itself happened to be carried out over 3 weeks before the national elections if Israel has—according to its own government—suspected for months that the nuclear facility near Baghdad was designed to produce an atomic weapon.

The timing of the attack will no doubt prove in the short run to be a substantial political victory for Mr. Begin.

It will, however, prove enormously destructive to the U.S. efforts to negotiate a settlement of the crisis over Syrian missiles in Lebanon, to the fragile bond between Egypt and Israel which has been established under the Camp David agreement, to the personal standing and stability of President Sadat who was meeting with Mr. Begin even as the plans for this raid were apparently being finalized, and to the successes that have been achieved in recent weeks in the U.S. effort to involve other more moderate Arab governments in Middle East negotiations.

It is difficult to imagine a worse time to initiate such an attack. Any short-term political benefit which may accrue to the Begin government will, I am afraid, be swamped in the storm of reactions which is now emerging from countries in the Middle East and throughout the world.

Mr. President, it is also absolutely vital to understand that Iraq has signed the Nuclear Non-Proliferation Treaty. The plant that was destroyed by the Israeli attack was subject to international safeguards and inspections aimed at insuring that the facility would not be used to build a nuclear weapon. Israel has consistently refused to sign the Non-Proliferation Treaty.

These facts cannot help but lead one to the unhappy conclusion that the Begin government is loath to accept the constraints placed on other nations of the world through international law, but will willingly and unilaterally usurp international and U.S. law through the use of force if Israel alone determines that such laws do not serve its national interests.

Mr. President, this arrogant abuse of U.S.-supplied armed might by Israel will prove deeply injurious to the U.S. goal of achieving a just and lasting peace in that volatile region of the globe. It represents a clear and premeditated violation of U.S. and international law which simply cannot be ignored by this country without fundamentally damaging the integrity of our laws and the prospects for peace in the Middle East.

I urge the Senate to undertake a fundamental review of applicable U.S. law to determine whether U.S. military support for Israel should continue unaffected in the wake of this damaging and regrettable abuse of the historic relationship between our two nations.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. NICKLES). Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT—S. 1007

Mr. BAKER. Mr. President, I had announced earlier on the floor that I had hoped we might proceed today to the consideration of the food stamp bill, S. 1007, Calendar No. 152.

I see that the distinguished minority leader is in the Chamber, and I inquire of him if the minority might be ready at this time to waive 1 day of the 3-day rule, to proceed immediately to the consideration of that bill, and to consider a time agreement which I will outline now. I do not now make the request, but I will describe it to the minority leader.

I propose that we consider the food stamp bill on a 6-hour time limitation, to be equally divided; that there be a 1-hour time limitation on any amendments in the first degree, to be equally divided; that there be 20 minutes on any amendments in the second degree or points of order, if the same are submitted, or any appeal; that the agreement be in the usual form, and that paragraph 4 of rule XII be waived.

That is the request I would propose to put, if it generally agrees with the wishes of the minority leader.

I would also propose, Mr. President, that any rollcall votes that are ordered on this bill or any amendments thereto, or any measure in respect thereto, be postponed until tomorrow, beginning at 3 p.m.; that there be an interval of 10 minutes for debate, equally divided, between votes that may be stacked today, and that the vote on final passage of this bill occur not later than 6 p.m. tomorrow.

Mr. President, I also include in the motion I have just described that the 20-minute time limitation include debatable motions, as well as appeals and points of order.

Mr. ROBERT C. BYRD. Mr. President, as I understand the distinguished majority leader, he is not now propounding the request. That request has been cleared on this side of the aisle.

I suggest to the distinguished majority leader, if I may do so, that before the minority agrees to waive the rule, the request be put and acceded to, after which, if it is agreed to, the minority will waive the rule.

Mr. BAKER. I thank the distinguished minority leader.

Mr. President, in view of that, I now ask unanimous consent that the Senate next proceed to the consideration of Calendar No. 160, the budget waiver underlying the food stamp bill, and, assuming that the budget waiver is adopted by the Senate, that we proceed immediately to the consideration of the food stamp bill, S. 1007, Calendar No. 152; that there be a time limitation on the bill of 6 hours, to be equally divided; that there be a time limitation of 1 hour on any amendments in the first degree, to be equally divided; that there be a time limitation of 20 minutes on any amendments in the second degree or any points of order, if the same are submitted, as well as debatable motions or appeals; that the agreement be in the usual form; that paragraph 4 of rule XII be waived; that any votes that are ordered today be deferred and stacked, to begin at 3 p.m. tomorrow; that any votes that are stacked be interrupted and interspersed with a 10-minute period for debate, to be equally divided, and that final passage of the bill occur not later than 6 p.m. tomorrow.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object.

Mr. BAKER. Mr. President, I amend the request in the following way.

I also ask unanimous consent that there be a 40-minute time limitation on an amendment to be offered by the distinguished Senator from Oklahoma (Mr. BOREN) dealing with the elderly to be equally divided, and a 20-minute limitation on another amendment to be offered by the Senator from Oklahoma (Mr. BOREN) on a pilot project on categorical eligibility. I add that to the request.

Mr. ROBERT C. BYRD. Mr. President, I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the agreement be in the usual form and that the Senator from North Carolina be designated to manage the bill on behalf of the majority and the Senator from Vermont (Mr. LEAHY) on behalf of the minority.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, will the distinguished Senator modify his request to make the final vote not later than 7 p.m. on tomorrow rather than 6 p.m. with the assurance on my part that I will do everything I can to subsequently—by "subsequently" I mean subsequent to this moment—attempt to get the final vote put back to 6 p.m.?

Mr. BAKER. Mr. President, I will.

I had hoped that we could finish by 6 p.m. I know that a number of Senators have commitments beginning at approximately 7 p.m. tomorrow evening. But I think that with the assurances just given by the minority leader we best go ahead and get the agreement with the hope that we can improve on the time for final passage tomorrow.

So I amend the request for final passage not later than 7 p.m. and so ask unanimous consent.

Mr. ROBERT C. BYRD. I thank the majority leader.

The PRESIDING OFFICER. Without objection, it is so ordered.

The text of the agreement follows:

UNANIMOUS CONSENT AGREEMENT

Ordered, That when the Senate proceeds to the consideration of S. 1007 (Order No. 152), to amend the Food Stamp Act of 1977, debate on any amendment in the first degree, except 2 amendments to be offered by the Senator from Oklahoma (Mr. Boren), on which there shall be 40 minutes on one dealing with the elderly and 20 minutes on one dealing with categorical eligibility pilot projects, shall be limited to 1 hour, to be equally divided and controlled by the mover of such and the manager of the bill; debate on any amendment in the second degree shall be limited to 20 minutes, to be equally divided and controlled by the mover of such and the manager of the bill; and debate on any debatable motion, appeal, or point of order which is submitted or on which the Chair entertains debate shall be limited to 20 minutes, to be equally divided and controlled by the mover of such and the manager of the bill: *Provided*, That in the event the manager of the bill is in favor of any such amendment or motion, the time in opposition thereto shall be controlled by the minority leader or his designee: *Provided further*, That no amendment that is not germane to the provisions of the said bill shall be received.

Ordered further, That on the question of final passage of the said bill, debate shall be limited to 6 hours, to be equally divided and controlled, respectively, by the Senator from North Carolina (Mr. Helms) and the Senator from Vermont (Mr. Leahy): *Provided*, That the said Senators, or either of them, may, from the time under their control on the passage of the said bill, allot additional time to any Senator during the consideration of any amendment, debatable motion, appeal, or point of order.

Ordered further, That any rollcall votes that are ordered on this bill or any amendments thereto, or any measure in respect thereto, be postponed until tomorrow, beginning at 3 p.m.; that there be an interval of 10 minutes for debate, equally divided, between votes that may be stacked today, and that the vote on final passage of this bill occur not later than 7 p.m. tomorrow.

Mr. BAKER. Mr. President, does the order contemplate that the budget waiver will next be laid before the Senate?

The PRESIDING OFFICER. The Senator is correct.

WAIVING CONGRESSIONAL BUDGET ACT

The resolution (S. Res. 149) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1007, was considered and agreed to, as follows:

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 1007, the Food Stamp and Commodity Distribution Amendments of 1981. Such waiver is necessary to permit consideration of an additional fiscal year 1981 authorization of appropriations for the food stamp program which was not reported on or before May 15, 1980, as required by section 402(a) of the Congressional Budget Act of 1974. Increases in program costs have resulted in the need for additional authorization authority to permit a fiscal year 1981 supplemental appropriation in excess of the amounts already authorized to be appropriated for fiscal year 1981.

Such waiver is also necessary to permit consideration of authorization of appropriations for the food stamp program and the commodity distribution programs for fiscal year 1982 which was not reported on or before May 15, 1981, as required by section 402(a) of the Congressional Budget Act of 1974. Specifically, S. 1007 would extend authorizations of appropriations for these programs for fiscal years 1982 through 1985 and make significant reforms in the food stamp program to restrain food stamp program spending, focus benefits toward the most needy, increase the flexibility of States in administering the program, provide for improved administration, and reduce fraud and abuse. The delay in reporting S. 1007 was occasioned by a number of factors including consideration at the same time of separate legislation to extend the authorities for almost all of the Nation's major farm commodity programs and by a determined effort on the part of the Committee on Agriculture, Nutrition, and Forestry to report legislation meeting the budgetary restraints of the First Concurrent Resolution on the Budget for fiscal year 1982.

FOOD STAMP AND COMMODITY DISTRIBUTION AMENDMENTS OF 1981

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to the consideration of S. 1007, which the clerk will state by title.

The legislative clerk read as follows:

A bill (S. 1007) to amend the Food Stamp Act of 1977 to restrain food stamp program spending, to increase State agency flexibility, to focus benefits toward the most needy, to extend appropriations authority, to amend the Agriculture and Consumer Protection Act of 1973, and to extend and improve the commodity distribution programs, and for other purposes.

The Senate proceeded to consider the bill which had been reported from the Committee on Agriculture, Nutrition, and Forestry with an amendment to strike out all after the enacting clause, and insert the following:

That this Act may be cited as the "Food Stamp Commodity Distribution Amendments of 1981".

TITLE I—MAJOR FOOD STAMP REVISIONS

ADJUSTMENT OF THE THRIFTY FOOD PLAN

SEC. 101. Section 3(o) of the Food Stamp Act of 1977 is amended by striking "and" before clause (6) and all that follows down through the end of clause (6), and inserting in lieu thereof the following: "(6) on April 1, 1982, adjust the cost of such diet to the nearest dollar increment to reflect changes in the cost of the thrifty food plan for the fifteen months ending the preceding December 31, (7) on July 1, 1983, adjust the cost of such diet to the nearest dollar increment to reflect changes in the cost of the thrifty food plan for the fifteen months ending the preceding March 31, (8) on October 1, 1984, adjust the cost of such diet to the nearest dollar increment to reflect changes in the cost of the thrifty food plan for the fifteen months ending the preceding June 30, and (9) on October 1, 1985, and each October 1 thereafter, adjust the cost of such diet to the nearest dollar increment to reflect changes in the cost of the thrifty food plan for the twelve months ending the preceding June 30.".

GROSS INCOME ELIGIBILITY STANDARD

SEC. 102. (a) Section 5 of the Food Stamp Act of 1977 is amended by—

(1) striking out "subsections (c) and (e)" in subsection (b) and inserting in lieu thereof "subsection (c)";

(2) inserting in subsection (c) "130 per centum of" after "standards of eligibility shall be"; and

(3) striking out from the first sentence of subsection (e) "In" and inserting in lieu thereof "Further, in", and inserting "for purposes of determining the household's benefit level only," after "household income,".

(b) Section 8(a) of the Food Stamp Act of 1977 is amended by inserting "(d) and (e)" after "section 5" in the first sentence.

ADJUSTMENTS OF DEDUCTIONS

SEC. 103. Section 5(e) of the Food Stamp Act of 1977 is amended by—

(1) striking out in the first sentence everything that follows "the Secretary shall allow a standard deduction of" and inserting in lieu thereof the following: "$85 a month for each household, except that households in Alaska, Hawaii, Guam, Puerto Rico, and the Virgin Islands of the United States shall be allowed a standard deduction of $145, $120, $170, $50, and $75, respectively.";

(2) striking out the second sentence and inserting in lieu thereof the following: "Such standard deductions shall be adjusted (1) on July 1, 1983, to the nearest $5 increment to reflect changes in the Consumer Price Index for all urban consumers published by the Bureau of Labor Statistics, for items other than food and the homeownership component of shelter costs, as appropriately adjusted by the Bureau of Labor Statistics after consultation with the Secretary, for the fifteen months ending the preceding March 31,

(2) on October 1, 1984, to the nearest $5 increment to reflect such changes for the fifteen months ending the preceding June 30, and (3) on October 1, 1985, and each October 1 thereafter, to the nearest $5 increment to reflect such changes for the twelve months ending the preceding June 30.";

(3) striking out the proviso in clause (2) of the fourth sentence and inserting in lieu thereof the following: "*Provided*, That the amount of such excess shelter expense deduction shall not exceed $115 a month in the forty-eight contiguous States and the District of Columbia, and shall not exceed, in Alaska, Hawaii, Guam, Puerto Rico, and the Virgin Islands of the United States $200, $165, $140, $40, and $85, respectively, adjusted (1) on July 1, 1983, to the nearest $5 increment to reflect changes in the shelter (exclusive of homeownership costs), fuel, and utilities components of housing costs in the Consumer Price Index for all urban consumers published by the Bureau of Labor Statistics, as appropriately adjusted by the Bureau of Labor Statistics after consultation with the Secretary, for the fifteen months ending the preceding March 31, (2) on October 1, 1984, to the nearest $5 increment to reflect such changes for the fifteen months ending the preceding June 30, and (3) on October 1, 1985, and each October 1 thereafter, to the nearest $5 increment to reflect such changes for the twelve months ending the preceding June 30,".

EARNED INCOME DEDUCTION

SEC. 104. Section 5(e) of the Food Stamp Act of 1977 is amended by striking "20 per centum" in the third sentence and inserting in lieu thereof "15 per centum".

RETROSPECTIVE ACCOUNTING

SEC. 105. (a) Section 5(f) of the Food Stamp Act of 1977 is amended to read:

"(f)(1)(A) Household income for those households that, by contract for other than an hourly or piecework basis or by self-employment, derive their annual income in a period of time shorter than one year, shall be calculated by averaging such income over a twelve-month period.

"(B) Household income for those households that received nonexcluded income of the type described in subsection (d)(3) of this section, shall be calculated by averaging such income over the period of which it is received.

"(2)(A) Household income for migrant farmworker households shall be calculated on a prospective basis, as provided in paragraph (3)(A).

"(B) Household income for all other households shall be calculated either on a prospective basis as provided in paragraph (3)(A) or on a retrospective basis as provided in paragraph (3)(B), as elected by the State agency under regulations prescribed by the Secretary."

"(3)(A) Calculation of household income on a prospective basis is the calculation of income on the basis of the income reasonably anticipated to be received by the household during the period for which eligibility or benefits are being determined. Such calculation shall be made in accordance with regulations prescribed by the Secretary which shall provide for taking into account both the income reasonably anticipated to be received by the household during the period for which eligibility or benefits are being determined and the income received by the household during the preceding thirty days.

"(B) Calculation of household income on a retrospective basis is the calculation of income for the period for which eligibility or benefits are being determined on the basis of income received in a previous period. Such calculation shall be made in accordance with regulations prescribed by the Secretary which may provide for the determination of eligibility on a prospective basis in some or all cases in which benefits are calculated under this paragraph. Such regulations shall provide for supplementing the initial allotments of newly applying households in those cases in which the determination of income under this paragraph causes serious hardship.

"(4) In promulgating regulations under this subsection, the Secretary shall consult with the Secretary of Health and Human Services in order to assure that, to the extent feasible and consistent with the purposes of this Act and the Social Security Act, the income of households receiving benefits under this Act and title IV-A of the Social Security Act, is calculated on a comparable basis under the two Acts. The Secretary is authorized, upon the request of a State agency, to waive any of the provisions of this subsection to the extent necessary to permit the State agency to calculate income for purposes of this Act on the same basis that income is calculated under title IV-A of the Social Security Act in that State.".

(b) Effective October 1, 1983, paragraph (2)(B) of section 5(f) of the Food Stamp Act of 1977, as amended by subsection (a), is amended to read:

"(B) Household income for all other households shall be calculated on a retrospective basis as provided in paragraph (3)(B).".

(c) Section 5(d) of the Food Stamp Act of 1977 is amended by striking "5(f)(2)" and inserting "5(f)" in lieu thereof.

PERIODIC REPORTING

SEC. 106. (a) Section 3(c) of the Food Stamp Act of 1977 is amended by inserting before the period at the end of the second sentence "except that the limit of twelve months may be waived by the Secretary to improve the administration of the program".

(b) Section 6(c) of the Food Stamp Act of 1977 is amended by—

(1) inserting after "households" in the first sentence of paragraph (1) ", including all households with earned income, except migrant farmworker households, all households with potential earners, including individuals receiving unemployment compensation benefits and individuals required by section 6(d) of this Act to register for work, and all households required to file a similar report under title IV-A of the Social Security Act, but not including households that have no earned income and in which all members are sixty years of age or over or receive supplemental security income benefits under title XVI of the Social Security Act or disability and blindness payments under titles I, II, X, XIV, and XVI of the Social Security Act,";

(2) striking "5(f)(2)" in paragraph (1) and inserting "5(f)" in lieu thereof; and

(3) inserting after paragraph (3) the following new paragraph:

"(4) Any household that fails to submit periodic reports required by paragraph (1) shall not receive an allotment for the payment period to which the unsubmitted report applies until such report is submitted.".

(c) Effective October 1, 1983, section 6(c)(1) of the Food Stamp Act of 1977 is further amended by—

(1) striking the first sentence "that elect to use a system of retrospective accounting in accordance with section 5(f) of this Act"; and

(2) striking the second sentence.

REPEAL OF INCREASES IN DEPENDENT CARE DEDUCTIONS FOR WORKING ADULTS AND MEDICAL DEDUCTIONS FOR THE ELDERLY AND DISABLED

SEC. 107. Sections 104 and 105 of the Food Stamp Act Amendments of 1980 (Public Law 96-249) are repealed.

TITLE II—OTHER FOOD STAMP PROGRAM COST REDUCTIONS

FAMILY UNIT REQUIREMENT

SEC. 201. Section 3(i) of the Food Stamp Act of 1977 is amended by—

(1) inserting before the period at the end of the first sentence "; except that parents and children who live together shall be treated as a group of individuals who customarily purchase and prepare meals together for home consumption even if they do not do so, unless one of the parents is sixty years of age or older"; and

(2) striking "neither" in the second sentence and inserting "no" in lieu thereof.

BOARDERS

SEC. 202. Section 3(i) of the Food Stamp Act of 1977 is amended by—

(1) striking in clause (1) of the first sentence "or else pays compensation to the others for such meals,";

(2) striking in clause (2) of the first sentence "or else live with others and pay compensation to the others for such meals"; and

(3) adding before the period at the end of the second sentence ", or else live with others and pay compensation to the others for meals".

DRUG ADDICTION AND ALCOHOLIC TREATMENT PROGRAMS

SEC. 203. (a) Section 3 of the Food Stamp Act of 1977 is amended by—

(1) striking subsection (f), the definition for "Drug addiction and alcoholic treatment and rehabilitation program";

(2) in subsection (g)(1), striking "(5), (7), and (8)" and inserting in lieu thereof "(6), and (7)";

(3) in subsection (g), striking clause (5), and redesignating clauses (6), (7), and (8) as clauses (5), (6), and (7);

(4) in the third sentence of subsection (1), inserting "and" before "temporary residents", and striking out ", and narcotics addicts or alchoholics who live under the supervision of a private nonprofit institution for the purpose of regular participation in a drug or alcoholic treatment program";

(5) in subsection (k)(2), striking "(5), (7), and (8)" and inserting in lieu thereof "(6), and (7)";

(6) in subsection (k)(3), striking "(g)(6)" and inserting in lieu thereof "(g)(5)".

(b) Section 6(d)(2) of the Food Stamp Act of 1977 is amended by—

(1) striking clause (E); and

(2) redesignating clause (F) as clause (E).

(c) Section 10 of the Food Stamp Act of 1977 is amended by striking "private nonprofit organizations or institutions which serve meals to narcotics addicts or alcoholics in drug addiction or alcoholic treatment and rehabilitation programs," and striking the comma after "children".

EXCLUDED PAYMENTS FROM OTHER PROGRAMS; ENERGY ASSISTANCE PAYMENTS

SEC. 204. Section 5(d) of the Food Stamp Act of 1977 is amended by striking "(10)" and everything that follows through the end of such subsection and inserting in lieu thereof "(10) any income that any other Federal law specifically excludes from consideration as income for purposes of determining eligibility for the food stamp program, and (11) any payments or allowances specifically designated for energy assistance by Federal law.".

SPONSORED ALIENS

SEC. 205. Section 5 of the Food Stamp Act of 1977 is amended by adding a new subsection (i) to read:

"(i)(1) For purposes of determining eligi-

bility for and the amount of benefits under this Act for an individual who is an alien as described in subsection 6(f)(2)(B) of this Act, the income and resources of any person who as a sponsor of such individual's entry into the United States executed an affidavit of support or similar agreement with respect to such individual, and the income and resources of the sponsor's spouse if such spouse is living with the sponsor, shall be deemed to be the income and resources of such individual for a period of three years after the individual's entry into the United States. Any such income deemed to be income of such individual shall be treated as unearned income of such individual.

"(2)(A) The amount of income of a sponsor, and the sponsor's spouse if living with the sponsor, which shall be deemed to be the unearned income of an alien for any year shall be determined as follows:

"(i) The total yearly rate of earned and unearned income of such sponsor, and such sponsor's spouse if such spouse is living with the sponsor, shall be determined for such year under rules prescribed by the Secretary.

"(ii) The amount determined under clause (1) of this subparagraph shall be reduced by an amount equal to the income eligibility standard as determined under section 5(c) of this Act for a household equal in size to the sponsor, the sponsor's spouse if living with the sponsor, and any persons dependent upon or receiving support from the sponsor or the sponsor's spouse if the spouse is living with the sponsor.

"(iii) The monthly income attributable to such alien shall be one-twelfth of the amount calculated under clause (ii) of this subparagraph.

"(B) The amount of resources of a sponsor, and the sponsor's spouse if living with the sponsor, which shall be deemed to be the resources of an alien for any year shall be determined as follows:

"(i) The total amount of the resources of such sponsor and such sponsor's spouse if such spouse is living with the sponsor shall be determined under rules prescribed by the Secretary.

"(ii) The amount determined under clause (i) of this subparagraph shall be reduced by $1,500.

"(iii) The resources determined under clause (ii) of this subparagraph shall be deemed to be resources of such alien in addition to any resources of such alien.

"(C)(i) Any individual who is an alien shall, during the period of three years after entry into the United States, in order to be an eligible individual or eligible spouse for purposes of this Act, be required to provide to the State agency such information and documentation with respect to his sponsor and sponsor's spouse as may be necessary in order for the State agency to make any determination required under this section, and to obtain any cooperation from such sponsor necessary for any such determination. Such alien shall also be required to provide such information and documentation which such alien or the sponsor provided in support of such alien's immigration application as the State agency may request.

"(ii) The Secretary shall enter into agreements with the Secretary of State and the Attorney General whereby any information available to such persons and required in order to make any determination under this section will be provided by such persons to the Secretary, and whereby such persons shall inform any sponsor of an alien, at the time such sponsor executes an affidavit of support or similar agreement, of the requirements imposed by this section.

"(D) Any sponsor of an alien, and such alien, shall be jointly and severably liable for an amount equal to any overpayment made to such alien during the period of three years after such alien's entry into the United States, on account of such sponsor's failure to provide correct information under the provisions of this section, except where such sponsor was without fault, or where good cause for such failure existed. Any such overpayment which is not repaid shall be recovered in accordance with the provisions of section 13(b)(2) of this Act.

"(E) The provisions of this subsection shall not apply with respect to any alien who is a member of the sponsor's household, as defined in section 3(i) of this Act.".

ELIGIBILITY OF STRIKERS

SEC. 206. (a) Section 6(d)(4) of the Food Stamp Act of 1977 is amended by—

(1) inserting before the colon at the end of the first proviso the following: ", however, such household shall not receive an increased allotment as the result of a decrease in the income of the striking member or members of the household";

(2) inserting a period in lieu of the colon at the end of the second proviso; and

(3) striking the third proviso.

(b) Section 6(i) of the Food Stamp Act of 1977 is repealed.

WORK REQUIREMENTS

SEC. 207. Section 6(d) of the Food Stamp Act of 1977 is amended by—

(1) striking "six" and inserting in lieu thereof "twelve" in clause (i) of paragraph (1);

(2) striking ", unless the household was certified for benefits under this Act immediately prior to such unemployment" in clause (iii) of paragraph (1);

(3) striking "sixty days" and inserting "ninety days" in the proviso in clause (iii) of paragraph (1);

(4) inserting before the semicolon at the end of clause (A) of paragraph (2) ", in which case, failure by such person to comply with any work requirement to which such person is subject that is comparable to a requirement of paragraph (1) shall be the same as failure to comply with that requirement of paragraph (1); and

(5) striking "twelve" and inserting in lieu thereof "six" in clause (B) of paragraph (2).

WORKFARE PROGRAMS

SEC. 208. (a) Section 6(d) of the Food Stamp Act of 1977 is amended by adding at the end thereof the following new paragraph:

"(5) Unless otherwise exempted by the provisions of this paragraph, no individual shall be eligible for assistance under this Act if he or she is a physically and mentally fit person between the ages of eighteen and sixty who refuses without good cause to accept an offer of employment, under a workfare program established under section 11(e)(20) of this Act, made by a State, a political subdivision of a State, a prime sponsor pursuant to the Comprehensive Employment and Training Act of 1973, or any other public employer, the compensation for which employment is provided in the form of the allotment to which the household is otherwise entitled under section 8(a) of this Act. A person who otherwise would be required to comply with the requirements of this paragraph shall be exempt from such requirements if such person is a person described in clause (B), (C), or (E) of paragraph (2) of this subsection, or is within another category of persons designated by the State agency as exempt from such requirements.".

(b) Section 11(e) of the Food Stamp Act of 1977 is amended by—

(1) striking the word "and" at the end of paragraph (18);

(2) striking the period at the end of paragraph (19) and inserting in lieu thereof a semicolon; and

(3) adding at the end thereof the following new paragraph:

"(20) that the State agency may establish and carry out a workfare program, in accordance with the provisions of subsection (m) of this section and regulations issued by the Secretary under such subsection, to provide employment to enable households to satisfy the requirements of section 6(d)(5) of this Act; and".

(c) Section 11 of the Food Stamp Act of 1977 is further amended by adding at the end thereof the following new subsection:

"(m)(1) Not later than sixty days after enactment of this subsection, the Secretary shall issue regulations regarding the establishment and operation by State and local agencies of a workfare program which makes available public employment described in section 6(d)(5).

"(2) Such regulations shall provide that compensation for employment described in section 6(d)(5) shall consist of the allotment to which the household is entitled pursuant to section 8(a) of this Act, with each hour of such employment entitling the household to which such person belongs to a portion of its allotment equal in value to 100 per centum of the higher of the applicable State minimum wage or the Federal hourly rate under the Fair Labor Standards Act of 1938.

"(3) Regulations issued by the Secretary under this subsection—

"(A) shall allow for the provision of job counseling to ensure that such members are matched with the most suitable employment available, taking into consideration the experience, training, and capabilities of such members;

"(B) shall allow for the provision of assistance to such members to obtain suitable employment outside such program;

"(C) shall not require any such member participating in any such workfare program for any week to work any hours during such week which when added to any other hours worked by such member for compensation in cash or in kind in any other capacity during such week exceed forty hours; and

"(D) shall require that employment described in section 6(d)(5) not be used by any employer to fill a job vacancy created by the action of such employer in laying off or terminating the employment of any regular employee not participating in any such workfare program in anticipation of filling the vacancy so created by hiring any employee participating in any such workfare program.

"(4) Any person who is subject to the workfare requirements of section 6(d)(5) of this Act shall be ineligible to participate in the food stamp program as a member of any household for a period of six months after such person refuses to accept an offer of employment under such program or fails to work the number of hours required under paragraph (2) of this subsection.

"(5) During the period of ineligibility imposed under paragraph (4) of this subsection, no household shall receive increased benefits under this Act as the result of a member of such household having been disqualified under paragraph (4).

"(6)(A) The Secretary shall, to the maximum extent practicable, make it possible for States and political subdivisions to design and operate workfare programs for food stamp recipients that are compatible with similar workfare programs operated by such States and political subdivisions.

"(B) The Secretary shall allow States and political subdivisions to require that food stamp recipients subject to section 6(d)(5) of this Act comply with provisions of workfare programs requiring work or training operated under title IV of the Social Security Act. In such cases, compliance with a workfare program operated under title IV shall be

treated as compliance with food stamp workfare requirements.

"(C) The Secretary may also allow States and political subdivisions to require that food stamp recipients subject to section 6(d)(5) of this Act comply with provisions of workfare programs (other than those operated under title IV of the Social Security Act) operated by States or politicial subdivisions, if the Secretary determines that such other workfare program meets the provisions and protections provided under this Act. In such cases, compliance with another workfare program shall be treated as compliance with food stamp workfare requirements.".

(d) Section 16 of such Act is amended by adding at the end thereof the following new subsection:

"(j) The Secretary shall pay 50 per centum of all administrative costs involved in operating a workfare program established under section 11(e)(20) of this Act.".

(e) Section 17(c) of such Act is amended—

(1) by striking "and" before "the program's relative fairness"; and

(2) by striking the period at the end thereof and inserting in lieu thereof a comma and the following: "and the operation of a workfare program established under this Act, with particular emphasis upon the extent to which such workfare program reduces the need for food stamp benefits and helps to achieve the purposes of this Act.".

PRORATING FIRST MONTH BENEFITS

SEC. 209. Section 8 of the Food Stamp Act of 1977 is amended by adding at the end thereof the following new subsection:

"(c) The value of the allotment issued to any eligible household for the initial month or other initial period for which an allotment is issued shall have a value which bears the same ratio to the value of the allotment for a full month or other initial period for which the allotment is issued as the number of days (from the date of application) remaining in the month or other initial period for which the allotment is issued bears to the total number of days in the month or other initial period for which the allotment is issued. As used in this subsection, the term 'initial month' means (1) the first month for which an allotment is issued to a household, and (2) the first month for which an allotment is issued to a household following any period of more than thirty days during which such household was not participating in the food stamp program under this Act after previous participation in such program.".

OUTREACH; BILINGUAL REQUIREMENTS

SEC. 210. (a) Section 11(e)(1) of the Food Stamp Act of 1977 is amended by striking clauses (A), (B), and (C) and inserting in lieu thereof "not conduct food stamp outreach activities with funds provided under this Act;".

(b) Section 16(a) of that Act is amended by—

(1) striking clause (1); and

(2) redesignating clauses (2), (3), (4), and (5) as clauses (1), (2), (3), and (4), respectively.

EXPEDITED BENEFITS

SEC. 211. Section 11(e)(9) of the Food Stamp Act of 1977 is amended to read:

"(9) that any household in immediate need be cause such household—

"(A) has gross income, as defined in section 5(d) of this Act, which is less than $85 per month or is a destitute migrant or seasonal farmworker household; and

"(B) has liquid assets, as defined under section 5(g) of this Act, which do not exceed $100;

shall receive an allotment on an expedited basis if, to the extent practicable, the State agency verifies the income and cash resources of such household.".

WAIVING AND OFFSETTING CLAIMS; IMPROVED RECOVERY OF OVERPAYMENTS

SEC. 212. (a) Section 13 of the Food Stamp Act of 1977 is amended by—

(1) inserting "(a)" immediately after the section designation;

(2) inserting before the period at the end of the first sentence ", including the power to waive claims if the Secretary determines that to do so would serve the purposes of this Act";

(3) adding the following new sentence at the end thereof: "The Secretary shall have the power to reduce amounts otherwise due to a State agency under section 16 of this Act to collect unpaid claims assessed against the State agency if the State agency has declined or exhausted its appeal rights under section 14 of this Act."; and

(4) adding the following new subsection at the end thereof:

"(b)(1) In the case of any ineligibility determination under section 6(b) of this Act, the household of which such ineligible individual is a member is required to agree to a reduction in the allotment of the household of which such individual is a member, or payment in cash, in accordance with a schedule determined by the Secretary, that will be sufficient to reimburse the Federal Government for double the value of any overissuance of coupons resulting from the activity that was the basis of the ineligibility determination. If a household refuses to make an election, or elects to make a payment in cash under the provisions of the preceding sentence and fails to do so, the household shall be subject to an allotment reduction.

"(2) State agencies shall collect any claim against a household arising from the overissuance of coupons, other than claims the collection of which is provided for in paragraph (1) of this subsection and claims arising from an error of the State agency, by reducing the monthly allotments of the household. These collection shall be limited by 10 per centum of the monthly allotment (or $10 per month, whenever that would result in a faster collection rate).".

(b) The heading of section 13 of the Food Stamp Act of 1977 is amended to read "COLLECTION AND DISPOSITION OF CLAIMS".

STATES' SHARE OF COLLECTED CLAIMS

SEC. 213. Section 16(a) of the Food Stamp Act of 1977 is amended by—

(1) striking in the first sentence "through prosecutions" and all that follows down through the end of the sentence and inserting in lieu thereof "pursuant to section 13(b)(1) of this Act and 25 per centum of the value of all funds or allotments recovered or collected pursuant to section 13(b)(2) of this Act."; and

(2) striking in the second sentence, "fraud" and inserting in lieu thereof "ineligibility".

TITLE III—STRENGTHENING PENALTIES FOR FRAUD AND ABUSE; IMPROVING ADMINISTRATIVE PROCEDURES

ELIGIBLE STORES

SEC. 301. Section 3(k) of the Food Stamp Act of 1977 is amended by inserting the following new sentence at the end thereof: "Notwithstanding the preceding sentence, the term 'retail food store' shall not include any establishment that sells alcoholic beverages for consumption on the premises, other than an establishment referred to in subections (g)(3) and (k)(3) of this section."

ALASKA'S THRIFTY FOOD PLAN

SEC. 302. Section 3(o) of the Food Stamp Act of 1977 is amended by revising clause (2) to read: "(2) make cost adjustments in the thrifty food plan for Hawaii and the urban and rural parts of Alaska to reflect the cost of food in Hawaii and urban and rural Alaska,".

DISALLOWANCE OF DEDUCTIONS FOR EXPENSES PAID BY THIRD PARTIES

SEC. 303. Section 5(e) of the Food Stamp Act of 1977 is amended by adding in the fourth and fifth sentences after "entitled" the following: ", with respect to expenses other than expenses paid on behalf of the household by a third party,".

RESOURCE LIMITATIONS

SEC. 304. Section 5(g) of the Food Stamp Act of 1977 is amended by striking in the second sentence ", in prescribing inclusions in, and exclusions from, financial resources, follow regulations in force as of June 1, 1977, and shall, in addition, (1)".

DISQUALIFICATION PENALTIES FOR FRAUD AND MISREPRESENTATION

SEC. 305. Section 6(b) of the Food Stamp Act of 1977 is amended to read:

"(b)(1) Any person who has been found by any State or Federal court or administrative agency to have intentionally (A) made a false or misleading statement, or misrepresented, concealed or withheld facts, or (B) committed any act that constitutes a violation of this Act, the regulations issued thereunder, or any State statute, for the purpose of using, presenting, transferring, acquiring, receiving, or possessing coupons or authorization cards shall, immediately upon the rendition of such determination become ineligible for further participation in the program—

"(i) for a period of six months upon the first occasion of any such determination;

"(ii) for a period of one year upon the second occasion of any such determination;

"(iii) permanently, upon the third occasion of any such determination.

During the period of such ineligibility, no household shall received increased benefits under this Act as the result of a member of such household having been disqualified under this subsection.

"(2) Each State agency shall proceed against an individual alleged to have engaged in such activity either by way of administrative hearings or by referring such matters to appropriate authorities for civil or criminal action in a court of law.

"(3) Such periods of ineligibility as are provided for in paragraph (1) of this subsection shall remain in effect, without possibility of administrative stay, unless and until the finding upon which the ineligibility is based is subsequently reversed by a court of appropriate jurisdiction, but in no event shall the period of ineligibility be subject to review.

"(4) The Secretary shall prescribe such regulations as the Secretary may deem appropriate to ensure that information concerning any such determination with respect to a specific individual is forwarded to the Office of the Secretary by any appropriate State or Federal entity for the use of the Secretary in administering the provisions of this section. No State shall withhold such information from the Secretary or the Secretary's designee for any reason whatsoever.".

ELIMINATION OF CASH CHANGE

SEC. 306. Section 7(b) of the Food Stamp Act of 1977 is amended by striking the colon at the end of the first proviso and all that follows down through the word "issued".

LIABILITY FOR LOSSES; MAIL ISSUANCE LIMITATIONS

SEC. 307. Section 7(f) of the Food Stamp Act of 1977 is amended to read:

"(f) Notwithstanding any other provision of this Act, the State agency shall be strictly liable to the Secretary for any financial losses involved in the acceptance, storage, and issuance of coupons, except that in the case of losses resulting from the replacement of coupons lost in the mail, the State agency

shall be liable to the Secretary to the extent that such losses exceed 1 per centum of the value of allotments issued by mail during any six-month period in any State or part of a State that issues a significant volume of coupons by mail. In the case of losses resulting from the replacement of authorizations for coupons, the State agency shall be liable to the Secretary to the extent prescribed in the regulations promulgated by the Secretary. The Secretary is authorized to restrict the use of mail coupon issuance in any State or part of a State where the Secretary determines that it jeopardizes program integrity or is not cost effective.".

COUNTING THE VALUE OF ALLOTMENTS AS INCOME OR RESOURCES; REDUCING OTHER PROGRAM BENEFITS

SEC. 308. Section 8(b) of the Food Stamp Act of 1977 is amended to read:

"(b) The value of the allotment provided any eligible household shall not be considered income or resources for the purposes of any Federal, State, or local laws relating to taxation.".

REPORTING OF ABUSES BY THE PUBLIC; NOTICE OF VERIFICATION

SEC. 309. (a) Section 9 of the Food Stamp Act of 1977 is amended by adding at the end thereof a new subsection (e) to read:

"(e) Approved retail food stores shall display a sign providing information on how persons may report abuses they have observed in the operation of the food stamp program.".

(b) Section 11(e)(2) of the Food Stamp Act of 1977 is amended by inserting after the second period the following new sentence: "Each application form shall also contain in understandable terms and in prominent and boldface lettering a statement that the information provided by the applicant in connection with the application for a coupon allotment will be subject to verification by Federal, State, and local officials to determine if such information is factual and that if any part of such information is incorrect, food stamps may be denied to the applicant, and that the applicant may be subjected to criminal prosecution for knowingly providing incorrect information.".

SIXTY-DAY TRANSFER OF CERTIFICATION

SEC. 310. Section 11 of the Food Stamp Act of 1977 is amended by striking subsection (b).

RESTRICTIONS ON REPLACEMENT OF COUPONS

SEC. 311. Section 11 of the Food Stamp Act of 1977 is amended by adding the following new subsection:

"(b) The Secretary shall limit replacements for coupons destroyed after receipt by a household to one month's replacement for any household in any six-month period, and no replacement shall be provided for coupons lost or misplaced after receipt by a household.".

NOTICE OF RECERTIFICATION

SEC. 312. Section 11(e)(4) of the Food Stamp Act of 1977 is amended by striking "immediately".

DISCLOSURE OF INFORMATION ON RECIPIENTS

SEC. 313. Section 11(e)(8) of the Food Stamp Act of 1977 is amended by striking the semicolon at the end and inserting in lieu thereof a comma and the following: "except that, notwithstanding any other provision of law, all information obtained under this Act from an applicant household shall be made available, upon request, to local, State, or Federal law enforcement officials for the purpose of investigating a possible or alleged violation of this Act or any regulation issued under this Act;".

PROMPT ACTION TO REDUCE OR TERMINATE BENEFITS

SEC. 314. Section 11(e)(10) of the Food Stamp Act of 1977 is amended by changing the semicolon at the end thereof to a colon and inserting immediately after the colon the following: "Provided further, That in the event the State agency receives a clear written statement from the household that contains information that, in its totality, requires reduction or termination of that household's benefits, the State agency may act immediately to reduce or terminate the household's benefits and may provide such individual notice of agency action to the household as late as the date on which the action becomes effective;".

LIMITATIONS ON RESTORATION OF LOST BENEFITS

SEC. 315. (a) Section 11(e)(11) of the Food Stamp Act of 1977 is amended to read:

"(11) upon receipt of a request from a household, for the prompt restoration in in the form of coupons to a household of any allotment or portion thereof which has been wrongfully denied or terminated, except that allotments for any period of time more than one year prior to the date such request is received by the State agency, or the date the State agency is notified or otherwise discovers the possible loss to a household, shall not be restored;".

(b) Section 15 of the Food Stamp Act of 1977 is amended by adding a new subsection at the end thereof to read:

"(h) In any judicial action arising under this Act any food stamp allotments found to have been wrongfully withheld shall be restored only for periods of not more than one year prior to the date of the commencement of such action, or in the case of an action seeking review of a final State agency determination, not more than one year prior to the date of the filing of a request with the State for the restoration of such allotments, or, in either case, not more than one year prior to the date the State agency is notified or otherwise discovers the possible loss to a household.".

USE AND AVAILABILITY OF UNEMPLOYMENT AND SOCIAL SECURITY INFORMATION

SEC. 316. (a) Section 11(e) of the Food Stamp Act of 1977 is amended by adding at the end thereof the following new paragraph:

"(21) that information available from the Social Security Administration under the provisions of section 6103(l)(7) of the Internal Revenue Code of 1954, and information available from agencies administering State unemployment compensation laws under the provisions of section 303(d) of the Social Security Act, shall be requested and utilized by the State agency (described in section 3(n)(1) of this Act) to the extent permitted under the provisions of such sections, except that the State agency shall not be required to request such information from the Social Security Administration if such information is available from the agency administering the State unemployment compensation laws.".

(b) Section 127(b)(3) of the Food Stamp Act Amendments of 1980 is amended by striking "1983" and inserting in lieu thereof "1982".

NUTRITION EDUCATION PROGRAM

SEC. 317. Section 11(f) of the Food Stamp Act of 1977 is amended to read:

"(f) To encourage the purchase of nutritious foods, the Secretary is authorized to extend food and nutrition education to reach food stamp program participants, using the methods and techniques developed in the expanded food and nutrition education and other programs.".

MINIMUM MANDATORY COURT SENTENCE FOR CRIMINAL OFFENSES; WORK RESTITUTION PROGRAM; ADDITIONAL PENALTIES

SEC. 318. Subsections (b) and (c) of section 15 of the Food Stamp Act of 1977 are amended to read:

"(b)(1) Subject to the provisions of paragraph (2) of this subsection, whoever knowingly uses, transfers, acquires, alters, or possesses coupons or authorization cards in any manner not authorized by this Act or the regulations issued pursuant to this Act shall, if such coupons or authorization cards are of a value of $100 or more, be guilty of a felony and shall, upon the first conviction thereof, be fined not more than $10,000 or imprisoned for not more than five years, or both, and, upon the second and any subsequent conviction thereof, shall be imprisoned for not less than six months nor more than five years and may also be fined not more than $10,000 or, if such coupons or authorization cards are of a value of less than $100, shall be guilty of a misdemeanor, and, upon the first conviction thereof, shall be fined not more than $1,000 or imprisoned for not more than one year, or both, and upon the second and any subsequent conviction thereof, shall be imprisoned for not more than one year and may also be fined not more than $1,000. In addition to such penalties, any person convicted of a felony or misdemeanor violation under this subsection may be suspended by the court from participation in the food stamp program for an additional period of up to eighteen months consecutive to that period of suspension mandated by section 6(b)(1) of this Act.

"(2) In the case of any individual convicted of an offense under paragraph (1) of this subsection, the court may permit such individual to perform work approved by the court for the purpose of providing restitution for losses incurred by the United States and the agency as a result of the offense for which such individual was convicted. If the court permits such individual to perform such work and such individual agrees thereto, the court shall withhold the imposition of the sentence on the condition that such individual perform the assigned work. Upon the successful completion of the assigned work the court may suspend such sentence.

"(c) Whoever presents, or causes to be presented, coupons for payment or redemption of the value of $100 or more, knowing the same to have been received, transferred, or used in any manner in violation of the provisions of this Act or the regulations issued pursuant to this Act, shall be guilty of a felony and, upon the first conviction thereof, shall be fined not more than $10,000 or imprisoned for not more than five years, or both, and, upon the second and any subsequent conviction thereof, shall be imprisoned for not less than one year nor more than five years and may also be fined not more than $10,000, or, if such coupons are of a value of less than $100, shall be guilty of a misdemeanor and, upon the first conviction thereof, shall be fined not more than $1,000 or imprisoned for not more than one year, or both, and, upon the second and any subsequent conviction thereof, shall be imprisoned for not more than one year and may also be fined not more than $1,000. In addition to such penalties, any person convicted of a felony or misdemeanor violation under this subsection may be suspended by the court from participation in the food stamp program for an additional period of up to eighteen months consecutive to that period of suspension mandated by section 6(b)(1) of this Act.".

STAFFING STANDARDS

SEC. 319. Section 16(b)(1) of the Food Stamp Act of 1977 is amended by striking ", including, but not limited to, staffing standards such as caseload per certification worker limitations,".

CORRECTIVE ACTION PLANS

SEC. 320. Section 16 of the Food Stamp Act of 1977 is amended by—

(1) inserting before the period at the end of the first sentence of subsection (c) the following ", and, effective October 1, 1981, which also meets the standard contained in paragraph (1)(B) of this subsection"; and

(2) in subsection (d), striking "October 1, 1978" and inserting in lieu thereof "October 1, 1981", and by inserting "(2)" after "subsection (c)".

SOCIAL SECURITY ACCOUNT NUMBERS

SEC. 321. The first sentence of section 16(f) of the Food Stamp Act of 1977 is amended by striking "may" and inserting in lieu thereof "shall".

AFDC AND SSI CASH-OUT PILOT PROJECTS

SEC. 322. Section 17(b)(1) of the Food Stamp Act of 1977 is amended by—

(1) inserting "the payment of the value of allotments in the form of cash to eligible households all of whose members are recipients of aid to families with dependent children under part A of title IV of the Social Security Act: *Provided*, That such cash payments shall be in standard monthly amounts varied to reflect the average allotment received by households of similar size, income, and expense characteristics," after "Social Security Act,";

(2) inserting ", other than a project involving the payment of standard monthly allotments to recipients of aid to families with dependent children authorized under this subsection," after "no project"; and

(3) changing the last sentence to read: "Any pilot or experimental project implemented under this paragraph involving the payment of the value of allotments in the form of cash to eligible households all of whose members are either age sixty-five or over or entitled to supplemental security income benefits under title XVI of the Social Security Act shall be continued until October 1, 1985, if the State so requests.".

VARIABLE ALLOTMENT STUDY; REPORTS

SEC. 323. (a) The Secretary is directed to evaluate the feasibility, benefits, and disadvantages of adjusting household allotments with respect to the age and sex of household members, including an evaluation of the individualized allotment issues and conclusions in the General Accounting Office report of June 13, 1978 (Federal Domestic Food Assistance Programs—A Time for Assessment and Change), and submit the results of that study to Congress no later than July 1, 1982.

(b)(1) Section 5(g) of the Food Stamp Act of 1977 is amended by striking everything after "exceeds $4,500" and inserting a period in lieu thereof.

(2) Section 8(a) of that Act is amended by striking the last sentence.

(3) Section 17 of that Act is amended by striking subsections (d) and (e).

TITLE IV—AUTHORIZATION FOR APPROPRIATIONS; APPROPRIATION ACCOUNTS; EFFECTIVE DATES

SEC. 401. The first sentence of section 18(a)(1) of the Food Stamp Act of 1977 is amended by—

(1) striking "and" after "September 30, 1980;";

(2) striking "$9,739,276,000" and inserting in lieu thereof "$11,480,000,000"; and

(3) inserting before the period at the end thereof the following: "; not in excess of $10,870,000,000 for the fiscal year ending September 30, 1982; not in excess of $11,290,000,000 for the fiscal year ending September 30, 1983; not in excess of $11,325,000,000 for the fiscal year ending September 30, 1984; and not in excess of $11,840,000,000 for the fiscal year ending September 30, 1985.".

APPROPRIATION ACCOUNTS

SEC. 402. Section 18 of the Food Stamp Act of 1977 is amended by adding a new subsection (e) to read:

"(e) Funds collected from claims against households or State agencies, including claims collected pursuant to sections 7(f), 11(h), and 16(g) of this Act, claims resulting from resolution of audit findings, and claims collected from households receiving overissuances, shall be credited to the food stamp program appropriation account for this fiscal year in which the collection occurs. Funds provided to State agencies under section 16(c) of this Act shall be paid from the appropriation account for this fiscal year in which the funds are provided.".

EFFECTIVE DATES

SEC. 403. Except as otherwise specifically provided, the amendments made by this Act shall be effective and implemented upon such dates as the Secretary may prescribe, taking into account the need for orderly implementation. The amendments made by section 401 of this Act shall be effective upon enactment.

TITLE V—COMMODITY DISTRIBUTION PROGRAMS

EXTENSION OF AUTHORITIES, PENALTIES FOR FRAUD, AND MISCELLANEOUS PROVISIONS

SEC. 501. (a) Effective October 1, 1981, section 4 of the Agriculture and Consumer Protection Act of 1973 is amended by—

(1) striking "1978, 1979, 1980, and 1981", in the first sentence of subsection (a) and inserting in lieu thereof: "1982, 1983, 1984, and 1985"; and

(2) adding a new subsection (c) to read:

"(c) Whoever embezzles, willfully misapplies, steals or obtains by fraud any agricultural commodity or its products (or any funds, assets, or property deriving from donation of such commodities) provided under this section, or under section 416 of the Agricultural Act of 1949 (7 U.S.C. 1431), section 32 of the Act of August 24, 1935 (7 U.S.C. 612c), or section 709 of the Food and Agriculture Act of 1965 (7 U.S.C. 1446a–1), whether received directly or indirectly from the United States Department of Agriculture, or whoever receives, conceals, or retains such commodities, products, funds, assets, or property for personal use or gain, knowing such commodities, products, funds, assets, or property have been embezzled, willfully misapplied, stolen, or obtained by fraud shall, if such commodities, products, funds, assets, or property are of a value of $100 or more, be fined not more than $10,000 or imprisoned not more than five years, or both, or if such commodities, products, funds, assets, or property are of value of less than $100, shall be fined not more than $1,000 or imprisoned for not more than one year, or both.".

(b) Effective October 1, 1981, section 5(a) of that Act is amended to read:

"(a) In carrying out the supplemental feeding program (hereinafter referred to as the "commodity supplementary food program") to which reference is made in section 4 of this Act, the Secretary of Agriculture shall provide to State agencies administering the program, for each of the fiscal years 1982 through 1985, funds appropriated from the general fund of the Treasury in amounts equal to the administrative costs of State and local agencies in operating the program, except that the funds provided to State agencies each fiscal year may not exceed 15 per centum of the amount appropriated for the provision of commodities to State agencies.".

TITLE VI—FOOD STAMP CASH-OUT OF SSI RECIPIENTS

MODIFICATION OF CASH-OUT STATUS

SEC. 601. Effective July 1, 1981, section 8(d) of Public Law 93–233 is amended to read:

"(d) Upon the request of a State, the Secretary shall find, for purposes of the provisions specified in subsection (c), that the level of such State's supplementary payments of the type described in 1616(a) of the Social Security Act has been specifically increased for any month after June 1976 so as to include the bonus value of food stamps if: (1) the Secretary has found that such State's supplementary payments in June 1976 were increased to include the bonus value of food stamps; and (2) such State continues to meet the requirements of section 1618 of such Act for each month after June 1976 and up to and including the month for which the Secretary is making the determination.".

TITLE VII—PUERTO RICO

REDUCTION OF PUERTO RICO INCOME LIMITS

SEC. 701. Effective October 1, 1981, the proviso in section 5(c) of the Food Stamp Act of 1977 is amended to read: "*Provided*, That in no event shall the standards of eligibility for the Virgin Islands of the United States or Guam exceed those in the forty-eight contiguous States, and such standards for Puerto Rico shall be 55 percent of those in the forty-eight contiguous States."

BLOCK GRANT

SEC. 702. (a) Effective April 1, 1982, the Food Stamp Act of 1977 is amended by—

(A) striking "Puerto Rico," in section 3(m), clause (3) of section 3(o), section 5(b), wherever it appears in section 5(c) before the proviso, and wherever it appears in section 5(e) and striking "$50," and "$40," in section 5(e); and

(B) striking everything in section 5(c) after the first "forty-eight contiguous States" and inserting a period in lieu thereof.

(b) Effective April 1, 1982, that Act is further amended by adding at the end thereof the following new section:

"BLOCK GRANT

"SEC. 19. (a)(1)(A) From the sums appropriated under this Act the Secretary shall, subject to the provisions of this subsection and subsection (b), pay to the Commonwealth of Puerto Rico not to exceed $825,000,000 for each fiscal year to finance 100 per centum of the expenditures for food assistance provided to needy persons, and 50 per centum of the administrative expenses related to the provision of such assistance.

"(B) The payments to the Commonwealth for any fiscal year shall not exceed the expenditures by that jurisdiction during that year for the provision of the assistance the provision of which is included in the plan of the Commonwealth approved under subsection (b) and 50 per centum of the related administrative expenses.

"(2) The Secretary shall, subject to the provisions of subsection (b), pay to the Commonwealth for the applicable fiscal year, at such times and in such manner as the Secretary may determine, the amount estimated by the Commonwealth pursuant to subsection (b)(1)(A)(iv), reduced or increased to the extent of any prior overpayment or current underpayment which the Secretary determines has been made under this section and with respect to which adjustment has not already been made under this subsection.

"(b)(1)(A) In order to receive payments under this Act for any fiscal year, the Commonwealth shall have a plan for that fiscal year approved by the Secretary under this section. By July 1 of each year, if the Commonwealth wishes to receive payments, it shall submit a plan for the provision of the assistance described in subsection (a)(1)(A) for the following fiscal year which—

"(i) designates a single agency which shall be responsible for the administration, or supervision of the administration, of the program for the provision of such assistance;

"(ii) assesses the food and nutrition needs of needy persons residing in the Commonwealth;

"(iii) describes the program for the provision of such assistance, including the assistance to be provided and the persons to

whom such assistance will be provided, and any agencies designated to provide such assistance, which program must meet such requirements as the Secretary may by regulation prescribe for the purpose of assuring that assistance is provided to the most needy persons in the jurisdiction;

"(iv) estimates the amount of expenditures necessary for the provision of the assistance described in the program and related administrative expenses, up to the amount provided for payment by subsection (a)(1)(A); and

"(v) includes such other information as the Secretary may require.

"(B)(i) The Secretary shall approve or disapprove any plan submitted pursuant to subparagraph (A) no later than August 1 of the year in which it is submitted. The Secretary shall approve any plan which complies with the requirements of subparagraph (A). If a plan is disapproved because it does not comply with any of the requirements of that paragraph the Secretary shall, except as provided in subparagraph (B)(ii), notify the appropriate agency in the Commonwealth that payments will not be made to it under subsection (a) for the fiscal year to which the plan applies until the Secretary is satisfied that there is no longer any such failure to comply, and until the Secretary is so satisfied, the Secretary will make no payments.

"(ii) The Secretary may suspend the denial of payments under subparagraph (B)(i) for such period as the Secretary determines appropriate and instead withhold payments provided for under subsection (a), in whole or in part, for the fiscal year to which the plan applies, until the Secretary is satisfied that there is no longer any failure to comply with the requirements of subparagraph (A), at which time such withheld payments shall be paid.

"(2)(A) The Commonwealth shall provide for a biennial audit of expenditures under its program for the provision of the assistance described in subsection (a)(1)(A), and within one hundred and twenty days of the end of each fiscal year in which the audit is made, shall report to the Secretary the findings of such audit.

"(B) Within one hundred and twenty days of the end of each fiscal year, the Commonwealth shall provide the Secretary with a statement as to whether the payments received under subsection (a) for that fiscal year exceeded the expenditures by it during that year for which payment is authorized under this section, and if so, by how much, and such other information as the Secretary may require.

"(C)(i) If the Secretary finds that there is a substantial failure by the Commonwealth to comply with any of the requirements of subparagraphs (A) and (B), or to comply with the requirements of subsection (b)(1)(A) in the administration of a plan approved under subsection (b)(1)(B), the Secretary shall, except as provided in subparagraph (C)(ii), notify the appropriate agency in the Commonwealth that further payments will not be made to it under subsection (a) until the Secretary is satisfied that there will no longer be any such failure to comply, and until the Secretary is so satisfied, the Secretary shall make no further payments.

"(ii) The Secretary may suspend the termination of payments under subparagraph (C)(i) for such period as the Secretary determines appropriate, and instead withhold payments provided for under subsection (a), in whole or in part, until the Secretary is satisfied that there will no longer be any failure to comply with the requirements of subparagraphs (A) and (B) and subsection (b)(1)(A), at which time such withheld payments shall be paid.

"(iii) Upon a finding under subparagraph (C)(i) of a substantial failure to comply with any of the requirements of subparagraphs (A) and (B) and subsection (b)(1)(A), the Secretary may in addition to or in lieu of any action taken under subparagraphs (C)(i) and (C)(ii), refer the matter to the Attorney General with a request that injunctive relief be sought to require compliance by the Commonwealth of Puerto Rico, and upon suit by the Attorney General in an appropriate district court of the United States and a showing that noncompliance has occurred, appropriate injunctive relief shall issue.

"(c)(1) The Secretary shall provide for the review of the programs for the provision of the assistance described in subsection (a)(1)(A) for which payments are made under this Act.

"(2) The Secretary is authorized as the Secretary deems practicable to provide technical assistance with respect to the programs for the provision of the assistance described in subsection (a)(1)(A).

"(d) Whoever knowingly and willfully embezzles, misapplies, steals, or obtains by fraud, false statement, or forgery, any funds, assets, or property provided or financed under this section shall be fined not more than $10,000 or imprisoned for not more than five years, or both, but if the value of the funds, assets or property involved is not over $200, the penalty shall be a fine of not more than $1,000 or imprisonment for not more than one year, or both.".

(c) Notwithstanding the provisions of section 19 of the Food Stamp Act of 1977, as added by this section, the amount payable to Puerto Rico under section 19 for fiscal year 1982 shall be $413,000,000, and the Secretary is authorized to grant such waivers of the requirements imposed by that section with respect to that fiscal year as the Secretary determines appropriate to carry out the purposes of that section.

Mr. LEAHY. Mr. President, I ask unanimous consent that Janet Breslin of my staff and Rob Fersh of the Agriculture Committee staff be accorded the privilege of the floor throughout the debate and votes on S. 1007, the Food Stamp Amendments of 1981.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from North Carolina is recognized.

Mr. HELMS. I thank the Chair.

Mr. President, I suppose I should say I am pleased to report to the Senate today legislation reported from the Committee on Agriculture, Nutrition, and Forestry that would reform significantly the existing food stamp program. However, after hearing the time agreement I am somewhat less than pleased because I hope we can handle it, I say to my distinguished majority leader, in less time than that.

Mr. BAKER. Mr. President, will the Senator yield to me?

Mr. HELMS. Mr. President, I am delighted to yield.

Mr. BAKER. I hope so also.

As a matter of fact, I hope we can get to third reading of the bill this afternoon even though we stack votes until tomorrow at 3 p.m.

I thank the Senator for yielding

Mr. HELMS. Mr. President, it should be evident to all those who concern themselves with this program that it is in substantial need of major revision, and that probably is the nearest thing to an understatement that I am going to make today, because if there has ever been a Federal program that cried out for reform, it is this program. Untold millions of Americans who have personally witnessed the waste and abuse involved in this program will testify to that.

The annual cost of the food stamp program is now $11.3 billion; without reform, the Congressional Budget Office estimates the cost will skyrocket to over $12.3 billion next year.

Of course, this cost represents a doubling during the past 3 years; that is a 100-percent increase in the cost of the food stamp program during the past 3 years. Emergency supplemental authorizations and appropriations for this program have become annual occurrences. They always run out of money.

The food stamp program is now the second largest needs-based Federal assistance program in existence. It provides monthly benefits to 23 million Americans. Monthly participation in the food stamp program has soared into the stratosphere, especially since this Congress unwisely, in the judgment of this Senator, voted in 1977 to eliminate the requirement that food stamp recipients pay any portion of the cost. The Congressional Budget Office estimates that 70 to 80 percent of the increase since 1979 is directly attributable to the removal of the purchase requirement in the food stamp program.

Probably more than any other Federal program, the food stamp program has been the object of citizen outrage because of perceived waste, abuse, and mismanagement.

I wish Senators could have heard the testimony of the many people who appeared before our committee, including those who have investigated this program—the corruption, the waste, and the abuse of it. I wish that Senators could examine the files of correspondence that we have received from citizens all across this land, who almost always begin by saying, "We do not begrudge one penny to the truly needy, but we do resent the waste of our tax money," and then they go ahead and describe various episodes which they themselves have seen in terms of waste and abuse.

The committee has gone a fairly long way in responding to the public concern about the food stamp program. We can do more, and I hope by the amendment process during the debate on this bill that we will do more.

Numerous proposals recommended by the administration have been incorporated into the bill which is now before the Senate. Additionally, a number of provisions advanced by members of the Agriculture Committee are included. Several provisions to strengthen significantly the penalties for fraud and abuse in the program are included in this bill.

During hearings on the bill the committee took testimony from numerous expert witnesses who outlined major areas of fraud and abuse within the program which so sorely need correcting.

Mr. President, let me outline the major provisions of the legislation as reported by the Committee on Agriculture, Nutrition, and Forestry.

MAJOR PROVISIONS

Gross income eligibility.—A single set of gross income eligibility limits would be required, as opposed to the present system of income limits that vary according to the type of household income (earned vs. unearned) and whether a household has special (shelter, dependent-care, or medical) expenses. The Committee bill would establish the gross income eligibility limits in all cases at 130 percent of the applicable Federal "poverty level."

Inflation indexing.—The various provisions indexing food stamp benefits for inflation would be revised to delay future benefit increases. Inflation adjustments to food stamp monthly allotment levels, governed by the cost of the Department of Agriculture's thrifty food plan, are now scheduled for January of each year; the Committee bill would delay them until April of 1982, July of 1983, and October of each year thereafter. Food stamp deduction levels, which limit the amount of household income that is disregarded in setting benefits, would be frozen at their 1981 amounts until July 1983; they are now scheduled for inflation adjustments each January. Indexing would occur again in July 1983 and in October each year thereafter, using a version of the Consumer Price Index that does not include a factor for homeownership costs.

Earned income deduction.—Under present law, households with earned income have 20 percent of any earnings deducted from their income before benefits are calculated, enabling them to receive larger benefits. The Committee bill would reduce this earned income deduction to 15 percent of earnings, thereby counting more income and reducing benefits.
